THE ILLUSTRATED
BIBLE DICTIONARY
SENNACHERIB SEATED ON HIS THRONE BEFORE LACHISH.
(From a bas-relief in the Brit. Mus.)
THE ILLUSTRATED BIBLE DICTIONARY

EDITED
BY THE REV. WILLIAM C. PIERCY, M.A.
DEAN AND CHAPLAIN OF WHITELANDS COLLEGE

WITH COLOURED MAPS AND 365 ILLUSTRATIONS

NEW YORK
E. P. DUTTON AND COMPANY
1908
PREFACE

MODERN scholarship, research, and discovery have thrown a flood of new light upon the Bible during recent years; especially in regard to textual criticism, comparative religion, the knowledge of Oriental languages and dialects, the deciphering of inscriptions, archaeology, geography, etc.

It has been felt, therefore, that the time was ripe for putting such results before the general public in a compact and accessible form, such as would be best found in a Bible Dictionary in one volume; and a very large number of bishops, scholars, teachers, archaeologists, linguists, and divines were consulted, with the result that their replies showed a general consensus of opinion as to the need of such an enterprise, and to them the Editor is indebted for their warm approval and encouragement and for much valuable advice. The spirit in which the endeavour has been made to produce a volume worthy of such commendations of the scheme is best expressed by a quotation from our prospectus: “The defence of Holy Scripture is a sacred duty of the Church of God; and the present work has been carried out in the faith that it will be a contribution to a deeper knowledge of, and therefore greater reverence for, the word of God”; and it is the earnest desire of the Editor and contributors that this aspiration may be realized.

While this Dictionary is frankly “conservative” in the right sense of that much misunderstood term, none of the additions of value made to our knowledge by “criticism,” which are within the scope of a volume of this size, have been neglected. On this point the definition of the word “conservative,” given in our instructions to writers, may help to avoid misinterpretation of our purpose: “By ‘conservative’ is meant that attitude of mind which, while welcoming all ascertained results of investigation, declines to accept any mere conjectures or theories as final conclusions, and believes that the Old Testament will emerge with reinforced authority from the ordeal of criticism as the New Testament did in the last generation.” In short, the aim of the writers has been, to quote our prospectus again, to combine “modern research with ancient faith.” The need of this was excellently expressed, many years ago, by Bishop Lightfoot, and his words remain equally true to-day: “In criticism as in politics, the voice of the innovators, even though they may not be numerous, cries aloud, and thus gives the impression of numbers; while the conservative opinion of the majority is unheard and unnoticed.”

The list of scholars who have contributed to the Dictionary is the best guarantee of the thoroughness of the work, and special attention has been given to the archaeology, geography, bibliography and illustrations, and it is hoped and believed that more that is of real illustrative value has been gathered together under each of these heads than has ever before been attempted in a work of this size, including much hitherto unpublished information; while the articles on the most important topics of Divinity and of Textual questions are all written by acknowledged experts and are confidently commended to the reader’s perusal.

So far as the necessary limits of space have allowed, completeness has been
PREFACE

aimed at, and, thanks to the exceedingly kind and painstaking efforts of contributors, the Editor ventures to think that this will be found to have been attained to an even surprising degree, considering the compass of the volume.

The primary aim has been to make it really, as it is called, a Dictionary of Bible names and things, and it is believed that the name of every person and place is included; but it has, to our great satisfaction, been found possible, by strict condensation, by the avoidance of verbiage, and by the exclusion of such notes as belong more properly to a commentary or to a word-book, to admit also articles on ideas and doctrines contained in the Bible.

The question of how far the high aims set forth have been attained is for readers to judge, but it is with deep gratitude to the many contributors that the Editor confidently records his belief that the more closely the volume is studied and used, the more it will be found to be of unique value both to the student and to the general public.

It remains to give a few explanations of the details of the plan of the book which will aid in the intelligent use of the volume.

Alternative Views.—It was entirely in accordance with our general purpose and aim that writers, while selected with great care, when once entrusted with their work were given a free hand, and, consequently, varying opinions and conclusions upon matters of detail will be found in different articles; and, in the most important of the cases where this occurs, cross-references are given to enable the reader to see readily both views and to choose between them. The student will undoubtedly find that this liberty of stating different views has contributed very greatly to the value of the work. No contributor must be taken to assent, of necessity, to the conclusions in any articles but his own, nor must authors be in all cases considered to be entirely responsible for the cross-references inserted in, or for the bibliographies subjoined to, their articles.

Bibliography.—This has been drawn up in each case, not necessarily to reinforce the particular views set forth in the articles—on the contrary, the aim has often been to indicate where other views might be found, which, owing to considerations of space, could not be fully set forth—but primarily to encourage students to read more thoroughly the subject treated. With this purpose in view the lists of books have been very carefully selected. Any attempt—which, moreover, could never be anything but a failure—to give an "exhaustive" bibliography only tends to discourage and perplex the student, and the aim of our bibliographies is to help, and therefore to direct students to the most accessible sources of further knowledge, rather than to make a vain and pretentious display of "authorities."

Cross-references.—The system adopted has been to print the name of the article referred to in capitals, inserted in square brackets when not to be read continuously in the text, or without the brackets when intended to be so read. To this rule two exceptions only have been made, and neither of them will prove troublesome to the reader—(a) in a very few articles, and those only some of the longer ones, it was found convenient to use capitals for the headings of sub-divisions, where there was no possibility of the intelligent reader mistaking them for cross-references; (b) at the special request of one contributor of the Jewish Faith, who had a conscientious objection (which it was a real pleasure to the Editor to respect) to write the sacred Name Jehovah, the word God or Lord in capitals (as in A.V.) appears in his articles whenever Jehovah is intended, and the same familiar form (Lord) has been allowed to stand, with the same meaning, in some other articles. In all other cases words in capitals invariably indicate that further information bearing upon the subject in hand may be found under the heading quoted.

Index.—The cross-references, together with the alphabetical arrangement of the book, are the most valuable and complete "index" which it is possible
to have, and one which is in the form most convenient to the student; and they obviate, to a great extent, the necessity for exhaustive indexes. The common failing of many indexes is to include so large a variety of trivial matter as to submerge their usefulness in a flood of detail and to weary the searcher after particular information. In the case of a book which is arranged alphabetically, extensive indexes are a confession of failure in carrying out a plan that ought, for the most part, to be in itself sufficient. Hence we only include in this volume one index, for the insertion of which there exists a special reason. The vast majority of the passages of Scripture, in regard to which information will be sought herein, will be readily found under the head of the proper names or subjects which are naturally suggested by the passage itself. But there must remain a comparatively small number which are treated, for the most part incidentally, under a heading where the general reader might not readily think of searching for them. Therefore a brief supplementary index of such passages only is added at the end of the volume.

Bible References are always to the Authorized Version unless otherwise stated.

Headings.—The spelling in the headings of articles is uniformly that of the Authorized Version, but, where this is obsolete, the usual form is used in the text, and where necessary a cross-reference is also given under the more familiar orthography. The accents attached to most of the proper names in the headings are intended as a guide to the correct Hebrew or Greek accentuation; but some very familiar names—e.g. Bethlehem, Deborah, etc.—which have become established in the English language with an accentuation different from that which would be correct in the original tongue, have been left unaccented. Doubtless, also, in many cases of accented names, English readers may prefer to use a current “English” form, but the student will be grateful for the indication of the original accentuation.

Transliteration of Hebrew names and words has been uniformly adopted, except in cases where there was a special reason for retaining the Hebrew characters—as, e.g., in the case of an emended reading based upon the form of the letters, or of a distinction between two similarly pronounced words. For the system of transliteration adopted the several writers are not responsible; a practical uniformity in this respect being obviously desirable. The Editor desires to acknowledge with gratitude the care which has been exercised by those who kindly undertook the, by no means light, task of checking all the transliteration:—in the case of the Hebrew, the Rev. Canon J. T. Fowler, D.C.L.; in the Syriac, Arabic, etc., P. S. P. Handcock, Esq., M.A., of the British Museum.

The general aim has been to enable the reader who is unacquainted with these languages to read intelligently and to recognize the same words when used in different connections.

The system of Hebrew transliteration here followed is on that scientific basis which is adopted by Davidson and others. Each consonant, used as such, is indicated by a single sign, aleph by 'a, ayin by 'e, heth, teth, and samekh by h, t, and s, cadhe by ç, but beth, gimel, etc., by bh, gh, etc., when immediately following vowel sounds. Essentially long vowels (usually expressed in Hebrew by quiescent consonants) are marked by the circumflex ('), accidentally long by 'a, ordinary short by the unmarked vowel, and the shewas by 'a, è, and ö. The accent in Hebrew words is normally on the last syllable; in certain cases it is on the penultimate, but never further back.

In our representation of other Semitic words (Arabic, Syriac, etc.) we have adopted the current system of transliteration; the only exception being the adoption of q instead of k as the symbol of the Semitic qoph. In a very few
instances, in regard to these less-known languages, the special wishes of authors have been allowed to override an iron uniformity, in cases where confusion in the mind of the intelligent reader would be an impossibility. Such are (a) the variations between Tell and Tel, in regard to which strong differences of opinion exist amongst experts; this word having been left in each case as the several authors have written it; (b) Dr. Pinches and some others particularly desired to be allowed to use the symbol š in place of our usual transliteration (sh) in Assyrian names upon which they write with special authority; (c) the form Peshîṭṭâ often appears, by desire, as representing more closely the actual late Syriac pronunciation than the orthographically correct Peshîṭṭâ which other writers have preferred; and finally (d) the familiar “English” forms of some names—e.g. Jehovah, Assur-bani-pal, Kimchi, etc., etc.—have been commonly used, although the more exact transliteration has been inserted when desired.

In conclusion, the Editor brings to a close an arduous undertaking with the expression of a meed of thanks which he feels most deeply and sincerely to be due to the hundred helpers who have by their courtesy, consideration, care, and enthusiasm made that task a very pleasant one. It is by no means a merely formal acknowledgment on his part when he places this gratitude upon record. Their names will be found in the adjoining list of writers; but to these must be added the publisher to whose enterprise and foresight the conception of the volume was originally due, and whose unvarying kindness and unsparing liberalty have enabled it to be carried out on a scale commensurate with its importance; and also those workers who have taken a less prominent part in the production of the volume and in checking the several sets of proofs through which it has passed; and very especially to A. H. Hallam Murray, Esq., who has personally expended a very large amount of valuable time, and given to the Editor the benefit of his great experience, in supervising the obtaining and the production of the large number of new illustrations which adorn this volume—a task the magnitude of which only those who have assisted in a similar undertaking can appreciate; and last, but by no means least, to Colonel C. R. Conder, LL.D., whose most valuable assistance and minute care have been unsparingly given—to the great advantage of the book—in the reading of the whole of the final proofs. The ultimate responsibility in all these details rests, however, with none of those named, but with the Editor only. All shortcomings must be placed to his account; all credit for the success and usefulness of the volume to the account of such a staff of fellow-workers as the Editor sincerely feels can never have been equalled for loyalty, kindness, promptness, and careful work in their several departments. And, finally, if the work be blessed, as it is our earnest hope it shall be, to the building up and strengthening of an intelligent faith in, and study of, Holy Writ, Laus Deo.

Wm. C. Piercy.
LIST OF CONTRIBUTORS

INITIALS

H.C.B. Rev. H. C. Batterbury, B.A.
Assistant Diocesan Inspector (London).

Principal of St. David's College, Lampeter; formerly Fellow, Tutor, and
Vice-Principal of Brasenose College, Oxford.

E.R.B. Rev. E. R. Bernard, M.A.
Canon and Chancellor of Salisbury, Examining Chaplain to the Bishop of
Salisbury, Hon. Chaplain to the King; formerly Fellow of Magdalen
College, Oxford.

Vicar of St. Philip and St. James, Oxford; formerly Fereday Fellow of
St. John's College, Oxford.

G.H.B. Rev. G. H. Box, M.A.
Vicar of Linton; formerly Hebrew Master at Merchant Taylors' School, E.C.

F.E.B. Rev. F. E. Brightman, M.A.
Fellow and Tutor of Magdalen College, Oxford, and Prebendary of Lincoln.

R.B. Rev. R. Brook, M.A.
Fellow and Tutor of Merton College, Oxford.

C.L.B. Rev. C. L. Brown, M.A.
Fellow of Magdalen College, Oxford.

A.E.B. Rev. A. E. Burn, M.A., D.D.
Rector of Handsand, Examining Chaplain to the Bishop of Lichfield,
and Prebendary of Lichfield.

F.W.B. Rev. F. W. Bussell, M.A., D.D.
Rector of Sizeland, Fellow and Vice-Principal of Brasenose College, Oxford.

Bournemouth.

C.R.C. Colonel C. R. Conder, M.A., LL.D., M.R.A.S.
Cheltenham.

W.H.D. Rev. W. H. Daunney, M.A., B.D.
Bury St. Edmunds.

A.C.D. Rev. A. C. Deane, M.A.
Vicar of Holy Trinity, Malvern, and Editor of The Treasury.

C.D. Rev. A. Cecil Dixon, B.A.
Vice-Principal of Salisbury Theological College.

Convocation Senator in Theology, University of London.

J.C.V.D. Rev. J. C. V. Durell, M.A., B.D.
Rector of Rotherhithe; formerly Fellow of Clare College, Cambridge.

H.V.S.E. Rev. H. V. S. Eck, M.A.
Rector of Bethnal Green, E.

J.D.E. J. D. Eisenstein, Esq.
Editor of The Hebrew Encyclopædia ("Ozar Yisrael").

C.L.F. Rev. C. L. Feltoe, M.A., D.D.
Rector of Duxford, Examining Chaplain to the Bishop of Ely; formerly
Fellow of Clare College, Cambridge.

Fellow and Dean of Jesus College, Cambridge, Hon. Canon of Peterborough,
and Examining Chaplain to the Bishop of Peterborough.

Aa'an. [Addan.]

Aaron, son of Amram and Jochebed, and elder brother of Moses and Miriam (Num. 26:59), a Levite, who could "speak well" (Ex. 4:14), and was therefore qualified to be the "mouth" and "interpreter" of his brother Moses, who was slow of speech (4:16). He thus became not only the organ of communication with the Israelites and Pharaoh (4:30, 7:2), but also the actual instrument of working miracles and the miracles of the Exodus (7:19), and his prominence in the work of his people's deliverance was recognized in later days (1 Sam. 12:6; Ps. 77:20). He was indispensable to his brother, whose weary arms he helped to uphold during the struggle against Amalek (Ex. 17:12), but was incapable of leadership for self, yielding to pressure from the people in Moses' absence and making the golden calf (32:4). His weakness was rewarded by seeing "a feast to the Lord" degraded to the lowest form of heathen sensuality (Ex. 32:5, 25; 1 Cor. 10:7). He was brought to a sense of his sins by Moses' rebuke (Ex. 32:22), and was forgiven by God in response to Moses' prayer (Ex. 32:33; Deut. 9:20). It was after this that Moses by God's command delegated to Aaron the office of High-Priest (Ex. 29; Lev. 8). The solemnity of the office and the need for reverence in the discharge of its duties was vividly brought home by the working of a sin offering, Aaron's two eldest sons, for offering strange fire, perhaps through being intoxicated (Lev. 10:1-2, 9). Thenceforward Aaron is specifically "the priest" (Ex. 31:10, 35:19, 38:21; Lev. 13:2; Num. 18:28), who stays a plague by an offering of incense (Num. 16:46-48); to his charge the tabernacle is committed (4:5, 19, 27, 31); and to him the Levites are given in exchange for the firstborn (3:41). Against his pre-eminence Korah and his companions rebelled, but it was vindicated by the blossoming of his rod (17:1-11). The only occasion on which his individual character is seen is when, prompted by Miriam, he complained against Moses (12:2), but he speedily repented; and leaning, as he always did otherwise, on Moses, it is not strange that he should have shared his sin at Meribah and its punishment (20:10-12). His death soon followed, hastened on perhaps by exposure to a sandstorm. It took place on Mount Hor, after the transference of his robes and office to his son Eleazar, who afterwards was present at his death and performed his burial (20:28). So he was "gathered unto his people" (20:24)—the phrase which speaks of the faith of those days in a conscious life beyond the grave. He had been married to Zipporah, daughter of Jether the Getherite, by whom he had a son, Gershon (Num. 26:59), and a daughter, named with an exception of Aaron for Levi, were deposited in the tabernacle "before the testimony" for a night. In the morning it was found that Aaron's rod had put forth buds, blossoms, and ripe almonds. This sign was accepted as proof of the right of the family of Aaron to the priesthood. This rod was to be put back "before" the testimony; according to Heb. 9:4 it was in the ark. [ARK OF THE COVENANT] See further, Jewish Encyc. 1. 5. [H.I.]

Ab (father), an element in the composition of many proper names, of which Abba is an Aram. form. Applied to God by Jesus Christ (Mk. 14:36), and by St. Paul (Ro. 8:15; Gal. 4:6).

Ab. [MONTHS.]

Abacuc (Abaccuc) = Habakkuk.

Abaddon (Abaddón; LXX. "Ἄπωλλεν; lit. ruin, destruction) occurs in O.T. in the Wisdom literature only. It is always (unless Job 31:12 is an exception) a proper noun, denoting that part of the intermediate state (sheōl) which is reserved for the punishment of the wicked. In Job 28:6, Pr. 15:11, 27:20, it is joined with sheōl; in Ps. 88:11 with the grave; in Job 28:22 with death. This last passage, in which Abaddon and Death are personified, forms a transition to N.B.i.b. In Rev. 9:11 Abaddon appears as Apollyon (Ἄπωλλος, "Destroyer"), the angel, not of Sheol or Hades, but of the Abyss (Gehenna), and king of the tormenting locusts. Perhaps we have here, not a person, but a vivid personification, so that in N.T. Apollyon or Abaddon is simply a name of hell (Gehenna). Rabbinical usage, which makes Abaddon the lowest compartment of Gehenna, confirms this. [Asmodeus.]

[11.]
Abadias, son of Jezclus (1 Esd.8.35) = Obadias, 7, son of Jehiel (Ezr.9.9).

Abagtha, one of the seven eunuchs in the Persian court of Abasis (Esth.1.10).

Abana (Amanah, R.V. marg.), one of the "rivers of Damascus" (2K.5.12). The Barada and the 'Avaj are now the chief streams of Damascus, and there is little doubt that the former is the Abana and the latter the Pharpar. The Barada rises in the Anti-libanus near Zabdan, and is joined by an affluent from 'Amu Fijj further south; the main source is some 23 miles from the city, after flowing through which it runs across the plain, till it loses itself in the lake Bahret-el-Qibliyeh. [c.r.c.]

Abarim, the mountains E. of Jordan, in Moab (Num.27.12,35,47; Deut.32.49; also R.V. Je.22.20, A.V. passages). [Nero.] For Ite-abarim, see 1In. [c.r.c.]

Abba. [Ab.]

Abda.—1. Father of Adoniram (1K.4.6).

—2. Son of Shammua (Ne.11.17) = Obadias, son of Shemaia (1 Chr.9.16).

Abdeel, father of Shelemiah (Je.36.26).

Abdi'el, second son of Azariah, ancestor of Ethan the singer (1 Chr.6.44).—2. The father of Kish, a Merarite, in the reign of Hezekiah (2 Chr.29.12).—3. A Jew in the time of Ezra, who had married a foreign wife (Ezr.10.26).

Abdi'as (2 Esd.1.39) = the prophet Obadias.

Abdial, one of the Gadites settled in the land of Bashan (1 Chr.5.15) in the days of Jotham, king of Judah. [c.r.c.]

Abdon (tillage; Jos.21.10; 1 Chr.6.74). Cf. Jos.19.28, where Hebron (R.V. Ebron) is perhaps a clerical error for Abdon. [Hebron, 2.] A Levitical town of Asher. Now 'Abdeh, a ruin 10 miles N.E. of Accho (Vanderveele). [c.r.c.]

Abdi'el, a Merarite, one of the fathers of Nebo (c.f. nephos of Nebo), the Babylonian name given to Azariah, one of the three friends of Daniel (Dan.1.6,7). [Shadrach.]

'Abel (Heb. hebel, i.e. breath, vanity, possibly so called from the shortness of his life, or else from the Bab. ablu = "son"), the second son of Adam, murdered through jealousy by his brother Cain (Gen.4.1-16; 1In.3.12). Jehovah showed respect for Abel's offering, but not for that of Cain, because Abel "by faith offered a more excellent sacrifice than Cain" (Heb.11.4). In Mt.23.35 our Lord speaks of Abel as the first martyr, and in Heb.12.24 the death of Abel is contrasted with that of Christ as pleading not for pardon, but for vengeance. The place of his murder and his grave are shown near Abila [Ahilean]; a tradition as to his burial still lingers there (Stanley, Sinai and Pal. ed. 1885, p. 407).

Abel (Arab. abil, a "moist" meadow, or groves near a stream). In Gen.50.11 there is a play on the word as meaning also "weeping."—1. "THE GREAT ABEL." (1 Sam.6.18), in the field near Beth-shemesh, should apparently read "the great 'ebhen" (or stone), as in LXX. A site supposed to be Eben-ezer (probably now the village Deir Abu'in, 2 miles E. of 'Ain Shems, Clermont-Ganneau) was shown in 4th cent. A.D. "close to Beth-shemesh" (Euseb. Gmannastron). Both sites connected with this Abel.

ABEL BETH-MAT'ACH. A town (2 Sam.20.14,15) near the town of Dan (1K.15.20), taken by Assyrians in 734 B.C. (1 K.15.29), otherwise ABEL-MAT'ACH (meadow of waters, 2 Chr.16.4), probably Abi, a village on a hill just E. of the main Jordan source, 6 miles W. of Bôdnâs, in the N.E. corner of the land of Israel. "BETH-MAT'ACH" was a city, a "mother" city (2 Sam.20.18) of Israel. The speech of the wise woman of Abel is obscure, and the LXX. differs from the Hebrew—perhaps it means: "they say, first of all, that they ask a question in Abel, and so have ended... why wilt thou swallow up the inheritance of the Lord?"—3. ABEL-MEHO'LAH, in the Jordan Valley (Judg.7.22), noticed with Bethshean (1 K.4.12). The home of Elisha (19.16) is placed by Eusebius 10 miles S. of Seytophylus (Onomasticon), or at the present 'Ain Helewah. —4. ABEL-MIZRA'IM (Gen.50.11), between Egypt and Nubia; second Jordan, is a difficult phrase here, but perhaps Vor-dan(pan in Assyrian) meant "the great river," or Nile.—5. ABEL-SHITTIM, the valley opposite Jericho of Jordan (Num.33.39). [Shittim.] It should be noted that these sites (except 4, which is not fixed) are all well watered. —6. ABEL-CERAMIM. [Vineyards, Plain of.

A beze (white). a town of Issachar, perhaps between Kishion and Remeth (Jos.19.20). Possibly the ruin el Beida ("the white") in the plain 4 miles N.E. of Jokneam. [c.r.c.]

A'bi, wife of Azaz, mother of Hezekiah (2 K.18.2). The name is Abijah in 2 Chr.29.1. His father's name was Zachariah; perhaps the Zechariah of Is.8.2.

A'biah, Abia'h, or Abijah'.—1. Son of Becher, son of Benjamin (1 Chr.7.8).—2. Wife of Hezron (1 Chr.2.24).—3. Second son of Samuel, whom together with his eldest son Joel they called Saul (1 Sam.10.11).—4. Wife of Ahab (2 Chr.18.28). The corruption of their administration was the reason alleged by the Israelites for their demanding a king.—4. (1 Chr.3.10; Mi.1.7) = Abijah or Abijam. 2.—5. (2 Chr.29.1). [Am.]—6. (Luk.5.3) [Abijah, 4.]

A'bi-albon. [Abiel.]

Abiasaph (Ex.6.24), otherwise written Ebiasaph (1 Chr.6.23,37,9.10), the head of one of the families of the Kohites (a house of the Kohathites), but his precise genealogy is somewhat uncertain. In Ex.6.24 he appears at first sight to be represented as one of the sons of Korah, and as the brother of Assir and Elkannah. But in 1 Chr.6.22,23 he appears as the son of Elkathan, the son of Assir, the son of Korah. Probably, therefore, in Ex.6.24 "the sons of Korah" merely mean the families into which the house of the Kohites was subdivided. Among the remarkable descendants of Abiasaph, according to the text of 1 Chr.6.23-37, were Samuel the prophet and Elkannah his father (1 Sam.1.1), and Heman the singer; but Ebiasaph seems to be improperly inserted in ver. 37.

A'biathar (father of plenty, or, the Great one is father), high-priest and fourth in descent,
from Eli, of the line of Ithamar, the younger son of Aaron. Abiathar alone of all the sons of Ahimelech the high-priest escaped the slaughter inflicted upon his father's house by Saul (1 Sam. 22). [AHIMELECH; DAVID.] Abiathar, having become high-priest, fled with an ephod to David, and was thus able to inquire of the Lord for him (1 Sam. 23.9,30,7; 2 Sam. 2.1,5,19, etc.). The fact that David had been the unwilling cause of the death of all Abiathar's kindred, coupled with his gratitude to his father Ahimelech for his kindness to him, made him all his life a firm and steadfast friend to Abiathar, who, it appears, was firmly attached to David. Abiathar adhered to him in his wanderings while pursued by Saul; was with him while he reigned in Hebron (2 Sam. 2.1-3), the city of the house of Aaron (Jos. 21.10-13), carried the ark before him when David brought it up to Jerusalem (1 Chr. 15.11); continued faithfK to his successor in lon's rebellion (2 Sam. 15.24-29,35,36,17.15-17, 19.11); and "was afflicted in all wherein David was afflicted." He was also one of David's chief counsellors (1 Chr. 27.34). He supported, however, Adonijah's abortive insurrections, perhaps in rivalry to Zadok, who was considered his senior (1 Chr. 22.9-12). Zadok, however, was banished to his native village, Anathoth, in the tribe of Benjamin (Jos. 21.18), Solomon sparing his life only because of his long service to David, and conferring his high-priesthood on Zadok (1 K. 2.27,35). Two difficulties are connected with Abiathar. (1) It is difficult to connect Abiathar, in the passage of 2 Sam. 23.3, and to account for the double high-priesthood. Zadok was descended from Eleazar, the elder son of Aaron, and is said to have joined David while he reigned in Hebron (1 Chr. 12.28,38). From this time we read, both in the books of Sam. and Chr., of Zadok and Abiathar the priests; Zadok being always named first. Yet we are told that Solomon put Zadok in the room of Abiathar. Perhaps the superior strength of the house of Eleazar, which enabled it to furnish 16 out of the 24 courses (1 Chr. 24), contributed to the precedence given him over Abiathar. It is remarkable how, first, Saul's cruel slaughter of the priests at Nob; second, the wise Abiathar, led to the fulfilment of God's denunciation against the house of Eli (1 K. 2.27). (2) In 2 Sam. 8.17, in the duplicate passage 1 Chr. 18.16, and in 1 Chr. 24.3,6,31, we have AHIMELECH substituted for Abiathar, and AHIMELECH the son of Abiathar instead of Abiathar the son of Ahimelech, whereas in 2 Sam. 20.25, and in every other passage in O.T., we are uniformly told that it was Abiathar who was priest with Zadok in David's reign, and that he was the son of Ahimelech, and that Ahimelech was the son of Ahitub. The difficulty is increased by finding Abiathar spoken of as the high-priest in whose time David ate the shew-bread, in Mk. 2.26. However, the evidence in favour of David's friend being Abiathar the son of Ahimelech preceding so strongly, that one can only suppose that the error was a clerical one originally, and propagated from one passage to another. The mention of Abiathar by our Lord, in Mk. 3.26, might perhaps be accounted for, if Abiathar was the person who persuaded his father to allow David to have the bread, and if, as is probable, the loaves were Abiathar's (Lev. 24.9), and given by him with his own hand to David. [A.W.S.]

Abib. [Midian.] Abidah or Abida', a son of Midian (Gen. 25.4; 1 Chr. 1.33).

Abidan', chief of Benjamin at the Exodus (Num. 1.11,22,22,5.60,5.10.24).

Abiel.-1. The father of Kish and Ner, and consequently grandfather of Saul and Abner (1 Sam. 9.1,14-31). According to 1 Chr. 3.9,9,35, Ner was father of Kish, a mistake possibly due to an error of the scribe; but see NER. —2. One of David's mighty men (1 Chr. 11.32). In 2 Sam. 23.31 he is called Abi-albon, which Budde reads Abibaal (Sacred Books of O.T. p. 80). [H.C.B.]

Ablezer.—1. Eldest son of Gilead, and descendant of Manasseh, and appointed one time the leading family of the tribe (Jos. 17.2; 1 Chr. 7.18; Num. 26.30, where the contracted form Jeezer, Heb. Fiser, is given). In Chronicles Ableizer is, in the present state of the text, said to have sprung from the sister of Gilead (1 Chr. 7.18). He was the ancestor of a tribe of the Gileadites. (2) Mentioned under Zadok, 4.8, 2; and in an adjetival form ("the Ableize-rite") in Judg. 6.11, 24.8, 32. —2. One of David's "mighty men" (2 Sam. 23.27; 1 Chr. 11.26, 27.12).

Abiga'i.—1. The beautiful wife of Nabal, a wealthy owner of goats and sheep in Carmel. When David's messengers were slighted by Nabal, Abigail, his wife, appeared before him, and suppled David and his followers with provisions, and appealed his anger (2 Sam. 25.14-35). Ten days later Nabal died, and David made Abigail his wife (vv. 36-42). By her he had a son, called Caleb in 2 Sam. 3, but Daniel in 1 Chr. 3.1. —2. A sister of David, married to "Ithran an Israelite" (2 Sam. 17.25), more correctly Ither the Ishmeelite (1 Chr. 2.17), and mother, by him, of Amasa. [Nahash.]

Abihai.—1. Father of Zuriel, chief of the Levitical family of Merari, a contemporary of Moses (Num. 3.35). —2. Wife of Abishur (1 Chr. 2.29). —3. Son of Hur, of the tribe of Gad (1 Chr. 5.14). —4. Daughter of Elijah, the prophet (2 Kings 20.31), according to the A.V. makes Abiailah the wife of Rehoboam, but according to R. V. she was the mother of Rehoboam's wife Mahalath. —5. Father of Esther and uncle of Mordecai (Esth. 2.15,9,29).

Abihu', 2nd son of Aaron (Ex. 6.23); accompanied Moses to the top of Sinai (Ex. 24.1-9); ordained priest (Ex. 29.1); consumed by fire from heaven for offering "strange fire" (Lev. 10.1,2; Num. 3.4). [H.C.B.]

Abi'j, son of Bela, 3 (1 Chr. 8.3).

Abijah, or Abijam'.—1. The son and successor of Rehoboam, king of Judah (1 K. 14,31; 2 Chr. 12.16). He is called Abijah in Chronicles, Abiam in Kings, the later name being probably an error in the MSS. He began to reign in the 18th year of Jeroboam, and reigned 3 years (2 Chr. 13.1,2). From 1 K. 15.7 we learn that Abijah endeavoured to recover the kingdom of the 10 tribes, and made war on Jeroboam. We are also told (3) that he walked in all the sins of Rehoboam (idolatry and its attendant immoralities, 1 K. 14.23,24), and that his heart
"was not perfect before God, as the heart of David his father." In 2Chr.13 his war against Jeroboam is more minutely described; he was successful in battle, and took the cities of Bethel, Jeshanah, and Ephrain, with their dependent villages. It is said that his army consisted of 400,000 men, and that Jeroboam had 800,000, of whom 500,000 fell in the action; but our MSS. are frequently incorrect as to numbers, and there are reasons for reducing these to 40,000, 80,000, and 50,000. Nothing is said in Chronicles of his sins, but we read that he "axed mighty, and married fourteen wives," whence we may infer that, elated with prosperity, he, like his grandfather Solomon, fell, during the last two years of his life, into sin, as described in Kings. He was succeeded by Asa.—2. The second son of Samuel, called Abia in A.V. [Abia, Abiah, 3.—3. The son of Jeroboam I, king of Israel, in whom alone, of all the house of Jeroboam, was found "a man of真心 toward the Lord" (1K.14.9, 15), and who was therefore the only one of his family who was suffered to go down to the grave in peace. He died in his childhood, immediately on his mother's return from the prophet Abijah, to whom she had been sent by Jeroboam to seek help in the child's sickness (1K.14.18). A descent from Eleazer, who gave his name to the 8th of the 24 courses into which the priests were divided by David (1Chr.24.10; 2Chr.8.14; Neh.12.4,17). To this course belonged Zacharias, the father of John the Baptist (Lm.1.5).—5. One of the priests who entered into a covenant with Nehemiah in the work in God's temple (Ne.10.7), unless the name is rather that of a family, and the same with the preceding.

Abilene (Lu.3.1). The passage refers to 15th year of Tiberius, and should therefore read, "Philip tetrarch of Ituraea, and of the region of Trachonitis, and of that of Lysanias the tetrarch of Abilene." It is thus distinguished from Abila (Tell Abil) in Bashan.

[Decapolis.] It is called by Josephus the "kingdom of Lysanias" (2 Wars xi. 5, xii. 8), or the "tetrarchy of Lysanias" (20 Ant. vii. 1), given to Philip and afterwards to Agrippa with its capital at Abila (19 Ant. v. 1). Lysanias was the grandson of Meneas, who ruled at Chalcis in Lebanon (14 Ant. v. 7) about 50 B.C., and near Damascus (13 Ant. xvi. 3). By 30 B.C. the "house of Lysanias" had fallen into the hands of the robber Zenodorus, who died in 20 B.C. (15 Ant. x. 3; 1 Wars xx. 4), but the region was still called "Abila of Lysanias" in Agrippa's time (44 A.D. (19 Ant. v. 1)), though it is clear that Lysanias was not ruling in the 15th of Tiberius. It is clear also that Abilene lay in Lebanon. The site of its capital is now called Šūq Wādy Barada, "the narrow place on the Abana River," being at a pass through which a Roman road was cut. The ruins near the village, and S. of the river, include foundations of a small Roman temple, and rock-cut tombs N. of the stream, with busts in low relief over the doors, and Gk. texts, some of them Christian (Surv. W. Pal., Special Papers, pp. 112-113). On the crag above, on S, the tomb of Abil is shown, with a legend from the 5th century (Sumer, 34). But the most important text is in Latin, on the rock wall of the Roman road-cutting (Waddington, No. 1874), relating that the emperors M. Aurelius and Verus (c. 163-165 a.D.) restored the mountain by cutting the mountain "impenditis Abileronum," or at the expense of the people of Abilene. [c.e.c.]

Abimael, a descendant of Joktan (Gen.10.28; 1Chr.1.23), and probably the progenitor of an Arab tribe.

Abimelech (Melek is father). There was a Canaanite deity, Milk. In the Amarna tablets (c. 1400 B.C.) Abimilki is the governor of Tyre, who was a vassal of Egypt; melek in Heb. = king.—1. (Gen.20.21.) The king of Gerar, who took Sarah into his harem, but made amends to Abraham on learning her true relationship. Afterwards he allied himself with Abraham and settled their dispute as to the well at Beer-sheba.—2. (Gen.26.) Another king of Gerar has a similar experience with Isaac, and makes a similar appeal to God. "Come, I pray thee, say 'J.' and treat them as variants. [Genesis.] The mention of Philistines (21.32,34,26.1) is perhaps proleptic. [Philistines.—] Title of Ps.34. Achish is intended. Perhaps Abimelech (=father king) was, like Pharaoh, not a personal name.—3. Gideon's son (Judg.9) by a Syrian woman's servant. Abimelech could be a bond-servant; but she was related to the lords (Baalim) of Shechem and had probably contracted a Sadiqa marriage. [Judges, Book or.] On Gideon's death, Abimelech gained the jealous Ephraimites by the appeal,—would they obey Gideon's sons?—while his relations intrigued with the Canaanites, who were dominant in Shechem and boasted their descent from Hamor. With money from the temple of Baal-berith he hired braves and slew all his brethren except Jotham on one stone. The words imply a formal execution. Then the Shechemites elected him king by the terebinth [or "oak"; Pillar, Plain or] of the pillar (Judg.9.6; cf. Jts.24.26). He reigned 3 years. But Shechem, situated near the junction of two trade routes, was a nest of bandits. Abimelech suffered the fate of usurpers. He could not control the worthless people through whom he obtained power. He retired to Arimath (Judg.9.51). Hence in Zech.11.17 the governor of Shechem is Abimelech. A conspiracy was formed against him at the harvest feast of Baal-berith, but with early intelligence from the double-dealing Zebul, he defeated Gaal, and on the next day by an ambush seized Shechem and destroyed it. Subsequently he burnt out the refugees in the tower (Millo). He then attacked Thebez, but was struck down by a millstone thrown from the wall by a woman (Judg.9.53; cf. 2Sam.11.21). To avoid dying by a woman's hand, he requested his armour-bearer to slay him.—5. (1Chr.18.16.) [Abiathar.]

Abinadab.—1. A Levite of Kirjath-jearim, in whose house the ark remained 20 years (1Sam.7.1, 2; 1Chr.13.7).—2. Second son of Jesse, who followed Saul to war against the Philistines (1Sam.16.8,17,13).—3. Son of Saul, slain on mount Gilboa (31.2).—4. Father of one of the 12 officers of Solomon (1K.4.14). [Dor.] Abinom, father of Barak (Judg.4.6,12, 5.12).
ABIRAM

Abiram.—I. A Reubenite, son of Eliab, who with Dathan and On conspired against Moses (Num.16:16; Deut.11:6). [Dathan.—II. Eldest son of Hiem, the Bethelite, who died when his father laid the foundations of Jericho (1K.16:34), thus fulfilling the first part of the curse of Joshua (Jos.6:26).] [Abiram = (Num.17:1); Abirame = (2Sam.18:18), an ancestor of Ezra; = Abishua, 2.]

Abishag', a beautiful Shunammite, taken by David to comfort him in his extreme old age (1K.1:4). Jewish tradition agrees with ver. 4, which asserts that she preserved her virginity. After David's death Adonijah induced Bath-sheba, the queen-mother, to ask Solomon to give him Abishag in marriage; but this impudent petition cost Adonijah his life (1K.2:13, etc.) [Adonijah; Canticles; Family.]

Abishai, the eldest of the three sons of David's sister Zeruiah, and brother to Joab and Asahel, whom his father brought up with him, and trained him in the profession of arms. Abishai was a brave and skilful warrior, and is often mentioned in connection with Joab, his elder brother, and Asahel, his youngest brother. He was distinguished for his valor in the battles of Gibeon and Rabbah. He is also mentioned as accompanying Joab on an expedition to Jericho (2Sam.18:18,24,32). In the prosecution of their design concerning Absalom, Joab and Abishai were ordered to destroy Absalom; but when Joab, who was of a more revengeful temper, ordered the stroke, Abishai was associated with him in the treachery, and "Joab and Abishai killed Abner" (2Sam.3:30). [Abner.] In the war against Hanun, undertaken by David as a punishment for the insult to his messengers, Abishai, as second in command, was opposed to the army of the Ammonites before the gates of Rabbah, and drove them headlong before him into the city, while Joab defeated the Syrians who attempted to raise the siege (2Sam.10:10-14; 1Chr.19:11,15). The defeat of the Edomites in the valley of salt (1Chr.18:12), which brought them to a state of starvation, was attended with great destruction under the immediate orders of the king (see 2Sam.8:13), or of Joab (Ps.60:title). On the outbreak of Absalom's rebellion and the consequent flight of David, Abishai remained true to the king; and the old warrior showed a gleam of his ancient spirit, as fierce and relentless as in the camp of Saul, when he offered to avenge the taunts of Shimei, and urged his subsequent execution (2Sam.16:19,21). In the battle in the wood of Ephraim, Abishai commanded a third part of the army (2Sam.18:2,5,12), and in the absence of Amasa was summoned to assemble the troops in Jerusalem and pursue after the rebel Sheba, Joab being apparently in disgrace for the slaughter of Absalom (2Sam.20:6,10). The last service of which is recorded of Abishai is his timely rescue of David from the hands of a gigantic Philistine, Ishbi-benob (2Sam.21:17). His personal prowess on this, as on another occasion, when he fought single-handed against 300, won for him a place as captain of the second three of David's mighty men (2Sam.23:18; 1Chr.11:20). Probably this act of daring was achieved while he was the companion of David's wanderings as an outlaw among the Philistines. Of the end of his chequered life we have no record.

Abishalom = Abissaloth (2Sam.3:3; cf. 1K.15:2,10; 2Chr.11:20,21).

Abishu'a.—I. Son of Bela, of the tribe of Benjamin (1Chr.8:1).—II. Son of Phinehas, the son of Eleazar, and father of Bukki, in the genealogy of the high-priests (1Chr.6:4,5,50,51; Ezr.7:4,5). According to Josephus (c. Ant. i.30), he became a priest of the high-priestly order, and the office passed to the house of Ithamar; the descendants of Phinehas, till Zadok, falling into the rank of private persons.

Abishur, son of Shammai (1Chr.2:28).

Abissum = Abishua, 2.

Abital, one of David's wives; mother of Shephatiah (2Chr.29:33). [Abital = (1K.4:17,57), the wife of the king of Edom.] Abisib, son of Shaharaim (1Chr.8:11).

Abl'd (Mt.1:13) is equivalent to Juda (Lu.3:26, R.V. Joda), and Hodaiah (1Chr.24:3). The grandson of Zurubbabel through his daughter Shelomith (1Chr.3:19). [Genealogy of Jesus Christ.]

Ablution. [Purification.]

Abner (my father is Ner, or, is a lamp).—I. Son of Ner, who was probably brother of Kish (1Sam.14:50; 1Chr.9:36), but Kish's father according to 1Chr.8:33). If so, Abner would be Saul's first cousin. He was made by him commander-in-chief of his army (1Sam.14:50). It was he who conducted David's presence after the death of Goliath (17:57); and afterwards accompanied Saul when he sought David's life at Achilah (26:3-16). From this time we hear no more of him till after the death of Saul, when he rises into importance as the mainstay of his family. Immediately after the disastrous battle of Mount Gilboa, David was proclaimed king of Judah in Hebron, and Abner proclaimed the weak and unfortunate Ishbosheth, Saul's son, as king of Israel, at Mahanaim beyond Jordan (2Sam.2:1-11), though he remained faithful to David. War soon broke out between the rivals, and "very sore battle" was fought at Gibeon (2Sam.3:1; 1Chr.3:3). When the army of Ishbosheth was defeated, Joab's youngest brother Asahel, who is said to have been "as light of foot as a wild roe," pursued Abner, and in spite of warning refused to leave him, so that Abner, in self-defence, was forced to kill him. After this, success inclined more and more to the side of David, till at last the imprudence of Ishbosheth deprived him of the counsels and generalship of the hero, who was in truth the only support of his tottering throne. Abner had married Rizpah,
Abraham's concubine, and this, according to the views of Oriental courts, might be interpreted to imply a design upon the throne. After indignant repelling Ishboseth's insinuation to this effect, Abner opened negotiations with David, by whom he was most favourably received at Hebron, David demanding, however, as a significant preliminary, that his wife, Michal, daughter of the late king, should be given up to him. Abner undertook to procure David's recognition throughout Israel; but leaving for the purpose he was entangled back by Joab, and treacherously murdered by him and his brother Abishai, at the gate of the city, partly no doubt, as Joab showed afterwards in the case of Amasa, from fear lest so distinguished a convert to their cause should gain too high a place in David's favour, but ostensibly in retaliation for the death of Asahel. This murder caused the greatest sorrow and indignation to David; but, as the assassins were too powerful to be punished, he contented himself with showing every public token of respect to Abner's memory by following the bier and pouring forth a simple dirge over Seneca. (1 Ch. 3.19.) The head of Jaasiel, chief of the Benjamites in David's reign (1 Chr. 27.21); almost certainly the same as the preceding. [A.W.S.]

Abomination of desolation. Among the signs foretold by Christ to precede the destruction of Jerusalem was to be the appearance of the temple of this abomination of desolation," which was, moreover, to be the signal for the flight of the Christians from Judaea (Mk. 14.15; Mk. 13.14). The original of the expression is found in Daniel (9.27, 11.31, 12.11), the exact force being "the abomination that maketh desolate." The reference here is to the desecration of the temple by Antiochus IV. (Epiphanes), by whose orders a heathen idol-altar was built upon the altar of burnt-offering. The very phrase, βαιλλαγμα ερημωτερος, is actually used (1 Mac. 1.54) to describe this idolatrous erection. But our Lord gives also a futurist interpretation to the words of Daniel, and regards his apocalyptic expression as fulfilled or fulfilled in the troubles that would usher in the final destruction of the Jewish polity. From this point of view the abomination of desolation was interpreted as referring to some conspicuous desecration of the temple that would take place in those last days. The exact interpretation must fulfil two conditions: (1) the abomination of desolation is represented as a concrete object "standing" in the holy place; and (2) its appearance would be near the beginning of the final struggle; for it was to give the signal for the flight of the Christians from danger. But we have no means of determining in what precisely the sign consisted. [J.C.V.N.]

Abraham, or Abram. Abîśrūmû is the name of the father of a witness to a document of the time of Hammurabi's grandfather; Abu-rûmû an Assyrian official, 677 n.c. Abram (possibly the name of Terah's father-in-law, see Hk. 1.18) = "father of the father of [3 divine tekê], exalted," used till Gen. 17.5, when altered to Abraham, which, according to the etymology of Gesenius, = Abhâmôn, "the father of a multitude of nations" (cf. Exclus. 44.19). 1. In Gen. 11.26–25. (1) The eldest son of Terah (11.26), descendant of Shem. The fact that among his ancestors is Peleg, the brother of Joktan, father of many Arabian tribes (10.25 ff.), suggests that Abraham was begotten by a son of Shem and that his descent is therefore patrilineal, but see Races. If so, it perhaps moved to Babylonia with the stock of Hammurabi's dynasty, if Hommel is right in considering that Arabian. Abraham lived in "Ur of the Chaldees"—i.e. probably Muqanah, on the right or western bank of Euphrates, a great commercial centre. (Uz.) This statement that that district was called the land of Eber—i.e. across the river from Babylon—and that the title "the Hebrew" in 14.13 refers to this. Although Terah was a polytheist (Jos. 24.2), Abraham worshipped one God only. It appears that in the time of Hammurabi there was a great development of the worship of Merodach, who was now regarded as chief of the Babylonian pantheon. Abraham's religion may be connected with this fact, either by way of further development, or to Merodach were attributed the powers of all the gods, or (much more probably) by opposition to this fresh outburst of idolatry. The title "Abraham" represents the revival and development of an older and purer religion handed down in his family, though forsaken by his immediate progenitors. (2) Terah's choice of Haran, some 550 miles from Ur, as the city to which he removed, may be connected with the fact that it stood in this "abomination of desolation," and that therefore there would be much commercial intercourse. It was also in itself of great commercial and strategic importance. On Terah's death (so the order of the narrative and Ac. 7.4); but 60 years before, according to the numbers of Gen. 11.32 in the Massoretic text) Abraham goes to Canaan, probably passing Damascus (where he may have obtained Eliezer, Gen. 15.2; see details of the probable route in Driver on 12.3), even in Canaan, as it seems, being still under Babylonian dominion. (3) His progress through Canaan is marked by altars, the first being at Shechem, and the second at armathai, -a place of the heathen Eber (LXX., at the high oak; see Moreh)—i.e. a sacred tree perhaps already known for the delivery of oracles, just as much later he himself plants a sacred tree by a sacred well at Beer-sheba (21.30, 33). The impression that his journey through Canaan gives us is that he was a man of wealth, culture, and ability in leadership. (4) Driven by a famine into Egypt (12.10 ff.), Abraham, fearing the licentiousness of the Pharaoh and an attack on himself, gives it out that Sarah is his sister. (5) Returning to Canaan through the negheb (13.1), he treats Lot magnanimously, realizing the claims of brotherhood to mutual forbearance and to self-denial, and receiving a special promise of the country. He settles in or near Hebron, again by trees. (6) The narrative of ch. 14 has been ridiculed, and is called a late midrash by even recent scholars; but the source of the incident is related is so confirmed by the cuneiform inscriptions (see Chedorlaomer, Amraphel, and even Melchizedek) that soon its statements will doubtless be generally accepted as accurate. Abraham's character, however, is so far different
ABRAHAM

in it that he is depicted as a warrior. But it is difficult to suppose that so powerful a chieftain as he evidently was (23:6) should not have been recognized by the non-Semitic rulers of Lot and his service of God, as related here, are in complete accord with what we know of him elsewhere, and his refusal to accept the rescued goods at the hands of the ungodly king of Sodom, marks, at most, spiritual advance on his willingness to receive presents from Pharaoh, (7) In ch. 15, Abraham complained of having no child, and was assured that he should have a son and that his descendants should rival the stars in number, he "believed in the Lord, and He counted it to him for righteousness." He receives a further promise that he shall inherit the land, and for this reason, and not perhaps that a canonical sacrifice, the symbols of the Lord's presence passing between the pieces (cf. Je.34:18), and he is told of the affliction of his descendants, i.e. in Egypt (cf. 2Es.3.14, R.V.). (8) Observe that the setting of the story of Hagar (Gen.16.21-8-21) is borne out by the Hammurabi Code, under which Abraham lived, and which regulated rabi no power to sell her own maid Hagar after the latter had borne a son to Abraham. She had therefore to get Abraham to send her away. (9) Abraham adopts the non-Babylonian practice of Circumcision (q.e.). (10) For his reception of the "three men" (18.2) and the relation of one of them to the Lord, see Atony, THEOPHANIES. (11) The stories of Abraham's relations with Abimelech, king of Gerar, both as regards Sarah (ch. 20) and the dispute about the well (21.22-34), are, in the opinion of the present writer, best explained as duplicates of the similar narratives of Isaac (26.1-12, 13-33); but it is a different view, and one which accords with the text, that Abraham had to receive Sarah into his house, and to acknowledge her relations to Hagar and her son Ishmael (cf. Ex.21.8-21). And it is evident that Abraham rules his household according to the Code, (12) The sacrifice of Isaac (ch. 22) is the supreme test of Abraham's faith (cf. Wis.10.5; Ecclus.44.20; 1Mac.2.42; 4Mac.16.20), possible only in a time and place where such sacrifices were regarded as the test of a father's obedience to oracles of God. Abraham is the first Jewish character where the humanity of the character is more fully revealed and the sacredness of human life is reaffirmed. Henceforth human sacrifice is regarded with horror by the religious teachers of Israel, even though apparently often practised from the time of the second generation after the Exodus (Ezk.20.26) until the time of Ezekiel himself, just before the destruction of Jerusalem (16.20-21, 20.31). It is perhaps intentional that it is the angel of Jehovah (not Elohim) who bids Abraham spare Isaac's life (Gen.22.11). (13) On ch. 23, see SARAH, EPHRON, HITTITES, MACHPELAH. (14) The mission of Eliezer (ch. 24) again shows Abraham's faith and common sense. Sure that God had led him to Canaan, he will run no risk in letting his son return East even temporarily, while keeping Isaac's religion pure from contact with the heathenism of the Canaanites. (15) On 25.1-6, see KETURAH and infra. (16) On his death he is buried on his own land, in Machpeelah, and his sepulchre is traced as far as the Dead Sea, though the Machpeelah is translated into Hagar and his descendant Ishmael as "Hagar and the Ishmaelites." (17) Observe Abraham's importance in the history of revelation. Apart from the names in Gen.1-11, Abraham is the first example in history of insistence on the personal relation to God, not for a specific purpose but for a lifetime. In non-Semitic religions the personal relation to God usually means the relation of nature to divinity; and also in non-Abrahamic Semitic religions it is hardly otherwise, judging from the polytheism of the Babylonians, the South Arabsians, and the Egyptians (if the latter may be called Semitic). But in all the forms of religion connected with Abraham there is the worship of one God, resulting at last, whatever the earlier stages may have been, in strict monotheism. There is no trace in Abraham of a belief in a merely local god, and no hint that he worshipped another god than the Lord, of Whose goodness and power (almightiness; cf. Ex.6.3). Abraham is the supreme test of faith, and the first time of those who believed in the "God Most High" (El 'Elyon) of Melchizedek (11.19,20,22). His household was evidently managed with the Lord in view, in accordance with 18.19. (18) Yet his personality has been doubted. He has been thought to be a myth, or a personification of one or more myths. But (with the possible exception of 25.1-6, Abraham's relation to Keturah) these views are contradicted by the whole background of his history. For though a record of Abraham himself neither has been, nor is likely to be, discovered in the monuments, yet his history, his story, his history at many points, and wherever we are able to test these the statements of Genesis are confirmed. Also notice the unity of his character under varying circumstances.—II. In the O.T. outside Gen.11.26-25. Abraham is recognized as the founder of the nation and of its religion, not only in the Pentateuch (e.g. Ex.1.3) and in Josh.24.3, but also in the O.T. by Ezekiel (1K.18.36), Isaiah (29.22), Micah (7.20), Jeremiah (33.26), during the Exile (Ezk.33.24; 1S.51.2), by Nehemiah (9.7), and in Chronicles (e.g. 1Chr.12.8), besides the references in two Psalms whose date is uncertain, 47.9,106.6,9,42.—III. In the Psalms and other religious poetry. These are the places where the increasing importance of Abraham in the estimation of Israel. (1) Ethiopian Enoch. §9. 10, Abraham is the white bull who brought forth a wild ass (Ishmael) and a white bull (Isaac). §93. 5, Abraham is the plant of righteous judgment followed by the plant of righteousness (Israel). (2) Testaments of XII. Patriarchs. Levi, §9. 12, Abraham teaches Isaac to offer leaves from twelve trees. §15. 4, Israelites receive mercy through Abraham, Isaac, and Jacob. Judah, §25. 1, Abraham will arise to a resurrection on earth with Isaac and Jacob. (3) Jubilees, §12. 12-14, Abraham burns the idol-house with its contents (perhaps an explanation of "Ur"); 16, Abraham turns from observing stars to considering God; §17. 17; 19. 8, Abraham's ten trials; §22. 25-23. 1, Abraham dies with Jacob present. (4) Mac. xili. 17, Abraham with Isaac and Jacob will receive us after we have suffered; xvi. 25, Abraham with Isaac, never to be tried because of God, but live to Him; vi. 17, 22, Abraham the type of courage. (5) Apos. Bar. iv. 4, the heavenly Jerusalem is shown to Abraham "by night among the portions of
ABRAHAM’S BOSOM

the victims” (cf. Gen. 15:10); iv. 2, the un
written law existed in Abraham’s time.—IV. In N.T. (1) Abraham is recognized as the founder of the nation, e.g. in our Lord’s genealogy (M.t. 1). (2) The trust of the Jews to physical descent from Abraham is repeatedly opposed, e.g. Mt. 3:9 (= L.u.3;8), Jn. 8:33, Ro. 9:7; cf. Gal. 4:22. (3) Abraham with Isaac and Jacob reflected the great feast in the kingdom of heaven (Mt. 8:11; cf. L.u.13:28). (4) ABRAHAM’S BOSOM (apparently = closest intercourse with Abraham) receives Lazarus (L.u. 16:22). (5) Abraham had such living faith in Jesus that he saw His day (Jn. 8:56). (6) Abraham is taken by both St. Paul and St. James as an example of the religion, St. Paul showing that this consisted in his faith apart from works (Ro. 4:16; Gal. 3:6ff.). St. James in his faith as perfected by his work; the latter adding that he was called the Friend of God (Jas. 2:21-23; cf. Is. 41:5, 2Chr. 20:7, also Clem. Rom. § 10 with Lightfoot’s note. (7) The Abrahamic Old Covenant and Allah (friend of God), El Khalil, to the exclusion of his proper name. (7) So the ep. to the Hebrews insists on Abraham’s faith (11:8,17), and draws lessons from his intercourse with Melchizedek (7:1-9). (8) St. Peter alludes to Sarah’s obedience to Abraham (1Pe. 3:6). [A.L.W.]

ABRAHAM’S bosom. Abraham was called the father of the multitude of nations, and the names of the abode of the blessed dead was never questioned. That Abraham was in a state of perfect bliss was never questioned, and the righteous were to share this by being admitted into fellowship with him in the unseen world (cf. 4 Mac. xiii. 16; Mt. 8:11). The term probably contains an allusion to the ancient custom of reclining at meals, the head of the one guest being near or resting on the bosom of the one next to him (cf. Jn. 13:23, 21:20). In Tal. Bab. (Kid. 72b) it is said of Adda bar Ahabah, a Babylonian rabbi of the 3rd. cent., that “this day he sits in Abraham’s bosom,” meaning that he had died and entered Paradise. The phrase occurs in the parable of the rich man and Lazarus (L.u. 16:22,23). [PARADISE.] [L.H.I.

Absalom (my father of peace).—1. Third son of David, by Maachah, daughter of Talmai, king of Geshur. His history, rebellion, and tragic death (2Sam. 15:3-19) not only have direct importance as incidental to Solomon’s accession, but as the means by which David’s violation of covenant law in the murder of Uriah and the taking of Bathsheba are punished. The sequence of events is dramatic. Absalom is of the greatest personal beauty, and has grown up at Hebron the darling of his father and the people’s idol. Amnon, Absalom’s half-brother and David’s eldest son, has wronged Tamar, Absalom’s full sister. By every custom Absalom is bound to avenge the injury. David does not. When, therefore, Amnon appears to have escaped with impunity, Absalom invites him to his “sheep shearing” at Beth-hazor, and thus causes him to be killed during the drinking feast. Absalom flies to his mother’s father; but so great is David’s love for him, that he is persuaded by Joab’s instrument, the wise woman of Tekoa, to recall him. This act of pardon falls in with the rough-and-ready manners of the time, and shows the great love which David has for Absalom. On his return

ABSALEM remains secluded and in disgrace for 2 yrs., but forces Joab to plead for him, and sees “the king’s face.” Restored to his position, Absalom uses the popularity he had never lost to foster sedition. He lets his wonderful hair grow long, perhaps (as Robertson Smith surmises) to mark the sacredness of his person, introduces horses in his chariots, and so rivets the attention of the people upon himself. He appeals to popular sentiment by the personal sympathy and unconventionality which ensure good will in the East. Judah was discontented, and when all is ready Absalom rebels. David, whose influence had waned, is forced to fly over the Jordan to Mahanaim. Ahithophel and all (except a few) of David’s great men join Absalom. Absalom enters the capital, and commits himself and his followers to a death-struggle with his father. He openly takes possession of the concubines whom David had left behind, and thus effects dramatically the retribution of the divine justice. Ahithophel is quickly followed by Hushai (who is faithful to the king) persuades Absalom to daily in Jerusalem until Joab and the king have gathered an army of sufficient strength. Absalom, having been crowned, at last crosses the Jordan, and is decisively beaten in the wood of Ephraim. As he turns to flee, he is caught by his hair in a “great oak,” and his nule leaves him. Joab, learning that he is hanging there, kills him with his own hand, in spite of David’s prohibition. When the Cushite runner comes to him at Mahanaim, David forgets all, and (remembering his own sin) utters the familiar and pathetic lamentation “O my son Absalom, my son, my son Absalom! would God I had died for thee!” Absalom’s body was cast into a pit, and (perhaps a mark of bitter contempt, cf. Jos. 7:26) covered with great stones by the soldiery. In contrast, the historian parenthetically recalls “the pillar in the king’s dale” which Absalom had erected in his lifetime. His name occurs in the monuments: see Records of the Past, new
series, vol. vi. The so-called Absalom's tomb in the king's vale is proved by its Ionic columns to be of late date.—2. Father of Mattathias (1 Mac.11.17) and Jonathan (13.11.) [1Chr.2.17.]

Absalon (1 Mac.11.17), an ambassador from the Jews to Lysias, "chief governor of Celysia and Phoenice."

Abu'sus (1 Mac.16.11,15), father of Ptolemus, 3.

Acadan (1 Esd.5.38) = HakkaTan.

Acact (1Kiad), one of the cities of the land (BaBylonia), which, with Babel, Ezech, and Calneh, were the beginning of Nimrod's kingdom (Gen.10.10). This city, which lay near, or formed part of Sippur (Sippara), now Abu-habah, is the Agadé (also Agat), semiticized Aktjad, of the earlier inscriptions. It lay about 16 miles S.W. of Baghdad, and was one of the earliest of Babylonian rulers, Sargassu sar ali (the Babylonian Sargon), who, according to the indications of Nabonidus, lived c. 3800 B.C. From the earliest times it was the seat of the worship of the Sun-god and the goddess Istar. Being the capital of the northern district, that tract became known as "the land of Sumer and Akkad" was one of the official titles of the kings of Babylonia from exceedingly early times, and the Assyrian kings who occupied the Babylonian throne in later days also adopted it. The non-Semitic population called the province of Akkad Ura or Uri. See Babel, Chaldea, Sinar, in this work and in Hastings, D.B. (5 vols. 1904). [t.g.p.]

Accaron. [Ekron.]

Aceho (R.V. Acco), a Phoenician city close to the river Belus, at N. end of the bay of Carmel. The Gk. Ptolemais became the later St. Jean d'Acce, and modern 'Akka. It was not taken by the tribe of Asher (Judg.1.31), and appears never to have had of one of the earliest of Babylonian rulers, Sarqassu sar ali (the Babylonian Sargon), who, according to the indications of Nabonidus, lived c. 3800 B.C. From the earliest times it was the seat of the worship of the Sun-god and the goddess Istar. Being the capital of the northern district, that tract became known as "the land of Sumer and Akkad" was one of the official titles of the kings of Babylonia from exceedingly early times, and the Assyrian kings who occupied the Babylonian throne in later days also adopted it. The non-Semitic population called the province of Akkad Ura or Uri. See Babel, Chaldea, Sinar, in this work and in Hastings, D.B. (5 vols. 1904). [t.g.p.]

Achias (35 B.C.) = Hakkoz.

Acele'ma (Akele'haa), the "field or place of blood." Apparently the Aramaic is נחלא (Habbel-dama), "enclosed place of blood." Judas is briefly said (Ac.1.18,19) to have "purchased a place with (খ্যাত) the reward of iniquity"; for he left to the priests the money with which—as described in Matthew (27.7-8)—they bought the "field" (খ্যাত) of the "potter" for 30 pieces of silver. The latter passage quotes a prophecy (which a scribe wrongly scribbled into Ex.18.19), now found in Zech.11.13: and it follows the Heb. text (see R.V. marg.; LXX. and Syr.). The site of Acedama is not, however, indicated. The traditional site is now called Haqq-ed-dumm—a corruption of the Aramaic words haddumm, "a rock-cut vault, 90 ft. high," with a 12th-century vaulting over it, supported on two masonry piers. The place was used for the burial of pilgrims in the Middle Ages, but the site was shown yet earlier. It lies on S. brink of Wady Rabidub (Hinnom), S. of Jerusalem. There are several Christian tombs in the rock near it, while belonging to the monks of the church of St. Sion (Surv. W. Pal., Jerusalem vol. pp. 380, 417-420). [c.r.c.]

Achaja signifies, in N.T., a Roman province which included the whole of the Peloponnesus and the greater part of Hellas proper with the adjacent islands. This province, with that of Macedonia, comprehended the territories of the Roman name of resisting the Macedonians. This League subsequently included several of the other Grecian states, and became the most powerful political body in Greece; hence it was natural for the Romans to apply the name of Achaja to the Peloponnesus and to the S. of Greece, which they took over with the whole League in 146 B.C. In the division of the provinces by Augustus between the emperor and the senate in 27 B.C., Achaja was one of the provinces assigned to the senate, and was governed by a proconsul. Tiberius in the 2nd year of his reign (16 A.D.) took it away from the senate, and made it an imperial province governed by a procurator; but Claudius restored it to the senate. This was its condition when Paul was brought before Gallio, who is therefore (Ac.18.12) correctly called the "proconsul" (A.V. deputy) of Achaja.

Achajaicus, a Corinthian Christian who, at Ephesus, ministered to St. Paul (1 Cor.16.17). Achan (troad) is mentioned in one of the tribes of Judah, after the fall of Jericho secreted a portion of the spoil in his tent. Jericho was regarded as the first-fruits of conquest, and as such was to be "accursed"—i.e. devoted "to the Lord," as a whole burnt-offering (Jos.6.17-19). Achan's act of sacrilege stained the sacrifice, and consequently involved the whole nation in sin (Jos.7.1). For this Jehovah punished Israel by their defeat in their attack upon Ai. When Achan confessed his guilt, and the body was discovered, he was stoned with his whole family in a valley situated between Ai and Jericho, and their remains, together with his property, were burnt. This valley was called thence Achbor (i.e. "trouble"). [h.c.b.]

Achar (tChr.2.7) = Achan.

Achaz (Mt.1.9) = Ahaz, king of Judah. Achbor.—1. Father of Baal-hanan, king of Edom (Gen.36.35,39; 1 Chr.1.49).—2. Son of Michahai, a contemporary of Josiah (2 K.22.12; 2 Chr.20.12), called Ahab (Amos.1.2). Achia' cha'rus, chief minister at the court of Sarchedonus, or Esar-haddon, king of Nineveh (Tob.1.21,22,2.10,14,10). Achi' as, son of Phinees; high-priest and
ACHIM

progenitor of Esdras (2 Esd. 1.2), but omitted in the genealogies of Ex. 7.1-3 and 1 Esd. 8.1-2.

Achim, a fifth son of Joseph, the husband of Mary (Mt. 1.14). The Heb. form of the name would be yākhin, short for Jehoiachin.

Achior, captain of the Ammonites in the army of Holopherne, to whom he recounted God's past favours to the Israelites, advising leaving them alone. This was rescinded by the army and by Holopherne, who sent him bound to the Israelites who received him with gratitude. Afterwards he was circumcised and became a proselyte to Judaism (Jth. 5.6, 14).

Achish, a Philistine king of Gath, son of Maacch, who in the title to Ps. 34 is called Abimelech. David twice found a refuge with him when he fled from Saul. On the first occasion, being recognized by the servants of Achish as one celebrated for his victories over the Philistines, he was alarmed for his safety, and feigned madness (1 Sam. 21.10 ff.).

[David.] From Achish he fled to the cave of Adullam. On a second occasion David fled to Achish with a band of men (1 Sam. 27.2) who remained at Gath a year and four months. Whether the Achish to whom Shimei went in disobedience to the commands of Solomon (1 K. 2.40) is the same person is uncertain; the word may be a title rather than a name.

Achishar. [Ecc. 8.12; 2 Esd. 3.1] = Achitub, 2.

Achmetha. [Ecc. 8.14, 15, 16.]

Achor, Valley of: "valley of trouble," according to the etymology of the text; where Achan, the "troubler of Israel," was stoned (Jos. 7.24, 26). On the N. boundary of Judah (15:7; also Is. 65:10; Ho. 2:15). This valley is now called Wady Qelt, running into the Jordan from W.

Achsa (1 Chr. 2.19), Achsah, elsewhere, and throughout R.V.; = anklet. Caleb's daughter. She was given in marriage to her uncle or cousin Othniel as a reward for capturing Kirjath-sepher (Deb). She moved her husband and a further daughter, but finally herself made the request, which Caleb and Achab, neghebbh (A.V. south) is the name of a district: so apparently are Gullah-mann (springs of water) and Gullah-illith and Gullah-athith (the upper and nether springs). They have been identified with the well-watered region Sayd-Dulbeh between Hebron and Debir. The twice-told tale (Jos. 15.15-19; Judg. 1.12-15) indicates the necessity felt in later times for explaining why the territory geographically connected with Hebron should belong to Debir. [Othniel; Caleb.]

Achshaph, a royal Canaanite city (Jos. 11.1) in Galilee (12.20), on the border of Asher (19.25). Probably, from position, the village Kefr Yasif, 6 miles N.E. of Accho. [C.R.C.]

Achzib.—1. A city of Judah (Jos. 15.44) in the Shephelah, noticed with Keilah and Maresha (Mi. 1.14); otherwise Chezib (Gen. 38.5), near Adullam (ver. 1). The name survives at 'Am Kezib, close to the road to Netiffi on S., in the valley of Elah, 3 miles N. of Adullam.—2. An important shore town of Asher (Jos. 19.29) not taken from the Canaanites (Judg. 1.31); now es Zib, a village on the shore 9 miles N. of Accho. It was the border town of Galilee (Tal. Bab. Gillin 7 b), called Edippa or Actipous by Josephus (1 Wars xiii. 3; 5 Ant. i. 22). It is noticed by Thothmes III. in 16th cent. B.C. (No. 49), and probably by the Egyptian Mohar who travelled along the coast in the 14th cent. B.C. It is mentioned immediately before Achso, as taken by Sennacherib in 702 B.C. [C.R.C.]

Aclpha' (1 Esd. 5.31) = Hakupha.

Acitho', an ancestor of Judith (Jth. 8.1); possibly Achitob is the correct reading.

Acrobatine. [Weights and Measures.]

Acts of the Apostles. The authorship is, by English scholars almost without exception, ascribed to St. Luke, the writer of the third gospel, the "former treatise" of Ac. 1.1. Both writings are addressed to Theophilus, both exhibit remarkable resemblances of style and vocabulary, and in particular both show that special medical knowledge and vocabulary which we should expect in Luke the beloved physician. No other suggested name—Timothy, Silas, Titus—suits the facts as well. Further, external evidence from the Muratorian fragment (152 cent.) supports the traditional view, and there is evidence of the use of the Acts as early as Ignatius and Polycarp, if not earlier. The integrity of the book is also beyond doubt. The so-called "we sections," beginning with 16.10, are not a "travel-diary" found and used by a 2nd century writer without change in the person, but are by the same hand as the rest of the book, which therefore comes to us as a whole from a companion of St. Paul who was an eyewitness of much that he records, and had excellent opportunities of learning at first hand and on the spot about that part of the history which precedes 16.10.—The question of integrity is therefore important for its bearing on the sources used by the writer. For the earlier part of the Acts he had to collect his information from oral and written sources, and in doing so he no doubt used the same extreme care as in the gospels (Lu. 1.3). These may have been in manuscript in a disciple's handwriting; the most serious difficulty is in regard to the "speaking with tongues" on the day of Pentecost—and the ground they covered must have determined St. Luke's choice of incidents. At the same time it is clear that St. Luke is not hampered by want of information, for he selects and discards what was not to his purpose. It is impossible to identify or estimate the extent of the separate sources. But the long stay at Caesarea (Ac. 24.27) and the connexion with Philip (21.8) and Manaen (a disciple from the beginning, i.e. the Day of Pentecost), St. Luke's own possible connexion with Antioch (11.27 D), his certain connexion with St. Paul and with St. Mark (Col. 4.10, 14) and through St. Mark with St. Peter and St. Barnabas, suggest to us abundant opportunities of obtaining accurate information. This oral information may have been supplemented by written accounts, e.g. of the proceedings before Sanhedrin, the trial of St. Stephen, and the conference at Jerusalem. For the latter part of the book, from 16.10 onwards, we have the evidence of an eyewitness, educated, interested, accurate, and observant. There is no ground for regarding Josephus as one
of the sources used by St. Luke. Where they meet—cf., e.g., 5.36 (Theudas) and 12.3 (death of Agrippa) with Josephus, 20 Ant. v. 1 and 19 Ant. viii. 2—they are obviously independent, and any of the semi-resemblances in direction are useless for proving St. Luke’s acquaintance with Josephus. Nor can we suppose that the epistles of St. Paul were among the sources used by St. Luke. There are a large number of “undesigned coincidences” showing the accuracy of both accounts, but there are also many instances (e.g. Gal. 1.2) of dependence amounting almost to discrepancy, and of omissions, e.g. of St. Paul’s trials and persecutions (cf. 2 Cor. 11), to which St. Luke must have referred with the epistles before him.—The relation of the Acts to Josephus and to St. Paul’s epistles is important because of its bearing on the problem of the date. If a use of these writings were established, a comparatively late date must be assigned to it. Harnack sees little objection to the possibility of its being written soon after 60, i.e., immediately after the close of the “two years” of Ac. 8.30. This early date is adopted by some as establishing the view that the writing is designed to illustrate the extension, the absence of any references to St. Paul’s subsequent fortunes and death (to which some have supposed St. Luke intended to devote a τριτοσ λόγος), and the favourable attitude taken by the writer towards the Roman government—an attitude which, it is said, would have been impossible after the Neronian persecution of 64. The greatest, and probably an insuperable, objection to such an early date for the Acts is that it requires an almost impossibly early date for the gospel which preceded it (1.1). The determining terminus ad quem must therefore be the date of the gospel of St. Luke (Luke, Gospel cf), and for a terminus ad quem we must not go beyond the lifetime of a contemporary of St. Paul. Sanday, Plummer, and Zahn would fix it before 80 A.D. and after 70 A.D. It has been suggested that two editions of the Acts and the gospel were published by St. Luke, and the phenomena presented by the so-called “abstracts” of the sayings of Christ is often quoted in support of this view. Certainly the readings found in authorities belonging to this family of MSS. are often most notably in the Acts, e.g. at 11.28, 12.10, etc., and deserve the attention of the student. The additions are often valuable, and seem to go back to a trustworthy source, but they do not seem sufficient to justify the theory which has been based on them.—The purpose of St. Luke was not to give a complete record of either words or deeds, for he alludes to things passed over (2.40, 43, etc., etc.), but a selection determined partly by his information and still more by his object in writing. The student has to find out St. Luke’s object and scheme of arrangement, for he does not state them. He has to ask why St. Luke dwells so long on the healing of the lame man and its consequences (3.1-4.31), or the incident of Ananias and its consequences (5), or St. Peter’s escape from prison (12). Probably we may rightly assume that St. Luke wished to mark the salient points in the spread of Christianity (1.8) from Jerusalem, and found his climax in the arrival of St. Paul at Rome, and his preaching there άκολουθος (28.31). In doing this he emphasizes the beginning of Christianity in various important centres and districts, and the beginnings of new lines of movement and policy in the Church itself, and in its relation to outside bodies (e.g. the Jews, the Gentiles, the Roman government). Another marked feature of his narrative is the stress laid on the fact that the course of the history is continually under divine guidance, a guidance given to the work of the Church as a whole (15.2, 15.28, etc.), and to that of individuals (10.10, 16.7, etc.). It was not St. Luke’s purpose to write a book which should be an apology for Christianity against Judaism or paganism, or for St. Paul’s line of action, or one which should be an εἰρωνεία between a Petrine and a Pauline Christianity, or one which should give a favourable presentation of the attitude of the Roman government towards Christianity, though it may do these things, so far as a truthful statement of the facts allows.—The historical value of the Acts is the most important point to be considered by the reader, and although it has been depreciated for the groundless reasons just mentioned, its value may be established on the ground of being written as a history of Christianity, the only one of which the records begin with the baptism of St. John the Baptist. It is, however, important to remember that St. Luke refers to political and geographical details (cf. 13.7, 16.20, etc.), and the fidelity with which he records the language, ideas, and organization of primitive Christianity instead of adopting those of a later period. St. Luke does not hesitate to say that people of different opinions were allowed to try to conceal things discreditable or to gloss over discrepancies (e.g. between the accounts of St. Paul’s conversion in 9.22 and 26). It would be difficult in the whole range of literature to find a work where there is less attempt at pointing a moral or drawing a lesson from the facts.” (Ramsey). The genuineness of the speeches has been questioned by some, and it has been suggested that St. Luke, like Thucydides, put his own words into the mouth of the speakers. A comparison of the speeches of St. Peter and St. James with their writings shows many resemblances of thought and expression, and the student will find no difficulty in believing that St. Luke’s speeches are in some cases based on him. They are therefore true to the primitive type of teaching. It has to be remembered that what is preserved in the Acts is but an abstract of what was said, giving the main headings, and therefore bears the impress of St. Luke; but those headings, in St. Paul’s recorded speeches, agree in a remarkable way with what would be likely to have been said, and also with what we find in his epistles (e.g., cf. Ac. 20 with Ep. to Ephesians). There is no reasonable ground, on account of the speeches, to depreciate the historical value of the book.—Satisfied as to its historical value, the student must try to get a clear conception of the book as a whole by marking (a) the progress of time or the chronology, (b) the gradual widening of the horizon, (c) the importance of the chief persons and incidents.—The chronology is often vague, and “the crucial date” for fixing the end of the Acts—viz. the date of Festus’ arrival in Judea—cannot be definitely ascertained. But the Acts covers roughly a period of about thirty years, divided almost evenly by the only fixed date, the death of Herod Agrippa I. in
Adadah, a city in the extreme S. of Judah named with Dimonah and Kedesheh (Jos.15.22). Now 'Ad'adah, a ruin 7 m. S.E. of Arad. [c.r.c.]

Adah (ornament, beauty).—1. The first of the two wives of Lamech, who bore to him Jabal and Jubal (Gen.4.19).—2. A Hittite, daughter of Elion, one of the three wives of Esau, mother of his firstborn son Eliphez, and so the ancestress of six (or seven) tribes of the Edonites (Gen.36.22f.). In Gen.26.34 she is called Bashemath.

Adahlah.—1. Maternal grandmother of king Josiah, and native of Boscath in the lowlands of Judah (2K.22.1).—2. A Levite, of the Gershonite branch, and ancestor of Asaph (1 Chr.6.41). In ver. 21 he is called Imo.—3. A Benjamite, son of Shimhi (1 Chr.8.21), who is apparently the same as Shema in ver. 13.—4. A priest, son of Jeroham (1 Chr.9.12; Ne.11.12).—5. Ancestor of Maseeiah, 15 (2 Chr.23.1).—6. One of the descendants of Bani who had married foreign wives (Ezr.10.29).—7. He is called Jereus in 1 Esd.9.30.—7. The descendant of another Bani, who had also taken a foreign wife (Ezr.10.39).—8. A man of Judah, of the line of Pharez (Ne.11.5).

Adalia, fifth son of Haman, slain by the Jews in Shushan (Esth.9.8).

Adan, the man, from a root signifying ruddy or rosy. He is described as being "formed," or "moulded," as distinct from the act of creation or "making" (all three words are found used of the divine methods in Is.45.18), from the "dust of the earth," i.e. from material particles. "A breath of life was communed to him, and he became a living soul." He was originally placed in a garden of delight [Eden], i.e. in one of the most fertile portions of the earth, apparently the territory between the Tigris and the Euphrates, known as Mesopotamia. It was his duty to cultivate the soil, and he was to have perfect freedom of action (Gen.2.17), so long as he did not contravene the laws of his being imposed upon him by his Creator. Death was the penalty attached to such infringement. In order to put an end to his loneliness, a counterpart or complement was provided for him [Eve], and he was bidden to cleave irrevocably to her in love, since he and she were made "one flesh." On account of the impurity of the serpent's offer (Fall) he was induced to violate the conditions on which his sojourn in the garden of delight was permitted. He and Eve were driven out from the garden, and compelled to dwell in a land on which a curse rested; and henceforth labour was to be no longer a pleasure to him, but a burden. In his banishment two children were born to him, but the results of his evil-doing had already begun to work, and the younger fell by the hand of the elder. [Cain; Abel.] From a third son, Seth, sprung a worthier progeny than that of Cain, the murderer and fugitive. Adam lived, we are informed, to the age of 930 years. [J.1-1.

Adam's City (Jos.3.16). The Jordan was blocked at a distance from the Jericho ford, and the waters "rose up in a heap a great way off, at Adam, the city that is beside Zarethan (see R.V.). It is doubtful whether this site could have been the Admah of the hkkîâh (Gen.14:2) through 14:4.

The name probably survives at the Dânumàch.
ford, 20 miles N. of the Jericho ford; and an Arab historian asserts that in the time of Sibbath (about 1265 A.D.) the Jordan was here blocked for several hours. The bridge at this site was built about the same time. [C.R.C.]

Adamah', one of the “fenced cities” of Naphtali, named between Chinnereth and ha-Ramah (Jos.19.36); now Adamah, 4 miles S.E. of Jabneel (Yeheskiyyah). Adamant, the translation of the Heb. shāmīr in Ezek.3.9 and Zech.7.12, translated in Je.17.1 “diamond.” Dr. Pinches suggests that it may be compared with the Assyry. šemūriy, the word used for a ring (the object in which a precious stone was set). Our Eng. adamant is derived from the Gk., and signifies “the conqueror.” In that language it is always applied to some very hard material. Hesiod (8th cent. b.c.) probably uses it for steel, while in Theophrastus (d. 287 b.c.) it is almost certainly corundum. Adamant in Eng. is also not constant in meaning, sometimes signifying the diamond (which is merely a corruption of the word), sometimes a hard substance. Some hard cutting stone is apparently intended in Jeremiah (17.1): “The sin of Judah is written with a pen of iron and with the point of a diamond.” That stone, however, can hardly have been known to the Hebrews in the prophet’s days [Diamond], and the name, as Ezek.3.9, “ adamant, harder than flint,” suggests that by shāmīr is intended some variety of corundum, a mineral inferior only to the diamond in hardness. Of this mineral—crystallized alumina—the purer kinds are valued as gems, the red being named ruby; the blue, sapphire; the yellow, Oriental topaz; the green, Oriental emerald; the violet, Oriental amethyst. A common kind of corundum is dark or dull coloured, and practically non-transparent; this, on account of its hardness, is still often used for cutting purposes, as is emery, a more granular form, and frequently less pure, of the same, which often contains magnetite (an iron oxide) as an impurity and is thus not quite so hard. The Gk. name for this material is σαφώς or σαφῆς, which the Hebrew lexicographers derive from Heb. shāmīr, and there seems no doubt that the two words are identical. [T.G.B.]

Adami’ (R.V. Adami-nekob), on the border of Naphtali, mentioned after Allan Rezaanaamim (Jos.18.33); now Al Dameh, 5 miles W. of Tiberias. [C.R.C.]

Adar’, a place on the S. boundary of Palestine and of Judah (Jos.15.3), called Hazar-addar in Num.34.4. [H.AZER.]

Adar’, [Months.]

Adasa', a place in Judaea, 30 stadia from Beth-horon (Josephus, 12 Ant. x. 5). Here Judas Maccabaeus encamped before the battle in which Nicanor was killed (1Mac.7.40-45). Now ‘Adashe, a ruin 8 miles S.E. of Beth-horon, on the road thence to Jerusalem. [C.R.C.]

Adbeel’, a son of Ishmael (Gen.25.13; 1Chr.1.29), and probably the progenitor of an Ad claim. Prof. Sayce (History of Cities and Monuments, p. 202) says that Adbeel is mentioned by Tiglath-pileser, under the form of Idib’ulu.

Addan’, a place whence some of the Captivity returned with Zerubbabel to Judaea (Ezr.2.59). In Ne.7.61 the name is Addan; in 1 Esd.5.36, Aalar.

Addar’, son of Bela (1Chr.8.3), called Ard in Num.26.40.

Adder. This word is used for any poisonous snake, and applied in this general sense by the translators of A.V., who use in a similar way the term Asp. The word adder occurs 5 times in the text of A.V., and 3 times in the margin as synonymous with cockatrice—viz. Is.11.5, 14, 29, 59, 59. It represents 4 Heb. words. (1) ʼaḥshubh, found only in Ps.140.3, “They have sharpened their tongues like a serpent, adder’s poison is under their lips”; the latter half of this verse being quoted by St. Paul in Ro.3.13. Here serpent-poison is of course a figure for evil-speaking. The number of poisonous serpents with which the Jews were acquainted was probably limited to some 5 or 6 species [Serpent]; and as there are reasonable grounds for identifying pethen and sphiphphon with two well-known species—viz. the Egyptian cobra and the horned viper—it is not improbable that ʼaḥshubh may represent the sand-viper (Echis carinatus) of Transcaspia, Arabia, and other parts of S. Asia and N. Africa. (2) Pethen. [Asp.] (3) Cephid, or ciph'oni, occurs 5 times in the Heb. Bible. In Pr.23.32 it is translated adder, but in Is.11.5, 14, 29, 59, 59. Je.8.17, it is rendered cockatrice. From Jeremiah we learn that it was venomous, while from the parallelism of Is.11.5 it appears that ciph'oni was more dreaded than pethen. ciph'oni may, then, quite possibly indicate the Algerian viper (Vipera lebetina), a very poisonous snake ranging from N. Africa to Syria and Persia. (4) Shēphiphphon occurs only in Gen.49.17, “Dan shall be a serpent by the way, an adder in the path, that biteth the horse’s heels, so that his rider shall fall backward.” This habit of lurking in the sand and biting at horses’ heels suits the character of the horned viper, or Cleopatra’s asp (Cerastes cornutus), abundant in the deserts of Egypt, Syria, and Arabia. This venomous species averages from 12 to 15 in. in length, but occasionally larger individuals are found.

Addi’. 1. An ancestor of Jesus Christ (Lu.3.28).—2. The ancestor of Israelites who put away their foreign wives (1 Esd.9.31). The same place in the list of Ezr.10.30 is occupied by Pahath-moab.
ADOPT

Addo' (1 Esd. 6:1) = Iddo, 5.

Addon.' [ADON.] 1. (A'dsdo'). His sons are named (1 Esd. 5:34 only), and among the sons of Solomon’s servants who returned under Zerubbabel—2. (I'ad'sdo', R. V. Juddus.) A priest whose descendants were unable to establish their genealogy in the time of Ezra and were removed from their priesthood (1 Esd. 5:38). He is there said to have married a daughter, and adopted the name, of Berzexus (R. V. Zorzellus) or Barzillai (cf. 2 Sam. 17:27), and is called by this name in Ezra 2:61 and Neh. 7:63. [C. D.]

A'der, a Benjamite, son of Beriah, chief of the inhabitants of Ajalon (1 Chr. 8:15). The name is more correctly Eder, as in R. V.

Ad ida', a town on an eminence overlooking the low country of Judah, fortified by Jerahmeel (1 Chr. 11:20). He returned to his wars with Tryphon (1 Mac. 12:38, 13:13). Probably identical with Hadid.

Adiel.—1. A prince of the tribe of Simeon, who took part in the raid made by his tribe upon the Hamite shepherds of the valley of Gedor in the reign of Hezekiah (2 Chr. 31:12). A priest, ancestor of Maasiai (1 Chr. 6:12).—2. Ancestor of Azmaveth, David’s treasurer (1 Chr. 27:25).

Adin', ancestor of a family of which some members returned from captivity with Zerubbabel (Ezra 2:15; Neh. 7:20) and with Ezra (Ezra 8:6). They joined with Nehemiah in Neh. 10:16 to separate themselves from the heathen (Neh. 10:6).

Adina’, one of David’s captains beyond the Jordan; a Reubenite chief (1 Chr. 11:42).

Adino’, the Ezinite. [JASHOB.]

Ad inus = Jamin, 3 (1 Esd. 9:43; cf. Ne. 8:7).

Aditha’im, a town of Judah, in the Shephelah, named, between Sharaim and hag-gag, in Jos. 15:36. [AIDA.] [G. R. C.]

Adjuration. [EXORCIST.]

Adla’, father of Shaphat, 5 (1 Chr. 27:29).

Ad’mah, one of the cities of the Plain, i.e. of the kikkar of Jordan (Gen. 10:19, 14:2, 8; Deut. 29:23; Ho. 11:8). [ADAM, CITY.] [G. R. C.]

Ad mat’ha, one of the seven princes of Persia who were counsellors to Ahasuerus (Esth. 3:14).

Adna.—1. One of the family of Path-moab who returned with Ezra and married a foreign wife (Ezra 10:30).—2. A priest, descendant of Harim in the days of Jokahim, the son of Jeshua (Ne. 12:15).

Adnah.—1. A Manesite who deserted Saul and joined David on his road to Ziklag from the camp of the Philistines. He was captain of a thousand, and fought with David in the pursuit of the Amalekites (1 Chr. 12:20, 21).—2. A man of Judah; the chief captain in Jehoshaphat’s army (2 Chr. 17:14).

Adon, Adonai. [Lord.]

Adoni-bezek, king of Bezek, a city of the Canaanites. [BEZEK.] This chiefman was vanquished by the tribe of Judah (Judg. 1:37), who cut off his thumbs and great toes, and brought him prisoner to Jerusalem, where he died. He confessed that he had indulged in cruelty upon 70 petty kings whom he had conquered.

Adonijah (my Lord is Jehovah).—1. The fourth of David’s sons by Haggith, thus coming next after Absalom (2 Sam. 3:4). When his father’s strength was visibly declining, he put forward pretensions to the crown. David now commanded Bathsheba that Solomon should succeed (1 K. 1:30), for there was no absolute claim of primogeniture in these Eastern monarchies. Adonijah’s cause was espoused by Abiathar the priest, and Joab the commander of David’s army. [JOAB.] His name and influence secured a large number for the enterprise. Among the captured army belonging to the tribe of Judah (cf. 1 K. 1:19 and 25); and these, together with all the princes except Solomon, were entertained by Adonijah at a great sacrificial feast. Nathan and Bathsheba, thoroughly alarmed, apprised David of these proceedings, who immediately gave orders that Solomon should be conducted on the royal mule in solemn procession to Gihon, a spring on the E. of Jerusalem (2 Chr. 32:30). [GIHON.] Here he was appointed and proclaimed king by Zadok the priest and Nathan the prophet, and joyfully recognized by the people. Adonijah fled to Abishag, but was pardoned on the condition of good behaviour (1 K. 5:30-53). The death of David quickly followed on these events; and Adonijah begged Bathsheba, who as “king’s mother” would now have special dignity and influence [QUEEN], to procure Solomon’s consent to his marriage with Abishag, who had been the nurse of David in his old age (1 K. 5:31). This was regarded as equivalent to a fresh attempt on the throne [cf. ABSALOM; ABNER]; and therefore Solomon ordered him to be put to death by Benaiah, as having violated the terms of his previous pardon.—2. A Levite in the reign of Jehoshaphat (2 Chr. 17:8).

—3. (Ne. 10:16.) [ADONIKAM.] [A.-W.S.]

Adonikam, the head of a family of which some members returned with Zerubbabel (Ezra 2:13; Neh. 7:18; 1 Esd. 5:14), and the remainder with Ezra (Ezra 8:13; 1 Esd. 8:39). The name is Adonijah in Ne. 10:16.

Adoniram’ (1 K. 4:6, 14; Adoram, 2 Sam. 20:21; 1 K. 12:18, Hadoram, 2 Chr. 10:18; LXX. Adoram, Adoram, 2 Chr. 21:10; son of Abda. He was placed over the levies under David and Solomon. This made him very unpopular, and when he was sent by Rehoboam to put down the revolt of the Ten Tribes, he was stoned to death. [G.M.Y.]

Adon-ze’dec (lord of righteousness), the Amorite king of Jerusalem who organized a league with four other Amorite princes against Joshua. The confederate kings having laid siege to Gibeon, Joshua marched to the relief of his new allies and put the besiegers to flight. The five kings took refuge in a cave at Makkedah, whence they were taken and slain, their bodies hung on trees, and their carcasses served as a regular pledge (Jos. 10:17).
ADORA

ADULLAM

as his son, one born of other parents. The child thus adopted was entitled to the name of his new father, and a share in his ancestral religious observances (sacra privata), and he ranked as an orphan. Adoption was also entitled to the property of his adopted son, and exercised towards him all the rights and privileges of a father. Adoption was not a Jewish practice (FAMILY), and would have been inconsistent with the Mosaic law as to inheritance. Parallel instances alleged in O.T. (Gen.15.3, 18.2) and N.T. law as to legal adoption, to full family privileges. The leading thought in St. Paul’s use of the word is that the adoption of man in Christ is an act of God’s grace, transcending natural relationship. Liddon, Explan. Anal. of Ep. to Romans (1893); Maine, Ancient Law (5th ed. 1873).

A.D., however, there are indications of a tendency, as the result of Christ’s teaching, to restrict such attitudes (whether of mind or body) to times and modes of divine worship; e.g. St. Peter’s rebuke to Cornelius (Acts.10.25,26) and the angel’s to St. John the Divine (Rev.19.10; cf. Col.2.18). Hence it is significant that our Lord, throughout his ministry, refused to accept such signs of honour when paid to Him, whether before (Matt.5.22; Luke.47; John.11.32) or after His resurrection (Acts 28.9).

[CL.F.]

Adrammelech.—1. (2 K.17.31.) Adrammelech and Ananmelech were the two deities introduced into Samaria by the Septavrites, some of the heathen colonists transplanted thither by Sargon, king of Assyria. Their worship resembled that of Moloch, as it included the sacrifice of infants by fire. The meaning of the names is somewhat uncertain. The probability is that, with Schrader and others, we should take them as Adar (Astar) the prince, and Ann the prince. (For the juxtaposition, cf. the analogous Jehovah Elohim.) “Ann the king” is frequently found in Assyrian inscriptions, but there is no certain evidence of the rite of child-burning. There is also some doubt as to the locality of Sepharvaim; but the recurrence of the name as—2 Chr.32.21; Is.37.38, favours its identification with the Syrian Saraba’in, rather than with the Sippur of N. Babylonia. [B.F.S.]

Adramyttium, a seaport in the province of Asia, situated on the west district of Aedile, and also Mysia (see Acts 16.7). Adramyttium gave, and still gives, its name to a deep gulf on this coast, opposite to the opening of which is the island of Lesbos. [MYTILENE.] St. Paul was never at Adramyttium, unless perhaps during his second missionary journey, on his way from Galatia to Troas (Acts.19), and its purely Biblical interest is in illustrating his voyage from Caesarea in a ship belonging to this place (Acts.27.2). Ships of Adramyttium must have been frequent on this coast, for it was a place of considerable traffic. It lay on the great Roman road between Assos, Troas, and the Hellespont on one hand, and Ephesus, and Pergamus, on the other, and was connected by similar roads with the interior of the country. The modern Adramaut is a poor village, though still a place of some trade and shipbuilding.

A‘dria, more properly Adriās. The meaning of this word in Acts 27.27 is important. The word seems to have been confined to a town of Adria, near the Po; and at first denoted the part of the gulf of Venice in that neighbourhood. Afterwards its signification was extended to embrace the whole gulf, and subsequently farther still, so that in the apostolic age it denoted that natural division of the Mediterranean known as the Syrtic basin (see Acts 27.17, R.V.), and which had the coasts of Sicily, Italy, Greece, and Africa for its boundaries. This definition is explicitly given by the geographer Ptolemy, almost a contemporary of St. Paul, who says that Crete is bounded on the W. by Adriās. Later writers state that Malta divides the Adriatic Sea from the Tyrrhenian Sea, and the isthmus of Corinth the Aegean from the Adriatic. Thus the ship in which Josephus started for Italy about the time of St. Paul’s voyage founded in “Adriās,” and there he was picked up by a ship from Cyrene and taken to Puteoli (Life iii. ; cf. Acts 28.13). It seems, however, that the hypothesis is untenable that an argument has been drawn from this geographical term in favour of the false view which places the apostle’s shipwreck in the gulf of Venice. [MELITA.]

Adriel, a son of Barzillai the Meholathite, to whom Saul gave his daughter Merab, although he had previously promised her to David (1 Sam.18.19). His five sons were amongst the seven descendants of Saul whom David surrendered to the Gibeonites (2 Sam.21.8) in satisfaction for the endeavours of Saul to extirpate them, contrary to the league made with them by Joshua (Josh.9.15). In 2 Sam.21.8 they are called the sons of Michal, which is probably a transcriptional error for Merab (see marg. ad loc.).

Aδιεια, a Naphtalite, ancestor of Tobit (Tob.1.1).

Adullam, a royal city (Josh.12.15) in the Shephelah, or low hills of Judah (Gen.36.1; Josh.15.35), near Socon (2 Chr.11.7); fortified by Rehoboam. This cave of Adullam was David’s stronghold at a rock, after he left Gath, and apparently near Keilah.
ADULLAMITE

(1Sam.22:1,23:1; 1Chr.11:15). In Mt.1.15 we read (see R.V.), "The glory of Israel shall come to Adullam." [ADOLLAM; 2Mac.12:38.] Now the ruined site 'Ai'd-el-ma'ah (Clermont-Ganneau) on W. side of the upper valley of Elah. Eusebius places Adullam 10 Roman miles E. of Beit Jibrin (actually 7 English miles). The ruins are on an isolated rocky hill about half a mile above the valley, and the cave on the N. slope is still inhabited. ([Stew., W. Pal.] iii. pp. 311, 361.) The town was inhabited after the Captivity (Ne.11:30) and was still a small village in 4th cent. A.D. [C.R.C.]

Adul'tamite, a native of ADULLAM; the designation given to Hirah (Gen.38:1,12,20).

Adu'ltaney. The parties to this offence as committed in a polygamous society were a married woman and a man other than her husband. For further information as regards O.T., see Crimes; Ordeal of Jealousy; Water of Bitterness. [H.M.W.]

In N.T. Adultery was the only cause for which our Lord permitted Divorce (Mt.5.32; 19:9; see also Deut. 24:1). Some groups of Shammay against the Hillelites, who allowed divorce for the most trivial offences (Gitt. ix. 10; J. c. Sotah i. i. 16b; cf. Mt.19:3). The active party to a divorce marrying again was guilty of adultery (Mt.10:11,12; Lu.16:18a); also he who married a divorced woman was likewise guilty (Jn.8:18b; Mt.5:32a,18b). Some think Mt.19:9a permits the innocent party to re-marry if the cause was adultery, but see R.V. marg. notes to verse and art. Divorce. Jewish law did not permit the marriage of the guilty parties, and it is supposed that the guilty woman might not marry again. According to Jewish authorities, adultery was so prevalent in N.T. times (cf. Lu.18:11) that the Mosaic punishment of stoning was superseded by divorce. For the same reason the ordeal of the "bitter waters" was about this time abolished by the Sanhedrin (Sotah ix. 9), since, according to R. Akiba, the test took effect only if the husband was the innocent one (Siphi, Naso 21; Sotah 47b). This may throw light on our Lord's action in the case of the woman brought before Him (Jn.8:3-11, especially vv. 7,9). [H.H.]

Adum'mim (Jos.15:7,18:17; the ascent of blood), the present Tal'at ed Dumm (ascent of blood) on the road from Jerusalem to Jericho, 9 miles N.E. of Jerusalem. The limestone is here covered with red stains like blood. [C.R.C.]

Advent. [Incarnation; Coming of Christ, Second.]

Advocate, the word used in A.V. and R.V. to translate παρακλητός in 1Jn.2:1, elsewhere rendered "Comforter" (Old Eng. "comforter"), in this place the title is given to the ascended and glorified Christ in His capacity as Mediator and Intercessor. Elsewhere it is applied to the Holy Spirit (Jn.14:16,26; 15:26,16:7), though the expression "another Comforter" in the first of these passages shows that the title may be properly applied to the same meaning to either the Second or Third Person of the Trinity. And it should be noted that the office of intercession for the faithful, usually attributed to the glorified Christ, is in Ro.8:26,27 assigned to the Holy Spirit also.

It is in fact this work, rather than the secondary one of "comforting" or consoling, which is implied in the Gk. word. For παρακλητός meant in legal phraseology an advocate or champion, one who was "called to the side" of an accused person to defend him, or bear witness in his behalf. Hence the thought seems to be that Christians accused by Satan (the Diabolos, or slanderer) may look both to the exalted Son of God as their Advocate or Champion (Ro.3:34), and also to the Holy Spirit in the Church, Who makes their prayers and intercessions on earth efficacious. Westcott, Gosp. acc. to St. John (1881); Epp. of St. John (1883). [A.R.W.]

Aed'iass (1Esdr.9:27; cf. Ezr.10:26). Perhaps a corruption of Eli'ah, 2, or of Abdi, 3.

Aene'as, a man healed of his palsy at Lydda by St. Peter (Ac.9:33,34).

Ae'non, near Salim (Jn.3:23), where St. John baptized "because there was much water there." As in the cases of Bethabara and Sychar, the Fourth Gospel here shows special regard for Palestine, these sites being otherwise unnoticed. N.E. of Shechem is the perennial stream of Wā'dy Fā'rāh, flowing E. to Jordan. It was the old boundary of Judaea and Samaria. The ruin 'Ainān is 4 miles N. of the stream, and the village Salīm 4 miles S. of the stream. The place name appears also to be given to a gorge, 6 miles N.W., where else in Palestine. The wild valley is a fit site for baptism in pure water. [C.R.C.]

Aethiop'ia. [ETHIOPIA.]

Affinity. [MARRIAGE.]

Ag'aba (1Esdr.5:30). [HAGAB.]

Ag'abus, mentioned in Ac.11:28,21,10.

His story is important as an evidence that the gift of prophecy in apostolic times was not limited to exposition of divine truth, but included prediction of the future. For his prophecy of a famine "over all the world," and the fulfilment of it, see CLAUDIUS. He also predicted St. Paul's arrest and deliverance to the Gentiles, repeating therein more circumstances of the events to take place at Tyre (Ac.21:4). Being a Jew, he naturally used the symbolic method of emphasizing his prediction, which we meet with in Jeremiah, Ezekiel and others (cf. Je.13:1-13). [E.R.B.]

Ag'ag, a king of Amalek, whom Saul spared, together with the best of the spoil, although the will of Jehovah was that the Amalekites should be extirpated (Ex.17:14; Dent 25:17; 1Sam.15:1-3). For this disobedience Samuel declared that Jehovah had rejected Saul from being king, and himself sent for Agag and slew him "in the presence of Jehovah" (1Sam.15). The name Agag seems to be used in Nm.24:7 as the general title of the kings of Amalek, like Pharaoh of Egypt. [H.C.B.]

Agagate. Haman is so called in Esth.3:1,10,8,3,5. The Jews consider HAMAN a descendent of Agag the Amalekite, and hence account for his hatred against the race.

Ag'atho'ia. The term is used in noun form to denote a report taken in common by the Christians of the apostolic age, and retained in use under varying conditions for many centuries. In N.T. the word occurs in this sense only in Jn.12, and in a doubtful reading of 2Pe.2:13. It is found,
Agar. [Hagar.]

Agarenes (Ba.3:23). [Hagarenes.]

Agate, mentioned four times in text of A.V.  
- in Ex.28.19, 89.12, Is.54.1, and Ezek.27.16.  
- In Ex.28.19, 89.12 it is represented by the Heb. sh’bhu (probably from a Semitic word “shubu” and in Assyro-Babylonian “shubu”), and is spoken of as the second stone in the third row of the high priest’s breastplate; in Is.54.12 and Ezek.27.16 the original word is kadkhah (R.V. “rabies”), by which, no doubt, is intended a different stone. [Rubies.] In Ezek.27.16 the mention here of chrysoberyl (12 lunar months or about 364 days) and the chrysoprase occurs in marg. in place of the emerald of the text, as the translation of a different Heb. word, nophkèh; the translators evidently being perplexed (and this may sometimes be said of the R.V. also) as to what minerals were intended by the writers. Probably however, the name of this nameless gemstone of agate, for all interpreters so understand it.
to have been divided into three seasons, of four months each in a normal year, these being the seasons of harvest, vintage, and sowing. Barley harvest began in the valleys about Passover time, or early in April (Jos.3:15), and a month later in the hills. Wheat harvest began at Pentecost, in May (Ex.34:22), and continued in the mountains till June or the 4th month. In the fruit season the "in-gathering" occurred at the "end" of the civil year, or the end of the 6th month (Ex.34:22), early in September; and the Feast of Booths, and in the middle of the 7th month, followed the vintage. Prayers for rain began on the 3rd or 7th of the 6th month (in October), and a fast was ordained (Mishn., Taanith i. 4) if it had not fallen by the middle of the month.

[RAIN.] In the third season the fasting for rain became more severe if it had not fallen in November. On the 28th of the 11th month (in February) the "wave sheaf" of wheat (Lev.23:10) was sown 70 days before the Passover. The earliest sowings of any crop had begun already in the middle of the 7th month (or in September), when the ploughing began if the rains were early. On the 8th or 9th of the last month (or in February) rejoicings for rain were celebrated, except in years of complete drought. This was the ordinary routine of the year, and the seasons for ploughing, sowing, harvest, and vintage, for the rains and dry months, remain unchanged to the present day.—Agricultural Operations. The cultivation, from the earliest time, included that of corn in open fields, of vegetables and fruit in enclosed gardens, and of olives in groves—especially in the lower hills, or of vines on the terraced mountains, 'where the September mists and the heat reflected from stone walls swelled and ripened the grapes. The lands, ploughed in autumn and winter and harrowed (Harrow), appear to have been manured (2K.9.37; Je.9.22), as they certainly were about the Christian era (Mishn., Shebith iii. 2), as well as the fruit trees (Iu.13.8). The ploughing was not deep (Pliny, Hist. Nat. v. 47), and the soil, especially in Philistia, Sharon, Edraelon, and Bashan, was naturally rich. It was not irrigated, like that of Egypt or of Babylonia, and "watering with the foot"—or directing the stream (as is still done) by damming the mud bank of the shallow ditch with the naked foot—was confined to gardens (Deut.11.10). In later times palm groves were irrigated at Naarith, 5 miles N. of Jericho (17 Ant. xiii. 1), and the aqueduct with its irrigation channels still remains there (at el ‘Avieh). Irrigated gardens (Can.4.4), and even fields, are mentioned in the Mishna (Moed Katon i. 3: Peak v. 3). The crops included wheat, barley, and spelt (A.V. rie), the latter (kussemeth) being the Arab. kirsineh. These are still grown, but not rye nor oats. The land was cleared of stones and thorns (Is.5:2; Job 5:5; Pr.24:30,31), and even of forest or copse (Jos.17:18), which now grows often over remains of vineyards. Thus firewood was often—as now—scarce, consisting of the roots of bushes; and perhaps charcoal from the wild broom was used instead (Ps.120.4). The corn, represented on Egyptian frescoes, was reaped standing; and Hebrew barley was heavier than the short-stalked grain now reaped crouching on the
hears. It was carried in a cart (Am. 2.13), the sheaves, or armfuls (Ps. 129.7), being stacked in shocks (‘omer, Arab. ghumr). The stubble (and often the standing corn) was liable to catch fire in summer, or was purposely burned (Ji. 2.5; Na. 1.10). Land lay fallow at least in the seventh year (Je. 4.3; Ho. 10.12), and rotation of crops was contrary to the prohibition of mixtures (Deut. 22.9).

The threshing-floor (Heb. goren, Arab. jurn) was a fixed site (Gen. 50.10; 2 Sam. 24.18); no doubt, as now, a flat rock-surface in the hills, or a clay floor in the plains, outside the village, usually to the W. to catch the breeze. The corn was trampled by oxen (Ho. 10.11), as in the Egyptian picture, or driven over with a sledge (Heb. mūrāgh, Syrian Arab. mūrej), on the under side of which sharp pieces of basalt were let in as teeth (Is. 28. 28, 41. 15; 2 Sam. 24. 22), this being dragged by an ox or horse, driven by a boy on the sledge, with a goad, or reins and whip. The ox was not muzzled (Deut. 25. 4). The owner slept on the floor to guard the corn (Ru. 3. 4, 7). The corn, heaped in the centre, was winnowed with a wooden shovel or fan (Ru. 3. 2; Job 21. 18; Ps. 35. 5; Mt. 3. 12), and the flour sifted (Am. 9. 6). Lighter crops—the nigella (A. V. Fitches) and cummin—were not crushed by a stone roller, nor by the mūrāgh (Is. 28. 27), but beaten out by a staff or rod. The corn was stored in granaries as in Egypt (Lu. 12. 18), or commonly in rock-cut pits (Arab. ma’umirah), which are still often large enough to hold more than one man (2 Sam. 17. 19; Je. 41. 9; Ji. 1. 17). The olives were beaten down with rods, as they still are (Deut. 24. 20; Is. 17. 6), and crushed in a mill. Vineyards and vegetable gardens had stone walls or thorn-hedges [Hedge] with a rock-cut vat, and a low tower or platform for the guard to stand on (Is. 1. 8, 5. 5; Mt. 21. 33). The grapes were gathered in baskets (Je. 6. 9): the best vines were trained low over terrace walls (Mishna, Menākoth viii. 6; Pliny, Hist. Nat.)
AGRICULTURE

xlvi. 35); others were planted in quincunx order (Kiltaim iv. 5), or trained on trellises (Mi.4.4; Ps.128.3). Hired labourers were employed in the vintage (Mt.20.1), and the tenants (as in Babylon) paid a proportion

in kind to the owner (2Sam.9.10; Can.8.11; Mt.21.34). The pious provision for the poor [Corner] included not only gleanings (Ru.2.17), and the right to eat in the field (Deut.23.24) like the disciples (Mt.12.1), but forgotten sheaves (Deut.24.19-21) and the gleanings of vines and olive trees (Lev.19.9,10). A tithe every third year appears to have been levied for the poor (Deut.14.28,29.12; Am.4.4; see Num.18.24). It should be noted that grafting (Is.17.10; Ezk.17.4), though known, was also condemned as a "mixture."—Later Cultivation. The cultivation of Palestine, as described in many passages of the Mishna (especially in the tracts Kiltaim, Shkibith, and Angin), though written of c. 150 A.D., or rather later, appears to represent that which existed in the time of our Lord, and differs little from that of Palestine to-day. The cereals and other annual crops included wheat, barley, and spelt (tare and wild corn being noted), with millet, sesame, rice, and perhaps indigo, flax, and hemp. The fruits mentioned, besides grapes, olives, and figs, included apples, pears, peaches, pomegranates, quinces, citrons, almonds, mulberries, dates, melons, walnuts, pistachios, and blackberries. Olive oil was of three kinds (Menahoth viii. 4) from fresh fruit, with various degrees of pressure. Olives were also dried and salted. The vegetables noticed include gourds, pumpkins, cucumbers, beans, chickpeas, onions, leeks, shallots, carrots, radishes, rape, lentils, beet, cabbages, and (for the bitter herbs of Passover, Num.9.11) lettuce, endives, horse-radish, and liquorice. To these objects of cultivation we may add the natural products sometimes producing food. Trees and shrubs noticed in the Mishna include the oak, terebinth, carob [Husks], cedar (oil thence being used), sycamore-fig (see Am.7.10), wormwood, willow, myrtle, rhhamnus, halsam, cypress, and hawthorn, with others that are doubtful. Herbs and flowers included roses, poppies, lilies [the latter planted, as now, near graves], coccus, rue, cistus, madder, mallow (whence food for the poor), cresses, succory, parsley, mint, hyssop (used as medicine), wild asparagus, colocynth, mustard, fennel, coriander, colewort, milkwort, and nasturtiums. [Barley, Chaff, Corn, Corner, Field, Hay, Mattick, Millet, Rain, Sower, Yoke, Yoke, Palestine.] [C.R.C.]

Agrippa. [Herod.]

Ahab, son of Jekah (Pr.30.1), is credited by most commentators with the compilation of Pr.30.1-31.9. Nothing is known of him; the substitution in R.V. marg. of "of Massa, cf. Gen.25.14" for A.V. "the prophecy," R.V. the oracle, being entirely conjectural, may have been one of the "men of Hezekiah," an Ishmaelite who had raised himself above the religion of Abraham and recognized the religion of Israel as its completion (Delitzsch), or one of the wise "children of the East" contemporary with Solomon (1K.4.30) (Perowne). The paraphrases of the name in LXX. and Vulg. suggest corruption from a word similar to Qödeloth (= Ecclesiastes) as indicating "a collector" (of proverbs). [Proverbs.] Delitzsch on Prov. (T. & T. Clark), and Perowne in Camb. Bible for School. [C.R.D.B.]

Ahab (lit. father's brother, probably meaning one who closely resembles his father).—1. Son of Omri, seventh king of the separate kingdom of Israel, and second of his dynasty. He made an ill-starred marriage with Jezebel, daughter of Ethbaal, king of Tyre, who had been priest of Astarte; a union intended doubtless to strengthen the alliance begun by Solomon with Phoenicia to the commercial benefit of both kingdoms (cf. 1K.20.34). H. Ahab's reign was distinguished by the ministry of the great prophet Elijah, under protest from whom, and in obedience to Jezebel's wishes, Ahab caused a temple to be built to Baal in Samaria, while Jezebel hunted down and put to death God's prophets, some of whom were concealed in caves by Obadiah, the governor of Ahab's house. The Phoenician rites were carried on upon such a scale, that we read of 450 prophets of Baal, and 400 of Asherah. (See 1K.18.19, where K.V. rightly substitutes the proper name Asherai for the groves, as again in 2K.21.7, 23.6.) How the worship of Baal, the Phoenician god, was introduced into Israel, in consequence of "a sore famine in Samaria," is related under Elijah. Ahab had a taste for splendid architecture, which he showed by building an ivory house and several cities. He adorned Jezebel (now Zer'lin), by the plain of Esdraelon, with a palace and park for his own residence, though Samaria remained the capital of his kingdom: Jezebel standing in the same relation to it as the Versailles of the old French monarchy to Paris (Stanley, S. and P. 244). When his neighbour Naboth refused to part with his vineyard (1K.21.3; cf Lev.25.23), which Ahab coveted, a false accusation of blasphemy was brought against him, and he and his sons were stoned to death (2K.9.26). Elijah declared, as penalty, the entire extirpation of Ahab's house. The king's repentance, however, brought postponement of the sentence's execution. Ahab undertook three campaigns against the Philistines, and in one, was defeated and his army lost its most effective defensive and offensive weapon. In the first, Benhadad laid siege to Samaria; and Ahab, en-
couraged by a prophet, made a sudden attack on him, whilst in arrogant confidence he was banqueting in his tent with his thirty-two vasal kings. The Syrians were totally routed, and fled to Damascus (1 K. 20.15). But the years (Benhadad, believing that his failure was owing to some peculiar power which the God of Israel exercised over the hills, invaded Israel by way of Aphek, on the E. of Jordan. Ahab's victory was complete, and Benhadad himself fell into his hands; but was released (contrary to the will of God announced by a prophet) (2 K. 10.26). It appears that some street names which he held, and making "streets" for Ahab in Damascus: that is, admitting into his capital permanent Heb. officers, in an ambassadorial position, with special dwellings for themselves and their retinues—Benhadad's predecessor having exacted from Omri a similar privilege in respect of the city of Samaria. (See above, p. 549.)—See Street. It appears from Assyrian records (Schrader, Cuneif. Inschr. and O.T. 2nd ed. i. 183 ff.), that Ahab's readiness to make peace with Syria arose from the reviving energies (after a century of comparative inaction) of their common foe, Assyria, under Shalmaneser II., c. 857 B.C. On the other hand, Shalmaneser there is a list of the allied kings of Syria whose forces were defeated by him at Qarqar (near the Orontes) in 854 B.C. Among their names occur Ahabbu Sir'-lāa (or Sirī-lāa), considered to be Ahab of Israel, and Adad-īdri (identified with Benhadad). Another opinion, however, which has importance, is that the above names have nothing to do with the Ahab and Benhadad of the Biblical narrative, on the grounds that (i) Sir'-lāa cannot mean Israel, and should in fact be read Riblah; (ii) Adad-īdri is not Benhadad, but Hadadezer; (iii) it is unlikely that Ahab would join forces with his constant enemy Benhadad. (iv) is possibly to be chronologically impossible to bring any part of Ahab's reign at all as late as c. 853 B.C. We last read of him when, in conjunction with Jehoshaphat, king of Judah, he attacked Ramoth in Gilead, on the E. of Jordan, claiming that town for Israel. Michaiah's warning led only to his imprisonment. Ahab had to make the attack upon theSyria, and "drew a bow at a venture," and, though stayed up in his chariot for a time, he died towards evening, and his army dispersed. When he was brought to be buried in Samaria, the dogs licked up his blood as a servant was washing his chariot; a partial fulfilment of Elijah's prediction (1 K. 21. 10), more literally accomplished in the case of his son.—2. A prophet who deceived the captive Israelites in Babylon, and was burnt to death by Nebuchadnezzar (Je. 29.21). [A.W.S.]

**Aharah**, third son of Benjamin (1 Chr. 8.1). [Ahiram]

**Aharhel**, a name in an obscure fragment of the genealogies of Judah. "The families of Aharhel" apparently traced their descent through Coz to Ashur, the posthumous son of Hezron. The Targum of R. Joseph on Chronicles identifies him with "Hir the first-born of Miriam" (1 Chr. 4.8).

**Ahasai** (Ne. 11.13 = Ahzerah, 1 Chr. 9.12), a chief, ancestor of Asaph. [Am.]

**Ahasbani**, father of Eliphelet, one of David's 37 captains (2 Sam. 23.34). In the list in 1 Chr. 11.35, Eliphelet appears as "Elipha the son of Ur."

**Ahasuerus.** Modern investigation seems to have established that the bearer of this name in Ezra 4.6 and Dan. 9.1 is to be identified with the Ahasuerus of the book of Esther—viz. Xerxes, son of Darius Hystaspis, and king of Persia, 485-465 B.C. Thus Ezra 4.6ff. is not, as has been supposed, a narrative of the opposition of the Samaritans during the two reigns intervening between Cyrus and Darius Hystaspis—viz. those of Cambyses, in which two kings have been identified on insufficient grounds with the "Ahasuerus" and "Artaxerxes" of that passage—but it is, on the contrary, a continuation of the historical treatment of the subject in the days of the two immediate successors of Hystaspes. Xerxes and Artaxerxes I. Phenianus (identified with the second successor of Hystaspes, Hystaspes Hystaspes) in the chronological order is resumed in 4.24 ("So it ceased," etc.). In Dan. 9.1 the obscurity which hangs over the name of "Darius the Mede" at any rate leaves it pretty certain that the writer had in view no Ahasuerus other than Xerxes. The Heb. 'ahaseverōsh represents the Persian Khshayārāš (mighty eye, or mighty man). The
smoking firebrands," and invited him to ask for a sign from Jehovah. Ahaz replied, "I will not ask, neither will I tempt the Lord," whereupon the prophet gave him the sign of Immanuel (Is. 7.10-16). It would seem, however, that Ahaz had already appealed for help to Tiglath-pileser, king of Assyria (2K. 18.7), who eventually freed him from his enemies by invading Syria, taking Damascus, killing Rezin, and depriving Israel of its northern and trans-Jordanic districts. But Ahaz, as the price of this help, became tributary to Tiglath-pileser, sent him all the treasures of the temple and his own palace, and even appeared before him in Damascus as a vassal. He also ventured to seek for safety in heathen ceremonies; making his son pass through the fire to Moloch, consulting wizards and necromancers (Is. 8.19), sacrificing to the Syrian gods, introducing a foreign altar from Damascus, and probably the worship of the heavenly bodics from Assyria and Babylon. He was, however, driven from the horses of the sun mentioned in 2K. 23.11; and "the altars on the top [or, roof] of the upper chamber of Ahaz" (23.12) were connected with the adoration of the stars. We see another and blameless result of this intercourse with an astronomical people in the chirim of Ahaz (1K. 18.18-39).—A son of Micah the grandson of Jonathan through Meribaal or Mephibosheth (1Chr. 8.35, 36, 9.42).

Ahaziah.—1. Son of Ahab and Jezebel, and eighth king of Israel. After the battle of Ramoth in Gilead [Ahaz], the Syrians had the command of the country E. of Jordan, and cut off all communication between the Israelites and Moabites, so that the vassal king of Moab refused his yearly tribute (2K. 3.1-3, 5). Before he could take measures for punishing this revolt, Ahaziah fell through a lattice in his palace at Samaria. In his health he had worshipped Baal (1K. 22.51-53), and now he sought counsel in Elberethim. Elijah denounced him three times, and predicted his death (2K. 1.1-17). His endeavour to join the king of Judah in the Red Sea traffic with Ophir is related under Jehoshaphat.—2. Fifth king of Judah, son of Jehoram and Athaliah daughter of Ahaz, and therefore not of the house of David, but a descendant of Azariah (2Ch. 22.6), probably by a covist's error, and Jehoahaz (21.17; 25.23). He allied himself with his uncle Joram, brother and successor of Ahaziah, t. against Hazael, the new king of Syria. The two kings were, however, defeated at Ramoth, where Joram was so severely wounded that he retired to Jezreel to recover. The revolution under Jehu broke out while Ahaziah was visiting his uncle at Jezreel. Jehoram and Ahaziah went out to meet Jehu, who shot the former through the heart, and pursued Ahaziah as far as the pass of Gour, near the city of Ibleam. There Ahaziah was mortally wounded, and died when he reached Mount Hor (2K. 8.25-9.28). In 2Ch. 22.9 an apparently different account is given of his death. He was 22 years old at his accession (12 acc. to 22, 2, an obvious mistake; cf. 21.5, 20, where the age of his father, whom he succeeded, is given as 40) and he reigned 1 year from 2K. 8.26-28. His wife was Abihail (1Ch. 2.29). He was of the tribe of Judah.

Ahilud

Ahier (lit. another), mentioned in 1Chr. 7.12 as father of Hushim, or the Hushim. He was a Benjamite, and probably to be identified with Ahiram of the same tribe (Num. 26.38). As the genealogy of Dan is omitted here, and some think Hushim was a Danite, it has been suggested that he should be added into the genealogy of another, a reluctance to mention the name of Dan being discernible elsewhere. [S.F.S.]

Ahi.—1. A Gadite, chief of a family who lived in Gilead in Bashan (1Chr. 5.15), in the days of Jotham, king of Judah. By the LXX. and Vulg. it was not considered a proper name. —2. A descendant of Shamer, of the tribe of Asher (1Chr. 7.34). The name, according to Gesenius, may be a contraction of Ahijah.

Ahiah (—even devote of Jehovah).—1. Son of Ahitub, brother of Ichabod, grandson of Phinehas, and great-grandson of Eli, also called Ahimelech, "since melekh (king) may also be applied to God." It is remarkable how highly he was estimated, and how he could be read either Ahia or Ahimelech, and it has been suggested (Conder, First Bible, p. 133) that the variation arises from this fact. He is described as the Lord's priest in Shiloh, wearing an ephod (1Sam. 14.3, 18), and consulting with it (see Smith's D.B., 4. vol. 1893) for Saul by means of Urim and Thummim. A son of Ahiah was made from one of Solomon's princes (1K. 4.3).—3. A prophet of Shiloh (11.29, 14.2), of whom we have two remarkable prophecies extant: one (11.31-39) addressed to Jeroboam, announcing the rendering of the ten tribes from Solomon, and the transfer of the kingdom to Jeroboam: the other (14.6-16) delivered in the prophet's extreme old age to Jeroboam's wife, foretelling the death of the ailing Ahijah, the king's son, and the destruction of Jeroboam's house on account of the images which he had set up. Jeroboam's words concerning Ahijah (14.2, 3) how highly he was estimated his prophetic powers (cf. 2Ch. 9.20).—4. Father of Baasha, king of Israel (1K. 15.27, 33).—5. Son of Jerahmeel (1Chr. 2.25).—6. Son of Bela (8.7).—7. One of David's mighty men (11.36).—8. A Levite in David's reign (26.20).—9. One of the heads of the people who were allotted to the city of Shiloh, governed by Hophil (Num. 35.26). [C.R.D.B.]

Ahiam, son of Sharar (Saccom. 1Chr. 11.35) the Hararite, one of David's thirty mighty men (2Sam. 23.33).

Ahian, a Manassite, son of Shenidah (1Chr. 7.19).

Ahiezer.—1. Son of Ammisuddai, a chief of the tribe of Dan (Num. 1.12, 25, 7.66, 71, 10.25).—2. The Benjaminite chief of David's ambidextrous archers at Ziklag (1Chr. 12.3).

Ahilud.—1. Son of Shelomi, and prince of the tribe of Asher (Num. 34.27).—2. A chief of the tribe of Benjamin (1Chr. 8.7).

Ahikam, son of Shaphan the scribe, an officer at the court of Josiah, and of Jehoiakim; and one of the delegates sent by Hilkiah to consult Huldah (2K. 22.12-24). In Jehoiakim's reign he successfully used his influence to protect the prophet Jeremiah (1Je. 26.24) as did his son Gedaliah afterwards (29.14, 40.5).

Ahilud.—1. Father of Jehoshaphat, the
AHIMAAZ

—. Father of Ahinoaam, wife of Saul (1Sam.14.50).—. Son of Zadok, the high-priest, who with Jonathan the son of Abiathar brought David news from the camp of Absalom (2Sam.15.27,28,35,36.17.17-21). After the battle between the king's forces under Joab and those of Absalom, he was the first courier to tell David of the victory, outrunning the Cushite who had been dispatched some time before him (18.19-33). There is no evidence, beyond the assertion of Josephus, that he was ever high-priest, since from 1K.4.3 compared with 1Chr.6.8,9 it would seem that Azariah his son succeeded Zadok.—. Solomon's officer in the service of Haggai, who married Basamath, king's daughter (1K.4.15). [h.c.r.]

Ahiman.'—. One of three giant Anakim inhabiting mount Hebron (Num.13.22,33), seen by Caleb and the spies. The whole race were cut off by Joshua (Jos.11.21), and the three brothers were slain by the tribe of Judah (Judg. 1.10).—. One of Saul's officers who returned with the king's porters (gatekeepers) in charge of the king's gate for the "camp" of the sons of Levi (1Chr.9.17).

Ahimelech.—. Son of Ahitub (1Sam.22.11,12), and high-priest at Nob in the days of Saul. He gave David the shew-bread to eat, and the sword of Goliath; for which he and his whole house were, upon the accusation of Evidomites, put to death. Two of Saul's sons were slain by the Edomites, and by Saul's order. Eighty-five priests wearing an ephod were thus slaughtered; Abiathar alone escaped (21.22). He is indentical with Ahiah, 1. For the confusion between Ahimelech and Abiathar in 1Sam.8.17 and in 1Chr., see Ahiahtar. —. A Hittite, one of David's companions who was persecuted by Ziklag (30.45), but was rescued by David (18). She is again mentioned as with him when he was king of Judah in Hebron (2Sam.2.2) ; and was the mother of his eldest son Amnon (3.2).

Ahinoam.'—. One of David's concubines, the daughter of Ahimelech (1Chr.3.2).—. Daughter of Ahimaaz and wife of Saul (1Sam.14.50).—. A Zedekiel who was married to Abigail (1Sam.25.43).—. Daughter of Ahinoam, and wife of Saul (1Sam.25.43) ; and was the mother of the eldest son Amnon (3.2).

Ahio.'—. Son of Abinadab, who accompanied the ark from his father's house at Gibeah (2Sam.6.14) ; and was the son of Jehiel, the "father" or founder of Gibeon (1Chr.8.31,3,37).

Ahira', chief of Naphtali at the census the year after the Exodus (Num.1.15,2.29,7.78,83, 10.27).

Ahiram', son of Benjamin (Num.26.38) and ancestor of the Ahiramites, called Ehi in Gen.46.21; perhaps the same as Aher or Aharah. Aharah is described as the "third" son of Benjamin in 1Chr.8.1, and Ahiram is mentioned third in Num. 1, where in Gen.46.21 Ehi is described as the sixth son, but the order in the lists is evidently not always precise. [h.c.r.]

Ahisamach', a Danite, father of Aholibah (Ex.31.6,35.34,38.23).

Ahishahar', a son of Bilhan and great-grandson of Benjamin (1Chr.7.10).

Ahishar', the controller of Solomon's household (1K.4.6).

Ahithophel (brother of foolishness), a native of Giloh, in the hill-country of Judah (Jos.15.51), and privy councillor of David. His wisdom was so esteemed that his advice was accounted as if from a divine oracle, despite the signification of his name (26.24). A comparison of 2Sam.11.3 with 23.34 suggests that he was the grandfather of Bathsheba; which might account for his position of influence, and would show once more how David's punishment followed from his sin. Absalom immediately he had revolted sent for Ahithophel, and when he heard that he had joined the conspiracy, he prayed Jehovah to turn his counsel to foolishness (15.12,31), alluding possibly to the meaning of his name. David's grief at the treachery of his confidential friend is thought to be alluded to in the Messianic prophecies (Ps.41.9,55.12,14). To show how, the breach between Absalom and his father was irreparable, Ahithophel persuaded the former to take possession of the royal harim (2Sam.16.21). David, to counteract his counsel, sent Hushai to Absalom. Ahithophel had recommended an immediate pursuit of David; but Hushai advised delay, intending to send intelligence to David and give him time to prepare his forces. When Ahithophel saw that Hushai's advice prevailed, he despaired of success, and returning home "put his household in order and hanged himself" (17.1-23).

Ahitub.'—. Son of Phinehas and grandson of Eli, the father of Ahimelech, or Ahijah (1Sam.14.3,28,9), who was the son of Phinehas, and from whom there is no record of his high-priesthood.—. Son of Ahinoam, the daughter of Ahimelech (1Chr.3.2), and father of Abiathar (1Sam.25.8,8,718,7) and grandfather of Zadok (1Chr.2.21,22).—. The high-priest. Driver, Kittel, and others consider that the true reading of 2Sam.8.17 should be "And Zadok and Abiathar the son of Ahimelech, the son of Ahitub."—. The genealogy of the high-priests in 1Chr.6.11,12 introduces another Ahitub, son of another Ahimaah, and father of another Zadok, probably a repetition by a clerical error. [h.c.r.]

Ahab', a city of Asher from which the Canaanites were not driven out (Judg.1.31). It is named with the shore cities Accho, Zidon, and Azjib. The site is unknown. [g.c.r.]

Ahab'1, daughter of Sheshan, whom he gave in marriage to his Egyptian slave Jarha (1Chr.2.31,34,35), and from whom was descended Zabad, one of David's mighty men (1Chr.11.41; cf. 2.35-37). In ver. 31 A.V. reads children, R.V. sons, of Sheshan; but the obvious meaning is "descendants," as the plural is then explained by the genealogy
which follows, and ver. 34 clearly states that
"Sheshan had no sons but daughters."

Ahoah', son of Bela son of Benjamin (1Chr. 8.4). In ver. 7 he is called Aahai (cf. Hiram and Huram). The LXX. has Achia in both verses. The patronymic, Aohite, is found in 2Sam. 23.0.28; 1 Chr. 11.12, 29, 27.4.

Aholah (tient, fem.; Ooholah, R.V.), sister of Anoliah, a harlot, used by Ezekiel as the symbol of Samaria (Ezk. 23.4,5,36,44).

Aholibah (Ooholib, R.V.), a Danite of great skill as a weaver and embroiderer, whom Moses appointed with Bezalel to erect the tabernacle (Ex. 35.30-35).

Aholibahb (my tent in her; Ooholah R.V.), a harlot, used by Ezekiel as the symbol of Jerusalem (Ezk. 23.4,11,22,36,44).

Aholibamah', daughter of Aahai, a descendant of Seir the Horite, perhaps a mistake for Hizote, and one of the three wives of Esau (Gen. 26.2,25). In the earlier narrative (26,34) Aholibamah is called Judith, daughter of Beeri, the Hittite. On the obscure subject of Esau's wives, consult The Speaker's Comm., note A on Gen. 36; and the comm. of Dillmann and Holzinger.

Ahuma1, son of Jahath, a descendant of Judah, and head of a family of the Zorithites (1 Chr. 4.2).

Ahuzam', properly Ahozam, son of Ashur the "father" or founder of Tekoa (1 Chr. 4.6).

Ahuzzath', the friend of the Philistine king Abimelech who accompanied him to his interview with Isaac (Gen. 26.26).

Al (Heb. hah), Aliah (Is. 10.28), or Alja (Ne. 11.31), and in MSS. of 1 Chr. 7.28, where "Gaza" is improbable, a royal city (Jos. 12.9) E. of and near Bethel (Gen. 12.8, "Hai"; Jos. 7.2-5). It had a ravine (ge) to N. and low ground to W., and was near a deep valley ('enq) and a desert (mikhâr). It was made a "heap" (mel) by Joshua, and near its gate a great "heap" remained long after (Jos. 8.1-29). This account must be older, apparently, than the time of Isaiah, when Aliah appears again as a town. It was also inhabited after the Captivity (Ezk. 2.28; Ne. 7.32,11-31). The Ai of Jeremiah (49.3), apparently in Moab, is probably not the same, and may be 11m. The site of Ai appears to be near the ruin Haiyân, 2 miles S.E. of Bethel. It has valleys to W. and N. and a deep gorge on N.E. near the desert; about three-quarters of a mile to N.W. is a very large artificial tell of stones, which may mark the site of Joshua's monument near the gate.

[c.r.c.-]

Aiah.—1. Son of Zibeon, a descendant of Seir, and ancestor of one of Esau's wives (1 Chr. 1.10); = Ajah (Gen. 36.24). He apparently had no sons as the line is continued through his brother Anah. —2. Father of Rizpah, the concubine of Saul (2 Sam. 3.7,21,18,30,31).

Aialh', a place named by Isaiah (10.28) in connexion with Mignor and Minchath; clearly the same as Al. [c.r.e.-]

Alja'. [Al.]

Aialon (a place of deer).—1. A city of the Kohathites (Jos. 21.24; 1 Chr. 6.32), in the lot of Dan (Jos. 19.42; A.V. Aijalon), which tribe, however, was unable to dispossess the Amorites of the place (Judg. 1.35). Aialon was fortified by Rehoboam (2 Chr. 11.10), and was invaded later by the Philistines (2 Chr. 28.18; A.V. Aijalon). The valley of Aijalon is noticed in the speech of Joshua during his pursuit of the Canaanites (Jos. 10.12). The town was discovered by Dr. Robinson in the modern Yâlo, N. of the Jaffa road, about 13 miles from Jerusalem. It is noticed in the Amarna letters from Jerusalem, etc. (Berlin 103, 137), as taken by the Abîrî in 15th cent. B.C.—2. A place in Zebulun: the burial-place of Elon, one of the judges (Judg. 12.12). [c.r.e.-]

Aijeleth-shahar. [Psalms, Titles of.]

Ain (an "eye," and also a "spring"). 'âyin or 'en occurs in En-gedi, En-gannim, etc. —1. Ain is apparently the village el 'Ain, near the W. foot of the Anti-Lebanon, about 18 miles S. of Rihlah. The border of the land of Israel went E. of it, from near Rihlah (Num. 34.11).—2. One of the southern cities of Judah (Jos. 15.32), allotted to Simeon (Jos. 19.7; 1 Chr. 4.32) and to the priests (Jos. 21.16). In 1 Chr. 6.59 Ashan takes the place of Ain. [En-rimmon.]; [c.r.e.-]

Airus', one of the "servants of the
ALABASTER

THE VALLEY OF AJALON, LOOKING W. FROM LOWER BETH-HORON.

W.D.A.

From an original sketch by Col. Conder.) See art. "Ajalon."
gypsum (the sulphate) from alabaster (the carbonate), remarking that varieties of the former resemble the latter, in which, he says (Nat. Hist. xii. 3), unguents are best kept. He repeats this statement (xxxvi. 12), and mentions only where the material was worked. Of it no doubt the "cruss" of "pillars" was made, and probably the women actually broke it in her hand. [T.R.G.]

Ala'meth (R.V. Alemeth), a son of Becher, the son of Benjamin (1Chr.7.8).

Alammelech (king's oak), a place within the limits of Asher, named between Achshaph and Joseph (Jos.19.26 only).

Alamoth. [PSALMS, TITLES OF.]

Alemus (raclant), a Gk. form of Eliakim (God establishes), obtained by changing the vowel points. The son or nephew of Jose ben-Joester, the famous pupil of Antigonus of Socho, and of Aaronic descent (1Mac.7.14). His name is known in connection with the Hellenizing party, which largely rested on the priests, and the objective of which was social rather than religious, is an explanation of the passionate resistance encountered by his movement. [Hellenist.] Alemus was nominated "through bribery" (162 b.c.) to the high-priesthood by Antochus Eupator, to the exclusion of Onias, nephew of his predecessor Menelaus. The influence of Judas Maccabaeus at first prevented Alemus from securing his position, and he withdrew to Antioch. Demetrius Soter, on his accession, sent Baccidhes to restore him, and Alemus was received by many even of the Hasidim. A massacre of 60 of his adherents was followed by the return of Judas and a second withdrawal of Alemus to Antioch. Nicanor was next sent into Palestine, but he was defeated and killed at Beth-horon (161 b.c.). Baccidhes now returned (160 b.c.), and the fall of Judas was followed by Alemus's unchallenged restoration. The scope of his plans for change in the temple and its services has been much discussed. He was engaged in an operation described (9.54, but cf. Josephus, 12 Ant. x. 6) as pulling down the "wall of the inner court of the sanctuary" and "the works of the prophets," an obscure and disputed expression, when "he was taken with the fever," passed to the power of a rival, and his adherents who also give him the title of "the wicked" (7.9), and speak of him with greater bitterness than the author of 1Mac. [J.A.D.]

Alema (1Mac.5.26), a city where the Jews were besieged in 164 b.c., mentioned with Caspion. Now the large village Keft er ma, 4 miles E. of Khasion, and 7 miles S.W. of Caer- naim. The ruins include a Greek altar, and a curious bas-relief of Aesculapius (Schumacher, Across the Jordan, pp. 79-82). [C.R.C.]

Ale'muth, a Benjamite, son of Jehodlah or Jarah (1Chr.8.36,9.42), descended from Jonathan, son of Saul.

Ale'meth' (R.V. Almeth), the form under which Almon, the name of a city of the priests in Benjamin, appears in 1Chr.6.60. Now the village 'Amlul, a mile N.E. of Ana- thoth. Among the genealogies of Benjamin the name occurs in connexion with Azmaveth (1Chr.8.26 son). [B.B.K.] Alexander III. (helper of men b. 356 B.C., d. 323), the Great, son of Philip II. of Macedon and Olympias. Having quelled the disloyalty which he found on Philip's murder (336), Alexander prepared his forces, and in 334 crossed the Hellespont. In 3 years he had largely realized the dream of world-wide conquest which he had inherited. The discontent of his troops, however, compelled his master of S.W. Asia and of Egypt. In 333 he founded Alexandria. The murder of Darius by Bessus (320), and the subjugation of Persia and Bactria were followed by his famous and abortive campaign into India (327). The facts that Alexander paid a similar visit to Gordium, and that the visit to Jerusalem is not mentioned by Gk. historians, have raised the suspicion that there is no basis for the narrative. The probability, however, is that it rests on an historic event, for the Greeks rarely show interest in Palestine, and, both from this point of view and the policy of the temple, we must place the visits of Alexander and his son. Alexander worshipped the tetragrammaton on the high-priest's turban, and when Parnenio remonstrated with him for "adoring the high-priest" replied that he did not adore him, but his God, and that he had seen Jaddua in a dream at Dium encouraging him to cross into Asia "(11 Ant. vii. 5). Alexander then went with Jaddua to the temple, offered sacrifices, and accepted such prophecies as Dan.8.21,11.3 as applying to himself. Not only was Alexander anxious to identify himself with national cults, but the Jews seem to have received exceptional treatment from him (see esp. Ewald, Hist. v.). He planted a favourite Jewish colony in Alexandria, is said to have given his Jewish troops freedom to exercise their religion, and was perhaps influenced by Jewish animosity in his treatment of Samaria. Zech.9.1-8 is thought to allude to Alexander's conquests. The references to his empire in Dan.4.8,5,6,7,21, 11.3 are unquestionable. Alexander bulks...
largely in Eastern legends, in which he is known as the "lord of horns." [J.A.D.]

**Alexander Balas**

In 153 B.C. he disputed the Syrian throne with Demetrius I. (Soter), who had lost the friendship of the neighbouring kings and the affections of his own subjects. Jonathan, now leader of the Jews, hurriedly supported Alexander, who landed at Ptolemais (10.1), and in 150 B.C. defeated and killed Demetrius (10.48-50). After this Alexander married Cleopatra, daughter of Ptolemy VI. (Philotenor; and appointed Jonathan governor of Judea (10.65.11.57).

But Alexander proved an incapable and self-seeking leader from Alexandria, where a great many Jews put forward during the tumult there, their object being probably to disavow to the mob any responsibility for the action of the Christians.

**Alexandria** in N.T.—1. Son of Simon, 11. of Cyrene (Mk.15.21). [Rufus.].—2. One of the high-priestly family (Ac.4.6).—3. A Jew of Ephesus (Ac.18.33), whom the mighty Jews put forward during the tumult there, their object being probably to disavow to the mob any responsibility for the action of the Christians.

**Alexandria, Alexandrians**, referred to three times in N.T. In Ac.18.24 Apollos is spoken of as "born at Alexandria"; 6.9 speaks of the synagogue of the "Libertines, Cyrenians, and Alexandrians," referring probably to a synagogue in Jerusalem used by Jews. The Jews, doubtless supported Alexander as "the first that entreated of true peace with them" (10.47); and they showed the same zeal for his son Antiochus VI.

**Algur or Almug-trees**; the former form occurs in 2Chr.2.8,9.10,11, the latter in 1K.10.11,12. We read that the "almug" was brought in great plenty from Ophir, together with gold and precious stones, by the fleet of Hiram, for Solomon's temple and house, and for the making of musical instruments. In 2Chr.2.8 Solomon is represented as ordering Hiram to send him "cedar-trees, fir-trees, and algum-trees out of Lebanon." It is improbable that Lebanon, as well as Ophir, should have produced algum-trees. Perhaps the wood had been brought from Ophir to Lebanon, and Solomon's instructions to Hiram were to send on to Jerusalem the timber imported from Ophir that was lying at the port of Tyre, with the cedars which had been cut in mount Lebanon. It is impossible to identify the algum-tree with certainty, but the arguments favour the red sandal-wood (Pterocarpus santalinus) more than any other species. This tree, which belongs to the Leguminosae, is a native of India, chiefly on the Coromandel coast. Its wood is very heavy, hard, and fine grained, and of a beautiful garnet colour. The word algum has been identified by Max Muller with the Skt. valguka, a name for the sandal-wood tree, which may have been corrupted from an earlier form (valgph) by the Phoenician sailors. Celsius believed it to be the sandal. Josephus considered it a kind of fir, the Vulg. rendering being ligna thvna. Wyclif reads, "cedre trees, pyne trees, and thyme trees of the
Aliyah. [ALVAYAH].

Allergy, a figure of speech, defined by Bishop Marsh, in accordance with its etymology, as "a representation of one thing which is intended to excite the representation of another thing," the first representation being consistent with itself but requiring, or being capable of, a second spiritual representation beyond its literal sense. It is often difficult to draw a line between metaphor and allegory, the two running into one another in Biblical language. The distinguishing feature seems to be that a metaphor implies a mere resemblance which appeals to the imagination (cf. 2 K.19.28, where the king of Assyria is described as "a furious wild beast"); an allegory or an allegorical interpretation aims definitely at suggesting moral or religious truth. In every allegory the immediate, historical, or literal sense is either true or possible (hence the distinction from fable, see below), while the secondary or allegorical sense may be either intended by the writer or only discovered in it by a later reader. An illustration is seen in Gal.4.24, where the Apostle gives an allegorical interpretation to the historical narrative of Hagar and Sarah, not indeed treating it as an allegory in itself (as A.V. would lead us to suppose), nor implying that this meaning was originally intended by the writer or by the Holy Spirit (in which case it would be a Type), but drawing from it by his own spiritual insight a deeper and more edifying sense than is conveyed in the original narrative. Allegories are also classified as pure or mixed. In the first case, no other meaning is intended by the writer, or is discovered in it by the reader, while in the second case some other meaning is either intended by the writer or is discovered in it by the reader.

In a "mixed" allegory some hint is given of the spiritual meaning, or of the literal and spiritual are interwoven, as in the allegories of the Good Shepherd, and of the Vine (Jn.10.15). The fable, like the allegory or parable, is intended to convey moral truth, but its distinguishing feature is the falseness or impossibility of its literal meaning. The lower animals or inanimate objects are introduced as speaking or acting like human beings. There are two examples of this in O.T.: (1) the fable of the trees choosing their king, addressed by Jotham to the men of Shechem (Judg.9.8-15); and (2) the fable of the cedar of Lebanon and the thistle recorded as the answer of Jechosh to Amaziah's challenge (2 K.14.9). The fable was a favourite method of imparting instruction among primitive peoples, hence the comparative earliness of examples of it in O.T. and its disappearance in later parts of the Bible. It was evidently felt inadequate as the exponent of the higher spiritual truths which it was the mission of Israel and of the Church to teach mankind. The fable may serve to exhibit the relations between man and man, but it fails to impress the想到, as did the Psalms, upon man and God. Hence its place is taken by the parable. "Fable" is also used in a bad sense of the lying and misleading stories told by false teachers (1 Tim.1.4, 7; Tit.1.14; 2 Pe.1.16). Marsh, Lectures on Criticism and Interpretation of the Bible (1838) Trench, Notes on Parables (15th ed. 1856); Lightfoot, Ep. to Galatians (8th ed. 1884). [A.R.W.]

Allleluia or Hallelujah (= "Praise ye Jehovah") is found as a doxology to Ps. 105, 106, 112, 113, 135, 146-150. Ps. 113-118, called by the Jews the Hallel, were sung at the feasts of Dedication, Tabernacles, Weeks, and Passover. Kings, i.e. Hebrews were brought more into connexion with the surrounding nations and tempted to ally themselves with them, the influence of the prophets was always exerted against this tendency, as contrary to the divine ideal of the holy nation. Solomon, however, made a commercial treaty (1 K.2.15-19), by which the nation was to get all the materials and workmen for the temple, and afterwards for the supply of ship-builders and sailors (1 K.5.2-12.9.27); and (2) with Pharaoh of Egypt, by which he secured a monopoly of the trade in horses and other Egyptian products (10.28,29). Alliances for other purposes, defensive and offensive, followed the division of the kingdoms. So long as Syria was the chief danger, each kingdom sought alliance with that nation, as Asia with Benhadad (ch. 15) and Pekah with Rezin (15.7). Israel and Judah allied themselves with each other under Ahab and Jechoshaphat. Ahaz sought the alliance of Assyria against the coalition of Israel and Syria (2 K.16.7), in spite of the warnings of Isaiah. But the most attractive, and as it proved, the most deceptive alliance, for both kingdoms was with Egypt, which was looked to as a protection against both Assyria and Babylon (1 K.18.11), etc. 15.30. The later kings of Judah either allied themselves with Babylon, or tried (like Zedekiah) to play off Egypt against Babylon (Je.37.1-11) with disastrous results. In later days Judas Maccabaeus sought an alliance with the Romans as a counterpoise to the Greco-Syrian...
enemy (1Mac.8). This alliance was renewed by Jonathan (ch. 12) and by Simon (15:17); and the independence of the Jews was reasserted by Rome and formally notified to neighbouring nations 140 b.c. (15:22,23). Treaties were at the same period concluded with the Spartans, under the impression that they came of a common stock (15:6,15,20). The Roman alliance, renewed in 128, ultimately proved fatal to Jewish independency, for in 63 a quarrel referred to Rome gave Pompey the opportunity to place the country under tribute. The formation of an alliance was attended with religious rites, a victim was slain and divided into two parts, between which the contracting parties passed (Gen.15.10-17; Je.34:15-20). Generally speaking, however, the salt (head of the ass) was the symbol of the contract. It is probable that the Jews had a ceremonial form of the act (cf. Jos.9:18); they seemed to have recognized as valid a breach of covenant being visited with severe punishment, and deemed specially hateful to God (2Sam.21:1; Ezek.17:16; Am.1:6). Negotiations between Israel and other nations were naturally conducted by ambassadors. Examples of such embassies are recorded (cf. Jos.9:18); a breach of covenant being visited with severe punishment, and deemed specially hateful to God (2Sam.21:1; Ezek.17:16; Am.1:6). Negotiations between Israel and other nations were naturally conducted by ambassadors. Examples of such embassies are recorded (cf. Jos.9:18); a breach of covenant being visited with severe punishment, and deemed specially hateful to God (2Sam.21:1; Ezek.17:16; Am.1:6). Negotiations between Israel and other nations were naturally conducted by ambassadors. Examples of such embassies are recorded (cf. Jos.9:18); a breach of covenant being visited with severe punishment, and deemed specially hateful to God (2Sam.21:1; Ezek.17:16; Am.1:6).

**Almond-tree, Almond.** These words are found in Gen.43:11; Ex.25:33,34,37,19,20; Num.17:8; Ec.12:5; Je.1:11, in the text of A.V. They are invariably represented by the same Heb. word (shăqāḏēh), which sometimes stands for the whole tree, sometimes for the fruit or nut; e.g. in Gen.45:11, Jacob commands his sons to take as a present to Joseph a little honey, spices and myrrh, nuts and almonds. The word is evidently derived from the passages of Exodus given above, the "bowls made like unto almonds," which were to adorn the golden candlestick, seem also to allude to the nut. Aaron's rod, that budded miraculously, yielded almonds. In Ec.12:5 and Je.1:11 shăqāḏēh is translated almond-tree, which the context certainly requires. It is clearly then a mistake to suppose, as some have done, that shăqāḏēh stands exclusively for "almond-nuts," and that lūz signifies "the tree." Probably this tree, conspicuous for its early flowering and useful fruit, was known by both names. The Heb. lūz occurs only in Gen.39:37, where it is translated "tree" in A.V.; but undoubtedly R.V. is correct in rendering it almond, the Arabic name of which is lūz. shăqāḏēh is derived from a root which signifies "to be wakeful," "to hasten," for the almond-tree blossoms very early in the season, the flowers appearing before the leaves. Hence it was regarded by Hebrews as a welcome harbinger of spring, and a fitness of the word as "hastens." A tree which hastens to blossom is, therefore, a very fitting poetical description of the lūz, or almond-tree. This tree has been noticed in flower as early as the 9th of January; the 19th, 23rd, and 25th are also recorded dates. This fact explains the play upon words in Je.6:11,12, "The word of the Lord came unto me, saying, Jeremiah, what seest thou? And I said, I see the rod of an almond-tree [shăqāḏēh]. Then said the Lord unto me, Thou hast well seen, for I will hasten [shăqāḏēh] my word to perform it." The almond-tree has always been regarded by Hebrews with reverence, and at the present day English Jews carry a branch of flowering almond to the synagogue on their great feast-days, just as Hebrews of old used to present palm-branches in the temple. The almond-tree is about 12 or 14 ft. high; the flowers are pink, and the leaves are lanceolate and serrate. The covering of the fruit is downy and succulent, enclosing the hard shell which contains the kernel. It is curious to observe, in connexion with the almond-bowls of the golden candlestick, that, in the language of lapidaries, almonds are pieces of rock-crystal, even now used
in adorning branch-candlesticks. Gen.43.11 implies that the almond was not cultivated in Egypt in the days of Jacob, and it is little grown there now, much less so than in Syria. It is mentioned, by Pliny, amongst Egyptian fruit-trees, so that it must have been introduced before his time. The almond passed from its home in the middle parts of Asia Minor at a comparatively late period. Pliny says (Holland's translation): "Now whether the Almond-tree were in Italie during the life of Cato [and cent. n.c.], there is some doubt and question made: because he name the Greeke nuts, which some doe hold for a kind of Walnut."

**Alms.** This word is not found in A.V. in the canonical books of O.T., but occurs repeatedly in N.T. and in Tobit and Ecclesiasticus. There is no record of almsgiving, especially in kind, consisting chiefly in portions to be left designedly from produce of the field, the vineyard, and the olive-yard (Lev.19.9,10,22,23; Deut.15.11,23-19,36.2-13; Ru.2.2), is strictly enjoined by the Law. [Corner.] Every third year also (Deut.14.28) each proprietor was directed to set apart the tithe of his produce with "the Levitish čapar", and in every seventh year, to the "widow". The theological estimate of almsgiving among the Jews is indicated in the following passages: Job 31.17; Pr.10.2,11.4; Esth.9.22; Ps.112.9; Ac.9.36, the case of Dorcas; 10.2, of Cornelius; and also Tob.4.1, 14.11, and Est.8.30, 40, 24. The Talmudists went so far as to affirm that righteousness by almsgiving in such passages as Gen.18.19; Is.54.14; Ps.17.15. In the women's court of the temple there were 13 receptacles for voluntary offerings (Mk.12.41), one of which was devoted to alms for education of poor children of good family. Before the Captivity there is no record of mendicancy, but it evidently existed in later times (Mt.20.30; Mk.10.46; Ac.3.2). The Pharisees were zealous in almsgiving, but their too great ostentation therein was censured by our Lord (Mt.6.2). There is no ground for supposing that the expression "do not sound a trumpet" is more than a modicum of ostentation. (For the figure drawn from the frequent and well-known use of trumpets in religious and other celebrations, Jewish as well as heathen. The duty of relieving the poor was always recognized by Christians (Mt.6.1,4; Lu.14.13; Ac.20.35; Gal.2:10). Every Christian was exhorted to lay by on the first day of each week some portion of his profits, to be applied to the wants of the needy (Ac.11.30; Ro.15.25-27; 1Cor.16.1-4), and widows were specially to devote themselves to ministering to such (1Tim.5.10). [Tithe.]

**Altar**}

**Almag-trees.** [Algm-trees.]

Almannath [ELNATHAN, 2] (1Esdr.8.44).

Aloes, Lign Aloes [Heb. 'ahalim, or 'ahali, thóth], a costly and sweet-smelling wood mentioned in Num.24.6; Ps.45.8; Pr.7.17. In Cant.4.14 Solomon speaks of "myrrh and aloes, with all the chief spices." Aloes occurs once in N.T. (Jn.19.39), when Nicodemus brings "a mixture of myrrh and aloes, about an hundred pound weight," to anoint the body of our Lord. It is usually identified with the Aquilaria agallochum, a tree which supplies the agallochum, or aloe-wood of commerce, much valued in India on account of its aromatic qualities for fumigating and for incense. It grows to the height of 120 ft, being 12 ft. in girth. Dioscorides mentions that the wood of aloes was formerly imported from Sumatra and the Moluccas. "Aloes" has, of course, nothing to do with the flowering Aloe or Agave of modern gardens. [Spices.] [n.h.]

**Alloth** (high places; R.V. Bealoth), forming with Asher the jurisdiction of the ninth of Solomon's officers (1K.4.16). The best sort of this wood (agalloch) comes from Sumatra and the Moluccas. "Aloes" has, of course, nothing to do with the flowering Aloe or Agave of modern gardens. [Spices.] [n.h.]

**Alphabet.** [Writing.]

Alphaeus.—I. Father of Levi (Mk.2.14). [Matthew.]—2. Father of James, who is always described as son of Alphæus (Mt.10.3), to distinguish him from James, son of Zebedee. Alphæus has been identified with Clopas (Jn.19.25), but as the name of Alphæus is "little" (Mk.15.40) it is the apostle and the son of Alphæus (R.V.), then the mother of that James was wife of Alphæus. But the mother of James is almost certainly the same woman as Mary (the wife) of Clopas (Jn.19.25), and thus Alphæus and Clopas are one and the same. It is also argued that Clopas, like Alphæus, is a transliteration in another form of the Aramaic Halphai, more accurately represented as Alphæus. But Aramaic scholars deny the possibility of this. If the man is the same, the names are different. Double names, Aramaic and Gk., for the same man were common. No probable Aramaic or Gk. origin for Clopas has been suggested. It can hardly be an anomalous contraction for Cleopas, which is a shortened form of Gk. Cleopatros. If it were, Clopas might be identical with the Clopas who went to Emmaus (Lk.24.18). The identification of Alphæus and Clopas is important, for the Aramaic display, "the brethren of the Lord," [James.] Hege-sippus mentions a Clopas, brother of Joseph, husband of the Blessed Virgin. But all conclusions are precarious on account of the vagueness of the Gk. genitives, before which we have to supply by guesswork, "son," "wife," "daughter," etc. [K.r.b.]

**Altaneus** (1Esdr.9.33) = MATTENAI, 1.

**Altar** (mizbath, from the root sabbath, "to stay"), place (sacrificial) slaughter. The simplest form of an altar was a rock or a large movable stone, and in the absence of constructed altars these were utilized down to the period of the Judges, e.g. by Gideon (Jud.6.24, 26), Manoah (15.19), Saul at Michmash (1Sam.14.33). From primitive times altars were built of stone or earth, e.g. by Noah (Gen.8.20), by Abraham at Shechem (12.7), at Bethel (ver.8), on Moriah (22.9), by Isaac at Beer-sheba (26.25), at Bethel (35.7); by Moses at Kephirim (Ex.17.15), at Horeb (24.4); by Aaron for idolatrous worship (32.3); by Balak at Bamoth-haal (Num.23.1), at Pisgah (ver.14), at Peor (ver.29). It is only once said of an altar that it was
ALTAR

erected (Gen.33:20), where, however, "altar" may have been read for "pillar," the two Heb. words being very similar in form; or it may have been an altar-pillar (Ariel). In one instance the altar was not intended for sacrifices, but as a Witness (Jos.22:10-29). The Covenant code prescribes altars made of earth (Ex.20:24), with the permission added to build them of unhewn stones, without steps (ver. 25), not restricting the number or locality of such altars. Hence Moses commanded the children of Israel to build an altar of stones on mount Ebal (Deut.27:6; cf. Jos.8:30); others were built by Gideon at Ophrah (Judg.6:24), by the people at Bethel (21:4), by Samuel at Ramah (1Sam.7:17), by Saul after Michmash (14:35), by David on the threshing-floor of Araunah (2Sam.24:25; cf. 1Chr.22:1), and by Elijah on Carmel (1K.18:30). The law prescribing one altar, to be located at the central sanctuary (Deut.12:5,11-14), had no reference to the preceding, which were not under regular priesthood control. This, and the altar for incense, were to be made (Ex.27:1, 30:1,37:25,38:1,30; 2Chr.4:1,19, etc.). A most important distinction was made between the (national) altar at the central sanctuary, administered by the regular order of priests, and local or occasional altars. An integral and most sacred part of the great altar was the horns, one at each corner, a feature which was copied in the rival altar made by Jeroboam for the shrine at Bethel (1K.12:33; Am.3:14). The altar of incense had the same appendages. Their origin is obscure, but not so their purpose. (1) They were an essential and distinctive part of the structure of these two altars, and had a definite place in the ritual of the sanctuary. Sin was represented as engraved on the horns of the altar (Je.17:1), hence the blood of the sin-offering was applied to these horns (Ex.29:12,30:19; Lev.4:7,18, 25,30,34,8:15,9:9,16,18). (2) The horns of the grooved sanctuary, which failed only in certain cases (Ex.21:14; cf. 1K.1:50,51,2:28,29). (3) There may be a reference to an ancient custom in Ps.118:27, "Bind the festal victim with cords, (even) unto the horns of the altar." I. Altars in Tabernacle. (1) Altar of burnt-offerings (Ex.27:1-8,38:1-7). It was a hollow frame of acacia wood overlaid with copper or bronze. It was 5 cubits square by 3 high, and had a border or ledge half-way up the sides, probably for the priests to stand on. Extending from the edge of this border to the ground was a grating or network to which brass rings were attached for the acacia wood staves with which to carry the altar. There was a horn at each corner of the altar, "of the same piece with it" (27:2). The utensils for the service of the altar are enumerated in ver. 3—viz. pans for removing the ashes, shovels, basons for the blood, flesh-hooks (cf. 1Sam.2, 13,14), and firepans. [CENSER.] The prohibition against steps (Ex.20:26) would obviously have no meaning in connexion with an altar only 3 cubits in height (27:1). (2) Altar of incense (20:1-5, also called mizbechah by an extension of use). This also was made of acacia wood overlaid with gold, and was 1 cubit square by 2 high (ver. 2). It had a flat top with a gold moulding round it (ver. 3), beneath which at each corner was a gold ring for the gold-covered poles used in carrying it. Its horns were, like the other parts, covered with gold. It was only to be used for the burning of incense. On the Day of Atonement Aaron was to apply the blood of the sin-offering to the horns (ver. 10). It is called the golden altar (39:38,40:5,26; Num.4:11, where directions are given for its care when carried about), and the altar of sweet incense (Lev.4:7). It stood in the centre of the W. end of the holy place (Ex.30:5). II. In Solomon's Temple. (1) The altar of burnt-offerings was made of bronze (1K.8:64; 2K.16:14; 2Chr.4:1, where it is said the altar was 20 cubits square by 10 high. No other details are given). Ahaz had this put on one side, and used in its stead a
copy of one he had seen in Damascus (2 K.16). This latter, called the great altar, was probably of stone, since it is said to have been built (ver. 11). After the reformation under Josiah (2 K.23), the only altar was the one at the central sanctuary. (2) The altar of cedar plated with gold (1 K.6:20, 7:48) was the altar of incense (cf. 2 Chr.4:19, 6:16). III. In Ezekiel's ideal Temple. (1) The ideal altar of burnt-offerings (Ezr.43.13-17). The dimensions were probably those of Solomon's altar. The upper part was the Aziel, the altar-hearth, 12 cubits square by 4 high; beneath this was a platform 14 cubits square by 4 high; another platform and a base, each 1 cubit in height, giving a total height of 10 cubits. The base was probably 20 cubits square. The ascent was by steps (ver. 17). The altar was a horned one (ver. 15). (2) The altar of wood 3 cubits high and 2 long, described as "the table that is before the Lord" (41.22), might be either the altar of incense or the table of showbread. IV. Post-Exilic. (a) The second temple. (1) The altar of burnt-offerings was of stone (1 Mac.4.44-46), and was built before the temple was commenced (Ex.3.2, 3). It was profaned by Antiochus Epiphanes (1 Mac.1.54; 4.44), taken down by Judas and the stones carefully preserved (4.14-16). (2) A new altar of incense replaced the one that had been defiled (4.49). (b) In Herod's temple. The great altar was of stone, and was 50 cubits square by 15 high (Josephus, 5 Wars v. 6). These measurements do not, however, agree with those in the Mishna (Mid. iii. 1). It was horned, and the approach was by a gradual ascent. The altar of incense does not appear on the Arch of Titus, nor is it mentioned by Josephus, 14 Ant. iv. 4. (c) For Heb.13:10, etc., see Eucharist. Tier. Ezekiel, in Hant. Sacred Books of O. T.; Greene, "Hebrew Rock Altars," in Bib. World, ix. 320 ff.; Smith, Religion of Semites. [Sacrifice, A.] [H.H.] Al-taschith. [Psalms, Titles of.]
his latter years. David, as a Philistine vassal, used constantly to invade their territory from Ziklag (1Sam.27.8), and in revenge, when he made his famous raids against the northern tribes of Saul, they plundered and burnt his city. David on his return pursued them, and rescued the spoil and his two wives (1Sam.30). In the account of Saul's death on mount Gilboa, we read (1Sam.31) that he fell on his own sword, but an Amalakite (2Sam.1), hoping for a reward from Jerusalem, came to Saul's assistance to put him to death. [SAMIUEL, BOOKS OF.] Nothing more is told us of the Amalakites in the Bible, save in 1Chr.4.42,43, where a record is preserved of how 500 Simeonites, in the days of Hezekiah, smote the remnant of the Amalakites in mount Seir, in the territory of Edom. In Ps.83.7 Antam'—and son. [1Chr.5.51.]—or-regedates against Israel; but the date of the Psalm is uncertain, and probably late, and the employment of the name may be an archaism. The well-known story of the book of Esther relates the rivalry between the pious Mordecai, the descendent of Kish, and of Haman the Agagite, in the reign of Josephus (9.4.3) and Dathan (Aram recognizes the descent of Agag for his ancestor [1.1.1-1.] Amam', a city in the S. of Judah, named with Shema and Moladah in Jos.15.26. Amam' = HAMAN (Tob.14.10; Esth.10.7, etc.). Amana' (Can.4.8), a mountain mentioned with Lebanon and Hermon. Possibly the Amusan range N. of Antioch might be intended. This was known to the Akkadian prince Gudea (about 2800 B.C.) as a mountain of cedars, and to the Assyrians from the 12th cent. B.C. In the Mishna (Hallass iv. 8; Zebibit vi. 1) it is the N. boundary of Syria. [ABANA.] [C.R.C.] Amari ah. 1. "Father" (but cf. 2Esdr. 1.2, where several generations interve'ven in the reign of Jehoshaphat) (2Chr.19.11). He was the son of Azariah, and the fifth high-priest who succeeded Zadok (1Chr.6.11).—2. The head of a Levitical house of the Kohathites in the time of David (1Chron.26.6, 12).”—3. A teacher in the Hebraic schools of priests, which was named after him, in the times of David, of Hezekiah, and of Nehemiah (1Chron.24.14. E.V. Immer; 2Chr.31.15; Ne.10.3,12.2,13). [IMMER, 1.—]—5. A son of Bani, who had married a foreign wife (Ezra.10.42).—6. A descendent of Pharez, the son of Judah (Ne.7.6), is probably the same as lmm [Edcr. 9.4.—]—7. An ancestor of Zephaniah (Zeph.1.1). Amarias, an ancestor of Ezra (1Esdr. 8.2; 2Esdr.1.2); see AMARIAH, 1. Amasa'. 1. Son of Ithra or Jether, by Abigail, David's sister (2Sam.17.25). He joined Absalom's rebellion, and was named as an appointed commander-in-chief in place of Joab, by whom he was totally defeated in the wood of Ephraim (18.6). David, when displeased with Joab for killing Absalom, forgave Amasa's treason, recognized him as his nephew, and appointed him Joab's successor (19.13). Afterwards Joab, when both were in pursuit of the rebel Sheba, pretending to salute Amasa, stabbed him at the ford (20.9-12), which he held concealed in his left hand.—2. A prince of Ephraim, son of Hadlai, in the reign of Ahaz (2Chr.28.12). Amasa 1. —1. A Kohathite, father of Mahath, and ancestor of Samuel and Heman the singer (1Chron.6.25,33).—2. The chief of the priests (Neh.11.16) was Benjamin, who deserted to David while an outlaw at Ziklag (12.18). Whether the same as Amasa, 1, is uncertain.—3. One of the priests who blew trumpets before the ark, when David brought it from the house of Obed-edom (15.24).—4. Another Kohathite, father of a descendant of Mahath, in the reign of Hezekiah (2Chron.29.12), unless the name is that of a family. Amashlah', son of Azareel, a priest in the time of Nehemiah (Neh.11.13), apparently =MAASIAI (1Chron.9.12). Amasiah', son of Zichri, and captain of 200,000 warriors of Judah in Jehoshaphat's reign (2Chron.17.14). Amath. [HAMATH.] Amathis (1Esdr.9.29). [ATHLAI.] Amathlis, The land of, a district to the N. of Palestine (1Mc.12.25). From the context it is evidently HAMATH. Amaziah.—1. Son of Joash, and eighth king of Judah. On his death (c. 795 B.C.) he slew his father's murderers, but permitted their children to live (2K.14.1-6; cf. Deut.34.16). He made war on the Edomites, who had revolted from Judah during the reign of Jehoram (8.20-22), defeated them in the valley of Salt, and took their capital Petra or Sela (14.7; 2Chron.21.11), to which place he gave the name of Jokhebed, i.e. Hezekiah (cf. Judg.1.19). He carried back with him the gods of Seir and set them up as objects of worship (2Chron.25.1-16). Elated by success, Amaziah challenged Jehoash, king of Israel, to battle (2K.14.5), who replied by the contemptuous parable of the thistle and the cedar (ver. 9,10). The king of Judah, however, refused to listen to the king of Israel's well-meant advice, and, at the battle of Beth-shemesh, Judah was defeated and Amaziah himself taken prisoner and carried by Jehoash to Jerusalem, which opened its gates to the conqueror. A portion of the wall of Jerusalem was broken down, and treasures and hostages were taken (2K.15.29). The Amaziah long survived this disaster is uncertain, the statement in 14.17 being perhaps open to doubt. [CHRONOLOGY.] He was assassinated at Lachish, whither he had retired for safety from Jerusalem (2Chron.25.27). [H.C.B.] Ambassadors. [ALLIANCES.] Amber (Heb. hashmal; Ezk.1.4,27.8,2 only) is usually supposed to denote a metal, and not the fossil resin called amber. The LXX. and Vulg. afford no certain clue, for the word electron was used by the Greeks to express both amber and an alloy of gold and silver, which was rather similar in colour and was highly esteemed by the ancients. The latter sense of the word, however, seems the less ordinary, and amber was undoubtedly well known in ancient times. It is probably mentioned by Homer, and was found by Schliemann in tombs at Mycenae and Tiryns. It is mentioned by Herodotus, and Pline gives a long account of it (Hist. Natur. VII. 11. 12). It is found in many countries—for instance, occasionally on the coast of Norfolk; but the best and clearest coloured varieties are obtained in the parts of Prussia adjacent to the Baltic. The 3
AMEN

Amen. This Aramaic word is identical with the Heb. verb יְנַע, "he was firm," and, throughout, it indicates a confirmation. (1) It is used for the purpose of adopting a remark of another as one's own, and chiefly in a religious sense as an expression of the faith of individuals in divine promise or revelation. Hence in Deut.27.15-26 it is used by the people when, after having circumcised their children, they "sware...unto the Lord" [OATH.] From this comes its liturgical use in the services of the synagogue (Ps.41.13; Neh.8.6), from which, at a very early period, it was introduced into Christian worship (1Cor.14.16). From this its use by individuals to emphasize their own prayers is natural; see Ro.1.25, 9.5,15.33; Gal.6.18; Rev.4.7, etc. (2) A special application is found in our Lord's language. He employs the word, not at the end, but invariably at the beginning, of a sentence; His object being not to emphasize His own faith in the statements, but to make a special appeal for faith on the part of His hearers. This word is translated "verily" and "amen" for the fulfilment. In Is.65.16 God is, by a Hebrew idiom, twice called "the God of amen" (E.V. "God of truth"); in Rev.3.14 Christ is Himself called the Amen. [T.A.M.]

Amethyst (Heb. אַ֣תְלָאָ֑א). This name is given to the third stone in the third row of the high-priest's breastplate in Ex.28.19,39.12. In 1500 B.C. it denotes the twelfth stone in the foundations of the wall of the heavenly Jerusalem. Commentators generally are agreed that the Heb. word denotes the ordinary amethyst, as the Gk. ἄμεθυστον in Rev. certainly does. This a transparent purple variety of quartz (crystallized silica) which is found in many countries, and has been used for ornaments and carved objects of art from very early times. The name is derived from the Gk. αἷον (private) and μεθυστίς, "a drunkard," because wine drunk from cups of it was supposed to lose its intoxicating properties. With the Heb. name we may compare a stone called βίττίμα, mentioned in 15th cent. B.C. in the Amarn tablets (Berlin 26). The modern Oriental amethyst is a choice variety of corundum, very similar to the above in colour. [ADAMANT.][T.G.R.]

Ami, one of "Solomon's servants" (Ezr.2.57); = Ammon (Ne.7.59) and Alôn (Esd.5.34).

Aminadab (Mt.1.4; Lu.3.33). [AMINADAB.]

Amittai, father of the prophet Jonah (2K.14.25; Jon.1.1).

Ammah, Hill of (2Sam.2.24). The Heb. may read: "To Gibeah Ammah facing the fountain on the Gideon-desert road." These sites are unknown. [C.R.C.]

Ammi, i.e., as explained in A.V. marg. (Ho.2.1), "my people," a figurative name applied to the kingdom of Israel in token of God's reconciliation with them, in contrast with the negative name Lo-ammi given by the prophet Hosea to his second son (Ho.1.9, 10). Similarly, Rukhamah (having obtained mercy) contrasts with Lo-rukhamah.

Am'midoth (1Es.5.20 only; R.V. Ammi-diot), named among those who came up from Babylon with Zerubbabel.

Ammiel.—1. The spy selected by Moses from the tribe of Dan (Num.13.12)—2. Father of Machir of Lodebar (2Sam.9.4,5,17.27).—3. Father (1Chr.3.5) of Bathshua (= Bathsheba); called Elian in 2Sam.11.5. He was the son of Abihophel, David's prime minister.—4. A door, is called of the temple; sixth son of Obed-edom (1Chr.26.5).

Ammihud.—1. An Ephraimite, father of Elishama, 1 (Num.1.10,2,8,17,45,53,10.22), and ancestor of Joshua (1Chr.7.26).—2. A Simeonite, father of Shemuel, 1 (Num.34.20).—3. Father of Pedahel prince of Naphtali (34.20).—4. Father of Talmai, king of Geshur (2Sam.13.37)—5. A descendant of Pharez, son of Judah (1Chr.9.4).

Ammínádab (my people is generous).—1. Son of Ram or Aram (Ru.4.20; 1Chr.2.20), father of Nahshon, and father-in-law of Aaron (Ex.6.23). He was of the fourth generation after Judah in the genealogy of Jesus Christ (Mt.1.1; Lu.3.33).—2. The chief of the 112 sons of Uzziel, a junior Levitical house of the family of the Kohathites (Ex.6.18) in the days of David, for whom that king sent, together with other chief fathers of Levitical houses, to bring the ark to Jerusalem (1Chr.15.10-12).—3. In 1Chr.22.12 Izhar, son of Kohath and father of Korah, is called Amminadab, probably by a clerical error.

Ammínádib (Can.6.12, A.V. and R.V. margin; or "my willing people," A.V. marg. and R.V.). If a proper name, nothing else is known of him, nor is he elsewhere mentioned in the O.T.

Ammishaddai (people of the Almighty), the father of Ahiezer prince of Dan at the Exodus (Num.1.12,2,25,7.66,71,10.25).

Ammizabad, son of Benah, apparently his father's lieutenant in the third division of David's army, which was on duty for the third month (1Chr.27.6).

Ammon, Ammonites. The Ammonites were, with the Moabites, descendants of Lot, and consequently allied in blood and language to the Israelites. The story of their origin is one of drunkenness and lust (Gen.19.36-38); and it implies that the Israelites, whilst recognizing them as kindred, entertained a strong moral repugnance to these two nations. Just before the entry into Canaan, Moses commanded the Ammonites and Moabites to be excluded from the congregation till the tenth generation, for hiring Balaam to curse Israel, Edomites and Egyptians being allowed to enter in the third (Deut.23.3-8); and we find this association of Ammon and Moab throughout the O.T. The Moabite and Ammonite territories lay close together on the E. of the Jordan, Moab occupying the S. part on the shores of the Dead Sea, and Ammon the N.E. district, its border being, in the days of Sihon, when the Israelites invaded his territory, at the town Jaazer (see Num.21.24, where
AMMON, AMMONITES

for "strong" some MSS. of the LXX. read Jazer). Their chief city was Rabbath-ammon, known in later times as Philadelphia. They are first mentioned as holding their territory from Jehovah, together with the Moabites, and therefore not to be attacked by Israel. It is said that they had occupied the land of the Zemumim, a race of Rephaim, like the Anakim or Emims, whom their Moabite brethren had dispossessed (Deut.2:19-21). Eglon, the Moabite king, was assisted by the Ammonites in his invasion of W. Palestine (Judg.3:13). At a later time they passed the Jordan, "to fight against Judah and Benjamin and the house of Ephraim," till the election of the freebooter Jephthah as judge (Judg.10, 11). Saul, who, before attacking them, sent men to the border to ensnare Jephthah. It was Jephthah (Judg.11:33), but in the days of Saul, their king Nahash threatened the city of Jabesh-gilead. They were distinguished alike for craft and cruelty, and refused on this occasion to come to any terms with the inhabitants, unless they would all submit to have their right eyes put out. They were speedily overthrown by the Artaxerxes of Persia, or, rather, by the Persians. When Nebuchadnezzar came to the throne, he laid siege to Jerusalem, and for three years it was reduced to dire distress. The city was taken by the Babylonians, and Nebuchadnezzar, with a view to secure Babylon's future control of the area, crucified the king, with his sons and servants. As a consequence, the Ammonites were not again allowed to have any share in the government of the country, and the Ammonite city of Rabbath-ammon was forced to submit to Babylonian dominion. However, the Ammonites did not remain entirely submissive to Babylonian rule. They continued to maintain a certain degree of independence, and were able to assert themselves against the Medes and Persians, who succeeded the Babylonians as the dominant power in the region. Thus, the Ammonites were able to retain a significant amount of autonomy and influence in the region, even after the fall of the Babylonian Empire. The Ammonites were also involved in the struggles of the Persians and Greeks for control of the Middle East, and they were able to maintain a degree of independence and self-rule throughout this period. In the Christian era, the Ammonites were eventually incorporated into the Roman Empire, and their identity and culture were gradually assimilated into the larger, more dominant cultures of the region. However, the Ammonites maintained a distinct political and cultural identity, and their contributions to the region's history and development are significant. The Ammonites were known for their bravery, resourcefulness, and strategic acumen, and they played a significant role in the region's political and military landscape from the time of the Israelites to the fall of the Roman Empire.
under the great Theban kings. Thebes is mentioned by Nahum (3.8, see R.V.) as No-
amon the city of Ammon. The Amorites called him Amon, whose name was in intimate associa-
tion, identifying him with Ra (the sun). He is the head of his race. Therefore, the Targum names Ammon, Amon the father, Mut the mother, and Khenos the son, a lunar god. Amon is represented in human form, sitting on a throne, and wearing two tall plumes. He is sometimes ram-headed. The Greeks likened him to Zeus and called him Ammon, whose oracle was in the oasis now called Siwa.

**Amon**

1. **King of Judah**, son and successor of Manasseh, reigned two years from 643 to 641 B.C. Following his father's example, Amon devoted himself wholly to serving false gods, and was killed in a conspiracy. The people avenged him by putting all the conspirators to death, and secured the succession to his son Josiah (2K.21.18-26; 2Chr.33.20-25). To Amon's reign we must refer the moral and religious declension of Jerusalem pictured by Zephaniah (1.3) and (a little later) by Jeremiah (2-6); idolatry sup-
persed good and proper life, the poor ruth-
lessly oppressed, and shameless indifference to evil.—

2. **Prince or governor of Samaria in the reign of Ahab** (1K.22.26; 2Chr.18.25). The precise nature of his office is not known. Per-
haps the prophet Micaiah was entrusted to his custody as captain of the citadel.—

3. **Amorite**. The name has been supposed to signify "a mountaineer," the Amorite being the highlander and the Canaanite the lowlander of Palestine. The Hebrews regarded the Amorites as the sons of Canaan (Gen.10.16; 1Chr.1.14); but, according to the report of the spies (Num.13.29), distinguished them from the Canaanites. The Hittite and the Jebusite, and the Amorite dwell in the mountain, and the Canaanite dwells by the sea and by the side of Jordan." They were in Palestine from a very early period, and gave their name to the country. The Egyptians used the form Amur, and in the Bab. and Syr. texts the name is written Amor. It is noted in the inscription of Akkad (3800 B.C. (?) and Gudea (2600 B.C.) as another form of "land of the Amorri"—Amorites (Sayee). In Gen.14.7 (the account of Chedorlaomer's expedition) the Amorites are at Hazezon-tamar, near Engedi, on the W. shores of the Dead Sea. Abraham's allies, Aner, Eschol, and Mamre (Gen.14.13) were Amorites. According to the Amarna tablets, the Amurri or Amorites occupied N. Palestine; but in the Bible they are generally mentioned in connexion with E. or S. Palestine, and in Judg.1.35,36 the boundary of the Amorites was from the pass of Akrahum on the Dead Sea to Ajialon, etc.

The first lands conquered by the Israelites were the Amorite kingdoms of Sihon and Og. Sihon had conquered the Moabites, and forced them to take refuge beyond the deep valley of the Arnon; and it is possible that Num.21.27-29 enshrines an ancient Amorite song of triumph over Moab. Sihon's refusal to allow Israel a passage through his territory led to an attack, which resulted in its capture by the Israelites, and the Moabite portion of it was assigned to the tribe of Reuben (Num.21.23-25; Deut.2.36; Num.32.33,37,38). The kingdom of Bashan, with its 60 cities, is described as Amorite, though Og himself was the last of the Rephaim or giant inhabitants of E. Palestine (Deut.3.1-17). We have been an invasion of the Moabite terri-
tory conquered by Sihon, and occupied by the Israelites, was the subject of the dispute be-

between Jephthah and the king of Ammon. The Israelite judge in his embassy claims the land of Sihon by right of conquest, and pleads the silence of the Moabite king Balak at the time (Judg.7.1-10). So much for the E. Amorites; those of the S. are apparently identified with the Hivites (cf. Gen.34.2; Jos.9.2,11.19 with Gen.48.22; 2Sam.21.2), the Jebusites (cf. Jos.15.63,18.28; Judg.1.19,19.1; 2Sam.3.6 with Jos.10.5,6), and the Hittites of Hebron (cf. Gen.23 with 14.13). In the Egyptian monuments we find the name Amorites depicted as a tall race, with fair skins, light (but also black) hair, and blue eyes. The same type, with profiles resembling those of the Amorites in the Egyptian monuments, is still met with in Palestine, especially in the extreme south. It is interesting to observe that Eze-

iel fixes the tribe of the Amorites as "a nation of rude farmers, from ancient origin to Jerusalem: "Thy birth and thy nativity is of the land of Canaan; thy father was an Amorite, and thy mother an Hittite" (Ezk.16.3). According to Amos (2.9) the Amorites were giants "whose height was like the height of cedars"—a proof that they had in the 8th c. B.C. become a tra-
dition of the past to the Israelites. [F.-R.-J.]

**Amos**

1. (דָּבָשׁ, probably burden-bearer; 'Awâš). The earliest, save for the doubtful ex-
ception of Joel, of the writing prophets. He prophesied in the reigns of Uzziah of Judah and Jeroboam II. of Israel earlier than his contemporary Hosea. Amos does not name God's minister of venge-
ance, Hosea repeatedly names the Assyrian. In Amos the northern kingdom is still intact (6.14; cf. 2K.14.25); in Hosea it is tottering to its fall. The mention of the earthquake (1.1; cf. Zech.14.5) sheds no light on the date; but it tends to show that the prophecy was all de-

livered at one time. Amos, perhaps alone among the prophets, was not a member of a prophecy guild, but a herdsman of Tekoa, and a dresser of sycomore fruit. Yet though he lacked the training of the "schools," there is nothing rude or uncultured in his style. His language has a simple beauty all its own, which is enhanced by the illustrations drawn from the outdoor life in which he was placed. We have the cart laden with sheaves (2.13), the lion attacking the flock (3.12), the view of the starlit skies, as he gazed on the Pleiades and Orion (5.8), the locusts spoiling the vineyards and oliveyards (6.9), the "sheerings" [Mow-

ing] (7.1), the plowman, the reaper, the treader of grapes (9.13). The only Tekoa known to us is the village 10 miles S. of Jerusalem, whose "wise woman" was suborned by Joab (2Sam.14). It is indeed said that the bleak and
barren high ground of Tekoa would be unsuit-
able for sycamores, and attempts have been
made to assume a Tekoa in the N., but there is
no real evidence for this, and the home of the
sycamores may have been lower down in the
valley. We thus have a Judaean declaring
God's message to the northern kingdom. The
prophecy naturally falls into three divisions.
(1) 1.3-6. Hence have dooms promptly
pronounced upon various neighbouring nations,
Edom, Ammon, Moab, and others, culminating in
Israel. (2) 7.1-6.14. This consists of three
discourses, each introduced by "Hear ye
this word," inveighing against idolatry, luxury,
and oppression. (3) 7.1-9.20. Here are five
visions, displaying a symbolic picture (the
plumb-line, and the like) which may have a
greater effect than more direct appeals.

Amoz.-1. A Levite of the family of the
Kohathites, and father of Moses, Aaron,
and Miriam (Ex.6.18,20; Num.3.19; 1 Chr.6.
23,18). He is called the "son" of Kohah,
but it is evident that in the genealogy several
generations must have been omitted; for
from Joseph to Joshua ten generations are
recorded, while from Levi to Moses there
are but three. Again, the Kohathites in the
time of Moses or the Israelites of a month old and upward (Num.3.28), a
number to which they could not have attained
in two generations from Kohah. The chief
difficulty then remaining is that Jocebed,
wife and aunt of Amram, is described as a
daughter of Levi, born to him in Egypt
(26.59); but it disappears if the tribe and not
the individual is intended.

His descendants, the Amramites, are
mentioned in Num.3.27; 1 Chr.26.23.—2. A
dson of Dibosh and descendant of Seir (1 Chr.1.41); R.V. reads "Hamran" = Hemdan in Gen.
36.26.—3. A son of Bani who had married a
foreign wife (Ezr.10.14).

Amraphel, king of Shinar (Babylonia)
who took part in the expedition of the Elamite
Chedorlaomer against Sodom, Gomorrah,
and the cities of the plain (Gen.14). The identi-
fication of this king with the well-known
Babylonian ruler Hammurabi (Hammurabi,
Ammurapi) is generally admitted, the final i,
which is the restoration of a later form,
due to a scribal error. Otherwise the two
forms agree, and the date assigned to Hammurabi (2000 B.C. or later) is satisfactory.

Though belonging to the dynasty of Babylon," he was not of Babylonian origin,
but descended from a royal stock supposed
some to have originated in an Arab tribe.
In his reign of 43 or 55 years (the documents
differ) he did much to promote the prosperity
of his country, principally by digging irriga-
tion-canals, as was the custom of the time. He
took part in many warlike expeditions,
the most noteworthy being that referred to in
Gen.14, and one against Kim-Sin of Larsa in
the 31st year of his reign. The evidence of his relations with Chedorlaomer have not
been discovered, but the existence of late
inscriptions which apparently refer to Chedor-
laomer, Tidal, and Arioch make it probable
that more light will be thrown on his reign.
Many contracts of his time exist, as well as
cronological lists and other inscriptions. Bas-
reliefs representing him are preserved in the
British Museum and in the Louvre, the latter
on the celebrated Code of Laws bearing his
name; for an account of which see LAW IN
O.T. See THE O.T. IN THE LIGHT OF THE RECORDS.
result of a co-operation with a demon. Amulets of the most varied kinds existed, and still do exist, for in the East the ancient superstitions regarding evil spirits have altered very little; bones of hares, metal discs, knotted cords (called "fringes") in Num. 15.58, scrolls, and ornaments of various descriptions are among the most popular.

Amzi.—1. A Merarite Levite, ancestor of Ethan the minstrel (1 Chr. 6.46).—2. A priest, whose descendants served the temple in the time of Nehemiah (Ne. 11.12).

Anab', a town in the mountains of Judah (Jos. 15.50), named, with Debir and Hebron, as once belonging to the Anakim (Jos. 11.21). Fixed by Robinson at 'Anab', a ruin 2½ miles S.W. of Debir. [C.R.C.]

Anael, brother of Tobit (Tob. 1.21).

Anah'.—Both A.V. and R.V. use this name in one chapter of O.T. as if of three different people. (1) The parent of Esau's wife, and daughter ("son," I. X. X.) of Zibeon the Hivite (Gen. 36.2,14). (2) Son (or descendant) of Seir the Horite (36.20). (3) The son of Zibeon, who found the yămim (36.34). As all the occurrences of the name are in a list dealing with the dukes of Edom and descendants of Esau, it seems probable that there has been some confusion; that Horite should be read in ver. 2, and that all three represent the same person. Yămim is translated "hot springs" by R.V. and Vulg.; A.V. "mules" is only a guess from the context. If the former is correct, the hot springs referred to are probably some near the Dead Sea. [Nahaliel.]

Anahas, a place within the border of Issachar, named with Shiloh and Rabbith (Jos. 19.19). Now the village en Nā'ūrah, in the valley of Jezreel. [C.R.C.]

Anai, Anakim. [Giants.]

Annam' (plur. form). Mizraim (Egypt) is said to have begotten Ludim, Anamim, and other tribes, including the Casluhim (out of whom came Philistim) and the Caphtorim (Gen. 10.13; 1 Chr. 1.11). Ebers thinks they are the A'amu (or cowherds), a people of Semitic race represented at the grave of the Pharao Seti I., father of Ramesses II.

Ann'mme'lech (2 K. 17.31, 7 K. 33). [Adrammelech.]

An'an.—1. One of the "heads of the people" who signed the covenant with Nehemiah (Ne. 10.26).—2. (1 Esd. 5.30) = Han'an. 4.

Anani', the 7th son of Elioenai, descended from the royal line of Judah (1 Chr. 3.24).

Ananiah, probably a priest, and ancestor of Azariah, who assisted in rebuilding the city wall under Nehemiah (Ne. 3.22, 23).

Ananiah', a place, named between Nob and Hazor, in which the Benjamites lived after the Captivity (Ne. 11.32). Now BeIt Hanna, a village 2 miles S.E. of Gibeon. [C.R.C.]

Ananias.—1. Sons of Ananias, numbering 101, returned with Zerubbabel (1 Esd. 5.16 only).—2. (9.21,) [Hananiah, 3]—3. (9.29,) [Hanani, 9]—4. (9.43,) [Ananias, 1]—5. (9.48,) [Hananiah, 5]—6. Father of Azarias, whose name was assumed by the angel Raphael (Tob. 3.12, 13).—7. Ancestor of Judith (Jth. 8.1).—8. Sadrach (Song 3 Chil. 66; 1 Mac. 2.59). [Hananiah, 7.]

Ananias.—1. A high-priest in Ac. 23.2, 5, 24.1. He was the son of Nedebaues, succeeded Joseph son of Camylithos, and preceded Israel son of Phabi. He was nominated to
ANANIEL

the office by Herod king of Chalcis in 48 A.D.; and in 52 A.D. sent to Rome by the prefect Ummidius Quadratus to answer before the emperor Claudius. He was a prominent Sadducee. He appears, however, to have resumed his office on his return. He was deposed shortly before Felix left the province; but still had great power, which he used violently and lawlessly. At the outbreak of the last revolt he was murdered by the sicarii as being a leader. He is described as a terrible fulfillment of the prophecy of St. Paul (Ac.23.3).—2. Husband of Sapphira. The second and fuller account of the common fund of the Christians of Jerusalem is followed by two instances of contributions to it, one in good faith by Barnabas (Ac.4.36,37), and the other fraudulent by Ananias and the wife of his name (5,1-12). On St. Peter's denunciation of the fraud Ananias fell down and died. In the case of Sapphira the sentence of death was more explicitly pronounced. The sin was an attempt to deceive the Holy Ghost. Reverence for the Holy Ghost was the principle in danger, and its vindication was at the same time the work of the Spirit were so near and manifest. Cf. our Lord's teaching on sin against the Holy Ghost (Mt.12.31) and St. Peter's words to Simon Magus (Ac.8.22).—3. A Christian Jew of Damascus. As in the case of Peter and Cornelius, so here two visions prepared Ananias for the interview which Ananias at first unwillingly undertook. The imposition of his hands on Saul was followed by recovery of sight and by baptism. In St. Paul's account to the Jews of the circumstances he conciliates them by mentioning that Ananias, his first human instructor in the faith, was a devout man according to the law, well reported by all the Jews that dwelt there (Damascus) (Ac.22.12). [E.R.B.] Ananiel', forefather of Tobit (Tob.1.1).

'Anath', father of Shamgar (Judg.3.31,5,6).

Ana-thema (lit. "a thing hung up in a temple and so dedicated to the god") is the equivalent of the Greek term poimane devoted" (see R.V.). Any object so devoted to the Lord was irredeemable: if an inanimate object, it was to be given to the priests (Num.18.14); if a living creature or even a man, it was to be slain (Lev.27.28,29).

Generally speaking, a vow of this description was taken only with respect to the idolatrous nations who were marked out for destruction by the special decree of Jehovah, as in Num.21.2; Jos.6.17; but occasionally the vow was made indefinitely, and involved the death of the innocent, as in the cases of Jephthah's daughter (Judg.11.31), and Jonathan (1Sam.14.24), who was only saved by the interposition of the people. Of such a vow was punished with death (Jos.7.25). The word "anaathema" frequently occurs in St. Paul's writings, and is generally translated accursed, and regarded by many as a technical term for judicial excommunication. That the word was so used in the early Church there can be no doubt, but its occurrence in N.T. shows that it bears the more general sense of accursed as expressive either of strong feeling (Ro.9.3) or of dislike and condemnation (1Cor.12.3,16.22; Gal.1.9). [Curse; Crimes; Vow.]

Anathoth, a Son of Becher son of Benjamin (1Chr.7.8).—2. One of "the heads of the people" who signed the covenant (Ne.10.19); unless, as is not unlikely, the name stands for "the men of Anathoth" (7.27).

Anathoth, a priest's city, in the lot of Benjamin, with "suburbs" (Jos.21.15; 1Chr.6.60). Hither Abiathar was banished by Solomon to his homeland, in order to frustrate his attempt to put Adonijah on the throne (1K.2.26). It was the native place of Abiezer, one of David's 30 captains (2Sam.23.27; 1Chr.11.28,27.12), and of Jehu, another of the mighty men (1Chr.12.3); and here, "of the priests that were in Anathoth," Jeremiah was brought to the temple (23.23; 37.27; 38.18). Anathoth was N. of Jerusalem (Is.10.30), and is placed by Eusebius (Onomasticon) 3 miles from the city. It was discovered by Robinson at 'Anida, on a ridge 2 miles N.E. of Jerusalem. [C.R.C.]

Anchor. [Ship.]

Andrew, a disciple of the Baptist, who with another was the first to follow Christ (Jn.1.40). He was brother of Simon, and brought him to the Lord. Hence his name and day have been specially associated with missionary effort. When the disciples were summoned to take the "commission" (Mark 16.16), Andrew and Simon were the first two called ( Mk.1.16). He is a link between the 1st and 2nd of the 3 sets of 4 in which the names of the apostles are arranged. He is included in the first quaternary, and is among them when they ask the solemn question about the "end." ( Mk.13.3). On the other hand, he is closely connected with the second quaternary through Philip, who is always placed at its head, and thus immediately follows Andrew in two of the lists. Both were of Bethsaida and both have Gk. names, though this must not be held to imply Gk. origin. In the miracle of the feeding of the 5,000, and in the introduction of the Greeks to Jesus, these two disciples are closely associated. In Acts, Andrew, like the majority of his colleagues, is only mentioned in the list in 1.3. The scene of his labours is variously stated, but traditions agree in assigning Patrai as the place of his martyrdom, 7.32. [E.R.B.]

Andronicus.—1. An officer left as vice-roy in Antioch by Antiochus Epiphanes during his absence (171 B.C.). At the instigation of Menelaus, Andronicus put to death the high-priest Onias. This murder excited general indignation; and on the return of Antiochus, Andronicus was publicly degraded and executed (2Mac.4.31-38).—2. Another officer of Antiochus Epiphanes, left by him on Gerizim (5.23), probably in occupation of the temple there. —3. A Christian at Rome, saluted by St. Paul ( Ro.16.7), together with Junia (R.V. Junias). The two are described by St. Paul (7) as having been "accursed," seeing Jews; as "fellow prisoners," either as having shared his imprisonment on some unrecorded occasion, or as being, like himself, spiritual captives of Christ; (3) "of note among
'angels,' i.e. among the delegates of the churches employed on special missions, as was Epaphroditus (your messenger, Gk. apostle, Ph. 2.25); (4) 'in Christ before us.' [E.R.B.]

1. Angels, as of ancient tradition, belong to the Gershonites (1 Chr. 6.73). Probably 'āḏīn, 9 miles N.W. of Jenin, or En-Gannim, which is named instead in Jos. 21.29. [C.R.C.]

Aner', one of the three Amorite chiefs who aided Abraham in the pursuit after the four invading kings (Gen. 14.13.24).

Aner', a city of Manasseh, W. of Jordan, given to the Kohathites (1 Chr. 6.70). Possibly 'El'dār, 8 miles N.W. of Samaria. [C.R.C.]

Anēth'othite (2 Sam. 23.27). Anēth'othite (1 Chr. 27.12), and An'othite (1 Chr. 11.28, 12.3), inhabitants of ANATHOTH.

AngeL (Gk. angelos, "messenger" = Heb. maʿāḏḵ; both frequently of men, e.g. Hag. 1.13; ʿabbār, "mighty," Ps. 78:25 only). Other terms used of angels are "sons of God" (br'ne ʿēlōhīm), Gen. 6.2. Job 1.6, 38.7; sons of gods (br'ne ʿēlim), Ps. 29.1, 89.6 (A.V. sons of the mighty); "holy ones," Job 5.1, Ps. 89.5, Dan. 8.13 (A.V. saints); "a watcher and a holy one," Dan. 4.13, 23, cf. ver. 17; "spirits," Heb. 1.14. The term "angels" existed in Babylon before the time of Abraham (the Sukallī being apparently inferior gods who were the messengers from the higher gods to dwellers on earth); it was elaborated especially in the Persian empire, heir of much of the religion as well as of the power of Babylon; and was modified in the Hellenism which taught the need of intermediate beings between man and God. The Biblical doctrine shows traces of non-Israelite influence through all the periods.—I. O.T. Angels are mentioned in the "primitive strata" (even according to the alleged "sources" quoted below; for an account of which see PENTATEUCH) of Bible history, both directly and indirectly (cf. Lord of hosts, i.e. originally the heavenly hosts). (1) In the earliest histories the distinction between God and angels is not clearly expressed. (i) This is especially the case with the term "the angel of the Lord" (J and Judg.), "the angel of God" (E and J, but not H), "angel" (E and J). "Angel" (E and J) is not found in D or P. He speaks sometimes as messenger (Judg. 13.16), but sometimes as God Himself (Judg. 13.18; Ex. 3.2, 6.14; Gen. 22.15), and accepts worship (Judg. 15.20-22). Cf. Is. 63.9, "the angel of His presence," i.e. perhaps an angel who dwelt in God's immediate presence (cf. infra, II. (3)), but more probably the angel in whom God's presence was especially revealed (Ex. 33.2, 3 with 14.15; cf. Deut. 4.37, R.V.); but probably not maʿāḏḵ habbūrīṯ (Mal. 3.1), which at that date naturally meant "messenger of the covenant." (ii) We find THEOPHIANS, where God is manifested as an angelic being in human form to Abraham (Gen. 18.2, 22; cf. 19.1), to Jacob at Penuel (32.24, 30; Ho. 12.4), to Joshua at Gilgal (Jos. 5.13, 15). Christians naturally connect this identification of angelic being and God with the Word Who reveals God and was afterwards incarnate (see a summary of patristic views in BUEHL, Dogmatic Theology (1890), i. 105 ff. from Burton, Testimonies of Ante-Nicene Fathers (1829), pp. 38 ff.). (2) Generally the distinction is plain. (i) They have various activities. They are "with God in theophanies (Gen. 28.12, 32.2 (Tel)), praising Him (Ps. 103.20, 148.2); in His sight not without error (Job 4.18); charged with the care of the pious (Ps. 91.11); carrying God's throne to the prophet (1 K. 13.18, 19.5, 7; 2 K. 1.3, 15; Zech. 1.9, and 18 times in 1-6; cf. Ezek. 8.2ff., 9.2ff., 10.2ff., 40.3ff.); excellent, wise, powerful (1 Sam. 29.9; 2 Sam. 14.17, 20.19, 27; Zech. 12.8); encamping round about the faithful (Ps. 34.7; cf. 2 K. 6.17, Ps. 68.17); chasing His enemies (Ps. 35.5, 6) destroying by the judgment of Yahweh (2 Sam. 24.16, 17 = 1 Chr. 21.1-20. 28.19. 35 = Is. 37.36 = 2 Chr. 32.21)" (Oxford Heb. Lex.). There are hosts round God as king (Is. 6.6-2.5; 1 K. 22.19; Dan. 7.10), Who has a council of the holy ones (Ps. 89.7). (ii) They are guardians. The germ of guardianship of a person is seen in Gen. 24.7, 40. One has the guardianship of the nation of Israel (Ex. 23.20, 23.12, 34.33, 35.2). He has MICHAEL with him in this office (Dan. 10.20, 21), and perhaps others who are called "watchmen" (Is. 62.6). There are also guardians of Persia and of Greece (Dan. 10.13, 20). Possibly Is. 24.21 alludes to guardians of nations, as the LXX. of Deut. 32.8 (cf. 25.26) also. Certain passages seem to connect the word guardian of angels with the term "holy ones" (Is. 61.12, 62.2). This use of "angel" is implied in Dan. 10.13 ("Michael, one of the chief princes"); see below. (iv) Names. GABRIEL (8.16,9.21), Michael (10.13,21, 12.1); also "the Satan," i.e. the Adversary (Job 1.2; Zech. 3.1-2).—II. Apocrypha and Pseudepigrapha. These present so much of the popular beliefs of angels as are not expressed in the O.T. in N.T. times that it is important to consider them here. The principles are the same as in O.T., but carried further. Only some particulars can be mentioned. (1) They direct the elements (cf. Persian Fravashi). Cf. the O.T. reference of pestilence and other judgements to them (cf. infra, 1. (2)). So repeatedly in Ethiopian Enoch (e.g. lx. 15-22); the Slavonic Enoch, xix. xx. 1; Bk. Jubilees, ii. 2. (2) They become clearly guardians of individuals, e.g. Tobit (Jud. xxxv. 17). For guardianship of nations, see Eccus. 17.17. "For every nation he appointed a ruler; and Israel I have placed under the guardianship of Michael. This use of angel is implied in Jud. xv. 31, 32). (3) Their ranks are more defined. Seven archangels (Tob. 12.15; Eth. En. xx. 21, 22 (probably due ultimately to the seven Babylonian planets)); ten orders (Slav. En. xx. 1, 3); four presences (Eth. En. xii. 2; cf. Is. 16); "the angels of the presence" (Jub. 11.2); "the one . . . from the seventh heaven" (Asc. Isa. vi. 13). (4) They fight on behalf of Israel (Ass. Moses x. 2; Asc. Isa. vii. 9; cf. MICHAEL. (5) They intercede for men (Eth. En. xii. lxvi. 2, civ. 1; cf. xv. 2; Test. xii. Patr. Levi. v. 6). (6) Additional names in the Apocryphas are JEREMIEL (2 Esd. 4.56, R.V.; Uriel, A.V.); PHAziel (2 Esd. 5.16, R.V.; Salathiel, A.V.); RABEHEL (Pass. assim.; Eth. Enoch); URIEL (2 Esd. 4.1, etc.; Eth. En. xx. 7, etc.).—III. N.T. (1) Rejecting the unbelief of the SADDUCEES (Ac. 23.8) and accepting the doctrine of the Pharisees (ver. 9) and of the popular religion, the N.T. writers assume the existence of angels, and indeed regard them as almost numberless (Mt. 26.53; Lu. 2.13; Heb. 12.22; Rev. 5.11, 12, 7). (i) The forms of their activity are various,
ANIAM

representing the providence of God, e.g. towards Joseph (Mt.1:20), Zacharias (Lu.1:11), the mantle of Job (Ac.13:36), St. John (Rev.1:14), St. Paul (27:23), also at the beginning (Mk.1:13) and end (Lu.22:43) and perhaps during (Jn.1:51) the three years of our Lord’s public life. Also the law is said to have been given through them (Ac.7:53; Gal.3:19; Heb.2:2; cf. Jn.1:17). "And He said to the people in presence, Write for Moses," etc.; also cf. LXX of Deut.33:2. They govern elements—fire (Rev.14:18), waters (16:5 [cf. Text. Rec. Jn.5:4]; cf. Rev.9.11ff.), winds (7.1). So also a common interpretation of στρογγυλία in Gal.4:3, Col.2:8,20. [ELEMENTS.] (ii) They are guardians of persons (Mt.18:10 [probably]; cf. Ac.15:2, etc.: cf. "the angel of the Christian Church," Asc. Isa. iii. 15). Apparently they are present in church assemblies (1Cor.11:10). They are deeply interested in the salvation of men (Lu.2:9-14,15-19; 1Pe.1:12). (iii) Some fell (Ju.6; 2Pe.2:4). The cause is not stated, but perhaps from pride (1Tim.6:10).—cf. Gen.6:2, and Eth. En. xiv., xv. 3 ff.). [SATAN.] The dragon and his angels fight Michael and his angels (Rev.12:7). (iv) They have many ranks (so probably Ro.8:32; Col.1:16; Eph.1:21) and an archangel (1Th.4:16). (2) Yet N.T. guards against certain wrong tendencies and points out the Christ, though man, is not inferior to angels but far above them (Heb.1:4-2:9; Col.1:16, 2:15). (ii) Prayer to angels is wrong (Rev.19:10, 22:8, 9). So also Col.2:18, the Colossian Christians being inclined to identify the local gods with angels (doubtless especially Michael, as later history tells of his worship there).—IV. Their Nature and Form. Little is said in Scripture of this. They are termed "spirits" (Heb.1:14), but it is not asserted that they are incorporeal. Our Lord seems to imply the contrary, for they that attained that Age and the resurrection from the dead do not marry because they cannot die, and they cannot die because angels (Lu.20:35,36), or "as angels" (Mt.22:30; Mk.12:23). They appear always in human form (e.g. Gen.18; Ac.1:10), but often glorious (Dan.10:6; Lu.24:4). In Jacob’s dream they ascend and descend by a ladder, i.e. they apparently are wingless (Gen.28:12). Elsewhere they "fly" (Dan.9:21 [Gabriel]; Rev.14:6 [cf. Text. Rec. 8.13]); and the Seraphim of Is.6.2 are depicted with wings. [SARAH; CHERUBIM.] Everling, Die paulinische Engelologie u. Dämonologie (1888); Lueken, Michael (1908): "Eng. Encyc., art. "Engelology"; J. M. Fuller, "Introduction to Tobit," in Speyer’s Comm. J. T. Marshall in Dict. of Christ and the Gospels (especially valuable for the relation of modern thought to a belief in angels). [A.L.W.]

ANIam, a Manassite, son of Shemidah (1Ch.7:19).

Anim, a city in the mountains of Judah, named with Eshtemoa and Zorah (Jos.15:50). Eusebius and Jerome mention a place called Anea in Daroma, 9 miles S. of Hebron (Onomasticon), now el Ghwein, 2 miles S. of Eshtemoa. It is the Aina of the list of Thothmes III. (No. 95), immediately preceding Carmel of Judah. [C.R.C.]

Anise (Galea anisum) occurs once (Jn. 18:23). It is by no means certain whether the anise (Pimpinella anisum, Lin.) or the dill (Anethum graveolens) is here intended, though the latter is more probable. Both belong to the natural order Umbelliferae, and are much alike in external character; and the seeds of both are, and have long been, employed as condiments and carminatives. Anethum is more especially a genus of Eastern cultivation than the other plant, according to Dr. Royle. Anise and dill were confounded by the Greeks under the one name ἀνίσον or ἀνθίνον. When distinguished, the variant spellings in Latin (anisum and anethum) were used for that purpose.

Anklet. This word does not occur in A.V., but is referred to in Is.3:26,18,20, where the prophet speaks of "the tinkling ornaments about the feet of the daughters of Zion, and of the "oraments of the legs." Anklets were as common as bracelets and armlets, and made of much the same materials; the pleasant jingling and tinkling which they made as they knocked against each other was no doubt one of the reasons why they were admired. They are still worn in the East, and Lane quotes from a song, in allusion to the pleasure caused by their sound, "the ringing of thine anklets has deprived me of reason." Hence Mohammed forbade them in public; "let them not make noise with their feet, that their ornaments which they hide may [thereby] be discovered" (Koran xxiv. 31).

Ania.—1. The wife of Tobit (Tob.1.6ff.).—2. An aged "son of the tribe of Asher in Jerusalem at the time of our Lord’s presentation in the temple (Lu.2:36-38).

Anna’s (1Esd.5.23) = Senaah.

Annas.—1. (1Esd.9.32) = Harim, 4.—2.
**ANNUUS**

Son of Seth, appointed high-priest by Quirinus, imperial governor of Syria. A.D. 7, deposed by Valerius Gratus the procurator in A.D. 15. He lost office, but not power, for five of his sons held the office of high-priest as well as his son-in-law Joseph, who assumed the name Calaphas (Jn. 18:13). The sons of Annas monopolized the sale of all the materials for sacrifice, and so made the temple "a den of robbers" (Mk. 11:17; cf. Edersheim: Life and Times of Jesus, vol. i. pp. 371-375). The title high-priest was retained by, and accorded to, one who had held the office, hence the usage in Ac. 4:6; that in Lu. 5:32 is unparalleled. The chief interest in Annas centres in the correction made by St. John of the confusion of Annas' and his son-in-law Joseph's names (Mk. 15:1; cf. St. John 7:22). The use of the name Annas was that of the first two generations between the stages of our Lord's trial (Mt. 26:57, 27:1; Mk. 14:53, 15:1). St. Luke avoids their mistake by transferring the morning meeting of the Sanhedrin to the previous night, and leaves room for such an informal inquiry as that of Annas really was (Lu. 22:54). St. John shows his inquiry correct, but have one issue, and that it was as a condemned prisoner that Jesus was sent to Calaphas (Jn. 18:19-24; cf. Mk. 14:64). The Sanhedrin met at this time in the headquarters of the Annas faction, and it may have been when passing through the court from the apartments of Annas to the gate, that "he that had turned his head looked upon Peter" (Lu. 22:61; cf. Westcott on Jn. 18:25). [C.R.D.B.]

**Annuus** (1 Esd. 8:48). Possibly a corruption of the Heb. word rendered "with him" (cf. Ezr. 8:19).

**Anointing.** I. The hot climate of Eastern countries gave rise to the use of unguents for purposes of the body. The application of Oil to the exposed parts of the skin, scorched by the sun, had a soothing effect, and was in daily use among the Jews for this purpose (Mt. 16:17). Indeed, to such an extent was this use of oil regarded as a normal fact that the failure of the olive harvest, from which the oil was obtained, is taken as typical of national calamity (Mi. 6:15), and is especially regarded as a mark of God's anger (Deut. 28:40). The more expensive oils were prepared with great care, and their use was a mark of luxury (Am. 6:6). From this entirely natural use of anointing, various ceremonial and symbolical customs arose. (1) **Social Significance.** Anointing was practised preparatory to a visit of ceremony, as when Ruth anointed herself before visiting Boaz (Ru. 3:3); and, on the other hand, the laws of hospitality required that the host should anoint his guest. It was by failure to perform this act of ceremony that Simon showed discourtesy to our Lord (Lu. 7:46). (2) **Official Significance.** An important use of anointing was its employment as symbolic of admission to office; and here we find the introduction of a religious idea. The act of anointing represents a consecration, being the admission to an office which involves a special religious obligation. (i) **Prophets** are anointed to their office. Elijah is bidden to anoint Elisha (1K. 19:16). Prophets are regarded as being in a special sense the Lord's "anointed ones" (Ps. 105:15, R.V.), (ii) **Priests.** The consecration of Aaron is described in detail, as being a typical example of the high-priestly consecration. It included a two-fold anointing, first the pouring of Oil on the Person and later the sacrifice of consecration (Lev. 8:12, 30). For this purpose a special oil was to be prepared which might be put to no other use (Ex. 30:32). The ordinary priests, of whom Aaron's sons are taken as typical, were anointed once only, and that by sprinkling (Lev. 8:30). (iii) **Kings.** Under special circumstances a man might be designated for the office of king by the ceremony of anointing, as in the case of Saul (1Sam. 10:1) and of David (1Sam. 16:13), and might be anointed a second time on his actual accession to the kingship (2Sam. 2:4). A conspicuous example of the act of anointing, as a public ceremony, is to be found in the anointing of Joash by Jehoiada (2K. 11:12). The custom was a widespread one, being found in other nations, as is recognized in Jotham's parable (Judg. 9:8), and it has passed into the usage of Christian countries. An extension of this use of oil for the purpose of consecration to office is its use in the anointing of inanimate objects to sacred purposes. Jacob consecrated the stone of his pillow at Bethel (Gen. 28:18). The tabernacle and its furniture were consecrated by the chief oil specially compounded for the purpose (Ex. 30:26). From this ceremonial use, the idea of anointing has been popularly employed in a metaphoric use to express the setting apart of persons for some special relationship to God. The prophets look forward to the coming of one Who in a unique sense shall be "the anointed one" (Dan. 9:25, R.V.), and Whose anointing shall be from God Himself (Pss. 45:7). These prophecies are fulfilled in Jesus of Nazareth (Heb. 1:9), Who, unlike any of His types, was "anointed" to all three offices. Christians, as having received the gift of the Holy Ghost, are similarly spoken of as God's anointed (2Cor. 1:21; 1Jn. 2:20, 27). [LAVING OX OF HANDS. ]—II. Oil was widely recognized in the ancient world as having a medicinal value. It was prescribed for use in diseases of the skin, and for the healing of wounds. Thus it was used by the Good Samaritan (Lu. 10:34). So, too, it was used as a remedy by the Twelve on their mission to the cities (Mt. 6:13). Here, however, a fresh element is introduced in the fact that special powers of healing were bestowed upon the apostles. In conjunction with their exercise of these powers, they employed the natural remedy with which men were familiar. After the Ascension the disciples seem, in part at least, to have changed their method. They laid their hands upon the sick for the purpose of healing them (Mk. 16:18; Ac. 28:8), following in this the example of the Lord Himself. But the use of anointing still survived, at least among the Jewish Christians (Jas. 5:14). In this practice the fact that oil possesses qualities as a natural remedy is still the underlying idea; but the power of faith is recognized as quickening its beneficial effect. Incidentally this use of oil is connected by St. James with the forgiveness of sins. Sickness was regarded as being frequently the result of some definite sin (1Cor. 11:30). In such a case the act of faith, by which the remedial
application of the oil is accompanied, will win the forgiveness of the sin and so make the bodily healing possible (Jas. 5.15). In later times the bodily healing, which is the purpose of the act of anointing as described by St. James, in some cases passed out of sight; and so sprang up the doctrine of extreme unction, which has obscured and prejudiced the right and Scriptural use of unction. [J.C.V.D.]

**Antioch**

(see ANOS) application of the oil is accompanied, will win the forgiveness of the sin and so make the bodily healing possible (Jas. 5.15). In later times the bodily healing, which is the purpose of the act of anointing as described by St. James, in some cases passed out of sight; and so sprang up the doctrine of extreme unction, which has obscured and prejudiced the right and Scriptural use of unction. [J.C.V.D.]

**Anos** (1ESD 9.3.4) = **Vaniah.**

Antioch (Heb. 13.11); the chief city is mentioned twice in O.T.: in Pr 6.60 the diligence of this insect is quoted as an example worthy of imitation; in Pr 30.25 the ant's wisdom is pointed out. The ancients believed that ants stored up food in summer for winter consumption; and although this is incorrect, there is considerable justification for the idea, owing to their habit of carrying many kinds of objects (not to mention their own pupae) to and from their nests. European ants become dormant in winter, and consequently require no food. The words of Solomon do not necessarily teach that ants store up food for future use, although they may seem to imply that. If this was the general opinion, it is no matter for surprise that the wise man should select the ant as an instance on which to ground a lesson of prudence and forethought. Numerous species of ants inhabit Palestine, some of which are referable to the typical genus *Formica* (see ANOS). **Antichrist,** a word first used in the Christian Church by Christian prophets, rather than made by St. John (as Grimm wrongly supposes; see 1 Jn 2.18, "as ye heard ") , means properly "counter-Chrest", one over against the Christ. It adds to the idea of antagonism or impurity the idea of deceptive substitution (cf. "evil men and impostors," 2 Tim. 3.13, R.V.). St. John says there were many already. The idea belongs to the Christian age, called emphatically "the last time," because, though the thing is old (as old as anything Messianic: Gen. 3.15; Dan. 7.12; cf. Auerlen, Gunkel), its chief development is in the Discourse of the early Christian period. To make it a piece of Christian folklore is shallow exegesis and shallow thought. It is the last development of an ancient war with subtle deception. All that Boussert's interesting researches in the later pseudo-apocalyptic literature have proved is that it is a point of Christian doctrine, which by its mysterious appeal to unchastened curiosity has ever lent itself, with additions from elsewhere, to heretical perversion and Christian mistake. The terrific images of Rev. 13, 17 have their roots deep in history and experience. We have seen the resurrection of the old world-power as opposed to God, the subtle thought and wonder that incites its worship, and the false, adulterous, religious sanction and sentiment that courts and guides it (see Auerlen, Klefsch; Archbishop Benson, Apocryphal p. 45). If the N.T. had nothing to say of these things, we should be without chart or compass. That the presence and activity of Antichrist is foretold, and that he, with them, is bound up with our belief in goodness. The chief references to this subject in N.T. are Mt. 24, Mk. 13, Lu. 21 (our Lord's eschatological discourse); 1 Th. 5.1-11; 2 Th. 2.1-14; 1 Tim. 4.1-5; 2 Tim. 3.1-10; Rev. 13, 17. In the midst of much diversity of presentation, there is a singular unity in thought. The marks of Antichrist's reign will be (1) A spiritual deception in Christian life (Mt. 24.11-13; Th. 2.3; Tim. 4.1; 2 Tim. 3.5; Rev. 13.8, 17). (2) A false contentment and the exaltation of man, even above all that has been called or thought divine (Mt. 24.38; Lu. 17.25, 26; Th. 5.2-3; Th. 2.4, 9; Rev. 13.6, 7). (3) The consequent weakening of moral and spiritual obligations (Mt. 24.10; 1 Tim. 4.2; 2 Tim. 3.6-15). (4) Great increase of subtlety "to deceive, if it were possible, even the elect " with false wonders, evidently such as are fitted to their age (Mt. 24.24; Mk. 13.22; Th. 2.9.10; Rev. 13.14). (5) The gathering of these characteristics into a type (Mt. 24.23-25; Mk. 13.22; Jn. 6.43; Th. 2.2; Rev. 13.18). (6) The continuous vic-

ory of suffering truth (Mt. 24.13, 14; Th. 5.4, 5; Rev. 14.1, 15.2); and finally (7) the abrupt termination of all these oppositions, associated with the presence and word of Christ Himself (Mt. 24.30-31; Mk. 13.26, 27; Lu. 21.27; Th. 2.2.8, 9). Of St. Paul's earliest letters embody the idea of Antichrist in a person, "the lawless one." The early Church followed him. In his last letters he speaks only of principles. The idea of Antichrist has been embodied in men—e.g. Nero, Bar-cochab and his false prophet Akiba, Mohammed, the peacetime of the Antichrist (Göttingen), with criticism of Gunkel; Gunkel's Schöpfung und Chaos in Urszeit und Endzeit (Göttingen); Bishop Martensen's Christian Ethics (T. & T. Clark, or Berlin), suggestive on this subject throughout, last chapter on Antichrist; Bishop Gibson's War-burtonian Lectures, 1903-1907, suggestive as to Christ's eschatological discourse; and see art. in this Dict. on THESSALONIANS II. [F.E.S.]

**Antilibanus** (Jth. 17). [LEBANON.]

**Antioch.**—1. The Greek capital of Syria, built by Seleucus in 300 B.C. (1 Mac. 3.37-4.5. 11.13; 2 Mac. 4.33.5.21.35.11.36.13.23), mentioned as near Daphne (1780 B.C.), and the site of the town of Antakia on the S. bank of the Orontes, with ruins of mediaeval walls and buildings, extending S. up the steep slopes of mount Silpius. Only a few fragments of Gk. texts have been found, with one of greater importance (Waddington 2713 a) at Daphne dating from 127 B.C. and the title of the town of Antioch. The city lay on the main trade route from Assyria, and had a port [Seleucia] at the river mouth,
ANTIOCHIA

It was made a free city by Pompey (65 B.C.), and a pillared street was built by Herod the Great (1 Wars xxi. 11). Seleucus had made the Jews citizens of his capital (12 Ant. iii. 1). The Roman emperors added amphitheatres, baths, and aqueducts. The city remained the capital of Syria down to 1268 A.D., when it was destroyed by the Egyptian sultan BIBAR.

Nicholas of Antioch was one of the first deacons of the Christian Church (Ac.6.5), and a mission to the Jews of Antioch began after the death of St. Stephen (11.19.27), before the conversion of St. Paul (13.1), who returned to the city after his first journey (14.20), when the dispute concerning Jewish rites took place (15.1.12) on St. Peter’s arrival (Gal.2.11). In Antioch the “Christians” first received that name (Ac.11.26). St. Paul revisited the city in 56 A.D. (18.22).—2. ANTIoch in Pusidia (Ac.13.14.14.19.21; 2Tim.3.11), on the borders of Phrygus (now Yahyach), was also founded by Seleucus I., and was a Roman colonia; also called Caesarea. [c.r.c.]

Antiochian, partizans in Jerusalem of Antiochus Epiphanes, organized by JASON, 4 (2Mac.4.9.16).

Antiochis, concubine of Antiochus Epiphanes (2Mac.4.30).

Antiochus II., king of Syria (261–246 B.C.), is distinguished by the title Oēs bestowed upon him by the Milesians for freeing them from their tyrant Timarchus. He was son and successor of Antiochus I. (Soter). He inherited from his father the war against Ptolemy Philopator, king of Egypt. During this conflict Ptolemy laid waste most of the Western Asiatic countries in dispute, and compelled his adversary to sue for peace. Antiochus was weakened at this time by the revolt of Hyrcania, Parthia, and Bactria, which finally succeeded in throwing off the Seleucide yoke and founding the Parthian dynasty of the Arsacides (c. 250 B.C.). In accordance with the treaty between Syria and Egypt, concluded in the same year, Antiochus divorced his wife Laodice and married Ptolemy’s daughter Berenice, undertaking to leave the throne to the new queen’s firstborn son (Dan.11.6). But when Ptolemy died (247 B.C.), Antiochus sent away Berenice and her infant son and restored Laodice to her former position. Antiochus died in 246, it is supposed by poison administered by Laodice, who instigated her own son Seleucus to murder Berenice and her child at Daphne. To avenge his sister’s murder, Ptolemy’s suzerain, Antiochus V. Darius of Egypt invaded Syria and would have entirely overthrown Seleucus Callinicus had not a revolt in Egypt compelled him to return home (Dan.11.7–9) with much booty. [w.s.t.c.r.]

Antiochus III. (1Mac.1.10), surnamed “the Great,” Seleucide king of Syria (223–187 B.C.), was son of Seleucus Callinicus. When quite young he succeeded to the throne on the murder of his brother Seleucus Ceraunos. Ptolemy Philopator of Egypt was then in possession of Coelosyria and Phoenicia. To expel him thence, Antiochus twice attacked him, and on each occasion pressed forward victoriously as far as Dora, 8 miles N. of Caesarea. On the second occasion a four months’ truce was made, and Antiochus withdrew his forces to the Orontes (Dan.11.10). Hostilities being renewed, Antiochus was again successful (218), overran Samaria and Gilead, drove the Egyptian army back to Sidon, and, advancing still farther, went into winter quarters at Acre. But the tide turned in 217, when he was defeated at Raphia, near Gaza, with a loss of over 10,000 dead and 4,000 prisoners. Peace was then made for a time, Coelosyria, Palestine, and Phoenicia being surrendered to Ptolemy (11.11.12). When Ptolemy Philopator died in 205, Antiochus renewed the war, hoping that the minority of Ptolemy V. (Epiphanes) would enable him, in conjunction with Philip III. of Macedon, to conquer the whole of the Egyptian dominions (11.13). Aided by a party among the Jews, Antiochus seized the three provinces which had so long been the objective in the struggle between Syria and Egypt, but they were soon after recovered by Ptolemy’s forces, owing to the outbreak of a war between Philip and the Romans on the one side, and between Antiochus and Attalus I. of Pergamos on the other. But when Antiochus returned to Palestine, he defeated the Egyptian general Scopas at Panoeas (198 B.C.), and compelled him to sur-
render at Sidon soon afterwards (11.15). The Jews welcomed Antiochus and as their deliverer from rapine. Antiochus was compelled by Roman ambassadors to desist from following up his success by invading Egypt. He accordingly made a treaty with Ptolemy Epi-

phanes, promising to restore to him (at the command of Rome) the Phoenician provinces, but giving them ostensibly as the dowry of his daughter Cleopatra, who became the bride of the Egyptian monarch, and afterwards took her husband's part against her father (11.17).

Antiochus after this crossed the Aegean, gaining certain successes among its islands, and, by the advice of the Aeotolians and Hannibal, declared war against the Romans. Defeated at Thermopylae in 191, he returned to Asia, where the Scipios, with the aid of Eumenes of Pergamos, completely overthrew him at Magnesia (190 B.C.), where he is said to have lost 50,000 killed and 11,000 prisoners. Compelled to sue for peace, Antiochus had to cede all his do-

minions in Asia Minor, surrender his ships, captives, and deserters, and pay an enormous war indemnity to the Romans (188 B.C.).

Partly, perhaps, to raise this money, he next year endeavoured to plunder a temple in Elymais—that of the "Elymaean Jove," says Trogus Pompeius—but was slain in the at-

tempt (11.16). He was succeeded by Seleucus Philopator, his son, and Elymais (11.17). Antiochus IV. (Εὐρώπας), afterwards called in mockery Εὐρούμας (the Maniac instead of the Illustrious) (1 Mac.1.10 ff.), was king of Syria (175-164 B.C.) and second son of Antiochus III. After the battle of Magnesia he was given as a hostage to the Romans for the fulfil-

ment of the terms imposed upon his father; but after the latter was assassinated by the Paretacensians and a plot against the throne was discovered, he was liberated. Antiochus IV. (Philopator), who succeeded him, gave his own son Demetrius as hostage in his brother's stead (175 B.C.) and secured Antiochus' release. Shortly after this (Dan.11.20) Seleucus was murdered by Heliodorus, and Antiochus usurped the throne, to the exclusion of his nephew Demetrius, who enlisted the assis-
tance of Eumenes II. and then of his son Attal-

lus II. of Pergamos to enable him to put down Heliodorus (11.21). It was the policy of An-
tiochus to Hellenize the Jews in religion, manner of life, and language, so as to make Palestine a more integral part of his kingdom. A party among the Jews was only too ready to favour the scheme. Led by Joshua, brother of Onias III., the high-priest, whose office he obtained for himself through bribery, the Hel-

lenizers for a time became supreme in Jerusa-

lem. A gymnasium was erected to train the Jews, as the heathen Greeks were trained, amid heathen surroundings; and their pro-
gress in what was supposed to be enlightenment and liberality of thought was still further displayed by sending deputies and presents to Tyre to the quinquennial games in honour of Hercules. [Hellenist.] In 172 Joshua (who adopted the name of Jason) was sup-

posed in favour of Menelaus, who had offered the king a larger bribe. Antiochus marched against Ptolemy VI. (Philometor), king of Egypt, in 171 B.C., and took him prisoner in 170 B.C. Antiochus then endeavoured to con-

quer the whole country. He unsuccessfully laid siege to Alexandria in 169 B.C. Another campaign in 168 gave, however, every prospect of entire success, until prevented by the ar-
vival of "ships of Kittim"—i.e. the Romans sent Popilius to command Antiochus, under penalty of being declared an enemy of the Roman people, to withdraw from Egypt.

On his return homewards through Palestine he found that Jason and his adherents had de-

posed Menelaus. This gave Antiochus an opportunity of satisfying his army, disappointed in their hope of plundering Egypt. He sent Apollonius with a large force to take possession of the holy city, and punish the Jews for their unruliness. Two years before they had received a severe lesson, when An-
tiochus had plundered the temple and "made a great massacre" (1 Mac.1.24); but now the king resolved to put down the law of God and compel the Jews to conform to the religion and practices of the rest of his dominions. He issued an edict that all should be one people (1.41 ff). All copies of the law which could be found were destroyed, while burnt-offerings and sacrifices in the temple were forbidden. An altar in honour of Jupiter Olympius, probably "the Abomination of Desolation" (Dan.11.31; 1 Mac.1.54), was set up on the altar of God on the 25th Kislev 15, and on the 25th Kislev 25, a heathen sacrifice was offered thereon. But the cause of religious freedom was nobly upheld, first by Mattathias, and, after his death, by his son Judas Maccabaeus, who rose in arms against the tyrant. In the battle of Beth-horon (167 B.C.) Judas utterly defeated the Syrian host under the command of Seron (and Apollonius?), and overthrew an army of 47,000 men under Gorgias near Emmaus later in the same year. In 166 Lysias' army of 65,000 men was defeated at Beth-sura (Beth-zur), after which Judas captured Jeru-
salem and cleansed and re-dedicated the temple. Meanwhile Antiochus had crossed the Euphrates at the head of an army and marched into Elymais. There he attempted to plunder a temple dedicated to Anaitis or Nanea, but was repulsed. He retired to Babylon, and marched thence into Persia, where in 164 he died, having failed in every one of his leading projects. He left the throne to his young son Antiochus Eupator. [Mac-
cabees, The.] Winer, Bibl. Realwörterbuch (cf. Dan.11.27-45). [W.S.T.C.] Antiochus V. (Eupator, 164-162 B.C.), son and successor of Antiochus Epiphanes, was only 9 (others say 13) years of age when he ascended the throne. His father had on
his death-bed named Philip his foster-brother regent and guardian of the young king (1Mac. 6.14f. 55). But Lysias, governor of the whole region between the Euphrates and Egypt, had been previously entrusted with the care of the prince's person (3.2f. 6.17), and now made himself regent. For the struggle between Philip and Lysias for the possession of the young king, and for the war waged by Lysias against the Jews, see Philip 3. Lysias. Finally, Lysias overthrew Philip, but meanwhile Demetrius, cousin of the young king, had escaped from his captivity as a hostage in Rome and landed at Tripolis. His claim to the throne obtained popular support, and he captured and put to death both Antiochus and Lysias in 162 B.C. (1Mac.7.2-4; 2Mac.14.1; Jos. 12 ANT. x. 1; Polyb. xxxi. 19). [w.st.c.t.]

**Antiochus VI.** (1Mac.11.54), king of Syria (145-143 B.C.), surnamed _θέσς_, was son of Alexander Balas by his wife Cleopatra, daughter of Ptolemy Philometor. Brought forward by

---

**APAME.**

### Antiochus VI.

Tryphon (Διοδότος) as a rival to Demetrius II., Antiochus was put to death by the ambitions of the general in 143 while still very young (13.31; cf. 12.39). [DEMETRIUS II.] [w.st.c.t.]

**Antiochus VII.** (1Mac.15), king of Syria (137-128 B.C.), surnamed _Σιδης_ from having been brought up at Sidé in Pamphylia, was the 2nd son of Demetrius I. (Soter), and is sometimes styled _Εὐδοκίς_ (Beneperator) and sometimes _Εὐρηγός_ (the Pious). After the capture of his brother [DEMETRIUS II.] by the Parthians, Antiochus made a treaty with Simon the Hasmonæan, granting him many privileges, among others the right to coin money. He then marched against the usurper Tryphon, who with a small force took refuge in "Dora, which lieth by the seaside" (1Mac.15.11), most of his troops having joined Antiochus. The latter besieged the town by land and sea, and, when Trypho escaped, pursued and overthrew him, recovering the revolted cities which had owned his sway (137 B.C.). Antiochus had meanwhile broken his agreement with the Jews, and demanded the payment of tribute and the surrender of the tower in Jerusalem, which had been in Simon's possession since 141, from which year the Jews dated their freedom from the Syrian yoke. To enforce these demands he sent an army under Cendebeaus to invade Judea. After some slight successes, the Syrians were entirely defeated at Jannia by Judas and John, sons of the aged Simon. The latter with his sons Mattathias and Judas was soon after (135 B.C.) treacherously murdered by a traitor, Tpolemy, son of Abubus, who then sent to invite Antiochus to invade the country. Having nothing further to fear from Tryphon, Antiochus marched against John Hyrcanus, 2nd son of Simon and his successor in the high-priesthood. Besieging him for a year in Jerusalem, he compelled him to surrender and become tributary (133 B.C.), but, fearing Roman interference, granted him favourable terms. Antiochus then turned his arms against the Parthians, John Hyrcanus and a body of Jewish troops accompanying him. The Syrians gained three battles and occupied Babylonia. This induced many provinces of the Parthian empire to revolt and join the invaders. But in 128 Antiochus fell in battle and his army was destroyed. His body was placed in a silver coffin and sent by Phraates to be buried in Syria. Antiochus' defeat and death enabled Hyrcanus and the Jews to recover their liberty. [w.st.c.t.]

### Antipas.—1. Martyr at Pergamos (Rev. 2.13), according to tradition bishop of that place, and martyred under Domitian (Menol. Gr. III. 51).—2. [HEROD.]

**Antipater, son of Jason and Jewish ambassador to the Lacedaemonians (1Mac.12. 16.14. 22).**

**Antipater** (Ac.23.31), a town between Jerusalem and Caesarea, no doubt on the Roman road to the latter seaport. It was built by Herod the Great, in the plain of Caphar-Saba (16 _Ant._ v. 2), at a place with "rivers and trees" (1 Wars xxxi. 9), which does not apply to _Keft Sābē_, though the former passage—perhaps corrupt—seems to identify the two (13 _Ant._ xv. 1). In the Talmud they are distinct, for Antipater was on N.W. boundary of Judaea (Tal. Bab. _Gittin_ 76a; _Sanhed._ 94b), while Caphar-Saba was in Samaria (Tal. _Jer._ _Demot._ ii. 2). The true site appears to be at Rūs el 'Ajin, the source of the river _Aujeh_, at the foot of the hills, on the Roman road to Caesarea, as the following distances indicate:

**Jerusalem Itinerary.**

Lydda (Ludd) to Antipatris, 10 miles (114).

Bether (Tirzah) to Antipater, 9 miles (91).

**Antonine Itinerary.**

Caesarea to Antipatris, 28 miles (30). _Onomasticon._

Galgula to Antipatris, 6 miles (61).

The actual distances (in brackets) are as close as could be expected. Fine springs here gush out under the ruins of the Crusader's castle, Mirabel. The ditch dug from Antipatris to the sea, by Alexander Janannaes (1 Wars iv. 7), probably canalised the _Aujeh_, and Antipatris is here placed "near the mountains," which does not fit Caphar-Saba (Surew. _Pal._ ii. p. 258). [crgc.]

**Antothiha, a Benjamite of the sons of Shashah (1Chr.8.24).**

**Antothite.** [ANETHOTHITE.]

**Anub, son of Coz and descendant of Judah through Ashur the "father" of Tekoa (1Chr.4.8).**

**Anus** (1sd.9.48) = _Bani_, 7.

**Apain,** concubine of Darius, and daughter of the admirable Bartacus (1Esdr.4.29; cf. Josephus, 11 _Ant._ iii. 5).
Aphelies (Ro.16.10), honoured by St. Paul with the designation "approved in Christ." Horace (1 Sat. v. 100) takes Apella as a name of the Jewish household. See Lightfoot, Philippi, note on Caesar's household. [E.R.B.]

Apes (Heb. qophim) are mentioned in iK.10.22. "Once in three years came the navy of Tharshish, bringing gold, and silver, ivory, and apes, and peacocks," and in the parallel passage of 2Chr.9.21. Since peafowl are restricted to the Indo-Malay countries, where elephants and apes (if the latter term be taken to include the species commonly designated monkeys) are also found, there is a strong presumption that "Tharshish" refers to some part of India or Ceylon, unless indeed it be a general term for those countries. This is supported by E. Tennyson, who says that the Tamil names for monkey, elephant, and peacock are identical with their Hebrew titles. On the other hand, as African ivory is now carried from Zanzibar to Bombay and thence re-exported, so anciently peacocks may have been transported from Ceylon or India to the Zanzibar coast, and the later Solomonists' merchants with African ivory and apes or monkeys. A totally different interpretation is given, however, by Paul Haupt (John Hopkins Univ. Circular, No. 163, p. 51, and Proc. Amer. Phil. Soc. xlvi. p. 151, 1907), who claims that Tharshish (or Tarshish) is a Phoenician island in the Atlantic, where men dug dressing of ores, but referring in this instance to the mining district of southern Spain. "Stones of Tharshish," he urges, are crystals of cinnabar from the Spanish mines. Ships sailing from the S. of Spain might obtain apes and ivory from the African coast; but peacocks in this connexion present an apparently insurmountable difficulty; but see also the Tarshish of yet another explanation. [R.L.]

Apharsachites, Apharsites.

Apharsachites, names formed from cities or districts from which colonies had been settled in Samaria by the Assyrian ruler Asnapper (Ex.4.5, 5.6). The first and last have been recently recognized. Asnapper has been identified. Asnapper has been identified with the Assyrian king Assur-bani-bal, but his records contain no names which can be compared with these. [R.G.P.]

Aphek (strong), Apakah (Jos.15.53), Aphik (book), Judg.1.31—1. A royal city in lower Galilee (Jos.12.15), perhaps N. of Jezreel (1Sam.29.1).—2. A town of Asher from which the Canaanites were not driven out (Jos.19.30; Judg.1.31).—3. Noticed with Gebal, now Ajfa, the source of the Adonis River (Jos.13.4).—4. A Philistine camp perhaps near Ebenezere (1Sam.4.1).—5. A city of the mish'er (plateau) of Bashan, now Fiq. E. of the sea of Galilee (1K.20.25,26,30; 2K.13.17).—6. Aphik in the mountains of S.W. of Hebron (Job.15.5). [C.R.C.]

Aphereama (1Mac.11.34), capital of a district added to Judaea about 146 B.C. It is noticed with Lydda and Ramathem; and is supposed to be an alternative reading of Apherem, one of the sons of the servants of Solomon whose descendants returned with Zerubbabel (1Esdr.5.34 only).

Aphra, one of the sons of the servants of Solomon whose descendants returned with Zerubbabel (1Esdr.5.34 only).

Aphi'ah, a forefather of Saul (1Sam.9.1).
had been made to figure as a party leader, in opposition to St. Paul, among the Corinthian Christians, and his reappearance in their city might have revivified that spirit of faction so sternly rebuked in 1Cor. He is mentioned but once more in N.T., in Tit.3.13, where Titus is desired to "bring Zenas the lawyer and Apollos on their way diligently, that nothing may be wanting to them." After this nothing is known of him. Tradition makes him bishop of Caesarea. It has been supposed by Luther and others that Apollos was the author of the epistle to the Hebrews.

**Apollos. [Abaddon.]**

**Apostle. 1. Meaning and usage of the word.** Literally "envoy," derived from Gk. ἀποστόλος, to send on a special mission (Jn.17.18). Christ Himself was the "apostle" of the Father (Heb.3.1). The word was already in use among the Jews for the delegates who collected the tribute for the temple service, and was applied in a similar sense to the apostles charged by St. Paul or the Churches with various commissions, as in 2Cor.8.23, Ph.2.25, and probably Ro.16.7. But the ordinary N.T. application is to the twelve disciples and to those subsequently added to their body—Paul, Barnabas, Silas (and perhaps James, the Lord's brother). Though the name was conferred on the Twelve by Christ Himself (Lu.6.13), it seldom occurs in the Synoptists (once only in Mt. and Mk.), and never in the Fourth Gospel, where they are always called "the disciples." It did not obtain currency at first, hence, distinctively, the apostleship, was in Christ's lifetime the primary function of the Twelve. Late in the 1st cent. the name was assumed by travelling evangelists, and traces of this begin to appear in 2Cor.11.13, Rev.2.2. —II. Call and Training. Restricting the title to the Twelve, we may distinguish in the special instances given us three stages in the association of the apostles with Christ. (1) Their individual acquaintance with Him (Jn.1.35-51). (2) Definite call to follow Him (Mk.1.16-20). (3) Selection of the Twelve from a larger body of followers (Lu.6.13). We next observe the twofold purpose of the selection as given us by St. Luke (Lu.6.13), and the authority of that He might send them forth (ἀποστέλλω) to preach (Mk.3.14). These two clauses summarize the training of the Apostles: (1) the personal influence of close association with Christ, including His teaching by word and act; (2) the mission on which they were sent (Mt.11.1), which could not have lasted long, and must be regarded as chiefly part of the training of their faith, discretion, and courage (10.7,16,31), and as conveying lessons for future endeavours. As the training by association and teaching includes the greater part of the gospel narratives, it is impossible to present a summary of it, but one or two aspects must be given. The wandering life to which they were called (8.19, 20) was necessary in order to detach them from the world. The method of teaching by parables was stimulating to their intellectual life on the spiritual side. The miracles taught them faith in Christ's Person and in His power to work wonders (Mt.4.38-41), to till their metaphorical insight into their thoughts and His calm reproof dealt with wrong tendencies as they arose (9.33,34). On the side of belief they had begun by acknowledging Jesus as the Messiah, but the political conception of Messiahsib which they held in common with the men of their time had to be transformed. St. Peter's confession (Mt.16.13-20) means that a real advance had been made, and of course (Jn.14-16) assume a still greater advance; but the lesson was not completed till they looked back on all that they had heard and seen in the light of the Resurrection. It would be a mistake to regard the training of the Twelve as exclusively the training of missionaries or of rulers of the Church. The apostolic band is rather to be regarded as the nucleus of the Church, to which was to be committed a true conception of the Person, character, will, and work of the Saviour.—III. The Work of the Apostle. Neither the gift of the Spirit by the risen Lord (Jn.20.22) nor that from the ascended Lord (Ac.2.1-4) can be regarded as confined to the Church. But the lead at once taken by it in the administration of the Church needs no proof in detail. More than twenty times in the first half of Acts the apostles are spoken of in the plural as acting in a body, and the new converts described as continuing in the apostles' doctrine (2.42) as the norm of Christian faith and practice. The point which causes surprise is the slowness with which the extension of the apostolic mission beyond Judaism was apprehended, although definitely authorized and enjoined by Christ (Mt.10.1-48; Lu.24.47; 1Cor.3.10; 6.11). It is dealt with elsewhere [Paul], but it leads on to the necessary enlargement of the Apostolic College by the addition of men whose antecedents had prepared them for the work which remained to be done. St. Paul's energetic assertion of his apostolate in 1Cor.9.2, 2Cor.12, Gal.1,2, need not be dwelt on, and indeed it is from him rather than from any of the Twelve that the ordinary conception of the apostolic office is derived, though there is little probability that the work of the Twelve at all resembled that to which he devoted himself. It is to be noticed that as time goes on the idea of the apostles as specially charged with the mission to the Gentiles and the body of the Church as depositaries of authority (Ac.15), and are presided over by one who had not been an original member of the Twelve. [James.] The traditions as to the missionary activity of the apostles of the circumcision are for the most part late and untrustworthy.—IV. Qualification and Privileges. The one essential qualification was to have been a witness of the Resurrection (Ac.1.21); and, comparing 1Cor.9.1 with 1Cor.15.8, this evidently means to have seen the Lord after He had risen. Their function was first of all that of witnesses (Lu.24,48, and so repeatedly in Acts). In this qualification of first-hand witnesses the apostles could have no successors. Other marks of an apostle were the power to communicate the gift of the Spirit (Ac.8.17, 19, 6); to perform miracles (2Cor.12.12); and to found Churches (1Cor.9.12). Churches so founded were called "apostolic," and in the strict sense of the word (Mt.10.43) they were their Master's nobility or gentes (generositas). St. Paul exercised strong disciplinary authority directly, or by
APOTHECARY

delegates, such as SS. Timothy and Titus, over the Churches he had founded. When he claims this authority, he puts forward his apostleship (Gal. 1:1); and a similar claim may be recognized in the epistles of St. Peter and St. John. The apostolate as the foundation of the Church is emphasized in Eph. 2:20 and Rev. 21:14—passages which look back to the Lord’s words to Peter (Mt. 16:18). Sustentation by the Church was an established privilege of apostles (1 Cor. 9:4-7), though this is extended at a later date to the elders (1 Tim. 5:17, 18).

On the name and office of an apostle reference should be made to Lightfoot’s Galatians, detached note on Gal. 1; on the training of the apostles to Latham’s Pastor Pastorum, especially ch. viii., ix., x.; and to Latham’s Training of the Twelve. For the relation of the apostles to the Church, Hort’s Christian Ecclesia should be studied, especially lect. ii. [Bishop; Church.]

Apothecary. The Heb. root (ráqâq) means “to mix ointments or spices”; perfume would therefore be a more correct rendering, which agrees with the context in Ex. 30:25, 35 and the other four passages in which the word occurs. [W.O.E.O.]

Apple. For this subject see Judges. Heb. law made no provision for appeal to a higher tribunal for the rehearing of a cause which had been decided by an inferior one. In N.T. times, when a local Heb. court failed to come to a finding, the cause could be taken before the two lesser Sanhedrins in Jerusalem, and thence if necessary to the Great Sanhedrin, whose decision was final (Mishna, Sanh. xi. 2). [Sanhedrin.] But this did not constitute appeal in the true sense. St. Paul exercised his privilege as a Roman citizen (Ac. 22:25-29) when he appealed from the provincial to the supreme Roman tribunal—Caesar himself (25:11). The magistrate exercised an prerogative to decide whether the circumstances justified an appeal (25:12, 25), but he refused the claim at his peril (Suetonius, Galba, 9). [H.R.]

Apple. A Christian woman (Ph. 2) whose name occurs between those of Philemon and Archippus, probably wife of the former and mother of the latter. Lightfoot has shown that it is a Phrygian name, and, so far, a testimony to the genuineness of the epistle, as her home, Colossae, was a Phrygian city. [E.R.B.]

Ap'phus, “the Dissembler,” a surname of Jonathan the Hasmonean (1 Mac. 2:5), perhaps earned by his feat of 1 Mac. 9:37-41. [C.D.]

Ap'pi Forum, a well-known station on the Appian Way, the great road which led from Rome to the neighbourhood of the bay of Naples. St. Paul, having landed at Puteoli (Ac. 28:13) on his arrival from Malta, proceeded under the charge of the centurion along the Appian Way towards Rome, and found at Apii Forum a group of Christians who had gone to meet him (ver. 15). Its position is fixed by the ancient Itineraries as 43 miles from Rome. Horace describes it as full of taverns and boatmen. This arose from the circumstance that it was at the N.

end of a canal which ran parallel with the road through a considerable part of the Pontine Marshes. There is no difficulty in identifying the site with some ruins near Trepons; and in fact the 43rd milestone is preserved there. [Three Taverns.]

Apple-tree. Apple (Heb. tâppuâh). The tree is mentioned in A.V., in Can. 2:3, 8, 5 and Jl. 1:12, where it is named with the vine, fig, pomegranate, and palm-trees, as withering under the attacks of the locust, palmer-worm, etc. The fruit is mentioned in Ps. 25:17; Can. 2:3 and 7:5. It is difficult to say what tree is denoted by the Heb. tâppuâh. The quince, citron, and apricot have been supported by modern writers. The fragrance of the quince was held in high esteem by the ancients. “Its scent,” says an Arabic author, “cheers my soul, renews my strength, and restores my breath.” The quince was sacred to Venus. Dr. Royle says, “The rich colour, fragrant odour, and handsome appearance of the citron, whether in flower or in fruit, are particularly suited to the passages of Scripture mentioned above.” But neither the quince, citron, nor apple appears to satisfy all the scriptural allusions. The tâppuâh must be some tree the fruit of which is sweet, and possessing fragrant and restorative properties. Neither the quince nor the citron is sweet. As to the apple-tree (Arab. tuffah), travellers assert that its fruit is generally of inferior quality. Moreover, the apple would hardly merit the character for excellent fragrance which the tâppuâh is said to have possessed. On the whole, Canon Tristram decides in favour of the apricot. The citron yields no shade, and the fruit is hard and indigestible. Oranges were unknown sufficiently early, and our apple will not meet the requirements—a term more-
over which was used with the widest latitude. The apricot, a native of Armenia, was probably introduced as early as the vine. The Neapolitan name for it, *crisummmole*, is identical with Pliny’s *chrysometra*, a kind of quince, or golden apple. The apricot is one of the most abundant fruits in Palestine, and like the quince is made into excellent marmalade. There need be little hesitation in accepting it as the “apple,” or *tappūkah*, a word whose root signifies scent.

“There can scarcely be a more deliciously perfumed fruit than the apricot, and what can better fit the epithet of Solomon (Pr.25:11)?” (Tristram, *Land of Israel*). It is right to mention, however, that one competent authority at least (Post) still believes it to be the true apple. Col. Conder also, in our CRITIAL article, says that El Muqqaddasi speaks of “excellent apples” from Jerusalem (985 A.D.).

For “apples of Sodom,” see VINE OF SODOM.

The expression *apple of the eye* occurs in Deut.32:7; Ps.17:8; Pr.7:2; Lam.2:18; Zech.8:3. The Eng. word is the Heb. *tishon*, “little man”—the exact equivalent of Eng. *pupil*, Lat. *pullillus*. [H.C.H.]

**APRON.** [HANDBERCHT.

**Aquila.** A Jew of the province of Pontus (Ac.18:2), who had left Rome when the Jews were expelled by Claudius. St. Paul found him and his wife Priscilla at Corinth, and joined them at once, which implies that they were already Christians. St. Paul worked with them at their trade, the manufacture of tents from the rough Cilician haircloth, a product of St. Paul’s native city of Tarsus. When he left Corinth, they accompanied him to Ephesus, where they remained till his return. For their share in the instruction of Apollos, see APOLLOS. Ac.18:26 confirms the impression given by Ro.16:4, that both at Ephesus and elsewhere the Gentile church owed much to Aquila and Priscilla. Moreover, they had rendered some service to St. Paul in the early days of his mission. There is an allusion to their own lives (Ro.16:4). Hence their names are honoured with the first place in the salutations to the Christians at Rome, to which city they had returned at the date of that epistle. Later we find them again at Ephesus (2 Tim.4:19). Both at Ephesus and at Rome they were active in Christian work, or that she was of higher social rank. Her importance in Roman tradition seems to point to the latter view (Ramsay, *Paul the Traveller*, p. 268). The prominence given to Priscilla accords with the marked recognition of the ministry of women by St. Luke both in his Gospel and in Acts. [DAMARIS.] [E.R.B.]

**Ar, or Ar of Moab.** One of the chief places of Moab (Is.15:1; Num.21:28). In later times the place was supposed to be Areopolis or Rabbath-moab, i.e. the great city of Moab, a site still called Rabbah, halfway between and the Arnon, 10 or 12 miles from each, the Roman road passing through it. The remains are not important. See Deut.2:9,18,29; and also Num.21:15.

**Ara’, son of Jether, an Asherite (1 Chr.7:38).**

**Araab, a city of Judah in the mountainous district of Hebron, mentioned only in Jos.15:52. Probably the ruin or Rabiyoth, 8 miles S.W. of Hebron. [ARABONIT.] [G.R.C.]

**Arabah.** Although this word appears in A.V. in its original shape only in Jos.18:18, in the Heb. text it is of frequent occurrence. It is used generally to indicate a barren district, but “the Arabah” indicates more particularly the valley extending from the slopes of Hermon to the Elanitic Gulf (gulf of ‘Arabah) of the Red Sea. [EDOM.] S. of the Dead Sea the valley retains its old name as Wady el-’Arabah. In Deut.1:28 (A.V. plain in both cases) the allusion is to the southern portion. In Deut.3:17,4:49; Jos.3:16,11:2,12; and 2K.14:25, both the Dead Sea and the sea of Cinneroth (Gennesaret) are named in close connexion with the Arabah. The allusions in Deut.3:28; Jos.11:2,12; 18:2,19; 2K.14:25, 4:7; 2K.25:4; Je.39:4,52:7, become at once intelligible when the meaning of the Arabah is known. In Jos.11:16 and 12:8 the Arabah takes its place with “the mountain,” “the lowland,” “the south,” and “the valley” of Coelosyrria, as one of the great natural divisions of the conquered country. In both cases R.V. reads Arabah. [G.R.C.]

**Arabat tine (1 Mac.5:3).** [AKKABIN.

**Arab'a.** The great peninsula stretching S.E. of Palestine, between the Red Sea and the Persian Gulf, to a length of 1,500 miles, with a width of 700 in the N. and 1,200 in the S., and including the peninsula of Sinai, S. of Beer-sheba. The Arabia of St. Paul (Gal.1:17) is, however, the desert S. of Damascus, which, after 105 A.D., became the Roman province of Arabia Prima, with its capital at Bostra, E. of Bashan. This region had an Arab population yet earlier. The classic division of Arabia included the desert regions *Arabia Felix*, S. of the Yemen (the south), in the S.W. part of the peninsula; *Arabia Deserta*, or the main plateau; and *Arabia Petraea*, or the deserts of Petra and Sinai. The main provinces are now called the Hijaz, or the W. shores and hills, including the trading towns of Mekkah and Medinah, and the centre of Christian worship (see Lightfoot, Col.4:15 note). Prisca (this form is used by St. Paul, and Priscilla, its diminutive, by St. Luke) precedes her husband Aquila in four of the six passages, in which they are mentioned together. This has been explained as implying, either that she was more active in Christian work, or that she was of higher social rank. Her importance in Roman tradition seems to point to the latter view (Ramsay, *Paul the Traveller*, p. 268). The prominence given to Priscilla accords with the marked recognition of the ministry of women by St. Luke both in his Gospel and in Acts. [DAMARIS.] [E.R.B.]

The trading route from the Yemen (Sheba), passing N. to Elath and Petra, appears to have been very ancient; and the traders not only brought myrrh and other products of Arabia, but gold, probably sometimes from Abyssinia, or the exports at Aden. Arabia is first mentioned by name in the time
ABARIA

of Solomon, to whom the "kings of Arabia" brought presents, and whom the queen of Sheba visited, bringing gold, spices, and precious wood (1 K. 10:2,10,15; 2 Chr. 9:1,9,10,14; Ps. 72:15). The gold came from Ophir, in Arabia itself (Gen. 10:29; 1 K. 9:28; Is. 13:12); and Diodorus, shortly before the Christian era, also speaks of gold dug from the ground in S. Arabia (ii. 4). These riches were brought on "camels," no doubt along the Hijâdâh trade route. But Arab sea trade brought also "sweet cane from a far country," as well as incense from Sheba (Jer. 6:20), and Herodotus (iii. 111) also says that the cinnamon in which the Arabs traded came (in 5th cent. B.C.) from some far land—apparently India. Isaiah (21:13) speaks of the thickets of Arabia, and of its "travelling companies," referring (see ver. 11) to the N.W. near Dumah. Jeremiah, again, mentions the "kings of Arabia (25:25), the Phoenicians, the N.W., the Arabian nomads traded with the Phoenicians, and the flocks of Kedar and Nebaioth. In Ezekiel we find the Tyrian trade, about 600 B.C., to have included the sheep and goats of Arabia, and the gold of Ophir—"swine of Cush, and the Arab "nomads" fished out as allies of the Greeks, according to a late account (2 Mac. 12:11), against Judas Maccabaeus, and gave tribute of cattle. In most of these notices the region immediately S.E. of Edom seems to be indicated. St. Paul includes Sinai in Arabia (Gal. 4:25), but the classical writers (Herodotus, in the 5th cent. B.C., and Diodorus, in the 1st cent. B.C.) say that the Phoenicians, who carried them to the Greeks, specifying frankincense, myrrh, cassia, cinnamon (from India probably), and ladanum, or gum-cistus. His account agrees therefore with O.T. usages. The "Semites (the Phoenicians)" are called by the Arabs "nomads" as well, and a sort of a modern Bedawi. The Assyrians, however, penetrated only into the N.W. of Arabia, on the borders of Edom. They attacked Samsi, successor of Zabibe (perhaps "queen" of the Arabs")—capturing 30,000 camels and 20,000 oxen, with the queen, and settling certain tribes there. A certain Hazal from the same region was subject to Esar-haddan, and recovered from Nineveh the images of Arab gods which Sennacherib had captured. Esar-haddan (after 680 B.C.) marched 900 miles from Nineveh into N. Arabia, to the region of Hazu and Bazu (Huz and Buz), which would thus have been not more than 200 miles S. of Elath. He defeated eight local rulers, including Akbar of Nebaioth, Mansaku of Marabanu (perhaps M'arib), Yaphah "queen" of Dedan, and B'aliu "queen" of Idilu (perhaps Uzat, Aushal, though this seems too far S.); and he afterwards received tribute from Yautah (N. Arabia), and obtained an additional fine of 10 manehs of gold, 50 camels, goats, etc. The frequent notice of queens besides kings in Arabia, in this age, agrees with O.T. notices of the queen of Sheba and of the kings of Arabia. In the next reign, when Assur-bani-pal was confronted (about 650 B.C.) by the revolt of Babylon, Yautah and his queen Adiya, joined by the king of Kedar, invaded Edom, Gilead, and Moab, but was defeated by Assyrian generals in Zobah, and deserted by the Nabatean king Nathan. He and his queen were taken as prisoners to Nineveh. Other Arabs had marched to Babylon to aid Samsu-sun-ukin, the revolt of his brother Assur-bani-pal, and perished (in 648 B.C.) in the siege, by famine after a vain sally. Yautah II., nephew of the former Yautah, joined by Nathan the Nabatean, raided the Assyrian borders a little later; and Assur-bani-pal marched 700 miles from Nineveh to the desert to confront them, but an Assyrian employ only brings us to the Nabatean country.
ARABIA

near Edom. The Assyrians suffered from thirst, but took many captives back to Damascus. After these events we hear nothing of Arabia—excepting the deserts E. of Edom and Gilead—until the Roman age. Aelian Gallus (in 24 B.C.) conducted an unsuccessful attack on the Sabeans. The Arab sea-trade had prospered under the Ptolemies, and the Sabeans were celebrated for their wealth (see Horace, Odes i. 29; ii. 12; iii. 24); their power extended not only over the Yemen, but also into the low-lands of Abyssinia. They became the great carriers of the East in our 2nd cent., trading with India, and with Africa down to the Zambesi. The power of the Himyarites, or Sabeans, continued till about 522 A.D., when they became subject to the Arab kings of Axum in Abyssinia. Arabia was included in the Persian empire of Chosroes I. (about 541 A.D.), and Mecca was unsuccessfully attacked by an Arabian army with elephants in 570 A.D. Arabia became finally a free country under Muhammad in 630 A.D., though afterwards owing allegiance to Egypt and to the Turks.—Antiquities. The study of ancient Arabian inscriptions began with the discoveries of S. Seetzen in 1810. Halevy in 1860, and Doughty in 1875. Glaser added 1,000 texts, from M'arib and elsewhere, twenty years later. [Writing.] But none of these records appear to be of very high antiquity. The Assyrian and Greek influences are visible in the names and in the alphabet of the N.W.; and Doughty's texts, from M'adin and farther S., are in an Aramean alphabet probably not older than 500 B.C. The coins and texts of the Sabeans, as far as they can be dated, belong to the 3rd cent. B.C., and those discovered by Glaser in Hadramaut and at M'ain are possibly quite as late. The Sabeans were ruled, it appears, by kings, who called themselves by the title magrib (suppliant) on votive monuments, and "kings of Saba"; as late as the 6th cent. A.D. they were still styled "kings of Saba, Dhu-Raidan, Hadramaut, and Yamnat." The Sabeans and the Himyarites of M'arib or of Obodin in the N. fought on another; and one interesting text refers to a Minean king, Abiyad'a, as having a governor in Musrân (Egypt). A king so named was set up by Assur-bani-pal about 648 B.C., and even Tiglat-pileser III. made an Arab chief a governor in N. Egypt. The wars between Yawnaat and Shammat (the south and the north), and the hosts of "Saba and Khawilân" [Havilah], are noticed in a votive text in honour of Athtar (Istar), set up by M'ân traders (Halevy, 555 and 578), who led caravans from Egypt to Assyria and the regions "beyond the rivers." This record has been supposed to be as late as 525 B.C. In others a trade with Egypt in incense is said to have taken the route to Gaza.—Religion. The Arabs worshipped many gods, symbolized by rough stones. The chief deity was Aumo, the god of "heath," whose name is found not only in E. Arabia and S. Sabaeans, but also in Abyssinia, but even in Gk. texts of Bashan set up by Ghasán Arabs there settled. Samsi, the "sun," was female, the 'Athtar (Istar), "the moon," was male in Arabia. In Hadramaut the latter was adored with Nebo and Sin (Babylonian gods). The Assyrian texts speak of Adar-Samaín as a supreme Arab deity, and among others were Nirs (Eagle), Al-makh, and the goddess.) In the Korán many Arab idols are named, and others by Herodotus, the chief goddess being Allât or Luit, who is mentioned in S. Arabian texts. [c.r.c.]

Arabians, the nomadic tribes inhabiting the country to the E. and S. of Palestine. Their roving pastoral life in the desert is alluded to in Is.13.20; Je.3.2; 2Mac.12.11. [ARABIA.] During the prosperous reign of Jehoshaphat, the Arabians, in conjunction with the Philistines, were tributary to Judah (2Chr.17.11), but in the reign of his successor they revolted, ravaged Judah, plundered the royal palace, slew all the king's sons with the exception of the youngest, and carried off the king's wives (2Chr.21.16,17,22.1). The Arabians of Gur-baal (Mehumins from M'adin in Edom) were again subdued by Uzziah (2Chr.28.7). They were among the foremost in hindering Nehemiah in his work of restoration, and were held in dread by the Aramounites and others (Ne.4.7). Geshem, or Gashnu, one of the leaders of the opposition, was of this race (Ne.2.19,6.1). In later times the Arabians served under Timotheus in his struggle with Judas Maccabaeus, but were defeated (1Mac.5.39; 2Mac.12.10,11). The Zabadeans, an Arab tribe of the province of the mountain of Anti-Taurus, were the brother and successor of Judas (1Mac.12.31). Zabdiel, the assassin of Alexander Balas (1Mac.11.17), and Simacele, who brought up Antiochus, the young son of Alexander (1Mac.11.39), afterwards Antiochus VI., were both Arabians.

Arad, a Benjamite, son of Beraiah, 3 (1Chr.8.15).

Arad (Jos.12.14), a royal city of the Canaanites, in the negeb region (Judg.1.16). In Num.21.1,33.40 "the Canaanite king of Arad" (see R.V.) is noticed. It is mentioned in the Onomasticon as 4 miles from Malatha, and 24 miles from the ruined town 17 miles S. of Hebron, and 7 miles N.E. of el Milh or Malatha. [c.r.c.]

Arados (1Mac.15.23) = Arvad.

Arah,—1. An Asherite, of the sons of Ulla (1Chr.7.30).—2. The sons of Arah returned with Zerubbabel (Ezr.2.5; Ne.7.10). His descendant Shechaniah was father-in-law of Tobiah the Ammonite (Ne.6.18).

Aram (highland), Gen.10.22. The name in Heb. of the high regions of Lebanon and the Taurus (Syria in A.V.) and of the hills in N. Mesopotamia, called more especially Aram-naharah (Gen.21.10, see R.V. marzq), or "highland of the two rivers"—the Euphrates and the Tigris. The Syrian Aram included petty kingdoms called: (1) ARAM-ZOBAH, or Zobah (1Sam.14.47; 2Sam.8.3; 1Chr.18.5, 19.6; Ps.60. title), mentioned (as in Assyrian texts also) with Damascus, and extending N. in the Anti-Libanon along the trade route of Tadmor; (2) ARAM BETH-REHOB, or Rehob (2Sam.10.6), noticed with the preceding; (3) ARAM-MAACHAH (1Chr.19.6), or Maachah (2Sam.10.6), apparently including
ARAMITESS

Hermon; (4) Geshur "in Aram," near the preceding (Deut.3.14; Jos.13.11,13); (5) Aram of Damascus (2Sam.8.5,6; 1Chron.18.5,6), all these, "Syrian principalities," lying close to the land of Israel on the N.E. In the roth cent. B.C. they owed allegiance to Damascus (1K.20.1), and were allied a century later to oppose the Assyrians. Even c. 1000 B.C. the king of Damascus ruled Aram (1K.11.25, see 15,18), for "the head of Aram is Damascus" (Is.7.5). The Assyrians are, however, also called Arameans (Je.25.11), and their language Aramean (2K.18.26; Is.36.11). The family of Laban (Gen.25.20) belonged to the Arameans of Padan-aram, "the highland" (1Sam.28.2) or "the East" (29.1,4; Deut.20.5). In early Egyptian accounts, and in the Amarna letters, Naharina is often mentioned, referring to Aram-naharaim, otherwise rendered Mesopotamia (Judg.3.10) in A.V. As a personal name Aram occurs (1Chron.7.34) for a son of Asher, and in N.T. (Mt.1.4; Lu.3.33) for Kam. But "the father of Aram" (Gen.25.21) appears to mean the ancestor of the Aramean family in Haran (Gen.11.31), and their language Aramean (2K.18.26; Is.36.11).

ARAMITESS, a female inhabitant of Aram, the mother of Machir (1Chron.7.14). [ARAM]

Aram'nahara'im (Ps.60, title). [ARAM]

Aram'-zobah' (Ps.60, title). [ARAM]

Ar'an, a Horite, son of Dishan (Gen.36.28; 1Chron.1.42).

ARARAT, a mountainous district in Asia, mentioned as the resting-place of the ark after the Deluge (Gen.8.4); as the refuge of the sons of Sennacherib (2K.19.37; Is.37.38; A.V. Ar'menia); and politically as the ally of Minni and Ashkenaz. The name is exceedingly ancient, the Assyro-Babylonian syllabaries giving it as Ur'tu, and the later Assyrian inscriptions as Urartû. In the Ararodians of Herodotus (iii.94) the first r has become l. Moses of Chorene gives the name of Araratia to the central province, but in O.T. it stands for the Armenian highlands in general—the lofty plateau overlooking the plain of the Araxes on N. and Mesopotamia on S. This district has an elevation of 6,000 or 7,000 ft. above sea-level. From its extensive plains spring other lofty mountain-ranges, having a generally parallel direction from E. to W., and connected by transverse ridges of moderate height. Both plains and mountains give signs of volcanic activity. As Armenia has the peculiarity of expanding into plains or steppes, separated by graduated subordinated ranges, it is far more extensive, both from its own limits, than other districts of similar elevation. The Araxes, which flows into the Caspian, rises W. of either branch of the Euphrates, and at first runs N.; the Euphrates, which flows S., rises N. of the Araxes, and takes a westerly direction, indicating that the fall of the ground in the centre of the plateau is not decided in any direction. The winter (Oct. to May) is severe, and is succeeded by a brief spring and a hot summer. Pasture is abundant, and wheat, barley, and grapes ripen at high altitudes, the vine being indigenous in the country. There are various statements as to the spot where the ark rested. Berosus the Chaldean sets it in the mountains of the Cordyceans or Kurds (Josephus, Ant. iii. 6), and Nicolaus Damascenus states that a mountain named Baris, beyond Minyas [Minni], was the spot (ib.). Baris is given more correctly as Lubar in the book of Jubilees, and was the boundary between Armenia and Kurdistan. In the Babylonian Flood-story, and according to the Chaldean, Assyrian, and Aryan versions, the ark was landed on a mountain near the Tigris. Berosus places it on a mountain in Assyria, and Origen states that the Ark was brought to Ararat, that is, down the right bank of the Araxes. This district is high and mountainous, and overlies lower steppes. Some geographers have made the extreme height of the Araxes to be 13,500 ft., but it is more probably 17,000 ft., if we follow the more ancient and modern writers. The district is about 300 miles in length, and 20 miles in width. It is divided into upper and lower Araxes. The higher is covered by eternal snow for about 3,000 ft., and is of volcanic origin. Regarded as inaccessible, it was first ascended by the German Prof. Parrot in 1829 from N.W. He described a secondary summit about 400 yds.

ARARAT

VIEW OF ARARAT, W.D.A.
from the highest, and surmises that the ark rested on the gentle depression which connects the two. Below the snow-line there is a barren and lifeless region. Arugil, the only village of the two, is situated on a small slope, which is the traditional spot of Noah's vineyard; Nakhibtevan, his reputed burial-place, is lower down, on the plain of the Araxes—History of the Tract. According to Sayce, the introduction of the cuneiform syllabary into Armenia was due to the northern campaigns of Assur-nasir-apli and his son Shalmaneser II. in the 9th B.C. In 880 B.C. the latter attacked Arame, king of Ararat, and captured the city Sugunia, and in 556 B.C. defeated him again at Arasaktu, his royal city, which was destroyed. Pictures of the campaigns of Shalmaneser II. in Ararat are given on the bronze gate-coverings discovered by Mr. Rassam at Halawat (see The Bronze Ornaments of the Palace-gates of Balawat, strips A, B, G). In 833 B.C. Shalmaneser sent his general against Sedur (Sarduris I.), who, as he calls himself, the son of Lutipris, seems to have been the founder of a new dynasty. He was succeeded by Ispuinis, who associated his son Menuas with him on the throne. The latter was a great conqueror and builder, claims to have fought with and defeated the Hittites. Argistis I., his son, followed in his footsteps, and states that he fought with the Minni and defeated the Assyrians. His son, Sarduris II., followed him, and continued the conquests of his predecessor. Tiglath-pileser III., seeing him a dangerous enemy, invaded his country and penetrated to the gates of Turuspa (Tus- pas or Van). Ursas (Rusas I.) tried to make headway against the Assyrians, but killed himself in despair after Sargon captured Musa- sir, whose ruler, Urzana, had trusted to Ursas for protection. His successor was Argistis II., under whom the country prospered, as also in the time of Erimenas, to whose court the sons of Sennacherib fled after assassinating their father. His son was Rusas II., who built a great palace at Van adorned with various works of art. Sarduris II. made alliance with Ashur to defend against the Cimmerians and Scyths probably brought about the fall of the old dominion, and led to the rise of the Aryan Armenians, who, according to Herodotus (vii. 73), were Phrygian settlers. The district of Ararat was conquered by Cyrus in 546 B.C., after which there is no history in the true sense of the word. A prince named Tigranes (?) ruled in the time of the Parthian dynasty in Babylonia. See Sayce, s.v. in Hastings, D.B. (vol. i. 1890). [T.G.P.]

Ararat (Tob.1:21) = Ararat.

Ararath, a Jebusite who sold his threshing-floor on mount Moriah to David as a site for an altar to Jehovah, together with his oxen (2Sam.24.18-24; 1Chr.21.25). His name, written Ornman in 1Chr.21.15ff., 2Chr.3.1, has even more variants in the Heb. [Temple.]

Arba = (Jos.14:15,15:13,21:11), Arba' (Gen.35:27; R.V. Kiriaith-arba). [Hebron; Kirjath-arba.]

Ar'batith', The, probably a native of the Ar'ahain. Abiahillon (= Abiel; 1Chr.11.32) the Arbatith was one of David's mighty men (2Sam.23.31).

Ar'bat'is, a district of Palestine (1Mac.5.23 only), perhaps a corruption of Abratbatine, the district or toparchy S.E. of Shechem near the present village 'Aqrah. [C.R.C.]

Ar'bel, mentioned in 1Mac.9.2 only, as defining the situation of Massoth in the district, was taken by Bacchides. According to Josephus (12 Ant. xi. 1), this was Arbele of Galilee, a place remarkable for impregnable caves, the resort of robbers and insurgents (14 Ant. xv. 5). The topographical data are fully met by the existing Irbid, a site with a ruined synagogue W. of Mejdel, S. of Wady Hamaim, in a small plain at the foot of the hill of Qurn Hallin. The caverns are in the opposite face of the ravine, and are called Qur'at 'Ibn M'am. [Beth-Arbel.] [C.R.C.]

Ar'bithe, The. Paaraht the Arbithe was one of David's guard (2Sam.25.35). The word signifies a native of Arab.

Arbo'na, River of (Jb.7:24). The Vat. MS. reads Abrona; apparently the Khabur river [Harbor] is meant. [C.R.C.]

Archangel. [Angel; Arch.]

Archelaus, son of Herod the Great by Mal-thake, brought up at Rome with his younger brother, was given the title of king, which will gave him the largest and most valuable share of the Herodian dominions, including Judaea, Idumaea, and Samaria, with the title of king. The ratification of the will was dependent on the decision of Augustus, to obtain which Archelaus went to Rome. A Jewish embasssy devoted to the purpose of delivering them from such rulers as the Herods, and to annex Judaea to the province of Syria. Doubtless the journey of Archelaus, and the embasssy sent after him, suggested the similar features in the parable of the pounds (Lk.19.12ff.). Augustus confirmed the will, but gave Archelaus the title of ethnarch only. The words "did reign" (Mt.2:22) are used loosely, and need cause no difficulty, for Josephus also speaks of him as king. His reign lasted till 6 A.D., when another deputation from Judaea and Samaria went to Rome to complain of his cruelties. The emperor condemned him, and sentenced him to banishment, and at Cheriopolis where he died. [E.R.B.]

Archer. [Arms.]

Ar'ch'evites, evidently inhabitants of Erecus who had been placed as colonists in Samaria (Ezr.4.9).

Arch! (Jos.16.2), whence Hushai, David's friend, was called "the Arche" (2Sam.15.32; 17.5,14; 1Chr.27.33). The "border of Ha-Archi" lay between Bethel and Beth-horon. The name survives at 'Ain 'Ark, 2 miles N.E. of the latter, though the Heb. aleph (as in the case of Ashkelon, etc.) becomes a guttural 'ayin. [C.R.C.]

Archip'azar, a Christian teacher in Colossae (Col.4:17), called by St. Paul his "fellow-soldier" (Ph.2). As this last-quoted epistle is addressed to him jointly with Philemon and Apphia, it seems probable that he was a member of Philemon's family. There is a legend that he was one of the Seventy, and suffered martyrdom at Chenchai near Laodicea, but it has no historic weight.

Archite. [Arch.]

Architecture. The first notice of building style in O.T. (Gen.11:3-9) refers to a tower of
ARCHITECTURE

burned brick set in bitumen [Babel, Tower of].

The Phoenicians aided as masons and carpenters (rK.5.6, 18b). The Hebrew
mon's Temple and Palace, and the description
of these buildings (rK.6.7) shows that they resembled in style the contemporary
architecture of the Phoenicians, Hittites, and
BABYLONIA,
concerning large and
together with forests of palm-trees. Ivory seems
also to have been often used in decoration (rK.
10.8, 22.39; Am.3.15); lions and oxen were represented as well as the
Cherubim (rK.6.23-36), just as they are in Phoenicia and BABY-
LONIA.
The temples of this age throughout Pal-

estine present rock pillars in their porches with Doric and Ionic capitals, triglyphs forming a frieze above, while vine boughs and other designs of native origin give a mixed character to this

architectural style. The art of the later
BABYLONIAN coins is, similarly, half Greek, half Egyptian, and some architectural
works attributed to his temples, the finely
squared masonry being drafted after the
Greek fashion, and the stones being 3 to 6 ft.
high, and sometimes 40 ft. in length (Mk.13.2; Lu.
21.5). He used the arch in building the great
Tyreooen bridge; and at the Double Gate on S.
side of the Jerusalem temple, the gatehouse
has four flat domes supported on two pillars
6 ft. each in diameter. Their capitals are of
simple, semi-Egyptian design, and one dome is adorned with geometrical patterns in
low relief, connected by a vine, such as also
surrounded the Great Gateway of the temple both at Jerusalem and at S' Conversion. The latter site the pillars are of semi-Corinthian
style, like those of the royal cloister at Jeru-

salem (Josephus, 15 Ant. xi. 5). The vet
larger masonry at B'alheek, Gerasa, and Râ-
mei el Khilil (Abraham's tank) near Hebron,
differs entirely in the tooling of the stones,
and was used in the design of its capitals and
and in each case belongs to the great age
of ROMAN architecture (2nd and 3rd centuries A.D.).
The latest Jewish buildings—in Grco-Roman
style—are the Galilean synagogues, which are
also probably not older than 2nd cent. A.D.
The B'alheek masonry is marked with Gk.
letters, while that of Herod has Hebrew ma-
sions' marks.

The Hebrew style is best illustrated by the
plates of de Voglié's Temple de Jerusalem, and by those giving the details of the
St'a temple by the same authority. [c.r.c.]

aretas.
The Heb. words 'âsh and 'ayish, rendered "Aretarus" in A.V.
of Job 9.9, 33.32, as in the Vulg. of the former
case, and are now generally believed to be
identical, and to represent the constellation Ursa Major, known commonly as the Great
Bear, or Charles's Wain. Niebuhr (Desc.
de l'Arab. p. 101) relates that he met with a
Jew at San'âa, who identified the Heb. 'âsh with the constellation known to the Arabs
by the name Unm en-n'ash, or 'N'ash simply,
as a Jew of Bagdad informed him.
The four stars in this constellation are the Bear of the name are
in the tables of Ulugh Bey, those in the
tail being called el Benât, "the daughters"
(cf. Job 35.32). The ancient versions differ
greatly in their renderings. The LXX.
render 'âsh by 'Ayish, the Vulg. by 'Hesperus' (unless the text which they had before them
had the words in a different order), and 'ayish by "Hesperus," the evening star, in Job 38.32.
In the former they are followed or supported
by the Aram., in the latter by the Vulg.
R. David Kimchi and the Talmudists under-
scored by 'âsh, which is the old Syrian name of the Bull, by which they are supposed to
designate the bright star Aldebaran in the
Bear's eye. But the greatest difficulty exists in the rendering of the Syriac translators,
who give as the equivalent of both 'âsh and 'ayish the word Iyyyyáth, which is inter-
preted to signify the bright star Capella in the
constellation Auriga, and is so rendered in the
Arabic translation of Job. On this point,
however, great difference of opinion exists.
Bar 'Ali conjectured that Iyyyyáth
was either Capella or the constellation Orion;
while Bar Bahlul hesitated between Capella,
Aldebaran, and a cluster of three stars in the
face of Orion. For the Great Bear, the name of the
Arabic, Hyde was induced to consider 'âsh and 'ayish distinct; the former being
the Great Bear, and the latter Capella, the
brightest star, a, in the constellation Auriga.

Arad, a son (Gen.46.21) or grandson (Num.
26.49) of Benjamin. In 1 Chr.8.3 he is called
Addar (LXX. Ared).

Aradath (the field called Aradath): (2 Esd.9.
26). Unknown, but suggested to be a cor-
ruption of 'Arabath, "desert," indicating the
condition of the land (cf. 10.21, 22). [R.G.P.]

Arádates, descendants of Ar (Num.26.49).

Ardon, a son of Caleb ben Hezron by his wife
Azubah (Num.35.24).

Arel', a son of Gad (Gen.46.16). His des-
cendants are called Arelites (Num.26.17).

Arepoegate', a member of the court of
Areopagus. The title is given to Dionysius
(Acts.17.34). [Mars' Hill.]

Ares (1 Esd.5.10) = Arab. 2.

Aretas, the name of one of the kings of the Aramaic
(Harith) of several
kingdoms of the Nabatean Arabs.—1. A contem-
porary of Antiochus Epiphanes (2 Mac.5.8).—2.
"Aretas the king" (2 Cor.11.32), whose ethnan
(governor), at the instance of the Jews (Ac.9.
Aretus I., king of Sparta 309-265 B.C., wrote, at some date between 309 and 300 B.C., to Onias I., high-priest 323-300 B.C., a letter which is quoted in the letter sent by Jonathan Maccabaeus to Onias c. 144 B.C. (1 Mac. 12:7-20:23). [Sparta.]

Argob', a tract of country E. of Jordan, in Bashan, containing 60 great and fortified cities. Argob was allotted to the half-tribe of Manasseh, and was taken possession of by Jair, a chief man in that tribe. It afterwards formed one of Solomon's districts under the charge of an officer whose residence was at Ramoth-gilead (Deut. 3.4,7,13: 1 K. 4.13). Argos means "stone heaps." In later times it was called Trachonitis, or "basalt region"; and it is now called the Lejeh, from a local word for "basalt." It is a very remarkable district, S. of Damascus, about 22 miles from N. to S. by 14 from W. to E., and of a regular, almost oval, shape, described as an ocean of basaltic rocks and boulders, tossed about in the wildest confusion, with fissures and crevices in every direction. But this, forbidding region has many ages, solidly built and of considerable antiquity. More than 100 Gk. texts have been copied here. [C.R.C.]

Ariel (2 K. 15:25). Probably a place. [Arie.] Jarchi regards both words as local. Perhaps Râjîb, a village 2 miles S.E. of Shechemo. [C.R.C.]

Ariadi', ninth son of Haman (Esth. 8:9).

Ariamãthes V. (Philopator), king of Cappadocia 163-130 B.C. For his obedience to Rome he was expelled by Demetrius Soter, 158 B.C., but he was presently restored. Letters were addressed to him from Rome in favour of the Jews, 139 B.C. (1 Mac. 15:22).

Aristarchas', sixth son of Haman (Esth. 9:8).

Arieh (Heb. haârâch = "the lion"; 2 K. 15:25). The LXX., in here describing the murder of Pekahiah by Pekah, reads µετὰ τâ τινι before both Argon and Arieh, which suggests the translation "they slew him in Samaria, at a castle—a king's house—near Argob, and near the lion monument." [C.R.C.]

Ariel. The etymology of the word is uncertain.—1. The name of one of the chief men among the returning exiles (Ezr. 8:16).—2. "The two sons of Ariel of Moab" (R.V.) whom Beniah smote (2 Sam. 23:20; 1 Chr. 11:22; see LXX. In A.V. "lion-like men"); see Moab. —3. Applied to Jerusalem (Is. 29:2,1,2). The city, which has been designated Ariel (ver. 1) is then compared to Ariel (ver. 2), perhaps with reference to the blood that would be shed in the coming siege. In this respect the city would be as—4. The Ariel of the Altar (Ezk. 43:15,16, see R.V. marg.), the altar hearth on which the sacrifices were consumed by fire. Hence some translate No. 2 as "the altar hearths of Moab." It has also been suggested that the Ariels were altar-pillars on which sacred fire was fed by the fat of sacrifices. In the Mesha inscription, line 12, the Aral is something movable. Fire hearths on the top of monoliths have been found in Assyria (Theodore Bent, Sacred City of Ehiophiæns, 180 ff.). In the first dynasty of Egypt the serpent, an object of popular worship, appears as a fender around the hearth (Petrie, Relig. of Anc. Egypt, 21, 26). The derivation "lion [lioness] of God" has been suggested. See also Smith, Relig. of Semites, i. 469; Toy, Excav. in Sacred Books of O.T. 191; Sayce, Higher Crit. and Mon. 349, 376. [H.T.]...
ARK, NOAH'S

(Ro.16.10.) St. Paul salutes "them which are of the household of Aristobulus" (tois ek tov 'Aristoboulov). Lightfoot (Philippians, p. 175) surmises that this Aristobulus was the grandson of Herod the Great, and friend of Claudius. Assuming that Aristobulus died shortly before the epistle was written, it would be usual that his household, which would contain many Jews, should on passing to the emperor retain their former master's name. See also Sanday and Headlam, Romans, p. 425. Aristobulus is said to have been one of the Seventy, and is mentioned as bishop in Britain. [J. A. D.]

ARK, Noah's.

ARK of the COVENANT (Ex.25.10-15, 37. 1-5). (1) Names. The ark; the holy ark (2 Chr.35.3); ark of the Lord; of God; of the testimony; of the covenant; of the covenant of the Lord. (2) Structure. A chest 2 ½ cubits long by 1 ½ broad and deep; of acacia wood, overlaid inside and out with pure gold; a moulding of gold round the top; four gold rings, one at each "foot" or corner, through which were passed two staves of acacia wood overlaid with gold, used in carrying it. These staves were not to be removed (but cf. Num.4.6), and in the temple of Solomon were seen from the Holy Place, but not from the entrance to the Tabernacle (1 K.8.8), probably when the veil was drawn aside for the high-priest to enter the Holy of Holies. The ark was made by Bezaleel (Ex.37.1), after the pattern shown to Moses in the mount (25.9). According to Deut.10.3 Moses made an ark of acacia wood before ascending the mount to receive the second copy of the Decalogue. It was consecrated with the holy anointing oil (Ex.30.26), and stood within the Holy of Holies (40.3). When the tabernacle was taken down, Aaron and his sons covered the ark with the veil of the screen, then a covering of sealskin (R.V.), and over all a cloth of blue (Num.4.5-6). The carrying of the ark devolved on the Kohathites (4.4). It was a complete coffer, on the top of which was placed a plate or slab of gold of the same length and width as the ark. The thickness is not specified (Ex.25.17-21, 37.6-9). The Heb. term for this covering is rendered "mercy-seat" in E.V.; R.V. marg.

"covering"; "propitiatory" is better. (Hamberger, Realencyclo. des Judentums, i. 190, "Sühndeckel"). LXX. ἄποστράφων, occurs also in Heb.9.5, R.V. marg., Gk. "the propitiation." On the Day of Atonement the high-priest sprinkled the blood of the bullock and of the goat on the Mercy-seat (Lev.16.14,15). On this golden slab were fixed two cherubim, one at each end (Ex.25.18-20, 37.7-9). They were of pure gold, of beaten work, and faced each other, their wings meeting above. This was the throne from which Jehovah would speak with Moses (Num.7.89). (3) Historical Notices. At the river Jordan (Jos.4.7) and the siege of Jericho (6.14). In the midst of the congregation when the Law was read at Ebal and Gerizim (8.33); tabernacle set up at Shiloh, 18.1. In Bethel at the time of the battle between Israel and Benjamin at Gibeah (Judg.20.27). In Shiloh (1 Sam.3.3); taken into the battle with the Philistines at Ebenezer (4.5); captured (4.11), and set up in the house of Dagon at Ashdod (5.2); sent to Gath (5.3) and Ekron (5.5); in the temple, as shown by Manasseh when returned by the Philistines, on a cart, with a coffer containing presents of golden mice and tumours (6.8). Men of Beth-shemesh smitten for "looking into the ark" (6.19); 20 years in the house of Abinadab at Kirjath-jearim (7.1,2). With Israel at Gibeath during the war with the Philistines (1 Sam.4.2; 7.3). Taken by the Philistines, as LXX. has "ephod" for "ark"; cf. 1 Chr.13.3, "We sought not unto it [i.e. the ark] in the days of Saul"). David had it taken thence in a new cart; Uzzah was smitten by God for touching the ark (2 Sam.6.6,7). Three months in the house of Obed-edom the Gittite (r.10, 12). Carried by David (r.16, 15.2) into the city of David (2 Sam.6.12) and put in the tent prepared for it (ver. 17). With the army at the siege of Rabbah (11.11). David would not permit the ark to be carried with him when he fled before Absalom (15.24-29). Solomon had it placed in the Holy of Holies in the temple (1 K.6.19, 8.6; 2 Chr.5.7). It was probably removed by Manasseh when he set up the idol (2 Chr.33.7); restored by Josiah (35.3). Its ultimate fate is not known, but it probably perished when the temple was destroyed by Nebuchadnezzar (2 K.25.9). There is a legend that Jeremiah hid the ark with the tabernacle and altar of incense in a cave on mount Libanus (2 Chr.36.19; mentioned Eze.3.16; Ps.78.61,132.8; cf. Rev.11.19). There was no ark in the second temple (Josephus, p. 5 Wars v. 5). (4) Purpose. It was the receptacle for the two tables of the law (Ex.25.27, 40.20; Deut.10.2; cf. 1 K.8.9); and in a special sense the dwelling-place of Jehovah (Ex.25.8; 1 Sam.4.4; 2 Sam.6.2; 1 K.8.12). Hence it was more than a symbol of the presence of Jehovah; He was personally present in it. "Let us fetch the ark ... that it may come among us and save us out of the hand of our enemies" (1 Sam.4.3). It was consulted by the Israelites after their defeat by Benjamin at Gibeath (Judg.20.27); Saul was too impatient to consult it before engaging in battle with the Philistines (1 Sam.14.18,19; cf. 1 Chr.13.3). Joshua lamented before it after the defeat at Ai (Jos.7.6-9); and Solomon worshipped before it (1 K.3.15). In form it resembled the movable shrines in which the Egyptians, Babylonians, and Assyrians set up their idols. According to Heb.9.4, the ark contained, besides the two tables, Aaron's rod

meaning of the Heb. (naphaq), "to shatter," sufficiently explains its use. (2) Next in age would be the Slǐg (Judg. 20.16; iSam. 17.40; 2 Chr. 26.14). Besides being a weapon for war, it was used by shepherds, as well as hunters. Its use was fairly general among the Egyptians, Persians, and Greeks employed it in warfare. It was made of the sinews of animals, or of leather, sometimes also of the hair of animals plaited together, and was sometimes fastened by thongs, in length. In the centre it was broader than at the ends. When about to be used, a stone was placed in the centre, and the slinger took hold of the two ends and swung it round over his head a few times, and then let go of one end. (3) Next in order of antiquity comes the Spār (Job 18.4), for two distinct kinds. First, the bānuś. Another word for spear is rōnǎh (called "lance") in 1 K.18.28, A.V., and "javelin" in Num. 25.7, A.V., while R.V. uses this latter term more suitably for the kīdōn, but the difference between these two is unknown. That there was a difference appears from 1 Chr.12.35, 34, 34, according to which the men of Naphthali used the former, those of Judah and Gad the latter: the Arab. rumāk is a lance 15 ft. long. The spear consisted of a wooden shaft (2Sam. 21.19), with a bronze (later, iron) point fixed into it (1Sam.13.19). On account of the bright metal, when polished, it was called a "flame" and "lightning" (see above, Nat. 3, Htrv). The other kind of spear was shorter, and was used for throwing (Jgs.6.18). This was called kīdōn. Of similar character was the shekāl, the root of which word shows that it was something that was thrown; but otherwise we know nothing of its use. It was probably only another name of spear. (2Sam. 22.35 = Ps.18.34), for which was made of iron (1Sam.13.19; Is.2.4). It was straight, and sometimes two-edged (Judg.3.16). It was apparently carried in a leather sheath (cf. Ex.15.9; Ezk.21.28-30), and fastened to a girdle on the left-hand side (Ex.35.27), outside the apparel (1Sam.17.39). It was used for both offensive and defensive purposes (Job 20.24). In Jth.13.6 A.V. uses the word fauchion, probably a curved sword (Pers.). (5) The Bow (gesheth) and Arrows (hīṣṭām), carried in a Quiver (āshpāh), formed with spear and sword the commonest offensive weapons. Bows were made of wood, and sometimes of copper or bronze (2Sam. 22.35 = Ps.18.34; Job 20.24; see Steel). Those of wood were probably drawn with the hand (2K.13.16); for the "steel" ones the foot was used—hence the expression "tread" the bow. At Susa Dr. Morgan found a small model of a bow made of bronze. The string of the bow was made of animal gut, ox or camel; the arrows of light wood, with iron tips—in early times the tips were of stone. The quiver was worn on the back, or left-hand side, or else on the outside of the chariot, according to whether the archer was a foot-soldier or charioteer. Arrows were sometimes poisoned (Job 6.4). At other times, during sieges, burning substances were attached to them (Ps.7.13; Is.50.11). (6) Another offensive weapon, used only at sieges, was the Battering-ram (har). The root means "to dig," the reference being to the breaches made in the walls of the beleaguered city (Ezk.21.22[27]). It ran on wheels, and, judging from Assyrian sculptures, archers (shielded by a wicker-work screen) stood on it. The word here used (bīshshabbōn) means simply "contrivance." It was undoubtedly borrowed from Assyria. In A.V. and R.V. this is called engine.—Defensive. (1) The earliest form of defensive armour was the Shield. Of the two kinds mentioned in the Bible, the māgḥēn (usually knelt in A.V.) was a buckler used by the Assyrians, and carried and used by archers (2Chr. 14.8[7]), where R.V. renders wrongly "buckler" for zimmā, and "shield" for māgḥēn), as well as by the ordinary swordsman (1Chr.5.18). The larger one, zimmā (often target in E.V.), covered the whole body, and was accordingly of oblong shape. Another word for it is the māgḥēn foundation. The shields were made, at first, of wicker-work (cf. the shields on the battering-rams referred to above), covered with leather, and could therefore be burned (Ezk.39.6). Metal shields were used later (1K.14.6ff.; 2Chr.12.9ff.; Na.2.3[4]), both for ornaments and for war; and, judging from 1K.15.22, were sometimes ornamented with bosses. They were smeared with oil, either for the purpose of polishing or against damp. But this "anointing" may, in early days, have had another meaning, according to which the oil made the shield a charm against wounds. The shield was worn on the left arm, and was usually called a small one, or a right hand, found in one or two rare cases—probably from foreign countries—but it was only worn by the king (1Sam.17.38; 1K.22.34, marg.—cf. 1Sam.17.5, where the Philistine giant, Goliath, is said to have worn one). A similar word, probably of Assyrian origin, was also used (Greaves are said to be the Māgḥēn), from where it is rendered habergeon in A.V. The R.V. marg. has "coat-of-mail," but in the text "pointed shaft." In Jgs.6.4 it is rendered brigandine by A.V. (coat of Mail, R.V.). In later days, it is possible that, owing to Assyrian example, breast-plates, as well as (3) Greaves, were more widely used. Greaves are said to have been part of Goliath's armour (1Sam.17.5). They covered the shin, while the sōn (leather boot) served as a protection to the feet. Though this latter hardly comes under defensive armour, it may be here mentioned, as it was only worn by soldiers, and was common among the Assyrian soldiers (cf. Is.9.4). The sōn was ancient, being mentioned in the Amarna tablets. (4) Like the breast-plate, the Helmet (gōḇā') was, in early days, worn only by those in high estate (1Sam.17.38)—it was of bronze. Judging from the inscriptions, it is possible that the Israelite soldiers wore leathern or felt caps; for the inscriptions present to us Hittite and Syrian, as well as Egyptian, soldiers with,
a head-protection, which represents a cap of this kind still worn in Syria. [w.o.e.o.] Army. 1. Hebrew Army. From the time the Israelites entered the land of Canaan until the establishment of the kingdom, little progress was made in military affairs; their wars resembled border forays. No general muster was made at this period; but the combatants were summoned on the spur of the moment. With the kings arose the custom of maintaining a body-guard, which formed the nucleus of a standing army. Thus Saul had a band of 3,000 select warriors (1Sam.15.1, 14, 52, 24.2). David further organized a national militia, divided into twelve regiments under their respective officers, each of which was called out for one month in the year (1Chr.27.1); in active service he appointed a commander-in-chief (1Sam.14.50). Hither-to the army had consisted entirely of infantry (4.10, 15.4), the use of horses being restrained by divine command (Deut.17.16); but as the foreign relations of the kingdoms extended, much importance was attached to them for use in chariots. David reserved a hundred chariots from the spoil of the Syrians (2Sam.8.2); but, not appearing, the system established by him was maintained by the kings of Judah; but in Israel the proximity of the hostile kingdom of Syria necessitated the maintenance of a standing army. Occasional reference is made to war-chariots (2K.20.1); but in Hezekiah's reign the Jews were only the aid of light horse and chariots (18.23, 32; Is.31.1). With regard to the arrangement and manoeuvring of the army in the field, we know but little. A division into three bodies is frequently mentioned (Judg.7.16, 9.43; 1Sam.11.11; 2Sam.18.2). Jehoshaphat divided his army into five bodies, apparently retaining, however, the threefold principle of division, the heavy-armed troops of Judah being considered as the proper army, and the two divisions of light-armied of the tribe of Benjamin as an appendage (2Chr.17.14-18). The maintenance and equipment of the soldiers at the public expense is ascribed to the establishment of a standing army. It is doubtful whether the soldiers ever received pay even under the kings (the only mention of pay applies to mercenaries, 2Chr.25.6); but he was maintained, while on active service, and provided with arms (1K.4.27, 10.16, 17; 2Chr.26.14). The numerical strength of the Hebrew army is doubtful, the numbers, as given in the text, being manifestly incorrect.—II. Roman Army. The Roman army was divided into legions, the number varying considerably, each under six tribuni ("chief captains," Ac.21.31), who commanded by turus. The legion was subdivided into ten cohorts ("band," Ac.10.1), the cohort into three maniples, and the maniple into two centuries, containing originally 100 men, as the name implies, but subsequently from 50 to 100 men, according to the strength of the legion. There were thus 60 centuries in a legion, each under the command of a centurion (Ac.10.1, 22; Mt.8.5, 27-54). In addition to the legionary cohorts, independent cohorts of volunteers served under the Roman standards. One of these cohorts was named the Italian (Ac.10.1), as consisting of volunteers from Italy. The cohort named "Augustus" (Ac.27.1) may have consisted of volunteers from Sebaste. Others, however, think that it was a cohors Augusta, similar to the legio Augusta. The head-quarters of the Roman forces in Judaea were at Caesarea.

Arina" (2Esd.1.2) occupies the place of Zerahiah, 1, in the genealogy of Ezra. Arnan. In the received Heb. text "the sons of Arnan" are mentioned in the genealogy of Zerubbabel (1Chr.3.27). According to the LXX., Arnan was apparently the son of Rephaiah. Arnon, the river or torrent which formed the boundary between Moab and the Amorites (Num.21.13, 14, 24, 26, 28), and afterwards between Moab and Israel (Deut.2.24, 36, 3, 8, 12, 16, 4, 18; Jos.12.1, 2, 13, 5, 16; Judg.11.13, 18, 22, 20). There can be no doubt that Wady el Môjeb is the Arnon. Its principal source is near Qatrînên on the Hâj route. It flows W. in a deep gorge, on the N. bank of which is the ruin 'Ar'aïr. [Aroer, r.] The width of the gorge is about 2 miles; the descent is very steep. The stream is some 10 yds. in width, with a few olcanders and willows on the margin, and grass in places. [c.r.c.]

Arod' (= Arodi, Gen.46.16), a son of Gad and ancestor of the Arodites (Num.24.17). Aroer' (bare).—1. A city "by the brink," or "on the bank of," or "by" the torrent Arnon, the southern point of the territory of Sihon, king of the Amorites, and afterwards of the tribe of Reuben (Deut.2.36, 3.12, 4.48; Jos.12.1, 3, 9, 16; Judg.11.25; 2K.10.33; rChr.5.8; Je.48.16). Burckhardt found ruins with the name 'Ar'âir on the old Roman road, upon the very edge of the precipitous N. bank of Wady el Môjeb. [Aroen.] Mesa of Moab on his stone (at Dibon) says (in 9th cent. B.C.), "I built Aroer, and I made the steps at Arnon." It is probably intended in Num.32.34.—2. Aroer" facing Rabbath (Rabbah of Ammon), a town of Gad (Jos.13.25; 14.19); probably the same as the "North Gate," which is mentioned in Judg.11.33; now unknown.—3. Aroer, in Is.17.2, if a place at all (see LXX.), is probably 'Ar'âir in Bashan, 9 miles S.E. of Ashtaroth. It is noticed in the Amarna letters (Brit. Mus. 64) with the latter, in 15th cent. B.C.—4. A town in Judah, named only in 1Sam.30.28. Robinson identified it with the ruin 'Ar'arâh, 12 miles E. of Beer-sheba. [c.r.c.]

Aro'erite. Hothan the Aroerite was the father of two of David's captains (r1Chr.11.44). [Aroer.]

Arm'om. Thirty-two "sons of Armom" were among those who returned with Zerubbabel (1Esd.5.16). Probably a mistake for Asom (1Esd.9.33; cf. Ezr.10.33), and therefore representing Hasmum (Ezr.2.19; Ne.7.22).

Arpad' or Arpad' (Is.36.19, 27, 24; Je.49.23), a city in Syria. It is named with Hamath, as conquered by Assyrians (2K.18.31, 19.11), and also by the Grecians, in 139 B.C., three miles N.W. of Aleppo. It is noticed in an Amarna letter (Berlin 158) in 15th cent. B.C. It was attacked by Assyrians in 806 and 754 B.C., and fell in 740 B.C. [c.r.c.]

BATTERING-RAM.

p. 60]
Arphaxad (‘arpakhshadh).—I. Son of Shem and ancestor of Eber (Gen.10.22, 24, 11.10). Schrader has suggested that the word means “the coast of the Chaldeans,” and Hommel at one time regarded it as Egyptian form of Ur of the Chaldees (Ur-ba-Keshed). Ewald rendered it “the stronghold of the Chaldees,” and the name has also been compared with Arrapachitis (Arraphka) in N. Assyria.

II. A king “who reigned over the Medes in Ecbatana, and strengthened the city by vast fortifications” (1Esdr.1.13). He is often identified with Deioces, the founder of Ecbatana (699-646 B.C.). Niebuhr has suggested Astyages (584-549 B.C.), which would suit much better. As, however, this king was captured by Cyrus, he could not have been put to death by Nebuchadnezzar. Both identifications are very uncertain.

APPARO'S [Arms.]

Arsaces VI., a Parthian king, better known as Mithridates I. He is called king of Persia and Media (1Mac.14.2), the two chief provinces of his kingdom giving their name to the whole. His general defeated the army of Demetrius in 154 B.C. and brought him to Mithridates, who treated him well, but kept him a prisoner till his own death, 130 B.C. Arsaces was the name of the first Parthian king, but was assumed by all his successors.

Araruth (2Esdr.13.45), explained by Schrader as a corruptions of Araruth (“another land.” Cf. ver. 40. [r.e.p.]).

Artaxerxes (Heb. Arakhshashat, Akhaim. Pers. Artaxhataris; Assir. Artaahsaar, Artaashsuxu, Arivakasatu; fr. Akkhaim. Pers. arta [“skt. rita], Avest. aruta, ereta, “high,” “true,” and khshotram, “sovereignty”). There is only one king of this name mentioned in the Bible, Artaxerxes I. (465-424 B.C.), “M spos’ (Longimansus). Ezr. 4.6-23 inclusive is an early addition to the book, probably a marginal note (Lord A. Hervey, Expositor, July 1893), just as Ezr.2 is extracted from Ne. 7.6-73. This removes the difficulty which led Josephus (1 Ant. li. 1, 2) wrongly to identify Artaxerxes with Artaxerxes, son of Phraates, and brought him to Mithridates, who treated him well, but kept him a prisoner till his own death, 130 B.C. Arsaces was the name of the first Parthian king, but was assumed by all his successors.

Artaxerxes, a companion of St. Paul (Tit.3.12). According to tradition he was bishop of Lystra.

Arts. The Hebrews do not seem to have naturally an artistic people. Most of their works of art were either imported, or made by foreign workmen. The stern spirituality of the Heb. religion, however far the practice fell short, and the forbidding of “graven images” by lawyer and prophet, contributed undoubtedly to repress a free development of art. Yet it must be remembered that the arts in themselves were recognized as a gift of the Spirit of God (Ex.31.1-6). The period of the judges was certainly not favourable to the growth of art. Although the art work of Israel is known to the Israelites, no trace of building on any scale of splendour is found before the period of the monarchy, and then it is obviously an imported art. The temple and other buildings of Solomon were Phoenician in design, and partly also in materials. The decorations—e.g. the gold and ivory plaques, the hollow pillars (the “golden pillars Jachin and Boaz”)—are characteristically Tyrian. At a later period the prophets alude with disapproval to the growing splendour of domestic architecture (Is.5.9; Jer.22.14; Am.6.4; Hag.1.4). Engineering works are attributed to several of the kings, notably to Uzziah (2Chr.26), Ahaz (Is.36), and Hezekiah (2K.20.20). These were chiefly concerned with fortification, and the conveyance and storage of water. Sculpture was mostly of foreign importation—e.g. the lavers in Solomon’s temple (1K.7.40)—though apparently native artists had fashioned the cherubim for the tabernacle, and Aaron at Sin had shown a too-ready skill in making the golden calf. The prophets mention sculpture to denounce it as connected with idolatry. Its methods are graphically described in Is.44.12-17. Cf. the imitation of this passage in Wis.13.10-16. Painting is chiefly connected in O.T. with the service of idols or the making of images (see 2K.23.24, 25). [Colours.] The contrast which the art and civilization of neighbouring nations must have presented to the simpler life of the Hebrews is well seen in such passages as the famous description of Tyre, Ezek.27. Camb. Companion to the Bible (1893), art. on “The Arts. Trade and Manufactures.” [Arab.]

Aruboth (R.V. Aruboth), the third of Solomon’s districts (1K.4.10). It included Sochoh, and Heper in the Hebron mountains, and was probably a district named from Arab.

Arumah, a place apparently in the neighbourhood of Shechem, at which Abimelech resided (Judg.9.41). Perhaps e Ormech, 6 miles S.E. of Shechem.

Arvad, Arudus, a town on a small rocky island off the coast of Phoenicia, 13 miles N.W. of the month of the river Eleutherus. The Arvadites were Canaanites (Gen.10.18), and great sailors (Ezk.27.5, 17). They sailed from the Tyrrhenian coast (e.g. Tarshish, Simyra) as early as the 16th cent. B.C. as taken by Thothmes III in the Amarna letters, a century later, the ships of Arada are noticed; they joined with the Amorites in attacking Tyre (Berlin 51, Brit. Mus. 28, 44); and c. 1130 B.C. Tiglath-pileser I. embarked on a ship of Arvad to hunt dolphins. The second (or third) monarch of this name, in 732, received tribute from Matabal of Arvad, and Sennacherib, 30 years later, from another ruler of the island. Assur-bani-pal even married an Arvadite princess. The island is now called or Ruwald. [c.e.c.]

Arza, a prefect of the palace at Tirzah to Elah king of Israel, who was assassinated at a banquet in his house by Zimri (1K.15.9). In the Targum of Jonathan the name is taken as that of a idol, and in the Arab. version in the London Polyglot the last clause is rendered “which belongs to the idol of Beth-arza.”

Asa (‘ašā). The third king of Judah (c. 927-856 B.C.), was conspicuous for his earnestness in supporting the worship of God. In his zeal against immor-
ality and idolatrous rites he did not spare his grandmother Maacha, who occupied the special dignity of "king's mother," to which great dignity was added in the Jewish court. Asa burnt the symbol of her religion (1K.15.13), threw its ashes into the brook Kidron, and then deposed Maacha from her dignity. He also placed in the temple certain gifts which his father had dedicated, and renewed the great altar which the idolatrous priests apparently had desecrated (2Chr.15.8). Besides this, he fortified cities on his frontiers, and raised an army, amounting, according to 2Chr.14.8, to 580,000 men, perhaps an error in figures. Thus Asa's reign marks the return of Judah to a consciousness of the high destiny to which God had called her. The good effects of this were in the enthusiastic resistance offered by the people to Zerah, an invader who is called a Cushite or Ethiopian. [ZERAH.] At the head of an enormous host ("a thousand thousand," the expression probably meaning only that the host was too great to number), he attacked Mareshah or Mareshah, S.W. of the city of Bethany, near the later Eleutheropolis (2Chr.14.9). There he was utterly defeated, and driven back with immense loss to Gera. The peace which followed was broken by the attempt of Baasha of Israel to fortify Ramah as a frontier stronghold (1K.15.17). To stop this Asa purchased the prophet Hanani, who seems even to have excided some discontent in Jerusalem, for which he was imprisoned, and suffered other punishments (2Chr.16.16). In his old age Asa suffered from gout, and "he sought not to the Lord, but to the physicians." He died greatly loved and honoured. —2. Ancestor of Berechiah, who resided in one of the villages of the Netophathites after the return from Babylon (1Chr.9.16).

Asadias, an ancestor of Baruch (Ba.1.1). The name is probably the same as Hasadiah (1Chr.3.20).

Asael, an ancestor of Tobit (Tob.1.1) perhaps the same as JAHZEEL or JAHZIEL, one of the four sons of Naphtali (Gen.46.24; 1Chr.7.13).

Asahel. —1. Nephew of David and youngest son of his sister Zeruiah. He was celebrated for his swiftness of foot, a gift much valued in ancient times, and was one of David's 30 heroes (2Sam.23.24). When fighting under his brother Joab against Absalom's army at Gibeon, he pursued Abner, who, after vainly warning him to desist, was obliged to kill him in self-defence (2Sam.2.18f.). [Aunser.] —2. One of the Levites in the reign of Jehoshaphat, who went throughout the cities of Judah to instruct the people in the knowledge of the law (2Chr.17.8). —3. A Levite in the reign of Jehoshaphat, who had charge of the tithes and dedicated things in the temple under Cononiah and Shimri (2Chr.31.13). —4. A priest, father of Jonathau in the time of Ezra (Ezr.10.15).

ASCENSION

Asahlah, a servant of king Josiah, one of those sent by him to inquire of Jehovah respecting the book of the law which Hilkiah found in the temple (2K.22.12,14; Asaiah in 2Chr.34.20, as R.V. in both passages).

Asali'ah.—1. One of the Simeonite princes who drove out the Hamite shepherds from Gedor (1Chr.4.36). —2. A Merarite (1Chr.6.30) who took part in bringing the ark from the house of Obed-edom to the city of David (1Chr.15.5,11). The Chronicler calls him Silmone, with which his family dwelt in Jerusalem after the return from Babylon (1Chr.9.5). In Ne.11.5 he is called MAASEIAH, and his descent is there traced from Shiloh, explained by the Targum of R. Joseph on 1Chr. as a patronymic from Shelah, son of Judah, by explanation of the LXX. the "living or inhabitant of Sheloh." —3. (2 Chr.34.20.) [Asai'ah.]

Asanah' (1Esdl.5.31) = Asnah.

Asaph'.—1. A Levite (1 Chr.6.39,15.17), to whom are attributed Ps.50 and 73—83; one of those "whom David set over the service of song in the house of the Lord" (Ne.12.46; cf. 1 Chr.6.31), was known later as "a seer" (2 Chr.29.3). In Ps.106, the "sons of Asaph" (1 Chr.25.1; 2 Chr.20.14; Ezr.2.41; Ne.7.44). —2. Recorder or chronicler to Hezekiah and father of Isaiah (2K.18.18,37; Is.36.3,22). —3. The keeper of the king's forest whom Artaxerxes ordered to supply Nehemiah with timber (Ne.2.8). —4. Ancestor of Mattaniah, the conductor of the temple choir after the return from Babylon (1 Chr.9.15; Ne.11.17. —5. (1 Chr.26.1) = Abiasaph; cf. A.V. marg. and 9.19. [C.R.D.B.]

Asareel', a son of Jehaleel in the genealogies of Judah (1 Chr.4.16).

Asarelah, son of Asaph, head of the seventh order of the Levites, the musicians who were set apart by David to "prophesy with harps and with psalteries and with cymbals" (1 Chr.25.2 = Jesherehal, ver. 14).

Asalcon. [ASHKELON.]

Ascension. (i) The position in the gospels of the Ascension is obscurer than might have been expected. One of the earliest authorities, Tatian, ending contained it cannot be certainly affirmed or denied. St. Matthew's gospel "cannot be fairly said to omit the Ascension, for it does not carry the reader so far, stopping short with the meeting in Galilee" (Swete, Apostles' Creed, p. 65). St. Luke contains indications. "When these have been removed, the text runs: "And it came to pass while He blessed them, He parted from them, and was carried up into heaven" (R.V.). Some uncertainty remains about the last six words. Even if they ought to be omitted, the apostles' return to Jerusalem "with great joy" seems to imply Ascension—a parting from them different in character from any previous experiences (cf. Plummer on S. Luke). Westcott and Hort consider that the Ascension belongs rather to the history of the Church than to the gospel, and therefore begins the Acts (Notes on Select Readings in the Gospels, but see Chase in Camb. Theol. Essays, 357, and Syro-Latin Text of Gospels, p. 130). On the other hand, the present ending of St. Mark, which "belongs at the latest to the earlier sub-apostolic age" (Swete, Apostles' Creed, p. 66; see Conybeare, Expositor, ...
The Ascension

The Ascension is the event in which Jesus, having been crucified and risen from the dead, ascended into heaven. It is a significant event in Christian theology and is described in the New Testament. The Ascension is traditionally commemorated on the 40th day after Easter, and it is also associated with the Pentecost, when the Holy Spirit descended upon the apostles.

The Ascension is often depicted in art and literature as a moment of great glory and exaltation, symbolizing the triumph of Christ and the establishment of his rule over heaven and earth. It is also seen as a precursor to the Second Coming of Christ, when he will return to earth to establish his kingdom.

The Ascension is a fundamental event in the Christian faith, and its significance is reflected in the liturgies and prayers of many Christian denominations.
ASHDODITES

in Nehemiah's time (Ne.13.23,24). Isaiah notices its capture by a Tartan, or general, sent by Sargon (20.1), which happened in 711 B.C. A "remnant" of its old population remained in 607 B.C. (Je.25.20), and in the early part of the 8th cent. It was a prosperous Philistine town (Am.1.8.3.9; see Zeph.2.4) as well as c. 530 B.C. (Zechar.9.1). Judas Maacei, the Philistine king of Ashdod, destroyed its idols c. 162 B.C., and Simon his brother burned its temple of Dagon in 147 B.C. The monumental notices include the capture of Ashdod by Tiglath-pileser III. c. 734 B.C., the capture by Sargon in 711, and by Sennacherib in 702 B.C. The latter mentions Mitinti as its king. Mitinti had been established after the defeat of Yavan, an usurper of the throne of Azuri and of his brother Ahimiti, established by Sargon, Yavan being betrayed by the Pharaoh to whom he fled. A Mitinti (in 734 B.C.) was also king of Ashkelon. In 680 B.C. Esar-haddon received tribute from Ashdod, king of Ashdod.

Ashdodites, the inhabitants of Ashdod (Ne.4.7); called Ashdotothites in Jos.13.3.

Ashdoth-'pisgah' (the streams of Pisgah; Deut.3.17,4.49; Jos.12.3,13.20), the stream immediately N. of the ridge of Neba. There are two springs (Ayun Musa) noticed by St. Stephen in his Apology, and called "the baths of Moses" by Antoninus Martyr c. 570 A.D. One on N. flows to a precipice 30 ft. high, and forms a waterfall; about 100 ft. farther W., on S. of this stream, a second spring forms a shallow pool 8 ft. across, with a pebbly bed, this stream joins the other, which accounts for the plur. in the Heb. (Surv. E. Pal. pp. 89-90.)

Asher (in Apoc. and N.T., Aser), Jacob's eighth son, and the second of Zilpah, Leah's maid. He was named "happy" from Leah's exclamation at his birth (Gen.30.12,13). He is recorded to have had four sons and a daughter (16.17; 1 Chr.7.30; cf. Num.26.44-47). In the wilderness, under Pagan (Num.22.27), the Israelites marched on the N. bank. Its numbers increased (1.41,26.47), but it was not one of the strongest tribes. The surveyor selected from it was Abihud (34.27), and the spy was Sethur (15.13). In the blessing of Jacob we read, "Asher, his bread shall be fat" (Gen.49.20, R.V. marg.), and the blessing of Moses, which refers to the meaning of the name, predicts that Asher shall "dip his foot in oil" (Deut.33.24), no doubt in allusion to the olive groves on the low hills of the assigned lot. The tribe stood on Ebal to respond to the curses of the law (27.13). Asher did not join in Barak's revolt, but "sat still at the "havens of the sea, and abode in his creeks" (R.V. Judg.5.17). The tribe was probably weak, and had not succeeded in conquering the Phoenician seaports of Accho, Zidon, etc. (1.31). It, however, aided Gideon (6.35,7.23). It formed Solomon's ninth district (1 K.4.16), but is omitted from the account of David's census (1 Chr.27.16-22), though the warriors of Asher are elsewhere noticed in time (7.40,12.36). Some of the tribe came to Hezekiah's passover (2 Chr.30.11), and the name occurs in Ezekiel (48.2.3,34). In N.T. the prophetic Alphio of Apoc. is assumed as a descendant of Aser (Lu.2.56), and the name of the tribe appears last in Rev.7.6. The Tribes Lo! included some 300 square miles of shore plains and low hills W. of Naphtali (Jos.19.34) and N. of Manasseh (17.10,11), and this included fertile and well-watered corn lands, and hills fit for the olive, fig, and vine. The W. border was the sea "to Carmel westwards" (19.26), including "the region of Achzib" (R.V. ver. 29), but not the cities of Accho, Tyre, Hosah, and Sidon, held by the Canaanites. Carmel was apparently the S. boundary; for though Dor belonged to Asher, it was held by Manasseh (17.11), and Josephus (5.4.1.23) includes Dora in the latter tribe, and speaks of Asher as holding the "valley" over against Sidon. The N. border was probably extended after David's conquests in Syria. The E. border marched with Naphtali and with Zebulun, running S. to Neiel, and thence W. to Beth-dagon (19.27).

And apparently the shore S. of Accho was claimed by Asher to the foot of the Carmel promontory, and it has been thought that the "haven" (Judg.5.17, R.V.) of Asher was the later town of Haifa (at S. end of the bay of Accho), which is mentioned in the Talmud (Tal. Bab. Sabbath 26 a). [C.R.C.]

Asher (Jos.17.7), a place on the border of Manasseh mentioned with Micmethah. The description is not easily followed, as these ancient names have not survived. The LXX. (Vat. MS.) has quite another reading: "And the border of the sons of Manasseh was Delanath [Δελαναθ] which is opposite the sons of Anath, and placed on the border on lamin [Heb. right
hand, or S.) and Jassib, on the spring Taphuthoth (Heb. En-tappuah). Anath may be connected with Anathah (Josephus, 3 Wars iii. 5), on the border of Samaria, placed by the Onomasticon 15 Roman miles S. of Shechem; now the spring 'Anna, near Borkeos (Bergit), with which it is noticed. The site of Jassib (representing Heb. Yashash) would thus be Yāšūf, a village 2 miles N.W. of Bergit. It has a fine spring, which may be the En-tappuah, or "spring of apples." This line agrees with the situation of the river Kanah, near Tappuah (Jos. 16.8), for Wady 'Odna rises at Yāšūf. It also agrees with the supposition that Michmethah was the Makkahān Plain. The name Asherah does not occur anywhere near. [C.R.C.]

Asherah', and plur. Asherim' (three times Asheroth), the original word retained by R.V., which A.V., following LXX. and Vulg., translates grove, groves. It is usually defined by the article, and in the great majority of cases, in the eastern world, signifies a stake or pole, erected in the vicinity of an altar, and often occurs in conjunction with a stone pillar or obelisk (macephāhā). It was a feature of the Canaanite worship, which the Israelites were commanded to uproot (Ex. 34.13; Deut. 16.21; Judg. 6.25), but to which they largely conformed in later times. [C.R.C.]

Asherites, descendants of Asher, and members of his tribe (Judg. 1.32).

Ashes. The ashes on the altar of burnt-offering were gathered into a cavity in its surface (Ex. 29.17-18; 1 Sam. 6.14), even in connexion with the temple at Jerusalem (2 K. 23.6). What was its original intention is not clear, whether merely to indicate a sacred locality, or more probably to be a symbol of the deity that was worshipped, as, e.g., in Judg. 6.25, where one is found beside an altar of Baal. Some have supposed that there was a Canaanitish goddess Asherah, of which the post was the symbol; and some countenance is given to this by the manner in which later writers, recognizing the idolatrous nature of the object, speak of it (2 K. 21.7; cf. ver. 3, 23.7) as of an idol. The inscriptions and monuments can scarcely be said to give conclusive evidence of the existence of a goddess so named. Ashereth is spelled differently. [J.R.]

Ashnah', the name of two cities, both in the shəphēlā of Judah: (1) named between Zoreah and Zanoah (Jos. 15.33); and (2) between Jiphtah and Nebiz (Jos. 15.43). Neither of the two is known. [C.R.C.]

Ashpenaz', eldest son of Gomer (Gen. 10.3). In J. 51.27 Ashchenaz is coupled with Ararat and Minni. Hence the name has been identified with that of the Asgūzā (identified by Winckler with the classical Scythians), who together with the Medes and Cimmerians (or Gomer) attacked Assyria in the reign of Esarhaddon. Others see in it the Askania of the ancient Scythians as mentioned by the historian Eusebius (Onomasticon) in Asia Minor. [A.H.S.]

Ashria', properly Askiel' (1 Chr. 7.1). Ashtriathite, an inhabitant of Ashtaroth. Uzzia the Ashtriathite was one of David's mighty men (1 Chr. 11.44).

Asherah', Askelon, Ascalon', and Ashdod, one of the five cities of the Philitistile lords, now the ruined fortress 'Ascalon in low cliffs with a small port, between Ashdod and Gaza; inhabited by Esbalonites (Jos. 13.3). It is not mentioned as belonging to Judah (see Jos. 15.45-47) even in Judges (1:18), according to the LXX., reading, "took not," which agrees with ver. 19. It was a Philistine city in the time of Samson (Judg. 14.19), and of Samuel (1 Sam. 6.17) and David (2 Sam. 1.20). It still had a Philistine king in 6th cent. B.C. (1 K. 25.20; 1 Sam. 18: 2; see Zeph. 2:4-7; Zech. 9.5). It surrendered to Jonathan the Hasmonean in 142 B.C. (1 Mace. 11.63). [The Jerusalem Talmud (Shebbith vi. 1) places it just outside Judaea. Herod the Great adorned the city (1 Wars xx. 11), which continued to be famous down to 1192 A.D., when the walls, rebuilt by Richard Lionheart, were destroyed by Saladin. It now lies in ruins, but is surrounded by sand, partly with gardens. The lake of the Philistine goddess Berecheth (Diodorus Sic. ii. i) was probably at El Yārūth (the hollow), just N. of the walls. Semitic rulers of Askaluna are noticed in the Amarna tablets as subject to Egypt c. 1480 B.C., but the place was taken by the 'Abiri, or gave tribute (Berlin 103, 110, 121, 122, 129, 130, 131, 132, 133, 134, 147, 163). It was recaptured about 150 years later by Ramses II. In 734 B.C. Miltinti of Ashkelon rebelled against Tiglath-pileser III., but died, leaving a son, Rukhibi, who submitted to Assyria. In 702 B.C. Sennacherib took the city, and sent its king Zīdika with his family prisoners to Assyria, establishing Sargudari, son of Rukhibi, in his stead. A seal found near Ascalon represents a man-fish. The kings of the 15th cent. B.C. bore the names Dagon-takala, and Yamir-Dagon, showing the worship of this god by a Semitic race. [Dagon.] [C.R.C.]

Ashkenaz', the name of two cities, both in the shəphēlā of Judah: (1) named between Zoreah and Zanoah (Jos. 15.33); and (2) between Jiphtah and Nebiz (Jos. 15.43). Neither of the two is known. [C.R.C.]

Ashpenaz', the name of the emnuchs of Nebuchadnezzar (Dan. 1.3). Ashriel, properly Askiel' (1 Chr. 7.1). Ashtaroth. [Ashteroth Karnaim.] Ashtereth, an inhabitant of Ashtaroth. Uzzia the Ashterethite was one of David's mighty men (1 Chr. 11.44).

Ashteroth Karnaim (the walled Ashteroth), one of the capitals of Og, king of Bashan, a city of Rephaim ("giants") in Abraham's time (Gen. 14.5), otherwise Ashtaroth only (Deut. 1.4; Jos. 3.12, 12.4); given to Manasseh (Jos. 13.31), and to the Levites (1 Chr. 6.71). It is called later Carnaim, or Carnion (1 Mac. 5.26; 2 Mac. 12.21, 26), and was near a nabrook," having by which Judas Maccaea was destroyed (1 Mac. 5.42-44). Eusebius (Onomasticon) places it 6 Roman miles from Edrei, but the passage is corrupt in the Gk.—probably r6 is the proper reading. Now the ruined town, Telt 'Ashharah, 16 miles W. of Edrei. The site stands 80 ft. above the
plain, and remains of fortifications are traceable. It is well watered by a fine "brook," running S. on its W. (Schumacher, Across the Jordan, p. 209). It was evidently named from a temple of Ashtoreth (Atergatis, 2Mac.12.26).

In the Amarna tablets of 15th cent. B.C. it is called 'Ashtur (Brit. Mus. 43, 64), and is connected with seven cities, all of which retain their names in the same district. It appears as 'Astaratu in the list of Thothmes III. (No. 28) a century earlier. [c.r.c.]

Ashtoreth, the chief female divinity of the Canaanites and the counterpart of Baal. As there were many forms of Baal, there were correspondingly many forms of Ashtoreth, collectively spoken of as Ashtaroth (Judg.10.6; 1Sam.7.4). Originally Ashtoreth had been derived from Babylonia, where she was called Istar and identified with the evening star. When the identity of the evening and morning stars became known, the morning star also was identified with her, and she was described as androgynous both male and female. In Canaan, however, her male and female attributes were divided; the female Istar was provided with the feminine suffix (th) and in time identified with the moon (which was a male deity among the Babylonians), while the male Istar, Istar, the goddess, 'Ashtaroth, the Moabite Stone being identified with the god Chemosh. In South Arabia, too, we find 'Athtar (for 'Ashtar) without the feminine suffix. In Babylonia and Assyria Istar was the virgin goddess of war and love, in whose honour prostitution was practised. Doves were worshipped to her, and after her, and at other times, the Syrians united her name with that of the goddess 'Ati, whence the classical Atargatis. The Phoenician colonists in Cyprus carried the worship of Ashtoreth to Cyprus, where a temple was erected to her at Paphos, and she was adored under the form of a conical stone. As Aphrodite her name and cult passed to the Greeks, who, however, in the classical age more correctly transcribed the name Astarte. Ashtoreth must be distinguished from Asherah, another Canaanite goddess of Babylonian origin. [See Plate XIV. [A.H.S.]

Ashur, the posthumous son of Hezron by his second wife (1Ch.4.24, 4.5). He became "father" or founder of the town of Tekaq.

Ashurites. In 2Sam.2.9 Abner made Ishbosheth, the son of Saul, king over Gilead, the Ashurites, Jezreel, Ephraim, Benjamin, and "over all Israel." For Ashurites the Syr. and Vulg. read "Gershurites." Gershur was, however, an independent kingdom at this time (2Sam.3.13, 17). Perhaps the Targum of Jonathan is right in rendering the word "the house of Asher." The Ashurites would then include the inhabitants of the country W. of Jordan and N. of Carmel. [Asher.] [F-J-F.-J.]

Ashvath, one of the sons of Japhlet, of the tribe of Asher (1Chr.7.33).

Asin, the passages in N.T. where this word occurs, are: Ac.2.9, 6.9, 16.6, 19.10, 22, 26, 27, 20.4, 16, 21.27, 27, 27; 1Cor.16.19; 2Cor.1.8; 2Tim.1.15; 1Pe.1.1; Rev.1.11. [Chief of Asia; see ASIARCH.] In all these it may be confidently stated that the word is used, not for "the continent of Asia," nor for what we commonly understand by "Asia Minor," but for a Roman province which embraced the W. of the peninsula of Asia Minor with Ephesus as its capital. This province originated in the bequest of Attalus, king of Pergamus (or Asia), who left to the Roman Republic his hereditary dominions in the W. of the peninsula (133 B.C.). In the division made by Augustus of senatorial and imperial provinces, it was placed in the former class, and was governed by a proconsul. It contained many important cities, including the seven churches of the Apocalypse, and was divided into assize districts for judicial business (Ac.19.38). It included the territory ancienly subdivided into Acctyly, Lydia, and Doris, and afterwards into Mysia, Lydia, and Caria. The title "king of Asia" was used by the Seleucid monarchs of Antioch (1Mac.11.13).

Asiarchae (Ac.19.31; chiefs of Asia). The Asiarch was the president of the confederation of the cities of the province of Asia (Rd karofo r7s Aao7s). As the Asiarch was a Rom. official, and the presidency of a great festival and games, defraying most of the expenses; thus the office was limited to wealthy men. Past presidents retained the title. It was also assumed by the high-priests of the worship of Rome and of the emperor at Ephesus, and probably in other cities. The correctness of the use of the title is now confirmed by monumental evidence.

Asilas in.1 (Esd.9.26) = Malechjah, 3.

Asiel—1. A Simeonite whose descendant Jeu represented the family in the reign of Hezekiah (1Chr.4.35).—2. One of the five swift writers whom Ezra was commanded to teach the law and the history of the world (2Esd.14.24).

Asipha (1Esd.5.29) = Hasupha.

Askelon. [ASHKELEN.]

Asmodeus (K.V. Asmodeas; L.XX. [A]. 'Ampodios; in Rabbinical Heb. 'Ashmeiud). In Rabbinical theology the king (as Lilith [Owl]) is the impersonal body of that infernal demon with which originated, according to one account, from the intercourse of fallen angels with Eve, or, according to another account, with "the daughters of men" of Gen.6. These demons were supposed to be semi-corporeal, of both sexes, and, though long-lived, mortal. [Deynous.] Tobit, Asmodeus, the demon lover of Sara, daughter of Raguel. He slays her seven successive husbands on their wedding-night, and is finally put to flight by Tobias with the assistance of the angel Raphael, who binds the demon in the uppermost parts of Egypt (Tob.3.8, 16, 7.13-17, 7.11-8.15). He is the sentry of the gods with the Persian evil angel Aeshina Daeva. More probably the name is Heb., signifying "destroyer," from shmmadh, "to destroy" (cf. "the destroyer," Wis.18.25, and Apollon, Rev.9.11). [ABADDON.]

Asnaah. The children of Asnah were Nethinim who returned with Zerubbabel (Ezr.2.50). In the list of Ne.7.52 the name is omitted, and in Esd.5.31 written Asana.

Asnapper (Ezr.4.10), described as "the great and noble." He has been variously identified with Shalmaneser, Senacherib, and Esar-haddon. As, however, he is mentioned as the personage who settled the Danites, the
Archevites (people of Erech), the Babylonians, the Susanchites (Susians), the Dehavites, and the Elamites in Samaria, the general opinion now is that Aššur-bani-apli (Assurbanipal), being the only ruler who could have moved the Babylonians and the Elamites to a distance at that period, is the prince intended. Aššur-bani-apli was the eldest son of Esharhaddon, and ascended the throne of Assyria in 668 B.C., Šamaš-šum-ukin (Saosduchinos), his brother, assuming the sovereignty of Babylonia. His armies made two expeditions to Egypt, with varying success; besieged Tyre, and brought it, with the neighbouring districts, into submission. Lydia and the Vannites were also conquered. Later, he repulsed the invasion of Urtak, king of Elam, and afterwards carried the struggle into the enemy's country, routing the army of Te-umman, Urtak's successor, and placing Umm-an-igas on the throne. He also defeated the combined forces of the Babylonians, Elamites, and Arabsians, and annexed Babylonia to Assyria, his "rebellious brother" setting fire to his palace, and perishing in the flames. Elam was again subjugated under king Umm-an-kaldas, who, having been captured, was brought to Nineveh and compelled, with other captive princes, to drag his chariot to the temple called E-šaššmaš. Aššur-bani-apli, thus appears as a conqueror in some of the districts where Asnapper would seem to have held sway, and his sculptures represent him as having a presence which could be described as noble. He was one of Assyria's greatest rulers, and probably also one of the most learned men of his time. The R.V. has Asnapper, but in view of the identification, Asenapar is probably the pronunciation intended (As = Aššur; eša = bani; par = pal, the late pronunciation for āpl or āptī). See G. Smith, History of Assur-bani-pal (1871); S. A. Smith, Keilschriftteste Assurbanipals (1887). [T.G.P.]

**Asom** (1 Esd.9.33) = Hashum, I.

**Asp (pethen).** The Heb. word occurs in six passages: Deut.32.33; Job 20.14,16; Ps.58.5,91.13; Is.11.8. It is translated in Ps. adder in the text of A.V., and asp in the margin; else where the text of A.V. has asp as the equivalent of pethen. That some kind of venomous serpent is denoted is clear from the above pas-
sages; while from Ps.58.5 we see that pethen was a snake upon which the serpent-charmers practised. The wicked are there compared to "the deaf adder that stoppeth her ear, which will not hearken to the voice of charmers, charming never so wisely"; and from Is.11.8, "the sucking child shall play on the hole of the asp," it would appear that the pethen dwelt in holes of walls, etc. The explanation of Ps.58.5 is that there are certain serpents which defy all attempts of the charmer; and in this sense may be termed deaf. [Snake-charming.] Since the cobra (Naia haie), which infests old buildings and ranges from Egypt to India, is the species upon which snake-charmers chiefly exercise their skill, it has the best claim to represent the pethen. Cobras do not belong to the viper tribe (Viperidae), but to the Crotalidae, which includes the harmless British grass-snake.

**Aspalathus** mentioned as a sweet perfume in Eccles.24.3. Thespasrus includes it with cinnamon, cassia, and many other aromatic as used for ointments. The Lignum rhodanum is by some supposed to be the substance indicated by the aspalathus. The plant which yields it is the Convolvulus scoparius of Linnaeus. Pliny says: "In the same tract [Egypt, Cyprus] grows Aspalathus: a white thornie shrub it is of the bigness of a small tree, and bears a flower resembling a rose. The root of it is in request for the making of sweet perfumes and ointments... Some call it Erisiceptrum, and others Sceptrum. The good Aspalathus is red or rather of a fiery colour, massie and heavy in hand, with a smell of Castoreum. It is sold for fifteen cents weight a pound." (Holland's translation, 1601, xii. 24.) [H.C.R.]

**Aspatha,** third son of Haman (Esth.9.7).

**Asphar,** the pool in the "wilderness of Thecoe" (1 Mac.9.33). There is a well called Zaferdn 3 miles S. of Tekoa.

**Asphar** (1 Esd.5.8) = Mispereth.

**Asriel,** son of Gilead, great-grandson of Manasseh (Num.26.31; Jos.17.21), and the founder of the family of the Asrielites. The name is erroneously written Asriel in A.V. of 1 Chr.7.14. According to the LXX., he was son of Manasseh by his Syrian concubine.

**Ass.** Five Heb. names referring to various kinds of ass occur in T. (1) hamōr denotes the male domesticated ass, though the word was no doubt used to express any ass. The ass is frequently mentioned in the Bible, and was used for burdens, for riding, ploughing, and grinding at the mill. Jews of high rank rode on asses; and in this manner our Lord made His entry into Jerusalem (Mt.21.2), fulfilling the prophesy of Hab.3.13. He came "meek and lowly," but it is a mistake to suppose that the fact of His riding on an ass had aught to do with this meekness, although doubtless meant to show the peaceable nature of His kingdom, as horses were used for war purposes. White asses (see Judg.5.10) are still used in Palestine and Egypt for riding, and Baghdad is famous for a much-esteemedit breed. In Deut.22.10 "plowing with an ox and an ass together" was forbidden by Moses, probably because they could not pull evenly together; perhaps also this prohibition may have some reference to the
law given in Lev.19.19. The ass was not used for food, the Mosaic law considering it unclean, as ‘not dividing the hoof and chewing the cud.’ In extreme cases, however, as in the famine of Samaria, when ‘an ass’s head was sold for eighty pieces of silver’ (2K.6.25), the flesh was eaten. The statement that it chews the cud is incorrect. (2) ‘ithôn, the domesticated she-ass. Balaam rode on a she-ass; the asses of Kish which Saul sought were she-asses; and the Shumamite (2K.4.22,24) rode on one when she went to seek Elisha. She-asses formed the care of one of David’s officers (1Chr.27.30). (3) ‘ir, the name of a young ass, which occurs Gen.32.15,49.11; Judg.10.4,12.14; Job 11.12; Is.30.6,24; Zech.9.9. Sometimes ‘ir is used for asses old enough for riding, carrying burdens, and ploughing. (4) pere’, a wild ass mentioned Gen.12.16; Ps.104.11; Job 6.5,11.12,24,5.39.5; Ho.8.9; Je.2.24,14.6; Is.32.14. Hosea compares Israel to a wild ass of the desert, and Job (39.5) gives a vivid description of this animal. (5) ‘aroth occurs in Job 39.5; but in what respect the animal indicated differs from ‘ir or pere’ is uncertain. Two entirely distinct types of wild ass were probably known to the ancient inhabitants of Palæstine: first, the Nubian wild ass (Equus asinus africanus), a tall, long-eared, grey animal, which (or its near relative the Somali wild ass, E. a. somalitensis) is the ancestor of the domesticated breeds; second, the Syrian onager (E. onager hemippus), a smaller, redder, and shorter-eared animal, connecting the African asses in some measure with the horse. Other races of the onager, or ghor-khar, are found in Persia and N.W. India. The wild ass of Scripture is doubtless the onager, which inhabits desert tracts in herds of considerable size, and is noted for its fleetness.

[RL.]

Assabias (1Esdr.1.6) = Hashabiah, 6.
Assalemoth (1Esdr.8.30) = Sheshemoth, 6.
Assanielas (1Esdr.8.34) = Hashabiah, 8.

**Assur.** [Assyria.]

**Assurim** (plur. form), an Arab tribe descended from Abraham and Keturah; the three “sons” of Dedan, being Assurim, Letushim, and Leummi (Gen.25.3). [F.J.F.-J.]

**Assideans** (R.V. Hasideans), i.e. the pious, a Jewish party, not identical (in spite of 2Mac.14.6) with the followers of the Hasmoneans, which arose in opposition to the efforts of Antiochus Epiphanes, 168 B.C., to Hellenize Judaism. Indifferent to national independence, the Assideans aimed solely at religious freedom and the preservation of the national faith. Thus they supported Mattathias, 168–166 B.C. (1Mac.2.42). But when, 162 B.C., they had in Alcimus “a priest of the seed of Aaron” (7.13), they acquiesced in the Syrian domination. As the Maccabaean struggle became political rather than religious, the Assideans fell into the background, to reappear under John Hyrcanus (135–104 B.C.) as the Pharisees. [C.D.]

**Assir.**—1. Son of Korah (Ex.6.24; 1Chr.6.22).—2. Son of Eliassaph (1Chr.6.23,27).—3. Son of Jeconiah (1Chr.3.17), unless “Jeconiah the captive” (R.V.) be correct.

**Assos** or Assus, a seaport of the Roman province of Asia, in the district anciently called Mysia. It was situated on the N. shore of the gulf of ADRAMYTTSION, and was only about 7 miles from the opposite coast of Lesbos, near Methymna. A good Roman road, connecting the towns of the central parts of the province with Alexandria Troas [TROAS] passed through Assos, the distance between the two latter places being about 20 miles. These points illustrate St. Paul’s rapid passage through the town (Ac.20.15,16). The ship in which he was to voyage from Troas to Caesarea went round Cape Lectum, while he took the much shorter journey by land. Thus he was able to join the ship without difficulty, and in sufficient time to anchor off Mytilene at the close of the day on which he had left Troas.
ASSYRIA, ASSUR

Assyurus' (Tob.14.15) = Ahasuerus. Assur'.-1. (Ezr.4.2; Ps.83.8; 2Esdr.2.8; Jdg.2.14, etc.) = ASSYRIA.-2. (Ezr.5.31) = HARHUR.

Assurance. The words "assurance" and "full assurance," which occur in A.V. as a translation of πιστον and φθόρα (in Col.2.2, 1 Th.1, 1 Heb.6.11, 10.22, can scarcely be appealed to in support of the Gk. word. Assurance is nothing "by which is meant a supposed inward conviction of the individual believer that his personal salvation is assured. The Gk. word means rather a conviction of the certainty of the Christian faith and hope, as divine truth. It is certainly the teaching of N.T. that personal experience of the blessings of faith does constitute an irrefragable evidence of the truth of the gospel (cf. e.g. Jn.7.17). There are also passages which seem to imply an inward witness of the Holy Ghost to the soul of the believer that he is in a state of grace and covenant with God—e.g. Ro.8.16; 1 Jn.3.19,24, 4.15. But viceroyry is not enough to justify the idea that the mere feeling of assurance is always trustworthy, but rather there are warnings to the reverse (Mt.7.22,23).

And, in the light of 1 Cor.9.27 and Ph.3.11,12, it must seem presumptuous for any individual Christian to regard his own final salvation as already assured. See Schaff, Creeds of Christian denominations. The kisses of Abimelech are worthless, so the assurance of the abominably. (See Chapter 15, Harold Brown, Exposition of XXXIX. Arts. (Arts. xvi. and xvii.), 12th ed. 1882. [A.R.W.]

ASSYRIA, ASSUR, an important nation dwelling by the Tigris (Gen.2.14), whose capital was Nineveh (10.11, etc.). According to A.V., Assyria was colonized from Babylonia by Asshur, but B.C. makes the colonizer to have been Nimrod, who built its great cities. The country is named after its old capital Assur, whose god Assir, Asur, or Assir became the national deity. At first merely a province governed by a viceroy (patesi or iššaku), Assyria gradually extended its borders until it embraced the whole region from the Armenian mountains on the E. to the mountains on S., and from the Zagros mountains on E. to the desert on W. On N. and E. the high mountain-chains of Armenia and Kurdistan are succeeded by low ranges of limestone hills of a somewhat arid aspect, which, separating from the principal chains, run parallel therewith, and occasionally enclose rich plains and fertile valleys. To these ridges succeeds an undulating tract, well watered and productive, ending somewhat suddenly in the great Mesopotamian plain (al jëstîleh), which, extending for 250 miles, is interrupted by a single mountain-range, Jebel Sinjar. It is less abundantly watered on the right bank of the Tigris than on the left, and numerous ruin-mounds testify to its having ancienly supported a large population. The classical geographers divided Assyria into provinces, named after certain of its chief cities: Arbelitis from Arbela; Calacene from Calah (Gen.10.11); Apolloniatis from Apollonia, E. of the Tigris; Sittacene from Sittac in the same neighbourhood; Adiabene, supposed to be the district of the river Zab; Arrachipits, from Arrapha, etc. The chief cities were Assur, now Qala’sherqat; Ninua or Nineveh; Kalaq or Calah; Arba-ili or Arba; Dûr-Šarru-ukin, now Khorsabad; Upi or Upiâ, the classical Opis; Rezen, supposed to be the modern Salamieh; Tarbîsi, now Sherif Khan; Rûbi Ninua (Rehoboth-ir); and others whose sites have been identified. There seems to be no reason to doubt the statement in Gen.10.11 that Assyria was colonized from Babylonia, though there may have been aboriginal inhabitants before the foundation of Assur. In Herodotus (i. 7), Ninus, the mythical founder of Nineveh, was son of Belus (= Merodach = Nimrod), the founder of the great cities of Babylonia. This naturally points to the higher antiquity of Babylonia, from which Assyria obtained her civilization. From the recent German excavations at Assur, it would seem that the history of the country goes back beyond 2100 b.c., which is about the date of Uopia, the builder of the temple of Assur in that city. As in the case of the earlier kings of Babylonia, the rulers of Assur were at first not called kings, but viceroyes. This is a case of disputed Babylonian overlordship. To all appearance there were kings of Assyria before there were viceroyes, as one of the Babylonian chronicles makes Ilu-summa, king of Assyria, to have been contemporary with the Babylonian king Su-abu, who reigned about 100 years before Hammurabi. [AMRAPHEL.] This title of king, however, must be regarded as of later Babylonian usage. Among other early rulers were Kikia, Ikunum, Sâr-kenkate-Asir, and Assir-nirari son of Išmê-Dagan, who are mentioned as having built the wall of the city of Assur, which was restored by Assir-rim-nisê-su c. 1500 b.c. Assûr-bel-nisê-su somewhat later made a treaty with Kara-indaš, king of Babylon, as did also Puzur-Asûr with Burna-ûriš c. 1440 b.c. Assûr-uballit (c. 1410) married his daughter to a Babylonian king, who, however, was killed by the Kaššites, thus enabling Assyria to interfere in the affairs of Babylonia, and set Kuri-galzu on the throne. Turkulti-Nârîg (c. 1300 b.c.) conquered Babylonia and returned the basket to the throne. It was only after the war in Babylonia, is said to have attained to great length of years. Tiglath-pileser I. (c. 1120 b.c.) gives long and detailed accounts of his conquests, and we learn that he led his armies against Mesec, Comagen, Mesopotamia, etc., and also punished the Hitites. Aššur-našir-apli (854 b.c.) has likewise left extensive records of his reign, and states that he received the tribute of the Tyrians, Sidonians, Gebalites, and of Arvad, which is in the midst of the sea. His son Shalmaneser II. (860 b.c.) aimed at the destruction of what is known as the Syrian league, which seems to have been led by Adad-idri (probably sun-Adad- idri = Ben-hadad) of Damascus, and included Ahab the Sirîlite, who is generally regarded as Ahab of Israel. Shalmaneser had at least three conflicts with Adad-idri, and then sat upon the throne of Damascus, as well as from Tyre and Sidon, and for a few years he called himself "son of Omri" (= the Israelite) (842 b.c.). Samâ-Addâd (825 b.c.) warred in Babylonia, but never came nearer to Syria than Carchemish. His son Adad-nirari III. (812 b.c.) also warred in the W., including Tyre, Sidon, the land of Omri (Israel),
ASSYRIA, ASSUR

Philistia, and Damascus. Schrader sees in Adad-nirari the deliverer sent in answer to the prayers of Jehohaz (2K.13.5). The queen of this king was named Sammuramat, generally compared with the somewhat mythical Semiramis of Herodotus. Adad-nirari was succeeded by Shalmaneser III. in 783 B.C. He fought against Damascus and Hataraka, which, it is suggested, may have been Hadrach (Zech. 9.1). The next ruler was Assur-dan (773 B.C.), who also warred in Hataraka. An eclipse of the sun which took place in his reign has been identified with that of June 15, 763 B.C., and is thought to be referred to in Am. 8.9. This ruler had to contend with plague and rebellion within his dominions. Assur-nirari II. (754 B.C.), his successor, warred against Hataraka and Arpad. Discontent, however, seems to have been rife, and a rebellion broke out, in consequence of which, seemingly, Tiglath-pileser III., also called Pul (2K.15.19) seized the throne. In 745 B.C. he warred against Babylon, as well as on the E. and N. In 739 B.C. he captured Kullamû, possibly the Calno of Is.10.9. Azariah of Judah is mentioned at least four times in his inscriptions, but the earlier notices are obscure. Nineteen districts owning allegiance to Azariah were captured, and Median and Cappadocian vassals paid tribute. After this, various operations took place in Mesopotamia, Media, etc. An expedition to Philistia was undertaken in 734, when Abil-akka, on the borders of Israel, was attacked, and later Ijon, Abel-beth-maachah, etc. (2K.15.29). The prayer of Ahaz to deliver him from Syria and Israel led Tiglath-pileser to capture Hazara, Rezin’s native city, and devastate the district around. He refers to the overthrow of Pekah and the payment of tribute by Hoshea, but there is no reference to the visit paid by Ahaz of Judah to the Assyrian king at Damascus (2K.16.10). Tiglath-pileser died in 727 B.C., and was succeeded by Shalmaneser IV. (2K.17.3, 18.9), who carried the Israelites captive, and is mentioned in the Babylonian Chronicle as having captured Sabarain or Samarrain (?) Samaria. This ruler besieged Tyre for many years. The next king was Sargon, who took the throne in 722 B.C. He prosecuted the Syrian war with vigour, took the capital of Samaria. Later, he had considerable success at the battle of Raphia, and Cararchemish was made part of the Assyrian empire in 717 B.C. In 711 Ashdod was captured and its king Azuri deposed. Judah is mentioned with Edom and Moab as a country which went after Tir’u, king of Mursi, a prince who could not help them. Sargon defeated Merodach-baladan, the Babylonian pretender, in 709 B.C., and died (to all appearance was assassinated) in 705 B.C. He was succeeded by Sennacherib, whose siege of Jerusalem is referred to in 2K.18.17-16. According to Sennacherib’s inscriptions, Hezekiah had sided with the Ekronites against Padi, their king, and shut him up in Jerusalem for safe keeping. Forty-six cities of Judah were taken, Padi was delivered and set on the Ekronite throne again, and Hezekiah paid tribute. The general opinion is, that two expeditions against Hezekiah took place, though on the inscriptions of Padi, written in 703 B.C., Sennacherib fought with the pretenders, one of them being Merodach-baladan, who had arisen in Babylonia. Later he attacked the Elamites, who had carried off his son, Assür-nadin-sum, king of Babylonia; and Berosus and Herodotus say that he made an expedition to Egypt. He was killed by his sons (the Babylonian Chronicle says “a son”’) in 680 B.C. Esar-haddon, who succeeded him, tried to pacify the Babylonians, whom Sennacherib’s severity had aroused. His first act was to make an expedition to Armenia, where his brothers, after the murder, had taken refuge. Later, he put down a revolt in Babylonia headed by the son of Merodach-baladan. In 675 B.C. the king of Sidon was beheaded by his orders, and he then assembled all the kings of Hatti and the sea-coast. It was possibly on this occasion that he “took Manasseh with hooks” or “chains” (2Chr.33.11); but the Israelitish king is only referred to in the inscriptions as one of the rulers who paid tribute. The Assyrian Chronicle ends with the words: “Til-Assur,” the Medes, Chaldeans, and Arameans. He made two expeditions to Egypt, but died on the road whilst returning from the second, and was succeeded by his son Assür-bani-apli (Assur-bani-pal) in Assyria, and Saosduchinos in Babylonia (668 B.C.). The former, who is described by Herodotus as “the greatest, noblest Asnapper” of Ezra 4.10, was one of the greatest of Assyrian monarchs. He also received tribute from Manasseh, and his armies made determined attempts to complete the conquest of Egypt, but did not succeed in retaining the country. He received the submission of Gyges, king of Lydia, and later of his son, and his wars with the Elamites throw a vivid light on the condition of that country. As his brother would not acknowledge his overlordship, Babylonia was again annexed to Assyria, Saosduchinos having apparently committed suicide by perishing in the flames of his palace. Saosduchinos was succeeded by Esar-haddon, who is styled with the title of “Assur-bani-apli” for most excellent copies of the tablets of Babylonia and Assyria. He died in 626 B.C., and was succeeded by Assür-çtil-lâni-ukinî, of whose reign nothing is known. The last king of Assyria was Sin-sarra-iskin (Saracos), who is said to have sent his general Nabopolassar to take the capital of Babylonia. Having done this, Nabopolassar made an alliance with the Medes, and marched against Nineveh, which was taken after a two years’ siege; whereupon Saracos raised a funeral pyre, and perished in the flames with all his entourage (606 B.C.). After this, the country has no history, though Cyrus mentions the city of Assur as one of the places to which he returned the gods which had been carried away in former times, apparently by the Babylonians, and possibly under Nabopolassar. It was a great and sudden downfall which overtook the empire of Assyria. About 30 years before the fall, Assyria Cyrus claimed dominion from Elam on E. to Egypt on W., and from Armenia and Lydia on N. to the Persian Gulf on S. Among the princes who had acknowledged her supremacy had been Menahem (2K.15.19), Ahaz (16.9), Hoshea (17.4), Hezekiah (18.11), and Manasseh (2Chr.33.11-13), as well as the rulers of Phrygia, Illyria, and even, especially the W. Sargon, indeed, set up an
ASSYRIA, ASSHUR

image of himself, with an inscription, in the island of Cyprus. It is not quite certain whether Assyria required religious conformity from the people subject to her, but there seems to have been no real compulsion in that respect; if a ruler acknowledged the Assyrian gods, it was probably to curry favour. The Assyrian religion was the complex polytheism of Babylonia, differing, however, in having at its head the national deity Assur, the great protector of the land, its people, army, and king. The gods most often mentioned by Assur-bani-apil are Assur, Sin (the moon), Samaš (the sun), Anu and Enlil (the sky), Ishtar (the love goddess), Adad (the great war god), looking down upon them from the north, from the west, and from the east, as the protective gods of Nineveh, Babylon, and Calah, respectively. The religion of the island of Cyprus is said to have been a mixture of the religions of Egypt, Assyria, and Phoenicia. The religious beliefs and practices of the ancient Assyrians are well known from their inscriptions, which are found throughout the country.

Ater

The children of Ater were among the porters or gate-keepers of the temple who returned with Zerubbabel (Ezr. 2:42; Ne. 7:45). They are called in Ezr. 5:28, “the sons of Jata.” — 2. The children of “Ater, of Hezekiah” returned with Zerubbabel (Ezr. 2:16; Ne. 7:21), and were among the
heads of the people who signed the covenant with Nehemiah (10.17). In 1Esdr.5.15 the name is contracted into Aterezias.

**Aterezias.** [ATER, 2.]

Athach', a city friendly to David while at Ziklag (1Sam.30.30). The Vat. MS. reads Nombe, perhaps for Nebo, or Nuba, a village 4 miles S. of Adullam.

Athai'ah, a descendant of Pharez the son of Judah, dwelling at Jerusalem after the return from Babylon (Ne.11.4).

Athaliah.—1. Daughter of Ahab and Jezebel, and grand-daughter of Omri, king of Israel. On the making of a treaty of peace between the two kingdoms of Judah and Israel, after a war of 60 years, she was married to the crown-prince of Judah, Jehoram, son of Jehoshaphat. The bridegroom was not more than eighteen years of age, and she was still younger. Not till he was 32 years old did Jehoram come to the throne. His first act was to destroy his six younger brothers, as possible religious rivals and claimants to the throne, together with those princes of Judah who were zealous for the ancient faith of the nation. Athaliah inherited the strength of mind of her mother,
ATHALIAH

as well as her fervent devotion to the cult of the Phoenician god, Melkarth—usually addressed as Baal or Lord—and it is to her influence over her husband that we must attribute this act of unnatural ferocity. Athaliah survived her husband, who was succeeded by his son Ahaziah, over whose mind she exercised the same sinister influence as over her late husband. Ahaziah was married to a daughter of the house of Ahaz, whose name is not given; and when, after a reign of a single year, he died, Athaliah procured the massacre of her grand-children—Jehoash excepted, who was rescued by an aunt. She now seized the reins of power in Jerusalem and ruled for six years (2K.11: 2Chr.22.10-23.15). Two events alone of this dark period in Hebrew history can be extracted from the records of the time. (i) A portion of the temple of Jehovah was broken up, and its materials used for the erection of a house of Baal in Jerusalem. (ii) The Zadokian high-priesthood was changed from the family of Ahimaaz to that of Meshullam—Jehoiaad, who had married a daughter of Athaliah, being now promoted to the primacy. This action led to the undoing of the usurper, as Jehoiaad proved staunchly true to the religion of Jehovah. For six years he and his wife Jehosheba concealed in their private apartments, near the temple, the youngest child of Ahaziah, rescued at the time of the massacre, and then six years old. When he was thirteen a revolution was planned, in conjunction with all the better elements of the nation, and Jehoash proclaimed king. Athaliah’s personal attempt to stay the revolt failed, and she was cut down by one of the soldiers at the door of her palace, as she fled from the temple. The years of her reign are not counted separately by the Heb. historiographers, but are taken to form part of the reign of Jehoash. [CHRONOLOGY].—2. A Benjamite of the sons of Jehoram (1Chr.8.26).

—3. Father of Jeshiah, 3 (Ezr.8.7). [W.S.C.]

ATHAR'IAS (tEsd.5.40), a corruption of the Tirshatha.

ATHENIANS, people of ATHENS (Ac.17.21).

ATHENOBIUS, an envoy sent by Antiochus Sidetes to Simon the Jewish high-priest to demand the surrender of Joppa and Gazara (1Mac.15.28-36).

ATHENS, the capital of Attica, and the chief seat of Grecian learning and civilization during the golden period of the history of Greece. It is only mentioned in the Bible in connexion with St. Paul, who visited it in his journey from Macedonia, and appears to have remained there some time (Ac.17.14-34; cf. rTh.3.1). During his residence he delivered his memorable discourse in the Areopagus to the “men of Athens” (Ac.17.22-31). The Agora or “market,” where he disputed daily, was situated in the valley between the Acropolis on the N.E. and E., the Areopagus

ACROPOLIS, ATHENS. (Suggested restoration by R.C. Bohn.)

on the N., the Pnyx on the N.W. and W., and the Museum on the S., as shown in the annexed plan. The remark of the sacred historian respecting the inquisitive character of the Athenians (17.21) agrees with the unanimous witness of antiquity. Demosthenes rebukes his countrymen for their love of constantly going about in the market, and asking, What news? The remark of St. Paul upon the “superstitious” character of the Athenians (17.22) is also confirmed by ancient writers. Thus Pausanias says that the Athenians surpassed all other states in the attention which they paid to the worship of the gods; and hence the city was crowded in every direction with temples, altars, and other sacred buildings. Of the Christian church founded by St. Paul at Athens, Dionysius the Areopagite was, according to ecclesiastical tradition, the first bishop.

ATHLAI, an Israelite who put away his foreign wife at the exhortation of Ezra (Ezr.10.28), called AMATHEIS in tEsd.9.29.

ATIPHA (tEsd.5.32) = HATIPHA,
ATONEMENT, DAY OF

Atonement. This is the A.V. translation of a word which R.V. translates reconciliation (Ro.5.11; 2Cor.5.18), and in early English means precisely the same, and is better written A-one-ment. Cf. Beaumont and Fletcher:

From this atonement let our lives begin; Be all the rest forgotten.

The current meaning of the word as expiation has arisen from a false explanation of the Jewish sacrifice, which regards the death of the victim as representing the vicarious punishment of the worshipper. [SACRIFICE, B; ATONEMENT, DAY OF.] Truth views of sacrifice in O.T. show that it was intended as the expression of obedience, that expression being most clearly marked in the whole burnt-offering and in the presentation of "the blood which is the life (Lev.17.11). We must therefore regard Christ as representing the obedience of His life and death, and the rebellion against God, and "putting away sin by the sacrifice of Himself" (Heb.9.26). The atonement of Christ has therefore an objective value, and Christ is to be regarded as the propitiation for the sin of the world in exactly the same sense as every Jewish sacrifice was a propitiation for the Israelites, by fulfilling the law "even unto death," satisfied it in a far deeper and more real way that it could be said to be satisfied by the infliction of punishment upon an innocent substitute. This explanation is free from the moral difficulties of substitution, which seem greater the more they are considered. The weakness of the popular doctrine lies in the idea that the human Saviour was the substitute to satisfy the law, and that the atonement for sin was the satisfaction of the law, so that the laws of purgation, expiation, and sacrifice were interpreted as referring to Christ as a substitute, and that the acts of sacrifice were the expressions of His obedience, and of the satisfaction of the law. The atonement, therefore, is seen to be the act of obedience of the Son of God as made Sin for us, and His death and resurrection are the expression of His obedience as a sacrifice of expiation, and that all the acts of sacrifice were symbols within the veil of His obedience and death.

Num.28,29 (see 29.7-11); and is mentioned in Lev.25.9 as the day on which the jubilee year was to be proclaimed. The principle of atonement is enunciated in 17.11—"it is the blood that maketh atonement, by reason of the life" ([ATONEMENT,] and in that book alone the very word atonement occurs more than once. It is a very varied context, from the formal sacrifices of burnt-, sin-, and guilt-offerings (1.4, 4.40,5.16, etc., etc.) and those connected with priestly consecration (8.34,9,7), to the rites of purification of a woman after child-birth (12.8), a leper (14.15, etc.), a leprous house (14.55) and other uncleannesses, physical (15.15,20) and moral (19.22). This comprehensive

ness reflected in some degree the wide scope of the rites of the Day; which, however, in spite of the summary language of Lev.16.30, interpreted most liberally by later Judaism, cannot be supposed to have touched those in high and holy things. The particular atonement, therefore, as given in Num.15.30ff. Outside the Pentateuch the verb occurs four times (2Sam.21.13; 1Ch.6.39; 2Ch.29.24; Ne.10.33), but the Levitical Day of Atonement, though possibly alluded to in Zech.8.5, is nowhere named in the prophetic or later historical books of the O.T. The first unquestioned reference outside the Pentateuch is Ezek.40.4, i.e. c. 180 B.C. Passing over Ac.27.9, where "the Fast" is mentioned simply as ushering in the rough weather of autumn, the day plays an important part in the symbolism of the Ep. to the Hebrews (see below).—In describing the day's ceremonies we follow the order of the P. of A., the S.P., and the H. of A. and E.: on the a bullock, a ram, and seven young lambs, and a he-goat as sin-offering; distinct from the goats of the atonement ceremony, which is described as follows (Lev.6.2-28, cf. 29.34). The high-priest having selected his own offerings (a bullock for sin-offering and a ram for burnt-offering), and having anointed himself in white linen garments, then received the people's offerings at the door of the tent of meeting (Holy Place)—a ram for burnt-offering and two goats for sin-offering. From these latter he selected by lot one for the Lord and one for Azazel (see below). Next he killed his own sin-offering and with its blood entered within the veil into the Most Holy Place (Holy of Holies), carrying also a censer with live coals from the altar of burnt-offering, and a handful of incense. Having案子 the ark and the mercy-seat by casting the incense on the coals, he dipped his figure in the blood and sprinkled it once upon the E-side (front) of the mercy-seat, and seven times in the space before it. Hitherto (16.1-11) he had been acting for himself and his family; next he proceeded to act for the people. Returning from the Holy of Holies to the Holy Place, he slew, as the people's representative, the goat selected for sin-offering, and with the blood of the veil, dealt with its blood as with that of
atonement, day of

the bullock, thus completing the purificatory or "atonement" of the Holy of Holies. Next he proceeded in solitude to purify the Holy Place, sprinkling the victim's blood (see Ex.30.10) on the horns of the golden altar of incense; after which, entering into the court of the tabernacle, he "atoned for" the altar of burnt-offering, sprinkling its horns with the blood of his own bullock and of the people's goat (Lev.16.15-19). This completed the three-fold purification of the Holy of Holies, the Holy Place, and the altar representing the outer court. The goat for Azazel, or "scape-goat," was now presented by the high-priest, who, laying his hands upon it, made a comprehensive confession of all the sins of the people; after which it was led off to the wilderness by one waiting in readiness, as a symbol of the putting away of the nation's iniquities (cf. Ps.103.12). The high-priest then returned to the tent of meeting, bathed, donned his official garments, and, thus dressed, entered the court of burnt-offering, his own and the people's (Lev.16.20-24; cf. vv.3 and 5). Thus the day's ceremonies were completed. When the fat of the burnt-offerings had been consumed, the remains of the victims were carried, as usual (4.11,12), outside the camp; and those who performed the service of the goat, were to wash themselves and their clothes before returning to the encampment (16.25-28). The phrase ἵνα γίνητι = "for Azazel" (R.V.), rendered in A.V. scape-goat (cf. LXX. ὁ ἄντωμα αὐτοῦ, ἁμάρτωμα ἀπολέομενον, Sym. ὁ τρόπος ἀπολέομενον, Vulg. caper eunis-sarius; as though = ΠΝΩν ἢ, "goat for going away," occurs in this context only. The root ΠΝΩ is not actually found, but inferred from Arabic 'asala = "to remove to a distance." The phrase may thus signify "for dismissal," (as R.V. marg.), but in the context the parallelism with ΠΝΩ makes it probable that Azazel is a proper name denoting an evil spirit inhabiting remote and desolate places (so Origen makes 'Αγάθος = ὁ διάδεσμος). If so, he may be the 'Azazel who appears in the book of Enoch (cf. 2nd. cent. B.C.) as leader of the bad angels of Gen.6.4-24. In any case the symbolic meaning of the ceremony is broad and secondary. The Mishnich tractate Yoma supplies various details of this ceremony, some of which are inconsistent with Lev.16. Our view of the date at which this group of ceremonies assumed the form here depicted will depend upon critical problems which are discussed in the article on the celebrants, to which they more properly belong. But apart from that, it has been urged that if the ceremony had been traditional in Ezekiel's day (c. 592-570), a reference to this climax of the Levitical system would have been natural in the passage (Ezk.45.18-20) where the priest-prophet speaks of two atoning rites, on the 1st and 7th days of the 1st month. Hence some critics have regarded Ezekiel's words as furnishing the original idea from which the rite of Lev.16 was subsequently developed. Stress has also been laid on the fact that Zechariah (c. 520 B.C.), while referring (7.3-5, 8.19) to four commemorative fasts, one of them actually in the 7th month, makes no allusion in that context to the Day of Atonement; and also upon Ne.8 and 9, where three observances are recorded, all in the 7th month of 444 B.C.—(a) Feast of Trumpets on the 1st day; (b) Tabernacles, 15th-22nd; (c) a general fast on 24th—buthich which says nothing of the fast of the 26th day. It has been inferred that Lev.16 (and the parallel passages), as being part of the "New Code" just introduced (Ne.8), was not yet in force. It is possible, however, that the fast summarily described in Ne.9.1 may be the Day of Atonement, transposed, like Hezekiah's Passover (2Chr.30.15), for practical reasons; especially as the following chapter (Ne.10.33) refers to a provision "for the sin-offerings to make atonement for Israel." Nor was it absolutely necessary that Ezekiel, Zechariah, or Nehemiah (of whom the second alone mentions the Passover) should name the Day of Atonement, even were it a living institution of their time. It is only since the beginning of the age of Leviticus, we may doubt whether the post-Exilic institution of the Day of Atonement has been demonstrated, and whether, however considerable the subsequent development, the Mosaic nucleus in its ceremonial may not yet prove to be much greater than has perhaps been supposed. That the principle of fasting and humiliation in religion is of immemorial antiquity [Fasts], and must have found some expression among the Hebrews earlier than the 6th-7th. cent. fast-days of Ezekiel. But the permanent significance of the ceremony—fully enacted, at any rate, in N.T. times, as Philo and Josephus explicitly state, independent of the exact date of its origin. That significance lies in its relation to the atoning work of Christ, as expounded in Heb.9 and 10. In Christ's atoning death there is nothing of the figurative, imperfect, limited character which marks the Levitical ordinance. The high-priest enters the material Holy of Holies once a year with the sins of external victims; Christ enters once for all into God's actual Presence with, and through, His own infinitely more efficacious Blood, wherewith He obtains no temporal but an eternal deliverance. Moreover, access to the throne of grace, open of old to the high-priest alone, and that under strict limitations of time and mode, is now, by Christ's "new and living way," free at all times to those mystically purged by His atoning Blood. [HEBREWS, EP. 70.] Oehler, O.T. Th. § 140 f; Edersheim's Temple, pp. 263-288; Willis, Worship of the Old Covenant, pp. 190-214; Westcott, Hebr., pp. 279-280; Driver, Introd. to Philo, Lib. Capit. templario; Josephus, 3 Ant. x.; Mishna, Yoma (ed. Surenhusius, ii.). [L.R.]

ATROTH, a city of Gad (Num.32.35). Perhaps the name should be taken with that following it, Shophan, to distinguish this place from Araroth in the same neighbourhood.

ATTALIA. 1. The son of Attalus by Amphiara, an Egyptian slave (1Chr.2.35,36).—2. One of the warriors of Gad, captains of the host, who joined David in the wilderness (12.11).—3. Second son of king Rehoboam by Maachah the daughter of Absalom (2Chr.11.20).

ATTAILA, a coast-town of Pamphylia from which SS. Paul and Barnabas sailed on
their return to Antioch from their missionary journey in the interior of Asia Minor (Ac. 14. 25). It was built by Attalus Philadelphus, king of Pergamus, and named after him. All its remains are characteristic of the date of its foundation. Leake fixes Attalia at Adalia, on the S. coast of Asia Minor, N. of the Duden S. of the ancient Catarchaeetes.

**Attalus II.** (Philadelphus) was king of Pergamus, 150-138 b.c. To him were addressed letters from Rome in favour of the Jews, 139 b.c. (1 Mac. 15.22), in response to the embassy sent to Rome by Simon the Hasmonean (14.24). [G.D.]

**Attarates** (1 Esd. 9.49), a corruption of the Tarsihata.

**Aug'lia** (1 Esd. 5.38), daughter of Berzelus (Barzillai, Ezr. 2.61). Her name is not given in the parallels in Ezra or Neh. [Addus.]

**Augustus,** first Roman emperor, in whose reign Christ was born (Lu. 2.1). His father was C. Octavius, and his mother Atia, daughter of Julia, the sister of C. Julius Caesar. He came under the care of his great-uncle, the Dictator, who made him his heir. After Caesar's murder, Octavius was adopted into the Julian family, and was thenceforth known as C. Julius Caesar Octavianus. He became triumvir with Anthony and Lepidus, and the struggle between them for supreme power ended in his defeating Antony at Actium, 31 b.c. On his return to Rome, 29 b.c., he did not surrender his command of the military and naval forces, but by degrees strengthened his position by one after another of the higher magistracies. The surname Augustus by which he is usually spoken of was conferred on him by the senate, 27 b.c. It did not bestow political power, but suggested a sacred and awful character. As such it was continued to his successors, and designates Nero in Ac. 25. 21, 25. The principal link between Augustus and Jewish history lies in his relations to Herod the Great described by Josephus (15 Ant. vi. 5; vii. 3). Augustus died at Nola, 14 a.d., aged 77. The peace which his reign gave to the Roman world has been regarded as a pre-

**AXE**

| HEAD OF AUGUSTUS CAESAR. (Brit. Mus.) W.I.A. | AXE |

paration for the birth of Christ (Milton's Hymn on the Nativity, iv). [E.R.B.]

**Augustus' band** (Ac. 27.1). [Army.]

**Aur'a'nu's,** leader of a riot at Jerusalem (2 Mac. 4.40).

**Aute'as** (1 Esd. 9.48) = Hodiah, 1. [Authorized Version. [Version, Author-]ized in Catarchaeetes.

**Av'yan** (properly 'awwed), a place conquered by the Assyrians and apparently the same as Iah (2 K. 17.24). [Ivah.]

**Av'yan** (1 Mac. 2.5) or *Sav'aran* (6.43), the surname of Eleazar, 8. It probably means the "pale"; but one derivation makes it mean "the piercer," in connection with the feat of 6. *Ava* (empty).—1. Am. 1.5, a plain mentioned with places in Syria. The LXX. seems to understand On in Egypt.—2. Ezk. 30. 17, mentioned with Pibe'set. ; this is the Egyptian On or Heliopolis, the city of Un (the rising sun), in Egypt.—3. Ho. 10.8. and 10.1. (the rising of the sun).—4. Ezk. 31.16, 17. The name, "Aven" were idolatrous shrines apparently at Bethel (1 K. 12.29; Am. 7.10), which is now Beitin ; for the wilderness of Beth-aven (Jos. 18.12,13) was E. of Bethel. [G.R.C.]

**Av'er-gent** of blood. [Goel; Homicide; Crimes.]

**Avi'tes,** Avites, correctly *Avvim* (as R.V.). The LXX. identifies them with the Hivites, rendering both names by E'I'aw. In Deut. 2.23 the Avim are mentioned as an ancient race destroyed by the Caphinor who occupied their land in Hazerim (probably not a proper name, but = villages) "even unto Assah (Gaza). It has been inferred that they were one of the ancient giant races of Palestine. In Jos. 13.3 the Avites are mentioned after the five lords of the Philistines, six instead of five districts being enumerated. In Jos. 18.23 a city allotted to Benjamin is called hâ'avorim = the Avites, and it is noteworthy that the district assigned to Benjamin was Hivite (Jos. 9.7, 27). The name means apparently "remnants of ruins." Some trace of the root may survive at Beth 'Avwa, a group of ruined sites about 12 miles S.W. of Hebron, in the lower hills 30 miles E. of Gaza. [C.R.C.] The Avim have also been identified with the Ana'kin; and the city hâ'avorim (Jos. 18.23) is supposed to be a misreading for the Benjamite town of Ai [Samaria] (2 K. 17.31). [Av'wa.] [F.I.E.1.-]

**Avith** (ruins), the city of Hadad ben-Bedad, one of the kings of Edom before there were kings in Israel (Gen. 36.35; 1 Chr. 1.46). Perhaps the same as Im ( = ruins). [C.R.C.]

**Awi** (mar'ēa'), a tool, the only notice of which is in connexion with boring the ears of slaves (Ex. 21.6; Deut. 15.17). The Heb. root means "to pierce," and the cognate Arab. root means to "stab." We may assume that in form this instrument resembled a small pointed bar of iron. [W.O.E.O.]

**Axe**. Seven Heb. words are rendered "ax" in A.V. (1) *gar* †, from a root signifying "to cut or sever," as "hatchet," from "hack," corresponds to the L.t. *securis*. It consisted of a head of iron (cf. Is. 10.34), fastened, with thongs or otherwise, upon a handle of wood, and so liable to slip off (Deut. 19.5; 2 K. 8.5). It was used for felling
trees (Deut. 20.19), and also, for shaping the wood when felled, perhaps like the modern adze (1K.6.7). (2) Herēbh, usually rendered "axe" (Ezk. 26.9), evidently denoting a weapon for destroying buildings, a pick-axe. (3) Kāshšēl (Ps. 74.6 only) denotes a large axe. It is also found in the Targum of Jēs.45.22. (4) Maḥākēḏ (2Sam. 12.31) and (5) Meḥērēḏ (1Chr. 20.3) are found in the description of the punishments inflicted by David upon the Ammonites of Rabbah. The latter word is properly "a saw," and is apparently an error of the transcriber for the former. (6) Māʾārāḵāḏ, rendered "ax" in the marg. of Is. 44.12 and Je. 10.3, was an instrument employed both by the iron-smith and the carpenter, and is supposed to be a curved knife or bill, smaller than - (7) Gārōm, which was a large axe used for felling trees (Jdgs. 9.48; Ps. 74.5, etc.). The words 1, 5, and 7 have an etymological affinity with each other, "cutting" being the idea expressed by their roots.

**Azael** (1Es. 9.14) = Azairēl, 4.

**Azaelus,** mentioned 1Es. 9.34, but not Ez. 10.41, as putting away his "strange" wife in the time of Ezra. [G.D.]

**Azai** (R.V. Azael), a name only occurring in Zeb. 14.5. Perhaps not a proper name. The Heb. may mean, "Ye shall flie the ravine of my mountain: for the ravine of the mountains shall come close" — referring to the earthquake, as in the next clause. [C.R.G.]

**Azaijah,** the father of Shaphan the scribe in the reign of Josiah (2K. 22.3; 2Chr. 34.8).

**Azahaijah,** the father or near ancestor of Jeshua the Levite (Ne. 10.9).

**Azaphion** (1Es. 5.33; R.V. Assaphioth) = Sophereth.

**Azara,** one of the "servants of the temple" (1Es. 5.31).

**Azarael** (R.V. Azarēl).—1. A Kohite who joined David at Ziklag (1Chr. 12.6).—2. A Levite-musician of the family of Heman (25 18); called Uzziel in 25.1. — 3. Son of Jeroham, prince of the tribe of Dan when David numbered the people (27.22).—4. A son of Bani, who put away his foreign wife on the remonstrance of Ezra (10.41); apparently = Esris in 1Es. 9.34.—5. A priest, the son of Ahasai (Ne. 11.13). [H.C.B.]  

**Azariah,** a common name in Heb., especially in the families of the priests of the line of Eleazar, whose name has the same meaning as Azariah. It is nearly identical, and often confounded, with Ezra, Zerubiah, and Seraiah.—1. Son of Ahimaaz (1Chr. 6.9). He appears from 1K. 4.2 to have succeeded Zadok, his grandfather, in the high-priesthood, in the reign of Solomon, Ahimaaz having died before Zadok. [AHIMAAZ.] To him, instead of to his grandson, Azariah the son of Johanan, probably belongs the notice in 1Chr. 26.10: "He it is that executed the priest's office in the temple that Solomon built at Jerusalem."—2. A chief officer of Solomon's, the son of Nathan, perhaps David's grandson (1K. 4.5).—3. Tenth king of Judah, more frequently called Uzziah (2K. 14.21, etc.). He is called 'Azrīidhū an Assyrian form of the name of Athaliah, called the son of Obed (2Chr. 23.1).—6. The son of Johanan and father of Amariah (1Chr. 6.10.11; cf. Ez. 7.3, where several preceding generations are omitted). He was probably high-priest in the reigns of Abijah and Asa, as we know his son Amariah was in the days of Jeroham of Asa.— 7. Another Azariah is inserted between Hilkiah, in Josiah's reign, and Seraiah, who was put to death by Nebuchadnezzar, in 1Chr. 6.13.14. The name may have been inserted here to assimilate the genealogy to that of Ezr. 7.1. —8. Son of Zephaniah, a Kohathite, and ancestor of Samuel the prophet (1Chr. 6.36). Apparently the same as Uzziah in ver. 24.1. As this; the son of Oded (2Chr. 15.1), called simply Oded in ver. 8, was a remarkable prophet in the days of king Asa, and a contemporary of Azariah the son of Johanan the high-priest, and of Hanani the seer. —10, 11. Two sons of Jehoshaphat, king of Judah (21.2).—12. In Ez. 26.2 Azariah is called Uzziah (Ex. 10.11); apparently = Zephaniah (27.22).—13. Son of Jeroham, one of the captains of Judah in the time of Athaliah (23.1).—14. The high-priest in the reign of Uzziah, king of Judah. The most memorable event of his life is recorded in 26.17-20. When king Uzziah, elated by his prosperity and power, transgressed against the Lord his God, and went into the temple of the Lord to burn incense upon the altar of incense," Azariah the priest, accompanied by eighty of his brethren, went in boldly after him, and withstood him. Azariah was contemporary with Isaiah the prophet, and with Amos and Joel, and doubtless witnessed the great earthquake in Uzziah's reign. —15. Son of Johanan; one of the captains of Ephraim in the reign of Ahaz (28.12), who sent back the captives and spoil that were taken in the invasion of Judah by Pekah.—16. A Kohathite, father of Joel in the reign of Hezekiah (29.12).—17. A Merarite, son of Jehalelel, in the time of Hezekiah, contemporary with the son of the preceding (29.1).—18. The high-priest in the days of Hezekiah (31.10,13). He may have co-operated with the king in the thorough purification of
the temple and in the restoration of the temple services. He succeeded Urijah, the high-priest, in the management of the temple, and repaired part of the wall of Jerusalem (Ne.3.23,24). —20. One of the leaders of the children of the province who went up from Babylon with Zerubbabel (7.7). Called Serahaz (Ezr.2.22) and Zacharias (1Esdr.5.8). —21. One of the Levites who assisted the people in the knowledge of the law (Ne.8.7). Called Azarias in 1Esdr.9.43.—22. One of the priests who sealed the covenant with Nehemiah (Ne.10.2), and probably the same as the Azariah who assisted in the dedication of the city wall (12.33). —23. [Je.45.2.] [Ezr.10.2]. —24. The original name of Abed-nego (Dan.1.6,7,11,19). Azarias. —1. (1Esdr.9.21) = Uzziah, 3.—2. (9.43) possibly = Urijah. 3.—3. (9.48) = Azariah, 21.—4. Priest in the line of Ezra (2Esdr.1.1), elsewhere Azariah, 7, and Ezerias, —5. Name assumed by the angel Raphael (Tob.5.12,6.6,13,7,9.2). —8. A captain in the army of Judas Maccabaeus (I Mac.5.15,56,60). Azaz, a Reubenite, father of Bela (1Chr.5.58). Azazlah. —1. A Levite-harpist when the ark was brought from the house of Oded-edom to Jerusalem (1Chr.15.21). —2. The father of Hoshea the prince of Ephraim when David numbered the people (27.20). One of the Levites in the reign of Hezekiah, who had charge of the tithes and dedicated things in the temple (2Chr.31.13). Azbazareth, king of the Assyrians, probably a corruption of Esar-haddon (1Esdr.5.69; cf. Ezr.4.2). Azbuk, father or ancestor of Nehemiah the prince of part of Beth-zur (Ne.3.16). Azekah, a town of Judah, with dependent villages, lying in the sherdelah, near Shocach (1Sam.17.1). Joshua's pursuit of the Canaanites after the battle of Beth-horon extended to Azekah (Jos.10.10,11.15-33), which was fortified by Rehoboam (2Chr.11.6), and was-struck by the Assyrians whenalled by the Assyrian invasion (Je.34.7), and is mentioned as one of the places reoccupied by the Jews after the Captivity (Ne.11.30). The position of Azekah is still doubtful. [C.C.C.] Azel, a descendant of Saul (1Chr.8.37,38,9.34,44), a city in the extreme S. of Judah (Jos.15.29), afterwards allotted to Simeon (19.3). Called in 1Chr.4.29 Ezem. Azepurith (R.V. Arisaphurith). The name answers in the LXX. of 1Esdr.5.16 to Jorah in Ezr.2.18 and Hariph in Ne.7.24. It perhaps originated in a mistaken combination of the names, C being read for S. The Vulg. omits it. Azezath. [Cielan.] Azgad. The children of Azgad, to the number of 1,222 (Ezr.2.12; 2,322, Ne.7.17), were among the laymen who returned with Zerubbabel. A second detachment of 110, led by Johanan the son of Azgad, accompanied Ezra in the second caravan (Ezr.8.12). They joined in the covenant (Ne.10.15). The name appears as Asath in 1Esdr.3.38 and Sadas in 5.13, where the number is given as 3,222.

AZZUR

Azi'a (1Esdr.5.31) = Uzza, 3. Aziel (1Esdr.1.2), an ancestor of Ezra, called Azarias (Ezr.7.3), and Ezias (1Esdr.8.2). Azziel, a Levite (1Chr.15.20). A shortened form of Jazziel (ver. 18). Aziza', an Israelite who had married a foreign wife after the return from Babylon (Ezr.10.27); called Sardeus in 1Esdr.9.28. Azma'veth.—1. One of David's mighty men (2Sam.23.31; 1Chr.11.33). —2. A descendant of Mephibosheth, or Merib-baal (1Chr.8.36,9.42). —3. The father of Jeziel and Pelet, two Benjamite singers and archers who joined David at Ziklag (12.3). —4. Overseer of David's royal treasures (27.25). Probably 1, 3, and 4 are identical. Azma'veveth, a place in Benjamin, named with others, and probably identical with Bene-Azzah (Ezr.2.48), a place returned from captivity with Zerubbabel (Ezr.2.24). The "sons of the singers" settled there (Ne.12.29). See Beth-azma'veveth (Hizmeh, 2 miles N. of Anathoth). [C.C.C.] Azmon, a place on the S. boundary of the Holy Land, apparently near the torrent of Egypt (Josh.15.48; Naphtal, Note.3,4,5,10). It has not yet been identified. Aznoth-tabor (Jos.19.34), a place at the foot of Tabor on W. Name has not been recovered. [C.C.C.] A'zor, son of Eliakim, in our Lord's genealogy (Mt.1.13,14). Az'or, the king of Egypt. [C.C.C.] Azrot, Mt. (1Mac.9.15), the place where Judas Maccabaeus was killed in battle, after advancing from Eleasa. Josephus places Mt. Aza near Berzetho or Bethzetho (12 Ant. x. 2, xi. 2), the scene of the battle; now Bir es Zeit, a village on high ground commanding the Roman road from Antipatris to Jerusalem, 4 miles N.W. of Bethel. [C.C.C.] Azriel.—1. The head of a house of the half-tribe of Manasseh beyond Jordan, a man of renown (1Chr.5.24). —2. A Naphitite, ancestor of Jerimoth, 6 (27.19). —3. Father of Serahah, 12 (Je.36.26). Azr'kan.—1. A son of Neriah of the royal household (1Chr.2.33). —2. Eldest son of Azel, and descendant of Saul (1Chr.8.38,9.44). —3. A Levite, ancestor of Shemaiah, 5 (1Chr.9.14; Ne.11.15). —4. Governor of the house, or prefect of the palace to king Ahaz, who was slain by Zichri, an Ephraimite hero, in the successful invasion of the southern kingdom by Pekah, king of Israel (2Chr.28.7). Azubah.—1. Wife of Caleb, 2 (1Chr.2.18, 19). —2. Daughter of Shilhi and mother of king Jehoshaphat (1K.22.42; 2Chr.20.31). Azur, properly Azzur. —1. One of the heads of the people who sealed the covenant (Ne.10.17). —2. A Benjamite of Gibon, and father of Hananiah the false prophet (Je.28.1). —3. Father of Azaziah, one of the princes of the people against whom Ezekiel was commanded to prophesy (Ezk.11.1). Azuran. The sons of Azuran are enumerated in 1Esdr.5.15 among those who returned from Babylon with Zerubbabel; perhaps identical with Azzur in Ne.10.17. Azzan' (R.V. Gaza), the more accurate rendering of Gaza (Deut.2.23; 1K.4.24; Je.25.29). Azzan', the father of Paltiel (Num.34.26). Azzur'. [Azur, 1.]
WORSHIP OF THE SUN-GOD AT SIPPARA, c. 900 B.C.  
(From a stone tablet in the Brit. Mus.) See art. “Baal.”

SARCOPHAGUS FROM SIDON.  
(Hamdi Pasha supposed this to be the tomb of Alexander the Great, but this is highly improbable. See art. “Sidon.”)
BAAL

B

Ba'al.—1. A Reubenite, father or ancestor of Beerah (1Chr.5.5).—2. The son of Jehiel, father or founder of Gibeon, by his wife Maachah (1Chr.8.30,9.36).

Ba'el (plur. ba'ēlim), a word found in all the Semitic dialects in the sense of master, owner (not ruler), as, e.g., owner of a house, land, ox, etc. It is also used in the sense of husband, though not applied to the owner of a slave. Some suppose it was used in N. Israel as equivalent to the word ăḏāhôn (lord) used in the S., but the words are not equivalent. It is found particularly in connexion with the local worship of the Canaanites, which the Israelites found on their entrance into Canaan, and to which they so largely conformed. A local divinity was supposed to have his seat in a particular spot or district of which he was lord, and to exercise special influence over the agricultural operations of the local deities, who were supposed to confer fertility on the land. It was the more insidious that the word ba'el, or lord, harmless enough in itself, was actually applied by the Israelites to their own God, and they gave him reverence by this service. The result was practically the worship of the ba'ēlim, with all the immoral iniquities of forms and manner of worship ( Hos.4.13,14). So it was reprobated by the prophets as a defection from the worship of Jehovah; and so heinous did it appear to Hosea that he rebuked it as open idolatry, and said the time would come when Israel would see its error, and the very name ba'el would be so abhorred that it would not be mentioned. [ISHL.] Hence later writers substitute for it the word bōšeth (shame) in compound words forming proper names, writing Ishbosheth for Ishbaal, Mephibosheth for Meribbaal, etc., though these names had been at first used without any conscious reference to the Baal worship. It is thus identified with the Jehovah religion. As the word ba'el is not confined to Hebrew, so we find Baal-worship outside the bounds of Palestine. The Baal of Tyre was Melkart, and it was the worship of this deity that was introduced into N. Israel by Ahab, under the influence of his Sidonian wife Jezebel. This seems to have been a worship of a much more elaborate character than that of the local ba'ēlim (1K.18.22); and though perhaps it was not designed by Ahab to take the place of the worship of Jehovah, Elijah perceived clearly that the nation must choose between the two, and made that solemn appeal and trial by fire which gave a check to the foreign worship. It is, however, to be noted that though this form of Baal-worship was stamped out by Jehu at a succeeding time, the worship of the local ba'ēlim, associated with time immemorial with the cultivation of the soil, and claiming to be not inconsistent with the acknowledgment of Jehovah as one national God, was still practised, as the book of Hosea shows. Though put down from time to time by reforming leaders, it ever again reasserted itself (cf. Judg.6.25 with 8.33, Judg.10.10 with 1Sam.7.4, 2K.3.2), and seems never to have been permanently abolished till the Exile (2K.17.16). In the Assyro-Babylonian religion the name Baal occurs in the form of Bel, who is one of the first triad gods, the god of the earth, as Anu is god of the heavens, and Ea the god of the abyss. At a later stage he became identified with Marduk, the city-god of Babylon. Among worshippers of the heavenly bodies the name Baal would be naturally, and apparently was sometimes, given to the sun: but this does not warrant the conclusion that Baal was originally the sun. In 2K.23.5 the worship of Baal is distinguished from the worship of the sun. The name enters into a great many compounds, denoting the god of a locality or potency, and then the name of the place of this supposed influence. It also forms the root of the formation of some personal names. The chief of these compounds (besides the place-names in next art.) are.—1. BAAL-BERITH' (lord of covenant), also called El-berith, a deity worshipped at Shechem (Judg.9.4,46).—2. BAAL-GAD' (lord of good fortune), in the valley of Lebanon under the name of Gaden, and sometimes with Ba'albek, by others supposed to be the same as Baal-hermon, and located at Hasbeya (see next art. and GAD).—3. BAAL-HANAN' (Baal has been gracious), proper name of (a) one of the kings of Edom (Gen.36.38), (b) one of David's officers (1Chr.27.28).—4. BAAL-PEOR' (lord of smoke), a Baal, the deity, into whose impure worship the Israelites fell (Num.25.3).—5. BAAL-ZEBUB' (q.v.). W. Robertson Smith, Religion of the Semites, lect. iii.; F. Baethgen, Beiträge zur semitischen Religionsgeschichte (1888), pp. 17 ff. [J.R.]

Ba'al, Baalah, Baalath (geographical). "High," an element in various town names.—1. BAAL (1Chr.16.39), on S. beach near the Beer-sheba desert, called also BAALATH-BEER (Jos.19.8; height of the well), otherwise Ramath-negheb (1Sam.30.27; height of the dry region). The site is unknown.—2. BAALAH (Jos.15.9), BAALE (2Sam.6.2), or KIRJATH-BAAL (Jos.15.60,18.14), names for Kirjath-jearim ("Erma", the city of the Israelitish leaders, on the tablets, in 15th cent. b.c., as Bit Belatu (Berlin 106), rebelling from Jerusalem (see 9.17).—3. Mount BAALAH (15.11), the high land W. of Ekron.—4. BAALATH, a town of Dan (19.44), near Gezer and Beth-horon (8 Ant. vi. 1), fortified by Solomon (1K.9.18), possibly the village Belait at Tell el-Belait, near Beth-horon.—5. BAAL-GAD, the N. limit of Joshua's conquests "in the valley of Lebanon," and "under mount Hermon" (Jos.11.17,12.7,13.5), perhaps at Ain Jedeideh, on the road to Damascus, N. of Hermon. See also preceding art.—6. BAAL-HAMON, where Solomon had a vineyard (Can.8.11), is unknown, unless we may read BAAL-HERMON (Judg.1.39); rChr.5.23), Hermon being noted for the vineyards on its slopes.—7. BAAL-HAZOR, near the town of Ephraim (2Sam.13.23), now the high summit Tell 'Asîr, N. of Bethel, and E. of the road to Shechem.—8. BAAL-MEON (Num.32.38; 1Chr.5.8), a town of Reuben near
NEBO; Eusebius places it 9 miles from Heshbon (Onomasticon), which is correct for Ma'an, a high mound with Byzantine ruins S. of Heshbon. On the Moabite Stone (after 900 b.c.) it is called BETH-BAAL-MEON, as also in Jos.15.17; and Je.48.23 BETH-MEON.—9. BAAL-PERAZIM (2Sam.5.20), a hill near the valley of Rephaim, W. of Jerusalem.—10. BAAL-SHALISHA (2K.4.42), perhaps in the land of Shalisha (1Sam.9.4). Eusebius places it 15 Roman miles N. of Lydda; perhaps at Kefy Thilth (the Arab. tb being the Heb. sh), 18 miles N. of Lydda.—11. BAAL-TAMAR (hill of the palm), near Gibeah of Benjamin (Judg.20.33).—12. BAAL-ZEPHON (height of the north; Ex.14.29), near the old head of the gulf of Suez. [c.r.c.]

Baal of Judah. [BAAL, geogr. 2.]
Ba'al. [Ishh.]
Baalim. [BAAL, the god.]
Baalis, the Ammonite king who used the traitor Ishmael to slay Gedaliah (Je.40.14). [ISHMAEL, 6.]

Baal-zebub (בַּעֲבֹブ = LXX. Baal Mivaw, 2K.1.2,3,6,16), the Philistine god of Ekron, whose oracle was so famous, that when Ahaziah, king of Israel, was dangerously sick, he sent to inquire of it whether he should recover, and was accordingly rebuked by Elijah. The name Baal-zebub (lit. lord of flies), assuming it to be correct, would probably mean among the Philistines, "he who sends and averts plagues of flies," cf. the worship of Zeb or Melucos (Zeus, the averter of flies) in Elis, attested by Pausanias and Clement of Alexandria. But probably the second component, הַבָּל (z'hôwbh = fly) is a contemptuous Jewish substitute (cf. the substitution of bôsheh, shame, for Baal) for an original בָּל (z'hôb), = lofty abode, a word used of Solomon's temple (1K.8.13), and of heaven (1S.63.15; Hab.3.11). The true form, therefore, is Baal-zebul (cf. N.T. Belêζωβία), and the true meaning is, either, lord of the temple (at Ekron), or (more probably) lord of LXX. wrongly renders Baalzebul "the lord Meluc of LXX. = the lord Melucus, the god of the flies." Josephus has a further error. Misled by the feminine article of the LXX. (ἐν τῇ Baal Mivaw, 2K.1.2a,6,16), which merely indicates that, in reading, αἰρεῖν (shame) is to be substituted for the hateful word Baal, he makes Baal-zebub a goddess (9 Ant. li. 1). In N.T. the word occurs 7 times (Mt.10.25,12.24,27; Mk.3.22; Lk.11.15,18,19), always as a title of Satan, an application natural enough at a time when the gods of the heathen were generally identified with demons. The true N.T. form is undoubtedly Belēζωβία, Beezelboul (W. H.'s Belêζωβία is a palpable blunder), and the N.T. meaning is, therefore, "lord of the abode" (cf. the play upon the meaning; Belēζωβία = οἶκος μεγάς, Mt.25.5), the abode "being understood to not be heaven, but hell. J. Lightfoot's suggestion that Beezelboul is a contemptuous alteration of Beezel-boul (lord of flies) into בַּעֲבֹב, ba'al zebhel (= lord of dungh) is less probable. Baudissin in Realectly, f. prot. Theol., "Baal and Bel"; Enc. Bib., arts. "Baal-zebub," "Baal-beel," [c.h.]

Baal, Babylon, was properly the capital of the country called, in O.T., Shinar, and in later times Chaldea, or the land of the Chaldees. It stood on the level of the Euphrates, E of the city of Ereh, Accad, Calneh, and other cities, is doubtful, but it is certain that it existed in the time of Sargon of Agadé (c. 3000 B.C.), or even earlier. It probably attained the position of capital of the country c. 2000 B.C., when the Dynasty of Babylon ruled, the provinces not being included Elasar (Gen.14.1) and the southern states, which last always retained a measure of independence. According to Herodotus, the city formed a vast square of 120 stades each way (close upon 14 miles, or nearly 56 miles in circuit). It was surrounded by a deep and broad ditch, and by a wall 50 cubits wide, 20 cubits thick and 200 cubits high, and by 100 gateways with brazen gates. The city was situated on both sides of the Euphrates, and at the point where the wall met the river, return-walls in the form of ramparts stretched along each bank. Its houses were of three and four stories high, and the roads by which it was entered were nearly straight lines, and in the E and W, the river were closed by brazen gates set in the ramparts. Within the great outer wall was another "not much weaker, but enclosing a
smaller space.” In each division of the city was a building, one being the king’s palace, large and “strongly fortified around,” and the other the great temple of Belus. The latter was a tower in stages to the number of eight, with a sanctuary at the top in which the god was said to visit the woman who dwelt there. [Babel, Tower of.] The two divisions of the city were united by a bridge formed of stone piers connected by movable platforms, said to have been built by queen Nitocris when she changed the course of the Euphrates to prevent invasion. Ctesias gives the circuit of the city as 360 stades only (rather less than 41½ miles). The two divisions were connected by a bridge 5 stades (more than 1,000 yds.) long, and 30 ft. broad, of the kind described by Herodotus. At each end was a royal palace, that in the eastern city being the grander of the two. Besides the bridge, the two palaces were also connected by a tunnel under the river! Ctesias’ description of the temple of Belus has not come down to us. All the ancient writers represent Babylon as occupying a tract of large size, and enclosed within lofty walls, but their estimates differ. (To the above may be added Strabo, 385 stades; Q. Curtius, 368; and Clitarchus, 365 stades.) From Herodotus’ and Diodorus’ descriptions it seems clear that this space was not covered with houses, and Q. Curtius says that as much as nine-tenths consisted, even in the most flourishing
times, of gardens, parks, paradises, fields, and orchards. The reference to the height of the gates of Babylon and the breadth of her walls (J.e. 51.58; cf. 50.15 and 51.53) indicates that it was these dimensions, rather than their extent, that were renowned. About 21 in. has been suggested as the length of the royal cubit, which would make their height, as indicated by Herodotus, about 360 ft., which is clearly impossible. According to Ctesias, the wall was strengthened by 250 towers, irregularly disposed so as to guard the weakest parts (including, probably, the gates).—The Ruins. These lie about 5 miles above Hillah, on the E. bank of the Euphrates, and consist chiefly of three great masses of buildings. The northernmost is a squarish mound called Babil; some distance S. is a group of mounds designated al Mujellibeh, "the overturned," the lower one, which is called the Qasr, or "castle," being the most considerable. Still farther S. is the mound 'Amrân ibn Ali, so called from the tomb which, with the sanctuary named Ibrahim al Khalil, occupies the summit. 'Amrân is about 650 yds. long by 440 wide, and has at its N. end a depression about 110 yds. square, called "the city of the holy rock." More recently a second-shaped mound al Aswad, "the black." On N., between this and al Mujellibeh, is a large mound named Merkes—i.e. "centre," on account of its position. All these mounds are enclosed by the remains of the ancient wall of the city. Beginning by the old bed of the Euphrates (W. of Babylon), runs for about 660 yds., and bending S. (930 yds.), runs S.E. for a couple of miles. Being then E. of the mound Merkes, after a gap, it turns almost at a right angle and goes S.W. towards the Euphrates for about 14 miles, where its traces are lost. The wall probably made a slight bend at this point, and then joined the two small isolated mounds, and then continued on to the river. The wall on the W. bank is practically the remains of a rectangle, and seems to be a continuation of that dividing the Qasr mound into two parts, its N. end being distant from it about 1 mile 200 yds. in a W.S.W. direction. It then makes a wide angle, and runs for about 320 yards S.S.W., when it again bends, and after running E.N.E. for a short distance, is lost. Extensive gaps occur on all three sides. In the eastern division of the city, E. of the group al Ahmareh, is a rampart which is regarded as part of the inner wall of the city, running nearly N. and S., with a break, to point near the southern part of the great outer wall. As has long been known, the Euphrates anciently took a much straighter course than now. It entered Babylon close to the mound Babil. N. of the Mujellibeh it occupies its old bed, but anciently, instead of making two bends to the W., it practically skirted the Qasr and 'Amrân. Curving then slightly to the W., after its junction with the Borsippa canal, it turned S.E., and receiving the waters of the Araḫtu Canal, bent southwards again. The Araḫtu Canal began some distance N. of the Qasr, skirting its eastern side, and continued S. past the mound 'Amrân, entering the river near the bend S.E. after running for about 1 mile. Two other canals are indicated by Weissbach—the Merodach Canal N. of the Qasr, fed from the Euphrates, and the canal Libîl-hêgalla S. of the same, running from the Euphrates to the Araḫtu. The most important ruin is the Qasr, or castle, regarded as being the remains of the great palace at Babylon. It seems at first to have consisted only of the building S. of the continuation of the western city wall, and had been several times destroyed and rebuilt. After its restoration by Nabopolassar, it was devastated by an overflow of the Euphrates, whereupon Nebuchadnezzar enlarged it, rebuilding it with baked brick so firmly that the lower portion remains still in existence. Its roof was of cedar, and its doors of cedar covered with bronze. The thresholds were of bronze, and the palace was adorned with gold, silver, and costly stones. On the N. side of the wall he built another edifice to serve both for fortress and royal residence. It was connected by a corridor with the old palace already referred to. This building is said to have been completed (without the decorations, apparently) in 15 days (India House Inscrip-
to the Chamber of Fate. Near it seems to have been Bit niqê, "the temple of Offerings," but its position has not yet been ascertained—possibly it lies under the mound Aḫmarch. Weissbach is of opinion that some of the chambers of Dū-azaga, "the Holy Seat," as the Chamber of Fate was called, exist where the N. end of the procession-street meets the Merodach Canal. The mound al. Aswad conceals the ruins of a temple called E-pa-tu-tilla. Among the temples still to be discovered are

**VIEW OF BABIL FROM THE WEST.**

W.D.A.
made war in N. Babylonia. Another, Lugal-
zaggli, king of Kis, fought in Babylonia, and
carried his arms as far as the Mediterranean.
Both seem to have reigned before 4000 B.C.
Of special interest is the state of Lagaš (Tel-
loj), the growth of which can be traced in its
records. In the time of Uru-ka-gina, Lugal-
zaggli made an inroad, and spoiled all its
palaces and temples. In 3800 B.C. (according
to the chronology of Nabonidus), or somewhat
later, was founded the city of Agadé, whose
dominions extended from the Persian Gulf to the
Mediterranean, though whether his rule was effective or not over
that extent of country is uncertain. His son
Naram-Sin was also a conqueror, and a
wonderfully beautiful bas-relief showing him
marching over the mountains has been dis-
covered at Susa. About 2600 B.C. came the
dynasty of Ur (of the Chaldees), the greatest
of whose kings was Dungi, with a reign of 58
years. He warred in Elam on the E. and
Marash on the W. Rather earlier than 2000
B.C. came the dynasty of Babylon, which, not-
withstanding its name, was of Sumerian origin.
Sixth in the list of kings we finds the name
Hamurabi, who is identified with the An-
râphel of Gen. 14. Contemporary with him
was Eri-Aku (Arioeh) of Larsa (Ellasar), who
seems to have been succeeded by Rim-Sin,
the king captured by Hamurabi in the 31st year
of his reign. During this period other dynas-
ties ruled in the S., and came into conflict
with Šamšu-iluna, Hamurabi's son and successor.
About the 18th cent. B.C. the Kassites became
masters of Babylonia, but gradually assimili-
ated with the people whom they governed,
though Kassite names constantly occur. For
many centuries the power of Assyria had been
growing, and its kings began to interfere
actively in Babylonian affairs. One of these
occasions was when Assur-uballit (c. 1400 B.C.)
invaded Babylonia to avenge the murder of
king Kadašman-murus, his daughter's son, and
set Kuri-galzu on the throne. It was appar-
etly a third Kuri-galzu who was challenged by
Hürba-tilla, king of Elam, to fight at Dur-
Dungi, and surprised the enemy by an attack
by this, Kuri-galzu attacked the Assyrians, but
was defeated at Saggû on the Tigris. We
are not surprised to find, after this, an
Assyrian king, Tutulti-Nirig (c. 1300 B.C.)
ruling the country. In the reign of Nabu-
nasir (Nabonassar), who came to the throne in
747 B.C., there was a feud between the Babyl-
onians and the Borsippites. In 729 B.C. the
Assyrian king Tiglath-pileser III. took the
throne. He appears in the royal list as Pulu
(Pul). 727 B.C. saw the accession of Shal-
maneser IV. (Elulæas). Sargon followed him
on his death in 722, but being occupied with
the Hettites, contented himself to attend to his
Babylonian province, and Merodach-baladan
seized the throne three months later. Sargon
made good his position in Babylonia, however,
and was succeeded by his son Sennacherib in
705; but in 703 Merodach-baladan again took
this throne. Having deposed him, Senna-
cherib set on the throne Bel-Ilunu, a Chaldean
but his rule not being satisfactory, he was re-
placed in 700 B.C. by Assur-nadin-šum, Sen-
tacherib's son, who reigned 6 years. This
prince was captured by Hallušu, king of Elam,
whereupon Nergal-ušēzib (Sûzub) mounted the
throne. Taken prisoner by the Assyrians after
a tribual rule of 18 months, he was followed
by Merodach-bârûdânu (Nebuchadnezzar, I) who
reigned in 692 B.C. He being captured in his turn by
the Assyrians, Sennacherib again mounted the
throne (689 B.C.), which he occupied until his
death in 681. Sennacherib's ravages during
the final struggle for supremacy were remem-
bered by the Babylonians long afterwards.
His son Nebuchadnezzar (681-669 B.C.) spent
lengthy years in the east of Babylonia. He
appealed to the people by rebuilding the
destroyed temples, but met with much discontent.
He was succeeded by his second son, Šamaš-šum-
ukîn, in 669 B.C. This ruler incurred the
enmity of his brother Aššur-bani-âplû, king of
Assyria, and fearing to fall into his hands, set
fire to his palace and perished in the flames.
The next three rulers were Kandalanu, sup-
posed to be the same as Aššur-bani-âplû, his son Aššur-étêl-lânî, and Sin-šarre-îšûn (Sara-
cos). Nabopolassar is thought to have been a
general in the army of the last-named, who,
and having been sent to Babylonia to put down a
revolt, turned his arms against his royal master, and became king of Babylon.
His reign of 21 years (626-604) was a most suc-
cessful one, and under him Babylonia again
became a great power. Wishing to conquer
Syria, he sent his son Nebuchadnezzar with an
army to reduce the country to submission, but
died at Babylon whilst the operations were in
progress. Nebuchadnezzar mounted the throne
in 604. He reduced Jehoiakim to sujubction
(2K. 24.1ff.), and later on captured Jerusalem,
carrying off Jehoiachin and his court captives
to Babylon (598 B.C.). Jerusalem was be-
sieged and captured again in 586 B.C., when
the temple was destroyed; and Tyre and
Egypt also felt the force of his arms. Evil-
Merodach succeeded him in 561 B.C., and
showed marked favour to Jehoiachin. He
was murdered by his brother-in-law Neriglis-
sar, who mounted the throne in 559 B.C., and
was followed by his young son Labâsî-Marduk
in 556. This last was assassinated after a rule
of one month. His successor, Encilulnisar, was
Belshazzar, was elected to succeed him. Bel-
shazzar, who held the post of commander-in-
chief, seems to have failed to keep the country
in a proper state of defence. This attracted
the attention of the conquering Cyrus, who
sent his general Gobryas of Gutl (a part of
Media—see DARIUS), and Babylon was cap-
tured in 538 B.C. The case with which the
conquest was effected suggests that the Baby-
lonians rather desired the change. Nabonidus
is said to have been transferred to Carmania,
but Belshazzar was apparently killed in an
attack on the night of Marchesvan 11. As
a part of the Persian empire Babylon con-
tinued to be a royal residence. Alexander
the Great intended to make it the capital of his
eastern provinces, but died before he could
carry out his plan. To all appearance it was
the foundation of Seleucia on the Tigris which
gave the death-blow to the prosperity of the
city. The Persian and Seleucid dynasties of Belus still continued, for the people were
closely attached to the centre of their religious
life. The site was probably still inhabited
until within a decade or two of the Christian era, and perhaps even later (cf. 1Pe.5:13). Babylon has formed quite a mine of building-material for the towns around, and still does so. The "great city: "the beauty of the Chaldees' excellency," has thus in reality "become heaps" (Je.51:37). Her walls have "fallen" (51:44), been "thrown down" (50. 15), become "utterly broken" (51:58). "A drought is upon her waters (50:38), for the system of irrigation on which, in Babylon, fertility largely depends, has no longer been carried out in the same systematic way. Her cities are everywhere "a desolation" (50:45), her "land a wilderness"; "wild beasts of the desert lie there," and "owls dwell there" (cf. Layard, Nineveh and Babylon, p. 484, with Is.13:21, 22 and JJe.50:39). The natives are said to regard the whole site as haunted, and the Arab will neither pitch his tent there nor the shepherd fold sheep (Is.13:20). For the ruins, see Fried. Delitzsch, Im Lande des einstigen Paradieses (1903); Weissbach, Das Stadtbild von Babylon (1904). For the occurrence of the name in 1Pe.5:13 and in the Apocalypse, see BABYLON, S. E.-F.

**Babel, Tower of.** This edifice is only mentioned in Gen.11:4, 5, and is spoken of as having been built of brick, with bitumen (A.V. *slime*) for mortar, and left in an incomplete state in consequence of the builders ceasing to understand each other. Jewish tradition states that fire fell from heaven, and split the tower through to its foundation; whilst Polyhistor and other writers say that the winds overthrew it. Traditionally the tower of Babel was regarded as the great *ziggurat* or temple-tower of Nebo at Borsippa (the Birs-Nimrud), though the distance of that site from Babylon is against this identification. Notwithstanding the statement in Gen.11:4, 5, that the building of the tower was stopped, there is every reason to think that it was ultimately finished, and it is probably the building called "the Tower of Babylon" by Nebuchadnezzar—namely, E-temen-an-ki (*the house of the foundation of heaven and earth*), N. of the Euphrates, and in that part of its valley E-temen-an-ki is called by Herodotus (I. 181) the temple of Belus, and described as a solid step-pyramid within an enclosed space 400 yds. square, to which access was gained through doorways closed by gates of bronze. The stages of the pyramid (not reckoning the lowest, which was the foundation-platform) were seven in number, and an ascent going round the structure gave access to the top. At this point was a chapel or shrine regarded by the Babylonians as the god's dwelling-place, though no statue represented him there; his image, a seated statue said to have been of solid gold, was in a shrine lower down. Before it was a table-land, 300 ft. wide, but in that e. was also the temple-platform, and the steps thereto. Outside were two altars, the smaller (for the sacrifice of unweaned lambs only) being of gold. The larger altar was for full-grown victims. A Babylonian description of this building is probably in existence, a tablet containing one having been found in the hands of the late (Georg) Smith. It stated that the temple had two courts, one within the other, and both oblong.

The temple-area was provided with six gates. The platform within it, however, was square, and its wall had four gates opening towards the points of the compass. The building connected with the *ziggurat* or temple-tower had on the E. shrines to Nebo and Tasmit, his spouse; on the N. to Ea (Hea) and Nusku; and on the S. to Anu and Bel. On the W. was a building connecting of two stories, whose upper story was a temple-tower dedicated to Merodach (Belus), for it was there, according to Smith's tablet, that they kept the couch and throne of gold, together with other things of great value. Adopting Smith's measurements, the lowest stage of the tower itself was 300 ft. square by 110 ft. high, and ornamented with recessed groovings which were characteristic of Babylonian architecture. The second stage was 260 ft. square by 60 ft. high, and had apparently sloping or hollow sides. Stages 3 to 5 were 200 ft. high, and respectively 200, 170, and 140 ft. square. The measurements of the sixth stage were 134 ft. by 134 ft., but the taller ones were in the same proportion as the others. The text made the seventh stage to be the sanctuary of the god, its dimensions being 80 ft. long, 70 ft. broad, and 50 ft. high. The total height of the structure Smith estimates to have been the same as the length and breadth of the lowest stage—namely, 300 ft. above the plain. Like other temple-towers, the stages were probably tinted with the planetary colours, the order, beginning at the top, being gold, silver, yellow, blue, black, and white, the first two being emblematic of the sun and moon. There was probably no idea of "scaling heaven" in the minds of those who raised either this or any other of the Babylonian temple-towers; the expression used in Gen.11:4 is a mere exaggeration for great height (cf. Deut.1:28; Dan.4.11, etc.), and is not to be taken literally. Diodorus says that the great temple-tower dedicated to Belus was used by the Chaldeans as an observatory (ii. 19), but it is doubtful if there is any confirmation of this. These legends may have been partly due to the

Probable form of the "Tower of Babylon," based on Mr. G. Smith's account, the description of Herodotus, and the remains of similar structures in Babylonia and Assyria.
BABI

BADGER-SKINS

feeling that, when sacrificing or worshipping, those on the summit were nearer to the deity than on the plain below. It has been stated that the temple-tower at Calah was built over a tomb. See Athenaeum, February 12, 1876; Weissbach, Stadtbild von Babylon (1904), pp. 19-20. [T.G.P.]

Babî (1 Esd. 8.37) = Babel.

Babylon. For an account of the city, see Babel. In this article we shall discuss only the two special uses of the name in N.T.—A. In 1 Pe. 5.13. St. Peter closes his epistle with a greeting from “Babylon.” The question arises as to what place is intended, by whom this letter was written, and so forth. But the church existed there in the apostolic age. Indeed, both hypotheses are unlikely.

(1) Babylon in Mesopotamia. But there is no evidence to show that St. Peter was at Babylon at the time of writing the epistle. For the early tradition of St. Peter's visit to Rome is too strong to be set aside. Moreover, St. Paul summoned St. Mark to Rome shortly before his own martyrdom (2 Tim. 4.11), and St. Peter here sends greetings from St. Mark. Silvanus, his own personal companion of St. Paul, and it is an interesting conjecture that by St. Paul's own wish St. Peter should have written this letter from Rome as an cirriolun to deepen the unity of the Church, as against the danger of a Pauline division party, and that he should have selected Silvanus, as a friend of St. Paul, to bear his letter. Further, the whole sentence in which the name “Babylon” occurs is cast in allegorical terms. The city is regarded as a lady (ἡ συνεκρητη; cf. 2 Jn. 1.13); and this accorded with the general usage of the epistle, which allegorically applies to Christians a description drawn from Jewish history (1 Pe. 1.1) and ascribes to them in a spiritual sense the privileges which O.T. gives to Israel (2.4-10). Finally, the allusion to Rome as “Babylon” occurs both in Jewish and Christian literature, and would be well understood. In such mystic usage of language the later Jews delighted. —B. In the Apocalypse (16.19, 17.5, 18.2) represents Rome. The Apocalypse is a great drama of the working out of the perpetual conflict between the opposing principles of good and evil, between the spiritual forces on one hand and the world-power on the other. To the apostle the mighty Roman empire, with its luxurious and vicious capital and its persecution of the Christian Church, was the embodiment of the world-power in his day. Throughout the book the great conflict is represented under symbolic imagery; hence Rome appears as “Babylon,” the typical world-power of O.T., while the holy city of the old covenant is spiritualized as the new Jerusalem and represents the Christian Church. [J.G.V.D.]

Babylonians, in a special sense the inhabitants of Babylon, were called “Semitic” colonists planted in the cities of Samaria by the conquering Assyrians (Ezr. 4.9). These people were of Semitic stock, but probably had a considerable admixture of non-Semitic (Sumerian) blood, and spoke, from about the middle of the third millennium onwards, the Semitic-Babylonian language. When, however, the warlike Chaldeans predominated about the 7th cent. B.C., the names Chaldean and Babylonian became almost synonymous (Ezk. 23.14, 15; cf. Is. 48.14, 20). [T.G.P.]

Babylonish garment (lit. robe of Shinar; Jos. 1.21). An ample robe ornamented with embroidery, or perhaps a variegated garment, which was the symbolic garment worn by world-power (A.).

Baca’, Valley of, a valley through which the Psalmist sees in vision the pilgrims passing in their march towards the sanctuary of Jehovah at Zion (Ps. 124.6). The R.V. reads of “weeping,” or of balsam trees.” Perhaps habbûdîth is connected with hab bîkhânî (A.V. mulberries; 2 Sam. 5.23, 24), near the Repham Valley. [c.c.r.]

Bac’chides, a friend of Antiochus Epiphanes, and governor of Mesopotamia, was sent by Demetrius I. (Soter), 162 B.C., to install Alcimus as high-priest in Jerusalem. Having failed to force him to withdraw (Macr. 18.23), after Nicander's defeat by Judas, Bacchides sent again into Judaea, and defeated and killed Judas at Elasa (9.1-18). To maintain Syrian domination there against Jonathan (9.25-32, 45-53), he remained in Judaea till the death of Alcimus (160 B.C.), when he returned to Antioch (9.57). In 158 B.C. he invaded Judaea, but was defeated at the eastern front of the Syrian party there, but met with ill success, and was glad to make terms with Jonathan and withdraw (9.68-72).

Bacchu’rus, one of the “holy singers,” who had taken a foreign wife (1 Esd. 9.24). Possibly the name of the “singer” (cf. Ezk. 10.24), which is not otherwise represented in 1 Esd., has got displaced and corrupted into Bacchurus (see Speaker's Comm., on 1 Esd., i.e.).

Bacchus. [Dionysia.]

Bace nor (2 Mac. 12.35), apparently a captain of horse in the army of Judas Macabeus; or possibly a title of the company.

Bac’rites, The, the family of Recuber, son of Ephraim (Num. 26.35).

Badger-skins. The Heb. tahash, which A.V. renders badger, occurs in connexion with or, ‘rodh (skin, skins), in Ex. 25.5, 26.14, 25.7, 23, 36.19; Num. 4.6ff. 14, 25. In Ezk. 16.10 tahash occurs without ‘rodh, and is mentioned as the garment out of which women's shoes were made; in the former passages the tahash skins are named in relation to the tabernacle, ark, etc., and appear to have formed the exterior covering of these. There is much obscurity as to the meaning of tahash. Most ancient versions seem agree that it designates not an animal, but a colour, either black or sky-
blue. It is difficult to understand why it should be thus interpreted, since there is no justification for such a meaning, either from etymology or from cognate languages; while from Ex.35.23 taḵasḥ seems to be of frequent use among the Israelites of the Exodus, and the construction of the sentences where the name occurs points to a skin rather than a colour. In the German of Luther and in A.V. it is translated "badger"; but although a badger (Meles taxus canescens) near akin to the European animal is common in the parts of Palestine, it is unlikely that it could occur in the Sinaite desert in numbers sufficient to have furnished skins for the purposes indicated. On the other hand, taḵasḥ appears equivalent to the Arab. takhas, a term which seems to be applied to the Red Sea porpoises, dolphins, and dugongs: Tristram adds seals, which are, however, absent from the seas connected with the Indian Ocean. The Red Sea dugong has been named Halicore tabernaculi on the supposition that its skin, which forms excellent leather, constituted the real taḵasḥ. Dugongs and manatis (Manatus), collectively known as sea-cows, are marine and estuarine mammals constituting the order Sirenia. Although often confounded with whales and porpoises (Cetacea), they are really more nearly akin to elephants. [R.L.]

Bag. (1) kārīṯ (2 K.5.23; Is.3.22; A.V. "crisping-pins, R.V. "satchels"), only in plur.: used to carry money, or as a lady's ornamental hairgrips. (2) kāṣ, a bag, for carrying weights (Deut.25.13; Pr.16.11; Mi.6.11), also used as a purse (Pr.1.14; Is.46.6). (3) kālāl, translated "bag" in 1 Sam.17.40, 49, is a word of most general meaning (see Gen.42.25; 1 Sam.9.7). The shepherd's "bag" which David had seems to have been worn by him as necessary in his calling, and was probably, from a comparison of Zech.11.15,16 (where A.V. "instruments" is the same word), for the purpose of carrying the lambs which were unable to walk, and contained materials for healing such as sick and binding up those that were bruised (cf. Zech.34.16). Another properly called "bundle" (Gen.42.25; 1 Sam.25.29), appears to have been used by travellers for carrying money during a long journey (Pr.7.20; Hag.1.6; cf. Lu.12.33, Tob.9.5). In such "bundles" the priests bound up the money which was contributed for the restoration of the temple under Jehoiada (2 K.12.10; A.V. "purse in bags"). The "bag" which Judas carried was probably a small box or chest (Jn.12.6,13,29; 1 Cor.7.8,11). When the priests of Balaam were summoned by the frightened Moabites to stand and bless Moab, the "bag" was found in the high places of Baal. He comes to the field of Zophim near the cairn of Nebi, and lastly to the cliff of Peor, on the narrow spur which runs out to Minyeh, each of which was a place sacred to one of the Moabite deities corresponding to Apollo, Mercury, and Priapus, and at each seven altars were raised, one to each of the seven planetary gods, whose aid was invoked against the God of Israel by the sacrifice to each of a bullock and a ram. But at each place Balaam, wishing to curse, blesses, and at last, recognizing his defeat, "he went not, as at the other times, to seek enchantments, but he turned in his face towards thédeserness." Then "the Spirit of God came upon him," and, to Balak's disgust, he not only foretells the victories of Israel, but indicates their future triumph over Moab. Then he rose up and went his way, having first given the advice to Balak by which the children of Israel were seduced and punished by plague (Num.25.15,31.16; Rev.2.14). He joined himself with Midian, and was slain in company of Skt. bhagavān, "fortunate, "lucky"; Akhaemenian Pers. baga, "god"; Avestic baga, bagha, "lot," "gilt, "bega, "wealth"). Another form is Bagasus (Gen.10.3; Ezech.27.23; Xer.8.14). [W.ST.C.]

Bagoi (1 Esd.5.14) = BIGVAT, I.

Balaam. [BAGA]

The history of the Balaamite's confiding enmity is probably borrowed by the author of this apocalyptic romance from that of the favourite Egyptian enmity of Artaxerxes III. of Persia. The historical Bagoas poisoned Artaxerxes in 338 B.C. and killed Arses 3 years later, but was himself put to death in 334 B.C. by Darius Codomannus. The true is Persian, Bagav or Bagavān, nom., cf. Skt. bhagavān, "fortunate, "lucky"; Akhaemenian Pers. baga, "god"; Avestic baga, bagha, "lot," "gilt, "bega, "wealth"). Another form is Bagasus (Gen.10.3; Ezech.27.23; Xer.8.14). [W.ST.C.]

Bagoi (1 Esd.5.14) = BIGVAT, I.

Balaam. [BAGA]

The history of the Balaamite's confiding enmity is probably borrowed by the author of this apocalyptic romance from that of the favourite Egyptian enmity of Artaxerxes III. of Persia. The historical Bagoas poisoned Artaxerxes in 338 B.C. and killed Arses 3 years later, but was himself put to death in 334 B.C. by Darius Codomannus. The true is Persian, Bagav or Bagavān, nom., cf. Skt. bhagavān, "fortunate, "lucky"; Akhaemenian Pers. baga, "god"; Avestic baga, bagha, "lot," "gilt, "bega, "wealth"). Another form is Bagasus (Gen.10.3; Ezech.27.23; Xer.8.14). [W.ST.C.]

Baja (1 Esd.5.14) = BIGVAT, I.

Balaam. [BAGA]

The history of the Balaamite's confiding enmity is probably borrowed by the author of this apocalyptic romance from that of the favourite Egyptian enmity of Artaxerxes III. of Persia. The historical Bagoas poisoned Artaxerxes in 338 B.C. and killed Arses 3 years later, but was himself put to death in 334 B.C. by Darius Codomannus. The true is Persian, Bagav or Bagavān, nom., cf. Skt. bhagavān, "fortunate, "lucky"; Akhaemenian Pers. baga, "god"; Avestic baga, bagha, "lot," "gilt, "bega, "wealth"). Another form is Bagasus (Gen.10.3; Ezech.27.23; Xer.8.14). [W.ST.C.]

Baja, a Levite (2 Sam.3.16,16.5,17.18,19.16), on David's route to Mahanaim (1 K.2.8). The hero Azavāvi was a Baharumite (1 Chr.11.33), or a Barhumite (2 Sam.25.30), probably of the Bahurim. The prophet Jonathan reads Almon for Bahurim, perhaps as meaning "youth," but suggesting Almon (Almit), a little N. of the old road to the Jordan Valley, which crosses N. of the mount of Olives. It is remarkable also that Beth-azavāvi (now Hizme) is only a mile N. of Mahanaim, the standard route through the ruin, but a steep "hill side" slopes thence, separated from it by a ravine to "go over" (see 2 Sam.16.9.13). [C.R.C.]

Bahjīth (the house; R.V. Bayith, Is.15.2), preceded by the def. article in the Heb. The LXX. does not mention it. Perhaps a "temple." [C.R.C.]

Bakkakkar, a Levite, apparently a descendant of Asaph (1 Chr.9.15). Bakbuk. "Children of Bakbuk" were Nethinim who returned from captivity with Zerubbabel (Ezr.2.51; Ne.7.53).

Bakkukiah. I. A Levite in the time of Nehemiah (12.29) who perhaps the same as 2. A Levite porter (Ne.12.25).

Baker, Baking. [BREAD.]

Balaam, son of Beor (Num.22.5), lived at Pethor in Mesopotamia (Deut.23.4), and was summoned hence, "brought from Aran out of the mountains of the East (Num.23.7), by Balak, prince of Moab, in order to curse Israel. The offering through the ruin, but a steep "hill side" slopes thence, separated from it by a ravine to "go over"
with five Midianite kings by the sword of the people he had endeavoured to curse (Num. 31:8). The speaking ass (Num. 22:28) occasions no difficulty to those who believe in miracle or are familiar with folklore. "It is enough that the ass gave intelligible expression to its resentment and sense of wrong in such language as was natural to an ass, and that it attained all the ends of language, since it spoke home comprehensibly to the evil conscience of Balaam." *Butler's Sermons*, serm. 71; F. D. Maurice, *Patriarchs and Law-givers of O.T.*, pp. 229 f.; F. W. Robertson, *Sermons*, vol. iv., serm. 45; cf. art. in *Guardian*, Sept. 27, 1905, by A. Smythe Palmer on "The Speaking of Balaam's Ass." [Nicolaianes.] [C.R.D.B.]

**Bal lac** (Rev. 2:14) = Balak.

**Baladan.** [Merodach-baladan.]

**Balah** (Heb. בָּלַח, Balam; *waste;* Jos. 19:3, or *Elbah* [1 Chr. 4:29], a town of Simeon. The site is unknown; it has no connexion with Balaah. [C.R.C.]

**Balak** (Heb. בָּלַק, Balaam), son of Zipor, king of the Moabites at the close of the Israelitish wanderings in the wilderness. Balak entered into a league with Midian and hired Balaam to curse the Hebrews. His designs were frustrated (Num. 22-24). He is mentioned also in Jos. 24:9; Judg. 11-25; Mi. 6:5; Rev. 2:14. [Balaam.]

**Balam** (Jos. 19:3). [Belalm.]

**Balance.** [Weights; Law in O.T.]

**Balas'amus** in *Ezr. 9:43*. The corresponding name in Nehemiah is *Maasaiyah*, 6.

**Balm** (Heb. בּּלָם, Bôrûh) occurs in Gen. 37:25 as brought by Ishmaelites from Gilead to Egypt; in 43:11, as one of the presents sent by Jacob to Joseph; in Je. 8:12, 46:11, 51:8, where it appears that the balm of Gilead had a medicinal value; in Ezek. 27:17 (marg. *rosin*), as an article of commerce imported by Judah into Tyre. Perhaps בּּלָם does not refer to an extraction from any particular tree, but denoted any resinous substance with a medicinal value. [Spices; Mastick.] Hasselquist (Travels, 293) describes the true balsam-tree of Mecca. As the true balm or balsam was a rare and costly medicament, several other sophistations did duty for it, or contained it in an adulterated state and received its name. The trees yielding balm belong to the genus *Balsamodendron*, of Asiatic and N. African growth. Coverdale was the first to render בּּלָם "balm"; previously it was translated *rosin*. "Balm of Gilead" is a modern term, arising naturally out of Je. 8:12, 46:11. For a summary of what is known of the history of the balm-tree (*B. opobalsamum*), which grew in the region about Jericho according to Josephus, and was lost by the time of the Crusades, see Smith's *Dict. of Economic Plants. But Pliny's account is the most important. He says (xii. 25): "The tree that yeedeth it, Nature hath bestowed onely upon the land of Iurie. In old time it has been found but in two parks or hortyards, belonging both to the kings of Iurie. . . . The Emperors Vespasian, both father and son, brought one of those little Balme trees to Rome, and shewed it openly. . . . Pompey the Great likewise made proud boast [of it]. At the sacking of Jerusalem . . . about this very plant, there was a cruell battaile fought." See the whole chapter. [H.C.H.]

**Balnus** (Ezr. 9:31) = Binnui, 2.

**Balthasar** (Ba. 11:12) = Belshazzar.

**Bamah.** This word appears in its Heb. form only in one passage (Ezk. 20:29; see R.V. marg.). The cuneiform sign for *Bamatu* represents an altar or shrine, and the Heb. word has always this meaning. [C.R.C.]

**Bamah (bâmâ).** [High Place; Sanctuary.]

**Bamoth-baal** (high places, or monuments, of Baal; Jos. 13:17), a town S. of Heshbon, otherwise **Bamoth** (Num. 21:30, 20) "in the ravine," where Balaam found a "high place" (Num. 22:3, 23, 3; see 15:17). Possibly the remarkable dolmens of Wîdy Tîdeî, 6 miles S.W. of Heshbon, mark this site (Surv. F. Pal. p. 254).

[C.R.C.]

**Ban** (Ezr. 5:37) = Tobiah, 1.

**Banaias** = Benaias, 8, of the sons of Neba = Ethan (Ezr. 9:35; cf. Ezr. 10:43).

**Band.** [Troop.]

**Bani.**—1. A Gadite, one of David's mighty men (2 Sam. 23:36).—2. A Levite of the line of Merari, and father to Ethan (1 Chr. 6:46).—3. A man of Judah of the line of Pharez (1 Chr. 9:4).—4. "Children of Bani" returned from captivity with Zerubbabel (Ezr. 2:10, 10:29, 34; Ne. 10:14; Ezr. 5:12).—5. An Israelite "of the sons of Bani" (Ezr. 10:38).—6. A Levite, father of Rehum, 3 (Ne. 3:17).—7. A Levite who taught the people and
sealed the covenant (Ne.8.7,9,4.5,10.13) called Anus in 1 Esd.9.48. Possibly the same as 6, if the name is that of a family.—8. Another Levite, of the sons of Asaph (Ne.11.22).

Banid (Banias, R.V.; 1 Esd.8.36). This represents a name which has apparently escaped from the present Hebrew text (see Ezr.8.10).

Bannai'a (1 Esd.9.33) = Zabad, 5.

Banner. [ENSIGN.]

Ban nus (1 Esd.9.34) = Bani, 5, or Binu'1, 3.

Banquets, among the Hebrews, were not only a means of social enjoyment, but often a part of the observance of religious festivity. At the three solemn festivals when all the males appeared before the Lord, the family also had its domestic feast (Deut.16.11). Both males and females (1 Sam.1.9) went up together, to hold the festival. Sacrifices, both ordinary and extraordinary, as amongst heathen nations (Ex.34.15; Judg.16.23), included a banquet, and Eli's sons made this latter the prominent part. Besides religious celebrations, such events as the weaning of a son and heir, a marriage, the separation or reunion of friends, and sheep-shearing, were customarily attended by a banquet or revel (Gen.21.8,29,22.31,27.54; 1 Sam.25.20; 2 Sam.13.13). Birthday banquets were only mentioned in the cases of Pharaoh and Herod (Gen.40.20; Mt.14.6); but see BIRTHDAYS. The usual time of the banquet was the evening, and to begin early was a mark of excess (Ec.10.16; Is.5.11). The most essential materials of the banqueting-room, next to the viands and wine, which last was often drugged, with wines (John 2.9; Can.8.2), were perfumed ointments, garlands or loose flowers, white or brilliant robes; after these, exhibitions of music, singers, and dancers, riddles, jesting and merriment (Judg.14.12; 2 Sam.19.35; Ne.8.10; Ec.10.19; Is.5.12,25.6,28.1; Am.6.5,6; Wis.2.7ff.; Mt.22.11; Lu.15.25). Seven days was a not uncommon duration of a festival, especially for a wedding, but sometimes fourteen (Gen.29.27; Judg.14.12; Tob.8.19); but if the bride were a widow, three days formed the limit. The "table" (shulhan) was often merely a mat spread on the ground; round this the guests sat on the floor. The recumbent position referred to in N.T. belonged to a time when town-life had brought with it more luxurious habits. The separation of the women's banquet was not a Jewish custom (Esth.1.9). At the Pass-over four cups of wine, mixed with three parts of water, were blessed and passed round by the master of the feast.

Ban'us (Bannas, R.V.). In 1 Esd.5.26 "Bannas and Sudias" answer to "the children of Hodaviah," 3, in Ezr.2.40.

Baptism. (1) O.T. Preparation. As through divine providential guidance pagan rites had their ceremonial usages as signs of the need of purification and grace, so also under the more direct revelation of God there was in O.T. a foreshadowing of the sacramental principle which was to be prominent in the Christian religion, and an anticipation of the use of water in one of the chief sacraments. The rite of Circumcision; the ceremony of washing after conditions symbolic of sin (Lev.13-17; Num.19) and before approach to God (Ex.19.10,14,29.1,30.18-21; Num.8.7,21); the bathing of Naaman (2 K.5.10-14); and the references to washing in the prophecies of the Messiah (Is.52.15; A.V., and R.V., but not R.V. marg.; Ezek.36.25; Zech.13.1; cf. Heb.9.10,10.22) may all be regarded as being in their different ways preparations for the institution of Christian baptism. They, or some of them, may have led to the Jewish belief that the Messiah and His forerunner would baptize
BAPTISM but am and After Mk.1.4-11 commanded necessary addition to circumcision and a sacrifice, and some Jewish teachers held this baptismal rite sufficient for proselytes without circumcision. Partly through the O.T. purifications and partly through these Rabbinical baptisms, the idea of baptism would be familiar to Jews on the beginning of the ministry of St. John the Baptist. The "baptism of John," in a sense, placed all those who were invited to it in the position of Gentiles. While not itself a means of grace or of the forgiveness of sins, it was an indication of the will of God to forgive sinners, a sign of the remission of sins which was conditional on the use of the means of grace. A preparation of the Jewish people for the baptism of regeneration which Christ was to institute, and it may have conveyed some anticipatory touch of the effects of what Christ was to do in the future. By an act parallel to His submission to circumcision in His infancy, our Lord, as the representative of St. John as the type of the Baptist, by fulfilling all righteousness, dedicating His ministry to the Father, and indicating the future sanctification of water through His death and resurrection to be a sacramental instrument (Mt.3; Mk.1.9-11; Lu.3.1-22; Jn. 1.19-34). (3) Anticipations by our Lord and His disciples. In His discourse with Nicodemus (Jn.3.1-18), our Lord did not at once altogether without reference to the baptism of St. John the Baptist, alluded to the sacrament of Christian baptism, before the institution of it, in the saying, "Except any one be begotten anew [or, from above] he cannot see the kingdom of God." "Except a man be born of water and the spirit, he cannot enter into the kingdom of God" (Jn.3.3,5). By the ministry of His disciples, but not by His own personal act, He administered a rite of baptism during His life on earth which was probably similar in its purpose and effects to that of St. John the Baptist (Jn.4.1,2). The flow of blood and water from His side on the cross after His death is not unreasonably regarded as having had a mystical significance, and as pointing to the efficacy which the sacramental use of water derives from the death of Christ (Jn.19.34; cf. 1 Jn.5.6). (4) Institution and Administration of Christian Baptism. The Sacrament of Christian baptism was instituted by our Lord between His resurrection and ascension, when He gave command to His apostles, "All authority hath been given unto Me in heaven and on earth. Go ye therefore, and make disciples of all the nations, baptizing them in the name of the Father and of the Son and of the Holy Ghost, teaching them to observe all things whatsoever I commanded you; and lo, I am with you always, even unto the end of the world" (Mt.28.18-20). It is more likely that the apostles received the grace of Christian baptism together with the other gifts of the Holy Ghost on the day of Pentecost than that they were on this, or on any other, occasion baptized by our Lord, though there have been opinions that He baptized them (St. Augustine, Ep. ccxv. 3), or that He baptized the Blessed Virgin and St. Peter and that St. Peter baptized the other apostles (Euthymius Zigabenus, In Joan. Ev. iii. 5), or that our Lord baptized St. Peter and that St. Peter baptized the other apostles (Nicephorus, H.E. ii. 3). After the descent of the Holy Ghost on the day of Pentecost, and the sermon of St. Peter which followed (Acts 2.38), the rest of the apostles, "Brethren, what shall we do?" and received from St. Peter the answer, "Repent ye, and be baptized every one of you in the name of Jesus Christ unto the remission of your sins; and ye shall receive the gift of the Holy Ghost;" and the subsequent baptism was the means of the conversions of the seventy disciples (Nicephorus, H.E. ii. 3). Baptisms were administered as a result of the preaching of St. Philip the deacon in Samaria and to the Ethiopian eunuch (Ac.8.12,13,36-38). Saul of Tarsus after his conversion, Cornelius and his company after receiving the Holy Ghost, the proselyte Lydia and her household after she had given heed to the things which Paul spoke, the gader at Philippi, (after asking what he must do to be saved and receiving the answer, "Believe on the Lord Jesus, and thou shalt be saved") together with "all his") the Corinthians who believed, and the disciples at Ephesus who had already received baptism of John, were baptized (Ac.18,10,47,48,16.14,15,30-33,18,19.1-5). Baptism is spoken of by SS. Paul and Peter in their epistles, and by the author of Hebrews, as if it was assumed that all those in the Christian community had been baptized (Ro.6.3,4; 1 Cor.1.13; Gal.3.27; Col.2.12; IPe.3.20,21; Heb.9.10). It was begotten by water and the Spirit, and mentioned in the last section, coupled with the command to baptize "all the nations" (Mt. 28.19), indicate that baptism was regarded as a necessary rite for all who wished to become Christians. That infants as well as adults were baptized is not expressly mentioned in N.T. A concurrence of reasons supports a high probability that they were so baptized. The relation of Christian baptism to the Jewish religion would make it likely that the administration of circumcision to Jewish infants and of the Jewish baptism to the children of proselytes together with their parents would suggest to the early church that any infants who were members of a household receiving baptism should be baptized. It is likely that there were infants in the "households" baptized. The natural inference from the history of baptism in the Church is that infants had been baptized from the days of the apostles. The theological reasons for the baptism of infants which have been held weighty in later times are of such a character as would be likely to appeal to the earliest Christians. These general considerations derive some support from expressions in N.T. - e.g. the words of St. Peter, "To you is the promise, and to your children"; St. Paul's exhortations to children
and his teaching as to their duties and those of their parents, and his description of children as "holy" (1 Cor.7.14; Eph.6.1-4; Col.3.20, 21). Thus, that infants were baptized in N.T. times, while it cannot be proved, is very highly probable. (6) Matter of Baptism. It is obviously assumed throughout N.T. that baptism was administered with water. This is expressly stated in Ac.3.36-39, and necessarily implied in 10.47-48, as also in the words of St. Paul, "by the washing of water" (Eph.5.26), and of the writer of Hebrews (10.22), "having our hearts sprinkled from an evil conscience, and our body washed with pure water." In some cases the method of using the water may have been by the complete immersion of the person being baptized. This may be the meaning of the words "they both went down into the water," "they came up out of the water," in connexion with the baptism of the Ethiopian eunuch by St. Philip (Ac.8.38, 39). Such a practice might give special significance to St. Paul's comparison between baptism and the burial of Christ (Ro.6.4; Col.2.12). At the same time a going down so as to stand with the feet in water while water was poured over the head would satisfy the requirements of the account of the baptism of the Ethiopian eunuch or of the comparison used by St. Paul. It is not likely that the three thousand persons baptized in one day in Jerusalem (Ac.2.41), or those baptized at Caesarea and Philippi in or near the houses of Cornelius and the gaoler (Ac.10.44-48, 16.33), were all completely immersed. An examination of the verb βαπτίζω in the LXX. and N.T. shows that, while it sometimes means to immerse completely, it does not always do so (2K.5.14; 18.11; 1Ch.12:31; Ecclus.54.25-31 [31.30]; Mt.20.22-23, T.R.; Mk.7.4, T.R., and revisers' text, but not marg., 10.38, 39; Lu.11.39, 12.50). The nouns βαπτισμα and βαπτισμος do not occur in the LXX. In N.T. βαπτισμα is always used either for baptism or for the baptism of suffering; βαπτισμος is used for baptism in Heb.6.2, and as a variant reading for βαπτισμα in Col.2.12, and for ceremonial washing in Mk.7.4 (also ver. 8, T.R.). Thus, both the records of practice in N.T. and the terminology leave it uncertain whether complete immersion was ever used in N.T. times; while it was unlikely that it was always used. (7) Form of Baptism. Our Lord's command, as recorded in Mt. 28.19, is for the administration of baptism "in the name of the Father, and of the Son, and of the Holy Ghost"—a command which goes far to explain the reference to the doctrine of the Holy Trinity in such early passages as 1Th.1.1-6, 2Cor.13.14. The phrases "in" or "upon" or "into," "the name of," "Jesus Christ," or "the Lord Jesus," or "the Lord," are used in Ac.2.38, 5.16, 10.48, 19.5. The most probable explanation of these differing phrases is that the actual form of baptism was "in the name of the Father, and of the Son, and of the Holy Ghost," and that the phrase "in the name of Jesus" meant that the baptized were enrolled among the servants of Jesus. The phrase εις το δυναμα in Mt.28.19 and Ac.8.16,19.5 possibly ought to be translated "into the name"; it is perhaps more likely that, owing to the influence of Aramaic on N.T. Gk., it is rightly rendered "in the name." (8) Minister of Baptism. In the N.T. period baptism appears to have been administered by the apostles themselves, by deacons, and by Christian laymen. No statement is made as to who administered the earliest baptisms (Ac.2.41) or baptized Lydia or the Corinthians or the disciples (Ac.19.15). Either St. Paul or St. Silas apparently baptized the Ethiopian eunuch and his household (16.29-33). St. Philip, one of the "seven men of good report," of Ac.6.5, probably baptized those at Samaria (8.26,27), and certainly baptized the Ethiopian eunuch (8.38,39). Ananias, a Christian disciple, apparently baptized St. Paul (9.17,18, 22.12-16); and "brethren from Joppa" appear to have baptized Cornelius and his company (10.44-48). (9) Conditions of Baptism. Repentance and belief are everywhere assumed as conditions of baptism, and these are explicitly mentioned in 2.38,5.12,13,16.31. The words of St. Philip to the Ethiopian eunuch and the eunuch's reply in 3.37, "And Philip said, If thou believest with all thine heart, thou mayest." And he answered and said, I believe that Jesus Christ is the Son of God." are found in a very early reading, but are apparently not part of the original text of the Acts. (10) Doctrine of Baptism. In our Lord's discourse with Nicodemus baptism is described as the means of seeing or entering the kingdom of God, and of being "begotten anew" or "from heaven" (Jn.3.3,5). Similarly, St. Paul describes it as a washing of regeneration" (Tit.3.5). Being thus begotten anew and regenerate, the baptized are said by St. Paul to be the sons of God (Gal.3.26,27; cf. Ro.8.14-19), to have put on Christ (Gal.3.27), to be members of the body of Christ (1Cor.12.12,13,27, cf. 6.15; Eph.5.26-30), and to have been united with the death and resurrection of Christ (Ro.6.3,4; Col.2.12-20,3.1). In thus being made sons of God and members of Christ, the baptized come under the agency and gift of the Holy Ghost. St. John the Baptist foretold of the work of Christ in Christian baptism, "He shall baptize you with the Holy Ghost" (Mt.3.11; Mk.1.8; Lu.3.16, cf. Jn.1.26). St. Peter promised the first converts that on being baptized they should "receive the gift of the Holy Ghost" (Ac.2.38). Ananias, in speaking of St. Paul's coming baptism, said that he should be "filled with the Holy Ghost" (9.17,18). St. Paul connects the "renewing of the Holy Ghost" with the "washing of regeneration" (Tit.3.5). The Holy Ghost, then, is represented in N.T. as the outward means whereby great gifts are bestowed on the Christian. Through the reception of these gifts his sins are forgiven (Ac.22.16), and he is placed in the way of salvation (Mk.16.16; Ac.2.44,47,6.30-33; 1Pe.1.3-4,3:21 Tit.3.5). Yet, as the way to the inward renewal of conversion, so it is possible through sin to fall from the high state which baptism is the means of conferring (Ac.8.13,21-23; 1Cor.3.16,17,5.3-5; Gal.5.2,4,19-21). (11) The Gift of the Holy Ghost in Baptism. Some writers have
supposed, that, while the operation of the Holy Ghost is exercised on the soul in baptism, its indwelling presence in the soul is withheld until confirmation, because of the statements, "When the apostles which were at Jerusalem heard that Samaria had received the word of God, they sent unto them Peter and John, when they had come, they prayed for them, that they might receive the Holy Ghost: for as yet He was fallen upon none of them: only they had been baptized in the name of the Lord Jesus. Then laid they their hands on them, and they received the Holy Ghost." They were baptized in the name of the Lord Jesus, but Paul had laid his hands upon them, the Holy Ghost came on them" (Ac. 8:14-17, 19:5, 6). It appears to be easier to explain these statements of the reception of the Holy Ghost at the laying on of hands as referring to His special gifts at confirmation than to explain "they shall receive the gift of the H. S. 2:28 and be filled with the Holy Ghost" in 9:17, as referring not to baptism itself, but to the laying on of hands which was to follow it. [LAYING ON OF HANDS.] (12) Baptism for the Dead. In 1 Cor. 15:29 St. Paul writes, "Else what shall they which are baptized for the dead be filled with the Holy Ghost?" If the dead are not raised at all, why are they then baptized for them [οἰκτῶν τῶν νεκρῶν]?" The opinion of Tertullian that St. Paul is referring to—though not necessarily approving—a custom of receiving a living person being baptized with a view to vicariously benefiting one who had died unbaptized (De Res. Carn. 4:18; Adv. Venerabil. S. C. v. 10)—has been adopted by many: but is less likely than the interpretation of several Gk. commentators that the allusion is to those who receive baptism with a view to the resurrection of the dead (see, e.g., St. Chrysostom, In Ep. 1, ad Cor. Hom. 1, 12); Elwin in Smith's D. B. (2nd ed.), 1:344-345; Armitage, "Baptism," in Encycl. Dict. of Christ and the Gospels, i. 165-171; Bellamy in Vacant and Mangenot's Dict. de Théol. Cath. ii. 167-178; Mangenot in op. cit. ii. 360-364; Pusey, "Scriptural Views of Holy Baptism"; Stone, Holy Baptism; Elwin, The Minister of Baptism; Fuller, What is the Distinctive Grace of Confirmation; Mason, The Relation of Confirmation to Baptism; Wigman, The Doctrine of Confirmation considered in Relation to Holy Baptism; Horsley, in Newberry House Magazine for January and April, 1900; (cf. 1 Cor. 15: 20, 54; Rom. 6:4); Word, "People in the Time of Jesus Christ," i. ii. 319-324; and Edersehm, Life and Times of Jesus the Messiah, i. 273, ii. 745-747, and Krauss and Kohler in Jewish Encyclopedia, i. 490, 500, iv. 94, 95 (for Jewish baptisms). [D.S.] Bar. [Sos.] Barabba [Bar-Abba = son of the father, i.e. of the teacher, or of a man called Abba], a notorious prisoner (Mt. 27:16) released (by the desire of the people) instead of Jesus. He was one of an insurgent band who had committed murder, and were at that time in prison (Mk. 15:7; Ac. 3:14). The term robber applied to Barabba (Jn. 18:30) that plunder was in part their object; and the same term being applied to the two malefactors suggests that they had been members of Barabbas's band. The reading Jesus Barabba, in Mt. 27:16, 17, though interesting, is critically worthless. [E.R.B.] Barachel, ["the Buzite," father of Elihu (Job 1:1; Buz. 27:31)]. 

Barachias (Mt. 23:35). [Zacharias, 11; Zechariah, 1.] Barak (lightning; Judg. 4:5), son of Abinoam of Kedesh-naphthali; near to Hazor, Jabin's capital. From 4:6 we may infer that he had felt a call to deliver Israel, but was intimidated by the presence of Jabin's chariots and division of character to determine his rising at Mt. Tabor. He defeated Sisera, took Haroseth, and joined in the recitation of Deborah's ode. [Deborah; Sisera; Jael; Jabin.] [E.M.S.] Barbarian. The word is formed from the supposed sound of a language unintelligible to the hearer (cf. Eng. "jabber"), and is applied to any non-offensive usage is followed by St. Paul (Ro. 1:14). From this point of view the Jews themselves would be included among the βαπτισταρι, though their own natural distinction was between ἱδραγια and ἐλλαιοτες. [Gentiles.] But such distinctions are now transcended by Christianity, which allows no national differences to be a barrier to unity in Christ (Col. 3:11). [I.C.V.D.] Barber. The Heb. word (Ezk. 5:1 only) is formed from the root meaning to "shave"; cognate words occur in the whole Semitic group. [Razor.] [W.o.e.o.] Barhumites, Thoe. [Bahirin.] Barah (Heb. sē'ärā, Arab. Sā'ārāb) is mentioned in many passages of the Bible. It was grown by the Hebrews (Lev. 26:17; Dent. 8:8; Ru. 2:17, etc.), who used it for baking into bread (Judg. 7:13; 2 K. 4:12; Jn. 6:13), also mixing it with wheat, beans, lentils, millet, etc. (Ezk. 4:9, 12); and as fodder for horses (1 K. 4:25). It is also called Barley harvest is mentioned Ru. 1:2, 2:23; 2 Sam. 21:9, 10. It takes place in Palestine in March and April, and in the hilly districts as late as May. Barley harvest always precedes wheat harvest, in some places by a week, in others by fully three weeks. In Egypt barley is about a month earlier than wheat, where its total destruction by the hail-storm (Ex. 9:31) was sown at any time between November and February, according to the season. Barley bread is still generally eaten in Palestine (Num. 5:13). The homer and a half of barley, as part of the purchase-money of the adulterer (5:3), represents a trifling sum; cf. Ezk. 13:19. [W. H. E. S.]
ye pellute me among my people for handuls of barley. The barley corn was the unit of weight among the Israelites. It appears to have had an average weight of 56 lbs. to the bushel—the mean between English and Arab barley. [Weights. [c.r.c.]

Barnabas, an Aram. name signifying "son of prophecy," i.e. endowed with the gift of prophecy; and as the main function of N.T. prophets was to assist (Ac.13.2-5, 46), St. Luke renders it correctly "son of exhortation" (Ac. 4.36, R.V.). This additional name was given him by the apostles to distinguish him from others who bore the common name Joseph. He belonged to a Levite family settled in Cyprus, but had kindred living in Jerusalem, namely, his cousin John (Ac.13.1), and the mother of Mark. (1) He is first mentioned as an example of those who made over their property to the Christian community, and in contrast to the case of Ananias and Sapphira. That he was highly respected in the church of Jerusalem appears from the help which he was able to give to the apostles after his conversion (9.25ff.). On the return of Barnabas to Antioch, Barnabas was chosen to investigate the work, and, appreciating its importance, he fetched Saul from Tarsus to assist him in carrying it forward (Ac. 11.22-26). During the year so occupied we must place the mission to Jerusalem recorded Ac.11.30, and their return to Antioch (12.25). (2) A new period opens in Ac.13.1 with the choice and dedication of Barnabas, together with Saul, for missionary work. The selection of Cyprus for their destination, and Mark for their attendant, was probably due to Barnabas. He returned to Antioch at the close of the mission, and was sent thence with St. Paul to plead the Gentile cause at the Council of Jerusalem (Ac.15.2). On their return an incident occurred which may have prepared the way for the subsequent separation of the two friends. Barnabas, though fully aware of his inconsistency, had not strength to resist the example of St. Peter, who, when with Antioch, had separated himself, and would not eat with the Gentile Christians (Gal.2.12,13). But the breach did not actually take place till, on their intended departure for the second journey, Barnabas insisted on taking John Mark, who in St. Paul's estimation had forfeited his position by his desertion of his companions in the first journey. Barnabas sailed to Cyprus with Mark, and passes out of the history. A single verse (1Cor.9.6) implies that at the date of that epistle he was still labouring, and the reconciliation between St. Paul and Mark may surely be taken to imply a reconciliation between St. Paul and Barnabas. St. Paul's debt to his companion is acknowledged in his letters, where the word "my brother" is frequently used for Barnabas, the "beggar" (Ac.13.26, 12.25). The letters of Barnabas are not extant, but the name of Joseph barsabas is specially mentioned in Ac.15, 26, 36 as Barnabas, and in Ac.13, 26 as Bar-sa-bas. The name of Barnabas and the abbreviation of J. B.
14 verses of narrative; the second is hortatory. The latter has itself been divided into two at 4:5; and even further subdivision has begun for both parts, ascribing the Grecisms in the latter to the dexterity of the translator, who was well acquainted with Gk. idiom: while Marshall maintains an Aram. original up to 4:4 only; and André deems the whole book to have been composed in Gk.—Text and Versions. Any Semitic original has been lost, and we are dependent for our knowledge of the text on the LXX and versions made from it. Jerome omitted Baruch intentionally, and so did not revise or even include the Itala, which now stands in the Clementine Vulg. There are two other Lat. texts, edited by Sabatier and Hoberg respectively, the former dating the book 260 B.C., the latter the 6th century A.D., printing a Vatican copy of the Codex Legionario, which he styles "die älteste lateinische Uebersetzung."—Author. Except among R.C. writers the traditional authorship by Baruch is now rarely supported. 1:11, 12 and 3:10 are especially difficult to attribute to the historic Baruch, and are thought by some to be the work of different authors for the first and second parts. We may postulate Jewish writers, but these remain anonymous.—Date. This is as much disputed as the language. Schürer, Kyle, Streane, and others would place Baruch, as we have now it, after Titus's destruction of Jerusalem, making 4:30 ff. refer to that event. But the early Christian acceptance of the book, from Athanasios and Ireneaus onward (not to mention a possible reference in Lec. ii. ser. 2), does not imply so late a date; nor does the strong similarity of the LXX text to that of Jeremiah, e.g. 2:2, 5, 3:22, 4:26 compared with LXX 1:5, 15, 19, 35, 40, marks it as out of a parallel to Dan.9:16,17, to which the writer's correspondences in the earlier part of ch. 2 naturally lead him up, and which would be very apposite at that time. This very late date is largely grounded on the clear correspondence of 5:7 with Ps. Sol. xi; but which document had priority is not so clear. Kyle hesitatingly decides for Ps. Sol., because "a Heb. writing would not have been based upon a Gk. writing" (Smith, D.B.3). A Gk. original of pt. ii. is therefore essential to his argument. He also adduces "the absence of testimony to the existence of Baruch until the 2nd cent." But were books added to the LXX, as late as this? Hoberg reasonably alleges its inclusion in LXX. as proof of pre-Christian Jews' acquaintance with it. Rothstein, while conceding the possibility of an A.D. date for the book in its present form, yet thinks the separate parts earlier. Those who believe, however, in Reuss and Ewald, would place Baruch in 4th cent. B.C. have either to accept an earlier date for Daniel or to assume the existence of Dan.9 before the rest of the book. This divergence as to date has been taken by Philippus as a testimony to Baruch's authorship (Vigouroux, B.D.): an argument used against the defenders of Judith's historic character by Bissell (p. 157). Although there is much support for an A.D. date, the text as a whole seems to indicate the writer of the book, or perhaps his attendant upon it appear little lighter than those involved in the older notion of placing pt. i., at any rate, about the close of the Persian period, and the latter half in 2nd cent. B.C.—History. The statement in the Gk. Apostolic Constitution, v. 20, that Baruch was read, with Lamentations, in the synagogue on the Day of Atonement is uncorroborated. It does not accord with Baruch's expressed view of its suitability for festal reading (1:14); and, unless a mistake, must refer to some local and temporary usage. In a large part of the Christian Church, Baruch was early regarded as an appendage to Jeremiah. Patristic writers were naturally attracted by 3:37, which they often quoted as foretelling the Incarnation. The Council of Trent, after some hesitation, decreed the book canonical. Protestant generals generally reject Baruch, though individuals have highly esteemed it; while the English Church has placed it among the Apocrypha. yoger's present calendar from what Art. vi. styles "Baruch the Prophet." The Apocalypse of Baruch is a distinct extra-Biblical work. Speaker's, S.P.C.K., and Bissell's Comm: art. in Hastings's and Vigouroux's Dicts.; Streane, Age of the Maccabees (1898); J. J. Kneucker, Conjectura Nova pars 2 (Fribourg, 1902); L. E. T. André, Les Apocryphes (Florence, 1903).—W. D. N.

Barzillai. 1. A wealthy Gileadite who showed hospitality to David when he fled from Absalom (2Sam.17:27). On the score of his age, he declined the king's offer of dwelling at court, but sent his son Chimham in his stead (2Sam.19:31-40). The descendants of his daughter (called Augia, 1Esd.5:38), who married into a priestly family, were unable, after the Captivity, to prove their genealogy (Ezr.2:61; Ne.7:63, 64).—2. A Mephistah, whose son Adriel married Michal, Saul's daughter (2Sam.21:8).—Bashi-kamma. 1. A place in Gilead where Jonathan was killed by Trypho (1Mac.13:23). Called Basca by Josephus (Ant. vii. 6). The site is unknown.—C.R.C.

Bashan (soft soil). A district on the E. of Jordan; sometimes spoken of as the "land of Bashan" (1Chr.5:11), and sometimes as "all Bashan" (Dent.3:10, 13; Jos.12:5, 13), but most commonly without any addition. It was taken by the children of Israel after their conquest of the land of Sihon. They "turned" from their road over Jordan and "went up by the way of Bashan" to Edom (Num.21:33; Dent.3:1-3). Bashan extended from Gilead on S. to mount Hermon on N. (Dent.3:14; Jos.12:5; 1Chr.5:23), from the Arabah or Jordan Valley on W. to Salchah (Salkhat) on E., and to the border of the Geshurites, and the Maachathites near Hermon. This district was bestowed on the half tribe of Manassah (Jos.13:29-31), together with "half Gilead." It is named in the list of Solomon's districts (1K.4:13). Bashan was devastated by Hazael in the reign of Jehu (2K.10:33). After the Captivity it is mentioned as divided into four provinces—Gaulanitis (Golan), Auranitis...
BASHAN-HAVOTH-JAIR

[Haurān], Trachonitis [Arodis], and Batanaea, or Ar(i)-el-Bathan, which lies E. of the Lejah and N. of the range of Jebel Haurān. Bashan (especially the Haurān) is a fine corn-growing plateau of volcanic soil, with scattered oaks in the S. Assyrian records notice the invasion of the Haurān by Arabs in 650 B.C. Bashan supported a great Arab population later, and has numerous Gk. texts, and Roman cities of from and to 2nd cent. A.D., but the population is now sparse and villages small. [c.r.c.]

Bashan-havoth-jair (Deut.3.14). If not a gloss, Bashan may here be a corruption of be-shem, and we may read "called them by the name of villages of Jair." Cf. Num.32.41; Judg.10.4; 1K.4.13. [HAVOTH-JAIR.] [c.r.c.]

Bashemath′ (R.V. Basemath), daughter of Ishmael, the last married of the three wives of Esau (Gen.36.3,14,13), from whose son Reuel four tribes of Edomites were descended. When first mentioned she is called Mahalath (Gen.28.9), and the name Bashemath is given in Gen.26.34 to another wife of Esau, the daughter of Elon the Hittite. The text and thickness of the column correct this by reading Mahalath for Bashemath in the genealogy. Possibly this name (Bashemath) has been assigned to the wrong person in one of the passages; but if so, it is impossible to determine which is erroneous.

Basket. (1) sal, so called from the twigs of which it was originally made, specially used for holding bread (Gen.40.16ff.; Ex.29.23; Lev.8.2,26,31; Num.6.15,17,19). The form of the Egyptian bread-basket is delineated in Wilkinson's Anc. Egypt. iii. 226, after the specimens represented in the tomb of Rameses III. The term sal apparently passed from its strict etymological meaning to any vessel applied to the purpose. In Judg.8.19 meat is served up in a sal, which could hardly have been of wickerwork. (2) salsilīth, a word of kindred origin, applied to the basket used in gathering grapes (Je.6.9). (3) tene, in which the first- fruits of the harvest were presented (Deut.26.2,4). From its being coupled with the kneading-bowl (A.V. store, Deut.28.5,17), we may infer that it was also used for household purposes, perhaps to bring the corn to the mill. (4) kīlūh, so called from its similarity to a bird-cage or trap, probably because it had a lid; it was used for carrying fruit (Am.8.1,2). (5) dāsh, used for carrying fruit (Je.24.1,2), as well as on a larger scale for carrying clay to the brickyard (Ps.81.6; rōb, A.V.), or for holding bulky articles (2K.10.7). In N.T., baskets are described under the three terms, κόφωνα (One of the five thousand for feeding (Mt.14.20,16.9; Mk.6.43; Lk.9.17; Jn.6.13), and the second to that of the four thousand (Mt.15.37; Mk.8.5): the distinction is most definitely brought out in Mk.8.19,20.

Basmath′, a daughter of Solomon married to his officer Ahimaaz (1K.4.15).

Bason. Among the smaller vessels for the tabernacle or temple service, many were required to receive from the sacrificial victims the blood to be sprinkled for purification. Moses, at the great ceremony of purification in the wilderness, put half the blood in "the basons" or bowls, and afterwards sprinkled it on the people (Ex.24.6,8). [Goblet.] Among the vessels cast in metal, whether gold, silver, or brass, by Hiram, for Solomon, besides the laver and great sea, mention is made of basons, bowls, and cups. Of the first (marg. bowls) he is said to have made 100 (2Chr.4.8; 1K.7.45,46; cf. Ex.25.29 and 1Chr.28.14,17). Their form and material can only be conjectured from the analogy of ancient Assyrian and Egyptian specimens. The "bason" (Jn.13.5) from which our Lord washed the disciples' feet, κύπεφ, was probably deeper and larger than the hand-bason for sprinkling.

Bas'sa (1Ess.5.16) = Bezaal.
Bas'tai (1Ess.5.31) = Bezaal.
Bastard. Deut.23.2[3] enacts that a mamāzēr (E.V. bastard) shall not come into the congregation of the Lord unto the tenth generation. The term appears to denote the issue of an incestuous or illegal union. Parallel in Post, Grundriss, ii. 18. [H.M.W.]

Bat (atallēph). There is no doubt A.V. is correct in the rendering of this word, which signifies "night-flier." It is true that in the A.V. of Lev.11.19 and Deut.14.18 the atallēph closes the lists of "fowls that shall not be eaten"; but the ancients considered the bat to partake of the nature of a bird, and the Heb. 'ōph, "fowl"—lit. a wing—might be applied to any winged creature. Besides the passages cited, mention of bats occurs in Is.2.20, and Ba.6.22 in a passage that sets forth the vanity of the
BATH

Babylonian idols. Bats of many kinds, inclusive of long-eared and "horseshoe" species, are common in Egypt; but the most numerous appear to be the cave-bats of the genus "Taphozous," characterized by the tail being free for much of its length from the membrane connecting the hind-legs. The Palestine species is T. nuditventris, which swarms in the caves of Galilee, and is nearly allied to the Egyptian species shown in the cut. [R.L.]

Bath. [Weights and Measures.]

Bath, Bathing. Among the Jews, as with other Easterns, bathing was usually a religious act, and in cases of Levitical uncleanness was prescribed as a full restitution to religious privileges. [Purification.] There is no mention of bathtubs in the houses, but there were cisterns for the purpose in the court (2Sam.11.2) or garden (Sus.15). When possible, running water was chosen (Ex.2.5,7,13; Lev.15.13; 2K.5.10). Harlots bathed in the pool of Sama'ria (1K.22.38, R.V.). Public bathtubs were erected by Agrippa (19 Ant. vii. 9), and the pool of Bethesda had porches or colonnades (Jn.5.2). There was a bathroom in Herod's temple for the priests (Yoma iii.2). Hot springs were discovered by Anah (Gen.36.24, see R.V.), and there were hot baths at Calhurnoe (17 Ant. vi.5) and Tiberias (2 Wars xxvi. 6). Newborn infants were bathed before being dressed (Ezk.16.4). Women anointed themselves after the bath with oil (2Sam.14.2) or sweet odours (Esth.2.12; Jth.10.3). Swimming is alluded to (Is.25.11; Ezk.47.5; Ac.27.42). [H.T.]

Bathsheba (2Sam.11.3, etc.) or Bathshu'a (1Chr.3.5), the daughter of Eliam (2Sam.11.3) or Ammiel (1Chr.3.5) the son of Ahithophel (2Sam.23.34), and wife of Uriah the Hittite. The child of her adulterous intercourse with David died; but after marriage she became the mother of four sons, Solomon (Mt.1.6), Shimea, Shobab, and Nathan. When Adonijah attempted to set aside in his own favour the succession promised to Solomon, Bathsheba was employed by Nathan to inform the king of the conspiracy (1K.1.11-31). After the accession of Solomon, she, as queen-mother, requested permission for Adonijah to marry Abishag the Shunammite (1K.2.13-25).

Bath-zacharias, a place, named only 1Mac.8.32-33, to which Judas Maccabaeus marched from Jerusalem, and where he encamped for the relief of Beth-sura. The two places were about 70 stadia apart; and the approaches to Bath-zacharias were intricate and confined (12 Ant. ix. 4). This description is met by the modern Beit Sh'ōria, 6 miles N. of Beit Şur. [Beth-zur.]

BEARD

Battle-ax (Je.51.20). [Arms.]

Bavai, ruler of the "half part" of Keilah, who assisted in repairing the wall of Jerusalem (Ne.3.18).

Bay-tree (ezra'ḥ, lit. "nurse"). It is difficult to see upon what grounds A.V. renders this word in Ps.37.35 "bay-tree." Most Jewish doctors understand by ezra'ḥ "a tree which grows in its own soil," i.e. has never been transplanted, as A.V. marg. and R.V. The bay-tree, or laurel, has therefore no place in the Bible excepting upon Coverdale's introduction. [R.G.B.]

Bazlith' (Ne.7.54). Bazluth' (Ezr.2.52). "Children of Bazlith" were Nethinim who returned with Zerubbabel.

Bdellium (b'dhōlah), a precious substance mentioned in Gen.2.12, with "gold" and "onyx stone," as one of the products of the land of Havilah, and in Num.11.7, where manua is in colour compared to bdellium. Some authorities think b'dhōlah means the pearl, others the carbuncle or at any rate a gem, but the majority believe it to be some kind of gum-resin. That now denoted by bdellium resembles myrrh in appearance and odour; but myrrh is a product of the time more "acid" (Chambers's Encyl. s.v.). It is produced by more than one kind of tree, and is obtained in Egypt as well as Asia. [T.G.B.]

Beali'ah, a Benjamite, one of those who joined David at Ziklag (1Chr.12.5).

Bealoth', a town in the extreme S. of Judah (1K.4.17).

Be'an, Children of, a tribe of predatory habits in Edom, destroyed by Judas Maccabaeus (1Mac.5.4). Perhaps for Mean (M'a'nu) in Edom. [C.R.C.]

Beans are cultivated in Palestine, as are many leguminous plants, such as lentils, kidney-beans, vetches, etc. (2Sam.17.28). Beans blossom in January. They have been noticed in flower at Lydda on the 23rd, and at Sidon and Acre even earlier. They continue in flower till March. The cultivation of beans is of the highest antiquity. Homer mentions both beans and peas. Pliny says beans challenge the "firstrank as a principal place amongst legumes," because "thereof men have assailed to make bread" (cf. Ezk 4:9). [H.C.B.]

Bear. The Syrian bear (Ursus arctus syriacus), a grey variety of the European brown bear, is the animal of the Bible, and is said by Tristram to be still found on the mountains of Palestine. During summer these bears keep to the snowy parts of Lebanon and Hermon, but descend in winter to the villages; while in former days they doubtless occurred in other parts of Palestine. We read, for instance, of bears in a wood between Jericho and Bethel (2K.2:24); and it is probable that the destruction of the children who mocked Elisha took place in winter. The ferocity of the bear when deprived of its young is alluded to in 2Sam.17.8, Prov.17.12, Ho.13.8; its attacking flocks in 2Sam.17.34, etc.; its craftiness in ambush in Lam.3.10; and that it was dangerous to man in Am.3.8. It would be better translated, "we groan like bears." Bears are also mentioned in Rev.13.2: Dan.7.5; Wis.11.17; and Ecclus.47.3. [C.R.C.]

Beard. Semitic races have always
cherished the beard as the badge of the dignity of manhood. The Egyptians, on the contrary, usually shaved the hair of the face and head, and dressed the body like swine. The Semitic enemies of the Egyptians, including many of the nations of Canaan, Syria, and Armenia, etc., are nearly always represented bearded. On the Ninevite monuments is a series of battle-views from the capture of Lachish by Sennacherib, in which the captives have beards very like some of those in the Egyptian monuments. The precept (Lev. 19.27, 21.5) regarding the "corners of the beard" refers to the well-known hair-offerings among all ancient peoples. [H.M.] Size and fulness of beard are regarded by Arabs, at the present day, as a mark of respectability and trustworthiness. The beard is the object of an oath, and that on which blessings or shame are spoken of as resting. The custom was and is to shave or pluck it and the hair out in mourning (Ezr. 9.3; Is. 15.2; 50.6; Je. 41.5; 48.37; Ba. 5.31), to neglect it in seasons of permanent affliction (2 Sam. 19.24), and to regard any insult to it as the last outrage which enmity can inflict (10.4). The beard was the object of salutation (20.9). The dressing, trimming, anointing, etc., of the beard was performed with much ceremony by persons of wealth and rank (Ps. 133.2). The removal of the beard was a part of the ceremonial treatment proper to a leper (Lev. 14.9).

Beast, the representative name in the A.V. of the following Heb. words: (1) בְּרֵהֶמֹא, the general name for "domesticated cattle of any kind, is also used to denote "any large quadruped," as opposed to fowls and creeping things (Gen. 6.7; 20.7; Ex. 9.25; Lev. 11.2; 1 K. 4.33; Pr. 30.30, etc.) for "beasts of burden," horses, mules, etc., as in 1 K. 18.5; Ne. 2.12; 14; etc. for "wild beasts," as in Deut. 32.24, Hab. 2.17, Is. 17.44. (2) בְּרִים is used either collectively of "all kinds of cattle," like the Latin pecus (Ex. 22.5[4]; Num. 20.4, 8.11; Ps. 78.48), or specially of "beasts of burden" (Gen. 45.17). It has a more limited sense than the preceding, (3) חַיָּה is used to denote any animal. It is, however, frequently used specially of "wild beasts," when the meaning is often more fully expressed by the addition of the word主管部门, "of the field" (Ex. 23.11; Lev. 26.22; Deut. 7.22; Ho. 2.12[14], 13.8; Je. 12.9, etc.).

Beautitudes. [SERMON ON THE MOUNT.] Beautiful Gate. [TEMPLE.]

Beba'i. "Sons of Beba'i," 623 (Ne. 628) in number, returned from Babylon with Zerubbabel (Ezr. 2.11; Neh. 7.26) but 28 more returned with Ezra under Zechariah, who is further described as "the son of Beba'i," which may however be used as the family name (Ezr. 8.11). Four of the family had taken foreign wives (Ezr. 10.25; 1 Esd. 9.29). The name occurs also among those who sealed the covenant (Ne. 10.15).

Beba'i (1 Jth. 15.4), an unknown town in central Palestine. [C.R.C.]

Becher. —I. The second son of Benjamin, according to the lists in Gen. 46.21 and 1 Chr. 7.6, 8; but omitted in Num. 26.38 and 1 Chr. 8.1. The Heb. text of 1 Chr. 8.1, however, suggests that "barkhōr, 'first-born," so that Benjamin had no son named Becher. It is possible that Becher, or his heir and head of his house, married an Ephraimitish heiress, a daughter of Shuthelah (1 Chr. 7.20, 21), and that his house was reckoned in the tribe of Ephraim, just as Jair son of Segub was reckoned in Manasseh (1 Chr. 2.22; Num. 32.40, 41).

2. Son of Ephraim (Num. 26.35); called Bered in 1 Chr. 7.26.

Bechorath', an ancestor of king Saul (1 Sam. 9.1, 2).

Bec'tileth, The plain of, mentioned in 1 Jth. 2.21 as lying between Nineveh and Cilicia. The name has been compared with בָּכְתַלָּא, a town of Syria named by Ptolemy, Bactiāla in the Ptolemy Tables, which place it 21 miles from Antioch.

Bed and Bedchamber. We may distinguish in the Jewish bed five principal parts: (1) the mattress; (2) the covering; (3) the pillow; (4) the bedstead or support for (3); (5) the ornamental portions. (1) This consisted of a mere mat (Gen. 41.16), or a quilt finer than that of (1). In summer a thin blanket or the outer garment worn by day (1 Sam. 19.13) sufficed. Hence the law that it should not be kept in pledge after sunset, that the poor man might not lack his needful covering (Deut. 24.13). (3) The only mention of the material for this is in 1 Sam. 19.13, and the word used is of doubtful meaning, but seems to signify some fabric woven or plaited of goat's-hair. As, however, it was something hastily adopted to serve for a Pillow, it is not decisive of the ordinary use. In Ezk. 13.18 those mentioned are probably not bed-pillows, but fillets or amulets for the arms (so Ephrem Syrian). Pillows are common to this day in the E., formed of sheep's fleece or goat's-skin, with a stuffing of cotton, etc. (4) The bedstead was not always necessary, a platform along the side or end of an Oriental room serving as a place for the bedding. Yet some height and position in bed was considered necessary. The sense of two of the six Heb. words translated in A.V. "bed," and used variously for a "bier" (2 Sam. 3.31; 2 Chr. 16.14), for the
ordinary bed (2 K. 4.10), for the litter for carrying a sick person (1 Sam. 19.15), for Jacob's sick-bed (Gen. 47.31), and for the couch on which guests reclined at a banquet (Esth. 1.6). For the "bedstead" of Og, see Og. (5) The ornamental fixtures were pillars and a Canopy (1 Jth. 13.9), ivory carvings, gold and silver, and probably mosaic work, purple and fine linen (Esth. 1.6; Can. 3.9, 10). The ordinary furniture of a bedchamber is given in 2 K. 4.10. The position of the bedchamber in the most remote and secret parts of the palace seems indicated in Ex. 8.3 and 2 K. 6.12. The "bedchamber" in the temple where Joash was hidden (2 K. 11.2; 2 Chr. 22.11) was probably not a sleeping-room, but a store-chamber (perhaps a mere cupboard such as is used in the East in the present day) for the rolled-up mats.

**Bedad**.—The father of Hadad king of Edom (Gen. 36.35 = 1 Chr. 1.46).

**Bedan**.—(1 Sam. 17.17.) Samuel refers to him as a deliverer of Israel. Nothing more is known of him. LXX. identifies him with Barak. He has also been identified with Samson and Abdon.—(1 Chr. 7.17.) A Manassite.

**Bedeliah**, a son of Bani, in the time of Ezra, who had taken a foreign wife (Ezr. 10.35).

**Bee** (d'hôra; Deut. 1.44; Judg. 14.5; Ps. 118.12; Is. 7.18). That Palestine abounded in bees is evident from the description that it was a land "flowing with milk and honey," though not so much in the wild honey as that expression is to be understoodotherwise than in its literal sense. Dr. Thomson (Land and Book, p. 209) records swarms of bees inhabiting a cliff of Wady el Qurin, "The people of Malia, several years ago," he writes, "let a man down the face of the rock by ropes. He was entirely protected from the assaults of the bees, and extracted a large amount of honey; but he was so terrified by the prodigious swarms of bees that he could not be induced to repeat the exploit." This illustrates Deut. 32.13 and Ps. 61.16 as to "honey out of the stony rock"; while Deut. 1.44 and Is. 118.12 suggest the fearful nature of the attacks of these insects when irritated. In Palestine, as in India, the attacks of bees are more to be dreaded than in more temperate climates, the swarms being larger, and their stings not unfrequently causing death; hence the force of the Psalmist's complaint, "They compassed me about like bees." (118.12). The passage about the swarm of bees and honey in the lion's carcass (Judg. 14.8) can be easily explained when we remember that in a hot dry country, after a carcase has been picked nearly clean by vultures, jackals, and ants, the skeleton might well form a nidus for a swarm of bees. Is. 7.18, "the Lord shall hiss for the bee that is in the land of Assyria," has been understood by some to refer to the practice of "calling out the bees from their hives by a hissing or whistling sound to their labour in the fields, and summoning them again to return" in the evening. More probably the expression has reference to the Eastern custom of calling the attention of an enemy by one of a hiss or "hiss." The honey-bee of Palestine, although nearly allied to the European Apis mellifica, is regarded as a distinct species, A. fasciata. [R. L.]

**Beel'ida** (Baal know), one of David's sons, born in Jerusalem (1 Chr. 14.7). In 2 Sam. 5.16 the name is Eliada (El know).

**Bee'lsar**u, (1 Esd. 5.8) = Bisharian.

**Beeletth'mus**, an officer of Artaxerxes residing in Palestine (1 Esd. 2.16, 25). The name is a corruption of the title of Rehum (chancellor), the name preceding it (Ezr. 4.8). This title, according to Sayce (Introductory to Ezr., Ne., and Esth.), signifies "Lord of official intelligence," or "postmaster."

**Beelzebub**. [Ba'al-zebub.] (1 Sam. 28.2.)

**Beer** (well).—1. One of the latest halting-places of the Israelites, lying beyond the Arnon, and so called because of the well which was there dug by the "princes" and "nobles" of the people (Num. 31.16-18). This is possibly the Beer-elim referred to in Is. 15.3.

2. A place to which Deborah, the son of Gideon, fled for fear of his brother Abimelech (Judg. 9.21); perhaps Beerothi.

**Beer'a**, an Asherite, son of Zophah (1 Chr. 7.37).

**Beer'ah**, prince of the Reubenites, taken captive by Tighath-pileser (1 Chr. 5.5).

**Beer-el'min**, a spot named with Dimon in Is. 15.8 as on the "border of Moab." [Beer.]

**Beer'i**.—1. The father of Judith, one of the foreign wives of Esau (Gen. 26.34). [Anah.]

2. Father of the prophet Hosea (Ho. 1.1).

**Beer-lah'i-roi** (well of the Living One [Who sees me, R.V. marg.]), between Kadesh and Beer-elim, the wild honey bees being in the way to Shur, and therefore in the "south country" (Gen. 24.62). According to the explanation of the text, it was so named by Hagar, because God saw her there (Gen. 16.14). By this well Isaac dwelt both before and after the death of his father (Gen. 24.62, 25.11). In both these passages the name is given in A.V. as "the well Lah-i-roi." Near Kadesh (Qudis), S. of Beer-sheba. [Kadesh; Ke'desh.] [c.r.c.]

**Beer'othi**, one of the four cities of the Hivites who delayed Joshua into a treaty of peace with them; the other three being Gibeon, Chephirah, and Kirjath-jearim (Jos. 9.17). Beerothi was allotted to Benjamin (18.25), in whose possession it remained at the time of David (2 Sam. 4.2). It is named with Chephirah and K-jearim in the list of those who returned from Babylon (Ezr. 2.25; Ne. 7.29; Beroth, 1 Esd. 5.19). Eusebius (Onomasticon) gives "under the hill Gibeon," as visible from the road to Lydda at the seventh milestone. Now el-Birch, a village about 8 miles N. of Jerusalem by the road to...
and condemned as such yet earlier" (Am. 5.5, 8.14). It was reoccupied by descendants of Judah after the Captivity (Ne. 11.27, 30). The site is now called Bir es Sief, the foot of the Hebron hills, in the open pastoral plateau which is covered with grass in spring, and supports flocks of goats and cattle. There are two wells, with a constant supply of good water even in autumn, cut in rock in the bed of the boundary valley, which runs W. to Gerar. There is also a third dry well. (Shum. W. Pat. iii. pp. 394-396.) The largest well is over 12 ft. in diameter, lined with masonry to a depth of 28 ft., and with water at 37 ft. The monastery in the 15th course bears an Arabic tablet with a date (505 A.H.) answering to 1112 A.D. Though much furrowed by ropes, the stonework is therefore not very ancient. A few rude stone troughs stand round this well, but neither it nor the others have any parapet. The second well, some little distance to W., is 5 ft. in diameter and 40 ft. to the water; the stones are cut to the arc of the circle. The third well to E. is dry; the masonry is superior; the diameter is over 9 ft., and the depth 23 ft. It has large stones at the bottom. Ruins of a Byzantine town, or village, including the foundations of a church, exist N. of the wells; and Beer-sheba in the 5th cent. was an episcopal town. [c.r.c.]

**Beersheba** (From an original sketch by Col. Conder.)

**Belial.**

The well of **Beersheba**, in the Bible, Gen. 21.31, where Abraham made a covenant with the Philistines, and planted a tamarisk by the well that he dug. The alliance was renewed by Isaac, who apparently dug a second well (26.23, 28, 32, 33). Beersheba is often mentioned as the S. boundary of the land of Israel (Judg. 20.1, etc.), and was given to Judah (Jos. 15.25) and afterwards to Simeon (19.2). Here Samuel's sons were judges (1Sam. 8.2). It was in the negeph, or "dry" country (A.V. south: 2Sam. 24.7); and Elijah here slept under the desert broom bush (1K. 19.3, 5). It was probably an idolatrous centre in the time of Josiah (2K. 23.8), Jordan (Jos. 21.27). It appears as Ashtaroth in 1Chr. 6.71. Probably short for Beth-asherah. [Ashteroth.]

**Beetle.** [Locust.]

**Beeses.** [Cattle.]

**Beheading.** [Crimes.]

**Behemoth.** There can be little doubt that in Job 40.15-24 the hippopotamus is intended, as the description of behemoth accords well with the habits of that animal. As in the first part of Jehovah's discourse (Job 38.39) land animals and birds are mentioned, it seems probable that aquatic or amphibious creatures are referred to in the latter part. Moreover, since "leviathan" usually denotes the crocodile, behemoth seems to point to the hippopotamus, its associate in the Nile. The description of behemoth lying under "the shady trees," amongst the reeds and willows, is perfectly applicable to the hippopotamus. In former days hippopotamuses were found in Lower Egypt, although they have now receded far up the Nile; there is, however, no evidence, geological or otherwise, of their former occurrence in Syria or Palestine. The description is certainly not applicable to the African elephant. See Nile; but for the opposite view see **Palestine.** [r.e.]

**Bekah.** [Weights and Measures.]

**Bel.** [Ba'al.]

**Bel and Dragon.** [Daniel, Apocryphal Additions to.]

**Belaites.**—1. The old name of **Zoa**r (Gen. 14.2, 8).—2. A king of Edom son of *Beor* (Gen. 36.32), whom some Jewish commentators identify with Balaam son of *Beor* (Num. 22.5) and the LXX. renders Balak.—3. The eldest son of Benjamin (Gen. 46.21), Belah in A.V.; the ancestor of the Belaites (Num. 26.35, 40).—4. A son of Azaz, of the tribe of Reuben (1Chr. 5.8).

**Belah, Belaites, The.** [**Bela,** 3.]

**Bellemus.** [Bishlam.]

**Belial.** (Heb. beliya’ad, lit. "worthlessness," from bel, "without," and ya’al, "worth") occurs generally in such phrases as "sons of B.," "men of B.," "daughter of B.," "thing of B.," etc., and always in O.T. as a common noun, denoting an extreme degree of depravity: e.g. Deut. 13.13 (apostasy); Judg. 19.22 (sodom and rape); 1Sam. 1.16 (female drunkenness). 2.12 (the profanation of the priestly office), 20.1, 2Chr. 13.7 (rebellion); 1 K. 21.10, Pr. 19.28 (perjury). In two passages it seems to mean the perdition of the soul—viz. Ps. 41.8 (see marg.), "a matter of perdition," i.e. a matter which brings a man to perdition;
and Ps.18.4 (see marg.), "the floods of perdition." In N.T. the word has become a proper name, and is a title of Satan (2Cor.15.15). The correct N.T. form is Beliar (Bel'diə), probably an intentional alteration of the word (cf. Baalzebub). The form Bel'wiə is also found in the Testaments of the Twelve Patriarchs and in the book of Jubilees. In Milton's Paradise Lost Belial is the spirit of lust. [SATAN.] [C.H.]

**Bellows.** The word occurs only in Je.6.29, where it is used figuratively, "the bellows are burned," their use being to heat a smelting furnace. A picture of two different kinds of bellows, both of highly ingenious construction, may be found in Wilkinson, Anc. Egypt. iii. 338. "They consisted," he says, "of a leather, secured and fitted into a frame, from which a long pipe extended for carrying the wind to the fire. They were worked by the feet, the operator standing upon them, with one under each foot, and pressing them alternately while he pulled up each exhausted skin with a string he held in his hand. In one instance we observe from the painting that when the man left the bellows, they were raised as if inflated with air; and this would imply a knowledge of the valve. The pipes, even in the time of Thothmes II., [supposed to be] the contemporary of Moses, appear to have been simply of reed, tipped with a metal point to resist the action of the fire."

**Bells.** The use of large bells for calling assemblies or similar purposes seems to have been unknown in Palestine, trumpets of various kinds being used instead. The small golden bells (Heb. pa' amonim) which alternated with the tri-coloured pomegranates round the hem of the high-priest's long robe are twice mentioned, Ex.25.33ff. and Ecclus.45.9 (cf. Josephus, 3 Ant. vii. 4); their object is described as being to give forth a sound as he went in and out of the sanctuary. The number of these bells is given by the Rabbis as 72 in all, while others give 12 or 365 (Kalisch, Comment. on Exod., in loc.). This bell and pomegranate arrangement has been thought to be derived from the old Egyptian ornamental border of lotus and bud, with its original meaning lost or altered. The word translated "bells" in Zech.14.20 is quite a different one (mi' tidlah), and is represented by "bridles" in L.X.X. (so A.V. marg.); but a metal substance that would tinkle when shaken seems here indicated rather than leathern straps. See Flinders Petrie's art. "Bells" in Hastings, D.B. (5 vols. 1904). [C.L.F.]

**Belmaim** (I Jth.7.3). The name survives in Widy Bel'ameh. [BETHULIA.] Probably the same as Balamo and Belmen. [C.R.C.]

Bel'men, a place name amongst the towns of Samaria (I Jth.4.4). [BELMAIM.]

**Belshazzar,** the last native king of Babylonia (Dan.5.1ff.). According to Daniel, he was slain in the night, after a splendid feast in his palace. The first Babylonian record in which the name of Belshazzar was discovered is that inscribed on four clay cylinders found at Muqer (Ur of the Chaldees). In this Nabonidus, after describing his restoration of the temple there, calls down a blessing on his first-born son, Belshazzar (Bel-sarru-usur). He does not appear in the official records as a ruler, but is apparently meant when, in the Babylonian Chronicle, "the son of the king," who was for many years "with the army in Akkad," is referred to. Belshazzar is often mentioned on contract-tablets, always with the same title. In the first year of Nabonidus he bought some land of Marduk-iriba; in the fifth his secretary hired a house; in the eleventh Iddina-marduk seems to have owed him mana of silver on account of woven stuff or clothing supplied through Nabû-šabît-qâţé, the prince's major domo. Other tablets, dated in the seventh, ninth, and twelfth years of Nabonidus, record offerings made on behalf of Belshazzar in the temple at Sippur (Abu-habbah). This confirms the statement in the Babylonian Chronicle that the son of the king was with the army in Akkad in the seventh to eleventh years of Nabonidus, at which point the record is defective until the seventeenth and last year of that king. On Tam'muz 16 in that year Gobryas entered Babylon with the army of Cyrus, and it is stated that on the night of Marchesvan 11, Gobryas . . . did something, and the son of the king (or "the king" simply) died. In this we may in all probability see the attack in the night spoken of in Daniel. The date of his death was 538 B.C., at which time he could hardly have been more than thirty years old.

Xenophon describes "the king" (probably Belshazzar) as dying, sword in hand. With regard to his father, Nabonidus, Berosus in Josephus (Ant. Apion, i. 20) states that he was captured in the neighbouring city of Borsippa, and kindly treated by Cyrus, "who gave him Carmania as a place for him to inhabit." Rawlinson connected Belshazzar with Nebuchadnezzar (Dan.5.2) through his mother, who may have been a daughter of that king, in which case Nebuchadnezzar was Belshazzar's maternal grandfather. This would make Nabonidus Nebuchadnezzar's son-in-law, and probably receives confirmation from two tablets in which a certain Nabonidus, "who is over the city," is called "the son of the king." (Nebuchadnezzar's eighth year). Nabonidus calls himself, in his records, "son of Nabu-balāṭ-su'-īuju." Smith, D.B. (4 vols. 1893); Herford, J.R. (4 vols. 1898); The Old Testament in the Light of the Records (S.P.C.K.), pp. 412 ff. 435 ff. [T.R.G.]

**Belteshazzar.** [DANIEL.]

**BEN.**—I. A Levite "of the second degree,"
one of the porters for the ark appointed by David (1Chr.15.18).—2. [Son.]

Benai hak—The son of Jehoiada the chief priest (1Chr.27.5), and therefore of the tribe of Levi, though his name is also given to a Benjamite (2Sa.23.20; 1Chr.11.22), in the S. of Judah; set by David (1Chr.11.25) over his bodyguard of Cherethites and Pelethites (2Sam.8.18; 1K.1.38; 1Chr.18.17; 2Sam.20.23), and occupying a middle rank between the first three of the "mighty men" and the 30 "valiant men of the army" (2Sam.23.22-23; 1Chr.11.25, 27). The exploits which make him this rank are narrated in 2Sam.23.20,21; 1Chr.11.22.

He was captain of the host for the third month (1Chr.27.5). Benaihah remained faithful to Solomon during Adonijah's attempt on the crown (1K.1.8,10,32,35,44), and was raised to the office of commander-in-chief (2Sa.23.4; 1Chr.11.41). He appears to have had a son, called after his grandfather, Jehoiada, who succeeded Ahithophel about the person of the king (1Chr.27.34). But this is possibly a copyist's mistake for "Benaihah the son of Jehoiada."—2. "The Pirathonite," an Ephraimite, called one of David's 30 mighty men (2Sam.23.30; 1Chr.11.31), and was "captain of the eleventh monthly course" (1Chr.27.14).—3. A Levite in the time of David, who "played a psaltery on Alamoth" (15.18,20,16.3).—4. A priest in the time of David, appointed to blow the trumpet before the ark (16.24,16).—5. Son of the sons of Asaph (2Chr.20.14).—6. A Levite, ancestor of Hezekiah, one of the "overseers of offerings" (31.13).—7. One of the "princes" of the families of Simeon (1Chr.4.36).—8. Four laymen in the time of Ezra who had taken strange wives: 1. (Ezr.10.25) [Baani]; 2. (10.30) [Naidus]; 3. (10.35) [Maidai]; and 4. (10.43) [Banaija].—9. The father of Pelatiah, "a prince of the people" in the time of Ezekiel (Ezk.11.1).—10. Ben-ammi (son of kindred), son of the younger daughter of Lot, and progenitor of the Ammonites (Gen.19.38; cf. Deut.2.19).—11. Bene-berak, one of the cities of Dan mentioned in Deut.11.30; a restoration by Sennacherib in 702 B.C. Now the village Ibn Ibray, 4 miles E. of Joppa. [C.R.C.]—12. Bene-jaakan. [Beeroth of the children of Jaakan.]—13. Bene-ke'dem, "the children of the East," or people, dwelling to the E. of Palestine (Gen.29.11; Job.1.3; Judg.5.33,7.12,18,10).—14. Mentioned with the Midianites and Amalekites. From Judg.7.11-15 we infer that they spoke a dialect intelligible to an Israelite, and the name itself is Semitic. From 1K.4.30 it is evident that the term is used in a very general sense, but in Is.11.14, Je.49.28, Ezk.25.4,10, they are noticed with Ammon and Edom. The term thus includes all the tribes between Israel and the Ephrathites. [C.R.C.]

Benhada'h, the name of three kings of Damascus.—Benhadad I. was (1K.15.18) son of Tabrimmon and grandson of Hazael (? Rezon), and in his time Damascus was subjugated to Israel by both Baasha of Israel and Asa of Judah. He finally closed with the latter on receiving a large amount of treasure, and conquered a great part of the N. of Israel, thereby enabling Asa to pursue his victorious operations in the S. It would appear (1K.20.34) that he continued to make war upon Israel and Judah till the time of Omri's tinned monarch, when he made "streets" in Samaria for Syrian residents. [Ahab.]—Possibly the contemporary of Ahab was Benhadad II., son of the preceding (though not so stated in O.T.), as otherwise Benhadad I must have reigned 50 or 60 years, which, however, is impossible [see 1K.16.16-18]. Local wars with Israel characterized his reign, of which the earlier campaigns are described under Ahab. He was signally defeated at Aphek (1K.20.34ff.). His power is shown by the 32 vassal kings who accompanied him to his first siege of Samaria. In Jehoram's reign Benhadad renewed the war with Israel, attacked Samaria a second time, and pressed the siege so closely that there was a terrible famine in the city. But the Syrians dispersed in the night in consequence of a sudden panic (2K.7.7). Soon after, Benhadad fell sick, and sent Hazael to consult Elisha as to the issue of his malady. Hazael, the day after his return, smothered his master and anointed himself king (2K.9.1-13).—2. Benhadad III., son of Hazael. When this king succeeded Hazael on the throne of Syria, Jehoash recovered the cities which Jehoahaz had lost to the Syrians, and beat him in Aphek (2K.13.17-25). Hazael gained two more victories, but did not restore the dominion of Israel on the E. Long wars with Israel were reserved for his successor. Benhadad III.'s misfortunes in war are noticed in Am.1.4.

Ben-ha'll, one of the princes whom king Jehoshaphat commanded to teach the law in the cities of Judah (2Chr.17.7).—2. Ben-athan, son of Shimon, in the line of Judah (1Chr.4.20).—3. Beninu, a Levite who sealed the covenant with Nehemiah (Ne.10.13,14).—4. Ben'am (son of the right hand), the youngest child of Jacob, and the 2nd of Rachel, own brother of Joseph, and the only one of the family born in Palestine (Gen.35.18). His mother called him Benjam (not Benjam; the meaning of Benjamin [ben-yamin] may be the son of the south, as the was born so far S. of Haran. Since Joseph was 30 years old when he stood before Pharaoh (Gen.41.46), and Benjamin apparently only a year younger (30.25), the latter must have been more than 37 years old when Israel went into Egypt (41.53). He already had ten children (46.25), yet (in A.V.) he is called a "lad" (43.8). The Heb. word however (na'ar) is of very indefinite meaning, and applies not only to David when he was more than 20 (rSam.17.42), and a man of war (16.18), but also to Absalom, who was married (2Sam.18.32), and to others, like the spies (Jos.6.23), who were grown young. The only indication of Benjamin's personal character is found in the blessing of Jacob (Gen.49.27), where he is compared to a wolf. In the wilderness the tribe, under Avidan, is by no means one of the smallest (Num.1.37,2.23, 26ff.), nor are they settled in the least important tribe. But when Solomon divided the twelve tribes of Israel (1Sam.9.21), we must remember that, about three centuries and a half
before his time, after the massacre at Gibeon, Benjamin had been reduced to only 600 men (Judg.20.47). In the blessing of Moses there appears to be an allusion to the fact that the three most sacred centres of Israel all lay within this tribe's border (Deut.33.12). The men of Benjamin appear to have been famous as bowmen and slingers (Judg.20.16; 2Chr.14.8,17,17), and it is remarkable that all left-handed persons mentioned in O.T. are Benjamites (Judg.3.15,20.16; 1Chr.12.2). In the song of Deborah a difficult verse may (see LXX.) be rendered "From Ephraim was their root out; against Amalek after thee, Benjamin, in thy people." (Judg.5.14). Benjamin was destined to destroy Amalek under Saul (1Sam.15.1-33), and the war cry "after thee, Benjamin," was known (as was the story of Gibeon) to Hosea (5.8,10,9). The sin of Gibeon (Judg.19-21) almost blotted out the tribe for a time. David had friends among the Benjamites (1 Chr.12.16) before Abner deserted Saul's heir, but, though he was bitterly hated, was one of the finest tribesmen of Israel. Benjamin was the tribe of Gibeah (2Sam.23.29; 1Chr.11.31), and after the separation of the two kingdoms Benjamin adhered to the house of David (1K.12.21) without any indecision. The Benjamite genealogies (1Chr.7.6-12,8.4-40) go down apparently to the time when Benjamin occupied towns of Dan after the Captivity (1Chr.8.12; Ne.11.35). In the Psalm (68.27) Benjamin is still a small tribe. The E. gate of Jerusalem was named from it (Je.37.13,38.7; Zech.14.10). The ethnic form occurs in full (1Sam.9.21,25.7; 2 Sam.16.11,19.17; 1K.2.8; 2Chr.27.12; Ps.7, title), but it is sometimes shortened to yeirim: in Heb. (Judg.3.15,19.16; 1Sam.9.1,4; 2Sam.20.1; Esth.2.5), the last cited passage referring to Mordecai: while St. Paul, yet later, was of this tribe (Ph.3.5). The Tribal Lot (Jos.18.11-28) was all occupied early except Jeru- salem (Judg.1.12), and coincided with Solomon's eleventh district (1K.4.18). Its borders are described under Ephraim and Judah, and it included about 400 square miles, mostly consisting of very rugged hills, but considered very good land by Josephus (Ant. 1.22) because it included the plain of Jericho. The W. border ran S. along the crest of the mountains from Arabor to Kirjath-jearim (Jos.16.13; 14), for it "turned about the W.

quarter southward" (R.V.). Two of the tribe who were named after its founder are noticed in later times (1Chr.7.10; Ezr.10.32). Benjamin is last mentioned in Rev.7.5. [C.R.C.]

Benjamin, High gate, or Gate, of (J.e. 20.2,37.13,38.7; Zech.14.10). [Jerusalem.]

Ben-e, apparently a Merarite Levite; more probably not a proper name, but meaning his son "as describing Jaaaziah (1Chr.24.26,27)."

Ben-oni (son of my sorrow, or hurt—i.e. last effort), the name given by the dying Rachel to her second son, but changed by his father into Benjamin (son of the right hand; Gen.35.18).

Ben-zo-heth, a descendant of Judah (1Chr.4.20).

Beon' (Num.33.3) is probably an early clerical error for Meon (ver. 38). [C.R.C.]

Be-on'.—1. The father of Bela, one of the early Edomite kings (Gen.36.32; 1Chr.1.43).

—2. Father of Balaam (Num.22.5, etc.).

Bera, king of Sodom, one of the 5 kings who rebelled against Chedorlaomer (Gen.14.2ff.).

Berechiah (son of Benjamin). A archer who joined David at Ziklag (1Chr.12.3).

Berechah', Valley of (R.V. Bereachah), a valley in which Jehovah and his people assembled to "bless" Jehovah after the overthrow of the hosts of Moabites, Ammonites, and Moab, and which thus acquired its name of "the valley of blessing" (Judg.20.26). The name Breiikut still survives, attached to ruins 4 miles W. of Tekoa. [C.R.C.]

Berechiah' (1Chr.6.39) = Berechiah, 6.

Berahal', son of Shimhi, a chief man of Benjamin dwelling in Jerusalem (1Chr.8.21).

Berechiah (R.V. Berea). A city of Macedonia, to which St. Paul retired with Silas and Timotheus during his first visit to Europe, on being persecuted in Thessalonica (Acts.17.10), and, whence, being again persecuted by emissaries from Thessalonica, he withdrew to the sea for the purpose of proceeding to Athens (14.15). The community of Jews must have been considerable there, for it is described very favourably (11). Sopater, one of St. Paul's missionary companions, was from this place (20.4). Berea, now called Verria or Vara-Verra, is situated on the E. slope of the Olympian mountain-range, commanding an extensive view of the plains of the Axios and Haliacmon, and has now 15,000 or 20,000 inhabitants. A few ancient remains, Greek, Roman, and Byzantine, still exist here.

—2. (R.V. Berea); 2Mac.13.4.) The modern Aleppo.—3. A place in Judaea (1Mac.9.4), probably Berekoth. [Azotus, Mt.]

Berechiah. —1. A son of Zerubbabel, and in the royal line of Judah (1Chr.3.20).—2. The father of Meshullam. 13 (Ne.3.4,30,6.18).—3. A Levite of the line of Elkanah dwelling in the villages of the Netophathites (1Chr.9.16).—4. A doorkeeper for the ark (15.23).—5. One of the chief men of Ephraim in the time of king Ahaz (2Chr.28.12).—6. A Gershomite Levite, father of Asaph the singer (1Chr.15.17).—7. Father of Zechariah the prophet (Zech.1.1,17).

Zacharias, 11; Zechiahiah, 1.)

Be-er'd. —1. A place in the south of Palestine, between which and Kadesh lay the well Lahai-roi (Gen.16.14).—2. A descendant of Ephraim (Gen.46.27), possibly a clerical error for Becher in Num.26.35. 

THE TRIBAL LOT OF BENJAMIN.
BETHABARA

BERENICE. [BERENICE.]

Berei, an Asherite, son of Zophah (1 Chr. 7:26). Possibly but apparently Besai, yet see attainted sion, as some of Ephraim’s sons must have attained to manhood, and the Hebrews were still free. Perhaps the land in which the men of Gath were born was the eastern part of Lower Egypt, if not Goshen itself. At this time very many foreigners must have been settled in Egypt.

Be’ites. The (2 Sam. 20:14) mentioned with Abel in the extreme N. of the land of Israel. Perhaps not a proper name. [C.R.C.]

Berith, The god (Judg. 9:46) = Baalberith. [BAAL, 1.]

Bernice. Eldest daughter of Herod Agrippa II. She first married to her uncle Herod Agrippa II (Juvenal, Sat. vi. 150), who brought her with him to great festus on his arrival in Judaea as procurator (Ac. 25:13). She listened to St. Paul’s defence as her sister Drusilla had done (25:24). She married, as her second husband, Pontius Pilate, king of Cilicia, then, leaving him, became the mistress of Titus, who at last dismissed her from Rome to appease public discontent on account of his connexion with her. [E.R.B.]

Berothah. (1 Esd. 5:19) = Beeroth. [C.R.C.]

Berothah, a city named (Ezk. 47:16) with Hamath on the N. of the land of Israel; possibly, but not certainly, the same as Berothai.

Berothai (2 Sam. 8:3) is the name of a city of Zobah, tributary to David, noticed with Tibrath (see Be+ath), both belonging to Damascus. The LXX. gives “his daughter” for Berothai (i.e. Heb. barâ, “to choose”) and for Chmon in the parallel passage (1 Chr. 18:8). The latter is supposed to be the later Conna (Rob. Later Bib. Res. p. 535), now Ras Ba’albek, 24 miles N.E. of Ba’albek. The village Brettân, 5 miles S. of Ba’albek, is a possible site for Berothai. [C.R.C.]

Bery’l (tarsish) occurs in Ex. 28:20, 39:13, Can. 5:14, Ezk. 1:16, 10:9, 28:13, Dan. 10:6, as the translation of the Heb. tarsish, and of the Gk. βερυλλος in Rev. 21:20. It is generally supposed that the tarsish derives its name from the place so called. The beryl was known to Pliny who admits several varieties, stating that the palest one, called chrysparsa, was by some considered a different stone, and he mentions the relation between the ordinary kind and the emerald. Theophrustus does not use the name, but probably knew the stone as one variety of his smaragdus; apparently Rev. 21:20 is the first appearance of the tarsish in the Bible. In other places there it almost certainly denotes the modern tarsos. This, the aquamarine of jewellers, is hardly more than a variety of emerald, containing less of the colouring material. Whether tarsish also signifies this stone is more doubtful. The emerald was known to the Egyptians, for there are ancient mines near the Egyptian Sea, slightly N. of the latitude of Assouan, and the gems there obtained are rather pale in colour; but some think that tarsish refers to the chrysolithus of Pliny, a golden-coloured gem, probably the modern topaz, which also occurs in that part of Egypt. [R.G.B.]

Bere’uzes (1 Esd. 5:38) = Barziel, II. Besai. “Children of Besal” were Nethinim who returned to Judæa with Zerubbabel (Ezr. 2:49; Ne. 7:52).

Besode’ia, father of MッシュHーム, 14 (Ne. 3:6).

Besor, The brook, a torrent-bed in the extreme S. of Judah, mentioned only in 1 Sam. 30:9, 10, 21. It was in the Amalekite desert or Tih desert. [C.R.C.]

Be’+ath, a city belonging to Gadadize, king of Zobah, mentioned with Berothai (2 Sam. 8:8). In 1 Chr. 18:8 the name is perhaps better called Tibrath. Tibrath is probably the Tubalkhi of the Amarna letters (Berlin 171) noticed in 16th and also (by an Egyptian traveller) in 14th cent. B.C. Possibly Kefr Dubbeh, W. of Ba’albek. [C.R.C.]

Bet’ane, a place apparently S. of Jerusalem (Jth. 1.9); probably Beth-anoth. [C.R.C.]

Bet’en, on the border of the tribe of Asher (Jos. 19:25). By Eusebius it is said to have been then called Ebiten, and to have lain 8 miles E. of Ptolemais (Onomasticon). He perhaps means el B’aneh, a village 12 miles E. of Acre. [C.R.C.]

Beth (house, temple, or tent as among modern Arabs; Judg. 18:31, 1 Sam. 1:7). BETH-EKED, the “shearing house” (2 K. 10:12) between Jereme and Samaria. Either Jerusalem 15 miles W. of the city of Legio, and in the plain of Esdraelon, probably Beth Qâd. 13 English miles S.E. of Leviān. BETH-HAGGAN, the “garden-house” (2 K. 27) near Ibleam (Yebla), possibly Beit Jenn, 9 miles N. of Yebla, or otherwise Jenin near Bethmai, according as Ahaziah fled N. or S. from Jerzeel. [C.R.C.]

Beth’habara (house of crossing), where St. John baptized (Jn. 1:28). It was “beyond Jordan.” The three oldest MSS. read “Bethania beyond Jordan,” which could not mean Bethany (where there is no water, and which is not “beyond Jordan”), but probably refers to Batanea. [BASAN.] Origen states that, in 3rd cent. a.d., nearly all the MSS. had this reading; yet he considers Bethabara to be the true reading, as did Epiphanius in 4th cent. A.D. Eusebius (Onomasticon) indicates the traditional site at the ford E. of Jericho (as still shown), but while Bethabara was only a day’s journey from Cana of Galilee (Jn. 1:29, 35,43,5,8), it was two or three days distant from Bethany (Jn. 10:40,11,3,6,17), and must have been on the upper Jordan. The name of a ford N. of Beisân was ascertained in 1854, by
the surveyors of Jordan, to be well known as 'Abārāh, and this is about 20 miles from Kēfr Kenna, and 60 from Bethany. The site is suitable, and the name shows St. John's knowledge of it, as the place is otherwise unnoticed. It can have no connexion with either Beth-barah or Beth-arabah. [c.r.c.]

Beth-anath', one of the "fenced cities" of Naphtali, named with Beth-shemesh (Jos.19.38); from neither of them were the Canaanites expelled (Judg.1.33). Now 'Ainulha, a village on the main road from Bethany to Jerusalem. [c.r.c.]

Beth-anoth, a town in the mountains of Judah, named with Halhul, Beth-zur, etc., in Jos.15.59 only. Now Beit Ar'tinim. [c.r.c.]

Bethany, a village on the mount of Olives (Mt.11.1; Lu.19.29), nearly a mile from Jerusalem (Jn.11.18), on the road from Jericho to Bethany. It was near Bethany of the Lazzarian (Jos.15.16), and hence is now called e 'Azeryeh, on the road which crosses the S. shoulder of Olivet. It was a "sabbath day's journey" from the city (Ac.1.12); for near Bethany Jesus was last seen by His disciples (Lu.24.50). See Mt.21.17, 26.6; Mk.11.11,12; Jn.12. It was probably "a house of dates", and a date palm still grows there, with figs [cf. BETHPHAGE] and olives. It is a small stone village, dominated by the tower of Queen Melisinda's convent (c14th a.d.), and a very small underground chapel is shown as the tomb of Lazarus. The ancient tombs are beside the road E. of the village. (Sam. V. 9th. Hist. p. 27-28.) [c.r.c.]

Beth-arabā', one of six cities of Judah which were situated in the Arabah (Jos.15.61), on the N. border of the tribe, and near Beth-hoglah (15.6). It is also included among the towns of Benjamin (18.22). In Jos.18.18 (cf. R.V.) we find the "Arabah" for Beth-arabah, the site of which is unknown. [c.r.c.]

Beth-aram (R.V. Beth-haram), a town of Gad, described as in "the valley" (Jos.13.27), and no doubt the same as Beth-haran in Num.33.36. Eusebius (Onomasticon) says that Syrians called it Bethramphtha, and that, in honour of Augustus, Herod had named it Ilyia. (This is said (Antiphon) to have been fortified by Augustus, calling it Julias in honour of the Emperor's wife Julia, or Livia (18 Ant. ii. 1). Ptolemy gives the locality of Livias as 31° 26' lat. and 67° 10' long., or near the N.E. shore of the Dead Sea. It is now Tell er Ramēk, 7 miles N.E. of the Jordan mouth (Sur. B. Pal. d. 238). [c.r.c.]

Beth-arbel (Ho.10.14 only), the scene of a sack and massacre by Shalman. No clue is given to its position; it may be Arbel in Galilee (Irbid), or another Arbel near Pella, E. of Jordan. Now Irbid (cf. Sayce, Higher Crit. and Mon. p. 482). [c.r.c.]

Beth-a'ven, a place on the mountains of Benjamin, E. of Bethel (Jos.7.2,18.12), and between it and Michmash (1Sam.15.5,14.23). In Ho.4.15,8,10,5 the name is transferred, with a play on the word very characteristic of this prophet, to the neighbouring Bethel, on the opposite side of the hill, but then [c.r.c.] the house of idols, or of "naught." The name has not been found extant. [c.r.c.]

Beth-azma'veth (Ne.7.28 only), a town of Benjamin which is elsewhere called Betsamos (1Esd.5.18). Noticed with Ale-meth ('Alimit), close to which, 1 mile to N., is the village Hisamah. [AZMAVETH] [c.r.c.]

Beth-baal-mon (Jos.13.17). [BAAL, 8.]

Beth-ba'di (Jos.15.7-24), at a point S. of the scene of Gideon's victory. It was apparently in the Jordan Valley. [c.r.c.]

Beth-ba'si, a town in which Jonathan and Simon took refuge from Bacchides (1Mac.9.62,64). Josephus (13 Ant. i. 5) calls it Bethagla. [BETH-HOGLAH.] [c.r.c.]

Beth-b'r, a city of Benjamin (2Cr.9.23-25). In the list of Simeon (1Chr.4.31), otherwise BETH-LEBAOTH (Jos.19.6), near Hazar-susah and Sharuhen. It was probably Bireh, a ruined site 13 miles S.W. of Hebron, and 12 miles N.E. of Tell esh Sheri'ah. [c.r.c.]

Beth-car', a place named as the point to which the Israelites pursued the Philistines (1Sam.7.11). From the expression "under Beth-car" it would seem that the place itself was on a height. Josephus says that the stone Ebeneser was set up here (6 Ant. ii. 2). The site is doubtful. [EBENEZER.] [c.r.c.]

Beth-dagon (temple of Dagon).—1. A town in Gilead (Jos.15.41), and near Dan, now Beit Delan, a village 6 miles S.E. of Joppa, called Capharc-dagon in 4th cent. A.D. (Onomasticon), between Lydda and Jannina. It was taken by Sennacherib in 702 B.C.—2. A town apparently on the N. border of Zebulun, near the sea (Jos.19.27), probably the ruin of Fraak, a hill 5 miles S.E. of Acco, near the Belus Ribat. This agrees with the situation of Capul, and other points on the border of Asher and Zebulun. [c.r.c.]

Beth-diblatha'im, a town of Moab (Je.48.22), apparently the place elsewhere called ALMON-DIBLATHAIM. It lies between Dibon and Nebo. [c.r.c.]

Bethel (house of God).—1. Jacob, fleeing to Haran, found a certain "place" (Heb. maqōm, Arab. maqām), or "shrine," near Luz (Gen.28.10,19), which he called Bethel. It was perhaps the site of Abraham's altar, E. of the town afterwards itself called Bethel (Gen.12.8). On his return from Haran (35.7,9,15), this shrine, called the 'House of God' (Antiphon), has been so named by him when he "fled from the face of his brother." He again raised up a pillar and anointed it (ver. 14) when God appeared to him "again" (ver. 9). The second episode thus refers back to the first. The town of Bethel—now Beitlin—is a small stone village, on a high, bare, and very rocky ridge, 0½ miles N. of Jerusalem. It contains the ruins of a 12th cent. church; and in the valley 3 miles to W. the spring called 'Ain Lösch preserves the name of Luz. Bethel lay within the N. boundary of Benjamin, and E. of Luz (Jos.16.2,18.13); but the place was conquered by the sons of Joseph (Judg.1.22). It was a sacred centre to which the ark was brought in war-time (see R.V. Judg.20.18,26,21.2), and was one of the places where Samuel judged Israel (1Sam.7.16). Here Jeroboam set up a calf idol (1K.12.26), which remained till David destroyed it. (1K.15.14.) Bethel was for a time recovered by Abijah (2 Chr.13.19), and inhabited by "sons of the prophets" (2K.2.3). About 772 B.C. it is called the "holy place," and "royal house," of "the
king," or of Moloch (Am.7.12,13), to whom, as a calf, human sacrifices appear to have been offered (Ho.13.2, R.V. marg.). Bethel was repeatedly raided by Benjaminites after the Captivity (Ne.11.31), and fortified by Jonathan the Hasmonean (1Mac.9.50). In 1Esdr.5.21 it is called Betolius.—2. A royal Canaanite city (Jos.12.16) apparently near Tappuah. Perhaps the present village Beit Auda, 7 miles N.W. of Hebron, and 4 miles N. of Ta'anah. [c.r.c.]

Bethel, Mount (Jos.16.1; 1Sam.13.2). The mountain region round Bethel, 1.

Beth-ge'mek, a place on or near the border of Asher (Jos.19.27). Probably 'Amqa (Robinson), 7 miles N.E. of Accho; E. of it the border ran N. to Dabbasheth. [c.r.c.]

Bether, Mountains of (Can.2.17). Bether (Bethir) a small town near Jerusalem on S.W., where the Jews were massacred in 135 A.D.; but the word may only mean "division" (LXX.), or may refer to Bethron, the hills W. of Mahanaim (2Sam.21.20). [c.r.c.]

Bethesda, probably "house of the stream," at Jerusalem (1Sa.5.2), a pool by the "two steps" (1Sam.21.19). It is often called "Bethesda" or "Beth-she'phaim," "sheep place," perhaps where the sheep were watered. It had "five porches," and the water was periodically "troubled." Steps led down to the water (ver. 7). Robinson suggested the Gihon spring ("An Innim ed Derai), which is reached by a long flight of steps on the left of the pool, and is the probable rise of the fountain. The sick still bathe in it, and flocks are watered thence. In 4th cent. A.D. Bethesda was shown at the Twin Pools, just outside the temple enclosure on N.W. In 12th cent. it was placed at the Inner Pool, a tank to the N. of the preceding. Since the 14th it has been shown at Birquet Isrâîl, outside the N. wall of the temple enclosure. But none of these pools appears to have existed in the time of Christ, and none of them has any "stream." [c.r.c.]

Beth-e'zai, named only in Mi.1.11, with places on E. border of Philistia. [c.r.c.]

Beth-gader (1Chr.2.51). Possibly the same as Gedera.

Beth-gamul', a town of Moab, in the mishôr, E. of Jordan (Je.48.23, cf. 21). Probably Kemall, a ruin E. of Dibon. [c.r.c.]

Beth-hace'rem (house of vineyards). From Je.6.1 we find it was used as a beacon-station, mentioned with Tekoa. In the time of Nehemiah (3.14) it seems to have been in the "environs" (A.V. part) of Jerusalem. The site is unknown. [c.r.c.]

Beth-haran (Num.33.36). [Beth-aram.]

Beth-hogla' or -hoglah', a place on the border of Judah (Jos.15.6) and Benjamin, to which latter tribe it was reckoned to belong (18.19,21). The name occurs by "An Hajlah, in the required position E. of Jericho, by the old monastery Qâsr Hajlah. [c.r.c.]

Beth-horon', the name of two towns or villages, an "upper" and a "nether" (Jos.16.3,5; 1Chr.7.24), on the road from Gibeon (Jos.16.19,10) to the Philistine plain (1Mac.3.1), and on the boundary-line between Benjamin and Ephraim (Jos.16.5 and 18.13,14); it was counted to Ephraim (Jos.21.22; 1Chr.7.24), and given to the Kohathites (Jos.21.22; 1Chr.6.68[53]). These two towns are the modern villages of Beit-'ür el-tâjah and Beit-'ür el-foka—that is, "the lower" and "the upper" 'Beit-'ür. The old road to Jerusalem rises 500 ft. in about a mile between the two; the pass was thus always important for defence. Beth-horon is noticed in Shishak's list of conquests (10th cent. B.C.) next to Gibeon. See R.V. 1K.9.17; 2Chr.8.5; 1Mac.8.50; Jth.4.4. From Gibeon to the Upper Beth-horon is about 4 miles of broken ascent, and this appears to be the "going up" to Beth-horon which formed the first stage of Joshua's pursuit. With the upper village the descent commences; the road is rough and difficult. This is the "going down to Beth-horon." [c.r.c.]

Beth-jeshimoth', or -jesimoth', a town of E. of Jordan, at the S. end of the Jordan Valley (Num.33.49). It was one of the limits of the encampment of Israel before crossing the Jordan. Later it was allotted to Reuben (Jos.12.3,13.20), but came at last into the hands of Moab, and is described as "the glory of the country" (Ezk.25.9; LXX. best land). Now the ruin Suweijneh near the N.E. corner of the Dead Sea shore.

Beth-leba'othh, a town of Simeon (Jos.19.6; Lelbatho, 15.32). [Beth-birel.]

Bethlehem (house of bread).—1. BETHLEHEM OF JUDAH. Its old name was Ephrath, or Ephratah (Gen.35.16,19; Ru.4.11; 1Sam.17.12; 1Chr.4.4; Ps.132.6; Mi.5.2), meaning "fertile." Near it Rachel was buried. It is now called Beit Lahm, a small town on a high ridge 5 miles S. of Jerusalem. The site of Rachel's tomb, according to early tradition, is fixed on the main road a mile N. of the town, and is now covered by a modern shrine. Bethlehem seems to have been quite a small place (Mi.5.2), and is not mentioned in the geography of Joshua, except in the verse (15.59) added in LXX.: "Ephrathah which is Bethlehem." [Eltekon.] It is called "of

Bethlehem, from S.E.

W.A.

From an original sketch by Col. Conder.)

Judeh " (Judg.17.7,19.2; 1Sam.17.12; Mt.2.1,6) to distinguish it from No. 2. Jonathan the grandson of Moses [Jonathan, 5] (Judg.17.7-9,18.30) was a Levite living as a gér,
or protected member of another tribe, at Bethlehem, as did another Levite (18.2; 18); and Bethel (see 2Sam.19:37; Je.41.17) seems to have been "dwellings given to a Gileadite near Bethlehem. There were fields (Ru.2.3) and pastures (1Sam.17.15) near the town, the latter in the wilderness to S.E. Yearly sacrifices were here offered (1Sam.16.2-5,20.6) before the temple was built. It had no natural water supply—for there is only a small spring 2 miles to E.—but had a well (b'er), now supposed to be a cistern N.W. of the town (2Sam.23.14,16; 1Chr.11.16), which depends on Pilate's aqueduct for water; this no doubt is the reason why it was not a large place originally. It was inhabited by the family of Caleb (1Chr.2.51,54,64), and after the Captivity (Ezr.2.21; Ne.7.26). But, in consequence of prophecy (Mi.5.2), it was a general Jewish expectation in our Lord's time that the Messiah would be born here (Mt.2.5; Jn.7.42); and in the manger at the "inn," or lodging: Jesus was laid (Lu.2.7). Justin Martyr, c. 150 A.D. (Trypho 78), says that "Bethlehem was Eloth when Horinah was shown in his time; and Origine intimates that it was well known (Agst. Celcus i. 51). Jerome (Epist. ad Paulin. xiii. 40) says that this cave had become a scene of Adonis-worship before Constantine cut down the grove and built his first church on the site in 330 A.D. It is remarkable that the hewn brcon hill there are still many rock-cut stables, with mangers, in ancient ruins. The site is the only one in Palestine of which there is Christian tradition traceable before the 4th cent. A.D. The ancient basilica is still standing—the oldest church perhaps in the world—adorned with glass mosaics added, c. 1150 A.D., on the nave walls (above the original pillars), and with a roof of English oak put up in 1482 A.D. Bethlehem was the retreat where Jerome translated the Bible into Latin at the close of 4th cent. A.D. It has now a population of 4,700 Christians and 300 Moslems, and is a thriving town with olive groves, fringes, and pastures near it. (Surv. W. Pal. iii. pp. 229-35, 139.)—2. BETHLEHEM OF ZELENU (Jos. 19.15). Now the village Beit Lahem, 7 miles N.W. of Nazareth. It is not said which of the two towns was the home of the judge Ibzan (Judg.12.8,10).—[C.R.C.]

Beth-mon (1Res.5.17) = Bethlehem, i.

Beth-maachah; named in 2Sam.20.14,15 as a definition of the position of Abel in or close to Maacah, or Aram-maachah, one of the petty Syrian kingdoms in the N. of Palestine (cf. 2K.15.29).

Beth-marcaboth (house of the chariots), one of the towns of Simeon, mentioned with Ziklag and Hormah (Jos.19.5; 1Chr.4.31). In Jos.15.30,31 Madmannah occurs instead. The place, like Hazar-susah, which name stands next, refers no doubt to a military post with a force of charioms, dating perhaps from the Egyptian occupation of such posts in the plains in the 15th and 16th cents. B.C. [C.R.C.]

Beth-mon (Je.48.23). [BAAL. 8.]

Beth-nimrah, one of the fencel cities of Gad (Num.32.36) lying in the valley near Beth-haran (Jos.13.27). In Num.32.3 it is called Simple Nimrah. Now Tell Nimrin, at the foot of the hills of Gilead, 10 miles N. of the Dead Sea (Surf. E. Pal. p. 237).—[C.R.C.]

Beth-saida (1Th.4.4), correctly (as R.V.) Beth-horon.

Beth-pa'let, Beth-phe'let (R.V. Beth-pelt), a town among those in the extreme S. of Judah, named in Jos.15.27 and Ne.11.26 with Moladah and Beer-sheba. The site is unknown.—[C.R.C.]

Beth-nazazz, a town of Issachar named with En-Haddah (Jos.19.21).

Beth-pe'or (temple of [Baal] Peor; Deut. 3.29,4.46,34.6; Jos.13.20), a place apparently not far from Nabo, in Moab, probably near the "top of Peor" (Num.23.28), which commanded a view of the Jesimon on W. of the Dead Sea. If Peor was at Mimin, the very remarkable rude stone circle with its central standing stones at el Maraghid (scared things) on the same ridges may represent this "top of Peor." [PEOR.] (Surf. E. Pal. pp. 184-185.)—[C.R.C.]

Beth phage (house of fags), a place on Olivet (Mt.21.1; Mk.11.1; Lu.19.29), apparently close to Bethany. There is no clue to the exact site and the Talmudic references are vague.—[C.R.C.]

Beth-phe'let. [BETH-PALET.]

Beth-rapha' occurs in the genealogy of Judah as the son of Esh-ton (1Chr.4.12), probably a place-name.

Beth-reho'b, a place near the valley in which lay the town of Laish and Dan (Judg.18.28). It was one of the little kingdoms of Aram or Syria (2Sam.10.6). In ver. 8 the name occurs in the shorter form of Rehoab.—[C.R.C.]

Beth-sa'aida, the home of SS. Philip, Andrew, and Peter (Jn.1.44,12.21), a place important as defining the site of the miracle of feeding the five thousand. There is no doubt that a town so called lay immediately E. of the Jordan, close to where it entered the sea of Galilee, in "lower Gaulonitis" within the tetrarchy of Herod Philip, who died and was buried there. He named the city Julias from Caesar's daughter (Josephus, Ant. ii. 16, 1), but Pliny (Hist. Nat. v. 6) places Julias on the E. side of the lake, with Hippos (Sisich). Ruins in this position were described by L. Oliphant in 1884, including possible remains of a synagogue, and Greco-Roman fragments, at ed Dikkeh (the platform) on the slope of a barren hill a few hundred yards E. of the river, a mile N. of the ruin of Tell. The Jordan has probably filled up the N. shores of the lake considerably since 34 A.D., when Philip died; but this site is still only 2 miles from the point at which it enters the lake. Two difficulties have been found, from early times, in applying all the N.T. references to Bethsaida Julias, though most of them clearly apply to this site. First, that Bethsaida is said to be "of Galilee" (Jn.12.21); this, however, might be an early clerical error for the less familiar "of Golan." Secondly, that the disciples took boat, from near the desert where the feeding of the five thousand occurred, "to go to the other side before unto Bethsaida" (A.V. Mk. 6.45), or simply "the other side to Bethsaida" (R.V.). The distance from their starting-point to Capernaum (Jn.6.17,19) exceeded 25 or 30 furlongs, that is 3 or 4 miles; and "the land of
Gennesaret," where they landed (Mk.6:53), was 5 miles S.W. of Julius. But they are not said to have reached Bethsaida; and the Greek preposition πρό, with the accusative case, means not only "towards" or "in relation to." The difficulty disappears if we render the passage "go to the side opposite to Bethsaida," which would be Julius as opposite Gennesaret, E. as opposed W. of Jordan. The notices of Bethsaida with Chorazin and Capernaum present no objection (see Mt.14:13). Since Julius was only about 3 miles from the former and 5 from the latter. The belief that Bethsaida was in Gennesaret (which is nowhere stated in N.T.) was due to the passage above quoted (Mt.6:45), and led to the supposition that the miracle occurred W. of the lake. The Sinaitic MS. (where Gennesaret occurs) alters the topography to agree with this view. It omits the words "belonging to a city called Bethsaida" (Lu.9:10), as defining the position of the desert where the miracle occurred, and it alters the phrase "there came other boats from Tiberias nigh unto the place where they did eat bread." Bethsaida was "by the lake," nigh where they did also eat bread." The emendation has created much confusion. In Mt.14:13,34 we find that Jesus retired from "His own country" (13:54) going "by ship unto a desert place apart"; and after the miracle, when they were gone over they came to Bethsaida (Mk.6:45). The Sinaitic MS.5,6:31,45,8:13,22 the account of the first event is the same, and a second voyage from Dalmanutha [MAGDALA] led to "the other side" and "to Bethsaida." In Lu.9:10 the miracle is stated, in all the oldest MSS. except the Sinaitic, to have occurred near Bethsaida, a city which lay on the borders of the desert region of Galilee. The Sinaitic MS. 5,14:3,15,17 Jesus, having crossed the sea of Galilee, returned after the miracle to Capernaum, a distance of more than 3 or 4 miles. Hence the four accounts agree in placing Bethsaida at Julius, in all respects except in the two verbal expressions already noticed. This question, whether the Sinaitic MS. is more accurate in this problem of N.T. geography, is due, not to any discrepancy between the various accounts, but to the misunderstanding that arose about the 4th cent. A.D. The site of Julius is not noticed in the Onomasticon, and the scene of the miracle was then wrongly shown W. of the lake of Gennesaret. The Sinaitic MS. took this view, as it took the prevailing view as to Emmaus; but its writer is responsible also for supposing an eclipse of the sun to occur at full moon (Lu.23:45), and for ungrammatical Aramaic in substituting γαλατεία κοίμησα for "Talitha cumi" (Mt.5:41). To reconcile all known notices of Bethsaida, we require only to read Galateia for "Galilee," and to take the latter as rather loosely used in contrast with Judaea—Bethsaida, "the house of fishing," being only about a quarter of a mile outside the Galilean border.  

Bethsamos. [BETH-AMMETH].  
Bethsam' [1Mac.5:52,12:40,41], Bethesh' (rSam.31:12), Bethes'shan' (Is.15:12); elsewhere Beth-she'an, a city which, with its "daughter" towns, belonged to Manassesh (rChr.7:29), just within the limits of Issachar (Jos.17:11), and therefore on the W. of Jordan (cf. 1Mac.5:52). The Canaanites were not driven out from the town (Judg.1:27). In Solomon's time it seems to have been a town of poor condition (1K.4:12). The corpes of Saul and his sons were fastened up to the wall of Beth-shan by the Philistines (1Sam.31:10,12) in the open street or space, which then, as now, forms the gate of an Eastern town (2Sam.21:12). Bethshan is mentioned c. 159 B.C. in 1Mac.12:40,41. The later name Scythopolis appears first in 2Mac.12:29, but has not survived, and the place is still called Beisan. It lies in the Jordan Valley, about 15 miles S. of the sea of Galilee, and 4 miles W. of the ruin of Bethshan, at the mouth of the valley of Jezreel. The ruins on N. include those of a Roman theatre. It has recently become the seat of a district governor, but is only a poor village of mud huts. [CCC.]  

Beth-she mesh (temple of the sun). Four places so named include—1. A town on the borders of Judah and Benjamin, 12 miles W. of Kirjath-jearim, otherwise Ir-shemesh (town of the sun; Jos.19:41), a city of Levites (Jos.21:16), who are here noticed early (1Sam.6:9,14,15); now 'Atin Shemesh, a ruined village in the valley of Sorek, 4 miles W. of 'Einara (Surv. W. Pal. ii. p. 231), distinguished from other 'Ein Harazim (2K.14:11). Amaziah was here defeated (2Ch.25:21). It was in the shphelah (2Chr.28:18). —2. A place on the border of Issachar (Jos.19:22), apparently near Jordan on S.E. boundary. It is probably the ruin at 'Atin Shemesh, 7 miles S. of Beisan in the Jordan Valley.—3. A town of Naphtali (Jos.19:38; Judg.1:33), possibly the ruin of Beth-shanude (2K.14:11).  

Beth-shittah (house of the acaea; Judg. 7:22). The Sinaitic MS. places this city in the plain of Jezreel (6:33), which was that of E. of the city, and led to ABEL-MEHOLAH (‘Atin Helweh) in the Jordan Valley. The village of Shutta, on N. side of the valley, 6 miles E. of Jezreel, is therefore a fit position for Beth-shittah. [CCC.]  

Beth-su'ra. The form in 1 and 2 Mac. (1 Mac.4:29, etc.) of Beth-shunah.  

Beth-tapp'ah, a town of Judah, in the mountains near Hebron (Jos.15:53; cf. rChr. 2:43). Now Tuffah, a village 4 miles W. of Hebron. [CCC.]  

Bethuel, the son of Nahor by Milcah: nephew of Abraham, and father of Rebekah (Gen.22:22,23,24,15,24,47,28,2). In 25:20 and 25:23 he is called Bizri. He lived in a town called Beithel. Though often referred to in the narrative, Bethuel only appears in person once (24:50). Upon this Prof. Blunt ingeniously suggested (Coincidences, i. § 4) that he was the subject of imbecility or some other incapacity.  

Bethuel (rChr.4:30), Beth'ul (Jos.19:4), otherwise probably Craigslist (Is.19:21) was a town of Simeon in the far S. The site is unknown. Perhaps Bethel, 2 (1Sam.30:27). [CCC.]
Bethulia. The home of Judith, the topography of which is very minutely described. It was "over against Esdraelon W" and near the plain of Dothaim (Jth.4:6). The enemy camped in the latter plain, as far as Belmam or Balamo (7:3,5), or from Dothain E. to Wady Belameh. But Bethulia was in the hills, on the slope of a mountain (6:11,12) with springs at its foot (7:12), but no water at the town (7:20). Other mountains surrounded it (15:3), and the view extended down to a valley (10:10). These details apply to the village Mikhiltia or Meselich (Suv. W. Pat. ii. p. 156), on the N. slope of a hill, 5 miles S.E. of Tell Dothah. It has only wells, but on S. side of the mountain there is much water in the Merj el Ghuruk or "the dried meadow." The view on N. extends over Esdraelon to Nazareth and Tabor. [c.r.c.]

Beth-zacharias. [Bath-zacharias.]

Beth-zur, a town in the mountains of Judah, named between Halhul and Gedor (Jos.15:58). Beth-zur would appear from its name to have formed the people of Maon, and was fortified by Rehoboam (2Chr.11:7). The people of Beth-zur assisted Nehemiah in rebuilding the wall of Jerusalem (Ne.3:16). In the wars of the Hasmonaeans, Beth-zur, or Beth-sura, played an important part. The name means "house of the rock." Most often close to Machpelah on W., a ruin on a cliff at a narrow pass of the road from Hebron to Jerusalem. [c.r.c.]

Beto lius (1Esd.5:21). [Bethel, I.]

Betomas them and Betomes tham, a town "over against Esdraelon, facing the plain that is near Dothaim" (Jth.4:6,15:4). An unknown site. [c.r.c.]

Betomim (Jos.13:26), named on N. border of Gad. Probably the Butein district of N. Gilead. [c.r.c.]

Betvothal. [Marriage.]

Beulah (married). In the imagery of Isaiah (62:4; cf. 49:14,54,11) the name which the land of Israel is to bear when the Gentiles share its spiritual privileges.

Beza'i. "Children of Beza" returned from captivity with Zerubbabel (Ezr.2:17; Ne.7:23). The name occurs again among those who sealed the covenant (Ne.10:18).

Bezaaleel.—1. Son of Uri the son of Hur, of the tribe of Judah; the artificer to whom was confided by Jehovah the design and execution of the skilled work, especially in metal, wood, and stone, for the tabernacle (Ex.31:1-6).

2. One of the sons of Pahath-moab who had taken a foreign wife (Ezr.10:30).

Berek.—1. A Canaanite town (Judg.1:4,5), probably the ruin Bezek m. S. of Lydda. [c.r.c.]

2. A site evidently in Central Palestine, a day's march from Jabesh-gilead (1Sam.11:8), where Saul gathered Israel within a week. Eusebius (Onomasticon) mentions a Bezek 17 Roman m. from Shechem, now Tobias, an ancient ruin 14 English m. N. of Nablus. This lies immediately W. of the probable site of Jabesh, about 25 m. distant (Suv. W. Pat. iii. pp. 231, 237). [c.r.c.]

Bezer, an Asherite, son of Zophah (1Chr.7:37).

Bezel, a town of Reuben in the desert (midbahir), and in the mishor or "plateau."
BIBLE

of Palestine, as we now call it, has been opened up, its ruinous heaps or tell have been identified, the country has been mapped out, the manners, customs, land-laws, traditions, and dialects of the people have been investigated. We owe much to the labours of Robinson and to the enthusiasm of Stanley, and still more to the work of the Palestine Exploration Fund, and to the diggings of Petrie, Bliss, and Macalister. The history of the land can now be traced from the time of the old Amorite inhabitants through all the ages that have followed. The Amarna tablets have been a revelation as to the politics of Canaan in the Mosaic age and as to its links with Egypt and the East. The situation of the walls and buildings of old Jerusalem is gradually being elucidated; and speaking generally, it may be said that whilst the Bible is the best handbook to Palestine, the land with all that it has to tell us is the best commentary on the Bible. The countries round Palestine have also yielded some of their secrets, and the history of the past as recorded in Scripture. This is true to some extent of Egypt and Sinai, but still more of Assyria, Babylon, and Persia. The dealings of ancient Eastern kings with one another and with Israel and Judah are becoming increasingly clear, and there is hardly a notable event in the annals of kings that were concerned in the time of Abraham onwards which is not capable of illustration or direct confirmation from modern discovery. The same is true in the case of N.T. The few difficulties which formerly existed are now removed—e.g. concerning the census (vide Ramsay's Was Christ born in Bethlehem?); the narrative of St. Paul's shipwreck has been tested and confirmed in every particular (vide James Smith's Voyage of St. Paul); and the record of St. Paul's travels in Asia Minor has proved to be a marvel of accuracy (vide Ramsay's Paul the Traveller and other works). What remains to be done in this department is chiefly the exact dating of the events and the identification of places. The want of a fixed era in ancient Egyptian history is one of the most serious hindrances to this. Old Babylonian methods of recording reigns are becoming clearer (vide King's Babylonian Records); and it seems that some of the dates assigned by Assyrian and Babylonian kings to ancient events were given through misunderstanding rather than deliberate exaggeration, and have to be brought down considerably lower. It should be added that whilst Oriental discoveries (often very fragmentary) furnish frequent illustrations of the truth of Scripture, the Bible itself throws considerable light on ancient history. Hebrews and Greeks were contemporaries of the earliest Babylonians and Ninevites to the age of the Roman empire, telling us by the way much about the Canaanite, Syrian, Phoenician, and Egyptian kingdoms, and bringing before us the story of the rise and fall of Eastern nations in a most instructive manner. This is so strikingly the case that, were it not "a Bible," it would be universally accepted as the most valuable historical document which has come down to us from ancient times.—VII. LEGISLATION. The Bible is not a book of philosophy or of ethics, but rather the record of the manifestation of God in history,
yet it contains the germs of a noteworthy scheme of legislation. The laws and customs of Babylonian and Assyrian life can be compared with those of Hammurabi (Anrhapel); while the Mosaic law received much light from an investigation of old Arabian laws by Michaelis. The peculiarity of the law of Moses is that it is not a complete code, but was delivered piecemeal, and by divine revelation. First, there were the covenants of the Ten Words; then, the laws of Ex. 20.22—23.19; then, after the construction of the sacred tent and its accompaniments, came the rules of ritual cleansing, marriage, purity, and land tenure (Lev. 1—25). Subsequently, the parting addresses of Moses recapitulate many of the laws with occasional and by modifications. "The Lord")

Bigtha, one of the seven chamberlains or eunuchs of the harim of Ahasuerus (Esth. 1.10). Bigtha, one of the seven chamberlains or eunuchs of the harim of Ahasuerus (Esth. 1.10). Bigtha, one of the seven chamberlains or eunuchs of the harim of Ahasuerus (Esth. 1.10). Bigtha, one of the seven chamberlains or eunuchs of the harim of Ahasuerus (Esth. 1.10).

Birds. [PALESTINE]

Birsha, king of Gomezra at the time of the invasion of Chedorlammon (Gen. 14.2).

Birth. Labour among Eastern people, and indeed among all open-air or nomad tribes, is generally very easy. Cases of difficult labour sometimes occur in O.T. (Gen. 25.26, 35.17, 38.58; 1Sam. 4.19). But the fact of circumcision being fixed for the eighth day (Gen. 17.12) seems to point to easy parturition as the natural and expected course of events. For references to circumcision, see Ex. 21.22; Job 3.16; Ps. 58.8; Is. 26.13. [FAMILY, D. IV. B.]

Birthdays. The observation of birthdays is very ancient (Gen. 40.20; cf. Job 1.4; Ho. 7.5).

In Persia (Herod. 1.133) and in Egypt they
BIRTHRIGHT

were celebrated with great pomp. In Mt. 14:6 by ἀνατρέπω (A.V. birthday), which in classical Gk. is used for a memorial feast for the dead. Herod's accession feast is probably intended, for such feasts were common in Herod's family (Josephus, 15 Ant. xi. 6).

Birthright. The eldest son by a full wife had a birthright, consisting mainly of an addition to his paternal property, which could be transferred by agreement between the eldest son and a younger brother (Gen. 25:31 ff.) or by the father (48:22; 1 Chr. 5:1). On Deut. 21:15-17, see Family, E (1) b). Precedence went by seniority (Gen. 43:33), but the father could vary this while living (1 Chr. 28:10), or after his death by his blessing (to be distinguished completely from birthright; Gen. 27:36), which dealt with the family headship, not with property (9.25 ff., 27.3 ff., 49.4).

[BISHOP]

The term πρωτόσωφα occurs only once in N.T. (Heb. 12:16, with reference to Esau); but the birthright precedence of the firstborn is accorded (Heb. 11:28) to the last born (R.V. marg., or, that among all) He might have the pre-eminence." As the Firstborn He has a more excellent inheritance than His brethren (cf. Heb. 1:4, 6). [HEIR.]

Birzavith (1 Chr. 7:31), a place probably in Asher, of which Malchiel was the founder. The site is unknown.

Bishlam, apparently an officer or commissioner (= BLEMUS, 1 Esd. 2.16) of Artaxerxes in Palestine at the time of the return of Zerubbabel from captivity (Ezr. 4:7).

Bishop. The word "bishop" (ἐπίσκοπος) was in common use among Greeks to denote commissioners and inspectors and magistrates and other officials. In the LXX. it occurs in Num. 4.16, 31.14; Judg. 9.28; 2 K. 11.15, 18; 2 Chr. 34.12, 17; Ne. 11.9, 14, 22; Job 20.29; Wis. 1.6; Is. 69.17; 1 Mac. 5.11. In all these places it is used to denote overseers and officials of various kinds, except in Job 20.29, where it refers to God, and is used to translate the Heb. ʼבשך in N.T. it occurs in Ac. 20.29; Ph. 1.1; 1 Tim. 3.2; Tit. 1.7; 1 Pe. 2.25. In the first four of these passages it denotes a church officer; in 1 Pe. 2.25 it is used for our Lord. In N.T. the verb ἐπισκόπωσι occurs in Heb. 12.15 in a general sense, and in the T.R. and text of revs. but not in their margin or in Westcott and Hort's text in 1 Pe. 5.2 in the sense of "exercising the office of bishop." As the title of a church officer ἐπίσκοπος is commonly used in classical language, unless in a special context. Hence it may be concluded against Weitzsäcker, who distinguished them, and Hort, who regarded ἐπίσκοπος not as a title of office but as meaning one in a position of oversight, that ἐπίσκοπος and ἐπισκόπωσι denote the same official. For the nature of the office and the method of appointment, see CHURCH; LAYING ON OF HANDS; TIMOTHY, EPP. TO. Plumptre and Gibson in Smith's D.B. (4 vols. 1893), i. 436-439; Armitage Robinson in Encl. Bibl. i. 575-584; Gwatkin in Hastings, D.B. (5 vols. 1904), i. 301, 302; Lightfoot, Philippians, pp. 95-99; Gore, The Church and the Ministry, pp. 363-369 (4th ed.); Hatch, Bampton Lectures; Harnack, Aelred Roth, Apostolic Age of Christian Church, ii. 326-331; Hort, Christian Ecclesia, pp. 190-194; Stone, Christian Church, pp. 278, 279.

Bithiah, daughter of a PHARAOH, and wife of Mered, a descendant of Judah (1 Chr. 4.4). On The Scriptures, as well as the Egyptian monuments, show that the Pharaohs intermarried with foreigners; but such alliances seem to have been contracted with royal families alone. It may be that Bithiah was a captive.

Bithron (2 Sam. 2.29), the "broken" slopes of Gilead W. of the Jordan [BEDREN].

Bithynia. This province of Asia Minor is mentioned only in Ac. 16.7 and 1 Pe. 1.1. Bithynia, considered as a Roman province, was contiguous on the W. to Asia. On the E. its limits underwent great modifications. The province was originally inhabited by the Roman republic in the 3rd B.C. as a legacy from Nicomedes III. the last of the line of monarchs, one of whom had invited into Asia Minor those Gauls who named the central district of the peninsula GALATIA. On the death of Mithridates, king of Pontus, 63 B.C., the W. part of the Pontic kingdom was added to the province of Bithynia, which again received further accretions on this side under Augustus, 7 A.D. The chief town of Bithynia was Nicaea, celebrated for the general Council of the Church held there in 325 A.D. against the Arian heresy.

Bitter herbs. The Israelites were commanded to eat the Paschal lamb "with unleavened bread" (Ex. 12). The word "bitter" (mrrhím) is used in several passages, e.g. Is. 15-23, 24.11, and Zeph. 2.14, to indicate a creature inhabiting marshy or ruined situations. In the first passage it is stated, "I will also make it [Babylon] a possession for the bitter, and pools of water;" while in the other two the word also translated bitter, whose companion in such situations is stated to be the corromant. Some commentators have identified the word with the Arabic qinifdah, the porcupine, or hedgehog; but neither hedgehogs nor porcupines frequent swampy situations, climb about ruins, or utter a cry (Zeph. 2.13, 14). The general opinion favours the notion that the formation of qippdôb by "bitter" is correct; this bird (Bolaurus stellaris) frequents marshy situations, which may sometimes occur, or be near, the sites of ruined buildings. The loud booming of the bittern was formerly a familiar sound in the English fens.

Bittern

The term πρωτόσωφα occurs only once in N.T. (Heb. 12:16, with reference to Esau); but the birthright precedence of the firstborn is accorded (Heb. 11:28) to the last born (R.V. marg., or, that among all) He might have the pre-eminence." As the Firstborn He has a more excellent inheritance than His brethren (cf. Heb. 1:4, 6).
bird has a wide range in Europe, W. and N. Asia, and N. Africa. [R.L.]

**Bitterness, Water of.** [WATER OF BITTERNESS.]

**Bitumen.** [Salt; Sea.]

**Bzizothiah** (R.V. Bzizothiah), a town in the S. of Judah named with Beer-sheba and Baalath (Jos. 15:28).

**Bzitha, the second of the seven eunuchs of king Ahasuerus' harim (Esth. 1:10).**

**Black.** [Colours.]

**Blains.** The word occurs once only in A.V. (Ex. 9:9); but oils are frequently mentioned (Lev. 13:18; 2 Kings 20:7; Is. 38:21; Job 2:7). The Sixth Plague is apparently referred to in Deut. 28:27, 35, as "the botch of Egypt," and was probably a form of leprosy or of bubonic plague. [LEPROSY; PLAGUE.] [R.J.]

**Blasphemy.** The Heb. וָדָא means "a mocking." The later Jews said (Mishna, Sanh. vii. 5), "The blasphemer was not guilty till he uttered The Name" (of Jehovah), and the "name" is frequently connected with the word both in N.T. and O.T. (e.g. Lev. 24:11, 18; 2 Sam. 13:14; Ps. 74:10, 18; Is. 52:5; cf. Ro. 2:24; Rev. 13:6). [CRIMES.] In view of this it is instructive to note the application of the idea to the name of Christ by one so imbued with Jewish thought as St. James (2:7). In classical Gk. the primary meaning of this word was an utterance of ill-omen, opposed to εὐφύσια, as when one unintentionally prays for evil instead of good (Eur. Ion, 1189). It then came to have a general sense of slanderous, contumelious speech against either God or man. And while in N.T. this wider use is found (Mt. 15:19; Ro. 14:16; 1 Cor. 10:30; Tit. 3:2, etc.), the word also has a special sense of arrogating to oneself what belongs to God alone. On this charge both our Lord and St. Stephen were condemned to death by the Jews (Mt. 26:65; Ac. 6:13). The Jewish punishment for this was death by stoning (Lev. 24:13-16). According to the teaching of Christ, blasphemy was of various degrees of sinfulness, that against the Holy Spirit being of so serious a nature as to deprive one guilty of it of all hope of pardon in this world and the next (Mt. 12:32; Mk. 3:29; see also 1 Jn. 5:16). What blasphemy against the Holy Ghost really implies has been a fruitful source of controversy. Those Jews were apparently in danger of committing this sin who attributed to the power of Satan those unquestionable miracles which Jesus performed by the finger of God, and the power of the Holy Spirit. But blasphemy, like lying, may be acted as well as uttered, and implies the deliberate preference of evil to good. Then, habitual and determined opposition to the influence of the Holy Spirit renders repentance, and therefore forgiveness, morally impossible. Grace, like bodily nourishment, may be rejected till the power to receive it vanishes. There is no question of the efficacy of divine grace. The obstacle lies in the wrong-doer alone, who, by persistent sin, brings upon himself, as was the case with Pharaoh, a judicial hardening of heart, which of itself excludes the possibility of pardon. [R.S.M.]

**Blas'tus, the chamberlain of Herod Agrippa I., (Ac. 12:20), who was persuaded by the people of Tyre and Sidon to gain them a hearing from the king.** [E.R.H.]

**Blessing.** In early times the blessing was regarded as being a real, material power, capable of influencing the future of those upon whom it was pronounced. Thus the future of the sons of Noah was decided by his blessing or curse (Gen. 9:26). So potent was it that when once spoken it was no longer under the control of the one who pronounced it, and could not be recalled (27.37). The blessing, even when obtained by guile, had the power to transfer birthright precedence from the elder.
BLINDNESS

BOHAN

to the younger son, and was irrevocable (vv. 29,33,41). [Laving on of Hands; Birthright; Family; Oath.]

[Ro.] Blindness is extremely common in the East, purulent ophthalmia frequently occurring in Egypt and the Holy Land, especially amongst children, but also amongst adults. From whatever cause it originated, blindness was regarded in O.T. not indeed necessarily as a direct punishment of sin (cf. Jn.9.2), but as a disqualification for the fulfillment of God's will (cf. Gal.4.15,6.11). Blindness was offered in sacrifice (Lev.22.22; Deut.15.21; Mal.1.8), nor were blind priests permitted to officiate (Lev.21.18). Several cases of blindness as the direct result of divine interposition are recorded in Holy Scripture. Deut.28 is specially interesting as suggesting to any one with medical knowledge the direct and natural results of moral transgression, esp. in vv. 22, 27, 28, and 35. 2K.6.18 and possibly Gen.19.11 may be explained as referring not to loss of physical eyesight, but to dense fog or mist in which those "smitten" lost their way; but the case of Elymas the Sorcerer (Ac.13.11) is more clearly an instance of such interposition. His sentence was probably either glaucoma or enbolic. Either of these would produce a sudden blindness, especially under the stress of great excitement. If we accept the "fog" theory for 2K.6.18, there is no specific case of the healing of blindness recorded before N.T., except that of Tobit in Blind beasts must not be killed, however, is constantly mentioned as a special prerogative of the Almighty and of the coming Messiah (see, inter alia, Ps.146.8: Is.35.5;42.7; Mt.9.27; Lu.4.18, etc.). Accordingly, there are several cases recorded of our Lord's healing the blind. In some he accomplished this by simple touch (Mt.9.29); in others he used physical means—clay (Jn.9.6) or saliva (Mk.8.23). None of these are capable of reasonable explanation except on the basis of pure miracle. There is one other recorded case of blindness which is of special interest, that of St. Paul, the salient facts of which are: Saul (i) is struck blind suddenly, and is unable to see; (ii) remains blind for three days in a state of great nervous depression (9.9—"did neither eat nor drink"); (iii) is visited by Ananias, who delivers his message and puts his hands upon him. This results in a scaly substance falling from his eyes and he receives his sight. (N.B.—In 9.18 the word "forthwith" with "is" omitted by R.V. and by all the best authorities.) Now, there are three diseases which might cause sudden blindness such as is here described, but one of these (retilinitis of renal origin) is quite inconsistent with St. Paul's living a life of hardship for thirty years afterwards. This leaves the possibility of thrombosis (the blocking up of the blood-vessel of the central nervous system by clot or foreign substance, thereby temporarily disturbing the visual centres), or of trachoma. This last (which coincides best with the story of the healing) is an acute form of purulent ophthalmia, and would quite possibly (especially if accompanied by a breakdown of vision under the influence of the intense and miraculous light). Under these circumstances the patient would remain, probably, greatly depressed and afraid of the least ray of light (photophobia), and repulsive purulent secretions would collect around the eyelids. Upon Ananias' command ("Tell him the hands upon him") and encouraging him to use his eyes, he would find his sight slowly returning, though it would never be very strong. If we compare this theory with Gal.4.15;6.11 (R.V.) and 2Cor.10.10, we get perhaps as near as is possible to a working theory as to the origin of blindness which is spoken of in the flesh (q.v. for other theories) of 12.7. [Cf. Paul, I. (5), (1).] [F.J.]

Blood. [Sacrifice, 2; 3, iv. d; Unclean Meats.]

Blood, Avenger of. [Goel; Homicide; Crimes.]

Blood, Issue of. The phrase is used in two senses: first, of the ordinary periodical menstrual discharge which, according to the Levitical law, involved one week's uncleanness; and secondly, of a permanent disease (see Mt.9.20; Mk.5.25; Lk.8.43). This latter meant a permanent uncleanness (Lev.15.16ff.). It is impossible to demonstrate absolutely that the disease spoken of in the gospels, but probably it was either menorrhagia (excessive bleeding at the menstrual period) or some sort of cancer or tumour of the uterus. [F.J.]

Blue. [Colours.]

Boanerges, a name given by Christ to SS. James and John, Mk.3.17; and there explained to mean "sons of thunder." The spelling of the Heb. name has probably been corrupted in its transliteration into Gk.; and if so, it may represent two Heb. words: brnē = sons, and regez, which is used Job 37.2 of the sound of the voice of God, in a passage descriptive of thunder. The name referred to the impetuosity of their character (cf. Lk.9.54). On its aptness, see Westcott's St. John, Introd. p. xxiii., and Trench, Studies in the Gospels, art. "Sons of Thunder." [E.R.B.]

Boar, Wild. [Swine.]

Boaz (in him is strength).—1. A wealthy Bethelhemite possibly identical with Iznaz, to whom Ruth the Moabitess was married. Finding that the nearer kinsman of Ruth was unwilling to become her goēl, he had the obligation publicly transferred with the usual ceremonies to himself; hence it became his duty to marry Ruth, and to redeem the estates of her deceased husband Mahlon (4.1ff.). Being himself precluded from marriage with an Israelite, as the child of Salmon and Rahab (Deut.23.2; Mt.1.5), he gladly undertook these responsibilities: and his obedience to the twofold law of manṣir and goēl was blessed by the birth of Obed, from whom in a direct line our Lord was descended. S. Cox, The Book of Ruth. —2. The name of one of Solomon's bronze pillars erected in the temple (1K.7.21; 2Chr.3.15; Je.52.21). [C.R.D.B.]

Boe'cas (Is.8.2). [Bukki, 1.]

Bocheru', son of Azel according to the present Heb. text of 1Chr.3.8 = 9.44.

Bochim (the weepers), a place on the W. of Jordan, near Gilgal (Judg.2.15).

Body. [Man.]

Bo'han (Jos.15.6,18,17), a Reubenite who erected a stone on S. bank of the valley of Achor,
and N.W. of Beth-hoglah. The name has not survived in this position, nor elsewhere. [C.r.c.]

Boils. [Blains; Medicine.]

Bolster. [Pillows.]

Bondage. [Captivities of the Jews; Slave; Law in O.T.]

Bonnet. [Headdress.]

Book (Heb. sêpher, a writing). Not a book of pages, but a document, whether "roll" or "tablet," or set of tablets. [Writing. - C.R.C.]

Booths. [Succoth; Tabernacles, Feast of.

Booty consisted of captives of both sexes, cattle, and whatever a captured city might contain, especially metallic treasures. Within the limits of Canaan no captives were to be made; beyond those limits, in case of war, all the women and children were to be made captives and the men put to death (Deut.20. 14-16). The law of booty was an equal division between the army and the people of Israel, but of the former half head in every 500 was reserved to God, and appropriate to the priests, and of the latter one in every 50 similarly reserved and appropriate to the Levites (Num.31:26-47). David added a regulation that the baggage-guard should share equally with the troops engaged (1Sam.30.24,25).

Booz' (Mt.1.5; Lu.3.32) = Boaz, i.

Bo'rifth (2Esdr.1.2). [Bukki, i.]

Boschath. [Bozkath.]

Boza' a fortified city in Gilead or in S. Bashan (1Mac.5.26), noticed with Casphon, Carnaim, and Alema. The latter may be Kefr el Mâ, 11 miles W. of Ashteroth-Karnaim, and either Bosor or Bosora may be Busr, 5 miles S.E. of Edrei, not far from Casphon or Khasfin (5:36). - 2. Bosor, for Beor, 2 (A.V. 2Pe.2.15), is more correctly Beor in the Sin. and Vat. MSS. (R.V. Beor). [C.R.C.]

Bosora (1Mac.5.26,28; Vat. NS. Bosor), reached from Gilead "by the way of the wilderness," may be the later Bostra (Busrâh), which is not otherwise noticed in the Bible. [Bosor; Bozrah.] [C.R.C.]

Boss. [Arms.]

Botany. [Palestine.]

Botch. [Blains.]

Bottle. (1) The skin bottle: (2) the bottle of earthen or glass ware, both of them capable of being closed from the air. (1) The Arabs and all nomads often keep water, milk, and other liquors in goatskins. When the animal is killed, they cut off its feet and its head, and draw it out of the skin, without opening its belly. In Arabia the skins are tanned with acacia-bark and the hairy part left outside. They afterwards sew up the places where the legs and the tail were cut off, and when it is filled they tie it about the neck. The effect of external heat upon a skin bottle is indicated in Ps.119.83, "a bottle in the smoke" (or "vapour"), and of expansion produced by fermentation in Mt.9.17, "new wine in old bottles." (2) Vessels of metal, pottery, or glass (liqueurs in use among the Greeks, Egyptians, Etruscans, and Assyrians, and also among the Hebrews, especially in later times. In Je.19.1 "a potter's earthen bottle" is noticed. The Hebrews probably borrowed their manufacture of Glass from Egypt, which was celebrated for glass work, as remains and illustrations of Egyptian workmanship are extant as at least as early as 15th cent. B.C. (Wilkinson, ii. 59, 60.]

Bow. [Arms.]

Bowl. As in the case of the Bason, the precise form and material of the bowl is uncertain. Bowls would probably be used at meals for liquids, or broth, or pottage (2K.4. 40). Modern Arabs are content with a few wooden bowls. In the Brit. Mus. are several terra-cotta bowls with superstitious Aramaic inscriptions, expressing charms against sickness and evil spirits, which may possibly explain the "divining cup" of Joseph (Gen.44.5). The bowl was filled with some liquid which was drunk as a charm against evil.

Box-tree. The Heb. t'ashshîr occurs in Is. 41.19,60.13; Ezk.27.6. The Talmudical and Jewish writers generally consider that the box-tree is intended. The Syr. and the Arab. version of Saadia understand a species of cedar called sherbin, distinguished by the small size of its cones and the upright growth of its branches. But the evidence for the box-tree is on a better foundation than that for the sherbin. In Ezk. 27.6, a passage of great difficulty, t'ashshîr is rendered "the Ashurites" in A.V., R.V. reads "they have made thy benches of ivory inlaid in box-wood." The box is a native of cold climates, and hardly to be expected in the Bible; and although it occurs in sub-Alpine situations in the Lebanon chalk, its mention amongst forest-trees is incongruous. However, it has always been a favourite when luxuriantly grown, and its excellent wood for engraving and carving was in use amongst the ancients. In 2Esdr.14.24 "box tables" (tablets) are mentioned; see A.V. marg., R.V. omits "box." Pliny commends it for arbours, and says the best wood for ornamental carving is found in the root. He distinguishes three sorts. [It.c.h.]

Boxez' (shimeh), noticed with Seneh (thorn; Is.14.13, 14) as two "teeth of the cliff," near Micmash and Gibeath. Josephus (2 Wars ii. 1) mentions the "valley of thorns" at Gibeath, now Wady es Suneinl (valley of

Inscribed Hittite Bowls.

Skin Bottles. (From the Museo Borbonico.)
small (thorn-trees), and here, just E. of Jeb'a and S. of Mukhmds, are two remarkable crags, N. and S. of the gorge. The northern (called el Qā'il'ah, “the castle”) shines in the midday sun, and is no doubt Bozez, on the top of which the Philistine “post” was established. The ascent on the S.W., though very steep and some 500 ft. high, is still climbable. [c.r.c.]

Bozkath', a city of Judah in the lowlands (Jos.15.39). It is mentioned once again (2K.22.1; A.V. Boscath) as the native place of the mother of king Josiah.

Bozrah (fortress).—1. A town in Edom (Gen.36.33; Is.34.6,63.1; Je.49.13,22; Am.1.12). In Mt.2.12 there is a play on the name bozrah and baqra (sheep-fold). The site is now Buseirah, N. of Tophel, in Edom.—2. A town of Moab [Bezer], the site of which is doubtful (Je.48.24), unless (1t) is intended. This town appears in the 9th cent. b.c. as Bosor, in the list of Moabite cities rebuilt by king Mesha, as noticed on the Meobite Stone.

—3. The city called Bostra in Roman times is unnoticed in the Bible, unless it be the Bosora or Bosor (Vat. MS.) conquered by Judas Maccabaeus, in the “wilderness” (rMac.5.26,28). This place became important after 105 a.d., when it was made the capital of the Roman province of Arabia Prima. The ruins of Buseirah, S.E. of Bashan on the desert trade route from Arabia to Damascus, are those of the Roman city, including a theatre, baths, a triumphal arch, colonnades, a cathedral built in 513 a.d., and a Moslem castle on the S. dating from the 13th cent. The extant inscriptions, in Gk. and Lat. (Waddington, Nos. 1906-1958), begin in 2nd cent. a.d., and go down to 539 a.d. or later. Some are Christian. They show a mixed population, partly of Arab pagans adoring Dhu-Shera’ (the lord of gleaming) down to 6th cent. a.d., and the Gk. Zeus Epikarpios, or god of produce, of a king Malchus and Nabatean coins have also been found here. Christians paid honour to the martyrs Sergius and Bacchus in the cathedral, and to the Virgin Mary. [c.r.c.]

Bracelet. Bracelets of fine twisted Venetian gold are still common in Egypt. In Gen.38.18,25 the word rendered “bracelet” means probably “a string by which a seal-ring was suspended.” Men as well as women wore bracelets. Layard says of the Assyrian kings, “The arms were encircled by armlets, and the wrists by bracelets.” [Armlet.]

Bramble. [Thorns; Bush.]

Brass. The Heb. w'hersheth is improperly translated “brass,” since the Hebrews were not acquainted with that compound of copper and zinc. In most places of O.T. copper would be correct, although, when a hard material is obviously intended, it must mean bronze, a compound of copper and tin which was known around the E. Mediterranean long before the Exodus. But sometimes a simple metal is obviously intended, as in Deut.8.9,33.25 and Job 28.2. Copper was known very early, and the invention of working it is attributed to Tubal-cain (Gen.4.22). The same Eng. word is used for money in N.T.
**BREAD**

(Ru.3.15; cf. 1.1; 2K.4.38,42; Rev.6.6).

"Spelt" (R.V.; rye, *fitcher*, A.V.) was also used both in Egypt (Ex.9.32) and Palestine (1K.19.6; Is.28.25; Ezek.4.9). Occasionally the grains above mentioned were mixed, and other ingredients, such as beans, lentiles, and millet, were added (Ezk.4.9; cf. 2Sam.17.28). The bread so produced is called "barley cakes" (Ezk.4.12), as barley cakes," A.V.), barley being the main ingredient. The baking was done in primitive times by the mistress of the house (Gen.18.6) or one of the daughters (2Sam.13.8); female servants were, however, employed in large households (1Sam.8.13). Baking as a profession was carried on by men (Ho.7.4,6). In Jerusalem the bakers congregated in one quarter of the town, as we may infer from the names "bakers' street," (Je.37.21), and "tower of the ovens" (Ne.3.11,12,38; *furnaces*, A.V.). The bread taken by persons on a journey (Gen.45.23; Jos.9.12) was usually unleavened bread. In the process of making bread the flour was first mixed with water, then kneaded with the hands (in Egypt with the feet also) in a small wooden bowl or "kneading-trough" until it became dough (Ex.12.34,39; 2Sam.13.8; Je.7.18; Ho.7.4). When the kneading was completed, leaven was generally added (leaven); but when the time for preparation was short, it was omitted, and unleavened cakes, hastily baked, were eaten, as is still the custom among the Bedouin (Gen.18.6,19.3; Ex.12.39; Judg.6.19; 1Sam.28.24). The leavened mass was allowed to stand for some time (Mt.13.33; Lu.13.21). The dough was then divided into round cakes (Judg.7.13) not unlike flat stones in appearance (Mt.7.9; cf. 4.3), about a span in diameter and a finger's breadth in thickness. The cakes were sometimes *punctured*, and hence called *hallowed* (Ex.29.2,23; Lev.2.4,8, 26,24,5; Num.15.20; 2Sam.6.19), and dipped in oil. Sometimes they were rolled out into wafers (Ex.29.2,23; Lev.2.4; Num.6.15-19), and merely coated with oil. The cakes were then taken to the oven, having been first, according to the practice in Egypt, gathered into baskets (Gen.40.16, cf. R.V.) which were placed on a tray and carried on the baker's head. In the towns, where professional bakers resided, there were no doubt fixed ovens; but more usually each household possessed a portable oven (*tannur*), consisting of a stone or metal jar about 3 ft. high, which was heated inwardly with wood (1K.17.12; Is.44.15; Je.7.18) or dried grass and flower-stalks (Mt.6.30). Other modes of baking were specially adapted to the migratory habits of the pastoral Hebrews, as of the modern Bedouin Arabs; the cakes were either spread upon heated stones, or they were thrown into the heated embers of the fire itself, or they were roasted on a fire of cakes of dried dung, which is specially suitable as it burns slowly (Ezk.4.12,15). The cakes required to be carefully turned during the process (Ho.7.8). Other methods were used for other kinds of bread; some were baked on a pan and

**EGYPTIANS KNEADING THE DOUGH WITH THEIR FEET.**

appear to have been chiefly used as sacred offerings (Lev.2.5,6,15,7,9; 1Chr.23.29). A similar cooking utensil was used by Tamar (2Sam.13.9). A different kind of bread, probably resembling the *lutireh* of the Bedouin Arabs, a pasty substance, was prepared in a saucepan (*frying-pan*, A.V.); this was also reserved for sacred offerings (Lev.2.7,7-9).
EGYPTIAN BRICKS. (Brit. Mus.)

BABYLONIAN BRICK,
Inscribed with titles of Nebuchadnezzar II. (604-561 B.C.).
explorers. Babylonian bricks were either kiln-burnt or sun-dried like the Egyptian. They are usually from 12 to 13 in. square, and 3½ in. thick, and most of them bear the name, inscribed in cuneiform character, of the king who caused the structure to be erected. They thus resemble excessively thick tiles (Ezk. 4:1). They were sometimes glazed and enamelled on one side with patterns of various colours, which, when built into a wall, produced these mural decorations for which the Babylonians and also the Persians were noted. As brick-stamps of the time of Sargon of Agadé exist, it is certain that brick-making is an exceedingly ancient art, going back perhaps to 4,000 B.C. or even earlier. The Israelites, in common with other captives, were employed by the Egyptian monarchs in making bricks and in building (Ex. 1:14, 5:7). Egyptian bricks were not generally dried in kilns, but in the sun, and even without straw as form as when first put up in the reigns of the Pharaohs whose names they bear. In the mounds of the Nile mud they required straw to prevent cracking; and crude brick walls had frequently the additional security of a layer of reeds and sticks, placed at

FOREIGN CAPTIVES EMPLOYED IN MAKING BRICKS AT TIBERIAS. (Wilkinson.)

intervals to act as binders. A brick pyramid is mentioned by Herodotus (ii. 136) as the work of king Asurban. The Hebrews practised brick-making in Egypt, and the brick-kiln was common in David's time (2Sam. 12:31). A complaint is made by Isaiah that the people built altars of brick instead of unhewn stone as the law directed (Is. 65:3; Ex. 20:25).

Bride, Bridegroom. [Marriage; Family, D. II.]

Bridge. This word occurs only in a late work (2Mac. 12:13), and even in this case either refers to a bridge from a siege tower or to a bridge of boats used against the city Caspis. The oldest known bridge in Palestine was the arched causeway from the upper city to the temple, destroyed by Pompey in 65 B.C., and rebuilt by Herod the Great. The arch stones of the latter lie on a pavement, underneath which one voussoir of the older bridge was discovered by Sir C. Warren. [G.R.C.]

Brier. [Thorns.]

Brigandine. [Arms, Defensive, (2).]

Brimstone, formerly the common name for sulphur. The Heb. word (gophrith) is con-
BUBASTIS

direct address, one beloved as a brother (Ac.6.3; 1Th.5.1; Gal.4.12,28; etc.). [h.l.]

Bubastis. [Pibeseth.]

Buckler. [Arm.]

Buckling. [Handicrafts, (3)].

Bukki. [1.] Son of Abishua and father of Uzi, fifth from Aaron in the line of the highpriests (1Ch.6.5,51). In 1Esd.8.2, Bocas, corrupted to Borough in 2Esd.1.2. Whether Bukki ever filled the office of high-priest we are not informed in Scripture. Josephus (8 Ant. 1.3) mentions him as living a private life, while the sacerdotal dignity was in the house of Ithamar.—2. Son of Jogi, prince of the tribe of Dan, one of the ten men chosen to apportion the land of Canaan between the tribes (Num.34.22).

Bukkiah. A Levite-musician in the temple, one of the sons of Heman (1Ch.25.4,13).

Bull. [Mongm.]

Bull, Bullock. [Cattle.]

Bull, Wild (Heb. tō or tō'). In Deut.14.5 the Heb. is rendered "wild ox", while in Is.51.20 we read, "They lie at the head of all the streets, as a wild bull [tō] in a net." Were it not the opinion that the wild ox, or antelope, was indicated by the word רֵמֶל [Remel], that animal might stand for tō. As it is, there is no possibility of any satisfactory identification. Tristram was, indeed, of opinion that the white or sabre-horned oryx (Oryx leucoryx, or O. algazal) is the animal denoted by tō; but, in spite of his statement that he had seen it in the desert and noted its horns in the bazaar at Damascus, the species apparently does not occur anywhere out of N. Africa. The horns seen by him doubtless belonged to the rather smaller Beatrix oryx (Oryx beatrix) of Arabia and the deserts near Baghdad. It is a white animal with brown patches on the face, brown legs, and long, cylindrical, slightly curved black horns. There is no evidence that bison or buffalo ever occurred wild in Syria. [r.l.]

Bulrush. [Reed.]

Bunah, son of Jerahmeel of the family of Judah (1Ch.2.23).

Bunni. Levite in the time of Nehemiah (Ne.9.4); possibly the same as the Bunni in 10.15.—2. Another Levite of earlier date than 1 (Ne.11.15).

Burial. Customs. The first act in reference to the departed was the closing of the eyes (Gen.46.4). It is probable that the dead were, in early times, buried in the clothes they wore when living (cf. 1Sam.28.14; Is.14.19; Ezk.32.27); recent Palestinian research confirms this. "Grave cloths" belong to a later time (Jn.11.44,20,5,7). Objects of various description were placed in tombs; such were, vessels with food which was believed to be required after death; objects which the departed had been accustomed to use when living, e.g. swords for warriors, trinkets for women, etc., the idea being that these would comfort their possessors; amulets, designed as safeguards against evil spirits, who were believed to be specially active near dead bodies (cf. these and others of these corroboration is afforded by recent excavations in Palestine. The underlying idea regarding the above was that no separation between soul and body took place until long after death. In the case of kings, and possibly also those in high estate generally, incense was burned in the presence of the body (2Ch.16.14,21.29; Je.34.5); this was perhaps a remnant of ancestor-worship. In early Israel embalming was practiced (it is an Egyptian custom that is referred to in Gen.50.2,26); in later times it was in vogue among those who could afford it (cf. Jn.19.39,40). The burning of dead bodies was reserved for especially wicked criminals (Lev.20.14; Jos.7.25), it being regarded as a terrible aggravation of the death-sentence already inflicted. Very awful, too, was the thought of being buried outside one's native country, i.e. in an "unclean" land (Am.7.17); scarcely less abhorrent was the idea of non-burial (1K.14.11,16,21.24; 2K.9.10; Je.7.33,8,3, etc.), this was on account of the belief that the spirit of an unbaptized body wandered about, a theory which entailed a twofold evil, for not only was it a cruel hardship to the departed, since he could not rest, but also it constituted a grave danger to the living, because of the harm to be apprehended from a wandering spirit who would resent such neglect. The corpse was generally buried within a day or two of death, not later than the day after; the hot climate demanded this (cf. Deut.21.23; Jn.11.39), as it still does in the East. The use of any form of coffin was unknown in early Israel (cf. 2K.13.21; see supra as regards that in Gen.50.26); the body was carried to burial on a bier (milḥ, 2K.10.2; Sam.10.13) and there the bier was laid on the ground. The East.—The Place of Burial. In pre-Exilic as well as in later times it was a matter of supreme importance that the departed should rest in the family tomb; hence the oft-recurring expressions, "going to his fathers," "gathered to his fathers, or people," "sleeping with his fathers" (Gen.15.15,47,39; 2Sam.17.23,21.14; 1K.14.3,15,8, etc.); the belief was that the spirits of the fathers were present in or about the tomb, and that the dead man joined their company if buried in the same tomb. The tomb was usually constructed in the plot of land belonging to the family (cf. Gen.23.17ff.; 1Sam.8.17). It was most likely in the courtyard of the house—at all events in early times; Naboth's refusal to part with his land (1K.21.3) was mainly due to the belief just mentioned. Recent excavations on the site of ancient Gezer have shown that in some cases people were buried in their houses; thus 1Sam.25.1 is evidently to be taken in a literal sense. This is further borne out by the fact that the kings of Judah, up to the time of Ahaz, were buried in the city of David; from the death of Manasseh onwards they were buried in the garden of Uzza, which was close to the king's palace (2K.21.18).—Structure of Tombs. Natural caves, which exist in great quantities in Palestine, were utilized for the purposes of burial; tombs hewn out of the rock were, however, also abundantly constructed. Examples of both have been discovered within quite recent years; these have proved that, besides the tombs which were used for family purposes, where the entire rock, it was also the custom to make caves for burial purposes under the surface of the ground; the still visible marks of the tools used in chiselling out the rock, or in digging
out such caves, prove that these were artifici-
ally constructed in some cases, even in the
very earliest times. There were also caves
with large stone coffins, in one case the stone
was found in situ over a burial cave constructed
underground—with the object, primarily, of
keeping out the wild animals with which
Palestine abounded in days gone by. The
O.T. gives us few, if any, details as to the
construction of these large tombs. But more
especially archaeological research, enable us
to form accurate ideas on this subject. As
far as the Hebrews were concerned, they
were entirely lacking in originality in this
respect; the term architecture cannot be ap-
plied to their sepulchres any more than to
their buildings generally; wherever signs of
architecture, in the real sense of the word,
appear, it is always due to foreign influence.
[TEMPLE] Thus in every case in which tombs
in Palestine partake of an ornate character,
it is owing to external, mostly Greek, in-
fluence; the very conception of a tomb out of
the face of the rock (as distinct from subterranean tombs) is Phoenician while the
highly ornamental facades of these—which
are those of the so-called tombs of the judges
and tombs of the kings, as well as the built
tombs in the Kidron Valley—all show the marks of
Greek influence; even the really ancient
monolith of Siloam shows distinct Egyptian
design... Generally speaking, tombs were con-
structed in the following ways: (1) They were
dug or hewn out of the ground (cf. Jn.11.38).
In these large numbers of bodies were some-
times deposited; indeed, one of the burial
caves of this kind excavated on the site of
Gezer would seem to have been a public place
of burial. (2) They were cut into the fans of
the rock (cf. Lu.23.53). These usually con-
tained 8 bodies placed in loculi, 3 on either
side and 2 opposite the entrance; sometimes,
however, a considerably larger number of
loculi are found. (3) They were built above
the ground. These are practically all of, compara-
tively speaking, late date, and they were of
an exceptional character, as they belonged
only to the rich. Cemeteries, in the more
modern sense of the term, belong to later times;
they were always, unlike older tombs, outside
the city. [TOMB.] [W.O.E.O.]

**Burning-offering.** [Sacrifice, esp. 3. ii,
v. 5; v. 6; Crimes.]

**Bush.** The Heb. word שֵׁנֶה occurs only
in passages which refer to Jehovah's appearance to
Moses "in the flame of fire in the bush" (Ex.
3.2.3,4; Deut.33.16). The Gk. word is βάρος
both in the LXX. and in N.T. (Lu.20.37; Ac.
7.55; see also Lu.6.44, where A.V. correctly
renders it "bramble bush"). Celsus (Hierob. II. 191) says that this plant is "a form of R. fruticosus, the bramble or blackberry bush,
representing the שֵׁנֶה, and traces, but without
justification, the etymology of Mt. "Saini"
"to this name. Sprengel identified the שֵׁנֶה
with what he terms the Rubus sanctus, and says
it grows abundantly near Sinai. It is quite
improbable to say what kind of thorn bush
is intended by שֵׁנֶה; but Sinai is almost beyond
the range of the genus Rubus. [Thorns.]

**Bushel.** [WEIGHTS AND MEASURES.]

**Butcher.** As among the Bedawin Arabs
and Fellähin of the present time, the slaughter-
ing of animals for food was usually (for an
exception, see Gen.28.21) done by a male
member of the household, and for sacrifices by
the offerer (Lev.1.5,11,3.2,4.29, etc.). That
all slaughtering was not connected, as has been
alleged, with sacrifice is clear from Joseph's
employing "the steward of the house in
Egypt (presumably a non-Israelite) to "slay"
in preparation for his feast to his brethren
(Gen.43.16), and from the fact that Gideon first
slew a kid and afterwards, at the command of
the angel, offered the same kid as a sacrifice
(Judg.6.19 ff.), thus involving, as Wiener points
out (Bibliotheca Sacra, Jan. 1908, p. 115),
the offering of the same sacrifice "twice" to God if
this slaying had been in itself a sacrificial act.
For other evidences of non-sacrificial slaughter
see Ex.22.1 (a stolen ox), 1Sam.25.11 (Nabal's
refusal of hospitality), 28.24 (witch of Endor).
Later Jewish custom has made all slaughtering
a sacred act, though not necessarily a sacrifi-
cing, and therefore only to be undertaken by a
particularly selected "Slaughterer" (בּוֹקֶדֶת and "Shekhtas"), a practice which may have arisen
soon after the destruction of the temple.
To fulfill what is supposed to be the legal require-
ments, the practice of Jewish butchers in the
present day is to exercise great care that the
throat of every animal killed for food is cut
out... the pharynx and jugular vessels (carotids and jugulars) must be at least
partially severed, and minute ritual directions
are laid down—e.g. the knife must be drawn
across the throat without any pause, without
any pressure save its own weight, etc., etc. In
the case of birds it is sufficient that either
wind-pipe or gullet is severed. The animal being
killed and allowed to bleed thoroughly, it is
then, provided all the ritual directions alluded
to above have been complied with, fit for sale.
But it is not yet " kosher"—i.e. "right for
food. The housewife or cook must further prepare it by soaking it for a considerable time
in water, allowing it to drain, plentifully sprink-
ling it with salt, and then washing the salt off
in more water. It is then considered to be
thoroughly cleansed from blood, and may be
cooked and eaten. See also_THIGH.

**Butler.** More correctly "cup-bearer,"
t.e. one who gives drink, as the Heb. root
implies (Gen.40.1; see 1 Ki.1.10). The But-
er (Heb. בּוֹקֶדֶת) is "curdled" milk:
Gen.18.8; Deut.32.14; Judg.5.25; Job
20.17). In one instance a curd cheese seems to
be intended (Pr.30.33). It is twice noticed with
honey (2Sam.17.29; Is.7.15,22). The drink
offered by Jael (Judg.5.25) was no doubt, as
Josephus supposes (Anti. v. 4), the sour crum-
lled milk, now called leben, which is offered
to guests by nomad Arabs. It has a remarkably
soporific effect, especially upon a tired man.
It was presented in a "bowl of princes," or
perhaps more probably, a "shepherd's bowl."
Butter (צִבְדֵה) of a very soft kind is
made in springtime by the Arabs: the women
churn it in goatskin bags, swelled from the
heat; but this is not very generally used. [C.R.C.]

**Buz.**—1. The second son of Nahor and
Milcah, and nephew of Abraham (Gen.22.21).
—2. A name occurring in the genealogies of
the tribe of Gad (1Chr.5.14).
Buz'ı, father of Ezekiel (Ezk.1.3).

Buzite. Barachel, the father of Elihu, is called the Buzite of the kindred of Ram—i.e. Aram (Jb32.26)—and was therefore probably a descendant of Buz, whose family seems to have settled in Arabia Petraea (Je.25.23). An alternative suggestion, rejecting the emendation of Aram for Ram, is that Barachel was a descendant of Ram (Ru.4.19) and only a deeliter with the Buzites.

Byssus. [LINEN.]

C

Cab. [WEIGHTS AND MEASURES.]

Cabbon, a town in the low country of Judah (Jos.15.40).

Cabal, a place named as one of the landmarks on the boundary of Asher (Jos.19.27, where we should read "goeth out N. of Cabul," which lay in Zebulun). It was included among 23 cities of Galilee (1K.9.14-14) given by Solomon to Hiram of Tyre. Now Kā'būl, a village 9 miles E. of Accho, which latter was a Phoenician city. [C.R.C.]

Caddis. [Joannan.]

Cades (1Mac.11.63.73). [Kedesheh]

Cades-bar'ne (1Jb.5.14). [Kadesh-barnea.]

Cad'miel (1Esd.5.26.58) = Kadmiel.

Caesar, always in N.T. the Roman emperor reigning at the time. It was the family name of C. Julius Caesar, and when his dynasty became extinct, was assumed by successive emperors as a title for themselves, and afterwards for their heirs. Caesar in Mk.12.14 and Jn.19.12 is Tiberius; in Ac.25.17.21 and Ph.4.22 N.T. [Augustus]. [E.R.B.]

Caesarea, the seaport city (now Qätâsirṛ̣) built by Herod the Great (19 B.C.) on the site of the old "Strato's Tower," where Philip the deacon settled and made converts (Ac.8.40.21.8.16). Hence St. Paul embarked for Tarsus (9.30), and hence Cornelius the centurion sent for St. Peter at Joppa (10.1-24.11.11). It was the seat of government under Herodians and procurators (12.19.25.14.6.13), and the centre of an early church (18.22). It was more than a day's journey from Jerusalem (23.23.33). Herod named it after Augustus Caesar, to whom he erected a temple with statues of Rome and of Caesar. He made an artificial harbour, with a market, a theatre, and on the S. an amphitheatre; these works occupied 10 or 12 years till 9 B.C. (15 Ant. ix. 6; 16 Ant. v. 1). The chief tower on the walls was called after Drusus, Caesar's son-in-law (1 Wars xxii. 5-8). This city, which remained a fortress till Bilibus destroyed it (1265 A.D.), is now a ruin, with a few cottages of Bosnian exiles. The walls of the Roman town included a space 1,600 yds. N. and S. by 900 E. and W. (300 acres). The harbour is much smaller than Josephus supposed, measuring 180 yds. N. and S. across the entrance, the S. reef and mole being 160 yds. long. The remains include a theatre (covered with earth and sand) on the S.; two zones of a temple, over which a 12th cent. cathedral was built, the walls of which remain; a hippodrome on E. (1,056 by 264 ft.), with remains of a large granite goal-post; and 2 aqueducts, the low level from the Crocodile River 3 miles N., and the high level from springs 6 miles N. The mediaeval walls were built under the orders of Emperor Constantine. [Surv. W. P. JI. pp. 13-29]. [C.R.C.]

Caesar'a Philip'pi, the city whence our Lord ascended a "high mountain" (Mt.16.13.17.1; Mk.8.27.8.2), which was no doubt Hermon. This city, originally Paneas, and called Caesarea by Herod Philip (Josephus, 18.11.12), was the "fourth city" of the "four towns of Jordan." Herod the Great had already built a temple of white stone, called Panion, near the cave where the river springs (15 Ant. x. 3); the name Paneas applied to the district also (2 Wars ix. 1). The city lay on the E. border of the Holy Land (Tal. Jer. Schebiti vi. 1). The cave has now partly fallen in, and the great well-dug by the Herodians, rushes out from under a cliff, and dashes between poplars and bushes to the village of Bântâs hard by—a place with mediaeval walls, but now only holding 350 Moslem inhabitants. The great fortress on the hill to E. was built about 1250 A.D. At the source of the Jordan the cliff is covered with three niches for small statues, one inscribed to "Pan and the nymphs," in Gk.; another to the "goddess"; a third Gk. text in honour of the emperors was carved by Valerius Titianus, "priest of the god Pan"; and a fourth by Agrippa, son of Marcus, "archon" in the year 100 (Waddington, Nos. 1919-1994). [C.R.C.]

Caesar's household (Ph.4.22, oî ëx têis Kaireôs oixias, qui de Caesaris domo sunt). Members of Caesar's household send salutations to the church at Philippi. It has been supposed that these must have been persons of high importance, or even members of the royal family. At the end of the 1st century, Flavius Clemens and his wife Domitilla, cousin of the emperor Domitian, were charged with "atheism," by which was meant Christianity. But the members of Caesar's household referred to in Philippians were probably slaves or freedmen. The domus or familia Caesaris included a very large number of persons. Flavius Justinus gives a list of the various offices in the imperial household. There are extant great many inscriptions from the columna where members of Caesar's household were buried. Many are of the reign of Nero, and several of the names
are identical with Christians to whom St. Paul sends salutations in Ro.16, e.g. household of Narcissus, Tryphena, Tryphosa, Philologus, Julia, etc. It has also been supposed that the words, "My bonds in Christ are manifest in all the palace" (Ph.1.13, A.V.), mean that converts were made in the imperial household. But the words τοις παρατροπηκαὶ refer probably to the Praetorian Guard (see R.V.), and not to the camp built by Titus outside the city walls or the barracks on the Palatine. The converts would then be soldiers to whom St. Paul had been chained, or their companions. Cf. Lightfoot, Phil. pp. 99-104, 171-178. [G.M.V.]

Cage. In Je.5:27 more properly a τrap in which decoy birds were placed (cf. Ecclus.11.30, καταρχήν). [HUNTING.] In Rev.18:2 φιλανθός means rather a prisoner.

Caïphas, surname of Joseph, high-priest from 18 to 36 A.D., son-in-law of Annas. Under the lead of Caïphas the Sadducees advanced to the position thenceforth held by them as the bitterest enemies of Jesus, and afterwards of the Church (Ac.4:1, 5.17). The counsel of Caïphas that Jesus "would die for the people" is noticed by St. John (11.50) as an unconscious prophecy. Caïphas is referred to in the Lord's words to Pilate, "He that delivered Me unto thee hath the greater sin" (Jn.19.11). [E.R.B.]

Cain. The eldest son of Adam and Eve followed the business of agriculture (Gen.4:2). In a fit of jealousy, roused by the rejection of his own sacrifice and the acceptance of Abel's, he murdered his brother, for which he was expelled from "the presence of the Lord" (Gen.4:16; cf. Heb.11.4; 1 Jn.3.12; Jn.11). He settled in the land of Nod, and built a city which he named after his son Enoch. According to rabbinic tradition, he was killed accidentally by Lamech. The following points deserve notice in the fragmentary Biblical narrative:

1. (The position of the land of Nod, which it seems vain to attempt to identify with any special locality.)
2. (The "mark set upon Cain" probably means that Jehovah gave a sign to Cain, very much as signs were afterwards given to Gibeonites (Gen.9.13)
3. (The most important city of the Cainites is prominent in the history: Cain founded the first city; Lamech instituted polygamy; Jabal introduced the nomadic life; Jabal invented musical instruments; Tubal-cain was the first smith; Lamech's language takes the stately tone of poetry; and even the names of the women, Naamah (pleasant), Zillah (shadow), Adah (ornamental), seem to bespeak an advanced state of civilization. But along with this there was violence and godlessness: Cain and Lamech furnish proof of the former, while Gen.4.26 implies the latter. Ryle, Early Chapters of Genesis.)

Cain (R.V. Kain; Heb.כֶּנֶּן; Jos.18.57), a town of Judah in the Hebron mountains. Now Yiqrin, a ruin 3 miles S.E. of Hebron. [C.R.C.]

Cainan.—1. Son of Enos and father of Mahalaleel (Gen.5.9-14; Lu.3.37,38). The rabbinical tradition that he first introduced idol-worship and astrology was by the Hellenists transferred to the post-diluvian Cainan. —2. Son of Arphaxad and father of Methuselah (Lu.3.35,36) is found in the LXX. in the genealogy of Shem (Gen.10.24, 11.12, and 1 Chr.1.18), but not in the Heb. nor in any version made from the Heb. It seems certain that his name was introduced into the genealogies of the Gk. O.T. to bring him into harmony with the Hebrew version (Gen.5.9-14). Probably Cainan was found in the time of Jerome. Probably Cainan was not inserted by St. Luke himself, but added afterwards, either by accident, or to make the number of generations 17, or for some other cause not now known.

Cakes. [Bread.]

Calah', one of the four ancient cities of Assyria, whose foundation is ascribed to Asshur (Gen.10.11) or to Nimrod (R.V.). Its ruins were discovered by Layard beneath the mounds of Nimrud between 1845 and 1850, and lie about 20 miles S. of Koyunjik (Nineveh), on a tongue of land formed by the Tigris (W.) and the Greater Zab (E.). Shalmaneser (c. 859 B.C.) is said by Assûr-naṣir-apli to have been the founder of the city, but this may be simply in the sense that Sargon of Assyria founded Dur-sarru-ukin—i.e. by choosing as his residence a site already existing. Assûr-naṣir-apli (885 B.C.) raised at Calah the extensive and magnificent N.W. palace, of which the inscriptions to fine bas-reliefs representing the king engaged in religious ceremonies, whilst smaller reliefs depicted him in battle and chasing the lion and the wild bull. These are now in the British Museum. The doorways of this building were decorated with finely carved winged bull-headed lions and bulls. Shalmaneser II., his son (859 B.C.), built the central palace, where the celebrated Black Obelisk was found. This was also the palace of the Biblical Tidlath-pileser (III.), who has left some very fine sculptures with valuable historical inscriptions. Sargon (722 B.C.) restored the N.W. palace; and Esar-haddon, his grandson (672 B.C.), built the S.W. palace with materials taken from the central palace, Tidlath-pileser's slabs being sometimes planed off to receive new reliefs. The temple-tower of Calah is exceedingly interesting, as it has in the basement a long vault, which suggests that it was originally a tomb. One of the tombs on the site was dedicated to Nebo, and the other to Ninip or Nirog. There was also a shrine to Istar. Assûr-ēṭil-ilani, son of Assûr-bani-apli, was the last king to reside at Calah. The city itself was defended by extensive walls, those to the S. showing traces of more than 50 towers. It is thought that Calah formed one of the suburbs which was probably taken by Nebuchadnezzar. Nineveh, the enormous size of which is referred to in the book of Jonah, and also by Diodorus Siculus and others. [Nineveh.] Sayce (Higher Crit. and Mon. p. 170) points out that the statement (Gen.10.12) that Calah is "a great city" must have been written before the overthrow
CALAMOLALUS

of Assyria, and is therefore an evidence of the early date of this chapter.

[Text]

Calamolalus (1 Esd. 5:22), a corrupt place-name, apparently agglomerated of Lod and Hadid (cf. Ezr. 2:33).

Calamus. [Reded.]

Calmol,' a man of Judah, son or descendant of Zerah (1 Chr. 2:6). Possibly = Chalcol (1 K. 4:31).

Caldron (1 Sam. 2:14; 2 Chr. 35.13; Job 41:20; Mi. 3:3). [Pan; Reded.]

Caleb, son of Jephunneh (Num. 13:6), called son (i.e. descendant) of Kenaz (Jos. 15:17; Judg. 3:5), and "son of Jephunneh the Kenazite" (Jos. 14:5-9), and Caleb (1 K. 4:31, first mentioned in Num. 13 as representing Judah among the twelve spies sent by Moses from Kadesh-barnea. He brought back from Hebron and Eschol a good account, and tried to calm the people who had been frightened by the other spies (ver. 30). Later, with Joshua, he tried to persuade them to advance, but was denounced with stoning (14:6-15). When the adult Israelites were condemned to die in the wilderness, Caleb was excepted (14:4, 32:12); and the promise that he should possess the land his feet had trodden was made (Deut. 1:26). When 85, but still strong for war, he reminded Joshua of this (Jos. 15:17-19), took Kirjath-arba (Hebron) from the Anakim, and it became the possession of his family. Afterwards he marched S., and offered his daughter Achsah to any one who would take Kirjath-sepher. Othniel took it.

The last reference to Caleb concerns the dowry given to his daughter (Judg. 1:9-15). As regards the tribe, the Jebusites inhabited it in E. and D. Caleb alone is faithful, while P associates Joshua with him. As the phrase "and thee" (Jos. 14:6) contradicts this, it is put down as a harmonistic gloss. There are reasons for thinking that Caleb was not a Judaean by birth, for the Kenizzites were an Edomite tribe (Gen. 36:42, cf. 15:16); but there is little to justify Moore's guess that Caleb's was a separate invasion from the S. The Calebites, like the Jerahmeelites, are treated as distinct from Judah proper (1 Sam. 30:14,29); and both Jerahmeel and Caleb are in 1 Chr. 2 the sons of Hezon and great-grandsons of Judah. The passages, however, are suggestive of the word's antiquity, and probably concerned with the clan, its position in the tribe, and its geographical distribution. The confusion of clans and their subdivisions with persons who from their prominence bore the clan name is only natural. Robertson Smith (Kinship and Marriage, p. 233, new ed.) describes the Calebites as a dog tribe, with the dog as their totem. Hence they may have derived their name, but that is no reason for believing that the Caleb of history was concerned with totems. Sayce (Early Hist. of Heb. p. 265) says that cuneiform inscriptions show Caleb to be an individual name, that the Amarna tablets have Kalbu (dog) in the sense of officer or messenger, and he suggests that Caleb may have been a messenger of Pharaoh before becoming a Hebrew spy. Col. Conder, however, maintains that Kalbu is only used in the Amarna tablets as a term of abject hostility, so that, as the larger hand, it occurs in cuneiform texts as meaning a "priest," and he suggests that this and not "dog" may be the meaning of Caleb. Caleb's tribe was afterwards of importance in the negheb. Nahal was of the house of Caleb (1 Sam. 25:3).

Caleb ben Pehratah (1 Chr. 2:24). The text is corrupt. The LXX reads καὶ ἡπριατὰ καὶ Χαμαλ (= Caleb's) ἐς Ερωπαϊ. This has been further amended, and the verse may mean, "And after Hezron's death Caleb went in unto Ephrath, the wife of his father Hezron [cf. ver. 19], and she bare him Ash-hur, the founder of Tekoa." C. J. Ball, Chronicles. Cf. " Genealogy," Histories, D. B. (5 vols. 1904), and Wordsworth in loc.

Calf. In Ex. 32:4 it is stated that Aaron, constrained by the people in the absence of Moses, made a molten calf of the gold earring of the people, to represent the Elohim which brought Israel out of Egypt. It does not seem likely that earrings would have provided a tremendous amount of gold required for a solid figure. Most representations of the calf were in figure plated with gold—a type of image known to have existed in Egypt. "A gilded ox covered with a pall" was an emblem of Osiris (Wilkinson, iv. 335). To punish the apostasy Moses burnt the calf, and then grinding it to powder scattered it over the water, where, according to some, it produced in the drinkers effects similar to the water of jealousy (Num. 5). The process used is difficult of explanation. Bochart and Rosenmüller considering that Moses merely cut, ground, and filed the gold to powder. It seems probable that the image of the calf (or, better, "steer") of gold would, were it produced in the drinkers effects similar to the water of jealousy (Num. 5). The process used is difficult of explanation. Bochart and Rosenmüller considering that Moses merely cut, ground, and filed the gold to powder. It seems probable that the image of the calf (or, better, "steer") of gold would, were it produced in the drinkers effects similar to the water of jealousy (Num. 5). The "calves" set up by Jeroboam at Dan and Bethel, on the other hand, were probably of Canaanitish origin (1 K. 12:28,29). Hosea is full of denunciations against the calf-worship of Israel (Ho. 8:5,6,10,13), and mentions the curious custom of kissing them (13:2). The expression "the calves of our lips" (14:2) might be the prophet's application, in a higher and spiritual sense, of a thought suggested by 13:2; but the more usual explanation is that the word "calves" is used metaphorically for victims or sacrifices, and that the phrase signifies "the offering" (cf. ver. 40). But "this tribute of thanksgiving and praise," or else "the sacrifices which our lips have vouched." [Cattle.]

Cailitas. [Keilita, i and 2.]

Callithenes, a partisan of Nicander, burnt by the Jews for setting fire to the "holy gates" (Mac. 8:10,5). The dog tribe, with the dog as their totem.

Caleneh appears in Gen. 10:10 among the cities of Nimrod. Probably the site is the modern Niffer, which was certainly one of the early capitals, and which, under the name of Nopher, the Talmud identifies with Caleneh. It had a renowned temple-tower dedicated to the older Bel, and its ruins, as excavated by the American explorers, show exceedingly interesting remains of various dates. A number of tablets have also been found, the later ones showing that a large Jewish colony lived there. See Clay's Light on the O.T. from Babylonia and Judah (1907).

Caleneh (Am. 6:2) or Calno (Is. 10:9),
PLATE VII

THE SO-CALLED "GARDEN TOMB," IN THE TEMPLARS' HOSPICE, JERUSALEM.

VIEW, LOOKING W., OF A GRECO-JEWISH TOMB W. OF THE SUPPOSED SITE OF CALVARY.
(From an original sketch by Col. Conder in 1881.)
probably the Kulnia of the Assyrian inscriptions. Fried. Delitzsch suggests that it may be Kullanhu, about 6 m. from Arpad. [T.G.P.]

**Caliph**

(Al. V., M.k.15.22; iSam.30.17) [C.R.C.]

not Job David 123 the Mt.27.33; Mk.15.22; Jn.19.17.

The exact situation is not stated in the gospels, and neither Calvary to the tomb beside it are mentioned elsewhere in the Bible. It was probably the ordinary place of execution, and as such well known. Crucifixion was not exclusively a Roman punishment; it was a custom of Greeks, Carthaginians, and even Jews (Josephus, 13 Ant. xiv. 2), and Pilate "gave up" Jesus to the Jews (Lk.23.25; Jn.19.16), though providing a guard. From Mt.28.11 we learn that the "new sepulchre" was outside Jerusalem; and Christ "suffered without the gate" (Heb.13.12). From Lk. 23.49 we gather that Golgotha was a place "afar off," and therefore probably on high ground. From St. John we know that it was "beyond the city," (i.e., Gerasa, recognized outside the gospels, but in Rom.15.9; "from the gate of the city," it has a cliff on the S. side, and is visible from a distance all round. Here also, in the 5th cent., the site of the stoning of Stephen was fixed. The Templars built a hospice immediately to the S. after 1187 A.D.; and in the W. end of the cliff a tomb, marked with two Latin patriarchal crosses in red paint, was found in 1873 filled to the roof with human bones. On W. of the main N. road (cf. Mt.27.39; Mk.15.29), close to this knoll, a Jewish tomb, with an outer chamber with a single grave, was also found in 1850. This knoll (el Heidheniyeh, "the cutting"), now covered with Moslem graves, is generally regarded as the true site of Calvary by the religious last words at the traditional site. It was certainly outside Jerusalem, but nigh to the city, in the time of our Lord (see Surv. W. Pal., Jerusalem vol., pp. 380-386, 429-435).

**Camel.** Under this head may be considered the Heb. words gāmal, bēkher, or bikhē’d (Late Hebrew), or tydrēth (Pers. ester, "mule") erroneously translated "camels" by A.V. in Esth.3.10. (1) gāmal is the common Heb. term for camel, irrespective of age, sex, or breed. It is clear from Gen.12.16 that camels were early known to the Egyptians. The Ethiopians had "camels in abundance" (2Chr.14.15); the queen of Sheba came to Jerusalem with camels (1K.10.2); the men of Kedar and of Hazor possessed camels (Je.49.29,32); David took away the camels from the Geshurites and the Amalekites (1Sam.27.9,30.17); forty camels' burden of good things was sent to Elisha by Benhadad king of Syria from Damascus (2K.8.9); the Ishmaelites used camel-transport (Gen.37.25); the Midianites and the Amalekites possessed camels "as the sand by the sea-side for multitude" (Judg.7.12); Job had 3,000 camels before his affliction (Job 1.3) and 6,000 afterwards (42.12). Camels were used for riding (Gen.24.64; 1Sam.30.17); as beasts...
of burden (Gen.37:25; 1K.10.2; 2K.8.9, etc.); and for draught purposes (Is.21:7); while from Isa.30:17 we learn that they were used in war. John the Baptist wore a garment made of camel's hair (Mt.3:4; Mk.1:6), and some have supposed that Elijah "was clad in a dress of the same stuff." Camel's flesh, although esteemed by the Arabs, was forbidden to the Israelites (Lev.11:4; Deut.14.7), because, though the camel be "chewed the cud, it divideth not the hoof." (2) bēkher and bikhrā, the masculine and feminine forms of the same word, occur only in Is.60.6 and Je.2.23, where A.V. reads "dromedary," and there is little doubt that this is correct. (3) As to kirkārōth of Is.66.20 (A.V. swift beasts) there is no real evidence of opinion. The explanation that dromedaries are meant is unsatisfactory and it more probably indicates the "panniers" or "baskets" carried on the backs of camels or mules. The camel in use among the Jews and the heathen nations of Palestine was the Arabian or one-humped species, "dromedary." The dromedary, which is swifter than the baggage-camel, and used chiefly for riding purposes, is merely a finer breed than the other, called by the Arabs Hajin. The camel is the subject amongst Orientals of many proverbial expressions; see many cited by Bochart (Hieroz. i. 30), and cf. Mt.19.24 and 22.24, where, in Tristram's opinion, A.V. is correct, notwithstanding attempts made to explain away the expression. The very magnitude of the hyperbole, observes the same writer, is evidence in its favour: in the Talmuds, "an elephant passing through a needle's eye" is a common figure to denote anything impossible. The only other species in the one-humped Bactrian, Camelus bactrianus, which was employed in the domesticated state by the Assyrians, as it now is in N. Persia and Central Asia generally. It occurs wild in Mongolia, the one-humped species being unknown in the wild state. Camels, although allied to the true ruminants (Bovidae) separate from them the Tylopoda, so named from their cushion-like feet. [B.L.T.]

**Camon**, the place in which Jair the judge was buried (Judg.10.5). Josephus says that it was a city of Gilead. In modern times, however, the name has not been recovered on the E. of Jordan.

**Camp.** [Encampment.]

**Camphire.** This is undoubtedly an incorrect rendering of the Heb. kōphēr, which occurs in the sense of some aromatic substance in Can.1.14.4.13 only. The margin in both passages has "cypress," giving the form but not the signification of the Gk. word. Camphor is the product of a tree largely cultivated in the island of Formosa, the Camphora officinarum, of the natural order Lauraceae. It has the express repute of an antaphrodisiac; so that its unsuitability is quite pronounced. For the expression "cluster of kōphēr" in the vineyards of Engedi," in Can.1.14, the Chaldee reads "bunches of grapes." [Palest. and Asia.] Several versions retain the Heb. word. The substance really denoted is the Lawsonia alba of botanists, the henna of Arabian naturalists. The Nubians call henna khotreh = Arab. kafār. Hasselquist (Trav. 246, Lond. 1766) says, "the leaves are pulverized and made into a paste with water; the Egyptians boil this paste on the nails of their hands and feet, and keep it on all night: this gives them a deep yellow, which is greatly admired by Eastern nations. The colour lasts for three or four weeks before there is occasion to renew it. The custom is so ancient in Egypt that I have seen the nails of the mummies dyed in this manner." Somnini (Voyage, i. p. 297) says the women are fond of decorating themselves with the flowers of the henna-plant; that they take them in their hand and perfume their bosoms with them. (Cf. Can.1.13.) The Lawsonia alba when young is without thorns, and when older is spinous, whence Linnaeus's names, L. inermis and L. spinosa; he regarding his specimens as distinct species. The henna-plant grows in Egypt, Syria, Arabia, and N. India. The flowers are red and very fragrant, and grow in clusters. The shrub is from 4 to 6 ft. high. The Lawsonia alba, the only known species, belongs to the natural order Lauraceae. R.V. reads henna in both passages. Harris points out that the expression "pare her nails," in Deut.21.12, may rather mean adorn or prepare her nails, the proper signification of the Heb. words. This may imply the antiquity of the practice described by Hasselquist, and earlier by Dioscorides. The correct interpretation of kōphēr (rendered "cypress tree" in Wyclif) was of an early date. K. Ben Melek, in his note on Canticles, expressly says, "Butrus copher id ipsum est quod Arabes vocant Al-hinna." It is noteworthy that the earliest sense of pare (not obsolete in 1611) was to adorn, or deck out; get ready, prepare (New Eng. Dict.); so it is not impossible that A.V. left the sense open. Wyclif reads "kytt about the nails." [Paint.] **Canal of Galilee** (Jn.2:1), the site of the miracle (2.11), and the home of Nathaniel (21.2: see 4.16). The position is not mentioned; nor does Josephus (Life 16 and 71; 1 Wars xvii. 5) assist us, except that it appears to have been on the high-road from Bethsaida (Julias) to the W. The site is not
CANDLESICK

defined in the Onomasticon, but rather later was shown at Keft Kenna on the road to Tiberias, 3 hr. N. of Nazareth. The Arabic name does not properly represent the Heb. Kanah. In the 12th cent. the site shown was the ruin Qânûdî, 8 miles N. of Nazareth; but though the name is exact it is not on the direct route to Tiberias. There is also a spring called Ain Qânûdî, about a mile N. by W. by the route taken in prov. Reineh, and this site, both as to position and as to the spelling of the name, would be suitable. [G.R.C.]

Canaan, Canaanites. Canaan was the youngest son of Ham (Gen.10.6,15ff.) and the "father" of Zidon, Heth (the Hittites), etc. Noah's curse for the sin of Ham is directed against Canaan (Gen.9.18-27), who is to be a "servant of servants" to Shem and Japheth. The name is widely used; it occurs under the form Ki-na'-â-na in the Amarna tablets of 15th cent. B.C., where the "kings of Canaan" (cf. Judg.4.2,5,19: Ps.135.11) are noticed (Brit. Mus.757, 58), and quite often in the later Bible. The Canaanites generally are revolting from Egypt (Berlin 8, 92: Brit. Mus. 2, 24, 30). The name "mother of the Canaan" also appears on Phoenician coins of the Syrian Laodicea (Laàtagia) in the later Gk. age. The Phoenician form found in Eusebius, Hecataeus, and Stephen of Byzantium was Xwâ. Augustine says that country-folk in the province of Africa in the 5th cent. A.D. were asked who they were, they replied "Canaanites"—i.e. lowlanders (Exp. Ep. Rom. 13). The Heb. word is from a root meaning "to be low," and is properly applied to the inhabitants of the plains, i.e. the Canaanites dwelling in the lowlands of Phoenicia and Philistia (Gen.2.5) and in the Jordan Valley (Gen.10.18,19). But the term is used in the Bible in several senses: (a) Applied, as distinguished from the Israelites, to all inhabitants of the land (Gen.12.6; Jos.11.3; Ps.105.11), even including the Hebron mountains (Gen.23.2, etc.), Canaan answering to the old Akkadian name Mar-Tu (the country). We are often presented with the country, and the Canaanites are distinguished from the Amorite inhabitants of the mountains (Num.13.29). (d) Applied to the inhabitants of Phoenicia proper. As the Phoenicians were, above all, traders, and the great trade routes were in the plains, "Canaanite" came naturally to mean a "merchant," and is so translated in Job 51.6: Pr.31.24: Is.25.3,11: Ho.12.7 (cf. R.V. marg.); and probably should be in Zech.14.21 (see R.V. marg.). In N.T. the word is used for Phoenician, so γυνή Χαναναία (Mt.15.22) is the equivalent of γυνή Ελληνις, Συροφωνικαία τῷ γένει (Mk.7.26). For "language of Canaan" (Is.19.18), see SEMITIC LANGUAGES. [F.J.F.-I.]

Canaanite, properly Canaanæan (R.V.), a name of the turbulent Jewish sect (cf. Josephus, 18 Ant. 1. 1: 4 de Bell. Jud. iii. 9, etc.) headed or revived by Judas of Gamala in protest against the Quirinian census [TAXING: CYRENIUS], and conspicuous for its excesses during the final siege of Jerusalem. The T.R. had Καναωνίων, which A.V. wrongly renders "Canaanite," i.e. descendant of Canaan; nor does it mean an inhabitant of Canaan, which would be "Canite." Καναών, as used in Mt.10.4 = Mk.3.18, is the additional name of the apostle Simon, to distinguish him from St. Peter, and represents γανάναια, signifying "jealous" (cf. Ex.20.5; Deut.4.24, where "ζηλοντις," "jealous God," is rendered in LXX. Θεος ἰλαρός). In a general sense it would signify zeal for God, or a distrust of the kingship of Jehovah; in a particular sense it was applied to the sect which so violently resisted the Roman rule as derogatory to that kingship. St. Luke gives Zeolotes (the Zealot) as its equivalent (Lu.6.15; Ac.1.13). This need not necessarily imply Simon's actual membership of the sect. Possibly the name merely suited his character. [E.H.P.]

Canda'oe (Ac.8.27), a queen of Ethiopia (now the Egyptian Soudan). The name was not that of an individual, but of a dynasty of Ethiopian queens. Their capital was Napata, in the district now known as Bakariwua (Murray's Guide to Egypt). [E.R.B.]

Candlestick (Heb. נְמוֹרָת, lampstand, always referring to the "holy candlestick" (Ex.26.31), except in 2 K.4.10. (1) In the tabernacle. Made by Bezaleel (Ex.31.2,37.17), after the pattern shown Moses in the mount (25.40). Directions for making (25.30-40, cf. 37.17-24) of pure gold, hence called the "pure candlestick" (31.3,38), but not cast by fusion but wrought by hammer (Ex.25.31); a talent of gold was used for the candlestick and its utensils (25.30). It consisted of a pedestal; a shaft, from which sprang three branches on each side; and seven lamps, one on each of the branches and one on the shaft. [LAMP.] The branches probably curved upwards to the height of the shaft, so that the lamps were on a level. Three kinds of ornament are mentioned, cup, knob, and flower (Ex.25.31), but their form is uncertain. If the candlestick was intended to represent an almond-tree (for symbolism, see Je.1.11,12), the ornament of the branches resembled a bulb, opening bud, and blossom. There were four cups on the shaft and three on each of the branches, with their knobs and flowers. The candlestick was 6 ft. high (Men. 288); the spread of the branches and of the base was 3 ft. (Shilte ha-Gibborim xxiii.). It stood in Solomon's holy place, on the S. side, opposite the table of shewbread (Ex.26.38). When the tabernacle was moved, the candlestick with its lamps, tongs, snuff-dishes [CENSER], and oil vessels was covered with a blue cloth, and over this a covering of sealskin, and then slung on a pole for carrying (Num.4.9,10). (2) In Solomon's temple there were ten golden candlesticks, five on the N. and five on the S. side, and were made of gold (Ex.26.35). (3) In the Herodian temple the candlesticks were made of marble, and were taken to Rome after the fall of Jerusalem. The representation on the arch of
Titus can scarcely be correct in all details; e.g., the figures on the base are improbable (cf. Josephus, 7 Wars v. 5). Reland, *De Spoliis Templi Hierosolymitani*. [H.H.]

**Cane.** [Reed.]

Canker, properly any sort of spreading tumour or growth is referred to in 2 Tim. 2. 17, not necessarily in that particular form which we call cancer. R.V. gives "gangrene." [F.J.]

**Cankerworm.** [Locust; Palmer-worm.]

Canneh' (Ezek. 27. 23), a contraction of Can-neh (Cahnos), which is the reading of one MS., or else the Kannu' of certain Assyrian contract-tablets, in which case it was probably in N. Syria.

**Canon of O.T. 1. Definition.** By "Canon," we understand the collection of the holy writings recognized by the Christian Church, writings given by God, and therefore the Church's rule of faith and life. The word, which is borrowed from the Semitic language (Heb. qanah, "a reed"), signifies anything straight (e.g. an horizon, a staff, a reed), and therefore that inflexibility is the prevailing idea. From this original meaning is easily derived the metaphor of a standard, measure, hence a regulative precept or directive principle in the philosophic, grammatical, ethical, or ecclesiastical senses, e.g. as applied to the baptismal creed, or to the decisions of synods. Hence, likewise, our idea of a canon of Scripture must be in accord with the foregoing significations, despite the fact that Zahn, an acknowledged authority on the canon, has revived the old opinion of Semler, viz., that it meant merely a "list" or "catalogue," an opinion which had long become obsolete, though a tendency to put it forward in the interests of Rationalism had at times existed. The use of the word "canon" and its derivatives in this connexion dates back to c. 350 A.D. We find it (367 A.D.) in the preamble to the festal epistle of Athanasius (lix.), in a canon of Laodicea, and in Amphilochius. The Latins adopted the word, but call the canon "canonica," and therefore the inflexibility which it implies. The word has been assigned to it. —II. The Formation of the O.T. Canon. The treatment of this subject is much more difficult and much more important than it was formerly, when more certainty and more agreement prevailed as to the composition of the several books. Our estimate of the beginning and close of the canon unquestionably depends largely on our attitude towards each separate problem of scientific introduction: as is shown by, e.g., the hypothesis of Wellhausen, the critical handling of the Psalms, or the late dating of parts of the prophets. But assuredly scientific introduction is not the only factor in our decision as to the canon. If it is possible by other arguments to show its close at a time before that at which criticism postulates the origin of many parts of it, it will become necessary to revise and modify the supposed results of scientific introduction, the methods of which are often in a high degree arbitrary and despotic. Hence it is necessary to note the limits within which scientific introduction rightly has free play, but which it must not over-pass. We will begin from the conclusion of the canon and trace it back. A. The Close of the Canon. Josephus (Contra Apion, 1.7, 8) gives us a clear account of the credibility of the Heb. historical writing in contrast with the Gk. Its composition was not due to the personal predictions of any individual writer, but to the instrumentality of inspired prophets. "We have not," he continues, "an innumerable multitude of books among us, disagreeing from each other and contradicting one another, but only 22 books which contain the records of all the past times, which are justly believed to be divine" (whether or not "divine" is a possible addition of Eusebius is immaterial). He further specifies that the historic records which were valued as having prophetic authority ended with the reign of Artaxerxes, and continues: "How firmly we have given credit to those books of our own nation is evident from what we do; for during so many ages as have already passed, no one has been so bold as either to add anything to them, to take anything from them, or to make any change in them; but it becomes natural to all Jews, impressed with the prevailing regard, to regard those books to contain divine doctrines, and to persist in them, and, if occasion be, willingly to die for them." Although this account dates from c. 100 A.D., and although we may be unable to accept every detail of his account indiscriminately, yet this testimony of Josephus has undoubted importance, since he has no mere private opinion, but expresses the general judgment of his times—that since the time of Artaxerxes nothing had been added to the canon, because the prophetic succession was wanting, without which no one would have ventured to admit new books to the canon. Passing over Philo, whose only relevant writing (De Vita Contemplativa, § 3) is held to be spurious, and the N.T., where in Lu. 24. 44 we find the well-known threefold division, and where in Mt. 23. 35 (Abel to Zacharias—i.e. from the first murder to the last in the last book of the Heb. canon; see 2 Chr. 24. 20 ff. and Zachariah, 1) the present order (the O.T. and Chronicles at the end) of the Heb. canon is implied, we come to the prologue of Jesus the grandson of Sirach, which was composed 132 B.C., where the threefold division and the close of the canon as early as the time of Sirach himself is implied (Prol. to Eccles.; threefold division). This witness is at least to 180 B.C., if the author of the book was the grandfather of the writer of the prologue. But if it were Simon I., "the Righteous," and not Simon II., who was contemporary with Sirach, then we must not translate παρθένος "grandfather," but "ancestor," and the date of the composition of the book would be c. 290 B.C. (c.f. the threefold division found in Eccles. 48. 20-25, 49. 6, 8, 10 there is a distinct testimony to three major and twelve minor prophets, it is superfluous to discuss Marti's dating of Zech. 9-14 in 160 B.C. It does not follow from the varying and indefinite designations of the third group that this was only just begun, for a better explanation of the present order (Genesis at the end) is found in the heterogeneous contents of the collection (cf. "Psalms" in Lu. 24. 44); and the definite article, which occurs in all three sentences, requires that we should recognize that the Hagiographa was closed, just as much as was the second group, the name of which also varies ("the prophets")
or "the prophecies "). It follows that whatever date we assign to the composition of the book of Daniel, it did not first see the light as late as 70 A.D., as is maintained by the assumption that so accurate a prediction is impossible, and which has against it the fact that Daniel's prediction of the future extends far beyond the times of Antiochus Epiphanes (see, e.g., all that is prophesied concerning the fourth kingdom). All other conclusions of criticism, which date any canonical book later than 290 B.C., or at latest 180 B.C., are purely arbitrary, and in contradiction to the evidence already set forth. In earlier times no analogous literature is extant. It is possible, however, to adduce very important indirect testimony to support the affirmations of Josephus. That is, as a matter of fact, it is certain that the Chronicles later than the period assigned by Josephus; for 1 Chr. 3:19f. carries us no farther than to Zerubbabel's grandson, since the posterity of Rehahlah, who seem to be later, stand without any congruity with what goes before. In Ne 12:22-23, we may have to do with a comparatively recent narration of different times (cf. the statement in Baba Bathra about Ezra, that he wrote the genealogies of Chr. up to his own time, as below), or it may be a contemporary notice that four generations of high-priestly descent were then alive—as we Germans used to speak of a famous picture as representing "Four Kaisers." It is possible that Nehemiah himself, who in 430 B.C. was acquainted with a married grandson of Eliashib (18:28), may have lived to see his great-grandchildren. We cannot here treat in detail the notorious mistakes of Josephus with regard to this period. It is clear, however, that in Ne. 12:22, Darius III. (Codomannus) is not meant (336-331 B.C.), but Darius II. (Narthus; 423-404 B.C.). It is, moreover, a fact not without importance that not one of the many genealogies is continued beyond the time given by Josephus. It is further to be remarked that this date is from all points of view intelligible in itself. The era is seen banishing the canonical and religious documents; they felt that inspiration was on the point of passing away, just as was the use of the old Hebrew language. On the other hand, the close and selection of the canonical writings was a need of the times, especially if they were to be put into the temple for safe keeping: Josephus, Arch. v. and Belo. jud. vii. 17, they pronounced in Ezra ("the scribe," Ezr. 7:6) and in Nehemiah commanding personalities; and the much more limited range of interests which presented themselves to the little colony of Jews after their Return left them leisure to collect all that they now treasured, and sufficiently explains the general acceptance of the reason which may be found in later times. These conclusions enable us to extract what there is of truth from the medley of confused notices of the canon which have come down to us, and at the same time to find support in them for results which have already been assured by other modes of reasoning. (i) To treat them or to the whole people." From this passage in itself nothing can be argued, because of its mechanical idea of inspiration and because it puts a higher value upon the 70 apocryphal books than upon the 24 canonical; yet, when it is taken with what has already been proved, there is light enough shown on its worth by the Fathers which present us with similar notices either refer directly to 2 Esd. or arise probably from the same source. Only Irenaeus (Adv. Haer. iii. 21), where the statement has a simpler form, has the appearance of being independent. (ii) The tractate Baba Batra (xiv. 2; xv. 1) states that "Moses wrote [kethab] his book, the section about Balaam and Job. Joshua wrote his book and eight verses in the law. Samuel wrote his book, the book of Judges and of Ruth. . . . Jeremiah wrote his book, the books of the Kings, and Lamentations. Hezekiah and his colleagues wrote JMSK. (i.e., Is., Pr., Can., and Ec.). The men of the great synagogue wrote Ezech., etc. (i.e. Ezk., 12 prophets, Dan., and Esther). Ezra wrote his book and brought down the genealogies of the Chronicles to his own times." Since the time of Kuenen the men of the Great Synagogue have been definitely held to have founded the kingdom of legend, though doubts as to their existence are expressed much earlier. But we may use this passage as a witness to the genuineness of the underlying fact of the close of the canon
from the times of Ezra and Nehemiah which is reflected in it. (iv) Is not the threefold division there accepted at once, or is there any reason that the canon was closed in the days of Nehemiah? It is true that this division has often been represented as haphazard, but the older positive investigators maintained that it is discovered a principle, which postulates the closing of the canon at a definite date. This position is, however, we see, to our next section. B. The Beginning of the Canon. We believe that it is true that there is an underlying principle, but one that has been in part historically evolved. (i) The work of Moses forms the foundation. We must quite certainly set his inspiration yet higher than that of the prophets (see Ex. 33.11; Num. 12.6ff.; Deut. 5.500f). See the present writer's Are the Critics right? and the articles in this volume on the Pentateuch and on the several books for evidence that views which do not refer Deut., the priestly Codex, and the book of the Covenant in their main fundamental elements to Moses, must lead to inextricable contradictions. We therefore recognize in Deut. 31.9, 26, 17.18 the beginnings of the formation of the canon (cf., further, Ex. 17.14, 24.4, 34.27; Num. 33.2). Jos. 24.25f. is an analogous instance; for the early existence of written laws (Toret), see Ho. 8.12 (Heb.) which mentions "innumerable" precepts brought by the Law as "written" (cf. R.V. marg. ; the "though" in R.V. text is not in the Heb., and destroys the vivid balance of the sentence). How much of the Law, and what also in its historical parts was canonical, is, as to details, how the problem of the science of introduction, and different answers to it are given. 2K. 22.5f. is concerned with canonization, or rather reconcanonication, and is generally referred to Deut. In Ne. 8-10 the Pentateuch is, according to Wellhausen, given canonical status; according to his school, who contradict the statements of the text, only the priestly Codex. The conclusion of the Torah (Deut.) has been arbitrarily referred to c. 400 B.C. But the Torah as such, as e.g. the principle of threefold division of the canon does not correspond simply to the historical succession in time, not that here a definite principle of division has been in reality the ruling factor. This alone explains why the order of the individual books in the Heb. Bible varies, while yet each book is always placed in the same section. This principle arises objectively from the different status of the writers in the theocracy, subjectively from the different degree of inspiration. Often both these reasons are taken into account, but at other times one or other is predominant. Abarbanel and Maimonides push the matter further into what are often very subtle distinctions, with which we may compare the right distinction of Witsius between the division of the books which go to c. 400 B.C., and the division by which Daniel's place in the Hagiographa becomes intelligible. In any case, however, a principle implies the conclusion of the canon at some definite time. The later Jewish discussions, which concern Pr., Ec., Esther, Ezrk., Can., have nothing to do with their reception into the canon, which, indeed, those discussions assume: still less with any later exclusion from it, which could not be reconciled with the demonstrably high estimation in which Esther was held; but are concerned with their exclusion from public reading in divine service, which, however, was not carried out. The reason for them was not critical impeachment of their genuineness, but arose from their contents, e.g. Ezekiel was supposed to be inconsistent with the law. Critics in earlier times cited the Alexandrian canon against the Hebrew, but this is not justified. For as revelation in the Alexandrian view had a wider scope, they allowed themselves additions (cf. the many apocryphal additions and see under 111.) and alterations. Despite these, the LXX. canon is in the main the same as the Hebrew. Yet Philo, according to Strack, quotes from all the Biblical writings with the exception of Ezekiel, the order of Heb, Bible) Obadiah and Jeremiah respectively? That this "accurate succession of reception with the threefold division of the canon," is not justified. For as revelation in the Alexandrian view had a wider scope, they allowed themselves additions (cf. the many apocryphal additions and see under 111.) and alterations. Despite these, the LXX. canon is in the main the same as the Hebrew. Yet Philo, according to Strack, quotes from all the Biblical writings with the exception of Ezekiel,
Daniel, and the five Megilloth, and gives only one citation from the Apocrypha. What Josephus thought, though he makes frequent use of the LXX., and favours Alexandrian views, we have already seen. The computation of 24 books (which is the total of the Jewish tradition [2Esd.14.44-48, see supra, and Talmud] as far as it is uninfluenced by the LXX., is to be held, with Strack against Zahn, to be original, i.e. 5 books of the law, 4 + 4 (i.e. Jos., Judg., Kings, Sam.; + Is., Je., Ezek., and the book of the 12 minor prophets) of the prophets, and 11 of the obtaining new and lesser mystagogic, and the Christian writers, which makes them 22, is conformed to the alphabet, and is only obtainable by uniting Ruth with Judges and Lamentations with Jeremiah; yet if this were originally so, their present position in the Hagiography would be hard to explain.

Equally artificial is the number 27, favoured by Ephraimus and Jerome, which arises from the final letters of the alphabet being added. With regard to the varying order, which we find in the LXX., in the Fathers, in the Vulg., Talmud, Rabbis, and German and Spanish MSS., see Strack, Introduction, or Hertzog, Real-encyc. ed. 2 and 3. The LXX., e.g., gives us a division into historical, poetic, and prophetic writings, and gives the five first lesser prophets in the order of their size. Because Baba Bathra and the larger number of German and French MSS. make Isaiah follow Jeremiah and Ezekiel, it does not follow that we are to see in this a reminiscence of the origination of Its. and Ez. from a more primitive source, but a trouble itself with such criticism, and, long before, Jesus Sirach (Ecclus.48.22ff., esp. 24) had held these chapters to be genuine. The Jews themselves give a different explanation of this order—viz. that threatening should follow threatening, and comfort, comfort. It is often difficult to discover a principle in the varying order of the Hagiography; though that the five Megilloth follow the order of the feasts, at which they were read, is intelligible enough. Even in the names a constant tradition is wanting. The abbreviations ע (i.e. Torah, Nebim, Ketubim), נכ (i.e. books with spiritual merit) indeed, we find in the LXX., the Hecataeian, the Apocrypha, the origination of the books of the law by the first word or one of the first words in them, are well known. —III. History of O.T. Canon in the Christian Church. (a) The Early and Middle Ages. The most important point for us is that Christ and the apostles recognized our O.T. as canonical, for only passages from it are treated as Holy Scripture, and only very occasional reminiscences of the Apocrypha are to be found (e.g. Heb.11.35ff. refers to 2Mac.6f.). Of the canonical writings, references are wanting only to Ezra, Nehemiah, apparently to Esther, and probably to Ecclesiastes. For the attitude of Christ and His apostles towards the O.T. for till his several parts, the following passages may be especially noted: Mt.5.17,15.33ff.; Lu.24.25,44ff.; Jn.5.39,10.34ff.; Ro.3.2; 2Tim.3.15; Heb. 1.1; 1Pe.1.10f.; 2Pe.1.10f. Even the apostolic Fathers are still far from quoting the Apocryphal writings as Holy Scripture, though they use them, and have clear allusions to them. Clem. Rom. refers to Wisdom, Ecclus., Tobit, and Judith; Justin Mart. (4P. i. 46) to the additions to Daniel, and in the Dial. with Trypho (c. 120 A.D.) even to the Ascensio Isaiae. As Christian converts from paganism were often unable to read the O.T. in the Greek Church, and a lasting recognition in the Latin. We give in the table on the next page a synopsis, which, though it makes no pretension to completeness, may serve to give at a glance the general position taken on this question by the Church of the Early and Middle Ages. The Fathers observed the difference of their Bible from the Hebrew, Melito and Origen set about inquiries into the limits of the Jewish canon. Notwithstanding the opinion of Origen that canonicity was to be defined as the Church had received it and that so the Apocrypha was to continue to be read as Holy Scripture, the Fathers of the Laodicean Council, which (Canon lix.) forbade the public reading of books "not received into the canon," and of Athanasius, who distinguished between "what was canonical, what was read, and what was apocryphal," the Hebrew canon came into currency in the Greek Church; but the writers in the LXX. (Baruch and a letter) were still regarded as canonical. (For the change in the meaning of the word "apocryphal," see art. Apocrypha.) The Apost. Can. (Ixxv.), dating from the 5th cent., introduced a position which was at that time abnormal in the East, and for this reason Canon Ixxv. is put in brackets. The second takes so the Latin Church from the end of the 4th cent. onwards is different. The Councils of Hippo (393 A.D.) and of Carthage (397 A.D.), in the name of Augustine, pronounce ecclesiastical tradition to be authoritative, in default of fixed criteria by which to judge canonicity. Here and there, in the Writings, the Fathers, who, following Jerome, recognize the Hebrew veritas, but they are the exceptions, and are consequently bracketed in the table. The last column refers to the book of Esther, the only canonical writing which (certainly on account of its contents) was generally mislaid or of which the canonical authority was questioned, and that almost without exception by the Greeks. It is only necessary, further, to mention the critical position of Theodore of Mopsuestia, who recognized Baruch and Ecclus., but, on the contrary, did not regard Job, Can., Chron., Esther, Ezra (Nehemiah), or the superscriptions of the Psalms as canonical; upon him Julius of Rome is certainly dependent (see Strack). The oldest Syrian Church did not recognize the Apocrypha. On the contrary, the conception of what was canonical in the Ethiopic Church seems to have been even more comprehensive than that of the LXX. itself. (b) The course of opinion since the Reformation. The Reformed Churches mainly agree with the judgment of Luther, who intro-
duces the Apocrypha in his first publication of the entire Bible in 1534, with the words, "Apocrypha, that is a collection of books which are not held on an equality with the Holy Scriptures, and yet are useful and good to be read." He did not, however, accept 1 and 2 Esdras, and he expressed himself freely about Esther. He followed the order of the Vulg., but placed the Apocrypha at the end. The same order in the Apocrypha is shown in the symbols of the reformed Churches: conf. Gall. (1559), art. iv.; conf. Belg. (1562), art. iv.-vi.; conf. Auglic. (1562), art. vi.; conf. Helv. (after 1566), ch. i., Decr. Thorun (1645). The table in the book of Common Prayer appoints lessons from the Apocrypha for All Saints' Day and other days. Much more cautious and tentative was the Synod of Dordrecht, 1618, which markedly separated 2 Esdras, Tobit, Judith, and the Story of Bel and the Dragon from the canonical writings. For the Roman Church the Council of Trent (session iv.) pronounced all the Apocrypha in veteri vulgata Latina to be canonical, and anathematized every one that should think otherwise. The Greek Church has rejected the confession of Metropolitans Kritopulos (1625) and of Cyrilrus Lukaris (1629), which only receive the Hebrew Canon, and at the Synod of Jerusalem (1672), in the confession of Dioscurus, designates most of the Apocrypha as "genuine parts of Scripture"; whereas the catechesis of Philaret (1850) returns pretty much to the opinions of Athanasius. Herzog, Real-Encyclop., s.v.

Canon of N. T. [The article by Bp. Westcott in Smith's D. B. (4 vols. Murray, 1863) is still acknowledged by the general consent of scholars to be unaffected by recent controversies, and the historical facts are necessarily unchanged; hence the present article is, in all essentials, and with but slight additions, a condensation of that scholarly production. A final paragraph, referring to the discussions since Bp. Westcott's time, has been added.—Ed.] The history of the N. T. Canon may be conveniently divided into three periods. The 1st extends to the time of Hegesippus (c. 170 A.D.), and includes the era of the separate circulation and gradual collection of the apostolic writings. The 2nd is closed by the persecution of Diocletian (303 A.D.), and marks the separation of the sacred writings from other ecclesiastical literature. The 3rd closes with the 3rd Council of Carthage (397 A.D.), at which a catalogue of the books of Scripture was formally ratified by conciliar authority. (1) The history to 170 A.D. The writings of N. T. themselves contain little more than faint, perhaps unconscious, claims to the position which they were destined to occupy (but see Spirit, Hoi Y., 4). The mission of the apostles was essentially one of preaching, not of writing: of founding a
present Church, not of legislating for a future one. The prevailing method of interpreting O.T., and the peculiar position which the first Christians occupied, as standing upon the verge of the coming age, seemed to preclude the contemplation of putting former books in the New Testament. Yet a public use (Col. 4.16; 1 Th. 5.27; Rev. 22.18), and an authoritative power (Lk. 1.1-4; Jn. 21.24; 2 Th. 3.6; 1 Tim. 4.6; Rev. 22.19) is claimed for their writings; and, at the same time, Peter was written, which on any hypothesis is extremely early, the epistles of St. Paul were placed in significant connexion with the other Scriptures. The transition from the apostolic to the sub-apostolic age is essentially abrupt and striking. An age of conservatism succeeded an age of creation, but in feeling and general character faithfully reflected it. The writings of the Apostolic Fathers (c. 70-120 A.D.) were early quoted by the authors of the cannon books, and seldom necessitated the quotation of the earlier writings. In apologetic and missionary treatises especially the appeal would naturally be rather to O.T. At the same time they show that the canonical books of N.T. supply an adequate explanation of the belief of their age, and the conflict of races and the varieties of earlier teaching on which that was based; and Clement of Rome (Ep. 47), Ignatius (ad Eph. 12), and Polycarp (Ep. 3)—the latter of whom († 155 A.D.) was a personal disciple of St. John—refer to apostolic epistles written to those whom they were addressing. The casual coincidences of the writings of the Apostles and the Fathers with the language of the epistles are much more extensive. With the exception of the ep. of Jude, 2 Peter, and 2, 3 John, with which no coincidences occur, and 1, 2 Thessalonians, Titus, and Philemon, with which the coincidences are questionable, all the epistles were clearly known, and used by them, though not quoted by them. The widespread quotations of the facts and of the books and the general character of their writings indicates their deep and accurate acquaintance with the sacred writings of the O.T.; nor is the famous phrase of Ignatius (ad Philad. 5) sufficient to prove the existence of a collection of apostolic records as distinct from the sum of apostolic teaching. The coincidences with the gospels, on the other hand, are numerous and interesting, but not such as to establish the identity of the scripture or of the gospel with the books of the Christian canon. The Church was well aware of the gospels before St. John wrote them, and the gospels of St. John and the Apocalypse were frequently quoted in the Pauline epistles. Of other books of N.T. mention is made by name the Apocalypse only, and attributes it to "a certain . . . John" (Dial. c. Tryph. 81), and offers some coincidences of language with the Pauline epistles. The evidence of Papias (c. 140-150 A.D.), who was traditionally held to be the guardian of the church at Hierapolis, is very important. He makes the Apocalypse the foundation of strange speculations, which are popularly confounded together under the general title of Gnosticism, whether Gentile or Jewish in their origin. The need of an authoritative Canon made itself felt during the Gnostic controversy; and the witness of Gnostic heretics has its special value in the case of such books as the Apocalypse. The gospels of St. John and of W., and the pseudonymous gospels of the 2nd century, which are in the canon of the Latin Church, are not the Apocalypse. The evidence of St. Irenæus (c. 170 A.D.), and of Tertullian, are decisive. The evidence of St. John's gospels is decisive. The evidence of the Muratorian Canon in the Latin Church is decisive. The evidence of the Calendar of Eugène, the ancient calendar of the Syriac Church in the East, is decisive. The evidence of the Muratorian Canon of the Latin Church is decisive. The evidence of the Calendar of Eugène, the ancient calendar of the Syriac Church in the East, is decisive. The evidence of the Muratorian Canon of the Latin Church is decisive.
Authoritative and inspired, and co-ordinate with O.T.; as is proved by the testimony of contemporary Fathers of the Churches of Asia Minor, Alexandria, and N. Africa. Ireneaeus (c. 177 A.D.), disciple of Polycarp, speaks of the Scriptures as a whole, without distinction of the O. or N. T., as "perfect, inasmuch as they were uttered by the Word of God and His Spirit." "There could not be," he elsewhere argues, "more than four gospels or fewer." Clement of Alexandria (c. 180 A.D.) regards "the apostle" as a collection definite as "the gospel," and combines them as "Scriptures of the Lord" with the law and prophets. Tertullian (c. 202 A.D.) notices particularly the introduction of the word Testament for the earlier word Instrument, as applied to the dispensation and the record, and appeals to the New Testament, as made up of the "gospels" and "apostles"; and in his Adv. Marc. analyses ten of St. Paul's epistles. This comprehensive testimony extends to the four gospels, Acts, 1 Peter, 1 John, 13 epistles of St. Paul, and the Apocalypse; and, except the Apocalypse, no one of these books was ever afterwards rejected or, until modern times, even questioned. As this implies the recognition as authoritative of the principal contents of the Canon left several points still undecided. The E. and W., as was seen above, each received some books which were not universally accepted; and in other cases apocryphal or unapostolic books obtained a partial sanction or a popular use before they were finally excluded; but it may be said that of the "disputed" books of N.T. the Apocalypse was received by all the writers of the period, with the single exception of Dionysius of Alexandria, who questions its authorship rather than its canonicity; and the Hebrews was accepted by the churches of Alexandria, Asia (?), and Syria, but not by those of Africa and Rome. The ep of SS. James and Jude, on the other hand, were little used, and 2 Peter was barely known. (3) From 303 A.D. to 307 A.D. The persecution of Diocletian was directed in great measure against the Christian writings, and was not so successfully as it might have been, obtained protection by surrendering the sacred books, and, later, the question of the readmission of these "traitors" (traditores), as they were emphatically called, created a schism in the Church. The Donatists, whose judgment on their crime was the sterner, maintained in its strictest integrity the popular judgment in Africa on the contents of the Canon of Scripture; and Augustine allows that they held in common with Catholics the same "Canonical Scriptures," and were alike "bound by the authority of both Testaments." The list of the 59th Can of the Council of Laodicea (c. 363 A.D.) omits the Apocalypse, but our present Canon of N.T. exactly agrees (Jb. of Theol. Studies, i. 558) with that of the Council of Rome (382 A.D.) and of the 3rd Council of Carthage (397 A.D.), from which time it was accepted throughout the Latin Church, though occasional doubts as to the Hebrews remained. Besides the African churches, representing the conservative East, retained the Peshitta Canon. Chrysostom († 407 A.D.), Theodore of Mopsuestia († 429 A.D.), and Theodoret, who represent the church of Antioch, furnish no evidence in support of the ep of Jude, 2 Peter, 2, 3 John, or the Apocalypse. Junilius, in his account of the public teaching at Nisibis, places the ep of James, Jude, 2 Peter, 2, 3 John, in his Apocalypse, and mentions doubts in the East as to the Apocalypse; and though Ephrem Syrus was acquainted with the Apocalypse, yet his genuine Syrian works exhibit no habitual use of the books not contained in the Syrian Canon. The churches of Asia Minor seem to have occupied a mean position as to the Canon between the E. and W. With the exception of the Apocalypse, they received generally all the books of N.T. contained in the African Canon. A festal letter of Athanasius († 373 A.D.) bears witness to the Alexandria Canon. This contains a definite list of the books of N.T. as received at present; and the judgment of Athanasius is confirmed by the practice of his successor Cyril. One important catalogue yet remains. After noticing in separate places the origin and use of the gospels and epistles, Eusebius (c. 315 A.D.) sums up the results of his inquiry into the evidence on the apostolic books and their interpretation as a whole, and the last century (H.E. III. 25). In the class of acknowledged books he places the 4 gospels, 14 ep of St. Paul, 1 John, 1 Peter, and, in case its authenticity is admitted (such seems to be his meaning), the Apocalypse. The class of disputed books he subdivides into two parts, the first class of obvious forgeries generally recognized, including the ep of James, Jude, 2 Peter, 2, 3 John; and the second of those which he pronounces spurious, i.e. either unauthentic or unapostolic, as the Acts of Paul, the Shepherd of Hermas, the Apocalypse of Peter, the Apocalypse of John (if not a work of the apostle), and, according to some, the gospel according to the Hebrews. These two classes contain all the books which had received ecclesiastical sanction, and were in common distinguished from a third class of heretical forgeries (e.g. the gospels of Thomas, Peter, Matthias, etc.). At the era of the Reformation the subject of the N.T. became more and more a subject of dispute, though Erasmus, Calvin, and Luther, the latter from a purely subjective standpoint, expressed their doubts as to certain books, the reopening of the question resulted in the general acceptance of the old Canon. The language of the Articles of the Church of England with regard to N.T. is, however, remarkable. In the Articles of 1552 no list is given; but in the Elizabethan Articles (1562, 1571) Holy Scripture is defined as the "canon of the Old and New Testament of whose authority there is no doubt in the Church" (Art. vi.). This is followed by an enumeration of the books of the O.T. and Apocrypha; and then it is said summarily, without a detailed catalogue, "All the Books of the New Testament, as they are commonly received, we do receive and account them Canonical." It seems, therefore, possible that the framers of the Articles intended, as in so many other matters, to leave freedom of judgment on a point on which opinions were then divided. Recent N.T. criticism does not call for much remark under this head, and is dealt with in the
articles on the several books. Harnack has taken the place of Paulus, Strauss, and Baur as the hero of the moment. His conclusions, however, are defective, but his own works are conspicuous examples of this "impressionism." He has been forced, indeed, to admit that, in the matter of dates, at least, criticism is "gradually returning to the traditional standpoints." But he still disputes the authority of the N.T. writers, though on purely subjective grounds. Historical testimony, among writers of his school, is ignored or evaded. They depend on the ingenious invention of difficulties and contradictions in the subject-matter of the writers with whom they deal. Harnack promises us further "startling discoveries" by methods of this kind. We are confident that they will prove, as previous discoveries of a like kind have proved, but a "nine days' wonder." The principle on which we may dismiss them is, that a society such as the Christian Church was not likely to go through the age of Solomon without the genuineness of those title-deeds we have evidence such as no other records in the world can show. On the traditional side the fullest account of the Canon will be found in Westcott's Canon of N.T.; Salmon's Introduction to the N.T.; Scrivener's Introduction to the Crit. of. the O. T.; and King's Natural Religion. On the side of modern criticism there are a vast number of recent books, bearing more or less on the subject; but those which have found the widest acceptance are the works of Harnack. J.J.L.

Canopy (Jth. 10.21, 13.9, 16.19). The canopy of Holdernes is the only one mentioned, although, perhaps, the "pillars" of the letter described in Can.3.10 may indicate that its equipage included a canopy. It probably retained the mosquito nets or curtains which gave it its name (κοσμωτήριον, from κοσμήν, "gown"), although its description (Jth.10.21) betrays luxury and display rather than such simple usage.

Canticles, or Song of Solomon: Vulg. Cant. Canticorum, from Heb. sîr hashšîrîm, "Song of the Songs," i.e. the best or most beautiful of songs. It was apparently not without some hesitation that the Jews placed this exquisite but obscure poem in the Hagiology. Once admitted to the sacred canon, however, it became invested with peculiar sanctity, for, like the book of Ezekiel, it was not allowed to be read by any before the age of thirty; and it gained the dignity of being included in the five Megilloth (or Rolls) read liturgically on the great Jewish festivals. The Song was read also on the 5th day of the Passover (cf. the use of 2.10-17 as the 1st lesson at Evensong on Easter Monday in the Anglican Calendar). Passing with the other books of the Hebrew canon into the service of the Christian Church, the Song became a favourite study of mediaeval devotion. St. Bernard and Clairvaux left 86 sermons on Cant. (Cant. 3.7). St. Thomas Aquinas even on his deathbed was besought by the monks of Fossa Nuova to undertake a commentary on it.—Authorship and Date. The title (1.r) need not of necessity have more authority than the titles of the Psalms. It expresses only an ancient use of the Book, perhaps the allusions in the Song to Solomon and the "one thousand and five" songs attributed to Solomon by I.K.4.32 may be sufficient to account for. Modern scholars have assigned widely different dates. Deane believes it to be the work of some prophet contemporary with Jeremiah, and intended for that king's reformation. Driver (so also Stichel and Oettil) considers it to belong to a time not long after the division of the kingdoms. On the other hand, many (e.g. Graetz, Rothstein, Cheyne) consider it post-Exilic. The scenery is mostly that of the northern kingdom (see frequent allusions to Lebanon in ch. 4,6,7; to Tirzah, 6,4; to Baal-hamon, 8.11; and to vineyards generally). Some of its peculiar words are usually explained as belonging to the northern dialect. The freshness and vigour of its imagery, the glow of its passion, might naturally suggest an early period of literature, and would fit in well with the age of Solomon. But his himself could possibly have been its author will depend considerably on the view taken of its literal meaning and purpose.—Scheme. The Song has been regarded by some (e.g. Herder, Budde, Cheyne) as without dramatic unity, being rather a loose collection of love and marriage lyrics. But it is the fact is that the Song is a dramatic poem, having pure wedded love for its theme. Here again agreement ends, and not unnaturally, for little is known of Hebrew dramatic poetry. There are no external divisions of speeches, nor any names of characters prefixed. There is, however, a distinction in the Heb., which cannot be represented in an Eng. version, between the speeches of the "bride" and "bridegroom," made by the use of the 2nd pers. poss. pronoun masc. and fem., and in some MSS. of the LXX. the dramatis personae are inserted throughout the book. Hence it is possible to divide the Song in various ways, and even to construct entirely new schemes. But there are two main schools of literal interpretation. (1) (Supported by Delitzsch and Orelli.) Two principal characters, Solomon and a country maiden of great beauty and simplicity, called Sulamith or "the Shulammite." [SHULAMITE.] The court ladies form a sort of chorus, which comments on the course of events. Solomon is assumed to have discovered the Shulammite and won her love, while disguised as a shepherd. The play opens with her introduction to his harim at Jerusalem; the dialogue describes the course of their courtship, the purpose being to glorify monogamy, in contrast with the polygamy of Solomon. The speeches of the king are said by some to show a gradual elevation of tone, as he learns more of the maiden's character. The royal wedding takes place between ch. 4 and 5, and they return together to the old scenes of rural beauty, where among the vineyards and the flocks they had first loved each other, and the song ends with a panegyric upon the pure wedded love of one man for one woman (8,6,7). (2) (Originated by Jacob in 1771, though partly suggested by Ibn Ezra in 12th cent., and
supported by Ewald, Driver, and most modern scholars.) There are three characters in addition to the chorus, Solomon, the Shulamite, and an unnamed shepherd-lover, to whom the maiden remains faithful in spite of the entreaties of Solomon, and to whom she is eventually allowed to return. This view has much to recommend it from the dramatic point of view. Instead of a marriage with the king in 4.6-5.1, the drama leads up to a triumphant consummation in ch. 8 in the meeting of 5.1, and the lover is present at the praiseworthy conduct of the maiden’s chastity (vv. 8-12). The ethical value of the drama is much clearer than in (1). True love triumphs over fear and the seductions of the court. A parallel has been pointed out in the Arabic story of the loves of Hamda and Habbas (Wetzstein, Zeitschrift der Deutschen Morgenländischen Gesellschaft, xxii. [1868], p. 74); the former is on the point of marriage with her cousin Ali, when the real state of her affections is disclosed, and she returns to her true lover. It has also been suggested that the starting-point of the story may be found in that of the fair Shunammite Abigail, who preserved her honor at the court of David and Solomon, and disappears from the history after 1K.2.22, presumably returning then to her old home. Yet (2) is not without great difficulties. To some its very completeness and its modern flavour will be arguments against a too ready acceptance, and (5) is still too obscure. A marriage is certainly seems to be assumed here. On the shepherd-lover theory, however, Solomon at this point discovers the truth, and retires from the stage. On the other hand, there is a curious unreality about the whole movement of the drama on theory (1); and the supposed conversion of Solomon to a purer love is by no means clear. The literal interpretation of the Song cannot yet be regarded as satisfactorily solved.—Spiritual Interpretation. It was universally believed by the later Jews that the poem was a designed allegory of the love of Jehovah and His people Israel, conceived in the spirit of the prophetic or literary type of Isa.50.10, Je.2.2, Ezk.16, Ho.2, etc. It was even explained as an allegorical account of the whole history of Israel from the Exodus onwards. Origen introduced this conception into the Christian Church, and it dominated all the primitive and mediaeval Catholic interpretations. Theodore of Mopsuestia was even condemned by the 5th General Council (553) for denying that the Song had any but a literal meaning. Most modern scholars reject any allegorical purpose in the Song, and assume that its ethical motive is its sufficient justification. It certainly cannot be proved that any allegorical meaning was in the mind of the writer, nor does it seem prima facie at all necessary or even likely. Nevertheless, the practically universal feeling of both the Jewish and Christian Churches ought not to be disregarded. And the controversy between allegorists and literalists does not touch the real meaning of the book, for this is eventually revealed and the song is turned to an exhortation concerning the Church of the O.T. is typical of and preparatory to the Incarnation. But it is not necessary, in order to justify this, either to allegorize or ignore the plain literal meaning of the text. The original purpose of the Song, the glorification of the Church of God, in accordance with God’s creation, is a sufficient starting-point for a deeper and more subtle interpretation. The marriage is “a great mystery,” whose inner meaning, revealed to the Christian conscience, is the union of God and man in the Incarnation. That this meaning may legitimately be read in the Canticles is implied in St. Paul’s use of its language in application to the Church (cf. Eph. 5.23). A marriage between the Church and Solomon or the shepherd-lover may be seen a type of the Son of God (cf. 2.8-10); and in the Shulamite a type (a) of the Church of God in every age, her desires, her dreams, her struggles, and her triumphs; (b) of the B.V. Mary, the epiphane and flower of the Church; (c) of the Christian soul, living over in itself the Church’s experience. Thus the great theme of love and spring-time not only rightly finds its place in the Canon, which has room for every side of human nature, but is also eloquent of God’s great purpose of the restoration of human nature and of the second spring of the Resurrection. To deny the possibility of spiritual interpretation would be tantamount to denying the connexion of the O.T. with the Incarnation, or indeed its general inspiration.

Canticles of N.T. [HYMNS.]

Caper (Heb. abhyáyóna). This word occurs only in Ec. 12:5, where the A.V. reads “desire shall fail” (concipiscence, Geneva version), but in Wyclif it stands “the erbe capers shall be scattered,” or “and caparris schal be distrizd.” This meaning has been restored by R.V. The caper was regarded as a stimulant to the appetite, which was no longer of service when the seeing of beauty. “Caper-berry” of R.V. introduces an old blunder, since the part made use of as a condiment or pickle is the unopened flower-bud, not the berry. Capparis spinosa is a small, prickly, trailing shrub, usually clinging to walls, ruins, and dry rocky places. It may be seen near Jerusalem and in the Jordan Valley, and often in the Sinaiic peninsula (Wady el ‘Ain, etc.). Some writers have endeavoured to prove that hyssop (q.v.) was the caper; chieflly, perhaps, because it grows on a wall. [J.N.C.H.]

Capharnaum (Sinai M.S. Capharnaun), apparently “village of Nahum.” Our Lord’s “own city” (Mt.4.13), in Galilee (Lu.4.31), on the coast of the sea of Galilee (Mt.4.13), and apparently in the plain of Gennesaret (Lu.6.17, cf. Mt.14.34). It was apparently at least 4 Roman miles from the N.E. shore of the lake or shore S. of Bethsaida (Julias), which agrees with the situation of Gennesaret. [Lu.6.17; cf. Mt.4.13; Mt.14.34; Jn.6.22; Jn.11.14, 25; Lu.10.14; 1Jn.4.13]. Treatment of Cane and Nazareth (Lu.4.31: Jn.2.12), and not on a height—according to the Sinai MS. reading (Mt.11.23; Lu.10.15), “Shalt thou be exalted to heaven?”
CAPERNAUM

It was in Naphtali, while Nazareth was in Zebulun (Mt.4.13; Is.9.1). It had a synagogue (Mk.1.21; Lu.4.33; In.6.59) built by a Roman centurion (Lu.7.5), and was a military station, and a town where taxes were levied (Mt.9.9, etc.). In the Midrash (Qoheleteth vii. 20) Caphar-nahum is noticed as the town of minim, or Christian "heretics." It is perhaps the Capharnome to which Josephus was carried when wounded at Julias (Life 72). He says that the fountain of Capernaum watered the plain of Gennesaret (3 Wars x. 8), which applies to the 'Ain el Madoverah, or "round spring," especially because the Coracinus fish, which he notices in the Capernaum fountain, still exists in the latter spring. In 1334, and found there a "tomb of Nahum." He says (probably following the Midrash, as above quoted) that it was once inhabited by minim (heretics). Quaresmius in 1620, and Robinson in 1852, advocated a site called Minieh, which might be named after the minim, by a spring close to the shore in the N.E. corner of the Gennesaret plain; and, as being on the shore, and on the Roman road where the cutting would form a good station for a guard and a custom house, this site seems most suitable. The descriptions of early travellers are vague after 330 A.D., and it is doubtful to which of the two sites they refer. But they have no real authority, and the Jewish tradition is preferable. [c.r.c.]

CAPPADOCIA

The 4th cent. A.D. Jerome (Onomasticon) places Chorazin (Kerazeh) 2 miles from Capernaum, and in 530 A.D. Theodorus makes the latter 4 miles from Magdala. These distances point to Tell Hum, a ruin on the N. shore of the lakes, with a synagogue (probably, however, of 2nd cent. A.D.), about 5 miles from Magdala and 2½ from Kerazeh. But this site is not in Gennesaret, nor is it 25 to 30 furlongs from the N.E. shore. It is probably the Kefar Ahim of the Talmud (Tal. Bab. Menahoth 85 a), mentioned with Chorazin. Some writers have suggested the spring 'Ain et Tabghah (dyers' spring), 1½ miles W. of Tell Hum and 2 miles N.E. of Minieh, to be the fountain of Capernaum. It seems to be the migdal 'ebo'ia (dyers' tower) of the Rabbis (see Neubauer, Geog. du Tal. p. 217 for ref.), noticed with Magdala. It is not in the plain of Gennesaret, from which a cliff separates it. A modern aqueduct runs from this spring, but the cutting in the cliff is not a continuation, and is too large to be anything but a Roman road. Nor would the plain be irrigated from the Tabghah, since it has springs of its own. A modern traditional site is unsuitable, and appears to have been favorably chosen in the Middle Ages, when Capernaum was shown in the Gennesaret plain. Rabbi Isaac Khelo Caphar', one of the words employed in the Bible to denote a village; the modern Arabic Keft, "hamlet." In names of places it occurs in Chephar-Haamonai, Chephirah, Caphar-Salama, and Capernaum. [c.r.c.]

Caphar-Salama (Mac.7.31), a place where Judas Maccabaeus in 161 B.C. defeated Nicanor, who fled back to Jerusalem; apparently in Judaea (7.24). Possibly Selmeh, a village 3 miles E. of Joppa. [c.r.c.]

Capthenatha (Mac.12.37), a place so called on E. side of Jerusalem. Probably the Aramaic Kaphthenatha (heap), equivalent to Heb. Ofhelm (round). [c.r.c.]

Caphira (Esd.5.19). [Chephirah.-]

Caphtor' and Caphtorim' (Gen.10.14; Deut.2.23; Chr.1.12; Je.47.4; Am.9.7). All these references concern the Philistines, who are said to have come from Caphtor, but were perhaps not Caphtorim. Caphtor is generally thought to be Crete. [Philistines; Cappadocia.]

Cappado'cia (Ac.2.9; 1Pe.1.1), the mountain region of E. Asia Minor immediately N. of Syria. In the time of the Apostles it had a Jewish population dispersed among the natives. The capital was at Mazaka (throne of Ma), the later Caesarea. The researches of Ramsay, Hogarth, and Chantr (Mission en
Cappadocia, 1893-1894) show an early population akin to the Hittites speaking an agglutinative language. The Akkadian tablets, early as about 2000 B.C.—with Babylonian traders whose tablets are in Semitic language and cuneiform script. In and after the Persian period there was also a strong Persian element, and the Cappadocian calendar was Persian. Tablets in Persian cuneiform were also found by Canon Alford, in Cappadocia, and the Romans have left texts and temples, and the Jews were introduced as colonists by Seleucus I. The LXX. (Deut.2:23 ; Am.9:7) renders Captor by Kappadokia, and makes the Philistines (who were Semitic, and adored the Babylonian god Dagon) Cappadocians originally, which is possible as there was an early Semitic population in this region. Cappadocia is a grazing mountain-plateau, deficient in wood, and producing grain. Ptolemy extends its W. limits even to include Iconium. The Babylonians called this region Kat-pada-uka, apparently Akkadian for “great north region.”

Captain answers usually to sār or abhūta, both used of civil as well as military officers. “Chief captain” (χαλάρχος: Ac.21:31, etc.) represents tribunus or “colonel.” [Army.] Lysias commanded the Roman garrison of Jerusalem, the “band” or cohort. “Captain of the guard” (στρατοσυνάδρομος: Ac.28:16) means either prefect of the praetorians or the praetorian guard, and Romans used similar terms in R.V. omits clause. The “captain of the temple” (Ἀγριππᾶς etc.) commanded the priests and Levites and kept order in the temple. For “captain [ἀρχιερεύς] of our salvation” (Heb.2:10) R.V. has “Author,” as 12:2, but “Prince” in Ac.3:15-5:31; lit. “leader.” [H.S.]

Captivities of the Jews. The term captivity is applied to the deportation of the people of Israel and Judah by their conquerors. —I. Israel. Rezin king of Syria, and Pekah king of Israel, laid siege to Jerusalem. Ahaz king of Judah appealed for aid to Tiglath-pileser (Pulu, or Pul), king of Assyria, to whom he was vassal (2K.16:5-9). In 734 B.C. the king of Assyria marched against the kingdom of Gaza, as stated in the Eponym Canon, and, apparently, on that occasion went against Damascus, and, having taken it, punished the kings of Syria by annexing a part of their territory (15.29), and deported the inhabitants to Assyria. A few years later Hoshea, the last king of Israel, revolted against Assyria, and sought help of So (Sabaka) king of Egypt (17.4). Thereupon Shalmaneser IV. laid siege to Samaria in 724, and the city was taken in 722 by his successor, Sargon (Smith, Assyr. Canon, 201). It is not necessarily implied in 17.5, 6, 18.9, 10, that it was the commander who brought about the siege to a close. After the fall of Samaria the inhabitants were deported to Media and Gozan, in Mesopotamia, their place being taken by colonists from Babylon, etc. (17.24). Thus ended the Northern, or Ephraimitic Kingdom.—II. Judah. Jehoiakim, king of Judah, being with drawn from his residence in Babylon, marauding bands were sent against him, until the regular army could lay siege to Jerusalem. Meanwhile, he died and was succeeded by his son Jehoiachin, who after three months’ resistance submitted to Nebuchadnezzar. He and 10,000 captives, including the chief of the captains, the king’s palace, and temple and palace, were taken to Babylon. This occurred in the year 597 B.C., and was the beginning of the Babylonian Captivity (24:1-16). Ten years later, in 587, Jerusalem was a second time besieged by Nebuchadnezzar, to punish Zedekiah for breaking his oath of fealty. The siege lasted about a year and a half, and the city fell on Tammuz 9 (Months), 586 B.C. Zedekiah and the army left the city by night and sought to escape to some place of safety in the Jordan Valley. They were overtaken in the plains of Jericho, and the king captured. He was taken first to Riblah, where his eyes were put out, and then he, with the rest of the people, including those who had sought refuge in the Babylonian camp, were carried to Babylon. A certain number of the poor were left behind to till the land, and about eighty of the principal men, among whom was Seraiah the high-priest, were carried into Babylon to death. The city was destroyed by fire on Ab 10; and the gold, silver, and brass were taken to Babylon (2K.25:11; Je.39:11, 52:2; cf. Ezk.24:11). A third deportation of Jews to Babylon took place by order of Nebuchadnezzar in 582 B.C. (Je.52:30). There seems to be some obscurity in the history of the number of exiles given in 2K.24:14, 16 and Je.52:28-30. According to the former there were 10,000 in 597 B.C., and according to Je. only 3,023, with 832 in the deportation in 586 B.C., and 745 in 582 B.C., making a total of 4,600. The smaller numbers probably count men only, but even then seem far too small to account for the depopulation of the land.—III. Duration of the Captivity. The exiles from the northern kingdom never returned as a community. The beginning of the restoration of the Jews was in the year 536, when they returned under the leadership of Zerubbabel and Jeshua, in the first wave of deportees. The permission was given by the Edict of Cyrus (Ezr.1). The number of those who returned is given as 42,360 (2.64). If the period of the Exile is reckoned from the deportation in 597 it was 67 years, but if from the destruction of Jerusalem, in 586, then only 50 years. No system of computation gives a complete account of 67 years (Je.29:10); but see Chronology for another view.—IV. Condition of the Exiles. It is not known how the exiles were distributed in the province of Babylon,—i.e. whether they were scattered or permitted to live in defined districts or towns (cf. Esth.3.8). They were regarded rather as colonists than captive slaves, and were permitted to build their own houses, cultivate their land, and live the family life (Jc.29:5-7). They might attain to the highest offices of state (Dan.2,4,8), or discharge functions which brought them into close contact with the king (Ne.1.11). They observed fast-days (Is.58:3), and their religious laws and customs generally (Esth.3). [H.H.]

Carbuncle, a name to which it is difficult to find anything corresponding in the Hebrew text (Esd.9.34).

Carbuncle represents in A.V. two Heb. words. (1) 'eqalāh occurs only in Is.54:12, in
the description of the beauties of the new Jerusalem. The term may be a general one for any bright sparkling gem, but it is impossible to identify it with certainty from this single occurrence. (2) bäregheth, bārōqath, the third stone in the first row of the sacerdotal breast-plate (Ex.28.17,39.10), also one of the mineral treasures of the king of Tyre (Ezk.28.13). Braun supposes that the smaragdus is meant. This name generally, but not invariably, means the kind of a green glass, but modern writers who are short-sighted, used an eyeglass of smaragdus, from which some have thought the term must include other minerals, such as the rock-crystal. But it seems clear (Nat. Hist. xxxvii. 16) that he means the emerald, so it was probably a pale variety approaching beryl. The carbuncle (Gr. ἀργύρης; Lat. rubicundus) is properly the Ruby, but the name is applied to blood-red varieties of the spinel and garnet. The first named was known to both Theophrastus and Pliny, but is not likely to have been seen by O.T. writers, and its hardness would then have baffled the engraver. [R.G.N.]

Caras' seven of the seven "chamber-linens" (i.e. eunuchs) of king Ahasuerus (Esth. 1.10).

Carachamis'. The form in A.V. of 1 Esd. 1.25 of Carchemish, though some editions here read Charchamis.

Carchemish (2 Chr.35.20, R.V.; Is.10.9; Je.46.2), a Hittite city on the Euphrates, W. of Tigris, now the ruin of Carchemish (Ara-mpolis), where G. Smith found Hittite monuments now in the British Museum. The famous temple of the Dea Syria described by Lucian stood here. It was the scene of the decisive battle (607 b.c.) in which Nebuchadnezzar defeated Pharaoh Necho. The ruins lie W. of the river, and Hittite monuments still lie among them. In the 12th cent. B.C. Tiglath-pileser I. passed Carchemish after swimming his soldiers over the Euphrates on inflated skins, or small rafts such as are still used. In 870 B.C. Sangara, the Hittite king of Carchemish, submitted to Assur-nazir-pal of Assyria. In 744 B.C. Pisiris of the same city was tributary to Assyria, and in 725 B.C. the same Pisiris attacked Pisiris, and took the city, carrying the Hittites away as captives. The fall of the fortress opened the way for Assyria to Palestine. Hittite princes in this region are, however, mentioned in a text of Nebuchadnezzar as late as 600 B.C. [C.R.C.]

Careah (2 K.25.23), elsewhere Kareah, as R.V. here.

Caria, the S. part of the region which in N.T. is called Asia, and the S.W. part of the peninsula of Asia Minor. In the Roman times the name of Caria was probably less used than previously. In 139 B.C. it is mentioned as a separate district (Mac.15.23); it was then enjoying the privileges of a Roman colony, and was thus a Roman province as such known to the Romans. A little earlier it had been assigned by them to Rhodes, and a little later was incorporated in the province of Asia.

Carmanians (2 Esd.15.30). As referring to conditions about 100 A.D. [see 10.45], this probably alludes to the Parthians of Kerman or, E. Persia, the Hermans of Charchamis (l. 125). The Parthians opposed Trajan on the Assyrian frontier in 116-117 A.D. [C.R.C.]

Car'me (1 Esd.5.25) = Harim, 2.

Car'mel (forest or wood).—1. A city of Judah in the Hebron mountains (Jos.15.55) between Maon and Ziph. Now the hill Carmel, with a conspicuous mediaeval tower, 7 miles S. of Hebron. Saul, on his way from the S. desert to Gilgal, here erected a "hand" or monument (1 Sam.15.12) as a memorial of victory. It was a grazing country (25.5,7,50) for horses and mules. In 166 B.C. by Thoithmes III. (No. 96), and a century later in one of the Amarna letters (Berlin 199).—2. Mount Carmel is the ridge running S.E. for 15 miles, from Haifa and the promontory which it forms at S. end of the bay of Acco. It rises from about 400 ft. at this promontory, to 2,800 ft. near its S.E. limit, where the ground falls rapidly to a plain. The N.E. side are very steep, and the Kishon runs at the foot of the mountain on this side. The S.W. spurs are much longer, stretching to the sea plain. The sea is visible from all parts of the ridge. The mountain is densely clothed with copse of mastic, dwarf oak, hawthorn, and stunted pines. The mountain was once the seat of the Roman Emperor, and Solomon's queen was luxuriating at Carmel, and dark as the "purple" fished in its bay (Can. 7.5). The scene of Elijah's sacrifice is supposed to be at the Mahragah (place of burning), a cliff near the S.E. end of the ridge, 1687 ft. above sea level, and about 15 miles S.W. of Haifa. It is a steep ridge with a precipitous descent. The mount is sacred to the Jews, and the sun rising here is the "daylight" of the book of Psalms. There is a modern village of Carmel near the sea and a national home of Hebrews. [C.R.C.]

Carmelites, a native of Carmel. Applied to Nabul (1 Sam.30.5; 2 Sam.2.3,5,3) and to Hezrai or Hezro (2 Sam.28.3,5; 1 Chr.11.37).

Carmelites, a woman of Carmel. Applied only to Abigail, wife of David (1 Sam.27.3; 1 Chr.3.1) and formerly wife of Nabul. [Carmelite.]

Carmel,—1. The fourth son of Reuben and progenitor of the family of the Carmites (Gen.46.9; Ex.6.14; Num.26.6; 1 Chr.5.3).—2. An Ammon of Judah, father of Acham (Jos.1.18; 1 Chr.2.4,1). The son of Zimri, 1. [Carmelite.]

Carnaim, Carnion. [Ashereth Kairaim.]

Carpenter. [Handicrafts, 3.]

Car'pus, a Christian at Troas (2 Tim.4.13).

Carriage. This word occurs ten times in the text of A.V. and its cognates are often now called "baggage," and represents three Heb. and one Gr. words, (1) kēlīm (1 Sam.17.22 bis; Is.10.28), generally translated "stuff" or "vessels"; i = Gk. ἄκεφος.
Wagons were also used in Egypt (Gen.45.19-27) to convey women and children. Carts carried the corn to the threshing-floor (Am.2.13), and were used even in the desert (Num.7.3); but the "cart wheel" (Is.28.27) is probably a mistranslation. [Harrow.]

Cart-ropes, used figuratively in Is.5.18, where the wicked are said to drag sin after them as it were with cart-ropes. [W.O.E.O.]

Carving. [Handicrafts, 3.]

Caspilhia, a place of uncertain site on the road between Babylon and Jerusalem, on or near the river Ahava (Ezr.8.17).

Cas'leu. The form used in 1 and 2 Mac. for Chisleu. [Months.]

Casluhim (plur. form, sons of Mizraim (Gen.10.14; 1Chr.1.12). They are placed between the Pathrusim and the Caphtorim, and the Philistines are said to have come forth from them, though Ains (9:7) says the Philistines were brought from Caphtor. In 1892 an inscription of Ptolemy XIII. (Auletes) was discovered in the temple of Kom-Ombo, in Upper Egypt, in which a name of a country called Kasultet occurs, but with no indication as to its situation. [F-J-E-I.]}

Casphon (χασφόν, 1Mac.5.36), or Casphor (5.26), one of a group of fortresses in Gilead and S. Bashan (including Carmain in Bashan) taken by Judas Maccabaeus about 164 B.C. The Gk. probably represents a Semitic name Khasphon, and the most probable site is Khisfit, a place important in mediæval history, between the head of the sea of Galilee and 20 miles W. of Carmain (Tell 'Ashdotar). [G.R.C.]

Caspis (κάσπις, 2Mac.12.13), a city with a lake or marsh (ver. 16), described between Jannia and Characa, and as being nearly 100 miles from the latter. The passage seems to refer to the war of Judas Maccabaeus in Edom.

He made a "bridge" (Schedia, 3 Mac. iv. 11) to attack Caspis. The ruin Kuseleh, 4 miles S.W. of Jerusalem, is a possible site, the plain was marshy in spring—and the road thence to Kerak (50 miles in a direct line E.) might be estimated at 100 miles. [C.R.C.]

Cassia, the representative in A.V. of two Heb. words. (1) qiddá occurs in Ex.30.24, as an ingredient in the "oil of holy anointing"; and in Job 12.20 and 22.24. The accounts of cassia as given by ancient authors are confused. It is clear that the Lat. writers understood by the term cassia both the Oriental product now under consideration, and some low, sweet, herbaceous plant; but the Gk. word is limited to the Eastern product. Dioscorides mentions several names of Cassias as produced in Spicy Arabia. One kind is known by the name of wosylettis, or, according to Galen, of mosylos, from the ancient city and promontory Mosyllon, on the coast of Africa and the sea of Bab el Mandeb. This fact probably suggested the "Meuzal" of A.V. marg., but the names are not equivalents. There is a wonderful account of the trade of Tyre in Ezk.27.10, there is considerable variety of reading, but perhaps "both Dan and Javan (= Ionia) belong to ver. 18, and we should then read "From Uzal [in Sheba; LXX. εἰς Άργην; cf. R.V. marg.], they occupied thy fairs," etc. The R.V. (text) "with yam" is not probable. The cassia would be brought from Sheba India to Tyre, and thence exported to Tyre and elsewhere. Cassia is not produced by any trees now found growing in Arabia. Gk. authors sometimes mistakenly regarded products imported into Arabia, and thence exported northwards to other countries, as the natural productions of that country. Cassia may be the case here, though that cassia may have grown there formerly is the more probable if the mosellytis was grown on the shore of Somaliland opposite, and not merely imported to Mosyllon. Cassia may be regarded as inferior cinnamon, chiefly obtained from the bark of Cinnamomum cassia, and called Cassia Cغاز, or Cassia Lingua. Cassia native in Cochín China and belongs to a family including also the bay-tree and the camphor. Harris quotes the opinion of Scacchius, "that by qiddá we are to understand that fragrant composition extracted from a plant which the ancients called costus and it appears from Propertius (lib. iv. deg. 5) that it was used on the altars, together with frankincense." Pliny describes "Cassia or Canell" at length. He says "the blacke is most employed in sweet perfumes and ointments. There is no drague that varieeth more in price than the Canell; for whereas the best will cost fifteen deniers Romane a pound; all the rest a man may buy for five" (xii. 19). His account of their transport and preparation is full of interest. Herodotus (iii. 107, 110) and Diodorus (iii. 3) say that cassia came from the shores of Arabia. (2) qiddah (Ps.45.8 only) is generally supposed to be another term for cassia, in the old version, but the etymology of the Heb. word, favour this interpretation. [H.C.H.]

Castor and Pollux. The Dioscuri, as the Greeks called them, were, according to a later legend, the twin sons of Jupiter and
Leda, and the guardians of sailors. They appear among the signs of the Zodiac as the "Gemini." On coins and other objects of art they are represented as stars shining above a ship, or as youths on horseback, wearing conical caps with stars above their heads. Their sign was sometimes seen on ships, as in Ac.28.11, where a ship of Alexandria is mentioned as bearing the Twin Brothers. [A.R.]

**Cat**, mentioned but once in Scripture (Ba.6.22). The Gk. word αἰλουρος, which refers to a domesticated animal and is commonly translated "cat," really indicates the marten, or marten-cat; and it is not till Byzan-
tine Gk. that we meet with the word κάταρος, or κάττα, used to designate domesticated cats imported from Egypt, where the African wild cat (Felis ocreata, or manulata), was tamed, worshiped, and eventually embalmed, as at Bubastis. Possibly this cat may occur in Syria, where a variety of the European wild cat (Felis catus morea) is met with.

The general opinion is that the passage in Baruch relates to wild cats. [R.L.]

**Catechizing.** The word κατηχεύω occurs 8 times in N.T.: twice in the ordinary sense of giving information (Ac.21.21,24), elsewhere of instruction (Lu.1.4; Ac.18.25; Ro.12.18; 1Cor.14.19; Gal.6.6). In Lu.1.4, Ac.18.25, R.V. makes "teaches" translated "taught by word of mouth," and it evidentially has that meaning, as distinguished from the common word διασκέδασθαι. Teaching cannot help beginning with catechizing, which no doubt underlay the whole system of education in O.T. and N.T. [Education.]

 Cf. Herbart, Science of Education: "From first to last, that form of preparation in which the teacher alone takes part, which subjects the pupil to discourses by him, and which the pupil must silently follow, must be declared inadmissible." The catechetical method, however, was not methodized by those who first used it. It is commonly called the Socratic Method: but we must understand that, in contrast to what is now called 'method,' it rose not in the consciousness of Socrates formally as method—and in abstraction, therefore, from every concrete case—but that it had spontaneously grown up with the very mode and manner of his philosophizing" (Schwegler, History of Philos. xii. 6). The incessant questioning of Socrates has been divided into (1) the method of assumed ignorance which evokes from the person questioned statements by which he is eventually overthrown; (2) the maieutic method:

Socrates likened himself to his mother Phae-
narete, a midwife, because he "helped to birth his pupils' intellectual throes. The subject of the philosopher's catechizing was his own ma-
inance, because it is the foundation of the "method" of a greater teacher even than Socrates. Our Lord was continually asking questions, He catechized more than any other teacher, and His "method"—though entirely unconscious, as in the case of Socrates—may be systematized to a limited extent. (1) He catechized His enemies by questions, so that they were afraid to meet Him. "The baptism of John, whence was it?" "Why did Daniel call him Lord?" "Whose is this image, etc.?" "For which of those (good) works do ye stone me?" The whole passage is a condensed account of an inductive "Socratic" discourse; (2) to be noticed (2) that our Lord enforced the most important doctrines by questions. His first recorded words are two questions, and assert the most important doctrine of all—His divinity. Cf. "Whom do men say that I am?" "Whom do ye say that I am?" "What think ye of Christ?" "Can any man give the Holy Spirit?" "Whence art thou?" "Who shall have the right?" "Who is this?" "Whence shall we buy bread?—This He said to prove him; for He Himself knew what He would do" (Jn.6.5,6). Similar questions were asked concerning the lunatic, "How long is it again since this came upon him?" and Lazarus, "Where have ye laid him?" The catechetical method of our Lord's teaching is equally recorded in all four gospels; the psychology of His teaching is a subject which repays study, and proves that He spake as never man spake. It is not without purpose that the cry of the heathen world was expressed to Him, by the most important representative of it whom He ever met, in a question, "What good man art thou?" [B.R.]

**Caterpillar.** The translation in the A.V. of the Heb. חָסִיל and (in three passages) יֶלֶק. The former occurs in RKh.8.37; 2Chr.6.28; Ps.78.46; Is.53.4; Jl.1.4,2.25; in most cases in connexion with "locust." From this association it has been suggested that the term significa "the young of the locust," refers to immature locusts, or locusts in the pupal and larval conditions, when, although wingless, they are even more destructive to
vegetation than the adult insects. For yeleq, see [R.L.]

Cathua (1Esdr.5:30) =GIDDEE, i.

Cattle. In ancient Heb., as in mod. Eng., several terms were used to designate domesticated cattle, according to sex, age, etc. Although each appears to have had a more or less definite meaning, they are frequently translated indifferently in A.V. as bull, cow, ox, or bullock. Among the more important of these terms, bgdgr (derived from a root signifying to cleave, and hence to plough; or perhaps referring to their cloven hoofs) seems to be properly used for adult cattle of either sex, especially those suitable for ploughing. It is translated bullock in Is.65:25, Ho.12:4, etc., for draught purposes, when they were generally yoked in pairs (Num.7:3; iSam.6:7, etc.), and as beasts of burden (1Chr.12:40). Their flesh was eaten (Deut.14:4; iK.1:9, etc.); they were used in the sacrifices; and the cows supplied milk, butter, etc. (Deut.32:14; Is.7:22). The importance of oxen in these respects are the laws enacted by God for their protection and preservation. The ox that threshed the corn was not to be muzzled, and was to enjoy its rest on the sabbath (Ex.23:12; Deut.5:14). The law prohibiting the slaughter of any clean animal, except as an offering unto the Lord before the tabernacle, during the time that the Israelites abode in the wilderness (Lev.17:1-6), contributed to the preservation of oxen and sheep. It seems clear from Pr.15:17 and iK.4:23 that cattle were sometimes stilled, though this was probably not the rule. Humped cattle, or zebu (bos indicus), were kept in Syria, where there were also breeds of ordinary humpless cattle (bos taurus), one of which was "polled," or hornless. The long-horned humpless cattle of ancient Egypt have been referred to a distinct species by the present writer, under the name of Bos aegyptiacus. The domesticated Indian buffalo (bos [Bubalus] bubalis), now common in Syria and Palestine, appears to have been unknown there in early Biblical times. For a full account of the various breeds of cattle kept in Syria and the neighbouring countries in Biblical times, see Dr. J. U. Dürst's Die Kinder von Babyloniem, Assyrien, Aegypten (Berlin, 1899).

The term bgdgr also occurs for a stolen ox that had been killed or sold again for a stolen sheep (Ex.22:21-23). But among the inferior oxen, the closest parallel for "unicorn" is the A.V. translation of r*em. [Calf; Unicorn.]

The law, by providing five-fold restitution for a stolen ox that had been killed or sold again for a stolen sheep (Ex.22:21-23), plainly shows the superior relative importance of the ox, which was used for agricultural purposes. See Maine, Early History of Institutions, 147 ff.; Post, Grundris der Ethnologische Jurisprudenz, ii. 421-422; Encycl. Bibl. s.v.; and cf. the use of mikneh for cattle. [H.M.; FIRSTLINGS.]

Caul (shābhis). Only used in Is.8:18 (in plur.). It was a little glass ornament (strictly speaking an amulet) worn at the neck, like a locket. A.V. also renders the Heb. yōthereth by "caul." This was a fatty substance which hung to the liver, and is referred to in connexion with the sacrificial animals (Ex.29:13; Lev.7:4-11). Caul was also the epithet of the horned goat (segôr) in Ho.13:8, where it is figuratively used, and means the covering of (lit. something that encloses) the heart. [W.O.E.O.]

Cave. (1) ne*drâ. The chalky limestone of which the rocks of Syria and Palestine chiefly consist contains, like all limestone formations, a vast number of caverns and natural fissures, many of which have been artificially enlarged and adapted to purposes both of shelter and defence. This has given rise to the use of a large number of words in the Scriptures to denote caves, holes, and fissures, some of them giving names to places in their neighbourhood. These we may mention: (2) har, or hór, "a hole." From this come (a) the name of the Horites of mount Seir, a Trojan horse race spoken of by Strabo, and of whom remains have been found in recent excavations in Palestine (Gen.14:6,36;21; Deut.2:12; Job 50:6); (b) Haurân (Ezk.47:16,18); (c) The "two towns" of Horonaim (Ho.13:16); (d) the town Horonaim (Is.15:5); (3) hâqâdwîn, "places of refuge in rocks" for birds (Can.2.14; Ob.3; A.V. clefts); (4) minhârâ (A.V. den), a ravine through which water flows (Judg.6:2). The most remarkable cave noticed in Scripture are: (1) That in which Lot dwelt after the destruction of Sodom (Gen.19:30); (2) Machpelah (23:17); (3) Makkedah (Jos.10:16); (4) Adullam (iSam.22:1); (5) En-gedi (24:3); (6) Obadiah's cave (iK.18:4); (7) Elijah's cave in Horeb (19:9); (8,9) The rock sepulchres of Lazarus and of our Lord (Jo.11:58; Mt.27:60). The existing caverns near the N.E. end of the Dead Sea serve fully to justify the mention of a cave as the place of Lot's retirement, as those on the W. side agree both in situation and in name with the caves of En-gedi. There is also frequent mention in O.T. of caves generally as places of refuge. Thus the Israelites are said to have taken refuge from the Philistines in "holes" (iSam.14:11), and in the time of Gideon from the Midianites in dens and caves and strongholds, such as abound in the mountain region of Manasseh (Judg.6:2). Cf. Heb.11:38. Nor is Adullam the only
Cedar

In Palestine where banditti made their accosted haunt. Josephus (15 Ant. x. 1; 1 Wars xvi. 2-4) speaks of the robber inhabitants of Galilee and of Trachonitis, who lived in large numbers and dwellers were known by Herod. The caves which lie beneath and around so many of the Jewish cities formed also the last hiding-places of the Jewish leaders in the war with the Romans; and in modern and ancient times alike, the rock caverns of Palestine and the adjacent regions are curiously formed by the force of the rocky soil of so large a portion of the Holy Land almost forbids interment, except in caves either natural or hewn from the rock. Accordingly, numerous sites are shown in Palestine and adjacent lands of reputed sepultures of saints and heroes of O.T. and N.T., venerated both by Christians and Mohammedans.

Cedron. There is little doubt that the Heb. 'erez, invariably rendered "cedar" by A.V., is, in most passages, a correct rendering. The 'eres (Arab. әrәs), from a root signifying "firmly rooted and strong tree," is the cedar of Lebanon (Cedrus libani) better suited for ship-masts than the Cedrus libani. Probably both these trees, and also the Juniperus excelsa, were included under the term 'erez; but undoubtedly it especially denotes the cedar of Lebanon, the firmest and grandest of the conifers. The cedar is found in various parts of Syria [LEBANON], but the best-known grove is in a valley of the Lebanon range, viz. that of the Kedisha River, which flows W. from near the highest point of the range to the Mediterranean at Tripoli. This grove is at the very upper part of the valley, about 15 miles from the sea, 6,500 ft. above that level, and above all other areas it is confined. The trees are to a small portion of a range of low, stony, rounded hills, perhaps 60 to 100 ft. above the flow of the valley. These hills Dr. Hooker believed to be old moraines. A true Juniper (J. phoenicea?) occurs in Edom in several places, e.g. close to the summit of Mount Hor (Jebel Haroun); and the present writer has seen groves of small trees of it in more than one place along the brow of the Edomitic escarpment above the 'Arabah. No doubt it was incomparably commoner in Biblical times, since all available wood disappears before the Arabs for fuel in S. Palestine and Sinai. This juniper was probably the cedar wood "cast into the midst of the burning "as the prophecy in Nahum has it. Juniper was held in the highest repute amongst woods for burning to purify the air of all corruptions and infections. Vergil is supposed to mean Juniper in "Disce et odoratum stabulis ascendere Cedrum" (Georgics). It was burnt among the ancients, to expel evil spirits, as it still is in many countries. Pliny says: "The Juniper hath the same property that the Cedar has as a preservative against rottenness, if its oil be rubbed on any wood"—thus recognizing their distinctness. [H.C.H.]

Cedron.—I. A place fortified by Cendebaua under the orders of Antiochus (Sidetes), as a vassal station from which to command the roads of Judaea. (1Mac. 15.39, 41,16.8.) It was not far from Jamnia (Jabne), and was probably the modern Quttah, 5 miles E. of Yebnah.—2. Jn.18.17 only. [Kidron.]

Celen (1Esdr.5.15). Sons of Celen and Azetas returned with Zerubbabel from Babylon. The lists of Ezra and Nehemiah have no names corresponding to these.

Ceiling. [CEILING.]

Celosyria. [COELOSYRIA.]

Cen'chreaa (R.V. Cenchreae) was the E. harbour of Corinth (i.e. its harbour on the Saronic Gulf), and the emporium of its trade with the Asiatic shores of the Mediterranean, as Lecceum (Litraki) on the Corinthian Gulf was with Italy and the W. St. Paul sailed from Cenchreæ (Ac.18.18) on his return to Syria from his second missionary journey;

and when he wrote his epistle to the Romans in the course of the third journey, an organized church seems to have existed there (Ro.16.1). [Phoëbe.] The distance of Cenchreæ from Corinth was 70 stadia or about 9 miles. The modern village of Kikries retains the ancient name, which is conjectured by Dr. Sibthorpe to be derived from the millet (kîkîria), which still grows there.

Cendebeus, accurately Cendebeaus (as R.V.), a general left by Antiochus VII. in command of the sea-board of Palestine (1Mac.15.38, etc.) after the defeat of Tryphon 138 B.C. He fortified Kedron and harassed the Jews, but was defeated by Simon the Hasmonean, with great loss (1Mac.16.1-10).

Censer. A bowl-shaped vessel for burning incense. It was filled with live coals from off the altar, and on this fire was put the incense. The censer was then carried to the altar of incense and placed upon it. This appears to have been its general use, since incense was to be burned night and morning on the altar of incense (Ex.30.7,8,40.26,27). Censer is the rendering of two Heb. words. (1) msgârâth (2Chr.26.19; Ezk.8.11). The form mgallîthôth occurs 2Chr.30.14, and is rendered "altars for incense." (R.V. marg. vessels; Oxf. for censers, "incense-altars"). The censer probably had a stand or flat base. (2) nāhat̄, rendered (a) censer (Lev.10.1,16.12 [ritual for
Day of Atonement; Num. 16.6,17,18,37-39, 46. These were of brass, except the one for use on the Day of Atonement, which was of gold, and had a handle (Yoma iv. 4). Also (b) firepans, of brass in the tabernacle and of pure gold in the temple. The word occurs in this sense in lists of utensils intended for the service of the altar of burnt-offerings (Ex. 27.3, 38. 3); Num. 4.14; Ezek. 8.26 (cf. the numbers 15; Je. 52.19). Also (c) snuff-disks of pure gold, "into which the snuffings of the lamps were put" (Keil, Bib. Arch.); mentioned in connexion with the golden candlestick (Ex. 25. 38, 37-33; Num. 4.9). In Heb. 9.4, θυμίαμαρατω is rendered "censer" (R.V. marg. altar of incense). The former is probably correct. θυμίαμαρατω is the LXX. for my' differently in 2Chr. 26.19, Ezk. 8.11. [H.H.]

Census. I. Moses laid down the law (Ex. 30.12,13) that whenever the people were numbered, an offering of half a shekel should be made by every man above 20 years of age, by way of atonement or propitiation— Instances of numbering recorded in O.T. (1) Under the express direction of God (Ex. 38.26), in the 3rd or 4th month after the Exodus during the encampment at Sinai, chiefly to raise money for the tabernacle. The numbers then amounted to 603,550 men. (2) In the 2nd month of the 2nd year after the Exodus (Num. 1.2-4). This census was taken at the same time as the number of fighting men from the age of 20 to 50; (b) the amount of the redemption offering due on account of all the firstborn both of persons and cattle. The Levites, numbering 22,000, were taken in lieu of the 22,273 firstborn males of the rest of Israel, and for the surplus of 273 a money-payment was made (Ex. 38.26). (3) Thirty-eight years afterwards, previous to the entrance into Canaan, the total number, excepting the Levites, amounted to 601,730 males—a decrease of 1,820. (4) The first formal numbering of the people as an established nation took place in the reign of David. This was probably necessary because the protracted campaigns of David's foreign wars made it impossible for the whole male population capable of bearing arms, who formerly acted as the army of Israel, to serve for so long away from home. The military nature of this census is shown by its execution being entrusted to Jebab and his captains; but it was no doubt intended also as a basis for the taxation required for an organized government. This measure was viewed with suspicion, and its instigation is accredited to evil influence—"Satan stood up to provoke Israel"—whilst the pestilence which followed was regarded both by David and the people as a sign of divine displeasure. The Chronicler presupposes (1Chr. 23-27) records of numbers and divisions of the people, such as show an elaborately organized system of religious, civil, and military officials, which some consider far in advance of the time of David, though fragments of old records may be incorporated in his work; but we may well assume that the system of taxation under later kings followed upon the registration inaugurated by David. The numbers given are: men of Israel above 20 years of age 800,000, Judah 500,000, total 1,300,000. 1 Chr. gives Israel 1,100,000, and Judah 470,000, total 1,570,000; but adds that Zebulon and Benjamin were not numbered (1 Chr. 21.6, 27-24). (5) The census of David was completed by Solomon, by the numbering of the foreigners and remnants of the conquered nations resident within Palestine. They totalled 153,600, and were employed in forced labor. These and his great architectural works (1 Chr. 4-6; 27; 1 K. 5.15-9, 20, 21; 1 Chr. 22.2; 2 Chr. 2, 12, 18). Between this time and the Captivity mention is made of the numbers of armies under various kings of Israel and Judah. [Number; Palestine.] For N.T. references to the Roman census (Lu. 2.1; Ac. 5.37), see Taxation. [S.N.S.]

Centurion. [Army.]

Cephas. [Peter.]

Cerás (1 Esd. 5.29) = Keros.

Cetab. Sons of Cetab were Nethinim who returned with Zerubbabel (1 Esd. 5.30). No corresponding name is found in the lists of Ezra and Nehemiah.

Cha'bris, son of Gothoniel, and an "ancient" (αρχαίος) of Bethulia (Jth. 6.15, 8.10, 10.6).

Chadías, an unknown place in Judaea. Perhaps Hadid, but the text is very corrupt. "They of Chadías and Anmudid" (1 Esd. 5.20) returned from Babylon with Zerubbabel. There are no corresponding names in (1 Esd. 5.9) Nehemiah.

Chaff. The Heb. words rendered chaff in A.V. have not precisely the same meaning: ḫrashash (Arab. ḥhashish), "grass" withered by heat, occurs twice only (Is. 5.24, 33.11). môg is chaff separated by winnowing from the wheat. This could not be done in the heat. levêb rendered straw in Ex. 5.7, 10, 11, etc., and stubble in Job 21.18, means straw cut into short portions, in which state it was mixed with the mud of which bricks were made to give it consistency; as the Arab. tilâm is still used, as well as fodder with barley. In Ec. 4.28 mention is made of a mixed fodder for horses and camels of barley and tebên. The word "fav" (Arab. āvōd) occurs in Dan. 2.35 for "chaff of the summer threshing-floors." [C.R.C.]

Chain. Chains were used (1) as badges of office; (2) for ornament; (3) for confining prisoners. (1) The gold chain placed about Joseph's neck (Gen. 41.42), and that promised to Daniel (Dan. 5.7), are instances of the first use. In Egypt it was one of the insignia of a judge, who wore an image of truth attached to it: it was also worn by the prime minister. In Persia it was considered not only as a mark of royal favour, but a token of investiture. In Ezek. 16.12 it is regarded as a symbol of sovereignty. (2) Chains for ornamental purposes were worn both by men and women in
NECKLACE OF GOLD, CARNELIAN, LAPIZ-LAZULI, AND FELSPAR BEADS, COWRIE SHELLS, AND SYMBOLIC FIGURES. (Brit. Mus.)

NECKLACE OF CARNELIAN, AMETHYST, JASPER, AND QUARTZ BEADS, INCLUDING TWO SYMBOLIC EYES. (Brit. Mus.)

GOLD NECKLACE OF AN EGYPTIAN QUEEN OF ABOUT THE TIME OF JOSEPH. p. 142]
many parts of Europe and Asia, and probably among the Hebrews (Pr.1.9). The necklace consisted of pearls, corals, glass beads, metal discs, etc. Besides the necklace, other chains were worn (Jth.10.4), hanging down as far as the waist, or even lower. Some were adorned with pieces of metal, shaped in the form of the moon ("round tires like the moon." A.V.; "crescents," R.V.; Is.3.18). The Midianites adorned the necks of their camels with these (Judg.8.21,26), and camels in Palestine may still be seen with bone crescents tied to their necks. Step-chains were attached to the ankle-rings, which shortened the step and produced a mincing gait (3.16,18). (3) The means adopted for confining prisoners among the Jews were fetters similar to our handcuffs (Judg.16.21; 2Sam.3.34; 2K.25.7; Je.39.7). Among the Romans, the prisoner was handcuffed to one, and occasionally to two guards (Ac.12.6;7;21.33).

**Chalcedony** (Rev.21:19 only). The name is applied in modern mineralogy to minutely crystalline silica, of a milky or very pale brown colour, in fact a variety of agate, generally of little value as a gem, but often used, after classic times, for carvings, like some other kinds of agate. Pliny does not speak of it as a separate stone, but mentions Calchodon smaragdi (Nat. Hist. xxxvii. 18) as an impure variety of emerald obtained from copper-mines in Chaledon. This, also referred to by Theophrastus (De Lapid. § 25), was evidently (King. Precious Stones, p. 157) diopside, a crystalline hydrous silicate of copper, green in colour. [T.B.]
CHALEANS, CHALDEES

much of the land being dry and waste for want of a proper system of irrigation, which would probably also drain the marshes. [BABEL; CHALDEANS.]

Chaldeans, Chaldees. These words, like the word Chaldea, do not occur in the Heb. of O.T. (which always has kadosim; 77 times altogether, of which 46 are in Jeremiah), and the Eng. trans. comes from the LXX. The term is used for the people of the S. portion of Babylonia but designating, in later times, the inhabitants of Babylonia in general, including the tract anciently called Shinar. In Dan. 5:30, 9:1 they are classed with magicians and astrologers, and seem also to form a kind of priestly class, with a "tongue" and "learning" of their own (1:4). The Gk. authors make the same distinction. In the Assyrian inscriptions, "Chaldean" is the ordinary designation of certain S. Babylonian tribes associated with the Arameans, and it is thought that Ur of the Chaldees, if it be the modern Mucur, was so called from its southern position on the Euphrates (it lies near its junction with the Shat Al-Hai). To all appearance this district was also referred to by the Babylonians and Assyrans as "the Land of the Sea," because of its position at the head of the Persian Gulf. This tract seems to have attained prominence about 2000 B.C., when Hammurabi's son and successor, Samsi-Iluna, with his son Abisi (Abisu', Ebisu'), came into conflict with Ilu-ma-ilu (Anman), who apparently ruled there. The name mai Kaldiu, "the country Chaldea," is first mentioned by the Assyrian king Adad-nirari I11., c. 810 B.C. Merodach-baladan, whose tribe was Bit-Yakin, and who belonged to "the Land of the Sea," is described by Sargon as a Chaldean, the nationality given by Sennacherib to Suseb, the Nergal-ulézib (Rhegeblos) of the Babylonian Chronicle. The name Chaldean soon spread to the whole of S. Babylonia, and thence to the northern provinces also. The Chaldean kings of Babylon bear names indistinguishable from those of the true Babylonians, so that the suggestion that Nebuchadnezzar was of Chaldean origin may be correct, and may account for the term being applied to the whole Babylonian nation. The language of the Chaldeans seems to have been similar to Biblical "Chaldee." The use of Chaldean to indicate one learned in Babylonian lore must have been due to its application to the inhabitants of Babylonia in general. According to Strabo, the chief seats of Chaldean learning were Borsippa and Ur, and Pliny speaks of Babylon and Sippara. These towns were not within the boundaries of Chaldea in its restricted sense, and Babylonian scribes or priests must be intended. Their special tongue was, therefore, the ancient Sumerian language, and their learning that derived from its literature. To the centres of learning mentioned may be added Nippur, Erech, and probably other towns. Chaldeans "with the meaning "wise men" does not occur in Assyro-Babylonian literature. The period being taken into consideration this Babylonian reputation for learning was well deserved. [SEMITIC LANGUAGES.]

Chamberlain. Erastus, "the chamberlain [R.V. treasurer] of the city" of Corinth (Ro. 16:23), held an office which was apparently that of public treasurer, or arcarius, as the Vulg. renders his title. These arcarii were inferior magistrates, who had the charge of the public chest (arcæ publicæ), and were under the authority of the senate. They kept the accounts of the public revenues. The office held by Blastus, "the king's chamberlain" (Ac. 12:20), was entirely different: it was a post of honour which involved great intimacy and influence with the king. The marg. of A.V. reads "that was over the king's bedchamber." For "chamberlain" in O.T., see Eunuch.

Chameleon. The translation of the Heb. 'kōb, used in Lev. 11:30, as the name of some unclean creature, is generally regarded as incorrect. It has been suggested—and Tristram accepts the view—that the large Syrian and Egyptian lizards known, from a misconception of the meaning of their Arabic name waran or uran, as monitors (Varanus) are those indicated. One species (V. griseus) common in Egypt attains a length of 3 or 4 ft., but a second (V. salvator) grows to at least 6 ft., and is, in fact, the largest of all lizards. These lizards are often incorrectly called iguanas. The chameleon itself may perhaps be the animal indicated in Lev. 11:30 by the term tinshedemeth, there translated "mole" in the A.V., although another Heb. word is elsewhere rendered as that animal. The reason for believing that "tinshedemeth" indicates the chameleon is that the meaning of this word is "to breathe," in allusion, it is suggested, to the old fable that this reptile lives on air. Nothing more definite can be affirmed in either case. [Mole.] [R.L.]
CHAMOIS (Heb. zemer). In the list of animals allowed for food (Deut.14.5) the zemer, a term translated in the LXX., Vulg., and some other versions "camelopard" or "giraffe," and in A.V. "chamois." If, as is believed, the word is related to the Arab. zaman, it indicates some leaping animal. As the chamois is unknown E. of the Taurus and Caucasus, it cannot be the species intended. It has been suggested that the N. African wild sheep, or udad (Ovis lervia), is the animal referred to; but against this is the fact that this species is unknown in Asia. The udad is an aberrant, foxy red sheep, with a fringe of long hair on the throat and chest; and in some degree serves to connect the more typical wild sheep with the goats. zemer might indicate the wild goat, or possibly the gazelle, but other Heb. words have been assigned to those animals. [PALESTINE.] [R.L.]

Cha'na'an, the form in which CANAAN appears in A.V. of Apoc. and N.T. (Jth.5.3ff. ; Ba.3.22 ; Sus.36 ; 1Mac.9.37 ; Ac.7.11,15,19).

Chanaanite (or CANAANITE (Jth.5.16)).

Channun'eus (1Es.8.48) perhaps = Merari (Ezr.8.19).

Chapiter, the capital of a pillar. The A.V. so renders three Heb. words. (1) köthereth, "crown" or "circle," applied to pillars (K. 7.7,20,24,41,42 ; 2K.25.17 ; 2Chr.4.12,13 ; Je. 55.22), and also to the ornamental rings of the temple lavers (1K.7.31). (2) çepheth, "ornament" of a pillar (2Chr.3.15). (3) rosh, "head" (Ex.36.38,37.19,21,28), applied to the pillars of the tabernacle; the word is otherwise rendered top in connexion with pillars (K.17.6,19,22). The capitals of Solomon's bronze pillars were adorned with "checker work" or "net work" (szbkhbd) probably in low relief [LATTICE, 3], and these designs were finished above and below by rows of pomegranates (K.17.7-20,41,42). [C.R.C.]

Charaath'alan (R.V. Charaath'alan) is given in 1Es.5.36 as the name of a leader under Zerubbabel; but is probably a corruption of two place-names, Cherub and Addan (cf. Ezr.2.59).

CHARIOT 145

Characa (2Mac.12.17). Perhaps Kerah, E. of the Dead Sea. [CASPIAN.] [C.R.C.]

Charashim, Valley of (1Chr.4.14). Mentioned with Lod and Ono (Ne.11.33). The R.V. has "Ge-harashim" in 1Chr.4.14, "Valley of Craftsmen" (marg. R.V. Ge-harashim) in Ne.11.35, or perhaps "of ploughmen," or "wood-cutters." Probably the town is represented by the ruin Hirsha, 12 ½ miles S.E. of Lydda, ½ E. of Yalo (Surv. W. Pal. iii. p. 36). [C.R.C.]

Charchamis.' [CARCHAMIS.]

Charchash' (2Chr.38.20) = Carchemish (as R.V.).

Char'cus (1Es.5.32) = Barkos.

Char'ea (1Es.5.32) = Harsha.

Charger. A vessel used in the tabernacle for presenting offerings of fine flour with oil (Num.7.79). The "chariot" of gold, described in Numbers are said to have been of silver, and to have weighed each 130 shekels, or 87 oz. Judging from the analogous word in Syriac, the vessel was deep, acorn-shaped. Quite different was the charger mentioned in Mt.14.8, which was probably a shallow dish, yet deep enough to hold the wheaten bread which must have been dripping from the head of the Baptist. [W.O.E.O.]

Chariot. (1) rekhebb, sometimes including the horses (2Sam.8.10,18). (2) r'khbdh, a chariot or horse (Ps.104.3). (3) merkbhbdh is the most usual word, occurring 42 times in O.T.; it is used, e.g., of the chariots of the Egyptians (Ex.14.25,13-4), of the Canaanites (Jos.11.9), and of the Assyrians (Na.3.2). (4) merkbhbdh (only in Lev.15.9 [E.V. saddle], 1K.4.26, and Can.3.10) does not differ radically from merkbhbdh, but a distinction may be discerned in their use that merkbhbdh represents rather the seat in the chariot, merkbhbdh the chariot itself. (5) dghdld (Ps.46.9[10],11,19; Can.3.9). Chariots were used mostly for war-like purposes. [ARMY.] The earliest mention of them in Scripture is in Egypt, where Joseph, as a mark of distinction, was placed in Pharaoh's second chariot (Gen.41.43), and went later in his own chariot to meet his father on his way from Canaan (46.29). In the time of Jacob chariots also formed a part (50.9). The next mention of Egyptian chariots is for a warlike purpose (Ex.14.7). Pharaoh in pursuing Israel took with him 600 chariots. The Canaanites of the valleys of Palestine successfully resisted the Israelites in consequence of the number of their chariots of iron (1Chr.12.18; Judg.4.1); and the Canaanites, besides those of which the Israelites had 900 chariots (Judg.4.3), David took from Hadadezer, king of Zobah, 1,000 chariots (2Sam.8.4), and a little later 700 from the Syrians (10.18), who in order to recover their ground collected 32,000 chariots (1Chr.19.7). Up to this time the Israelites possessed few or no chariots. But Solomon raised an army and obtained a force of 1,400 chariots (1K.10.26) by taxation on certain cities, agreeably to Eastern custom in such matters (1K.9.19,10.25; Xen. Anab. i. 4. 9). The chariots and the horses were both imported chiefly from Egypt, and each chariot cost 600 shekels of silver, and each
horse 150 (1K.10.29). From this time the possession of chariots was regarded as most important, and they, as well as horses, appear to have been still supplied mainly from Egypt (1K.22.34 ; 2K.9.16,21). Commonly two persons, sometimes three, rode in the chariot (2K.9.20,24; 1K.22.34; Ac.8.38), the third being employed to carry the state umbrella. A second chariot usually accompanied the king to battle to be used in case of necessity (2Chr.35.24). Chariots are frequently alluded to as typical of power (Ps.20.7,104,3; Je.51.21; Zech.6.1). Chariots of other nations are mentioned, as of Assyria (2K.19.23; Ezek.23.24), somewhat technical connotation of giving to the poor is of late acquisition, and quite contradicted by St. Paul, who considers the possibility of bestowing all one's goods on the poor, and yet being destitute of this virtue. It is from 1Cor.13 that all our ideas of this "greatest of gifts" are derived. This charity is more important than eloquence, prophecy, knowledge, faith, philanthropy, or the martyr's zeal; because it is a motive, in the absence of which all these things are destitute of merit. This is quite in accordance with modern Ethics. Its manifestation is set out in v. 4-8. It is long-suffering, patient, hopeful, enduring; neither envious, proud, nor cynical. It is the one thing which shall never fail, but shall be able to endure the searching and perfect light of heaven. 2Pe.1.7 bids "charity" be added to "brotherly kindness," and 1Pe.4.8 speaks of it as "covering a multitude of sins." [B.F.S.]

Char'mis, son of Melchiel, an ancient (περίφοτερος) of Bethulia (Jud.6.15; 8.10; 10.6).

Char'ran (Ac.7.2,4) = Haran.

Chas'eba, named in 1 Esd.5.31 only among those whose sons returned with Zerubbabel.

Chebar,' a river or canal in "the land of the Chaldeans" (Ezek.1.3), on the banks of which Jews were located during the Captivity, and where Ezekiel saw his earlier visions (Ezek.1.3,5,15,23, etc.). It is often identified with the Habor, or river of Gozan, whether Israelites were removed by the Assyrians (2K.17.6). The Chebar of Ezekiel, however, must be looked for in Babylonia, and is probably the nahr Kabari, a canal near Niffer (Calneh, Gen.10.10), as suggested by Hilprecht. Its course has still to be determined. See Hilprecht and Clay. Business-DocumentsofChaldean, Persian, and Syriac, pp. 636-637. Pennsylvania Expedition, vol. ix. p. 28 ; Clay, Light on O.T. from Babyl., p. 405. [T.G.P.]

Chedorlaomer, king of Elam in the time of Abraham, who with three vassal princes suppressed a rebellion of the Canaanites in the neighbourhood of the Dead Sea (Gen.14.1-16). Babylonia had been conquered by the Elamites, northern Babylonia
with its capital Babylon being left to the young king Hammurabi or Ammurapi (Amar- rael), while southern Babylon with its capital Babylon and whether the Elamite prince Eri-Aku or Arioch, whose father was appointed governor of Canaan. Canaan had long been considered a Babylonia province, and was therefore claimed by Elam after the conquest of Babylonia. The name of Chedorlaimon appears as Kudur-Lagamar, "the hand of the goddess Lagamar," in the cuneiform texts— an important confirmation of the Biblical story of Abraham. Some time after the Canaanite campaign Hammurabi succeeded in shaking off the Elamite yoke.

【H.A.S.】

Cheese. In Palestine cheese is still made, and the curd, sour curd cheese when milk is plentiful in spring. The latter may be intended in Pr.30.33. [Butler.] The three Heb. words rendered "cheese" by A.V. are īkkūt (the object of which might mean cream, or curds, or the dried buttermilk of the Arabs). (Burckhardt, Notes on the Bedouins, i. 60.) [C.R.C.]

Chelal', one of those who put away their foreign wives (Ezr.10.30).

Cheici'as (Hekias, R.V.).—1. Ancestor of Gezur (1 Chr.7.1).—2. = Hilkiah, father of Joachim, the high-priest in the time of Josiah (2 Chr.34.18).—3. Father of Susanna (Sus.2.29,63).

Chel'lians, The (Jth.2.23), inhabitants of Chellus.

Chel'luh, one who had married a foreign wife (Ezr.10.35).

Chell'us (χελλον; Jth.1.9), mentioned with Betan'kah and Kades, and the "river of Egypt." Apparently, as Rendel suggests (Pal. Illust. ii. p. 717), the later Elusa (now Khalaasah), 8 miles S.W. of Beer-sheba, named after an Arab goddess still adored there in 4th cent. A.D. (See Robinson, Bib. Res. i. pp. 201, 202.) [C.R.C.]

Chele'lod. "Many nations of the sons of Cheleod" were among those who obeyed the summons of Nabuchodonosor to his war with Arphaxad (1 Chr.5.1). The word is apparently corrupt. Variant readings are Cheleoul, Chelatouda, Cheleou; Svt. Chaldeans.

Chele'ub.—1. A descendant of Judah (1 Chr.4.4. 26). The father of Ezki (1 Chr.27.26). Chelub, son of Hezron, one of the chief families of Judah. The name occurs in 1 Chr.4.29 only, and comparing this with 2 Chr. 2.18, 42, it appears to be but another form of Caleb.

Chemarams' (Zeph.1.4, cf. margin of 2 K. 23.5; Ho.10.3), probably a word of foreign origin, and rendered "a band of priest-scribes who conducted false worship. In Syria the corresponding word is used in Judg.17.5,12 of Micah's priest, in Is.61.6 of the priests of the true God, and in Heb.2.17 of Christ Himself. Kimchi derived it from a root meaning " to be black," because the idolatrous priests wore black garments, and the verb was used to mean " to be sad," as if the monk or priest were an ascetic. The versions of Ezk.31.15 show how these two ideas run together: Pesh. kemirā, LXX. δοκοσαρχεν, Vulg. contradistinctus est, E.V. caused to mourn; cf. art. Mourning. [C.R.D.B.]

Chemosh', the national deity of the Moabitites (Num.24.17; 2 K.17.13, 14). In 2 K.11.24 he also appears as the god of the Ammonites. Solomon introduced, and Josiah abolished, the worship of Chemosh at Jerusalem (1 K.11.7; 2 K.23.13). In the inscription of the Moabite king, Mesha, language is applied to him not unlike that used of Jehovah in O.T. [Moab.

Chena'anah. —1. Head of a Benjamite house (1 Chr.7.10). [Jediael, 1; Bilhan.].—2. Father or ancestor of Zedekiah the false prophet (1 K.22.11,24; 2 Chr.18.10,23).

Chenani, a Levite who assisted at the solemn purification of the people (Ne.9.4).

Chen'ani, one of those who were appointed to sing songs (Ezr.10.35). The name appears in connexion with the Levites and priests (1 K.8.67; 2 K.23.13, 17; Ezr.10.35; etc.).—2. Father or ancestor of Zedekiah the false prophet (1 K.22.11,24; 2 Chr.18.10,23).

Chephar-ha'ammonai (R.V. Chephar- ammon); Jos.18.24, a town of Benjamin. Now the ruin Keif "Ana, 3 miles N. of Bethel, on the extreme W. of the Jordan, in the N. of the plain, of which might mean cream, or curds, or the dried buttermilk of the Arabs. (Burckhardt, Notes on the Bedouins, i. 60.) [C.R.C.]

Cher'e′n, one of the sons of Dishon the Horite. "Duke" (Gen.36.21,51).—2. Governor of Gaza, slain there by the Hobez-maonoaens (2 Mac.10.32,37).—2. A surname of the tribe of Asher (1 Chr.7.14).

Che'reth, governor of Gaza, slain there by the Hemari, or Hasmoneans (2 Mac.10.32,37). [C.R.C.]

Che'ne'ths (Ezk.25.16). The plur. form of the word elsewhere rendered Cherethites.

Cherethites and Pel'ethites, the body-guards of David (2 Sam.8.18,15.18,20.7,23; 1 K.1.38,44; 1 Chr.18.17). The Cherethites are mentioned separately in 1 Sam.30.14, Zeph.2.5; Ezk.25.16; twice in connexion with the Philistines. From this it has been inferred that "Pelethites" is another form of "Philistines." As the original home of the Philistines was Capharot (Cret., Am.9.7; Je.47.4), it is possible that the form "Cherethites" is a contraction of Capharot. The Cherethites and Pelethites were, according to Genesis, the executioners and runners of the kings of Judah; but linguistic and other considerations seem fatal to this theory, though the "runners," rāṭim, occur after kārī in both passages. [Foot.]

Most probably the names are gentilic, as the Cherethites are a nation dwelling on the S. coast of Palestine, in proximity to the Philistines. The commander of the foreign mercenaries of David, who is quite distinct from David's captain of the host, was Benaijah, the son of Jehoiada (2 Sam.8.18,20.23). He was promoted to the latter office by Solomon on the death of Joab (1 K.2.35). David evidently relied greatly on the fidelity of his non-Israelite troops, and the Cherethites and Pel'ethites remained ever faithful, it is said, to Solomon, both in the rebellions of Absalom and Sheba (2 Sam.15.20), and in the troubles concerning the accession of Solomon (1 K.1.11). The Cherethites and Pe-
lethites are apparently distinguished from the Gittite troops of David, commanded by Ittai of Gath (2Sam.15.18), and from the “mighty men” (2Sam.20.7). This alien body-guard was probably continued by the kings of Judah, since (in the absence of a Hebrew name) Jeboamiah is able to rely on the fidelity of the kârî to the dynasty in the restoration of Joash (2K.11.4).

Perhaps they guarded the temple, for their presence in the sanctuary (2K.11) seems to excite no comment; but see the parallel passage in 2Chr.23. It has been supposed that “those that leap on the threshold " (Zeph.1.9) were Philistine guards of the temple (cf. 1Sam.5.5); and that Ezekiel (44.6ff.) alludes to their presence there. After the return from captivity the guards of the temple were Levites. The Egyptian kings of the 20th and 21st dynasties had in their service mercenaries of a nation conquered by Karshuh, and with them the brethren of the sea, whom some writers have identified with the Cherethites. See CAPPADOCIA, CRETÉ, and PELETH for another view which would make the Cherethites and Pelethites Israelite troops.

Chereth, The brook, or “torrent” without a name.” It should be noted that the Cherith is (1K.17.3,5,7). This term often means “west of.” The site is unknown. In 1321 (Marino Sanudo) it was shown at Phasaelis (Fisâril), 11 miles N. of Jericho, where a spring exists. In the Onomasticon it is placed “beyond Jordan,” but does not appear to have been known to Eusebius or Jerome in 4th cent. [C.R.C.]

Cherub, Cherubim. These were looked upon, in the Heb. view, as celestial beings whose function it was to attend upon the divine presence of the Most High God, and to whom certain tasks were allotted. It has been usual to connect them, in the religious symbolism of the Bible, with the nature-forms which find expression in the art and sculpture of Assyria, Egypt, and Persia. From such sources, doubtless, certain notions may have been derived; yet it is not easy to say definitely what conception the Hebrew mind had of the form of the cherubim. The sphinx had its prototypes in Babylonian mythology; the winged bulls, having human heads, would suggest might, wisdom, and the power of flight, together with other attributes of the deity. “Both name and thing,” it is alleged, “were derived from a primitive stage of religious thought in western Asia.” If so, it is easy to appreciate the Hebrew reluctance to describe definitely either the duty or the appearance of the cherubim.

In Gen.3.24, cherubim were placed at the E. of the garden of Eden, to keep the way of the tree of life. In Ps.18.10 we read, “He rode upon a cherub, and did fly; yea, he did fly upon the wings of the wind.” The cherub in this passage has been described as “the mighty winged spirit of the storm.” The king of Tyre is, in Ezk.28.14, compared thus: “Thou art the anointed cherub that covereth ;” or, as one upon the holy mountain, in the very presence of the cherubim. It seems the most luminous description of the prophet’s vision of the cherubim: “The sound of the cherubim’s wings was heard even to the outer court, as the voice of the Almighty God when He spake.”

Some of the Rabbis regarded the cherubim as being youthful angels, and the author of Hebrews speaks (9.5) of “the cherubims of glory shadowing the mercy-seat and alluding to the ark, which however, no minute description is given of them. There were also figures of cherubim fashioned upon the veil which hung before the holy of holies; in Solomon’s temple two large figures of cherubim, overlaid with gold, were placed; the brazen sea and other parts of the interior of the temple were also similarly ornamented. In all these instances the precise form of the cherub is left undescribed. Like the seraphim, they formed one of the ten groups of angels recognized in the Egyptian system. They ever symbolized, to the Hebrews, the near presence of God. Papers by Bp. Ryle; Cheyne’s Isaiah; Budge’s Gods of the Egyptians. [A.B.P.]

Cherub, apparently a place in Babylonia from which some persons of doubtful extraction returned to Judaea with Zerubbabel (Ezr. 2.59; Ne.7.61). It has been identified with Chiritha, mentioned by Ptolemy.

Chesalon (Jos.15.10), a place important as fixing various boundaries of the tribe of Judah. It was known in 4th cent. A.D. as a large village in the vicinity of Jerusalem, and is now Kesla, 10 miles W. of the city, on a high ridge N. of the valley of Sorek, and 2 miles N. of Kirjath-jeairim (‘Erma), which is immediately S. of the valley. From the latter town its boundary was placed along the road to Jerim (or the rugged hill “), and “went over mount Jerim’s shoulder, north of which is Chesalon, and went down to Beth-schemesh.” Thus Chesalon lay in Benjamin, and the boundary between the tribes, from Kirjath-jeairim to Beth-schemesh (on the border of Dan), was the valley of Sorek. [C.R.C.]

Chésed, fourth son of Nahor (Gen.22.22).

Chesiš (Jos.15.30). [Bethul]

Chesnut-tree (Heb. ‘armôn, LXX. styxos and pine), mentioned in Gen.30.37 and Ezek. 31.8. The balance of authority favours the Oriental plane. The context indicates a tree which thrives best in low-lying countries. The chestnut-tree prefers dry and hilly ground. Platanus orientalis ranges from Europe across Asia to Cashmere. Its value for shade in the East is well known, and it was exceedingly prized by early writers. Pliny says it was first brought over the Ionian Sea to beautify the tomb of Dionedes. From there it was translated into Sicile, and so bestowed at length upon Italie, and there planted as a most singular, rare, and special tree . . . who would not marvel that our people should fetch a tree . . . only for the shade that it giveth?” (xii. 1). He gives accounts of many famous and royal plane-trees. In Ezek.24.16, Wisdom praises herself, and says she “grew up as a plane-tree [platan in Wyclif] by the water.” This accords with the R.V. rendering of plane-tree in Gen.30.37 and Ezek.31.8. Travellers in the East will remember the gigantic plane-tree at Damascus, still standing in 1883. It was 100 ft. high, and when the mountains the mountain from which the holy oil was drawn, it was supposed to be the largest tree in Syria, and as old as the times of Abraham! But “the fame of the plane-tree fills all antiquity, east and
chest

west," as Hehn concisely puts it. It is mentioned only once by Homer, Wyclif's reading is plains in Gen. ; in Ezk. planae (plant-trees). The Arab 'ardun is, however, a Rhamnus or thorn-tree. [H.C.H.]

Chest. The exceptional translation in A.V. of two Heb. terms: (1) 'ardun, the word used only for the Ark of the Covenant, except in two places, (a) the "coffin" in which the bones of Joseph were carried from Egypt (Gen.1:20); and (b) the "chest" in which Jehoiada the priest collected the alms for the temple repairs (2K.12.9,10 = 2Chr.24.8-11). (2) g'nzdím, Ezk. 27.24 only; elsewhere "treasuries." [H.C.H.]

Chesulloth. [Chisloth-tabor.]

Chet'tim (1Mac.1.1) = Chittim.

Chezib. [Achzib, i.]

Chidon' (1Chr.13.9), the owner of the threshing-floor at which the accident happened to the ark, on its transport from Kirjath-jearim to Jerusalem (2Sam.6.6; Nachon). The LXX. omits the first name, and reads Nahor for the latter.

Chief of Asia. [Asiarchae.]

Children. [Family.]

Chis'gal: [Abigail: Daniel, i.]

Chillon' (Ru.1.2,5,4.9), the husband of Orpah. [Mahlon.]

Chim'hal', a place or country mentioned with Sheba and Assur (Ezk.27.23). Probably Kalmâdâ near Baghdad. The Targum substitutes Media (Madâj); therefore, Mez amends Chimald to kol Madât, "all Media." Other identifications have been made, but are unsatisfactory. [T.G.P.]

Chim'ham', a follower, probably a son, of Barzillai the Gileadite, who returned from beyond Jordan with David (2Sam.19.37,38,40). David seems to have given him a possession at Bethlehem, on which, in later times, was an island of about (1817). In 2Sam.19.40 the name in the Heb. text is Chimham.

Chinne'reth, Chinnereth' (Jos.19.35), a city of Naphthali near Hamath and Rakkath. It is called Kenerath in the list of Thothmes III. (No. 34). The Jerusalem Talmud (Megilla, l. 1) makes its later name Guinassar. The "sea of Chinnereth" (Num.34.11; Jos.13.27) or of Chinneroth (Jos.11.2,12.3), was the lake of Gennesaret, and the name applied to the region generally (Deut.3.17, and R.V. iK.15.20 for Cinneroth). It is remarkable that while Gennesaret has been rendered "garden of princes" as a Semitic word, the old name, in the Akkadian language—Gin-war-da—would also mean "enclosure of the king." It may have been the name given by Canaanites of the Akkadian race. [C.R.C.]

Chilos. The position of this island in reference to the neighbouring islands and coasts could hardly be better described than in the account of St. Paul's cruise (1808); a town of Troges to Caesarea. Having come from Assos to Mitylene in Lesbos (Ac.20.14), he arrived the next day over against Chios, the next day at Samos and tarried at Trogyllium, and the following day at Miletus (ver. 15); thence he went by Cos and Rhodes to Patara (21.1). At that time Chios enjoyed the privilege of islands, but was politically a part of the province of Asia, though only a strait of 5 miles separates it from the mainland. It is about 32 miles long, and its breadth varies from 8 to 18. It is mountainous and bold, and has always been celebrated for beauty and fruitfulness. In the last century it was well known, under its modern name Scio, for the sufferings of its inhabitants in the Greek war of independence.

Chislev. [Months.]

Chislon', father of Eilid (Num.34.21).

Chisloth-tabor' (loins of Tabor; Jos.19.12), a place W. of Daberath, on S.E. border of Zebulon (Ezk.27.24). Assur-bani-apli's list of the treasures names Asshur-ku-tobaru" = "Chisloth-tabor," as it was politically a part of the province of Asia, though only a strait of 5 miles separates it from the mainland. It is about 32 miles long, and its breadth varies from 8 to 18. It is mountainous and bold, and has always been celebrated for beauty and fruitfulness. In the last century it was well known, under its modern name Scio, for the sufferings of its inhabitants in the Greek war of independence.

Chites. [Months.]

Chittim', father of Eilid (Num.34.21).

Chisloth-tabor' (loins of Tabor; Jos.19.12), a place W. of Daberath, on S.E. border of Zebulon (Ezk.27.24). Assur-bani-apli's list of the treasures names Asshur-ku-tobaru" = "Chisloth-tabor," as it was politically a part of the province of Asia, though only a strait of 5 miles separates it from the mainland. It is about 32 miles long, and its breadth varies from 8 to 18. It is mountainous and bold, and has always been celebrated for beauty and fruitfulness. In the last century it was well known, under its modern name Scio, for the sufferings of its inhabitants in the Greek war of independence.

Chites. [Months.]

Chisloth-tabor' (loins of Tabor; Jos.19.12), a place W. of Daberath, on S.E. border of Zebulon (Ezk.27.24). Assur-bani-apli's list of the treasures names Asshur-ku-tobaru" = "Chisloth-tabor," as it was politically a part of the province of Asia, though only a strait of 5 miles separates it from the mainland. It is about 32 miles long, and its breadth varies from 8 to 18. It is mountainous and bold, and has always been celebrated for beauty and fruitfulness. In the last century it was well known, under its modern name Scio, for the sufferings of its inhabitants in the Greek war of independence.

Chiun. [Remphan.]

Chlo'e. Some members of the household of Chloe (probably slaves or freedmen) informed St. Paul of the divisions in the church of Corinth (1 Cor. 1:11). Of Chloe herself nothing is known. [E.R.B.]

Choba (χωβα; Jth. 4:14, 15, 5). Chobai (15. 4), a place near Esora ("Asrekh" and Salem (Sālim), not far from Bethulia ("Mithlibihc). The Gk. probably represents a Semitic Hoba'i, or "hiding-place," perhaps at el Mekkubbi (the hiding-place), a ruin 9 miles S.E. of Jenin, and 10 miles E. of Bethulia, on the main road from Beth-shean to Shechem. [C.R.C.]

Chorashan' (R.V. marg. Bor-asidian), "spring" or "pit" of Ashan (1Sam. 30:30). Like Ashan, it is unknown. [C.R.C.]

Chorazin (Mt. 11:21; Lu. 10:13), mentioned with Bethsaida and Capernaum. Now the ruined village Kerāzēk, 2 1/2 miles N. of Tell Hum. There are remains of a synagogue, adorned in rude Greco-Roman style, perhaps not completed until A.D. 135. When Simon, a Jew of Beth-yah, is said to have built various Galilean synagogues. [C.R.C.]

Chozeba (1Chr. 4:22), a place apparently in Judah; probably Kuzzitha, a ruin in the Hebron mountains, 2 1/2 miles N.E. of Halilul. It was possibly the native place of the rebel Bar-sessa, who in 135 A.D. brought ruin on his brethren the Jews. [C.R.C.]

Christian. In N.T. this word only occurs three times (Ac. 11:26, 26:28, and 1Pe. 4:16). Outside N.T. it is noteworthy that it does not occur in the earliest Christian writers, before we meet the apologists, except in Ignatius, a native of Antioch, with which place St. Luke connects the origin of the word. Ignatius uses the name frequently, and also χριστιανός and χριστιανικός. With the apologists it becomes a natural term to use. In pagan writers the most important early references are the following: Tacitus (Ann. xv. 44), writing (c. 116 A.D.) of the Neronian persecution of 64 A.D., says "Nero receives public gratitude... quam vulgus Christianos appellat"; Suetonius, writing just afterwards (Nero 16), says, "Affilente supplicis Christiani genus hominum superstitionis novae ac malificeae." Pliny, a few years earlier (Ep. x. 96), asks Trajan whether Christians are to be punished for the nome insipum (i.e. of Christians) or the flagitia cohaerentia. The name also occurs in the well-known and probably interpolated passage of Josephus about Christ (18 Ant. iii. 3), and perhaps in an inscription at Pompeii (i.e. prior to 70 A.D.). Much discussion has gathered round these references to the name, but we may say that there are no real grounds for distrusting St. Luke's assertion (Ac. 11:26) that it originated at Antioch before 44 A.D. Neither the termination -anus, nor the early date discredits the statement. His notice of the fact implies that the word was in frequent use by the time he wrote, and its origin, therefore, a matter of interest. The reference in St. Peter implies that it was well known to those in Asia Minor, to whom he was writing, and to the same date belong the allusions to the word in connexion with Nero's persecutions found in Tacitus and Suetonius. The name was not given by the Christians to themselves, for they used other titles (τηγωνα, αδελφοι, etc.), nor by the Jews, who would not have recognized Jesus as Christ. It was coined by the heathen inhabitants of Antioch, perhaps by Romans in the retinue of the legatus, after the analogy of words like Caesariani, on the supposition that of Christiani?; but proper names in this sense (as less above) says the name was used by the vulgus at Rome, and his use of the imperfect appella- bai may imply that, once used only by the vulgus, it had come into general use by the time he wrote, and, as we have seen, it was, not long after, generally used by the Christian apologists. Pliny's question to Trajan suggests the interesting problem as to when Christians were first persecuted as such, and we may say that such persecution is implied by 1Pe. 4:16, and probably began with Nero. A variant form, Christiani, is found in Ν in all the passages of N.T., and is to be connected with a pagan name, Chrestus (cf. Suetonius, Claud. 26. 4). To the name Chrestus an allusion is made by Justin Martyr and others, who play upon the meaning of χρηστός. Harnack, Expansion of Christianity (Eng. trans.), ii. 15 ff.; Zahn, Einleitung, ii. 40 ff.; Lightfoot, Philippians and Ignatius, i. 415 ff.; Lipsius, Über den Ursprung..... des Christennamens; Keim, Aus dem Urchristenthum; "Christian" in Hastings, D.B. (5 vols. 1904), and Encyc. Bib. [L.1.] M.B.]

Chronicles, Books of (originally one book), called in the LXX, Παραλεγένεσις ρωτων και δεικτων—which is understood, following Jerome, to mean that they are supplementary to the books of Kings. The constant tradition of the Jews (in which they have been followed by the great mass of Christian commentators) is that these books were completed by Ezra or possibly by Daniel, and the internal evidence as to the time when they were compiled seems to demand that in their final form they must be put somewhat later. The great Massaiah of 2Chr. 39, Shecaniah, is described; but 1Chr. 3:22-24 apparently takes us three generations later, and is thus parallel with the latest addition in Nehemiah (12:10, 11). The integrity of Chronicles has been impugned by various critics of late years for a variety of reasons. It is of course a compilation, but it has high authority. The plan of the book becomes apparent immediately we consider it as the compilation of Ezra or some one nearly contemporary with him. Among the greatest difficulties connected with the Captivity and the Return must have been the maintenance of that genealogical tradition of the lands which was a vital point of the Jewish economy; and the maintenance of the temple services at Jerusalem, which could only be effected by the residence of the priests and Levites (including porters, singers, etc.) in Jerusalem in the order of their courses; this residence being only practicable by the payment of the annual tithes, first-fruits, and other offerings, which was dependent upon the different families of Israel being established each in his inheritance. Hence the obvious need for trusty genealogical records. Moreover, nothing could more effect-
usually aid their leaders to re-infuse something of national life and spirit into the people, than setting forth a compendious history of the kingdom of Judah which should embrace a full account of its prosperity, and trace the sins which led to its overthrow, and should also carry the thread through the period of the Captivity, and continue it on the other side; and those passages in their former history would be especially important which exhibited their greatest and best kings as engaged in building or restoring the temple, in reforming all corruptions in religion, and zealously regularizing their nation's life. The book of Chronicles introduces, as it were, a résumé of the history of Israel, the kingdom of Judah having utterly and hopelessly passed away, and the inhabitants of the land, being among the bitterest "adversaries of Judah and Benjamin," would naturally engage very little of the compiler's attention. These considerations explain exactly the plan and scope of the two books of Chronicles and the books of Samuel and Kings. As the languages of these books, the resemblance of the style of Chronicles to that of Ezra—which is, in parts, avowedly Ezra's composition—the reckoning by dates (1 Chr. 29:7, R. V.), as well as the breaking off of the narrative in the lifetime of Ezra, are among other valid arguments by which the authorship, or rather compilation of the 1 and 2 Chronicles and Ezra by Ezra is supported. As regards the materials used by him, and the sources of his information, they are not difficult to discover. The genealogies are obviously transcribed, sometimes rather imperfectly, from public or family registers. A wide diversity of materials is employed, so that not one of all these books is at times apparent. Thus the information in 1 Chr. 1:43ff. concerning the kings of Edom before the reign of Saul was obviously drawn from very ancient sources. The same may be said of the incident of the slaughter of the sons of Ephraim by the Gittites (7:21, c. 8:13) and of the account of the sons of Shela, and their dominion in Moab (4:21, 22). The curious details concerning the Reubenites and Gadites in ch. 5 must have been drawn from contemporary documents, while other records used by the compiler are as late as after the return from Babylon, e.g. 9:2 ff.; 2 Chr. 38:20 ff. Hence it is probably that the Chronicler was more particular than his authorities, and that his present form by one hand, contain extracts from many different writings, which were extant at the time the compilation was made. In more closely examining the sections of Chronicles which are to be found in Samuel and Kings, it is noteworthy that they not merely present a general resemblance, but are practically identical. This has been strikingly illustrated in the Deuterographos (Oxford Press, 1894). The extracts are 57 in number, of varying length. The variations in the text between these two ancient documents show how liable the earliest copies were to make mistakes, and also that the Chronicler sometimes introduced a later word for a former one in his compilation. He especially does a comparison of these documents illustrate the method in which the long record in Samuel and Kings was put together. On the one hand, the Chronicler refers to certain authorities almost all through his book, beginning with Nathan, Samuel, and Gad for the period of David; on the other hand, his history is demonstrated to be largely an extract from the books we now possess under the names of Samuel and Kings. The conclusion must be, that Samuel and Kings were the work of prophetic men contemporary with the kings whose lives they record. These men were a "school," founded by Samuel to record such events as should be instructive for after-ages. We must carefully distinguish their works from the state annals (frequently referred to as "the chronicles of the kings of Israel and Judah"), which have all perished. This view of the books of Samuel and Kings explains their style, their instruction, their freshness and vividness in style. The author of Chronicles made use of an early recension of these ancient documents, selecting what best fulfilled his requirements. Beginning with the death of Saul (1 Chr. 10), he records the election of David, the removal of the ark, the Messianic promise. David's life, and the people's notable events in the life of Solomon, and outlines of the reigns of the kings of Judah. He omits many things contained in his authorities, such as the matter of Uriah and its sequel, also the sin of Solomon, and the history of the kings of Israel. On the other hand, he introduces a number of events which his authorities (as we now have them) did not contain. These include certain matters relating to David's administration, and also the accounts of the passovers held in the time of Hezekiah and Josiah. In these narratives it will be found that prophets are generally brought on the scene, and they may have left records which have now perished, and others which were not chronicled in the book of Chronicles is in the main the same as that of Samuel and Kings, it is interesting to notice occasionally a different way of putting the same thing—as in the numbering of the people, the dialectical differences, changes of spelling, and variations of numbers. It is sometimes possible to correct the text of the earlier source by the later extract, and at other times the earlier is clearly the right text. When we find such variations as 22 for 42, 700 for 7,000, 3,000 for 2,000, 4,000 for 40,000, 8 for 18, and 3 for 7, we learn how easily numbers were corrupted. [NUMBER.] It is noteworthy that the LXX. was occasionally parodied by his other—unless, indeed, the Heb. copies were different when the Gk. translation was made. The general conclusion is that the record left us by the Chronicler is of high religious and historical value, and that (after making due deductions for textual variations) the work is one of supreme importance to the student of the times of the kingdom of Judah. It remains to refer to the Genealogies (1 Chr. 1-9). The first chapter is extracted from Genesis, with slight textual variations. Parts of the chapters which follow may be tested by the contents of Exodus and Numbers, but were evidently extracts from later documents. They give an account of the family of Judah, including the house of David, up to the return from captivity; also of all the tribes but two, viz. Zebulun and Dan. In some cases very little is told us—e.g. of Naphtali, the record of which is taken from Num. 26 with no additions. It is observable that we have two copies of Saul's genealogy (2 Chr. 8:29-31) also two copies of
CHRONOLOGY OF O.T.

—one ascending and the other descending (cf. our Lord’s genealogies in St. Matthew and St. Luke). In these old family lists we get interesting variations of spelling and transmission of names, showing that the ancient methods of keeping genealogies were not quite in line with our modern methods; whilst spellings varied in those days as much as they did in our own parish registers 300 years ago. The language of these books, as of Ezra, Nehemiah, Esther, and the later prophets, has a marked Chaldean colouring, and Gesenius says that “as literary works, they are decidedly inferior to those of older date.”

[Text continues...]

ChiRONOLOGY OF O.T. AND ARCHAEOLOGY.

[The great importance of the bearing of archaeological research upon the chronology of O.T. fully justifies at the present day the insertion of a separate article by an acknowledged expert viewing the chronology chiefly from that standpoint of archaeology, while the very many varieties of opinion as to O.T. dates (arising from the acceptance of varying data and schemes of harmonizing—see editorial note to next article) equally justify the presentation of two systems founded on different views. In all cases, the other article above has been allowed to suggest its own dates independently of either of the systems of the two following articles.—Ed.]

As far back as 722 B.C. the O.T. dates are well known to about a year, and agree with the statements of monuments and of classical writers. Before that date (the Fall of Samaria) there are differences of opinion, according as the Massoretic Heb. text, or the Gk. LXX., are preferred by scholars; but, if we accept Hammurabi as the Amraphel of Gen. 14 (as Sir H. Rawlinson proposed), the claims of the Heb. text are the better. There are minor discrepancies in some of the cross-references of the books of Kings, showing corruption by later scribes probably with a harmonizing intention. Thus it is, for instance, impossible that Ahab’s son could ascend in 2nd of Jehoram of Judah (2 K. 1.17) and also in 18th of Jehoshaphat (2.1). But, if we follow the main statements, the O.T. chronology agrees fairly well with the monumental ascertained dates of accession except in two cases—viz. (1) Ahab cannot be the Ahab of Sir’laha (or of Rirhal), mentioned some 30 years after Ahab’s death in a text of Shalmaneser II. (2) Menahem was reigning in 725 B.C., according to a text of Tiglath-pileser III., and appears therefore to have ruled some 20 years or more (O.T. 10 years), while Pekah (on the same authority) would have reigned only 4 years (O.T. 20 years). But these alterations nearly cancel one another, and cannot affect the totals by more than five or six years, as at present understood. As regards monumental dates, the Egyptian lists of kings unfortunately give no chronology at all. Scholars still have to depend on the corrupted text of Manetho (who wrote c. 270 B.C.) as extant, second hand, in Eusebius and George the Syncellus, or in Julius Africanus. It is, however, known, from the Amarna tablets, that Amenophis IV. was contemporary with Bzur:Burias of Babylon, who acceded c. 1440 B.C., and Egyptian dates require to be made conformable to this fact, which agrees with all the O.T. notices. In Assyria, before c. 610 B.C., there is a gap in the history, after which the Assyrian dates agree with O.T. except as above stated, and except that the expedition of Sennacherib to Lachish occurred in 703 B.C.—i.e. the 24th instead of 14th Century.

Before 910 B.C. Assyrian dates can only be fixed by the cross-references to contemporary Babylonian kings such as Nabu-kudur-nuṣur (1154–1128 B.C.) and Burna-Burias (c. 1440 B.C.). We thus depend on the Babylonian chronicle, which is continuous back to the foundation of Babylon in 2250 B.C. This date also agrees within 18 years with that deduced by Rawlinson (i.e. 2232 B.C.) from various statements by Gk. writers. Before this epoch no chronicles exist, and (in spite of popular assertions) the age of the first Akkadian civilization under Sargina (‘the founder king’) is uncertain within 1,000 years. As the date of Mene, in Egypt, is variously conjectured by scholars with a variation of some 2,000 years. The Babylonian chronology being the only one certain (up to 2250 B.C.), the various statements require detailed notice. The statement that a certain iugal (‘king’), in the 3rd year of Hanun, son of Sennacherib, c. 4000 B.C. is a conjecture not supported by the one known text of this ruler, since this contains no date at all. The totals of dynasties in the Bab. chronicle are confirmed and controlled by various independent statements. (1) The text of Sennacherib at Bavian probably dates the accession of Ahab of Assyria as c. 1230 B.C. (2) The same Assyrian monarch fixes the conquest of Babylon by Tiglath-pileser III. of Assyria as occurring c. 1292 B.C. (3) Tiglath-pileser I. fixes Ismi-Dagon, ruler of Assyria, as c. 1850 B.C. (4) The contemporary of Assur-Dan was Zaggas-sum-edin of Babylon (c. 1200 B.C.). (5) Naba’ul-din (Nabonidus), the last king of Babylon, fixes the accession of Burna-Burias of Babylon as being c. 1440 B.C. (6) He places Hammurabi 700 years earlier—i.e. 2140 B.C. (7) Assur-bani-pal fixes the date of Kudur Namhund of Elam c. 2280 B.C. (8) Nabonidus also fixes the accession of Nebuchadnezzar II. of Babylon (c. 2800 B.C) (9) He supposes Sargina (‘the founder king’) of Akkad to have lived c. 3800 B.C., but we have nothing to show how he came to calculate this date—more than 3200 years before his own time. (10) He also places Sagasatli-Burias of Babylon c. 1350 B.C. These statements are all very valuable, as checking the Babylonian chronicle.—O.T. Dates. The Heb. and I.X.X. dates differ, especially with respect to the earlier ages. The Heb. in 1 K. 6.1 gives 480 years, but L.X.X. 440 years, from the Conquest to 4th Solomon. The L.X.X., in Ex. 12.40, considers that the 470 years include the 215 which the patriarchs spent in Palestine from the call of Abraham to Jacob’s descent into Egypt. The L.X.X. does not, however, agree with Gen. 15.16 (“four centuries”); A.V. “fourth generation”) nor with Ac. 7.6 (“four hundred years”). The 480 years in 1 K. 6.1 also agrees best with Judg 11.26 (“three hundred years”), and these statements together agree with ten others in Judges, which make the various judges follow one another. The prevalent idea that they were often contemporaries, in various parts of Palestine, is quite contrary to all O.T. statements,
The war of Conquest, c. 7
Oppression by Chushan-risha-thain
Rest under Othniel
Rest under Ehud and Shamgar
Oppression by Jabin
Rest under Barak
Oppression by Midian
Rest under Gideon
Aibimelech, son of Gideon
Tola, judge "after" Aibimelech
Jair, judge "after" Tola
Oppression by Amoniments

Total to Jephthah... 326 years.

If we take the round number of 300 years (in Judg.11.26), we obtain a calculation to the foundation of the temple from the Conquest which agrees, within 5 years, with the 480 years noticed in 1K.6.1, as below:

Conquest to Jephthah... 300
Jephthah, judge... 6
Ibzan "after" Jephthah... 7
Elon "after" Ibzan... 10
Abin... "after" Elon... 8
Samoson, judge... 20
Eli, judge... 40
Samuel, judge... 20
Saul, king... ? (as in 6 ANV. iv. 9)
David, king... 40
Fourth of Solomon... 4
Total tofoundation of temple... 475 years.

Regarding the 40 years of Philistine oppression (Judg.13.1) it is stated (15:20) that Samson was judge "in the days of the Philistines," and this oppression continued till the beginning of Saul's reign (1Sam.3.3). This indicates 20 years for the rule of Samuel. The arch (7:2) was in Kirjath-jearim 20 years in his time, and was taken out to war early in Saul's reign (14:18). This indicates 20 years, which would have been not more than 60 when Saul was made king (see "old," 8:1), but he died some 10 years later (25:1). The length of Saul's reign is nowhere stated in O.T., but Josephus (as above) makes it 20 years, which is quite probable, as Jonathan was grown up at the time of Saul's accession (1K.14.1), while Ishbosheth (Saul's younger son) was only 40 at the time of Saul's death (2Sam.2.10). The discrepancy between the round number 480 (1K.6.1) and the details 475 may give five more years between Saul and Samuel.—The later chronology of the kingdoms of Judah and Israel presents only difficulties, if detail, for either to misconstruing or to harmonizing alterations; and the actual statements agree generally very well.

Kings of Judah, 1st Period.

Rehoboam (r.178 in Jerus.) 1K.14.21,15.1 966
Abijah... 3... 15.1 958
Asa... 47... 15.9,10 917
Jehoshaphat 25 (4th Ahab)... 22.42 906
Jehoram... 22.50 883
Ahaziah (r. 11th Jerom)... 2K.29 873 to 972
Total... 96 years.

Incidentally, these dates are confirmed by other monumental documents. Thus Abraham had lived over 10 years in Palestine (Gen.16.3) when Ishmael was born, and Hammurabi's inroad (14.1) occurred just before, as the text nowstands. Hammurabi reigned from 2139 to c. 2094 B.C., as calculated by Peiser, in agreement with the statement of Nabanis. The raid occurred early in his reign, before he became independent of Chedoriaomer. There is thus a total discrepancy of only 10 or 20 years, at most, between the time of his inroad and the fall of Samaria in 722 B.C.—which is as near as we could expect to arrive in the long period of 14 centuries, and which is capable of several explanations. Again, it appears (Judg.5.2) that "Pharaoh tyrannized" just before the revolt of Barak, which O.T. places c. 1312 B.C.—or in the reign of Ramses II., who conquered Tabor rather earlier. Sisera (whom Barak defeated) has an Egyptian-sounding name (it is not Semitic)—viz. Ser-ra, 'servant of Ra.' Moreover, when Gideon (6.6) defeated Midian, Israel was "greatly impoverished," c. 1265 B.C., and Meneptah (Merceriah) in his 5th year (c. 1265) says of Israel that it "is spoiled, it has no seed." These coincidences are independent of the appearance of the 'Abiri (or Habiri) in S. Palestine c. 1480 B.C., in whom Zimmern and others recognize the Hebrews, after the Conquest (14.6—Details of O.T. Chronology. In Judg.11.26 Jephthah speaks of Israel as having conquered Palestine 300 years earlier. The details amount to 326 years, as below, but the periods of "rest" are given in round numbers, which may explain the discrepancy. These details are:—
This coincides with the parallel reigns of kings of Israel, if Joram of Israel reigned not a full 12 years. It is here assumed that the Hebrews, like the Babylonians and Assyrians, dated the first year from the beginning of the new year, and would have called the months from accession to new year the "throne year"—this applying to Israel and Judah alike.

Omri's capture of Tirzah by the slaughter of Zimri (1K.16.18) was followed by four years of civil war (vv. 21-23), but Tibin is not reckoned as a king. Omri's 12 years (ver. 23) date from Zimri's death, and are reduced to 11 by the cross-reference. Probably 5½ in Tirzah, and 5½ in Samaria. Jehoram of Israel and Ahaziah of Judah were killed together by Jehu.

The only numbers in this list not authorized by O.T. are: 52 years for Jeroboam II. (which, however, results from the cross-references to Judah), 21 for Menahem (O.T. 10), which agrees with the notice of his ruling in 738 B.C. —on a monument; and 4 for Pekah (O.T. 20), necessitated by the statement of Tiglath-pileser III. already quoted. After the fall of Samaria (in first year of Sargon, or 722 B.C.), the difference of calculation amount only to two or three years in any date. Sargon took Ashdod in 711 B.C. (see Is. 20.1). The embassy of Merodach-baladan (39.1) must have been sent to Hezekiah between 702 and 699 B.C. Jehoiakim must have served Nebuchadnezzar (under Nebuchadnezzar's father) till his fourth year (for "three years," 2K.24.1), since it was then that Nebuchadnezzar acceded (J.e.35.7; sec 2K.24.12). The dates of accession of the dynasty of Nebuchadnezzar give a minimum interval between the death of Assur-bani-pal in 626 B.C., and 1st Cyrus in 538 B.C., but we do not know that the latest dates of these tablets in any reign coincide with the last year of a reign, and later discoveries may therefore lengthen the total interval by a few years. The minimum is 82 years, which differs by four years from O.T. In Jeremiah (25.11, 29.10) the "seventy years" of affliction date back from 538 to 608 B.C., and the same book (25.1-3, 28.1, 32.1, 46.2) fixes the accession of Nebuchadnezzar in 608 B.C., which agrees with the chronology of 2 Kings, and is in no manner at discord with monuments. Texts of Nabonidus and of Cyrus show that the Median Gobrias (probably "Darius the Mede," Dan. 5.31) began the siege of Babylon in the summer of 539 B.C., after the surrender of Nabonidus at the "palace," which according to Berosus, died in August. Probably Josephus relates that Sennacherib was at Borsippa, a suburb outside Babylon on S.W. The final attack was made about four months later, when the "king's son" was slain. His name we know (from another text) to have been Bel-shar-usur [BELSHAZZAR], and it is clear that after his father's captivity he reigned at least four months (Dagron 19), though the third year (8.1) of Belshazzar is either a clerical error for the third month, or represents his rule in Babylon during the absence of Nabonidus with the army. Belshazzar appears as the "son," or descendant, of Nebuchadnezzar (Dan. 5.2, 18), who may have been his grandfather through his mother, or even through his father Nabonidus, since the genealogy of the latter is unknown from monuments, through his father's name is known to have been Nabu-balatsu-ibiq, who was a "wise lord." The chronology of Ezra and Nehemiah presents no difficulties if we remember that the Aramaic passage in Ezr. 4.7-4 pursues the history of attempts to frustrate the rebuilding of Jerusalem from c. 433 down to 424 B.C., the narrative then returning (5.1) to the history of Zerubbabel.—Authorities.

The lists of Manetho may be studied in Cory, *Ancient Fragments* (ed. 1876). Manetho's dates are correct back to 528 B.C. They are 10 years too late for the accession of Necho, and 10 years for that of Tirhakah, placing SUSHAK 33 years too late (there is also a difference of four years between the stated total and the details of 22nd dynasty), the date of his accession being 966 B.C. (Brugsch), or 3rd of Reheboam (1K.14.25). The dates given by Brugsch (Hist. Egl., 1879) only claim to be approximate, but fit with the known fact that Amenophis IV. was contemporary with Burna-Burias, who acceded in Babylon c. 1440 B.C. (Amarna Tablets, Brit. Mus. Nos. 2, 3, 4, 7). The chronology may be studied in *Proceedings of Bib. Archaeo. Soc.* Dec. 1880, Jan. 1881, May 1884, March 1899. The Eponym Canon, and other Assyrian no.

For a discussion of the last date, see **Chronology of O.T.** (an attempted harmonizing). The occasional corruption of numerals in the Heb. text involves any harmonizing of Chronology in some amount of necessary emendation; hence any suggested system must be open to criticism in detail; but according to the present facts and the particular critic. The system set forth in the following tables and notes is therefore offered, not as infallibly correct (which no system can be), but as a suggested harmony which has been most carefully drawn up and may be useful as a general guide in these difficult questions. It is believed that no general survey of Biblical chronology has been put forward before in so clear a way as this tabular view provides, and with such a minimum of emendation of the text of Scripture. As there has been, however, no wish to commit other writers to the suggestions of this article, they have been left free to adopt their own views, and hence their chronology is independent of this—e.g. an alternative chronology of the kings of Israel is given under **Israel, Kingdom of**—Ed.

From the Creation to Abraham. It is easy for any student to construct from the ages of the patriarchs, as given in the Bible, a table of dates working back from Abraham to the Creation, as Archbishop Ussher (to whom the dates in the margin of A.V. are due) did in the 17th cent. But such a system is wholly unsatisfactory, for scientific evidence demands for the world, and probably even for the inhabited world, a greater age than is so obtained, and the ancient monuments now clearly bear witness to a considerable degree of civilization which many scholars consider to date back a longer period than that allowed by Ussher before Abraham. (But see preceding article.) The Bible, moreover, must not be held responsible for the calculations of Archbishop Ussher, and the Pentateuch itself makes no such claim to give data for chronology; for the "generations" given may not be successive ("son of" being very commonly used in Heb. for "descendant of"), or the names must be used in a different sense in the ancient text of the Bible (as often in other parts of the Bible) the founder or head of a family, in which case also no successive chronology can be built up on them. Hence Biblical chronology, for which any degree of certainty can be predicated, begins only with the birth of Abraham.
Abraham to David. The key to the chronology of this period is found in the fact that the Hebrews uniformly reckoned the number of years between the giving of a divine promise and its fulfilment as the figures to be borne in mind. Thus, (a) St. Stephen speaks of "the time of the promise drawing nigh," and refers the promise of a numerous posterity as when yet he had no child (Ac.7.6, 17; Gen.15. 2-5) to the time when Abraham was in Hebron. To this interval—citing Gen.15.13—he gives 400 years, the dates of the birth of Isaac and the Exodus being 390 years apart, in the following table (see note B). Ten other years may have elapsed between the giving of the first promise to this effect and the second in Gen.16.10, which immediately preceded Isaac's birth. (b) St. Paul in Gal.3.17, citing Ex.15.40,41, gives the period of 430 years as intervening between the date of the giving of the Law on Sinai and the call of Abraham. This is the number of years separating items 3 and 16. The LXX. and Samaritan texts of the Pentateuch agree with the Heb. in making the affliction of the Children of Promise include the sojourning of the patriarchs in the land of Canaan, and thus to date from the call of Abraham in 1644. It is from this point of view that the text of Ex.12.40,41 is to be read. It is, therefore, important to see how many years belong to the sojourn in Canaan and how many to that in Egypt. In Table I. we see that the birth of Isaac took place 25 years after Abraham's removal from Haran. Jacob was born when Isaac was 60, and was 130 when he went down into Egypt. He was 15 years old when his grandfather Abraham died (cf. Heb.11.9, which states that Abraham dwelt in tents "with Isaac and Jacob"). This leads us to conclude that 215 years passed between Abraham's departure from Haran and Jacob's descent into Egypt, and 215 years between the Descent and the Exodus. The two censuses at Sinai and at Shittim (Num.1.26) cannot be allowed to influence this decision, as these numbers are subject to revision in common with all military and population returns of O.T. Other than this 230 certain factor there are reasonable grounds for rejecting the number 130 in two equal periods.—Table I. and the Schedule of the Judges depend upon two suggestions: that as to the date of Hammurabi in note (a), and the theory held by many scholars that the judges were not successive. If these two hypotheses are rejected, Table I. would need to be dated back just about the period required to count the judges as successive, and the subsequent tables would not be affected.

(a) Abraham was a contemporary of Amraphel of Gen.14.1, who is undoubtedly the Hammurabi of Babylonian history. It is, however, impossible to fix with certainty the date of Hammurabi (cf., e.g., Hommel 1772-1717 and Pelen 1749) in the two cuneiform inscriptions of Babylon, as the names and dates of all the Babylonian kings have not yet been discovered; in particular, the names are missing between 1615 and 920 (see Dr. Sayce's "Babylonian Chronology" in Appendix II. of Early Israel, pp. 280-283). In this interval it is certain that Nebuchadrezzar, the last king of Babylon (550 B.C.), that "Hammurabi, the ancient king who—700 years before Burna-Buriash—had built the Sun temple at Larsa." This allows us to fix the date of the escape of Lot by Abraham from the camp of Amraphel at c. 1640.

(b) This is Dr. Petrie's date, who, however, allows that it may possibly have been from 5 to 10 years later.

(9) The statement in ?Sam.7.7 that the ark abode a long time in Kirjath-jearim, "for it was 20 years," has disturbed many chronologists. The context shows that the annexation is written prior to the anointing of Saul. To the 20 years must be added the 40 years of Saul's wars and the first 10 of David's reign. The whole period of the separation of the ark from the tabernacle is thus more nearly than 20 years. The first 20 years of the ark's captivity are supposed to coincide with the 20 of Samuel's judgeship; and to have immediately preceded the election of Saul.

THE TIMES OF THE JUDGES AND SAUL.

The dates here suggested of the Occupation (in or about 1714) and of the establishment of the monarchy in Judah under David (1027), leave rather less than a century and a half for the events of Joshua's later life, the rise of the Judges, and for Saul, who is included here, rather than David under the monarchy, as being to a Judean writer, an illegitimate sovereign (Moore, Judges, p. 41 II.).

The Biblical records of these times are very complete, every event of importance in any part of
CHRONOLOGY OF O.T.

157

the country having been written down and preserved. We have but to sort and rearrange these records to have a continuous and harmonious narrative of these years. This may be most successfully done in a schedule, which, omitting the first thirty years of the Occupation, as being those of Joshua’s later years, gives a bird’s-eye view of the years following his death.

**Episodes in the Military History of Palestine, occurring between the Death of Joshua (Table I., Item 18) and the Accession of David (Item 20), a Period of 117 years, numbered in the Order of their Record.**

</table>

The Hebrew Monarchies. The following tabular view of the Hebrew kings is constructed on the principle that while the southern kingdom (Judah) followed the Babylonian precedent of dating its kings’ reigns from the first day of the civil year—being Tishri 1 or September 21—the northern kingdom (Israel) reckoned any fraction of a year as a full unit, and included the same year as part of the reigns both of the deceased monarch and his successor. The former plan is known as post-dating, the latter as pre-dating. This peculiarity in the Israelitish mode of computing the reigns of their kings would account for a difference of 14 years in the sum of the years given to Israel, 227 years having actually passed between the division of the kingdom and the fall of Samaria. As the recorded number of years during which the kings of Judah reigned while the northern kingdom lasted amount to 260, and in Israel to 241, it becomes necessary to show how the gain of 33 years in the Judean monarchy occurred, the reduction in the records of Israel to 227 being effected by subtracting the 14 duplicate years arising from their system of pre-dating.

By the following considerations, 33 years are eliminated from the total of 260 in the annals of Jerusalem, though they still stand as a portion of the national history.

(a) Athaliah, a female ruler and a blood-stained usurper, is omitted from the list of constitutional sovereigns and her years are included in the 40 given to Jehoash. A modern parallel is the dating, as is the case in all official records and legal documents, of the accession of Charles II. from the day of the death of Charles I.

(b) Twenty-seven other years—completing the 33—are gained by a consideration of the repeated statement that “Jotham the king’s son was over the household, judging the people of the land” (2 K.13:7; 2 Chr.26:21). Jotham’s Judgeship of Uzziah’s retirement from the duties and cares of State and Jotham’s accession is thus seen to have taken place before the former’s death, and is shown in these tables as occurring in his 41st year and in the 25th year of his reign. He lived for some 27 years longer (cf. 2 K.15:2) in a separate house in Jerusalem, often spoken of as “king,” but taking no part in the government, and died (ver. 7) late in the reign of his grandson Ahaz.

These corrections with regard to the two reigns of Athaliah and Uzziah, with the variations of reckoning in the two kingdoms, are alone needed to correct the whole machinery of Hebrew chronology during the time of the kings, and to bring the two systems of Judah and Israel into accord.

</table>

(A) In 1K.6.1 "the fourth year of Solomon's reign" is given as the synchronism of "the 80th year after the children of Israel were come out of the land of Egypt." The following figures make up 480 years, and the historian of Solomon's reign seems to have used them in his calculations. To the 3 completed years of Solomon's reign and the 40 of David's, we add the 407 years detailed in the book of Judges, as those during which there was a state of either peace or war in Israel. This total (see note ** on preceding page) does not include the 3 years following Gideon's death, during which the tribes of Ephraim made an abortive attempt at establishing a monarchy under his son, as these years are expressly included in the 40 years' peace secured by Gideon. To the 450 years thus obtained we add the 30 during which Joshua lived after the crossing of the Jordan. The total is 480, a complete justification of the text, if looked at solely from an arithmetical point of view.

(B) The reigns of the two Jehorams present a problem of great complexity. The course of events would seem to be as follows: In 869, the 2nd year of his reign, Ahaziah, the king in Samaria, had an accident (2K.1.2.) which left him bedridden until his death, and compelled him to hand over the duties of kingship to his brother Jehoram. This was in the 18th year of Jehoshaphat's reign in Jerusalem (item 14). Ahaziah survived his injuries for 3 years, during which time there was a co-sovereignty of the brothers. Then Ahaziah died, and his brother became sole king; this might have been dated as 21 Jehoshaphat. It is not, however, so dated in the text, because during Ahaziah's lifetime Jehosha-

pator had taken his son—also named Jehoram—into partnership with himself on the throne of Judah, and the historian has preferred to date the northern Jehoram's years of sole power from 2nd year of the southern Jehoram's co-sovereignty—i.e. 865. This southern co-sovereignty, again, is not described as having taken place in his father Jehoshaphat's 20th year, but (2K.8.16.) in "the 6th year of Jehoram of Israel"—from the beginning of his reign (and see correction in Table, item 15), it being added, "Jehoshaphat being then king of Judah"; but the "8 years" in ver. 17 refers to the time he was sole king (item 17). We thus find that the two Jehorams who ultimately became kings of Judah and Israel were not only contemporary sovereigns for 4 years, but that for some months previously they were simultaneously holding the positions of associate kings in Jerusalem and Samaria respectively.
WITH THEIR SYNCHRONISMS—DOMESTIC.

---i.e. "In the 18th year of Jeroboam"—means that he had then been 17 years on the throne. of Abijam's accession: and so elsewhere.

An alternative harmonizing, involving a change of about a year in most of the dates of accession, but not altering the principles of this chronology, was given by the present writer in Solomon's Temple (2nd ed., R.T.S., 1907).

(C) The fact that Jehoshaphat and Jehoram of Israel became allies in a campaign against Mesha, king of Moab (2K.3.5-27), derives additional interest from the contents of the Moabitic Stone, describing the war. The years during which the allied sovereigns could have co-operated are narrowed down to the last 7 years of Jehoshaphat's reign (868-861). The victory commemorated by the Moabitic Stone is veiled in the dubious phrase of ver. 27, "there was [or, came] great wrath upon Israel" (i.e. on the part of Jehoshaphat and the Judahites) for their panic and disgraceful flight from before the votaries of Chemosh.

(D) The battle of Qarqar in 854, at which the whole contingent of troops sent from Israel had been lost, was the event which, in all probability, led to the prophet Elisha's sending a messenger to anoint Jeph as king of Israel, while still engaged as a captain in the defence of Ramoth-gilead (2K.8.28-9.28). But he had long been designated for that office by the prophet Elijah (1K.19.16). Some 3 years previous to the battle of Qarqar, it would seem from the chronological evidence that political action of some sort in Samaria had raised him to the position of king de jure, though he still remained in a private station. The evidence of which is this: Ahaziah of Judah is declared to have been made king "in the twelfth year of Jehoram" (2K.8.25). Jehoram of Israel had two beginnings to his reign, one in 868 as regent, and one in 865 as sole king. That the latter of these is the one referred to in the above-cited texts is apparent, as 865 minus 12 brings us to 853, the year of Ahaziah's elevation to the throne. That Jehoram was then alive, his death by the arms of Jeph at the same time as Ahaziah proves. But this was 4 years after Jeph had received his title to the throne. These 4 years, therefore, were those in which "Jeph conspired against Jehoram" (2K.9.14). The fatal results to Samaria of the battle of Qarqar are seen in the visit of condolence paid by Ahaziah to his brother-in-law, and more especially in the easy conquest of Jeph over both kings. There were evidently not sufficient warriors left in Samaria to protect the king of the.

</table>

(a) Item 18: "King" (when account was written, actually prince when events happened) Nebuchadnezzar commanded the army (cf. Note C). A similar suggestion (in accounts for the compilation of the "Assyrian annals") in item 11.

(b) The occasion of Merodach-baladan's sending ambassadors to Hezekiah was after his second expulsion from Babylon in 709 B.C. by Sargon. Sennacherib states that, in his first year, 704, he again drove Merodach-baladan out of Babylon. The embassy to Jerusalem was that of a refugee monarch, and followed the withdrawal of Sennacherib's army from Jerusalem in 702.

(c) Je.25.1-3 is the classical passage for synchronisms of this period. It states that the "first year of Nebuchadnezzar, king of Babylon" was "the 4th year of Jehoiakim, king of Judah" (i.e. the year 605-604), and also that from 13 Josiah—Jehoiakim was 23 years, which agrees with the dates given in Table II.

(d) Ezekiel's prophecy against Tyre was uttered a year previous to the siege and his celebration made a year or two after its close (cf. Items 26 and 30).
HISTORICAL NOTES TO TABLE III.

(A) According to the black obelisk of Shalmaneser, the battle of Qarqar was fought in 854 on the line of march between Aleppo and Hamath. The obelisk records that a contingent of 2,000 chariots and 10,000 footmen took part in the battle, sent by "Ahabbū māt Sirī'īā" (so-called on the Kurkh monolith). In 854 Jehu was in the 4th year of his nominal reign as king of Israel, Jehoram, son of Ahab, being still alive (see Table II., note a). The inscription on the monument was not made by Shalmaneser, but in the reign of his son, Samsiramman, who reigned over Assyria from 824–812. It therefore records events of from 30 to 40 years before its own date, and when exact particulars of Heb. names were perhaps not available. The inscriptions of both Ahab's name here, as representing the reigning dynasty of Samaria, is not unnatural, since, though he himself had died 15 years before, a son of his was de facto, though not de jure, ruler. (For an alternative solution of the chronological difficulty, see Ahab.)

(B) The monuments record that in 842, "Jahua, son of Humri", "of Israel," paid certain specified articles of tribute to Shalmaneser II. As 842 = 16 Jehu, there is no chronological difficulty here, but an etymological one only. He is called the "son of Humri"—i.e. Omri. This is a further instance of Assyrian ignorance of Heb. history, or of the less accurate use of names (or designations) than modern records demand; for the dynasty of Omri had been destroyed by Jehu. While neither Qarqar nor Shalmaneser II. is named in the book of Kings, we find there a statement of territorial loss which just such a series of events as the monument describes might produce. It tells how, in Jehu's day, Hazael, king of Damascus, as the ally or dependant of Assyria, "cut Israel short," and "smote them in all their coasts" E. of Jordan (2K.10.32–33).

(C) The statement that Menahem paid to Pul, king of Assyria, 1,000 talents of silver, in order to secure his peaceful occupation of the throne, is explained on the Heb. idiom by which personal titles and dignities afterwards acquired were often used by Biblical writers in anticipations of such official use (cf. note a). The occupants of the throne of Nineveh during the years of Menahem were Assur-dan III. and Assur-ninari. Five years after Menahem's death, Pul became king of Assyria, took the throne-name of Tiglath-pileser (III.), though still called Pul in the Babylonian list of kings, and reigned for nearly 20 years. We must suppose his relations with Samaria to have been these: Some time during Menahem's life he had led an army to the West and received Menahem's tribute; being now half of the Assyrian power, in 738–Pekah being then the king of Israel—as Tiglath-pileser III. had invaded N. and E. Palestine and carried away many of their inhabitants (2K.15.29). To this year belongs the inscription of one of his tablets (Schrader, Kellinschriftliche Bibliothek, vol. ii. plate 31), giving the name of "Menihimme of Samaria" as one of his tributaries. Though Menahem had then been dead 12 years, the use of his name on the tablet is explained by the fact (2K.15.19) that during Pul's years of Assyrian generalship Menahem had paid him tribute. Pekah was in 738 the sufferer;* and a few years later (732) his contemporary Ahaz of Judah also paid homage to Tiglath-pileser at Damascus. These two dates—738 and 732—are taken from cuneiform inscriptions, and can cause no discord in our chronology.

* "The tribute lists were sometimes carelessly compiled, and in error as to names" (Geo. Smith's Assyrian Canon, p. 179).

Note.—The chronology after the conquest of Jerusalem (586 B.C.) presents few, if any, difficulties. Authentication of the chronology is uncertain, but the inscription of Behistun, which gives the line of the Achaemenid kings of Elam and Persia to Artaxerxes (I.); (Hystaspis), gives, to the time of writing, the names of the rulers of Babylon, the Egyptian Ptolemies, and the Romans from 747 B.C. with the number of years each reigned. It is an accurate and reliable document, and its figures are confirmed for the years 893–666 B.C. by the Assyrian Eponym list. Each year of the Assyrian list bears the name of an officer called an Eponym. From the mention of a total eclipse which occurred in 763 B.C. is determined the date of all the remaining years.

* "Darius the Mede" is to be distinguished from the threeye of the same name who sat on the throne of Persia. All that the Bible states of him is that he was the son of a certain Ahasuerus or Xerxes, and was in the train of Cyrus of Persia at the taking of Babylon. By him "he was made king over the realm of the Chaldeans" (Dan.9.1), and from him he received the kingdom, being about threescore and two years old." (6.31). This was in 537, whereas Darius I. came to the Persian throne in 522. See the present writer's Second Temple (Murray, 1908); and for the usual identification with Gobryas, see Darius.

(a) The total eclipse of the sun, from which all the years of the Assyrian Eponym Canon are counted, happened June 15, 263 B.C. A reference to it is in the words of Amos (8:9).

(b) This is on the common assumption of the “second Isaiah,” who wrote in exile; but it is fair to add that another view argues the equal applicability of these chapters to the time of Hezekiah (e.g. Thirlie, O.T. Problems, 1907), in which case this would fit the date of the earlier part of Isaiah as given in item (5).

(c) His ministry began in the 59th year of his own age and 5th of Jehoiachin’s captivity—i.e. 13 Nebuchadnezzar (cf. Table III., Item 22). Similarly, 35 Nebuchadnezzar = 27th from Jehoiachin’s captivity (Ezk.29.17).

**Bibliography.**—George Smith’s Assyrian Eponym Canon remains indispensable to the student of Babylonian chronology. It should be supplemented by Dr. Savage’s volume on Early Israél for particulars of the first and second Babylonian dynasties. Mr. L. W. King’s Chronicles concerning Early Babylonian Kings, in Luzac’s series, are of immense importance, especially as bearing upon the question of Amraphel and Abraham. A little-known essay on the period of the judges, by Dr. Flinders Petrie, is to be found in the Proceedings of the Society of Biblical Archaeology, for December 1896. In this the construction of the book of Judges is taken to consist of records of Northern, Eastern, and Western, Palestine, an idea which has been expanded above. Moore’s Commentary on the Book of Judges is good, but fails in its chronology. Many treatises on the chronology of the Hebrew kings assume that Pekahiah and Pekah are variations of the same name, and are thereby rendered unreliable.

**Chronology of N.T.** There are no serious difficulties as to the dates of the N.T. period, and where authorities differ the variations are mostly slight. The date 4 B.C. for the Nativity, and for Herod’s death, is Whiston’s deduction from Josephus (14 Ant. xiv. 5, xv. 14; 17 Ant. viii. 1; 1 Wars xxiii. 8). But Herod reigned 37 years, and the battle of Actium (Sept. 2, 31 B.C.) was fought in his seventh year (1 Wars xix. 3). He took Jerusalem in the summer of 36 B.C. (14 Ant. xvi. 4). The date 1 A.D. for his death, thus obtained, fits with Mt.2.1, Lk.1.3, 23. A discussion of each of the crucial points will be found under the separate heads—e.g. Taxing (of Cyrenius); Star of Wise Men, etc., and questions as to the dates of the N.T. writings are left to the articles on the several books, and to such articles as Canon or N.T. But it will be useful to add, in an easily accessible form, the leading historical (as distinct from literary) dates, as in the list subjoined:
CHRYSOLITE

Leading Events.

Nativity of Christ (20th of Augustus as Emperor) 4 B.C. (or 1 A.D.)

Coponius, procurator of Judaea 6 A.D.

Marcus Ambrosius, procurator of Judaea 10

Annius Rufus, procurator of Judaea 13

Gratus, procurator of Judaea (1st of Tiberius) 14

Pontius Pilatus, procurator of Judaea 25

The Crucifixion 30 (or 32)

Marcellus, procurator 35

Martyrdom of St. Stephen 36

Conversion of St. Paul 37

Marcellus, procurator (1st of Caius, emperor) 38

Herod Agrippa I, acc. in Galilee 41

Herod persecutes the Christians (Ac.12.1-23) 44

Caspius Furius, procurator 44

First journey of St. Paul 45 (or 48)

Tiberius Alexander, procurator 47

Council at Jerusalem 48 (or 50)

Vespasianus, procurator 49 (or 51)

Second journey of St. Paul 52

Felix, procurator 52

St. Paul returns to Antioch (1st of Nero) 54

at Ephesus 55

at Jerusalem (Ac.21.18) 58

before Felix (Ac.23.24-24.27) 58

Porcius Festus, procurator 60

St. Paul reaches Rome 60

Albinus, procurator 62

End of the book of Acts 63

Nero persecutes Christians in Rome 64

Gessius Florus, procurator 64

Revolt of the Jews 66

Fall of Jerusalem (Vespasian, emperor) 70

Chrysotrite, one of the precious stones in the foundation of the heavenly Jerusalem (Rev.21.20). This name now denotes a choice variety (also called peridot) of the rather common mineral olivine, hard, transparent, and a yellowish-green colour, fine specimens of which are brought from Egypt, parts of Asia, and Brazil. But according to King, "the chrysolithus of Pliny, or at least his best sort, the Indian, was the gem" popularly termed the Oriental Topaz (i.e. a choice yellow variety of corundum), though some have suggested it may be the ordinary topaz (commonly a yellowish) and others a yellow jasper, which were both engraved by the Egyptians from the 18th dynasty onwards. [R.G.B.]

Chrysolothus (Rev.21.20 only). Now denotes an apple-green CHALCEDONY, found especially in Silesia. Darker varieties are called prase. Pliny, however, gives the chrysoprase as the third variety of his beryl, paler or yellower than the ordinary one, and probably means by it (according to Mr. King) the Indian CHRYSOLITE. But a mineral appearance of chrysolite which is yellowish with a bluish tint, and thus somewhat like turquoise, has been found in old Egyptian jewellery; and prase was used for scaraboid gems in the Levant at least as early as the 6th cent. B.C. So the tenth foundation-stone in the walls of the heavenly city may have been a variety of chrysolite.

Chub (22) Ezk.30.5 is mentioned only once in Scripture, in a passage referring to Egypt, where the translations differ considerably. The name does not occur in the LXX., and it is doubtful whether the Greek Αἰβης, "Libyans," must be taken as its equivalent.

Some manuscripts have the variant 24-25 KENAH, which might be compared to the Egyptian benah, or gneh, which, in the statistical table of Thothmes III., is the collective name for the nations of the S., the Ethiopians and the Negroes. [E.N.]

Chun (1Chr.18.8; R.V. Chur). [Berorthal.]

Church. (1) Meaning of the Name. The word church is found in the Teutonic and Slavonian languages generally; e.g. Anglo-Saxon circe, Scottish kirk, German Kirche, Swedish kyrka, Polish cerkwie. It is usually thought to be derived from κυρίας, "the house of the Lord." Other derivations which have been suggested, but are now little accepted, are from the Lat. circus, circulus, and the Gothic kélkyn (a tower, or upper chamber). The Gk. εκκλησία, which "church" is used to translate, denotes those who are called out from their tents or houses to the assembly; and so the assembly that gathered together in the LXX. It occurs frequently to translate γάλακτος, e.g. Deut.18.16. (2) The Church in the Gospels. The word εκκλησία occurs in the gospels only twice: in Mt.16.18, "Thou art Peter, and upon this rock I will build My Church"; and 18.17, "If he refuse to hear them, tell it unto the Church; and if he refuse to hear the Church also, let him be unto thee as the Gentile and the publican." In 16.18 the thought is closely connected with the kingdom of heaven; for our Lord goes on to say to St. Peter, "I will give unto thee the keys of the kingdom of heaven." Though the kingdom of heaven has a wider connotation than the earthly Church, yet the Church on earth is the kingdom of heaven in its outward and visible aspect. As such the Church has outward marks and organization. For admission into it baptism is necessary (Jn.3.3-5); to those who are in it the reception of the Holy Communio is commanded (Lk.22.19); the parables of the wheat and the tares, of the vineyard, etc., are commonly used to indicate its condition. In the LXX. it occurs frequently to translate γάλακτος, e.g. Deut.18.16.

Chur, one of the nations of the ancient world, who once inhabited Silesia. [O.E.S.]
The Church was thus an outward society, spiritual qualifications of repentance and belief were requisite in adults who should join it (2.37, 38, 30, 31); and all that is told of the life postulates that spiritual earnestness and devotion were regarded as necessities for any who were received into the Church. At the first the Church was a Jewish community, though some of its earliest members were not Jewish by nationality, but Hellenistic Jews (2.6, 9, 11, 14, 4, 36, 6, 1, 3, 5). But its limits were rapidly extended. Samaritans and the Ethiopian eunuch who was converted and baptized, and the Samaritans confirmed (8.5, 17, 27-38); that the privileges of the gospel might be received by the Gentiles was shown in the vision seen by St. Peter at Joppa, and the reception of the Holy Ghost by Cornelius and his company at Caesarea—so that baptism was administered to them by the command of St. Peter; and, though at first there were doubts at Jerusalem, the apostles and brethren in Judaea eventually "glorified God, saying, Then to the Gentiles also hath God granted repentance unto life" (10, 11, 18). Some of the Hellenistic Jews preached at Antioch to Greeks (11, 20), with the reading Ελληνικοί, which is more likely than Ελληνίδαι. St. Paul and St. Barnabas turned to the Gentiles at Antioch of Pisidia, converted Greeks there and at Iconium; and announced at Antioch that God had opened a door of faith unto the Gentiles" (13, 46-48, 14, 1-27); at the Council of Jerusalem the way was made clear for missionary work among the Gentiles, and the recognition of their position in the Church by the declaration that circumcision and compliance with the obligations of the Jewish ceremonial law were not to be required from them (15, 1-20). As an indication of the common and united life of all Christians in one society, the use of the word Church will abundantly appear in them and in the Revelation...
Lamb, made ready for His marriage, as "a bride adorned for her husband," as "the bride, the Lamb's wife" (Eph. 5.22, 27; Rev. 19.7, 8), as the bride of the Lamb (21.9, 22). The aspect of the Church as the temple of God, founded on our Lord's words in Mt. 16. 18, is found, like the teaching about the bride, in different periods of St. Paul's writings. The general idea of the work of the ministry as a work of building is in 2Cor. 3.10, 11. This leads up to the aspect of Christians collectively as the temple or sanctuary of God, inasmuch as they are indwelt by the Holy Ghost (3.16), and later Christians individually are spoken of as temples or sanctuaries of the Holy Ghost (6. 19). The idea of Christians collectively as the temple or sanctuary of God occurs again in 2Cor. 6.16. The idea, more fully explained in Eph.2.19-22. The Church, being thus the Body and bride of Christ, and the temple of God, has certain definite characteristics. In our Lord's teaching the idea of the external unity of the Church is conveyed in the expression "one flock" (Jn. 10. 16), and the Church is compared to a vine, which results from participation in the one life of Christ is suggested by the comparison of the vine and the branches (15.1-8). These two aspects of the unity of the Church are found in St. Paul's writings, and again at different periods in 1Corinthians and in Ephesians. If the unity of the Church is thus seen as a fact, it is clear that St. Paul describes as marks of the unity of the Church the worship of the one God, the holding of the one faith, the reception of baptism and the Holy Communion, the realization of the one hope of eternal life, and the possession of the Holy Ghost (1Cor.10.16, 17, 12.13; Eph.4.4,5). The ultimate destiny of the Church is to be perfectly and finally shown in the picture of the bride of the Revelation, where it is said "it was given unto her that she should array herself in fine linen, bright and pure; for the fine linen is the righteous acts of saints" (Rev.19.8). That the attainment of this destiny was the purpose of Christ in choosing the Church and in setting it apart as "His holy temple," is stated in the word "holy" (Rev.21.22). This statement that "Christ also loved the Church, and gave Himself up for it, that He might sanctify it, having cleansed it by the washing of water with the word" (i.e. in the cleansing at baptism, when admission to the Church takes place), "that He might present it (i.e. in the future perfect state described in the Revelation) the Church to Himself a glorious Church, not having spot or wrinkle or any such thing, but that it should be holy and without blemish" (Eph. 5.25-27; cf. 2Cor.11.2; Tit.2.14). That perfect holiness is the purpose and destiny of the Church is involved also in the truths that the Church is the Body of Christ and the temple of God. In addition to this purpose and destiny of perfect holiness, the Church as a whole is regarded as holy in her present life. St. Paul habitually addresses the whole Christian community in a place as the "saints" (Ro.1.7; 1Cor.1.1; Eph.1.1; Ph. 1.1; Col.1.2; cf. Acts 7.52), and he used the phrase "a holy temple in the Lord" with apparent reference to the present and yet perfected life of the Church (Eph.2.21). The Church is represented as having a mission to all races and classes of men. St. Paul teaches that the distinction of race and class do not exist in relation to Christ (Col.3.11); and in the representation of the kingdom of God in the Revelation it is said that "the kingdom of the world is become the kingdom of our Lord, and of His Christ" (Rev.11.15). In this teaching effect is given to our Lord's own commands (Mt.28.19; Mk.16.15; Lk.24.47); the decision of the Council of Jerusalem is wittily parodied by St. Paul's speech at Athens (Ac.17.26) and the results are carried on to their proper conclusions, and there is shown the fulfilment of the prophecies conveyed in the mystical sense of the Psalms (Ps.2.7, 8. 22.27, 72.5,9,11). The union with Christ which makes the life of the Church is represented as being headed by the head of the Church, the Lamb, and the present time is built on them, Christ being "the chief corner-stone" (Eph.2.20), and in the perfected Church of the future the names of the apostles are depicted as being on the foundations of the walls of the city (Rev.21. 14). Thus called, chosen, united, and transformed into the spiritual heir of the promises given in O.T. to the Israel after the flesh (Gal. 6. 16; 1Pe.2.5-10,17,4.17,5.2,9), those promises to Christians of being "partakers of the divine nature" (2Pe.1.4) surpass any of these older promises. Yet, in spite of all these splendid privileges, the Church is never perfect, and some of the classes who are within her borders are sinners. St. Paul speaks of grievous sins on the part of those who are in the society of "the saints" (1Cor. passim); cases in which one who is "named a brother" is "a fornicator, or covetous, or an idolator, or a reviler, or a drunkard, or an extortioner," have to be considered (5.11); he contemplates the building of work of very different qualities on the foundation Christ (3.11,12); declares that the "treasure" of the ministry is "in earthen vessels" (2Cor.4.7); and describes the "great house" of the Church as containing "not only vessels of gold and of silver, but also of wood and of earth; and one unto another, and some to be burned" (2Tim.2.20). A different expression of the same fundamental truth is in the teaching of St. John that, while no one who is true to the state of regeneration in which his baptism has placed him can acquiesce in committing sin (1Jn.3.9), nevertheless, the lives of Christians are (as a matter of fact) marked by some sins (18.9). (5) The Authority of the Church. The Church: is represented in N.T. as having the guidance of the Holy Ghost and the authority of Christ (Mt.16.18,18.17; Jn.14.16, 26.16.13; Ac.1.2,3.4.14.35.15.28; 2Cor. 10.10.8; Gal.1.11,12; 1Tim.3.15). That there is a divine sanction for the existence of the Church: is shown by the fact that it is the authority of the Church that is seen to have been exercised. The apostles exercised authority as teachers and rulers in their witness to our Lord and the facts of His earthly life (e.g. Ac. 1.8,22.2.3.2.4.3.33); in making known the conditions of entrance into the Church (2.38, 3.32,33); in instituting the office held by the Church (7.60); they "seven men of good report," and in appointing to it those on whom they laid their hands (6. 2-6); and in the proceedings of the Council of Jerusalem (15.1-29). In connexion with these matters, a prominent part was taken by St. Peter at the appointment of a new apostle in
the place of Judas (1:15) and the declaration of the conditions of entrance into the Church to the first converts (2:38); and some interpreters have assigned to him a chief place at the Council of Jerusalem (15.7,14), though there is a much stronger probability that the president was St. James, as being the chief at Jerusalem, while not so elsewhere (15.13,19). The apostles of the twelfth generation from the death of our Lord and the successor to Judas was to be chosen by lot was the work of the brethren in general (1:15, 16,23-26). The "seven men of good report" were chosen by the whole multitude of the disciples before their appointment and ordination by the apostles (6:2-6). Presbyters as well as the apostles were members of the Church of Jerusalem, and joined with apostles in writing the formal letter declaring the decision, although the decisive voices at the council appear to have been those of the apostles; and both presbyters and laity shared with them in making the decisions of the council known (15.2,4,6,7,12,13,22,23). In the Acts. St. Paul exercises authority in matters of tradition (1 Cor.15), and morality (e.g. 1Cor.5; 1Tim.1.20), and Church government (see the Pastoral Epistles, passim). To some extent the members of the Church in general, or the presbyters in particular, are associated with him in this exercise of authority (1Cor.5,12,11,16; 15.1; 2Cor.2.6,10; 1Tim.1.14; 2Tim.1.16). [Em. 5. COMMUNICATION.] (6) The Ministry of the Church. Before our Lord's ascension the apostles had been gradually and at intervals constituted as the ministry of the Church, with a commission to baptize, to administer the Eucharist, and to rule (Mt.16.19; 18.17,18,28,19; Lu.22.20; Ac.1.2,3; 11.19-24; 3.1,4-7; 2Cor.11.4-35), and had received some anticipatory gift of the Holy Ghost (Jn.20.22,23). Through the outpouring of the Holy Ghost on the Christian society, on the Day of Pentecost, those who thus formed the original ministry of the Church were given the most effective use of the ministerial authority which they had received from our Lord (Lu.24.49; Ac.1.4,8). The first delegation of any part of their ministerial position was in the appointment of the "seven men of good report," chosen by the Christian community, and appointed and ordained by the apostles by means of the laying on of hands (Ac.6.2-6). The character of the work afterwards done by two of these, Stephen and Philip (6.8-10, 8.5-13, 26-40), joined with the subsequent almost universal tradition of the Church, makes it highly probable that these were the original "deacons" in the sense of being the first holders of the third order of the ministry, though it is not impossible that they held a unique office, from which both the subsequent presbyterate and the subsequent diaconate were developed. [DEACON.] There is no explicit mention in N.T. of the institution of the office of presbytery, the second order of the ministry. Presbyters are referred to in Ac.11.30,14,23,15.2.4, 6.22,23,16.4,20.17,21.18,23,14; 1Tim.5.1,2,17, 19; Tit.1.5; Jas.5.14; 1Pe.5.1; 2Jo.1,3; 3Jo.1. The name "bishop" (ἐπίσκοπος) is applied to them in Ac.20.28; Ph.1.1; 1Tim.3.2; Tit.1.7; cf. 1Tim.3.1. [Bishop.] At Ephesus and Crete St. Timothy and St. Titus are seen to have possessed the authority of St. Paul to rule and ordain in the local churches of which they had charge (e.g. 1Tim.3.1,2,12,8,9,5,19-22; 2Tim.1.13,4,2; Tit.1.5,13,2,4,7,3,11,10). St. Timothy was ordained or consecrated to this office by the laying on of St. Paul's hands (ὅποι ἐπείδη ἔστων τῶν χειρῶν μου), together with the laying on of the hands of the presbyters (μετὰ ἐπείδη τῶν χειρῶν τοῦ πρεσβύτερων), 1Tim.4.14; 1Tim.5.21. In the Acts prophetic and teachers are mentioned in 11.27,28,13.1-3, 15.32,21,10,11, as foretelling the future, ministering to the Lord, laying hands on SS. Barnabas and Paul either in a formal act of appointment or, as is much more probable, in sending them out on a special mission, and preaching. St. Paul mentions "prophets," "teachers," "workers of "miracles," and possessors of "gifts of healing," helps, governments, divers kinds of tongues," as well as "apostles" in 1Cor.12.28-30; and, "prophets," "evangelists," "pastors," and "teachers," as well as "apostles" in Eph.4.11. Of these the word "evangelists" was used in a different sense, the work done rather, than the designation of an office: "prophets" and "teachers" may have denoted some such formal office as that held by the apostolic delegates SS. Timothy and Titus, or may also have been descriptive of work done. [EVANGELIST.] In the various parts of the Church, in the first instance, there were the following officers of the ministry: (i) the apostles; (ii) apostolic delegates, such as St. Timothy and St. Titus; (iii) "presbyters" or "bishops," forming part of the local ministry; (iv) deacons, also part of the local ministry; (v) "prophets" and "teachers," supposing that these held a formal office. The title of ordination consisted in the laying on of hands. The persons mentioned as ordaining are the apostles and the apostolic delegates, to whom must be added the "prophets" and "teachers" on the less likely hypothesis that their laying on of hands on SS. Barnabas and Paul was to the ordinatio beneficiae. [DEACONESS: LAYING ON OF HANDS.] Meyrick, in Smith's D.B. (2nd ed.), i. 593-603; also in 1st ed. vol. iii. pp. c-cviii; Armitage Robinson in Encycl. Bibl. i. 820-827; Gayford in Hastings, D.B. i. 425-430; Hort, Christian Ecclesia; Gore, Church and Ministry; Moberly, Ministerial Priesthood; Armitage Rendall in Ephesians, pp. 41-45, 152; Stone, The Christian Church, and The Church, its Ministry and Authority; Murray's New English Diet. ii. 402, 403.

Churches, Robbers of. [ROBBER'S OF CHURCHES.]

Chushan-rishathaim, the king of Mesopotamia (Arar, Nahhabab, who oppressed Israel in the generation immediately following Joshua (Judg.3.8). His dominions probably lay between the Euphrates and the Khabur. Israel was freed from Chushan-ri-shathaim's yoke at the end of 68 years by Othniel. Caleb's nephew (Judg.3.10), and nothing more is heard of Mesopotamia as an aggressive power. The increased power of Assyria, c. 1270 b.c., would naturally check the activity of the smaller nations within her reach.

Chusid (voc. in Vet. MS. Jth.7.18), a town noticed as being near Ekron. Now
CHUZA

Kūsah, a village 6 miles S. of Shechem and 5 miles W. of ‘Agrabeh or Ekrebēl. [c.r.c.]

Chu’za, house-steward of Herod Antipas (Lu.8.3), and husband of Joanna (Mat.27.56). The name occurs in rK.6.15 only, and the verb in ver. 9, and in Deut.33.21, rK.7.3,7, Je.22.14, Hag.1.4. The roofs of the temple and palace of Jerusalem were of cedar, the rafters covered by planks on which thin plates of gold were nailed (2Chr.3.5,9); such ceilings were also painted red (Je.22.14). It is difficult to tell how many of the brightly painted wooden ceilings of the old Arab palaces in Damascus, and in other Syrian cities, which may still be seen. Another word (Heb. sheqeph, rK.7.5) is supposed by Gesenius to mean a ceiling rather than a "window," the Arab. saqaf meaning still "a ceiling."  

Cilicia, a maritime province in the S.E. of Asia Minor, bordering on Pamphylia in the W., Lycaonia and Cappadocia in the N., and Syria in the E. Lofty mountain chains separate it from these provinces, Mons Amanus from Syria, and Antitaurus from Cappadocia. The rivers of Cilicia were anciently revered by the ridges of Antitaurus, and was denominated Trachaea (rough), in contradistinction to Pedias, the level district in the E. The connexion between the Jews and Cilicia dates from the time when it became part of the Syrian kingdom. In the Apostolic age they were under the jurisdiction of the Roman procurator of Syria, but it is not improbable, that such a line of command as the one described by Josephus in his Antiquities of the Jews, (vii.13.4; xii.17.2), was maintained by the Roman procurators at that time. The curious story of the journey of Jerusalem, worn out by the great quantity of dirt which is the image of the spouse. In Rev. 18.13 it is included among the merchandise of Babylon. It was imported into Judea by the Phoenicians or the Arabians, and is now found in Smyrna, Borneo, China, etc., but chiefly, and of the best quality, in the S.W. of Ceylon. It probably first reached India and Phoenicia overland by way of Persia from China. The Heb., Gk., and Eng. words for cinnamon are the same. Wyclif keeps to the Latin term canel (canella, a little cane). Pliny says (xii.28): "In Syria there is a drug which they call Cinnamonum Caryophyrum. A juice or oile of this is pressed out of a certain nut. This Cinnamon differeth much in forme from the stickes of true Cinnamon ... in smelle it commeth neere." Herodotus says (iii. 107, 111) that the Greeks got the name from the Phoenicians. In another place (xvi. 32) Pliny goes out of his way to say: "The Cinnamon sticks of the normal forest are not similar to those "in the air or earth of Syria." [h.e.c.r.]

Cinneroth. [CHINNERETH.]

Cira’ma. The people of Cirama (Kirama) and Gabdes came up with Zerubbabel from Babylon (1Esda.5.20). The text is corrupt; Ezra (2.26) and Nehemiah (7.30) have RAMAH (Ramah) and Gaba (Cirama) respectively.

Circumcision. Until comparatively modern times it has always been assumed that circumcision was, at least originally, an exclusively Jewish rite; this is, however, very improbable, and in the Southern and Eastern worlds circumcision is exceedingly prevalent, though only amongst certain peoples or religions. Mohammed was not circumcised, nor is circumcision enjoined in the Koran, but it has been practised almost universally by his followers for many centuries. Probably this is the outcome of a practice long anterior to Islam, and very possibly it is as old as the circumcision of the Israelites (Gen.17.23). Various other nations also have the custom—e.g. certain tribes of Bantus, Hottentots, and Australian aborigines. Herodotus (i. 44) speaks of Egyptians, Colchians, Ethiopians, and Phoenicians as circumcised. But it is evident that either the nations surrounding the Hebrews in Scriptural times did not observe the rite, or that it was observance in the case of individuals, not as a national custom. The constant use in both O. and N.T. of the phrase "the uncircumcised" to distinguish those who were not Hebrews is sufficient evidence of this—e.g. 2Sam.1.20; Ezek.28.10; Ac.11.3; Ro.3.30; Gal.2.7, etc. The curious story in the Book of Ruth, wherein we are told that “the uncircumcised” have been taken to refer to some surgical operation, which should at least render the circumcision of those who practised it less obvious when they were stripped for the games in the gymnasium which Antiochus Epiphanes had built in Jerusalem. This view is that of many of the Jewish commentators, and at first sight seems to be supported by the writings of contemporary Rabbis. Thus, R. Eleazer Hammudai (d. 69 A.D.) says, "He who profanes things sacred ... and makes void the covenant of Abraham our father ... has no right in the land of Israel." In the Book of Jubilees, Hyrcanus II. speaks of those who "make the members of their body appear like those of the Gentiles." On the other hand, the Jewish commentator Roschi interprets these passages as referring to those who, in obedience to the commands of the heathen tyrants, were not circumcised. As a matter of fact, any operation for the concealment of circumcision is almost, if not quite, impossible, and the phrase in rMac. should probably be taken to refer to the moral and spiritual sinking of the people concerned to the level of the "uncircumcised." Like the other laws given to the Jews, this command is based upon pure morals, this norm is not profaned by the profanation of the worshippers. The comparative insensiveness of the glans, and the absence of accumulations of dirt or matter, contributes to this result, and it
is a curious fact that, while many circumcised peoples practise polygamy, sexual vice in its strict sense, and especially in the more abnormal forms, is comparatively unknown among such, although exceedingly prevalent in surrounding tribes. [CRIMES; FAMILY; MOSES.] In St. Paul's time the Judaizers at Philippi wished to compel the Gentile converts to be circumcised and to practice the observances of the Mosaic law, and they were ready to play upon words (καταγωγή, περαγωγή) describing this circumcision as the 

consecration (Ph. 3.2). For the conflict in the early Church (Ac. 15.1) with regard to the circumcision of the Gentiles, see Paul. St. Paul considered himself the apostle of the "uncircumcision" and St. Peter of "the circumcision" (Gal. 2.7, 8), and St. Paul's attitude towards the question is shown in words in Ro. 3.1, 30, 4.9, 10, 1Cor. 7.18, 6.12, 13, Gal. 5.11, etc., and in acts in his different treatment of the cases of Timothy (Ac. 16.3) and Titus (Gal. 2.3) respectively, which treatment was wholly consistent with his words and general principles. For the spiritual meaning of circumcision and its application to Christian doctrine by St. Paul, see Ro. 2.25; 1Cor. 7.19; Gal. 5.6, 6.15; Ph. 3.3; Col. 2.11, etc. [F.]

Cis (Ac. 13.22) = Kish, 1.

C'lsai (Est. Apoc. 11.2) = Kish, 2.

Cistern (Heb. בַּר; lit. "pit"). Cisterns were cut in rock as needed with cement (Je. 2.13), and if not repaired, left only "broken cisterns." They are numerous in those parts of Palestine where the soft limestone is on the surface, and where in consequence there are no springs. They are shaped like a short-necked bottle, apparently with a wheel for the bucket-rope (Ec. 12.6) in some cases. On the Moabite Stone, in 8th cent. b.c., cisterns in a city are noticed. The rain-water from the roofs was collected in them. They were private property (2K. 18.31; Pr. 5.15; Is. 36.16). Jeremiah was let down into such a pit (A.V. dungeon), where only mud remained (Je. 38.6), and was drawn up by cords (12). The Hebrew word is "underground pit," whether in a town or country (2K. 24.28, 29, and "dungeon" in 41.14 (cf. 39.20-23). [C.R.C.]

Cithern. This instrument is mentioned in 1Mac. 4.54, where A.V. gives, "With songs and citherns and harps and cymbals," as a translation of יֵבָדָא קַדְרָהֹא קַדְרָהֹא קַדְרָהֹא קַדְרָהֹא קַדְרָהֹא קַדְרָהֹא קַדְרָהֹא קַדְרָהֹא קַדְרָהֹא קַדְרָהֹא קַדְרָהֹא קַדְרָהֹא קַדְרָהֹא קַדְרָהֹא קַדְרָהֹא קַדְרָהֹא קַדְרָהֹא קַדְרָהֹא קַדְרָהֹא קַדְרָהֹא קַדְרָהֹא קַדְרָהֹא קַדְרָהֹא קַדְרָהֹא קַדְרָהֹא קַדְרָהֹא קַדְרָהֹא קַדְרָהֹא קַדְרָהֹא קַדְרָהֹא קַדְרָהֹא קַדְרָהֹא קַדְרָהֹא קַדְרָהֹא קַדְרָהֹא קַדְרָהֹא קַדְרָהֹא קַדְרָהֹא קַדְרָהֹא קַדְרָהֹא קַדְרָהֹא קַדְרָהֹא קַדְרָהֹא קַדְרָהֹא קַדְרָהֹא קַדְרָהֹא קַדְr

CITIES OF THE LEVITES

"Fenced Cities" (Heb. יֵבָדָא, as distinguished from גירָעַד (town), קַדְרָהֹא (village), and חֶדֶר (enclosure). The expression "אֲדַר וַאֲדַד" (A.V. shut up or let; Deut. 32.36; 1K. 14.10, etc.) seems to contrast a shut-up or fortified town with a temporary dwelling used only in summer (still called 'Ašbak in Palestine), thus including all. Water is mentioned from "tower to hamlet"; see Is. 17.9. "His strong cities shall be as the forsaken places" (R.V.). The first city is said to have been built by Cain the agriculturist, brother of Abel the shepherd (Gen. 4.17), and was called הָנֹדֵק, re-calling עָנָי (great city), the old Akkadian name of Babylon. Water was provided, "store cities" (R.V. Ex. 1.11) for the Egyptians. Unwalled villages are contrasted with a walled city in Zech. 2.4. The Gate of a city was a place of business (Gen. 23.10; Ru. 4.11); the narrow "streets" (שִׂק: Arab. siiq) and "broad places used for markets (רֵחַ֣נְוֹת) were guarded at night, and were attacked by Gentiles who wished to plunder the city (1K. 9.17, 2). Such towers existed also in the villages (1Chr. 27.25; 2Chr. 26.10). On the city towers were engines to shoot darts and stones (2Chr. 26.15); which defence opposed the filling of the ditch and the battering of the walls (2Sam. 20.15). Water was provided by a CONDUIT, or by a rock aqueduct; and at Jerusalem and Gibeon a rock passage led down from within the city to a cave spring. The walls also stood on rock scarps, with an outer fosse. Samaria stood siege for 3 years (2K. 15.10), and Jerusalem for 2 years (25.1.2). As regards SIZE, Babylon, Jericho, and Memphis were very large cities. Jerusalem at its largest covered 300 acres, and so did Caesarea. Tyre on its island occupied only 100 acres, as did Rabbath-ammon in a restricted site. The Egyptian bas-reliefs represent Ascalon, and Kadesh of the Hittites, as cities with walls and towers in 14th cent. b.c. The Assyrian picture of LACHISH shows a city with 24 towers, having inside it both stone houses with two storeys and also cabins of mud with wooden props for the roof. Thothmes III. relates that the defeated king of Megiddo, in 15th cent. b.c., was dragged up the walls by his friends. Meshal of Moab (9th cent. b.c.) reports that he caused cisterns to be dug under his city, and fortified it by a wall on a mound (ophel), and by an "additional" (yaran) wall. Seennacherib, in 702 b.c., says that Hezekiah was "obliged to shut the gate of his city." [C.R.C.]

Cities of Refuge (Num. 35.6, 13, 15; Deut. 4.41-33, 19.2; Jos. 20.2-9). These cities, 3 E. and 3 W. of Jordan, appointed for Homicides as sanctuaries, were in the N., S., and centre of the land of Israel, on either side of the river. They are described under their names: GOLAN (Sakhem el Jawlūn), RAMOTH (Ranimūn), and BEZER (unknown), E. of Jordan; KEDESH (Qedes), SIECHEM (Nabûs), and HERMON (el Khudil), W. of Jordan; and were priestly cities, apparently with walls in all cases. [C.R.C.]

Cities of the Levites (Jos. 21.13-42; 1Chr. 6.55-81). These 48 walled cities are noticed only in connexion with the Levites, in the cases of Beth-shemesh of Judah.
Cities of the Plain. Before the destruction of these four cities the "whole kikkár [A.V. plain] of Jordan," as seen from E. of Bethel, is said to have been like Eden (Gen.13.10, 17; 19.27). It is possible that the lightning, according to Josephus) the kikkár was ruined, and the pillar of salt no doubt resembled those still visible near the Dead Sea (Gen.19.25,26; Deut.29.23; Is.1.9,10; Am.4.11; Ho.11.8), the plain produced only the bitter apples of Sodom (the 'osher tree, Gen.19.23) and the black apples of Gomorrah, which were supposed有毒。Citizenship of Judea, however, had been given to the Sodomites, who were exempted from certain taxes and duties (2Sam.8.15 and Anathoth (1K.2.26). They had "suburbs," or open spaces (mighrashim; see Villages), extending about a quarter of a mile beyond the wall (Num.35.4); and the fields to double that distance, belonging to the Levites on each side of the town (ver. 5; Lev.25.34).

CITIES OF THE PLAIN

Claudia. [Apple-tree.] Claudia (Ac.27.16), a small island nearly due W. of Cape Matala on the S. coast of Crete, and nearly due S. of Phcenice. It is still called Claudiana, or Gaudonesi, by the Greeks, which the Italians have corrupted into Gozzo. The ship which conveyed St. Paul was seized by the gale a little after passing Cape Matala, when on her way from Fair Havens to Phcnice (Ac.27.12-17). The storm came from the island (ver. 14), and there was danger lest the ship should be driven into the African Syris (ver. 17). We read that she was driven to Claudia inirts, a very remarkable circumstance, where there would be smooth water, as the gale came from the N.E. or E.N.E.

Claudia, a Christian woman mentioned in 2Tim.4.21: probably a freedwoman or slave of "Caesar's household." Her identification with the British maiden whose marriage with Publius Pudens by Suetonius (Caput Barbarum, now Kefr Bârêba) is a hill 3 miles E. of Hebron (Surv. W. Pal. iii. p. 304), whence a view is gained over the desert of Judah. The Dead Sea and Jericho are hidden, but the smoke in the valley might easily be seen. The cities were not only in the kikkár of Jordan, but the desolate character of the plain, as indicated by the proximity to Zoar (Tell Shaghr), is seen: Gen.19.15,23. They have left no trace of their existence, unless in the case of Admah. [Adam, City.] Josephus seems to have supposed that they lay S. of the Dead Sea, as he puts Zoar in Arabia (see i Ant. xx. 4 : 4 Wars viii. 4: an error (which still survives), for the "kikkár of Jordan" was not S. of the mouth of that river. It is a curious coincidence, perhaps, that nearly all the required names still apply to natural features of the ground near Phasaelis (Fusâli, 12 miles N. of Antioch, the capital of Palmyra, called also Sâmân, often supposed to be the Salmon of Melchizedek, where Abraham met the king of Admah (Gen.14.18,21). Here we find ed Dâmîth (Admah) and Tal'at 'Amra (ascent of Gomorrah); a valley called Siddheh (Siddim), and another called el Hamr, or "of bitumen," in Sodom (burning) is not represented. It was probably farther S. and near Jordan, being the city whence Lot fled to Zoar. The valley is now full of salt springs, and has a salt soil, even N. of Fûsâli; but the part near the hills is carpeted with grass and flowers in spring. [Salt Sea.]

CITIUM, a city of the island of Cretum. It was situated on the coast of Ac.22.28, R.V.). St. Paul was (1) a citizen of Tarsus, a "free city" (Ac.21.39); prob. Jews formed one of the city "tribes"; (2) also a Roman citizen, above mere provincials, exempted from degrading penalties like scourging and crucifixion, with the right of appeal to the emperor after sentence, the payment of tribute, and any charge. He claimed these rights (Ac.16.37,38, 21.39, 25.10,11), which he had inherited, not purchased like Lysias (22.28). Many Jews of Asia Minor were "Romans" (Josephus, 14 Ant. x.). Citizenship is mentioned metaphorically, Eph.2.19, Ph.1.27,3:20 (R.V. citizens, fellow-citizens, members of the commonwealth). [H.S.]

Clement, a fellow-labourer of St. Paul at Philippi. It was generally supposed that Clement was identical with Clement of Rome. The difficulties as to date and place are not insuperable; and there
would be a coincidence between the nature of the charge given to Clement in Ph.8:3 and his endeavoure long afterwards to compose (by the epistle which bears his name) the dissensions of the Corinthian church. [K.R.B.]

**Cleopas. [Alpheus.]**

Cleopatra. 1. "The wife of Ptolemy." (Esth.11:1) was probably the granddaughter of Antiochus the Great, and wife of Ptolemy VI. (Philometor).—2. A daughter of Ptolemy VI. (Philometor) and Cleopatra, r. She was given by her father in marriage, first to Alexander Balas, 150 B.C. (1Mac.10:58), and then, 146 B.C., to his rival Demetrius Soter (11:12). While Demetrius was a prisoner in Parthia she married his brother Antiochus VII. (Sidetes). She afterwards murdered Seleucus, her eldest son by Demetrius; and was herself poisoned 120 B.C. by a draught she had prepared for her second Antiochus VIII.

**Cleophas** (R.V. Clophas). It is doubtful whether this is the same person as Alpheus. It has been, however, suggested that Κλωπάς (Jn.19:25) is derived from Gk. κλόπεω, "to conceal," and thus it might etymologically correspond to Alpheas from Aram. αλφας = "covering over." Bp. Lightfoot's alternative suggestion is discussed under ALPHEAS.

**Cleopha.** The actual word does not often occur in either A.V. or R.V. It strictly represents the flowing outer garment worn by the Jews (Mt.5:40; Lk.3:49); and this in O.T. is represented by several different words. [Dress.] In 2Tim.4:13 it represents φηλώξις (Lat. paenula), which was of a heavier and rougher material, and in shape and original purpose is thought to be the foundation of the Eucharistic Chasuble. The following metaphorical uses of the word should be noted: Lk.59:17; 1Th.2:5 (φηλάσιον; cf. Jn.15:22); and 1Pe.2:16 (περιθαμμα). [C.L.F.]

**Cloud.** Among both Hebrews and Arabs the cloud is a term constantly connected with a view to prognosticating rain (1K.18:14), and they enter largely into Oriental imagery. With both peoples a cloud without rain is a simile for promise without performance (Pr.16:15; Ls.15:4,25; Ju.12; Freytag, Arab. Prov. xii.14, xxiv. 177). The morning or summer cloud is a figure for transitoriness (Job 30:15; Ho.6:4; Freytag, xii.87), or interruption (Lam.2:1,3,14). In times of crisis Jehovah comes from Sinai in the midst of a thunderstorm (Judg.5:4,5; Ps.68:8; Ezek.1:4), riding upon a cloud (Is.19:1, called a "cherub" (Ps.18:10 = 2Sam.22:11). A bright cloud at times rested on the mercy-seat (Lev.16:2; Ex.40:38, P.). The Lord descended in the cloud to speak with men at the door of the tabernacle (Ex.33:9,10). Reminiscences of these phenomena are found in No.9:12, Is.4:5, and elsewhere. The word translated "pillar" is used for a column of smoke in Judg.20:40, and it has the same significance here. The pillar of cloud and fire made its first appearance at the crossing of the Red Sea, when it sheltered the Israelites from the Egyptians (Ex.14:19,20). Here, however, the rendering of the A.V., "And it was a cloud and darkness to them, but it gave light by night to these," is a mere matter of shift. The Heb. is hardly translatable. The Gk. has και θλvection αεριος και γαρνος, και διαλεκτη νος. In Ps.105:39 the cloud is for shade. After the desert period this cloud is not mentioned again until it reappears at the consecration of Solomon's temple (1K.8:10,11; 2Chr.5:13,14). After that cloud is not mentioned until Ezekiel saw this symbol of Jehovah's presence leave the temple for ever (10:3,4,11:23). [T.H.W.]

**Cnidus** is mentioned in 1Mac.16:23 as one of the Gk. cities which contained Jewish residents in the 2nd cent. B.C., and in Ac.27:7 as a harbour which was passed by St. Paul after leaving Myra, and before running under the lee of Cnidus. It was a city which lay on the extreme S.W. of the peninsula of Asia Minor, on a promontory now called Cape Crio, which projects between the islands of Cos and Rhodes (see Ac.21:1). The remains of Cnidus are those of a city of great magnificence.

**Coal.** The representative in A.V. of five Heb. words used in this sense, viz. 'Στέφανος, given from one of the "heathen" or "Gentile" names (1K.18:14). The most frequently used is gēsethē, a live ember, burning fuel, as distinguished from pehēm (Pr.26:21). In 2Sam.22:9,13, "coals of fire" are put metaphorically for the lightnings proceeding from God (Ps.18:8,12,13,140:10). The proverbial expression: "Thou shalt heap coals of fire upon his head" (Pr.25:22), is adopted by St. Paul in Ro.12:20, to express metaphorically the burning shame which men must feel when their evil is requited by good. (2) pehēm. In Pr.26:21 this word clearly signifies fuel not yet lighted. The fuel meant in the above passages is probably charcoal, certainly not coal; for, though frequently called "coal," it is not derived from Anthracite, but was rarely and locally used, even by the Romans. (3) receph, or ricph (Is.6:6, properly a hot stone). In the narrative of Elijah's miraculous meal (1K.19:6) the word describes the mode in which the cake was baked—viz. on a hot stone, as is still usual in the Mediterranean countries. The word is adopted in A.V. "burning coal," and in marg. "burning diseases." The former meaning is supported by Can.8:6, the latter by Deut.32:24; R.V. has "fiery bolts." (5) shēhōr (Lam.4:8) is rendered in E.V. "their visage is blacker than a coal," marg. "darker than blackness."

**Coat.** [Dress.]

**Coat of mail.** [Arms.]

**Cock.** There appears to be no mention of domesticated poultry in O.T. In N.T. the "cock" is mentioned in reference to St. Peter's denial of our Lord, and indirectly in the word "cock-crowing." (Mt.26:34; Mk.14:30,33,35, etc.). Domesticated fowls were known to the ancient Greeks and Romans, and since no mention of them is made in O.T. and no figures of them occur on Egyptian monuments, they were probably introduced into Judea by the Romans, who prized them both as articles of food and for fighting.

**Cockatrice.** [Adder; Serpent.]
Cockcrow. In Syria cocks crow at irregular intervals during the night, but the term is applied definitely to the period preced ing dawn. In the ancient days of the world, when Zend Avaesta the cock is called the paradores, he who foreshes (the coming dawn); and the Jews have a benediction, “Blessed be Thou, O God, ... Who gavest understanding to the cock to distinguish between day and night” (Ber. 60b). Mk.14.30 refers to two cockcrowings, the first probably being at midnight, the second at dawn (13.35). There is no mention of the first in Mt.26.34,7, Lu.22.34, Jn.13.38. The term is applied to the third of the four Watches of the Night (Mk.13.35). [h.h.]

Cockle (Heb. badshah) occurs only in Job 31. 40. Gesenius says that badshah denotes any bad weeds or fruit, and may in Job signify bad or smutted barley. Harris says the word badoshi or baseh appears to imply a weed, not only noxious but of a fetid smell. But it may mean base in quality. In Wyclif (1382) the reading in Mt.13.25 is: “But, when men sement, his enmye came, and sewed above derill, or bad seed (badsa), in the midel of the good seed (badsa), and the roone of Job was thorn. His roone in Job is thorn.” The Aram. (Targum) rendering in Job 13.25 is Thorns.

Caesarea Philippi. In this place the gate of heaven was opened to Peter, whose subsequent confession of the Messiah is recorded in Mt.16.16. The modern town is the residence of the Roman Catholic bishop of Acco.

C. of A. Coa.H., a place (Jth.15.4 only) mentioned with Choba. Possibly Qafun, a ruin in the Jordan Valley, 5 miles N.E. of el Mekkhibbi. [Choba.] [c.r.c.]

Collossi, Epistle to, the. The Pauline authorship has ample external testimony. Irenaeus, Clement of Alexandria, Tertullian, Origen (all of 2nd and 3rd centuries.), quote Colessi, as St. Paul’s without a doubt, and still earlier we find probable echoes of its phraseology. Not before 185 was suspicion involved close to the great road which led from Ephesus to the Euphrates. Hence we might conclude that St. Paul passed this way, and founded or confirmed the Colesian church on his third missionary journey (Ac.18.23-19.1), but Col.2.1 seems to show that he had not been there when the epistle was written. He hoped for the being delivered from his Roman imprisonment is clear from Ph.22 (cf. Ph.2.24). Philemon and his slave Onesimus dwelt at Colesae, as did also Archippus and Epaphras. Mr. Hamilton was the first to determine the actual site of the ancient city, at some little distance from the modern village of Choiophori.

Colettes, Epistle to. The Pauline authorship has ample external testimony. Irenaeus, Clement of Alexandria, Tertullian, Origen (all of 2nd and 3rd centuries.), quote Colessi, as St. Paul’s without a doubt, and still earlier we find probable echoes of its phraseology. Not before 185 was suspicion involved close to the great road which led from Ephesus to the Euphrates. Hence we might conclude that St. Paul passed this way, and founded or confirmed the Colesian church on his third missionary journey (Ac.18.23-19.1), but Col.2.1 seems to show that he had not been there when the epistle was written. He hoped for the being delivered from his Roman imprisonment is clear from Ph.22 (cf. Ph.2.24). Philemon and his slave Onesimus dwelt at Colesae, as did also Archippus and Epaphras. Mr. Hamilton was the first to determine the actual site of the ancient city, at some little distance from the modern village of Choiophori.
threatening latter years of Nero, but before the great persecution. Whenever written, we may safely affirm that its date is the date of the "Ephesian" epistle (which in fact may be alluded to in it [4:16] as "the epistle from Laodicea"—a circular, travelling from mission to mission). Parallel topics and phrases are so numerous in the two epistles that, beyond all reasonable doubt, they are products of the same moment. These parallels may be tabulated with great profit by the student. He will find that Colossians is obviously the more local and particular of the two writings, while probably Ephesians grew up immediately after, in more general forms, on the lines suggested by Colossian problems. Weiss (Einleitung) writes: "The peculiar affinity of the two epistles is cleared up only on the hypothesis that both are the independent but contemporaneous compositions of the same author." Practically, says Hort, "they were written by persons unknown to each other. As a matter of impress of St. Paul's wonderful mind." The occasion of writing is readily inferred from the epistle itself. Epaphras, a Colossian, and probably (1:7) the first evangelist of the place, had visited St. Paul at Rome. His report had much in it to rejoice the apostle. But there was one thing no doubt impressed upon the mind of the writer of this teaching, which tended to minimize the supreme greatness and significance of Jesus Christ, to emphasize rabbinic observances, and also to advocate a "philosophy" more or less occult. Circumcision, Jewish festivals, ceremonial laws of diet, were one side of the teaching; angel-worship, and a rigorous asceticism was another. The school was not openly, or perhaps even consciously, anti-Christian. But it was such in fact; obscuring the glory of the Christ, and the freedom and largeness of His promises, and the direct action of the Spirit upon the disciple. The full character of the "Colossian heresy" is a difficult problem. Lightfoot sees in it a blend of pharisic Judaism with the Essene teaching on the essential evil of matter. Hort thinks that it was rather the ordinary Judaism, marked by some special phases, and taught by men nominally within the Church, like the disturbed Galilean, Gnosticism, and the Essenes. Lightfoot, recognizing some non-philosophic elements (see e.g. the "neglecting of the body," 2:23), seems to us to meet the data most completely, but the question is too extensive for discussion here, and for an intelligent study of the positive teaching of the epistle we need not balance elaborately the rival views. In any case, the "heresy" threw the pre-eminence of Jesus Christ into the background, and obscured the supreme freedom and power of His Gospel under a growth of worn and gratuitous observances. This was to St. Paul a matter of doctrinal life and death. The epistle accordingly, in its dogmatic element, emphasizes with surpassing power the imperilled truths. Jesus Christ is set forth as "all and in all"; the First and the Last; the perfect Revelation of the invisible God; the Agent, Head, and End of the entire created universe; the Sacrifice for human sin, bringing peace by His cross to the divided conscience, the indwelling Life; the living Head of His Body, the Church; the Hope of glory. He is, in fact, His own Gospel, and the salvation of man consists in union and harmony with Him. [Paul] Such is the epistle in its dogmatic teaching. This is followed, in vital connexion (3, 4), by instructions in detail upon the practical Christian life, as the fruit of living faith. Purity, truthfulness, and unselfish love, above all in the relative duties of home, are all enforced in the light of eternal truth and grace. Personal information and salutations close the epistle, giving to it the final touch of naturalness and reality. The region around Coloss (properly Colossae, and called also Colossae later) is volcanic; Laodicea, a few years after the writing of the epistle (which was to be read to the converts there also), was wrecked by earthquake. Colossae was not personally evangelized by St. Paul (2:1). But his three years at Ephesus (Ac.19:10) allowed vast numbers of the residents of Colosse a privileged contact with him there. Among them would be visitors from Colossae, and to these, in all likelihood, belong the names now so familiar to us (see this epistle and that to Philemon)—Epaphras, Philemon, Apphia, Archippus, and perhaps Philemon's slave Onesimus, afterwards the runaway, whom St. Paul sent back, "to whom ye ought to believe, and to return to Colossae. [H.c.g.m.]

Colours. The terms relative to colour, occurring in the Bible, may be arranged in two classes, the first including those descriptive of natural objects, the second the artificial mixtures employed in dyeing and paint. It is to be remembered at the outset that an exact terminology of colours is of modern growth. Ancient peoples, even so artistic a nation as the Greeks, used the names of colours very vaguely. The Hebrews had not the artistic faculty at all strongly developed, and their names for colours, especially those of the first class, cannot be interpreted in any hard and fast manner. (1) The natural colours noticed in the Bible are white, black, red, yellow, and green. (The "speckled," or "bark," R.V. "sorrel," of Zech.1:8 is uncertain. It was probably a variety of red. The "pale" colour of Rev.6:8 is the familiar Gk. χαλκός, paleo, "richly tinctured," of literary importance. For green is apparently applied more to the freshness and beauty of vegetation than to its actual colour; while yellow (used very seldom) is difficult to discriminate from some shade of green. White is prominent, especially as representing light, which deeply impressed the Heb. mind, not only by its brilliancy and beauty, but by its divine symbolism, and its profound moral connotation. Black is prominent also as the physical and moral opposite of white, and also as the typical complexion of Orientals. Red was also vividly appreciated by the Hebrew, as the colour of blood (the sacred principle of life), of wine, of love, of fire. Black and red are perhaps especially the red soil and red cliffs of the country most familiar to the Jews. (2) Artificial colours. These appear to have been known at a very early period (cf. Gen.38:28; Ex.26:6; Jos.2:18; Judg.5:30); but there is no evidence to show that the Hebrews of the period of the Exodus were themselves acquainted with the art of dyeing. They were probably indebted
COLOURS

both to the Egyptians and the Phoenicians, to the latter for the dyes and to the former for the pomegranates which they chiefly used were extracted by the Phoenicians (Ezk. 27.16) and in certain districts of Asia Minor, especially Tyatira (Ac. 16.14). The principal dyes were purples, light and dark (the latter being the "blue" of A.V.), and crimson ("scarlet," "A.V."). Vermilion was introduced at a late period (a) Purples. The ancient natural dye, Helix ilicis, was probably a lighter shade, in which red predominated over blue; while the darker purple, a violet ("blue of A.V.") was produced from another species of shell-fish. (b) Crimson. This colour, well known and valued over the whole ancient world, was obtained from the secretion of a species of shell-fish, the Murex trunculus of Linnaeus, found in various parts of the Mediterranean. It is difficult to state with precision the exact tint described by the Heb. name. The vermilion ("rubra") was applied to all sorts of bright colours, though generally with some shade of red intermingled. The purple of the murex was probably a lighter shade, in which red predominated over blue; while the darker purple, a violet ("blue of A.V.") was produced from another species of shell-fish. (c) Scarlet. Scarlet was used by the ancient Persians, and the common name of scarlet in the East is "shdsher." The A.V. ("carmin") has at length described the tint in Esth.1.6 as violet. This again was a colour used like purple for robes of office or splendour (Je. 10.9; Ezk. 23.6). (c) Scarlet (crimson, Is. 1.18; Je. 4.30). The terms by which this colour is expressed in Heb. vary; sometimes simply shādi is used, as in Gen. 38.18 or by the modern Persians as in Ex. 25.4; and sometimes simply tōla'ath, as in Is. 1.18. Another word, karnāl ("crimson," 2Chr.2.7,14,3.14), was introduced at a later period, probably from Armenia, to express the same colour. Of the two Heb. words, the first expresses the brilliancy of the colour, the second the colour or grub whence the dye was procured. This was a coeliline insect, which is found in considerable quantities in Armenia, Palestine, and other Eastern countries (Tristram). The Persian name of the insect is girinīz (whence crimson), the Linnaean name is Coccyx ilicis. The tint produced was crimson rather than scarlet. The only natural object to which it is applied is the skin of the Scarlet or Red colouring the idols which are compared to a scarlet thread (Can. 4.3). It was the characteristic colour of the soldier's dress, especially in the Roman armies. (d) Vermillion (shākhrē). This was a pigment of mineral extraction used in fresco paintings, either for drawing figures of idols on the walls of temples (Ex. 23.14) for colouring the idols themselves (Wis.13.14), or for decorating the walls and beams of houses (Jn. 2.21). Vermilion was a favourite colour among the Assyrians, as is still attested by the sculptures of Nimrud and Khorsabad. — Symbolical and mystical meanings of colours. Colours naturally tend, especially in the earlier and more poetical stages of literature, to be associated with ideas. This is to be noticed in the Bible as well as in other ancient writings. White is associated with moral purity and innocence (Is.1.18); with joy, festival, and victory (2Chr.5.12; Ez. 9.3; Rev.6.7-9,19.11,14). The Black, as "vulgar, evil, misery, and death" (Is.50.3; Je.8.21; Rev. 6.5). Red and also scarlet are connected naturally with war and bloodshed (Is.63.1-3; Rev.6.4). A deeper significance, more appropriate to the special divine purpose which underlies the O.T., has been noted by many writers, particularly in the three characteristic colours of the tabernacle hangings, the cloths of service, and the vestments of the high-priest. Blue, purple, and scarlet frequently occur; and as purple is produced by the mixing of the other two, it has been remarkably suggested by some writers that, as blue is the colour of the sky, and scarlet of man, that (the) "sky, the earth and man, are the three fundamental aspects of our being, which cannot be separated (Rev. 6.9)." The red of the tabernacle hangings alludes to the glory and blood of the Cross, the purple to the glory and wisdom of the incarnate One (Ac. 26.22). The blue is that which we call the "glory of the Lamb." It is the Hymn of Creation (Is. 51.3; Rev.4.1-4). See "Colours in the Bible" in Schaff-Herzog, Encyclopaedia (3rd ed. 1891); Willis, The Worship of the Old Covenant (1880). [A.R.W.] COMING OF CHRIST, SECOND. A consistent and persistent feature in all books of N.T. is the conviction that "this Jesus which was received up from you into Heaven shall so come in like manner as ye beheld Him going into Heaven" (Ac.1.11). This expected return of the Lord is generally called His "Parousia" (= appearance), sometimes His "revelation" (ἀποκάλυψις: 1Cor.1.7; 2Th.1.7; 1Pe.1.7;13) or "manifestation" (παρουσία: 1Th.1.14; 2Tim.1.10,4.1.8; Tit.2.13; cf. 2Th.3.8); not His "second coming," an expression not found in the Bible. The distinctive feature of the Parousia is that it will come at the close of this present order of things and mark the end of time. It is therefore not to be confused with other "comings" of which our Lord spoke, referring either to His coming in judgment of the Resurrection or to His indwelling in the Church through the gift of the Holy Spirit. The Gospel and Epistles of St. John especially dwell on these "comings" (particularly the group of discourses in Jn.13-16), although they mention the Parousia also. The Synoptists, the Gospels and the Epistles dwell more particularly on the Parousia, but they in turn recognize the other "comings" (cf. Mt.18.20). The Apocalypse centres around the Parousia, yet speaks of the Lord as coming
always to the heart of the believer (Rev.3.20), and as coming also in the judgment of the wicked (2.5). The doctrine of the Parousia has its root in the O.T. teaching of the Day of the Lord. In the world as at present constituted there are anomalies which seem to contradict the righteousness or the power of God. God "hides Himself" (stands afar off) (Ps.10.1); draws back His right hand, hides it in His bosom (Ps.74.11). But the day is coming when "our God shall come and shall not keep silence," when He will vindicate Himself by an open, signal, decisive, and final judgment, which will make manifest to all men that verily there is a God that judgeth the earth (see Ps.50.1-5). In N.T. it is Jesus Christ Who will come to execute this judgment (Ac.17.31), to set right all wrong, to give a reward to the righteous (the completion of our salvation, the fulfilment of our inheritance, is the chief thought in St. Paul's idea of the Parousia), to render to the thousand years (see Rev.20.3-5) of dominion and the millennial kingdom (see Dan.7.24) and to destroy for ever all evil. The time of the Parousia is frequently called the Last Day, the Day of Judgment, the Day of the Lord Jesus Christ, "that Day" or "the Day" in reference to the O.T. "Day of the Lord" (e.g. Mt.7.22,10.15; Mk.13.22; Lu.10.12; Jn.6.39; Ac.2.17; Col.1.13; 2Cor.1.14; Ph.2.16; 2Th.1.8, etc., etc.). The manner and circumstances of the coming are described also in ideas mainly derived from O.T. The Son of Man (like that vicegerent of God in Dan.7.13,14, to whom an everlasting dominion is given) will come with the sound of the trumpet, with a shout, with the voice of angels, in the clouds of Heaven (i.e. arrayed in divine majesty), in flaming fire with great power and glory, attended by hosts of angels (see esp. Mk.13.26ff. = Mt.24.3; cf. Lu.21.27ff.; Mt.25.31ff.; 2Th.1.7-10; cf. 1Cor.15.52; 1Th.4.16). The angels will gather all men before Him to be judged; the present heavens and earth will pass away, to give place to new heavens and a new earth (2Pe.3.12,13; Rev.20.11,21ff.; cf. Is.65.17,66.22). This language is largely pictorial, and we cannot say how much of it is figurative.—The Time of the Parousia. The general belief of the apostolic age was that the event would be as the coming of the Lord Jesus Christ in the parable (Mt.24.33-35), the marriage of the bridegroom (Is.25.6:3; Heb.10.25: Jas.5.9; 1Jn.2.8). The early Church was stirred by this thought to high unworldliness and enthusiasm; the Lord might come at any moment, and they must be ready for Him with loins girded and lamps burning, as men that watch for their Lord (Lu.12.35-36). There is much in our Lord's teaching, as reported by the evangelists, to arouse this expectation (e.g. Mt.16.28; cf. 10.23). In St. Matthew and St. Mark the coming is closely, in St.Luke more loosely, connected with the predicted destruction of Jerusalem (Mt.24.20; Mk.13.24; Lu.21.27). Yet our Lord, even in the same context, looks forward also to a further future (e.g. Mt.24.14), warning His hearers that the coming may be delayed (e.g. Mt.24.48; cf. 25.5; Lu.12.45), and says that "of that day and that hour knoweth no man, . . . neither the Son" (Mt.24.36; Mk.13.32; cf. Ac.1.7). The promise of that other spiritual coming fulfilled at Pentecost, and the idea that every signal judgment (esp. on a great scale, like the Fall of Jerusalem) is also an open manifestation of the righteous God, will lead us to widen our conception of the Parousia and see in it partly a gradual process to which every triumph of good contributes and which is completed at the Last Day (the kingdom growing imperceptibly, like the seed in the parable), and partly a great cataclysm at the end of time, a reversal of these present conditions under which it is possible for evil to triumph and the divine Omnipotence is an object of faith and not of sight. In this latter sense it is a possibly far-off, yet not isolated, event; one of and for which every judgment and defeat of evil in human history is a foreshadowing and a preparation. And as the Resurrection is the hope and consolation of the redeemed individual, so the Parousia is the hope of the redeemed race. The perfected spirit will rise again in a "spiritual body," (1Cor.15.44); the spiritual Church will rise again in a "spiritual" world, an environment in which the will of God is no longer thwarted by sin, a new heaven and a new earth wherein dwelleth righteousness, where the perfect reign of order and right is realized because Christ has "come" with power. Hastings, E. (5 vols. 1904), in Christian Doctrine of Immortality: J. Agar Beet. The Last Things, pp.11-102. [S.C.G.] Commerce. The Israelites up to the time of David did not practise commerce; this was left in the hands of the Canaanites, so much so that 'Canaanite' came to mean 'merchant.' It is clear, that international trade must have existed and affected even the pastoral nomad races, for we find that Abraham was rich, not only in cattle, but in silver, gold, gems, and ornaments (Gen.13.2,24,22). Among trading nations Egypt holds in early times a very prominent position in Scripture, though her external trade was carried on, not by her own citizens, but by foreigners, chiefly of Asiatic races. It was an Ishmaelite caravan, laden with spices, which carried Joseph into Egypt. From Egypt, especially in times of general scarcity, corn would be exported, which was paid for in general with gold and silver. The export of gold and silver was common among the Syrian and Arabian races (Num.31.50; Jos.7.21; Judg.8.24). Until the time of Solomon the Hebrew nation may be said to have had no foreign trade. Foreign trade was indeed contemplated by the Law, but its spirit was more in favour of agriculture (Deut.17.16,17). Solomon, however, organized an extensive trade with foreign countries. He imported linen yarn, horses, and chariots from Egypt (1K.10.22-29), and ivory, sandal-wood, monkeys, peacocks, precious stones, silver, and above all, gold (Ezra4.15) (1K.10.11-12). The cedar and other timber for his great architectural works was brought by Phoenicians by
sea to Joppa, and he found the provisions necessary for the workmen in mount Lebanon (1K.5.6, 9; 2 Chr.2.16). After his death maritime trade declined, and the attempt of Jehoshaphat to revive it proved unsuccessful (1K.22.48, 49). We know that Phoenicia was supplied from Judaea with wheat, honey, oil, and balm (1K.5.11; Ezk. 27.17; Ac.12.20), whilst Tyrian dealers brought fish and other merchandise to Jerusalem at the time of the return from captivity (Ne.13.16), as well as timber for rebuilding the temple (Ezr.3.7). Oil was exported to Egypt (Ho.12.1), and fine linen and ornamental girdles of domestic manufacture were sold to the merchants (Pr.31.24). Its successive invasions must have impoverished the country, but much wealth must nevertheless have existed, owing to the abundant natural products of the country—wine, oil, fruit, etc.; so much so that Jerusalem appears as the rival of Tyre, and through its port, Joppa, carried on trade with foreign countries (Is.2.6,16; Ho.12.7; Ezk.26.2; Jon.1.3). The internal and external trade of the Jews, like that of Egypt, was much promoted by the festivals, which brought large numbers of persons to Jerusalem and created great demand for victims for sacrifices and for incense (1K.8.63). According to the earlier prophets, dishonest dealing and oppressive acts on the part of traders was not uncommon (Am.8.51; Ho.12.5). The places of public market were, then as now, chiefly the open spaces near the gates (Ne.13.15; Zeph.1.10). Traders in foreign goods transacted their business in the two upper courts of the temple, where victims for the sacrifices were publicly sold (Zech.14.21; Mt.21.12; Jn.2.14).

Communion, Holy. [Eucharist.]

Conaniah, a chief who gave passover-offerings in the time of Josiah (2 Chr.35.9).

Concinbume. [FAMILY, D. III.]

Conduit (2K.18.17,20.20; Is.7.3,36.2), Heb. "iv'dd, elsewhere rendered "trench" (1K.18.32) or "channel" (R.V.Job 38.25; A.V. "watercourse"). This was not, apparently, the Gihon aqueduct, but a channel leading to the "Upper Pool." For the admission of Jerusalem there transcended this occasion from the W., where Josephus places the "camp of the Assyrians" (5 Wars xii.2). The Upper Pool would thus be the present Hammām el Batrak, called also Hezekiah's Pool, but by Josephus the pool Amlynqaln (of the tower). A conduit still leads E. towards it from Birket Mamilla outside Jerusalem on W. [Dragon: Well.] [c.b.c.]

Coney (Heb. shāḥphān). The translation in A.V. of the Heb. shāḥphān as "coney" is exceedingly unfortunate, seeing that, except in legal phraseology, the English word has completely dropped out of use in its original significance, and been supplanted by "rabbit." Consequently the notion is prevalent that coney is really the proper English name of the animal indicated by the Heb. shāḥphān (lit. the rider). As a matter of fact, Procavia syriaca, the animal in question, has no proper English name, although it is generally known as the Syrian "hyrax" from the now discarded scientific title. In Cape Colony a related species is commonly known as "dassie," from a corruption of its Dutch name, klop-dass, literally "rock-badger." The Syrian hyrax is an outlying member of a group of small African mammals, mostly of the size of rabbits, which form a special section (Hyraxidae) of the great hoofed or ungulate order. They have no near existing relations, although represented by extinct forms of large size in the Tertiary rocks of Egypt and southern Europe. In general form they are somewhat rabbit-like, but the ears are short, the tail is rudimentary, the toes (4 in front and 3 behind) are cased in nail-like hoofs, and there is a bare glandular patch in the fur of the back. The two upper front (incisor) teeth are long and dagger-like, distantly recalling those of a rabbit; but the molars, or cheek-teeth, are more like those of a rhinoceros. Although some of the African hyraxes are arboreal, the Syrian species, which is abundant in suitable districts, dwells in holes and crannies amid rocks in large companies. The statement in Lev.11.5 and Deut.14.7, that the "coney" is unclean because it chews the cud without dividing the hoof, is not strictly correct, as it does not "ruminant." The expression, however, as in the case of the hare, doubtless refers to the rapid movements of its jaws, and although meaning "rechew," may perhaps indicate remastication without the regurgitation which occurs in ruminants. Strict interpretation of physiological processes should not, however, be expected among people like the ancient Hebrews. The expression "exceeding cedars" may refer to the wariness of this "feeble folk." [r.l.]

Confection (Ex.30.35), Confectionary (1 Sam.8.13). [Apothecary; Ointment.]

Confirmation. [Church; Laying on of Hands.]

Congregation. The rendering of several Heb. words (1) ṣādāh, a company met together by appointment or acting in concert. It is applied to Israel as the organic union of the Twelve Tribes, the συναγωγη, and also to a community in its corporate capacity (Num.35.24ff.). (2) gabāh, an assembly, the ἐκκλησία, used of an assembly specially convened for a special occasion, purpose, or time—e.g. for feasts (1K.8.65; Ps.26.12, 68.26; Jl.2.16). It is used of the whole body of Israel: LXX, συναγωγη, in Ex., Lev., Num., Deut.5.22, and ἐκκλησία in Deut. and the historical books. Hence no distinction between (1) and (2) can be proved from the LXX., but cf. Pr.5.14. (3)
Two consciences, one declaring to be right what the other calls wrong, may be equally true, each for itself. But Conscience claims to pronounce what is objectively right and to legislate for all men; and this claim can only be justified if it is an act of reason. No doubt the moral judgment is accompanied by and largely dependent upon feelings; but in itself it is an affair of the head, not of the heart. The Evolutionary problem is met by a comparison of moral with, e.g., mathematical judgments. Because a child makes a mistake in the multiplication-table, it does not follow that one cannot assert that $12 \times 12$ always and everywhere = $14$. Similarly, the fact that Conscience grows and requires education does not invalidate its judgments when it is developed and trained.—Christian Teaching. The Christian doctrine of Conscience is in agreement with the best moral philosophy, while it emphasizes the dependence of the moral faculty upon God. It is the readiness to a moral law written in man's heart by God (Ro.2.14,15). Its voice is supreme over all other considerations, so that man must act "for conscience' sake," not because of any external compulsion (13.5). Conscience is the sole final judge, and must be obeyed, but it is not by any means infallible. St. Paul acted with a good conscience when persecuting the Church (Ac.23.1), as well as when afterwards he mourned over faithless Israel (Rom.9.1). Conscience may be uneducated (Ac.3.17; 1Tim.1.13; 1Cor.8.7). In such a case the wrong practical judgment is excused; and as by the eye of faith judgment of conscience is sinful: "conscience, being weak, is defiled." It may also judge wrongly, because "seared" or "branded" (1Tim.4.2), or because "the light has become darkness" (Mt.6.23). Here the individual is himself responsible for willful perversion of his moral judgment by disregarding it whilst sound. Thus Conscience is (a), in agreement with the Schoolmen and Kant, an act of the intellect, judging questions of right and wrong; and (b) requires education and guidance. Thus, its supreme need is a guide and standard of action; which Christianity, with Aristotle, St. Thomas Aquinas, and others, have provided: ψυχικόν—translated "the truly wise man, whoever he may be—and whom the Christian knows in Christ—the incarnate Wisdom of God, the Light of the world,—and in the teaching of Scripture and the Church, in which the mind of Christ is enshrined and revealed. The Bible goes beyond Moral Philosophy in recognizing the need of a "cleansing of the conscience" from past sin (Heb.9.14,10.22); and here again Christ affords the sole satisfaction of moral needs. [Atonement.] Thos. Aqu. Summa I. a. q. 70. f. 2. q. 19; Butler, Sermons 1. 2, 3; H. Rashdall, Theory of Good and Evil, bk. i. ch. 6. Any treatise of Christian Ethics—Newman, Smith is comprehensive; and see also our art. Philosophical. [c.l.h.]

Conversion. [Cf. Salvation.] The term "conversion" does not occur except in Ac. 15.3, the conversion of the Gentiles. The verb, however, occurs several times in A.V., but in R.V. is differently translated; "turn." The retranslators evidently feeling it inadvisable to introduce a word commonly used in a technical
sense, and expressive of a particular view of grace, when a simpler word conveyed a satisfactory and sufficient meaning. Since, however, the term is in frequent religious use, it seems advisable to appropriate it to a definite sense, as meaning the human part in salvation. It is granted that popularly it is used of the divine agency; but this is a mistranslation, since the word is only used in the active of human agency in turning a sinner from the error of his ways, and in the middle voice of a man turning himself to repentance, faith, and good works. When used in the former sense there is no danger of misuse, since human influence can hardly be so strong as to annihilate choice, as would certainly be supposed likely if the word was used (which it is not) of God. Any one can see the vast difference between “except ye be converted” and “except ye turn.” The doctrine of irresistible grace appears therefore to have come in by way of a mistranslation. That it has been productive of great moral hurt will hardly be denied, since it has caused men, especially the young, to neglect personal effort while waiting for a divine compulsion. Properly used, however, the term may be usefully employed as a summary of the human side of salvation, including repentance, faith, and obedience. It is not inconsistent with baptismal regeneration, but may be considered as its realization, and the acceptance by the will of a position freely given by God. It is, however, particularly applicable to the case of those who have through ignorance or thoughtlessness or lives of carelessness or disobedience, and have gone in a way that is not good, and should therefore retrace their steps. “The way to heaven,” said Bp. Selwyn, “is to turn to the right, and go straight on.” In this series of articles (which includes also Salvation, Saviour, Faith, Repentance) it will be seen that the doctrine of substitution, and the doctrine of conversion, as popularly preached, both seriously depreciate the response of the will. Repentance is often slurred over, and faith restricted to trustful acceptance; and in some cases obedience is thought to partake of the nature of “works.” This presentation of Christianity seems to arise from the misunderstanding of St. Paul, and the omission of very distinct teachings both of Christ and the apostles generally. For a fuller discussion, see the writer’s Crux Crucis (Simpkin, Marshall: 1907).

Convocation. With the prefix “holy” this was the official term for a religious gathering on the sabbath and festivals. No servile work was to be done, necessary preparation of food only being permitted (Ex. 12.16). It occurs Is. 1.3, 4, 5 (E V. assemblies), without “holy”; elsewhere in the Pentateuch (Gen. 25.29; 2 K. 4.38). Fish was also cooked (Luk. 24.42), probably broiled. The cooking was in early times performed by the mistress of the household (Gen. 18.6); professional cooks were afterwards employed (1 Sam. 8.13, 9.23).

Cooos (Ac. 27.1). [Cos.]

Copper (Heb. w-hôshèth), in A V. always rendered Brass except in Ezr. 8.27 and Je. 15.12 (A V. steel). This metal is usually found as chalcopyrite (sulphide of copper and iron), malachite (hydrus carb. of copper), or as an oxide; occasionally also native, but rarely in the Old World. It was almost exclusively used by the ancients for common purposes; for which its malleable and ductile nature rendered it practically available. Vessels of it have been found in tombs of kings of Egypt belonging to the 1st dynasty, and the copper mines near Wady en Naâb (Sinai) were worked by them from very early times. It was known in Babylonia (Tel-lob) as early as 2500 B.C. We read in the Bible of copper, possessed in countless abundance (2 Chr. 4.18), and used for every kind of instrument: as chains (Judg. 16.21), pillars (1 K. 7.15-21), lavers, the great one being called “the copper sea” (2 K. 25.13; 1 Chr. 18.8), and the other temple vessels. These were made in the foundry, with the assistance of Hiram, a Phoenician (1 K. 7.13 f.), though the Hebrews were not ignorant of metallurgy (Deut. 4.20, etc.; Ezk. 22.18). We read also of copper mirrors (Ex. 38.8; Job 37.18), and even
of copper: arms, a helmets, spears, etc. (1Sam. 17. 5. 38; 2Sam. 21. 16). The expression "bow of steel," in Job 20. 24, Is. 18. 34, should be rendered "bow of copper." They could hardly have applied copper to these purposes without being acquainted with some means of hardening it. Antimony was perhaps sometimes used, and Dr. J. H. Gladstone (see Proc. Soc. Feb. 26) ascertained that copper weapons from Tell el-Hesy, found in a pre-Israelite stratum, contained (like others from ancient sites in Egypt) a considerable proportion of sub-oxide of copper, and thinks the workers may have discovered a way of forming this during the smelting in the ordinary way, when copper is used for ornament, and supposed to be of the pre-Israelite period. The only place in A.V. where "copper" is mentioned is Ezek. 8. 27 (c.f. 1 Esd. 8. 57; but the R.V. renders it "brass," as in Jel. 15. 12). These vessels may have been of orichalcum, like the Persian or Indian vessels found among the treasures of Darius. In Ezek. 27. 13 the import of such vessels to other markets, such as Tyre by merchants of Javan, Tubal, and Meshech is alluded to. Probably these were the Moschi, etc., who worked the copper-mines in the neighbourhood of the Caucasus. In 2 Tim. 4. 14 χαλκος is rendered "coppersmith," but the term is perfectly general.

Cor (κορ). [Weights and Measures.]

Coral occurs only, as the somewhat doubtful rendering of the Heb.רָמוֹת in Job 28. 18 and Ezek. 27. 16. The old versions fail to give any clue, but as the natural upward growth of the Corallium rubrum is well suited to the etymology of ramoth, it probably is rightly rendered "coral." This was known to Theophrastus and Pliny. Formerly copper-miners worked in the regions of the Caucasus, and in the neighbourhood of the Caucasus. In the Pentateuch it denotes either (1) an animal or vegetable offering brought to the religious centre for sacrificial purposes (Lev. 3. 2, etc.); or (2) specifically that portion of the animal or offering which was presented by the sacrificant for God (Num. 18. 20); or (3) any offering brought near to God for sacred purposes—e.g. a portion of spoil (Num. 31. 50), the gifts of the princes (Num. 7). Subsequently used in vases (e.g. Mt. 15. 5; Mk. 7. 11) to dedicate something to God, thereby withdrawing it from human use (cf. Pr. 20. 25), a practice to which other obligations were sometimes evaded. In Mt. 27. 6 it denotes the sacred treasury. [Vow.] Jev. Enc. vii. 561. [H. W. W.]

Corbe (1 Esd. 5. 12) = Zaccar.

Cord, including rope, and twisted thongs, was used for the following, among other purposes:—1. For fastening a tent (Ex. 35. 18; Is. 54. 2). As the tent supplied a favourite mode of shelter of the human body, the cords which held it in place represented the principle of ten (Job 30. 11; Ec. 12. 6). For binding slaughtered animals to the horns of the altar (Ps. 118. 27). For yoking animals to a cart (Is. 5. 18) or plough (Job 39. 10). For binding prisoners (Judg. 15. 13; Ps. 2. 3; Ezek. 3. 25). For bow-strings (Ps. 11. 2), made of ox and camel gut; such are still spoken of in Judg. 15. 18, but more properly fresh or moist bow-strings). For the ropes or "tacklings" of a vessel (Is. 33. 23). For measuring ground (2 Sam. 8. 2; 78. 55; Am. 7. 17; Zech. 2. 1); hence cord or line became an expression for an inheritance (Joel 17. 14; 19. 9; Ps. 16. 6; Ezek. 47. 13), and even for any defined district (Gen. 3. 4). For attaching articles of dress: as the wraithen chains," which were twisted cords, worn by the high-priests (Ex. 28. 14, 22, 24, 39. 15, 17). For fastening awnings (Esth. 1. 6). For drawing water out of a well, or raising heavy weights (Jos. 2. 15; Jez. 38. 6, 13). Cords were also worn as a sign of humility (1K. 20. 31). The materials of which cord was made varied according to the strength required; the strongest rope was probably made of strips of camel or ox hide, as still used by the Bedouin Arabs. The finer sorts were made of flax (Is. 19. 9), and probably of reeds and rushes. In N.T. the term καμηλί is applied to the whip with which the soldiers flogged Christ (Jn. 19. 15), and to the ropes of a ship (Acts. 27. 32).

Coro (Eccles. 45. 18; Jn. 11) = Korah. 1.

Coriander. The Coriandrum sativum is found in Egypt, Persia, and India, and has a round tall stalk. It bears umbelliferous white or reddish flowers, from which arise globular, greyish, sub-oxide of copper, and the new metal. Formerly coriander was regarded as possessing many virtues against sickness. It is mentioned in the Bible only as resembling manna (Ex. 16. 31; Num. 11. 7).

Corinth. This city, remarkable for its distinctive geographical position, was eminent in classical history, and closely connected with the early spread of Christianity. So famous was its Isthmus that that name has been given to every narrow neck of land between two seas. But, besides this, the site of Corinth is distinguished by another conspicuous feature—viz. the Acrocorinthus, a small island covered with a conical hill, separating the bay of Corinth from the Gulf of Corinth. The hill was above the sea-level, with a summit so extensive that it once contained a whole town. The situation of Corinth with its E. and W. harbours is the key to its history. Its importance probably began under the Phoenicians, but the first authentic records show the Greeks here in a position of wealth and military strength; and in the latest days of Gk. history Corinth was still conspicuous. But before St. Paul's day it had been rebuilt and established as a Roman colony. The distinction between the Greek and Roman cities of Corinth must be carefully remembered. The new city was hardly less distinguished than the old, and was the metropolis of the Roman province of Achaea. It was a place alike of great mental activity and of commercial and manufacturing enterprise. Its wealth, its vice, and the profligacy of its inhabitants were proverbial. The worship of Venus was here attended with bountiful libations and sacrifices. All these points are incidentally illustrated in 1 and 2 Cor. Corinth is still an episcopal see. The cathedral church of St. Nicolas, "a very mean place for such an ecclesiastical dignity," used to be, in Turkish times, in the Acrocorinthus. The city is now only a wretched village, on the old site,
CORINTHIANS, FIRST EP. TO

and bearing the old name, often corrupted, however, into gotho. Pausanias, describing the antiquities of Corinth as they existed in his day, distinguishes clearly between those of Greek and Roman origin. Two relics of Roman work are still to be seen: a heap of brick-work which may have been part of the baths erected by Hadrian, and the remains of an amphitheatre with subterranean arrangements for gladiators. Far more interesting, however, are the ruins of the very ancient Greek temple. From the Posidonion, or sanctuary of Neptune, the scene of the Isthmian games, St. Paul draws some of his most striking imagery in 1 Cor. and other epistles. This sanctuary was a short distance N.E. of Corinth, at the narrowest part of the isthmus, near the harbour of Schoenus (now Kalamaki) on the Saronic gulf. Its exact site is doubtful; but to the S. are the remains of the stadium, where the foot-races were run (1 Cor.9.24); to the E., those of the theatre, which was probably the scene of the pugilistic contests (ver. 25); and on the shore grow many small green pine-trees such as provided the fading wreath (ver. 25) for the victors in the games.

The Epistle to Date. Some time before Pentecost (1 Cor.16.8), and near the Passover (5.6-8), towards the close of St. Paul's visit to Ephesus; therefore a little before Easter, 58 A.D.—Place. Written from Ephesus (16.8.9), where St. Paul stayed more than two years (see Ac.19.8,10), after he had sent Timothy and Erastus to Macedonia (16.21). St. Paul, with the four hundred soldiers, went from Ephesus to Macedonia (16.12), and had already determined to journey round through Macedonia and Achaia to Jerusalem (Ac.19.21; 1 Cor.16.9).—Readers. Corinth, destroyed by Mummus in 146 B.C., was rebuilt by Julius Caesar, made a Roman colony, and under the care of the emperors was restored with wonderful rapidity to its former glory and luxury. It became a wide commercial city, the seat of the Roman proconsulate, of the Isthmian games, of the fine arts, of learning, and of the Worship of Aphrodite. Here, in 54 A.D., St. Paul planted Christianity (2 Cor. 1.8), on his second missionary journey, and stationed a permanent bishop (6.1).—Time (Ac.18.17). He lodged with Aquila, his fellow-craftsman, whom he converted here (18.1,2), and afterwards with the proselyte Justus (18.2-7), when Silas and Timotheus had arrived (18.5), and Jewish opposition had caused him to turn to the Gentiles. This had the advantage of making the church from the first mixed (the Gentiles were in the majority, 1 Cor.12.2) and very numerous (Ac.18.2,8,10), the most important in Greece, the mother-church of the province (1 Cor.1.2). Only a few of the upper classes believed (1.26, etc., among them Crispus, the president of the synagogue, 1 Cor. 8.14): for the preaching of the gospel did not suit their intellectual pretensions and their moral laxity. Some time after the failure of the Jewish accusation against St. Paul before Gallio (Ac.18.12-17), he left Corinth with Aquila and Priscilla (who stopped at Ephesus), and travelled to Jerusalem, and thence thither to Galatia, and finally to Achaia (18.18-22). Meantime Apollos, an eloquent and fervid disciple of St. John Baptist from Alexandria, had been brought to Christianity by Aquila and Priscilla at Ephesus (18.24, etc.), and went to Corinth (19.1), where he preached Pauline Christianity, but in somewhat different phraseology, probably introducing terms from 1 Cor. (2 Cor.3.5,6,16.12), but some preferred the manner of the former teacher, some that of the new; and thus partisanship crystallized. Then there came to Corinth Judaizing teachers, with leanings to St. Peter, having letters of recommendation (2 Cor.3.1), trying to lower the authority of St. Paul (9.2), and exalt that of St. Peter (11.5), and at the same time boastfully asserting their national privileges (5.12,11.22, 12.11). The remainder, repudiating these three parties, formed a fourth, by dissociating themselves from the Pauline, Apollonian, and Petrine sections, and (with something of pharisaic pedantry) professing special allegiance to Christ (1.12).—Occasion. The epistle was addressed to the whole church at Corinth, including all sections, and the Christians of Achaia. Before the present First Epistle, there had been a letter (not now extant, an alleged epistle in Armenian being a wretched apocryphal imitation) of St. Paul to the Corinthians (1 Cor.5.9): but when he wrote he had not known of the divisions. It was from the household of Chloe that he received information about them (1.11); and on this account he commissioned St. Timothy to visit Corinth (4.17), going first with Erastus through Macedonia (16.19). The letter then turns to the case of unchastity in the church, of which he had already spoken in the last epistle, and which had now developed into a case of incest (1 Cor.5.1, etc.). In addition, there were the questions brought in a letter from the church by Stephanas, Fortunatus, and Achaicus, about such matters as celibacy (7.1, etc.), the eating of flesh offered in sacrifice, etc. (8.1). These messengers carried back his own letter in reply (16.12,17).—Aim. (1) To counteract the party divisions, and uphold his own authority as founder; (2) to remove the unchastity which had gained ground; (3) to give instruction on the points mentioned in the last epistle and in communications from other instructions, suitable to the state of the church at Corinth, such as (a) disorders in the public assemblies; (b) the gifts of the Spirit; (c) the Resurrection; (d) the coming collection.—Contents. Salutation and exordium (1.1-9): 1st main section: the party divisions, with detailed justification of the apostle's own method of teaching when compared with that of Apollos (1.10—4.21). (2) The unchastity (ch. 5). (3) The bad habit of going before heathen tribunals, with a repeated warning against impurity (ch. 6). (4) The question about marriage (ch. 7). (5) That about meats used in sacrifice, with an illustration of the unselfishness he aimed at in his discharge of the apostolic office (8—11.1). (6) Directions as to irregularities in meetings for worship, the head-covering of women, the love-feasts and the Lord's Supper (ch. 11). (7) Discussion on spiritual gifts (ch. 12 and 14). (8) The magnificence of the Christian life (ch. 13). (9) The teaching of the Resurrection of the Dead, in reference to a local mistake (ch. 15). (10) Injunctions about

The collection for Jerusalem, miscellaneous remarks, and greetings (ch. 16). (Cf. the Introduct. to this Ep. in Meyer's Comm.) [w.m.s.]

**Corinthians, Second Epistle to.**

Occasion: Corinth by St. Paul before the composition of the first epistle (1 Cor. 4:17); and as he was expected to arrive later than the epistle (16. 10.) he would probably be able to communicate its results to his master. He is with St. Paul at the composition of the second epistle. The sender is possibly the same as the first, and he may be directly informed what Timothy had reported is that he is associated with St. Paul (2 Cor. 1:1) as the joint-sender of the epistle, and it would have been awkward to refer to his report, especially as the early effects of the first epistle were not favourable (2.12.7.5.). St. Paul was not at Ephesus, but had travelled by way of Troas to Macedonia; and besides Timothy, Titus had brought intelligence of these effects (2.12.7.15.). He had been delegated to Corinth after the first epistle, and after Timothy had again arrived in Ephesus from the journey mentioned in 2 Cor. 4:17. Titus was now to convey the second epistle which had arisen from the accounts first brought by Timothy, but afterwards chiefly by Titus, of the effects of the previous letter, and of the attitude of the Church of Corinth.—**Aim.**

Stated by St. Paul himself (2 Cor. 13:10) to put the church before his arrival in person into that frame of mind which it was necessary that he should find, in order that he might thereupon set to work among them, not with stern corrective authority, but for their edification. But in order to attain this aim, he had to make it his chief task to elucidate, confirm, and vindicate his apostolic authority, which, in consequence of his former letter, had been assailed still more vehemently, openly, and influentially by opponents. For, if that were regained, his whole influence would be regained; if the church were again confirmed on this point, and the opposition defeated, every hindrance to the establishment of personal authority would be removed. With the establishment of his apostolic character and reputation he is chiefly occupied in the whole epistle; everything else is only subordinate, including a detailed appeal respecting the collection.** (Meyer).—**Contents.** (1) Troubles and sufferings before the return of Titus (1.1-14). (2) First plan of coming; defence against fickleness (1.15-2.1). (3) Satisfaction at having changed plan; time for repentance of incestuous offender (1 Cor. 5.1); need now for sympathy and pardon (2 Cor. 2.2-11). (4) Mention of meeting with Titus brings back the triumphant joy of that moment, filling him with a sense of issues of life and death hanging on his words (2.12-17). (5) Has he a right to say this? True credentials of effective preaching: new covenant, of which he is the preacher; contrast between the new and the old, for the benefit of the Jews (3.5-6). (6) Terrible responsibility of his commission; his fitness and unfitness; for the latter, infirmity and disease; for the former, the life of Christ working in his life (4.1-18), and the hope of life after death, in which the spiritual shall be free from the flesh, and clothed with new spiritual organism (5.1-9). (7) This hope does not exclude the fear of judgment, through which all must pass. At the risk of seeming beside himself, he must urge that fear. Only so can men awaken themselves to the importance of the message of reconciliation (5.10-21). (8) Will the Church receive his message in vain? By all he has done and suffered for them, he pleads for a place in their affections, above all, to give Christ the supreme place in their hearts. Only so can they be indeed God's children, and not be made to be the examples of the inconsistent, he turns to those who had been zealous against impurity, and describes more in detail the delight he had received from the report of Titus (7. 1-16). (10) He gives them an opportunity of proving their repentance and goodwill, by joining heartily in the great collection for the poor Christians in Jerusalem and Judaea, who owed their poverty to their experiment in socialism; explaining arrangements, and citing the example of Macedonia (8.1-9.13). (11) He then finally vindicates his authority as an apostle by his conversations with his occasions, and the situations which had caused him such acute pain (10.1-18). He charges the Judaizing teachers with intruding into his province, defends himself against some of their special accusations, and challenges them to a comparison of their sufferings and labours with his own (11.19-12.18). They wherefore they taunted them were, when rightly understood, a ground of confidence and strength (11.10-12.18). (12) Now for his projected visit. He looks forward, not without anxiety, to the possibility of having to exercise his apostolic authority to punish both the party of licence and of the Judaizers. His wish and prayer are that they may be restored to completeness without it. His own spirit is calm, and he ends with words of peace and blessing (12.19-13.14) (Dean Plumptre).—**Results.** Within a few months he paid his promised visit, and was received with enthusiasm (13.1-14). The Church (Ro. 16.23) St. Titus and the unnamed brethren of 2 Cor. 8.8.22 (probably St. Luke and Tychicus) had done their work effectually, and he could tell the Romans that the collection had been made in Achaia as well as in Macedonia (Ro. 15.26). The Jews, however, endangered his life by a plot as he was about to embark at Cenchreae, and he had to change his plans and return through Macedonia (Ac. 20.3). After his first imprisonment at Rome, and his return to his former labours, Erastus, who was probably travelling with him, and who was chamberlain of the city of Corinth, stopped there (Ro. 16.23; 2 Tim. 4.20). About 95 A.D., some 35 years after this second epistle, Clement of Rome wrote an epistle to the Corinthians, which shows that, after a time of peace, the old evils had reappeared. A few rash and self-confident persons, placing themselves at the head of factions, and disturbed the Church. Clement reminds them of the self-denying labours of St. Peter and St. Paul, and the faith and humility of Christ and the O.T. saints. The doubts of the Resurrection had reappeared, and were once more confuted by Clement. The authority of the bishops and
CORINTHIAN CORNED

deaconos (cf. Ph. 1.1) was disputed, and he urges submission, quoting the first epistle, esp. 1 Cor. 13. Later on, c. 135 A.D., the church of Corinth was visited by Hegesippus, the historian of the Jewish Church (who gives us the account of the death of James, bishop of Jerusalem). He touched at Corinth on his voyage to Rome, and stayed there several days, finding the church faithful to the truth under its bishop Primus (Euseb. Hist. Eccl. iv. 22). Dionysius, succeeding Primus as bishop, brought out all that was good in the church, and extended its activity to the people of Macedonia, Athens, Nicomedia, Crete, and Pontus. He bears testimony to the liberality of the church of Corinth to the poverty of other churches, and to the traditional liberality it had received from the Roman churches. He records the fact that the epistle of Clement was read from time to time on the Lord's day. One Chrysophora, like Dorcas and Priscilla, was conspicuous both for good works and theology (Euseb. Hist. Eccl. iv. 23) (Dean Plumptre).—Place. St. Paul was no longer at Ephesus, but had already arrived in Macedonia by way of Troas (2 Cor. 2.13, 7.5, 8.1, 9.2; Ac. 20.1), where Titus, whom he had already entrusted with the work in Troas, returned to him.—Date. Probably 58, the same year as that of the first epistle. That was shortly before Easter; he left Ephesus after Pentecost. He intended to come to Corinth, as he did soon after the second epistle (Ac. 20.2).—Genuineness. This is as internally certain and as external as at Corinth, and unconnected in its contents with that of the first. Cf. Iren. Haer. ii. 7, 1; iv. 28. 33; Athenagoras, De Resurrect. p. 61; Clement, Strom. i. iv. p. 514; Tertullian, De Pudicitia, 13. [w.m.s.]

Cormorant, the translation in A.V. of the Heb. qî’âth and shâlîkh. For qî’âth, see Pelican. shâlîkh occurs only as the name of an unclean bird in Lev. 11.17, Deut. 14.17, and has been variously rendered. The etymology points to some diving bird. The common cormorant (Phalacrocorax carbo), which some have identified with shâlîkh, ranges from Europe to India, while an allied species (P. desmaresti) inhabits the Mediterranean, Black, and Caspian Seas. Other suggestions for shâlîkh are gannet and tern. [r.l.]

Corn, the Heb. words so rendered in A.V. are dâghân, "produce" (Gen. 27.28), or "bread" (Lam. 2.12); abhûr, "produce" (Gen. 4.21); bûr, "clean, winnowed corn (Gen. 41.35), or the Arab. bus, "wheat"; and shebbâr (Gen. 42.1), probably "ground" corn or "meal." Corn of Minnith in Moab, and of Pannag (Ezk. 27.17), sometimes supposed to mean "Phoenicia" but otherwise "a sweet cake," was especially valued. Corn included wheat, barley, and spelt. [Agriculture.] "Seven ears on one stalk" (Gen. 41.22) are not unknown in Egypt and are heard both of wheat and barley of Palestine. Corn was exported in payment for labour in Solomon's time (2 Chr. 2.20, 15), with vine and oil; meal (shebbâr) was sold in the market (Am. 8.5). [Barley; Rye; Wheat.]

Coryneleus (Ac. 10), a centurion of the Italian cohort, which probably consisted of Italians resident in Palestine. Judaea was garrisoned not by Roman legions, but by cohorts of auxiliary forces raised from the non-Jewish population. Cornelius was uncircumcised (11. 3), and therefore not a full proselyte, but he belonged to the numerous class of those who feared or worshipped God, frequently mentioned in Acts, from whom the Christian Church was largely recruited. His personal character was marked by devoutness (vv. 2, 22), zeal for the welfare of others (ver. 24), humility (ver. 25), teachableness (ver. 33). St. Luke dwells on the story of his conversion as affording the first or one of the first instances of the baptism of uncircumcised persons, and their admission to Christian fellowship. If there had been previous instances, as perhaps in 8.38, they could not compare in importance to the public action of St. Peter, the acknowledged chief of the apostles, acting under the guidance of a divine vision, and sanctioned by a great manifestation of the Holy Spirit (Ac. 10.44-46; cf. Gal. 3.2). [e.r.b.]

Corner.—1. The "corner of a bed" (Am. 3.12) means the corner seat on a dîwân, and is the seat of most honour in a room.—2. The "corner" of the field was not allowed (Lev. 19.9) to be wholly reaped. It was the share of the poor. The "corner" is not to be left. In the later period of the prophets their constant complaints concerning the defrauding the poor (Is. 10.2; Am. 5.11-8.6) show that such laws were neglected. The later rabbis (Mishna, Peah) fixed one-sixtieth as the portion of a field to be left for the legal "corner." This "corner" should not be so joined as to leave one corner only where two should fairly be reckoned. It is still a pious custom, which the Palestine peasantry derive from the "law of Abraham," to leave the corner of the cornfield unreaped for the poor to take. [c.r.c.]

Corner-stone. (1) A stone, usually massive, so shaped and placed as to bind together two walls of a building; hence both a corner-stone and, as helping to support the structure, also a foundation-stone. The word has both meanings in Is. 28.16, but foundation- and corner-stones are distinguished in Je. 51.26 (cf. Job 38.6). The temple was completed the building (Zech. 4.7; Ps. 118.22). The word in both meanings is applied to our Lord (Mt. 21.42; Eph. 2.20; 1 Pe. 2.6,7). Cf. Is. 19.13 marg., where rulers are spoken of as the corner or support of the tribe. [h.h.]

Cornet (Heb. shôphâr), a loud-sounding instrument, made of the horn of a ram, an ibex or (sometimes) an ox, and used by the ancient Hebrews for signals, for announcing the "Jubilee" (Lev. 25.9), for proclaiming the new year, for the purposes of war (Je. 4.5, 19; cf. Job 39.24, 25), as well as by the sentinels at the watch-towers in giving notice of the approach of an enemy (Ezk. 33.4,6). shôphâr is generally rendered "trumpet," e.g. in all the passages already cited, but "cornet" (the more correct translation) is used in 1 Chr. 15. 28, 2 Chr. 15.14, Ps. 98.6, and Ho. 5.8. "Cornet" is also employed in Dan. 3.5,7,10,15, for the Aram. gérén (lit. "a horn"). Oriental scholars for the most part regard gérén as another instrument; but some critics regard shôphâr and hâqôdrâd as
belonging to the species of *qeren*, the usual term for a horn. The generally received opinion is that *qeren* was the crooked horn, and *sháphár* the long and straight one (Mishna, *Rosh-hassanah* iii. 2-5). The silver trumpets (*ḥācōrō* which Moses was charged to furnish for the Israelites were to be used for calling together the assembly, for the journeying of the camps, for sounding the alarm of war, and for celebrating the sacrifices on festivals and new moons (Num.10.1-10). In the age of Solomon 120 trumpets were used in the temple worship (2Chr.5.12). *yôbbēl* is used sometimes for the "year of Jubilee" (cf. Lev.25.13,15 with 25.28,30), because of its having been introduced by the Jews in their celebration of the same festival on the fourteenth day of Tishri. The sounding of the cornet was the distinguishing ritual feature of the festival appointed by Moses to be held on the first day of the seventh month as "a day of blowing of trumpets" (Num.29.1), or "a memorial of blowing of trumpets" (Lev.23.24); and that rite is still observed by the Jews in their celebration of the same festival (cf. Ps.80.1-3, etc.), now called "the day of memorial," and also "New Year." The intention of the appointment of the festival appears to be set forth in Jl.2.15: "Blow the trumpet in Zion, sanctify a fast, call a solemn assembly." Agreeably to this sequence, the festival seems to be the prelude and preparation for the Day of Atonement. The word "solemn assembly" applies to that on the eighth day (Lev.23.36), the closing rite of the festive cycle of *Tishri*. The cornet is also sounded in the synagogue at the close of the service for the Day of Atonement, and, amongst Jews who adopt the ritual of the *Sephardim*, on the seventh day of the feast of Tabernacles, known by the post-Biblical denomination of "the Great Hosannah." A.V. also renders by "cornets" the Heb. *mnā'ānim* (2Sam.6.5), but here the R.V. marg. *sistra* seems the best rendering. In Ezek.7.14 "trumpet" represents the Heb. *lāgō a*; perhaps a "blast" (cf. Ps.50.3). [Piren; Shawm.]

**Cos or Coos** (now Siancio or Stanko.) This small island of the Grecian Archipelago has several interesting points of connexion with the Jews. It was one of the places which contained Jewish residents (1Mac.15.23). Josephus, quoting Strabo, mentions that the Jews had a great amount of treasure stored there during the Mithridatic war, and also that Julius Caesar issued an edict in favour of the Jews of Cos. Herod the Great conferred many favours on the island. St. Paul, on the return from his third missionary journey, passed through the harbour of Cos, according to Miletus. It was celebrated for its light woven fabrics and for its wines; also for a temple of Aesculapius, which was virtually a museum of anatomy and pathology. The emperor Claudius bestowed upon Cos the privilege of a free state. The chief town (of the same name) was on the N.E. near a promontory called Scandarium; and perhaps it is to the town that reference is made in Ac.21.1.

**Co'sam** (Lu.8.28), an ancestor of Joseph, between David and Zerubbabel. [G.R.D.B.]

**Cosmogony.** The Biblical conception of the origin and nature of the material universe must be inferred from a variety of poetical and rhetorical passages primarily designed to convey spiritual truth. The principal of these are Gen.1-2.7; 1K.8.27; Job 9.5-9,26.7-14,28.9-11,38; Ps.8.3,33.6-9,65.6-13,74.13-17,89.9-13,90.2,104; Pr.8.23-29; Is.51.5; Je.5.22,31.35; Ju.1-13; Ac.14.15-17,17.24-29; Ro.1.20; 1Cor.15.25-28; Heb.1.2-14,11.3-5,15-18,12.26.[Creation.] While it would be unfair to impose upon these the strict literal interpretation appropriate to a scientific treatise, it is not difficult to see that there is a restraint upon the sacred writers in their representation of God's relation to the universe which did not rest upon those who wrote the cuneiform or other ancients, or even upon the commentators and poets and scientific men of later times. The Babylonian cosmology, with which it would be most naturally compared, is but imperfectly presented in the cuneiform tablets by reason of their fragmentary character, only a small portion having been preserved. [See Plate xxv.] But from what remained it would seem that matter was regarded as eternal. The opening passage reads:

Long since, when of the gods not one had arisen . . .

Then were the gods.

Upon the creation of light, Tiamat rebelled, and drew a number of the gods after her; whereupon Marduk volunteered to conquer her. After accomplishing this, he cut her body in two halves, and out of them he made the heaven and the earth. The further account is too fragmentary to be of any service. From Berosus, however, we learn that *Theone* was cut asunder by Bel, and her blood mixed with clay, from which man was formed. All other non-Biblical cosmologies are equally fantastic and absurd. According to the Egyptian conception, the latent germ of Being slept in the bosom of the dark flood "*Nun*" until a demiurge moulded one of them into an egg, from which the world was evolved. This conception of a world-egg was very general. The Indian mythology represents the "self-existent," the "wonderful," as evolving from a sleeping universe which was pre-existent. This self-existent Being, having created the waters, placed in them a seed, which became a golden egg, in which Brahma, the progenitor of the world, strove for a year, when he split it in twain, and from the upper part made the heavens, and from the under part the earth. According to the Polynesian myths, it was a bird which laid the world-egg. Nor are the
Gk. myths, with their hundred-handed giants and Titans, less fantastic. Even Plato taught that the earth was the centre of the universe, and that its motions were produced by what he called the "soul of the world"; while the scientific astronomer, Ptolemy, distinctly taught the geo-centric theory of the universe. If Milton's Paradise Lost were taken as prose, and interpreted as some would interpret Gen.1, its cosmogony would appear extremely fanciful. How contrary to modern science and to the restrained statements of Scripture is the whole seventh book, of which the following is a fair specimen:

The grassy clods now calved; now half appeared
The watry lion, pawing to get free
His hinder parts, then springs as broke from bonds,
And rampant shakes his brindled mane.

Yet popular ideas of Biblical cosmogony are often derived from Milton, rather than from the Bible. There are two words in Genesis to represent the process of creation, namely, bârâ and 'âšâ, of which bârâ (to create) is used only when speaking of the first creation of the heavens and the earth (Gen.1.1), of the creation of man in his image (1.26, 27), and in a few other passages, while the less specific word 'âšâ (to make) is used, or even more ambiguous forms of expression like "Let the waters bring forth" (1.20), which positively favours some form of evolution. There is great force, therefore, in the remark of Geylot, that absolute creation is affirmed in Gen.1 only, and precisely in the three stages of the creative process where all theories of thorough-going evolution completely and hopelessly break down in their evidence. So that "the question of evolution within each of these great systems—of matter into various forms of matter, of life into the various forms of life, and of mankind in all its various varieties—remains still open." Moreover, when properly interpreted, the scriptural passages readily adjust themselves to the best conceptions of the universe formed by modern men of science. The Copernican (rather than the Ptolemaic) system is implied in the rhetoric of Job 36.7, "He stretcheth out the north over the empty place, and hangeth the earth upon nothing." This "firmament" which divides the waters above from those below is natural enough in Job's interpretation (36.8), "He bindeth up the waters in his thick clouds, and the cloud is not rent under them." The only apparent interruption to the progressive development of Gen.1 is in connexion with the appearance of the sun, moon, and stars, upon the fourth day of creation. But even there the way is left open for adjustment with the natural order, if we lay proper emphasis upon the purpose for which these bodies are said to be set in the heavens, viz., "to divide the day from the night," and to "be for signs and for seasons," which they could be only when the primeval clouds, with their dazzling glow of molecular light, had given place to conditions like those of the present. It is not, necessarily, the absolute creation of the heavenly bodies which is referred to in Gen.1.14-18, but the accomplishment of the purpose for which they were "made in the firmament." [Light.] It is certainly to the believer no less gratifying than it is surprising to find the following appreciative words in the agnostic Haeckel's History of Creation (vol. i. pp. 37, 38, Eng. trans.): "Its extraordinary success is explained not only by its close connexion with Jewish and Christian doctrine, but also by the simple and natural chain of ideas which runs through it [Haeckel's Biblical account], and which contrasts favourably with the confused mythology of creation current among most of the ancient nations.... Two great and fundamental ideas, common also to the non-miraculous theory of development, meet us in the Mosaic hypothesis of creation with surprising clearness and simplicity—the idea of separation or differentiation, and the idea of progressive development or perfecting... In his [Moses'] theory there lies hidden the ruling idea of a progressive development and a differentiation of the originally simple matter. We can therefore state our just and sincere admiration on the Jewish lawyer's grand insight into nature, and his simple and natural hypothesis of creation, without discovering in it a so-called Divine Revelation." Cotton, Heb. karpas (cf. Lat. carbasus), Esth. 1.6, where the Vulg. has carbasini coloris, as a colour, not a material (so in A.V. green), were intended. There is a doubt whether under shēsh, in the earlier, and ble[c], in the later books of O.T., rendered in A.V. by white linen, "fine linen," etc., cotton may have been included. The dress of the Egyptian priests, at any rate in their ministrations, was without doubt of linen (Herod. ii. 37), though Pliny (in 1st cent. A.D.) says (xix. 1, 2) they preferred cotton. Cotton garments for the worship of the temples are said to be mentioned in the papyri cited by H. E. Mayer. There is, however, no word for the cotton plant in Heb., nor reason to suppose any early knowledge of the fabric. The Egyptian mummy swathings are linen. Cotton is made from the woolly covering of the seeds of Gossypium herbaceum, a plant of the mallow family. Speaking of "the trees of the Island of Tylos, within the Persian sea," Pliny says (xii. 10, Holland's trans.): "In the highest part and knap of the same Island there be trees bearing wool... they bear a fruit at the last, like Gourds in fashion, and as big as Quinces; which when they be full ripe, doe open and shew certaine balls within of downe: whereof they make most fine and costly linen clothes." Varro knew of tree-wool on the authority of Ctesias, contemporary with Herodotus. The Greeks, through the commercial consequences of Alexander's conquests, must have known of cotton cloth, and more or less of the plant. Cotton was manufactured extensively in Egypt later, but extensive monuments belonging to its growth, as in the case of flax, in that
COUCH and Linen.

Holtzmann, etc. The distinction of cotton from time immemorial, to grow it in abundance, and in parts to be highly favourable to that product. In India, however, we have the earliest references to the use of cotton for dress; of which, including the starching of it, some curious traces are found as early as 800 B.C., in the Institutes of Manu. Cotton is now both grown and manufactured in various parts of Syria and Palestine; but there is no proof that, till their contact with Persia, the Hebrews generally knew of it as a distinct fabric from flax. [Flax: Linen.]

Couch. [Bed.]

Council. (1) The Great Sanhedrin (Mt. 5:22, 25, 59; Jn.11:47; Ac.4:15, 5, 21, etc.). (2) The Lesser Sanhedrin (Mt.10:17; Mk.13:9.)

Such were usual in the Roman provinces. (Suet. Tib. 32; Galba 19.)

Court. The rendering of two Heb. words, both meaning an "enclosure." (1) 'dzará, the outer court of Solomon's temple (2Chr.4:9, 6, 13). (2) hā'tir, court of house, containing the well. (1K.7:18); court of palace, the "other court," that immediately surrounding the palace (1K.7:8); court of guard—i.e. place of confinement in king's house (Ne.3:25; Je.32.2); court of the tabernacle (Ex.27:9); of Solomon's temple—two courts (2K.21:5), the inner (1K.6:36) priests' (2Chr.4:9) or upper court (Je.36:10); the new (2Chr.20:5) or outer court (Ezk.10:5) or great court (2Chr.4:9). Also used of the courts of Ezekiel's temple (Ezk.40. 14, etc.). [Judge.]

Cou'tha. Sons of Coutha were among the servants of the temple who returned with Zerubbabel (1Esd.5:32).

Covenant (Heb., 'ádat, a cutting, i.e. dividing of the sacrifice), LXX. δαβέγεν, and N.T. The idea of covenant is to be interpreted, not from its crude beginnings, but from its highest development—as between God and man, rather than between man and man. (For the latter, see LAW IN O.T.; FAMILY; HANDCLASP; OATH; WITNESS.) (1) The old covenant consisted in the union between God and one selected nation, Israel. The conditions were recorded in the Book of the Covenant. The covenant was effected by offering the covenant-sacrifice (Gen.15:7-10; Ex.24:1-11). "The more immediate object of the sacrifice, on this as on every other occasion, was expiatory. Before Jehovah could enter into a covenant-relation to the people, it was necessary that expiation should be made for the sin of people" (Kurtz, Hist. O. C. iii. 143). Thus the covenant was rendered possible by sacrificial blood (Ex. 24:8), and secured Jehovah's dwelling in the midst of the nation. [TABERNACLE; TEMPLE.]

A distinctive feature is that it was not made with individuals, but with an entire nation. The individual shared its privileges as a member of the nation. His own transgressions might necessitate personal renewal of covenant-relation by sacrifice, but the covenant consecration retained its validity, and was never renewed (cf. Kurtz, ib. p. 144). The value of this sacrificial covenant, however, consisted in its failure by the Psalmist's emphatic insistence on the necessity of inward personal religion in the worshipper (Ps.51). He did not undervalue the outward expression, but laid all stress on inward reality. And necessarily, the moral and religious development of Israel caused in the serious mind increasing consciousness of the gaps and inadequacy of this entire covenant. This consciousness finds its chief expression in Je.31:31-33, where a more complete covenant is anticipated in the future, the limitation of the existing one being indicated as consisting in its externality (ver. 33) and its incomplete absolute power (43). (2) The New Covenant. On the night of the institution of the Eucharist, our Lord said, "This is My blood of the covenant, which is shed for many." (Mk.14:24, R.V.). St. Paul's still earlier account reports, "This cup is the new covenant in My blood" (1Cor.11:25, R.V.). The expression is in either case an indisputable reference, not to the new covenant 'as such'—conveyed to the hearers' minds, remembering their traditional associations, the thought that their Master was about to institute a new covenant between God and man ("new," as contrasted with the covenant with Israel); and that Jesus' death was to be the covenant-sacrifice, which was to be of a different order from the sacrifice, which did not ratify but create it, so is the new. A covenant between God and man demands, from the Jewish traditional standpoint, propitiation, the reconciliation of God with man. (Cf. Lev.17:11.) Thus the death of Christ, by which the new covenant was created, is objectively a propitiation, subjectively a communication of his sacrificially-offered life for the sanctification of mankind. (Cf. Schmid, Bibl. Theol. N.T. 212.) See further 1Pe.1:2, "obedience and sprinkling of the blood of Jesus Christ," and 1Pe.1:18. As the old was a covenant with a people, rather than with individuals, so it was a covenant-relation with a community (Eph.5:25; Tit.2:14). The individual, being admitted within the covenant-body, has thereby right of direct access to God, in virtue of the covenant-relationship once for all enacted. The social side of religion is as emphatic in Christianity as in the Jewish faith. Thus the new covenant is associated with a new social rite—the Eucharist, which (whatever else it is) is a strong assertion of collective unity. For apostolic efforts to explain to Jews the relation of the old covenant to the new, see Gal.3:15-18; Heb.8:7-13. Robertson Smith, Religion of the Semites; Holtzmann, L. i. 462, 465.; Kurtz, Hist. Old. Covenant, i. 143 ff.; Schmid, Bibl. Theol. Covetousness. The verb "covet," hâmádah, LXX. ἐραθυνεῖ, Vulg. concupiscere, occurs first in order of time in the Decalogue, with the exhortation of setting the mind on a forbidden thing with intent to procure it. Like its LXX. equivalent, hâmádah is used of lustful desire (Ps. 6:25), and occurs in Deut.5:21(18) of desiring a neighbour's
wife, while a separate verb is used in the latter half of the verse for "coveting" his other possessions. The N.T. appears to connect the ideas of coveting and impurity; e.g. "unclean person nor covetous man" (Eph.5.5), "adulteries, covetings" (Mk.7.22). Similarly, as "fornication" is often used for inideliness to Jehovah, so "covetousness" is linked with the worship of other deities: "covetousness which is idolatry" (Col.3.5; cf. Is.1.59). The abstract noun is βεγα in O.T., and πιεοτεμα in N.T. Both nouns have a more restricted sense than the corresponding verbs, and connote the desire to possess more than one's share of property. Since, however, the mind may well be set on gaining a thing, or have such a desire, as Gen.8.7, I Cor.i.2,31, as or have Je.8.7, I are reigned'ghur, by These then Very growth Mosaic point fornication Coz Cow. Cracknels some things of while of the day—The of the people of the Antiochus Epiphanes (2Mac.4.29).

Creation. (1) The world is said in Gen.1 to have been created in six days, and God is then declared to have "rested" on the seventh. These days of creation were long regarded by most people as literal days of 24 hours. But in later times it has gained ground that by "day" a long period is meant—a period of growth from the non-existent ("evening") through the dawn ("morning") of a new state of things until it was definitely established. Very recently some German critics have attempted to revive the idea that literal days are meant. But as this theory is simply adopted to disprove the authority of the Mosaic account of creation, it need receive little attention here. It will be sufficient to point out that in Gen.2.4 the whole word of creation is said to have been accomplished in a single "day." It is true that the latter part of this verse is attributed by recent critics to another author. But as they suppose that author to have been an earlier author, and as they have also supposed that the middle of Gen.2.4 commences a different account of creation, whereas it simply describes the adaptation of the world already created to the needs of man, its latest inhabitant, the theory that the word "day" must be taken literally may be safely dismissed. (2) Another question is whether these "days" must necessarily be regarded as consecutive. Even so, the history of creation in Gen.1 approaches with marvellous closeness to the discoveries of modern science, as will be shown; but the distinctness of the days is more easily seen in the non-chronological order of the narrative. It is sufficient to interpret it as meaning, as it was understood in the time of the phenomena occurred to the narrator, and to suppose that the allusions to "evening" and "morning" refer to the gradual evolution (by the flat of the Creator) of the things or creatures mentioned, according to certain laws prescribed by Him, into the condition in which we now find them. The rest of the story indicates that since the "sixth day" there has been no creative act but that He Whom brought all the universe into being has been content thenceforth simply to guide and regulate His creation. (3) It has been contended that the word Elohim (אלהים) when used in the narrative indicates a separate document. [But and the Semitic word שמים] in the translation of the "Jehovistic" and "Elohist" documents the critics themselves are not consistent, and the use of the word Elohim indicates a great scientific truth. Its meaning is Power or Force, and it is significant that at the early period when Genesis was written, God was already regarded by the Hebrews, not as the Great Primal Force to which, or rather to Whom, all phenomena owe their existence. (4) We next come to the stages of the process of creation, which, as already stated, correspond very closely indeed with the succession of events as laid down by modern scientific research, though one or two of the processes attributed to different "days" may possibly have been contemporaneous. "In the beginning" (that is to say, at some period in a far-distant past) God called the visible universe into being. At first the earth was "formless and empty"—that is, it was as yet one of those gaseous worlds which modern science declares to have preceded the formation of those globular masses which we now term "suns" and "planets." But the gaseous matter of which the nebulae consisted eventually developed into solid and liquid matter, because the Spirit of God—the Primal Force mentioned above—"brooded," or "fluttered," i.e. communicated a vibratory motion to the gaseous matter, until liquid and non-liquid matter were finally separated from each other. Mr. Capron, in his able and learned work (Conflict of Truth), explains the process as follows in strictly scientific language: "In the beginning the
CRIMES AND PUNISHMENTS

Almighty Being created Matter. And Matter was then in a gaseous condition, for it was formless, homogeneous, and invisible. And the Spirit of the Almighty agitated with molecular vibrations the fluid mass. On the first day God decreed the existence of light. This statement that there was light before the sun was created has long been derided by those who desire to decry the authority of Scripture. But recent investigation of astronomical phenomena has led experts independently to the conclusion that the facts of solar and planetary evolution require the existence of light before the sun existed. A second stage in the history of creation was the aggregation of the nebula into more definite forms, each with its fluid atmosphere (Heb. Hevans) around it, and its gathering of waters on its surface. A third stage was the conversion of the less definitely coherent masses into something more closely resembling our earth—the separation of sea from land and the preparation of the foundations of organic life on the earth in its less highly developed forms, including provisions for its permanent continuance. A fourth stage (which may either have preceded, followed, or been contemporary with the last) was the evolution of vegetable and animal life, and the observation of it by us. The fifth head under which the divine process is regarded is the creation of the inhabitants of the sea and air. And lastly we are told of His bringing into existence the inhabitants of the earth—plants and animals—of the diapason closing full in man," the highest and noblest of all His creatures, to whom is given the power to rule all other beings which have been created. The vegetable productions of the earth are to be His food, and the animal creation is to be subject to his will. Then the great principle is laid down on which all revealed religion is built—that all things which were made came perfect from the hand of the All-wise Creator. "God saw everything that He had made, and beheld it was very good." It is not to Him, as some have believed, nor to matter, which is His work, that the ruin and misery found in His hand is directly attributed, but to the misuse of the faculty of free will, with which man was endowed at his creation. [Fall.] Gen.2.24. (not the work of another hand) tells us how Jehovah Elohim, the Eternal Power ("Persistent Force," as Mr. Herbert Spencer calls Him, as distinguished from Creative Force), continues the process commenced at creation, of adapting the world for man's habitation. The Conflict of Truth, by F. Hugh Capron; and three works by Sir J. W. Dawson, The Story of the Earth and Man, The Origin of the World, Modern Science in Bible Lands; Heb. and Bab. Cosmologies, by W. St. Clair Tisdall in Nineteenth Cent., Aug. 1905, pp. 259-266; and see further a valuable article. Cosmogony in this Dict. [J.J.L.]

Creditor. [Loan.]

Crescens, a companion of St. Paul, who had left him to go to Galatia (2Tim.4.10). St. Paul's usage makes it probable that Galatia in Acts 16.10 is the same as Galatia, and that the reference of Galatia to Gaul instead of Galatia, and the testimony of Eusebius, have led to the belief that the other Galatia, viz. Gaul, is meant, and that the foundation of the churches of Vienne and Mayence has been ascribed to Crescens. [E.R.B.]

Crète, a large island S. of Greece, in the Mediterranean at the mouth of the Aegean Sea. It is about 140 miles E. and W., and 30 miles N. and S. Mount Ida rises 6,000 ft. from its shores. It is first noticed in 1475 B.C. (1Mac.10.67); and St. Paul's voyage along its S. shores is described (Ac.27.7-21) till, driven by the N.E. wind, the ship sheltered leeward of the island CLAUDIA. [Fair Havens; Gortyna; Lasea; Phenice; Salomone.] In the Ep. to Titus the establishment of elders and bishops in Crete is noticed (Tit.1.5), and the evil reputation of the Cretans (ver. 12). Josephus mentions Jews in Crete as early as the time of our Lord (2 Wars vii. 1). The old population was Greek; and the discoveries of Mr. A. J. Evans (since 1893) show that the country was as civilized as early as 1500 B.C. [Writing.] There is no reason to believe that the CHERETHITES (2Sam.8.18; Ezk.25.16) were Cretans. They were probably inhabitants of KERATYAH in Philistia. [C.R.C.]

Cretes. (Ac.2.21), Cretans (Tit.1.12), inhabitants of Crete.

Crib (Heb. ἐκβιός; Job 39.9; Pr.14.4; Is. 1.13; Prov.22.24, "next-place" or "stall.") The ancient rock stables in the Hebron hills and elsewhere have stone mangers with holes perforated beside them for the halter ropes (Surv. W. Pal. i. p. 312; iii. pp. 348, 369). [C.R.C.]

Crimes, Wrongs, and Punishments. A. Wrongs—"the evil that is done to a man, who offends not, in his "eye," or "by his own corn;" (1) When the society is weak, many injuries lead to vengeance expressed in blood-feud (see especially Gen.34) and retribution, seen in talion ("eye for eye," etc.). This is often disadvantageous to the community which is weakened by private wars and the loss borne by cripples of fighting men, and which, in its recognition, is added to a system of compensation to prevent this. Thus the owner of property is offered manifold restitution from the thief to prevent his taking the law into his own hands and fighting (Ex.22.1-21,37; etc.; Post, Grundris, ii. 430-432); and in most cases both the blood-feud and talion are regularly succeeded by composition. Gen.20,16, where a thousand pieces of silver are given as a covering of the eyes, is particularly instructive. (2) Similar to talion is the notion that an offender "shall be deprived of the limb with which he offends" (Gautama, x1. 1; cf. Vpsius, v. 10, etc. See Post, Grundris, ii. 230. One instance in Pentateuch, Deut. 25.12). (3) In other cases the offence is such as to demand the maintenance of the severest punishments for the protection of society. Here the very motives that operate in (1) to do away with the death penalty are found in the modifying (Ex.21.16; see Post, Grundris, ii. 355). (4) Laws closely implicated with religion in all early societies,
and this affects the subject in several ways.
(a) The existence of a whole class of offences is due to religious ideas—e.g. apostasy, prophesying falsely of future events, and murder. Another ancient theory is that offenders against gods should be offered or devoted to the offended deity (Post, Grundris, ii. 244 f.; so to God, see Heb. and R.V. marg. of Ex. 22.20; Deut. 7.26, 13.15; [ANATHHEMA]. (c) It is possible to recognise many offences in any one of four ways: (i) as a sin against man; (ii) as a sin against God; (iii) as an offence against the community; (iv) as defiling the community or the land in God's sight (Judg. 20.13 and often in Deut.). (ii) and (iv) obviously require expiation. Hence, if an act is regarded primarily from either of these points of view, the picaresque notion will predominate—e.g. Deut. 21.1-9, but without necessarily preventing the other aspects of the case from being present to the lawgiver's mind. (d) Probably an extension of this idea is explained by Vishnu, xxxiv. 2: "Such criminals in the highest degree should proceed into the flames; for they have committed a crime," ('Cf. Gen. 38.24; Lev. 20.14, 21.9. (e) Divine punishments and rewards are often promised, and the actions so treated are properly not within the sphere of law-courts at all. It should be noticed that the idea of talion is often prominent here (e.g. Ex. 22.24[23]), as an aspect of the rule of personal crimes, where wrongdoers being punished in that wherein they have offended (e.g. childless death is a punishment for certain cases of incest). (f) Certain actions outraged the moral sense of the community—"wrought folly in Israel" (Gen. 34.7; Deut. 22.21, etc.). In Israel they appear to have been offences falling under (4). (g) The idea of punishment as a deterrent from crime also appears soon (Deut.19.20, etc.). (7) On the idea of collective responsibility, see LAW in O.T. [B. (7) (iv)]. (8) Certain offences are usually treated as merely giving rise to claims for compensation—e.g. damage done to crops by stray-animals, for injuring him falsely with his animal, the greatest similarity to modern law.—B. PRE-MOSAIC. In most cases our information is fragmentary, and no certainty is attainable. (a) See HOMICIDE. (b) Adultery is treated as a sin against God in Gen.12.10-20, 20.26.10 and 39, and the (alleged) attempt is treated by Joseph's master as a crime punishable by imprisonment. [ADULTERY.] The attempt gives rise to compensation in Gen. 20 [supra, A. (1)]. (c) Reuben committed incest, and was punished by it for the loss of his birthright and blessing (Gen.49.3f.; 1Chr.5.1f.). (d) The sin of Sodom was clearly very grave according to Hebrew ideas. Probably it would have been treated as a crime if committed by a Hebrew. (e) Rape committed by a foreigner gave rise to blood-feud in Gen. 34. There were, however, differences of opinion as to the action of Dinah's brothers (34.30f.), which, in fact, belongs to an earlier stage than criminal law. (f) Unchastity in a widow was, at any rate in some cases, an offence punishable by burning (38.5[g]) Kidnapping occurs in Joseph's case. It was an offence against men (42.21f.). It would have given rise to vengeance (with unspecified results) (50.15-17). (h) Theft of movables was punishable by death or bondage (31.32, 44.9, etc.). (i) Spying was clearly a crime, at any rate in Egypt (42). (j) Non-circumcision was punishable by cutting off the foreskin. (k) Pre-Mosaic. 1. In some cases, two of the ideas explained in A (supra) are mentioned in connexion with the same offence—e.g. Deut. 21.21. Unexpressed reasons must often have played a part in forming a rule even when others are expressed, and in many cases no reason at all is given for the rule laid down. This makes the scientific classification difficult, and the difficulty is increased by the fact that emphasis is sometimes laid on one aspect of a rule, sometimes on another. Again, what is historically one thing, e.g. vengeance, is often made to subserve entirely different ideas of justice. Subject to these remarks, the following arrangements, based on the legal consequences of each action, and generally omitting HOMICIDE (which is separately treated), appears least open to objection. In each case C. stands for the legal consequences. (1) Offences against living individuals. (a) Vengeance subjected to legal process: Deut. 19.5 f., where the case of relation to person fighting her husband; C. loss of hand. [HOMICIDE.] (b) Vengeance subjected to legal process, and tempered by money payments, or else damages on a scale calculated to prevent the party wronged from taking the law into his own hands: (i) Injuries to property: Deut. 19.4 (infra, C. 11. (f)), a thief of cattle. (2) Sheep: C. four-fold restitution [CATTLE]. (y) Sale of things if thief is penniless: 2. if animal found alive in thief's hands: C. double restitution. 22.7=[6-5], theft of the deposit; C. two-fold restitution by thief: other cases; C. two-fold restitution by depository or owner according to his moral responsibility. (3) Injury to property: C. simple damages. 21.33f. injury to animal by opened pit. 21.36, injury to animal by vicious ox. Lev. 24.18, 21, killing an animal. Ex. 22.31[61], damage to crops, etc., by animal or fire. 22.12[21], depository losing animal through theft. 22.14[13], damage to borrowed animal or object (see also infra, 4 and HOMICIDE). (f) Wrong to women: 21.7-11, Hebrew concubine bought from her father not married by purchaser or given to his son; C. to go free. 22.16[15], seduction; C. seducer to pay father bride-price, also to marry the girl if her father consents [SLAVE]. Deut. 21.14, captive slave woman taken as wife by master who tares of her; C. freedom. 22.28f., rape of virgin; C. indissoluble marriage, and payment of 50 shekels to father. (iii) Wrong to slave by master: Ex. 21.26f., knocking out eye or tooth; C. freedom for slave; cf. supra (ii). (iv) Injury to (free) person: 21.18f, to a combatant in a fight; C. damages for time lost and cost of healing; 21.22, in fight to pregnant female bystander, causing miscarriage only: C. damages. (v) 21.35; closely analogous, is the case where two oxen (not known to be vicious) fight, and one is killed; C. share dead ox,
CRIMES AND PUNISHMENTS

and live ox equally. (d) Cases where reparation would be inadequate, because of sore outrage to the moral or religious sentiments of the community, or owing to the heinousness of the offence: (i) Reparation and punishment: Deut. 22.13-19, husband slandering innocent wife; C. reparation to wife through indissoluble marriage, to her father by fine of 100 shekels (which may be partly penal) + punishment in chastisement of husband. (ii) Punishment only: Ex. 21.15, striking parent. 21.17; Lev. 20.9, cursing parent. Ex. 21.16; Deut. 24.7, kidnapping and enslaving or selling. Deut. 22.20.f, misconduct of virgin detected after marriage; C. death [FAMILY]. 19.16-21, giving false evidence; C. talion; cf. supra (b) (i). 21.18-21, rebellious son; C. death. Lev. 20.10.f, 22.22, adultery; C. death to both. Lying with betrothed woman, Deut. 22.23.f, if free, C. death to both; Lev. 19.20, if bondmaid, (unspecified) punishment for both. Deut. 22.25, rape of betrothed (free?) woman; C. death. Many of these offences might perhaps be put under 3. infra; but probably adultery, etc., were regarded, partly at any rate, from the point of view of the injured husband. (e) Cases where reparation impossible: Ex. 21.20, master beating slave and causing immediate death; C. (unspecified) punishment complete (impossible, because he is dead; to owner impossible, because he is the offender). [HOMICIDE.] (N.B. In cases where a specified sum is to be paid, it is impossible to be certain that the damages are simple damages, and not larger than the pecuniary value of the injury.) (2) Offences against the dead: Deut. 25.5-10, resident brother of childless deceased refusing to perform levirate marriage; C. public loosing of shoe, and spitting in face by widow. (3) Other offences. (a) Against God or the community only: Ex. 22.18 [17]; Lev. 20.27, practising witchcraft; C. death. Ex. 22.19[18]; Lev. 20.15; cf. Lev. 18.23, certain unnatural offences. Lev. 20.6, consulting wizards, etc.; C. cutting off by God (infra, II.). Ex. 22.20[19], sacrifice to a false god; C. devotion, i.e. death [ANATHEMA]. Ritual offences; C. death, cutting off (infra, II.) or destruction. Ex. 31.12-17; 35.1-3, cf. Num. 15.32-36, Sabbath-breaking. Ex. 30.33, polluting the sanctuary. Ex. 30.38, making holy Incense for scent. Lev. 7.18, 20.21, 25.27, 17.3f, 10-12, 13f., 19.8, eating flesh of Peace-offerings improperly or fat or blood. 17.5f, offering Burnt-offering or sacrifice without bringing it to door of tabernacle. 23.29f., non-affiliation of soul or working on Day of Atonement. Num. 1.51; 3.10, 38, stranger coming near dwelling, etc. Ex. 12.15; eating leavened bread during Passover. Num. 9.13, 20, not keeping Passover, and non-purification if Unclean. Lev. 22.3, Priest approaching holy things in state of uncleanness [TABELNACLE; SACRIFICE]. Other ritual offences: 22.4, eating a holy thing unwittingly; C. restore its value + l. 17.15, not washing clothes to remove impurity; C. “he shall bear his iniquity.” Other offences: 20.2ff.; cf. 18.21, giving seed to Molech; C. death, otherwise cutting off. Lev. 18, certain sexual offences; C. cutting off. 21.9, misconduct of priest’s daughter; C. burning [supra, A. (4) (d)]. 23.16f., blasphemy; C. death.

Num. 15.30, sinning with high hand; C. cutting off. Deut. 13.1-5, prophet or dreamer preaching apostasy; C. death. 13.6-11, relation or friend urging apostasy; C. death. 13.12-18, apostasy of city; C. devotion by edge of sword [supra, A. (4) (b)]. 17.2-7, apostasy of individual; C. death, cf. Job 3.26-28. Deut. 18.20, prophesying falsely; C. death [PROMISES]. 17.12f., disobedience to direction of judge or priest in supreme court; C. death [JUDGE]. 22.20f., wife guilty before her marriage; C. death. On specific priestly offences see PRIEST AND Levites. (b) In certain cases, the person who would otherwise have been injured is a consenting party. Under this head fall various cases of incest specified in Lev. 20; C. death, burning, cutting off, dying childless—according to the case. (4) In certain cases of injury to property, the action of a wrong-doer who repents is treated primarily from the point of view of expiating sin (Lev. 6.1-7[5.20-26]; 26.30f.) (unspecified) punishment (if possible) by restoring the article, with the addition of; but the emphasis of the law is on the Guilt-offering to be brought [DEPOSIT]. In other cases, matters are dealt with purely from the point of view of Sin, and fall outside the scope of this article. II. Additional items to be mentioned under Capital Punishment as a general heading were found, but never defined. It has been variously held to mean death or some form of excommunication or banishment. Often (e.g. Lev. 20.3) it is said that God will cut off; and probably some form of death by His hand is meant. (2) Stoning was the most frequent form of capital punishment, and is probably usually meant where the method is not specified. It had the advantage of not exposing any individual to blood-feud or the odium of being a public executioner. The witnesses were to cast the first stone in certain cases [Witness], perhaps always. (3) Hanging is mentioned Deut. 21.22, where the exposure of the corpse during the night is forbidden; but it is not clear whether the hanging is the means of execution or subsequent thereto. See also Num. 25.4; 2Sam. 6.9. (4) Stripes were not to exceed forty in number (Deut. 25.1-3), and appeared to have been in judicial discretion. They were possibly equivalent to the flogging of Romans 22.21, 25.19; Deut. 22.18, and probably also in a number of cases not mentioned in the law.—D. Post-Mosaic. The references are too scanty to be of much value—e.g. from Je. 3.20 it appears that desertion of a husband by his wife was wrong; but we cannot draw any inferences as to the state of the law on the subject. The following facts may be gathered: Cursing the king became an offence punishable with death (1Sam. 16.26f.; I K.21). In Ezekiel’s time adultery may have been punished in the way suggested by Ezk. 23.17, but this is not the only possible interpretation of the passage. From Je. 20.21, 29.26 it appears that prophesying in the temple was an offence punishable with beating, stocks, and collar? (see commentaries ad loc.), if disapproved by the priests. Treason was punished by beheading and imprisonment (Jes. 37.13ff.). In at least one O.T. case prophesying against Jerusalem and Judah was punished by execution with the sword, followed by casting the corpse into the graves of the common people (28.
CRIMES AND PUNISHMENTS

20-23). Slaying with the sword or spear often occurs elsewhere (e.g. 1K.2.25,34); but it is not always clear whether the cases should be regarded as instances of legal punishment. The Philistines burned Samson’s wife and father-in-law (Judg.15.6: cf. 14.15). Imprisonment appears to have been common under the monarchy (1K.22.27; 2Chr.16.10; Je.37.13, etc.), as also stripes (37.15, etc.). Some form of stocks or block on the feet is mentioned in Job 13.27, 33.11 (not the Heb. word translated “stocks,” in Je.20.2, etc.). Scourging with thorns and briers occurs in Judg.8.7,16, but not as a legal punishment. Heaps of stones were sometimes raised over offenders who had been put to death (Jos.7.25f.). Banishment and confiscation also occur (Exxx.7.26). On 2Sam.12.31 see H. P. Smith ad loc. Theft of moveables was perhaps punishable by sevenfold (?) manifold restitution (Pr.6.31). [Law in O.T.; Homicide; Judge.] For literature, see Law in O.T. [H.M.W.] —In N.T., Punishments, etc. (1) Stoning. (a) For Blasphemy. Two attempts were made to stone Jesus on this charge: Jn.8.59, for taking to Himself the divine name, and 10.31, for claiming unity of substance with the Father. St. Stephen was charged with speaking blasphemous words against the temple and the law (Ac.6.11,13; but cf. 7.56 and Mt.26.64,65). [Witness.] (b) For adultery (Jn.8.4,5). (c) It was the usual form of punishment inflicted by the people (Lu.20.6; Ac.5.26,14,5,19; Mt.21.35. See also 2Cor.11.25; Heb.11.37). (2) Scourging with thongs, the culprit being bound to a that it would satisfy His accusers (Mt.27.36 and parallels). [Pilate.] (b) Followers of Christ so punished (Mt.10.17,23-34; 2Cor.11.24). A stronger term, δίψω, “to flay,” N.T. “to beat or smite,” is used Mk.13.9; Lu.22.63; Jn.18.23; Ac.5.40,22.19; see also 16.37. Pa.58iω, “to beat with a rod,” is used Ac.16.22; 2Cor.11.25. St. Paul was “put to the question” by scourging (Ac.22.24). According to Pordian Law (Cic. Ferr. v. 62-66) it was “a high crime to beat” a Roman citizen. (3) Τυμπανίζω, “beating to death” —breaking on the wheel. Heb. 11.35, “others were tortured,” R.V. marg. “be put to death,” refers to 2Mac.6.19,28,30. Josephus, de Macc. v. 9, calls the same instrument τροπχγς, “a wheel.” (4) Imprisonment. For debt, Mt.5.26; for insurrection and murder, Lu.23.19. Believers in Christ, Lu.21.12; Ac.5.18, 8.3,22,4.26,10, etc. There was a public ward, Ac.5.18; some kings were put in prison by the people, as prisoners were sometimes bound to soldiers by chains, 12.6. (5) Execution from the synagogue for confessing Christ, Jn.9.22,12,42,16.2. (6) Decapitation. John the Baptist, Mt.14.8-12. See also Ac.15.2; Rev.20.4. (2) Precipitation, Lu.4.29. According to 2Mac.6.10, two women were precipitated from the highest wall of Jer. for circumcising their children. (8) Drowning. Mt.18.6. This was a Gk. and Roman punishment; cf. Josephus, 14 Ant. xv. 10. (9) Sawing asunder, Heb.11.37. Mt.24.51, “the lord of that servant . . . shall cut him asunder,” R.V. marg. “severely scourge him.” (10) Exposure to wild beasts, R.C.15.32; 2Tim.4.17. Meaning of these passages is, however, uncertain. (11) Banishment, Rev.1.9. (12) Crucifixion. [CROSS.] (13) Handed over to Satan. R.C.15.5; 2Tim.1.20. This was probably a temporal punishment, intended to be remedial; cf. Lu.13.16; 2Cor.12.7. [Excommunication; Satan; Hymenaeus.] [H.B.]

Crimson. [COLOURS]

Crisping-pins (Is.5.22). [BAG.

Crispus, a ruler of the synagogue (ΔΡΥΣΗΝΙΤΕΡΑ) at Corinth. His conversion (Ac.18.8), coincident with St. Paul’s removal from the synagogue to the house of a Gentile, was apparently the turning-point in the history of a mission which, until then, had only met with resistance. The importance of such a convert, or services rendered by him, would account for the distinction granted him of baptism by the apostle himself (1Cor.1.14). See Lightfoot, Hor. Heb. in loc. [E.R.B.]

Cross. The word represents the Gk. σταυρος, which is strictly equivalent to Lat. palus (stake), though it was afterwards used (as in N.T.) for the Lat. crux. Death by impaling on a stake had been practised by the Romans on their slaves as well as death by crucifixion proper. Of the three forms of the cross (decussata X, commissa T, immissa †), tradition is almost certainly right in assigning the last to our Lord’s case. The upright limb was usually left standing at the top, and the place of execution outside the city, and only the cross-piece was borne thither by the criminal himself or another from the place where he had been condemned or scourged. This was often made of two parallel timbers joined at the ends.
CROWN

between which the victim's head was inserted: Lat. patibulum. On arrival, the hands and feet were either bound or (as in our Lord's case) nailed to the cross-piece, when it had been duly fixed to the upright. A stout wooden peg, projecting from the latter, helped to support the body at the centre; but it is doubtful whether there was any similar support below the feet. A board, whitened with gypsum, on which the nature of the offence was written in black letters, was usually carried before the criminal to his execution, and then affixed to the cross over his head. This was done in our Lord's case. Pilate drew up the inscription, and it was made out in Heb., Lat., and Gr.—the national, official, and "common" dialects of Judaea. The versions of the inscription in SS. Mark, Luke, and John may possibly each represent one of these original languages (Jn.19.20) and St. Matthew's a combination of the three. See Farrar's St. Luke. p. 203. For further interesting considerations on the Title on the Cross, see Swete's notes on Mk.15.26, Westcott's on Jn.19.1ft., and Edersheim, Jesus the Messiah (3rd ed.), ii. 590f. For our Lord's Words from the Cross, see Seven Words, The. Death was often long delayed, and sometimes in rough mercy hastened by the breaking of the legs (Jn.19. 33ff.). There is some ground for thinking that (in deference to Jewish feeling) our Lord was not (as was usual) stripped of His clothing, until His body was prepared for burial. Even so the disgrace of the cross was fully as great as N.T. (especially St. Paul's epistles) depicts it. [C.L.F.]

Crown occurs in O.T. as the translation of various Heb. words. (1) The simplest (zer) has merely the idea of "encircling," and is used of the decorative golden wreath which and has the root that appears in "Nazarene." Hence this word denotes consecration, and is used of the crown which the high-priest wore upon his mitre (Ex.29.6), and sometimes also of the royal diadem (Sam.1.16). In the LXX it indicates a sacred office. [KING.] (3) The ordinary Heb. word (ulārā) for the royal crown, from which our word "tiara" is derived, has, however, no such special meaning. (4) In Esth.1.11,2.17,6.8 only, kather is used for the royal crown. In N.T. the Gr. words στέφανος and καθήρα is represented as wearing the garland of victory (Rev.6.2,14,14, R.V. marg.). [DIADEM.] [J.C.V.D.]

Crystal

CROWNED BY ASSYRIAN KINGS. (From Nimrud and Kouyunjik.)

crystal. (These signs, combining the cross and the sacred monogram, are found on the labarum of Constantine, but also earlier on coins of non-Christian Kings—e.g. Herod the Great and Trajanus Decius—and in the catacombs.)

The word as used in the Scriptures is sometimes translated "stone" (Isa.52.15). It is, however, better translated "crystal," "rock," "adamant," etc., that have been suggested, there can be little doubt that "glass" is intended. The Aramaic form of the word occurs in the Talmud in this sense. (G. 155f.) (1) qērā' often occurs in O.T. to denote "ice," "frost," etc.; but only once (Ezk.1.22), as is generally understood, to signify "crystal." The ancient supposed rock-crystal to be ice congealed by intense cold.
Cubit. [Weights and Measures.]

Cuckoo (Heb. šakāph). There does not appear to be any authority for this translation in A.V. of the Heb. word, which occurs twice only (Lev. 11:16; Deut. 14:15), as the name of some unclean bird. Bochart has attempted to show that šakāph denotes the storm-petrel. Tristram, on the other hand, has suggested that some of the larger petrels or shearwaters, such as Puffinus griseus and P. anglorum, which abound in the E. of the Mediterranean and are very similar in habits to the storm-petrel, may be denoted by the Heb.; but nothing definite can be stated as to the real meaning of the latter. [R.L.J.

Cucumbers. The Heb. gishšū'im occurs once only, in Num. 11:5, among the good things of Egypt for which the Israelites longed. Egypt produces excellent cucumbers, melons, etc. [Melons], the Cucumis chate being, according to Hasselquist (Trav. p. 258), the best of its tribe yet known. This plant grows around Cairo, and not elsewhere in Egypt. The C. chate is a variety only of the common melon (C. melo). It was once cultivated in England, and called the "round-leaved Egyptian melon"; but is rather an insipid sort. Besides the Cucumis chate, the common cucumber (C. sativus), of which the Arabs distinguish a number of varieties, is common in Egypt. Both Cucumis chate and C. sativus," says Dr. Tristram, "are now grown in great quantities in Palestine. On visiting the Arab school in Jerusalem (1838) I observed that the dinner which the children brought with them to school consisted, without exception, of a piece of barley cake and a raw cucumber, which they eat rind and all." The "lodge in a garden of cucumbers" (Is. 5.1) is a rude temporary shelter, erected in the open grounds where vines, cucumbers, gourds, etc., are grown, in which some lonely man or boy guards the plants from robbers and scares away the foxes and jackals from the vines.

Cummin, a cultivated plant of Palestine (Is. 8:22; 25:27; Mt. 23:23). It is an umbelliferous plant, something like fennel. The seeds have a bitterish warm taste, with an aromatic flavour. The Maltese of to-day are said to grow it, and to thresh it as described by Isaiah.

Cup. There are two words in Heb. for "cup" : kōs (Gen. 40:11, etc.), the ordinary drinking-vessel; and gūḥā' (Gen. 44:2; Is. 35:5), a larger vessel, corresponding to "tankard." Both were made of clay, probably also of horn and wood; golden cups at the king's table were also known (1K. 10.21). [Goblet.] [W.G.E.O.]

Curse 191

Cupbearer (Heb. mashq̄, rendered "butler " in Gen. 40:5), an official who held an important position at the Persian court as at those of Egypt, Palestine, and Babylonia. He figures in the mural drawings of Egypt (where his title is āuh); and in Babylon there was a special kind of wine which alone the cupbearer offered to his royal master. Nehemiah held this post (Ne. 1.11,2.1) at the court of Artaxerxes. The title "Rab-shakeh" does not (as has been fancied) denote "chief cupbearer," but is the Assyrian Rab-shaqû, and denotes an officer holding rank next to the Tarian (Assyr. "tartanu") or generalissimo. Rawlinson, W. A. Inscriptions, vol. ii. 67, 266; Ebers, Eine Aegyptische Königstochter, etc. [W.S.T.C.T.]

Curse. Usually either an invocation to a divine power to inflict evil on somebody, or else a resolution of God to send such an evil. The word is, however, also applied to the actual evil sent, to blasphemous language used of
CURTAINS

God, and to one who is reduced to such a pitiful plight that it is a maladiction to wish that another may become like him. A curse was sometimes regarded as having objective power (Jos.6.26; K.16.34; Num.22.6), and language is even used implying that it had some definite separate existence (Is.24.6; Zech.5.3). Hence the twelve curses, Deut.27.15-26, were aimed at offender who should only be touched by a ordinary law with difficulty, if at all. Hence, too, Micah's confession, Judg.17.7. Apparently the uttering of a curse concerning some offences placed those who knew the circumstances under a duty to confess; otherwise they were liable to the effects of the curse (Lev.5.1; Pr.29.24); but the guilt could be purged by consecration, sacrifice, and atonement by the priest (Lev.5.31). It was held that a causeless curse did not light (Pr.26.2); perhaps also that in some cases a curse could be diverted (Gen.27.13). Apparently a curse could counteract (or be counteracted) by a blessing (Judg.17.2; Mal.1.2; cf. Deut.27.19[20]; Ecclus.3.6). Most oaths contain a threat or promise, or otherwise a condition to take effect in the case of promissory oaths if the promise be violated, and in the case of declaratory oaths if the asseveration be untrue. [OATHS.] Hence every covenant contains a curse (though sometimes only implied in such a phrase as “God judge— or be witness—between thee and me”). Thus the curse forms a part of the covenant of Deut., and is one of the sanctions of the law it contains. The formulae of curses varied very greatly — e.g. Deut.28.16ff.; Judg.9.7-20; cf. 9.57; Je.29.22; 2Sam.16.21; Ne.5.13. Curses were sometimes accompanied by symbolical actions or ceremonies (Ne.5.13; Ac.15.20; Deut.27, etc.) and by sacrifice (Judg.9.27; Num.23.28ff.). As to legal provisions, cursing a father or mother was punishable with death (Ex.21.17; Lev.20.9). So was cursing God (Lev.24.11-23). The law also prohibits cursing judges and princes (Ex.22.25[27]) and the deaf (Lev.19.14). Later, cursing the king was regarded as a capital offence (2Sam.15.19; 21[22]; 1K.21). — Terminology. The Heb. qtâdi (and verb) are never used of self-imprecation (on 1Sam.3.13 see H. P. Smith’s critical note); nor is ābar. [BLESSING; VOW.] Leist, Gr acio-Italianische Rechtsgeschichte, 755-758; Realenzyklopädie für Protestantische Theologie und Kirchen, xviii. 148-154; Westermarck in Sociological Papers, ii. 145 ff. [N.M.W.] 

In N.T. an instance of a curse with objective power is Mk.11.14, where Jesus dooms a fig-tree to perpetual sterility; ver. 21, “the fig-tree which Thou cursedst is withered away.” Cf. Heb.6.8, the land “ nigh unto a curse,” and Gen.3.17. Used of persons devoted to destruction, Mt.23.14, “Depart from Me, ye cursed,” R.V. marg. “Depart from Me—under a curse.” Also of those under a curse, 2Pe.2.14, R.V. “children of cursing.” Christ by the manner of His death—crucifixion—was made a curse, i.e., metonymically, “accursed,” (Gal.3.13[15]; 14), with reference to Deut.21.23 [OATHS; ANATHEMA.]

Curtains. The rendering of three Heb. words: (1) yârîā, the 10 inner curtains of the tabernacle, constituting the “dwelling.” These were of costly material and fine workmanship (Ex.26.1[3].8). The 11 curtains of goat-hair, the “tent” over the Tabernacle (26.7, 36.14). Synonymous with Tabernacle (2Sam.6.17; 1Chr.17.1) and with Tent (Je.4.20; 10.20; 49.29; Hab.3.7; Can.1.5; cf. Ps.104.2). Figuratively of Jerusalem’s prosperity (Is.54.2). (2) masâbkh, prop. portière (Num.3.26). [HANGING.] (3) doq (Is.40.22), a thin veil, R.V. margin, gauze. [N.H.] 

Cush (20).—1. Son of Ham (Gen.10.6; 1Chr.1.10), perhaps called after a country allotted to him. — 2. A country (Gen.2.13) encompassed by Gihon, the second river of Paradise, would seem to have been somewhere N.W. of Assyria. — 3. Ethiopia above Egypt is termed in the ancient Egyptian inscriptions Kish, and probably corresponds to Cush elsewhere than in Gen.2.13. The Cushites, however, had clearly a wider extension, and spread along tracts extending from the higher Nile to the Euphrates and Tigris. A Cushite ruler was employed by Joab to take David the news of Absalom’s death (2Sam.18.21). Zerah the Cushite (A.V. “Ethiopian,” 2Chr.14.6), who was defeated by Asa, was probably the leader of an Egyptian army, but may have come from central Arabia. Zipporah, Moses’ wife, is called a Cushite (Num.12.1). [RACES.] [C.R.D.-B.]

Cush (212). A Benjamite mentioned only in Ps.7 (title). A.V. marg. suggests an identification with Sirmei. See 2Sam.15.5, 11.

CUSHI 

AN ARAB RUNNER.
CUTH

Ethiopian," a man apparently attached to Joab's person, who bore the tidings of the defeat and death of Absalom to David. That Cushi was a foreigner—as we should infer from his name—is possibly corroborated by his ignorance of the ground in the Jordan valley, by knowing which Ahimaaz was enabled to outrun him (2Sam.18.24,22,23,31,32).

Cuth was one of the places whence Shalmaneser introduced colonists into Samaria (2K.17.24,30). The statement that the men of Cuth (=Cuthah) made (images of) Nergal at once indicates the locality as being the Babylonian Kutu (non-Semitic Guadua), now Tel-Ibrahim, about 15 miles N.E. of Babylon. It was among the deities of these worshippers of Nergal, so that the identification seems certain. (See Hormuzd Rassam, Assur and the Land of Nimrod, p. 306, etc.).

Cutting off from the people. [Excommunication.]

Cuttings in the flesh. Disfigurements of the body, (see Lev.19.25,21,23; Deut.14.1) are still frequent amongst Eastern nations. The reason they were so strictly forbidden under the Mosaic law is not at first obvious. Aaron and his sons were indeed forbidden to show any signs of grief for Nadab and Abihu, but this was on special grounds (see Lev.10.5), for the priests of God might be divinely judged. The real cause why cutting and shaving of the body were so strictly forbidden was twofold. First, it has always been the custom in the East, as with many fakirs of to-day, to put the special marks of some false deity upon the body where they cannot be obliterated; and secondly, there was an idolatry of the body, or the mutilation of the manes of the dead might be propitiated, the living delivered from their molestations, and their future welfare assured. The Mosaic law, being always jealously strict with regard to anything like superstition or idolatry, naturally forbids customs which would give countenance to the worship of idols.

Cy'amon (Jth.7.3 only), a place lying in the plain (A.V. valley) over against Edraeelon. The earlier JONNEAM (Tell Qeimiln). [C.R.C.]

Cymbal, Cymbals, a percussive musical instrument. Two kinds of cymbals are mentioned in Ps.150.5, "loud cymbals," or perhaps castanets (cf. R.V. v.28, Isa.6.5), and "high sounding cymbals." The former consisted of two small plates of brass or some hard metal, two plates were attached to each hand of the performer, and were struck together; the latter of two larger plates, one held in each hand, and struck together as an accompaniment to other instruments. Cymbals were not only used in the temple worship and on sacred occasions: they were employed for military purposes, and also by the Heb. women as an accomplishment to their national dances. Both kinds are still common in the East in military music, and Niebuhr often refers to them. The "bells" of Zech.14.20 were probably concave disks or plates of brass, which in Palestine and Syria were attached to horses as ornaments.

Cypress. The Heb. tirzah is found only in Is.44.14. It points to some tree with a hard grain, but neither the etymology nor the context decides its identity. Besides the cypress, the "beech," the "holm-oak," and the "fir" have been proposed. There are two mentions of cypress (κυπάρισσος) in Ecclus.24.13,50,10. "I was exalted like a cedar in Libanus, and as a cypress tree upon the mountains of Hermon," and "as a cypress tree which grows up to the clouds." Here the Cypressus sempervirens is undoubtedly referred to. In the Hebrew version of the Isaiah reading is ohe (οξυ, Wycliff), so that the holm-tree, or holm-oak, of R.V. has ancient authority. [HOLM-TREE.] [H.C.H.]

Cyprus, named apparently from its "copper," by Canaanites or Phoenicians, an island in the Mediterranean, about 100 miles W. of Laodicea. It is about 4,000 square miles in area, and when the Cyprian Olympus is covered with snow, it is conspicuous in the view from Lebanon. In general character it is very like Palestine. The Cyprians are noticed (2Mac.4.29) in 2nd cent. b.c., but the island only in N.T. (Ac.4.36,11.19,20,13.4,15.39,21.3,16,27.4) with its chief cities PAPHUS and SALAMIS is supposed to be the CHITTIM of O.T. (perhaps the Akkadlan Kit-im, or "west region"), or Ktilim (Gen.10.4), a land of ships (Num.24.24) separated by sea from Tyre (Is.33.13,12; Je.2.16,20; Ezk.27.6; Dan.11.30), though the "isles of Chittim" may include others in the W. Ramses III. (about 1230 B.C.) reconquered Kition, Soli, Idalion, and Cerynia, in Cyprus (Brugsch. Hist. Egl. ii. p. 152). Sargon set up a monument at Idalion, and Esar-haddon (about 670 B.C.) received tribute from Itu-dagon the Phoenician king of Paphos, and from the Gk. kings Aegisthus of Idalion, Phthogaras of Kition, Evagoras of Soli, and Narses of Kurion. This mixed Gk. and Phoenician population still divided the island as late as 254 b.c. A bilingual text in Phoenician and in Gk.—the latter in the peculiar Cypriote characters—dates from 375 b.c. The Phoenician kings of Kition and Idalion (450-312 B.C.) were named Ba'al-melech, 'Azal-lecam, or 'Azal-ram, and the Cypriote king Gun-athon. Numerous rude semi-Phoenician statues, with Greek inscriptions on them in Cypriote characters, have been found. Cyprus was conquered by Amasis of Egypt in 6th cent. b.c., and by Persia in 525 b.c. In 387 b.c., after the Ionian revolt, Evagoras of Salamis and Lamia of Kallistras, the Cypriotes declared for Alexander the Great in 333 b.c. Ptolemy reconquered Cyprus for Egypt in 295 B.C., and Rome annexed it in 58 B.C. It was thus (after the battle of Actium) ruled by a proconsul (see Ac.13.6,7,12). [C.R.C.]

Cyrene, the principal city of that part of N. Africa which was formerly called Cyrenaica and also (from its five chief cities) Pentapolis. This district was that wide projecting portion of the coast (corresponding to the modern Tripoli) which was separated from the territory of Carthage on the one hand, and of Egypt on the other. Its surface is a table-land descending by terraces to the sea; and it was celebrated for its climate and fertility. The N.T. references to Cyrene agree with the facts—that, though on the African coast, it was a Gk. city; that the Jews were settled there in large numbers; and that under the Romans it was politically connected with
Crete. The Gk. colonization of this part of Africa under Battus began as early as 631 B.C., after the death of Alexander the Great, it became a dependency of Egypt. In this period we find the Jews established there with great privileges, having been introduced by Ptolemy the Roman Lagus. Soon after the Jewish wine samplings against the Roman power. In the year 75 B.C. the territory of Cyrene was made a province. On the conquest of Crete (67 B.C.) the two were united in one province, frequently called Creta-Cyrene. The numbers and position of the Jews here accord with the frequent mention of Cyrene in N.T. Simon, who bore our Saviour's cross (Mt.27.32; Mk.15.21; Lu.23.26) was a native of Cyrene. Jewish dwellers in Cyrenaica were in Jerusalem at Pentecost (Ac.2.10). They even gave their name to a synagogue in Jerusalem (6.9). Christian converts from Cyrene were among those who helped to found the first Gentile church at Antioch (11.20). Lucius of Cyrene (15.1) is traditionally said to have been the first bishop of his native district.

Cyreniuss. This is P. Sulpicius Quirinus, described by Tacitus (Annals iii. 48). After the deposition of Archelaus in 6 A.D., Quirinus, then proconsul of Syria, took over Judaea, and carried out a census or assessment for taxation, which met with some resistance (Ac.5.37). St. Luke, who records this revolt in the speech of Gamaliel, refers (Lu.2.2) to a previous census as occurring during Quirinus' government of Syria, and dates the birth of Christ by it. He clearly distinguishes from the census in 6 A.D. by calling it "first," thus implying that he knew of another. Serious difficulties arise in respect of this statement. Allowing on sufficient grounds the probability that Quirinus was twice proconsul of Syria, his earlier tenure cannot have begun till after the death of Herod the Great, 4 B.C., and therefore would not have helped to find the first Gentile church at Antioch (11.20). Lucius of Cyrene (15.1) is traditionally said to have been the first bishop of his native district.

Cyrus, the founder of the Persian empire (see Dan.6.28,10; 1.13; 2Chr.36.22,23), was son of Cambyses, king of Anshan, a descendant of Teispes. There are several contradictory accounts of his birth and rise to power, but they are all regarded as unhistorical, including the tragic story told by Herodotus (i. 95), which makes him to have been the son of a Persian nobleman named Cambyses and Mandane, daughter of Astyages, the last king of Media. According to the Babylonian Chronicle, Astyages marched against Cyrus (549 B.C.) to capture him, but his army revolted, and delivered him to Cyrus, who then took Ecbatana, and carried off its spoil to Anshan. He subsequently defeated Croesus, and annexed Lydia. In 538 B.C. a revolt took place in Babylonia, and this gave Cyrus an opportunity of invading the country. On the defeat of the Babylonians at Opis, his army entered Sippur, and Nabonidus sought safety in flight, but was captured in Babylon, which had been taken by Gobryas without fighting, though Belshazzar, son of Nabonidus, seems to have held out in some part of the city. [Belshazzar.] The result of these events was the subjugation of Babylonia to the empire. The date of the reduction of the Gk. cities in Asia Minor is doubtful. Cyrus is said to have fallen in battle against the Massagetae in 529 B.C., but Xenophon makes him to have died peacefully, and to have been buried at Pasargadae. Before his time the great kings with whom the Jews had come into contact had been either open oppressors or seductive allies, but Cyrus was a generous liberator. The prophet Isaiah (44.28) recognized in him "a shepherd" of the Lord, an "anointed" king (45.1), but his favouring of the Jews is now regarded as being rather due to policy than to sympathy with them as a monotheist—he was equally sympathetic to the Babylonian priesthood. The edict of Cyrus for the building of the temple (2Chr.36.22,23; Ezr.1.i.4.3.2.4.3.5.13.17.6.3) gave new life to Judaism, and enabled that development of which, though the history of the Jews reveals the reputed tomb of Cyrus at Murgib is probably not that of the great conqueror. See Saxe in Hastings, D.B. 3 (vols. 1898).

D

Dabareh (Jos.21.28). Dabathath, as R.V. Dabasheth, a place important as defining the boundary of the tribe of Zebulun (Jos.19.11), which is reached by Dabbasheth, and reached by the river (Kisunon) facing Jokneam. This defines the extent N. and S. Dabbasheth is apparently the present ruin Dabsheh, where alone in Palestine the name has been found. It is on a hill 13 miles N.E. of Accho, on S.W. side of the great valley of Wady el Qurn, which is probably the valley (ge) of Jiphthah-el (the mighty opening), so called because of its breadth; for near Dabsheh it expands into a broad vale called el
DABERATH

Buqei'ah (Heb. biq'd) a term applied only to wide, deep valleys. This line agrees with the position of Hannathon (Keft 'Anân), and the two latter names (Jos.19.14) sufficiently define the N. border as far as Dabbasheth, where the line turned S. "towards the west" (ver. 11, A.V. sea). Zebulun thus embraced the hills and plains from near Tabor to Hannathon on E., and from Jokneam to Dabbasheth on W., not reaching the sea of Galilee (in Naphtali), nor the shores of the bay of Acco (in Asher). Nazareth was thus in Zebulun, and Capernaum in Naphtali (Mt.4.13).  [C.R.C.]

Daberath' (with the article in Jos.), a town on the boundary of Zebulun (Jos.19.12), named as next to Chisloth-tabor. In 1Chr.6.72 and Jos.21.28 (R.V.) it is said to belong to Issachar. Now the village Debürieh at the W. foot of Tabor.  [C.R.C.]

Da'bria, one of the five swift scribes who recorded the visions of Ezr. (2Esd.14.24).

Daco'bi (1Esd.5.28).  [Arkub.]

Daddae'us, or Sadde'us (R.V. Lodde'us; 1Esd.8.45,46), a corruption of Iddo, 6.

Dagon', a Philistine god (1Sam.5.2) whose most famous temples were at Gaza (Judg.16.19-21; 1Sam.6.1-19; and 2Sam.5.23-25). The latter was destroyed by Jonathan in the Maccaebbean wars (1Mac.10.83,84,11.4). Traces of the worship of Dagon likewise appear in the names Caphar-dagon (near Jamnia) and Beth-dagon in Judah (Jos.15.41) and Asher (Jos.19.27). Dagon was originally a Titus there (21K.4.10), and he himself had preached near it (Ro.15.10). According to Philo Byblius, Dagon was a god of agriculture whose name was derived from a Phoenician word signifying "corn."  [A.H.-S.]

Dai'san (1Esd.5.31) = Rezin, 2 (Ezr. 2.48), by the common confusion of R and D.

Dalaiah', the sixth son of Elloeni and of the royal family of Judah (1Chr. 3.14).

Dalmanutha' (Mk.8.10), an Aramaic equivalent for the Heb. mishdôl.  [Magdala.]

Dal'matia', a mountainous district on the E. coast of the Adriatic Sea, extending from the river Naro in the S. to the Savus in the N. St. Paul sent a Titus there (21K.4.10), and himself had preached near it (Ro.15.14).

Dal'phon', the second son of Haman (Esth.9.7).

D'am'al's, an Athenian woman converted by St. Paul's preaching (Ac.17.34).

Dam'acasus. The name of this famous capital of Aram, or 'Dam, does not seem to be Semitic. The city is still called Dimesq esh Shâm, or "Damascus of Syria" (Şâmi in Syr. Arabic being usually the word for "north," otherwise Shamâl). As an Akkadian word Dim-šak would mean "chief town," and Dim-šak the capital, it is mentioned in the time of Abraham (Gen. 14.15), who said, "The holder [meshet] of my house, that is Dam-meseq [as now pointed in Heb.], is ELIEZER" (15.2). There appears to be a play on the name of the city; but the word is perhaps a later note creeping into the text, referring to the "house," as it cannot refer grammatically to Eliezer. Hence arose an early Jewish tradition that Abraham had a house at Damascus, of which Eliezer was tenant, or steward. In the time of David Damascus was the capital of Hadadezer, king of Zobah, whom he defeated, taking from him shields of gold, chariots, and chariot horses (2Sam.8.5,6; 1Chr.18.3-7; 2Sam.8.8). About 950 B.C. Rezon became king in Damascus, after the death of Solomon (1K.11.23-25), and was succeeded by Tab-rimmon, son of Hezion. The kings who followed—according to O.T. and Assyrian accounts—were Behadad I. of Tab-rimmon, Hazael I., Hadadezer II., Hazael II., Benhadad II. (who became subject to Jeroboam II. of Israel for some years), Mari, Benhadad III. (Am.1.4), and Rezin, who was put to death by the Assyrians on the capture of Damascus in 732 B.C. This represents about 20 years for the average reign of each king. These kings were generally at war with Israel or with Judah, with intervals of alliance after defeat, or taking the side of one against the other, in the shifting policy of the age. In spite of alliance with the princes of N. Syria, Damascus fell before Tigath-pileser III. in 732 B.C. (2K.16.9; Is. 7.3; m.1.5). The O.T. mentions the league of Benhadad I. with Judah (1K.15.19; 2Chr.16.3), and his attack on Ahab (1K.20.1-34), whom he slew at Ramoth-gilead (22.r.36); also his murder—after a reign of about 60 years—by Hazael I. (2K.8.15). His second siege of Samaria (2K.6.24-7.20) occurred in

NORTHERN SIDE ARCH, EAST GATE, DAMASCUS.  
(From Five Years in Damascus, by T. L. Porter.)
the reign of Jehoram son of Ahab. In the reign of Benhadad II, Jeroboam II of Israel “recovered Damascus” (2K.14.28). Rezin, with Pekah of Israel, about 742 B.C., attacked Jerusalem in vain, but Rezin appears to have conquered E. Palestine to Elath, before his defeat by the Assyrians (2K.16.5-11), which Isaiah foresaw (Is.7.1-7): he speaks of the wealth of Damascus (8.4), and of its fall (10.9.17.1), which Amos predicts as a punishment for the slaughter in Gilead (1.3; see 5.27). Jeremiah speaks of the weakness of Damascus about 600 B.C. (49.24-27), perhaps under a Benhadad IV, tributary to Nebuchadnezzar (ver. 30). Ezekiel, rather later, mentions the trade of Damascus in wine of Helion, and white wool, sent to Tyre (Ezk.27.18). Its border marched with that of Hamath, and included Hermon and Anti-Lebanon (47.16.17). Damascus is also noticed as attacked by Jonathan, brother of Judas Maccabaeus (1Mac.11.62.12.32), about 147 B.C. It then fell into the hands of Aretas (Hārith) the Nabatean king of Petra (Josephus, 13 Ant. xv. 2 ; 14 Ant. ii. 3), from about 82 to 60 B.C.; and it was conquered for Pompey by Scæurus in 65 B.C. In the time of St. Paul another Aretas was “king” of Damascus (Ac.9.2-25.22.5-11.26.12.20; 2Cor.11.32; Gal.1.17; see 18 Ant. v. 1).—The Monumental History of Damascus begins with its conquest by Thothmes III. in 16th cent. B.C. A very archaic figure in relief, found in 1865 near the city, may be as old as Abraham’s age. It represents (see illustration above) a bearded man with a short tunic; unfortunately it is not inscribed. The city Thamassu (No. 13) in the list of Thothmes III. precedes Abila (15) and Hamath (16), on his route to Kadesh and Arvad. In the Amarna letters (Brit. Mus. 37 and 43) the name is spelt Timasgi and Dimasha. The city was then attacked by Aidugama, the Hittite king of Kadesh; and

Hobah (Gen.14.15) is here noticed as a country near it. The Amorites were apparently in alliance with the Hittites, and this event led to their conquest of Bashan and Gilead shortly before the Heb. conquest (see Berlin 171 and 323), for the advance lay by a city N.W. of Damascus which they then took, and Ashtaroth fell in turn (Brit. Mus. 64). In 853 B.C. Shalmaneser II. defeated Hadadezer II. and the Syrians, of Riblah; and in 842 he shut up Hazael II. in Damascus, and then invaded Bashan. In 797 Mari of Damascus submitted to Rimmon-nirari III. of Assyria, presenting 2,300 talents of silver, 20 talents of gold, 5,000 of copper, and 5,000 of iron, with robes and utensils. The final siege by Tiglath-pileser III. lasted for two years (734-732 B.C.), during which N. and E. Palestine, and the plains down to Philistia, were overrun by the Assyrians. Damascus is now a beautiful city of some 250,000 inhabitants, in the plain E. of Hermon. Two rivers (Barada and Taura) join on its W. and flow through it; it lies amid gardens and poplars, surrounded by tilled lands. The street “called Straight” (Ac.9.11) was probably the main street which runs E. and W. straight through the city. The most famous of the buildings of Damascus is the Great Mosque, built in 7th cent. a.d. by the Khalifs, who included the ancient cathedral of St. John, which had replaced a Roman temple, on the site—no doubt—of the temple of Rimmon (2K.5.15). A Gk. text (Waddington, No. 322) gives the name Metrophinos, “high-priest of the temple”; and on the Byzantine façade of the cathedral which stood in the great temple court, Dr. Porter found another also in Gk. (Waddington, No. 2,551). “Thy kingdom, O Christ, is an everlasting kingdom, and thy dominion throughout all generations” (see Ps.145.13).

Dnn (judge). Jacob’s 5th son, and the 1st son of Bilhah, Rachel’s slave, named from Rachel’s exclamation, “God hath judged me [or, decided the case in my favour], and hath also heard my voice” (Gen.30.6). In the blessing of Jacob Dn is likened to a snare, but is “to judge his people” (49.16.17). In the blessing of Moses (Deut.33.22) he is a lion’s cub “pouncing from” (or, “on”) “the Bashan” (or, “soft soil”) of his plains held by the Canaanites. In the wilderness the tribe, under Ahiezer (Num.1.12), is the second largest (1.30.26.42), and it included a skilled artisan (Ex.35.34), as in the time of Solomon also (2Chr.2.14), when a woman of the tribe married a Tyrian. In the song of Deborah (Judg.5.17) the reference appears to be to Danites on the coast, whose fleet watched the struggle against Sisera. But, somewhat earlier, it appears that they had been unable to conquer the inhabitants of the shore plain (Judg.1.34), and were crowded in the mountains (18.2). Hence they sought new lands in the far N., under Hermon (18-19) at Laish, which they renamed Dan in the time of Jonathan the grandson of Moses (not of “Manasseh”), and where they worshipped a carved image of the calf (Ex.33.4).—The Tribal Lot (Jos.19.30-48) included about 400 sq.m. of hill and plain. Its E. border was the W. border

MONUMENT FROM TELL ES SALAŬH (DAMASCUS).
of Benjamin, and its S. border the N. border of Judah. On the W. the tribe extended to the sea, and on N. apparently to the brook of Jordan. On the W. the tribe extended to the sea, and on N. apparently to the brook.

**DAN**

KANAH and the MEJARKON and RAKKON. It included some of the best corn lands of SHARON.—The Town, called Laish, and afterwards Dan (Judg.18.29), is noticed in Gen. 14.14 and Deut. 34.1 before it was so named. But it is dangerous, as Ewald saw, to base criticism on such incidental notes, unless we could know for certain that they are not later glosses. In the second passage this appears very probable [NEBO], because Dan is not actually visible from mount Nebo. This town is said to have been "far from Zidon (Judg.18.28), and is noticed (as captured by Benhadad I) with places in the extreme N.E. of the land of Israel W. of Jordan (1K.15.20; 2Chr.16.4). From the time of its conquest the term "Dan to Beer-sheba" (Judg.20.1, etc.) signified the whole length of Palestine. Jeroboam, erecting two shrines with calf idols on the borders of his kingdom, placed one of them at Dan (1K.12.29,30; 2K.10.29); and to this idolatrous centre Amos (8.14) refers, coupling it with another at Beer-sheba. Dan also represents the far N. in Jeremiah (4.15,8.16). It is remarkable that no list of Danite genealogies occurs in Chronicles, and that the tribe is also not among those sealed in Rev.7.5-8, perhaps on account of idolatry. Josephus says that the calf temple was near Daphne (now the ruin Du'jneh), which points to the great mound a mile to N.E. now called Tell el-Qađî, or "mound of the judge"—perhaps a translation of the name Dan. From this mound, and its great spring 'Ain Leddan, flows the stream of "Little Jordan" (Josephus, Ant. Wars i. 1). It is interesting to note that, in 1881, the present writer discovered a group of dolmens on the slope to W. (at a place called Nuqeltelah, or "little palm," a mile from Tell el-Qađî), showing that the vicinity was a sacred centre [Moab].

**DANIEL**

in very early times. The Dan mentioned with Javan (Ezk.27.19) as trading with Tyre about 600 B.C. has no connexion with the town above described. The reference is probably to the Danai, who appear (as early as the 14th and 13th cents. B.C.) among the fair Aryan tribes of the "north" who attacked Egypt. Probably like Javan (Ionia), the Danai were Greeks, and as such the name is familiar. [C.G.C.]

**Dance** (ḥal, "to whirl round"; ḥāghāḥ, "to keep the feast"; kādr, "to whirl"; ṛāqāḥ, "to jump"). The dance is spoken of in Holy Scripture universally as symbolic of rejoicing, and is often coupled for the sake of contrast with mourning, e.g. Ec.3.4 (cf. Ps.30.1; Mt.11.17). In the earlier period it is found combined with some song or refrain (Ex.15.20,32; 18,19; 1Sam. 21.11); and with the tambourine (A.V. timbrel), more especially in those impulsive outbursts of popular feeling which cannot find sufficient vent merely in voice or in gesture. Dancing formed a part of the religious ceremonies of every primitive race. Cf. David dancing before the ark (2Sam.6.14), especially in connexion with the words "he was girded with a linen ephod," i.e. a holy garment worn while waiting on the Lord. Many representations of dances, both of men and women, are found in the Egyptian paintings. The "feast unto the Lord" which Moses proposed to Pharaoh to hold was really a dance. Among Arabs, dances of men are an extremely ancient custom. In the period of the Judges the dances of the virgins in Shiloh (Judg.21.19-23) were certainly part of a religious festivity. Dancing also had its voice and mystery in the Egyptian ceremonies apart from any religious character (Je.31.4,13; Lam.5.15; Mk.6.22; Lu.15.25).

**Daniel.**—1. A son of David, called his 2nd son, by Abigall the Carmelitess (1Chr.3.2), and apparently identical with Chileab (2Sam.5.3).

—2. The head of the house of Ithamar, who
DANIEL, BOOK OF

198

3. One of those who joined in scaling the covenant (Ne.10.6).—4. One of the prophets of the Exile carried away into the land of Shinar in the reign of Jehoiakim. On his arrival at the court of Nebuchadnezzar, he was led to undergo (with his three companions, Hananiah, Mishael, and Azariah) a special training for three years, before they could stand before the king. This included a special dieting, from which they obtained exemption, which improved their appearance above all their companions. They received fresh names, being called respectively Belteshazzar, Shadrach, Meshach, Abednego. They were all young men of high birth (Dan.1.3); Daniel was noted above them all for skill in the interpretation of dreams. On the first occasion on which he explained a dream of Nebuchadnezzar, he was made "ruler over the whole province of Babylon, and chief governor over the wise men of Babylon," and obtained from the king offices for his three companions. He interpreted Nebuchadnezzar's dream foretelling his temporary mental aberration, and also the writing on the wall at Belshazzar's feast, by which time he seems to have lost his office as governor of the wise men. In the second year of the reign of Cyrus, the Mede was chosen into the den of lions, for his faithfulness in praying to his own God, though he was then one of the three presidents of the whole kingdom (Dan.6.2). Coming out unscathed, he prospered throughout the reign of Darius and in that of Cyrus. His visions are dated, that of the land of Shinar is dated third year of Darius, 10 days after the banks of Hiddekel, i.e. the Tigris. In Belshazzar's reign his home seems to have been in the royal palace at Susa. Ezekiel twice mentions Daniel: in 14.12-20 he is joined with Noah and Job as an example of righteousness; in 28.3 as a pattern of wisdom—exactly the qualities which the Daniel of the book which bears his name displayed. Some have thought that Ezekiel could scarcely have referred this to so young a man as Daniel must have then been, and have made this Daniel another person, but there seems no real reason to doubt that they were one. It is curious that Daniel's name is not mentioned in the parallel composition of the prophecies of the son of Sirach (Eccles.49). Our Lord refers to "Daniel the prophet" in His discourse upon the approaching Fall of Jerusalem, when "the abomination of desolation" was to stand in the holy place (Mt.24.15; Mk.13.14, L. A. V.)

[H. A. R.]

Daniel, Book of, is one of the most difficult books of the Bible to deal with. To begin with, whilst our English Bible classes the book with those of Isaiah, Jeremiah, and Ezekiel, in the H. B. canon it is counted among the Hagiographa; or third class of writings into which the O. T. is divided. Then again, the language of it is not all the same. 1-2, 4, 8, 12-13 arc written in Heb.; 2:1b-7, 28 are in Aramaic. Further still, there are Gk. additions to the book which almost certainly were originally written in Gk. and not in a Semitic language. It is the first extant specimen of apocalyptic literature, though a precursor may be found in some of the prophecies of Ezekiel—a style of literature which finds its highest development in the apocalyptic discourses of our Lord and the book of Revelation. Yet with all this the book claims to give us also historical details connected with the Babylonian and Persian empires; and, according to some commentators, some of its prophecies enter into such detail that they must necessarily have been composed after and not before the events they describe. It is because of this that some have denied it any connexion with Daniel, and refused to accept its authenticity or historicity. Some of these points are dealt with later.

Analysis of Contents. Roughly speaking, the first six chapters profess to be history, the last six prophecy; but this division takes no account of the variation in language, or the form of the book. We may better divide it as follows: Ch.1 introduces Daniel to us and accounts for his position. 2-7.15 gives a history of Daniel and his first vision in the third person. Then with the interpretation of that vision we begin what we may call the book of Revelations (or the use of the first person) the " I " section of Daniel (7.15-12.13). The first person is suddenly introduced, although the first portion of ch. 7 gives us what profess to be Daniel's actual words. A similar variation is found in Nehemiah, the greater part of which is in the first person, a smaller portion, e.g. 1.2, in the third person. We take the book itself as our authority. 1-7.14 are anonymous, the rest we must ascribe to Daniel. An editor has combined two (or perhaps three) sources into one whole, and inscribed it with the name of Daniel. This, however, leaves many difficulties unsolved, and they all appear in parallel composition, as if they took the book itself as our authority, 1-7.14 are anonymous, the rest we must ascribe to Daniel. of the musical instruments in ch. 3 are said to be of Gk. origin. But we have only to examine some map in which are marked the old trade-routes of the East (see, e.g., that in the Encyc. Bibl.) to see how possible it was in very early times for Gk. musical instruments to have been carried to Babylon and naturalized there, or *vice versa.* [DULCIMER.] If the book had been a composition of an orthodox Jew of the Maccabæan period, he would scarcely, with the feeling against Hellenism then prevalent in orthodox circles, have ventured to insert words drawn from such a source. [See also SEMITIC LANGUAGES.] The final shape which the book assumed may indeed be later than Daniel, but we have no reason for ruling the latter part of the book to be of later invention or for discrediting the history of the prophet's life or for discrediting the history of his companions. The author of the epistle to the Hebrews seems to refer to this record when, in his account of the heroes of older times, he speaks of those who through faith subdued the nations, that is, *quenched the fire of Hellenism.* Some portions of the apocryphal book of Baruch shew an inter-relation between the two (see the marg. references in the R.V. of Baruch), and doubtless the writer of Baruch made use of this book. The first book of the Maccabees recognises this writer by the name of the Three Holy Children and of Daniel, and also (1:54; cf. 6:7) "an abomination of desolation" in Jerusalem. Josephus held the book to be valuable and authentic, and informs us (11 Ant. viii. 4) that Daniel's prophecies won for the Jews the goodwill of Alexander the Great. The only early writer who attacks the book is Porphyry, early in the 4th cent. Nothing very definite can be asserted as to the historian who composed the first chapters of the book. Jewish authorities hold to a tradition that this book, together with the twelve minor prophets, Ezekiel, and Esther, was, to use a modern expression, "edited" by the opus of the great synagogue. It seems clear from the LXX and from the LXX that it was held that greater liberty might be used in translating this book into Gk. than in the case of any other book of the Bible, except perhaps the Proverbs. The result is that the LXX translation is paraphrastic rather than literal, and has somewhat of the nature of a Jewish midrash upon the text. Sometimes this seems to have been felt so much that Theodotion's more literal version supplants the elder one, of which only one copy in Gk. survives. It remains to indicate briefly the most probable interpretations of the prophecies in the book. (1) In Dan.2 the four kingdoms are Nebuchadnezzar's, the Median, the Persian, and the Macedonian; the last is divided between the Seleucæae and the Ptolemae, who are to give place to the kingdom of God. (2) In Dan.7 the four beasts represent the same four kingdoms; the ten horns are Alexander the Great's successors; the little horn is Antiochus Epiphanes. (3) In Dan.8 the ram with two horns is Media and Persia; the rough goat is Greece under Alexander the Great; the four kingdoms after him are those into which his kingdom came to be divided, one of them being that of Antiochus Epiphanes, represented by the little horn. (4) In Dan.10-12 we have a more detailed account of the Seleucæae and the Ptolemae, as well as of the times of Antiochus, followed once again by the kingdom of God. The varying opinions about these prophecies, and also about the interpretation of Dan.9, are fairly stated in Driver's edition in the Cambridge Bible.

**[H.A.R.]**

### Daniel, Apocryphal additions to

The Apocrypha contains three additions to the book of Daniel, which are to be found in the Gk. (1) The Song of the Three Holy Children, of which part is to be found in the Book of Common Prayer and goes by the name "Benedicite, omnia opera." It begins with a prayer of deliverance uttered by Azarias (vv. 3-22), followed by an account of its fulfillment. (2) The History of Susanna, which generally occurs at the beginning of the book, though occasionally at the end. This is a story told to illustrate the wisdom and discernment of Daniel. (3) Bel and the Dragon, a story into which the prophet Habakkuk is introduced. No historical authority can be claimed for any of these.

#### Danites (members of the tribe of Dan)

(Judg.13.2, 18-1, 11; 1 Chr.12.35).

#### Dan-Ja'an (2Sam.24.6), a place on the N.W. border of David's kingdom, noticed with Zidon and Tyre. It is thought to be the ruin of Dann'ida, 4 miles N. of Achnin (Aczib). The Phoenician coast cities were independent at this time.

#### Dannah (low), a city in the mountains of Judah (Jos.15.49). Now the village Idhna, 8 miles W. of Hebron, on the lower hills.

#### Daphne (2Mac.4.33), a celebrated grove and sanctuary of Apollo, about 5 miles from Antioch in Syria, with which it is intimately associated in history. Its establishment, like that of the city, was due to Seleucus Nicator. Its situation was very beautiful, with perennial fountains and abundant wood. Succeeding Seleucid monarchs, especially Antiochus Epiphanes, embellished the place still further. When Syria was free from Roman rule, it continued to be famous as a place of pilgrimage and victory offerings. The site has been well identified by Pococke and others at Beit-el-Mda, "the House of the Water," on the left bank of the Orontes, to the S.W. of Antioch.

#### Dara (1Chr.2.6). In [Darda.]

#### Darda (a son of Mahol, one of the four wise men surpassed in wisdom by Solomon (1 K.4. 31). In 1 Chr.2.6 his name appears as Dara, son (i.e. perhaps descendant) of Zerah.

#### Darius (A.V. dran; 1 Chr.29.27; Ezr.2.69, 8:27; Ne.7.70, 71, 72), a gold coin current in Palestine after the return from Babylon. There was no large issue of gold money except by the Persian kings. The Darius which has been discovered are thick pieces of pure gold, of archaic style, bearing on the obverse the figure of a king kneeling on one knee, with bow and spear, and on the reverse an irregular incuse square or oblong. Their weight is about 128 grs. Troy, or a little less than that of an Attic stater, and is about probably that of an early drachm of the Phoenician talent. The Daraic was the chief gold coin of Persia. [WEIGHTS, COINS.]

### Darius, the name of several kings of Media
DARKON

and Persia, three of whom are mentioned in O.T.,

1. Darius the Mede (Dan.5:31,6:1), “son of
Ahasuerus, of the seed of the Medes” (9.1), who received the Babylonian kingdom on the death of Belshazzar, being then 62 years old
(5:31,9:1). Only one year of his reign is
mentioned (9.11), but that was of importance
for the Jews. Daniel was advanced by him to the
highest dignity (6.1.f), probably in consequence
of former services (cf. 5.17); and after his miraculous deliverance, Darius issued a
derreegning “reverence for the God of Daniel” (6.25ff.). Three identifications of
Darius the Mede have been proposed. The first
makes him, son of Hystaspis, the founder of
the Persian dynasty. This is unsupported by history, may be dismissed.
The second, adopted by Josephus and supported
by many critics, regards him as Cyaxares II., “the son and successor of Astyages,”
who is looked upon as the last king of Media.
The third identifies him with Gobryas, governor
of Gutium (Media), who, entering Babylon
with the army of Cyrus on Tammuz 16, thus received the kingdom for him, and appointed governors, or satraps, like Darius the Mede. He possibly led the attack which resulted in Belshazzar’s death. [Belshazzar.]
The insertion of Darius instead of Gobryas in
the sacred text is probably a copyist’s error.

2. Darius, son of Hystaspis, the founder of the
Perso-Aryan dynasty. Upon the usurpation
of the Magian Smerdis, he, with six other
Persian chiefs, overthrew the impostor, and
was placed on the throne 521 B.C. His designs
of foreign conquest were interrupted by
a revolt in Babylonia, which spread to the
province of Elam. Thus he could say that “the
land was his.” Crossing the Danube, he penetrated Europe, but had to
return. He next attempted to annex Greece, and his defeat at Marathon, 490 B.C., only
roused him to prepare for that struggle with the
Greeks, which had become inevitable. His
plans were ruined by Herodotus, the founder of
Greece, and the Persian (Ne.12.22). If the whole passage was written by
Nehemiah, this is possibly Darius II., Nothus (Ochus), king of Persia 433–404
B.C. If, however, the register was continued
until later, the occurrence of the name Jaddua
points to Darius III. Codomannus, the an-
tagonist of Alexander, and last king of Persia,
336–330 B.C. (1Mac.1.1).–4. AREUS, king of
the Lacedaemonians (1Mac.12.7). [T.G.P.]

DARKON. Children of Darkon were among
the “children of Solomon’s servants” (cf.
2K.9.21) who returned from Babylon with
Zerubbabel (Ezr.2.56; Ne.7.58).

DATHAN. a Reubenite chieftain, son of
Eliab, who joined the conspiracy of Korah the
Levite (Num.16.1ff.,26.9; Deut.11.6; Ps.106.17).

DATHENA (1Mac.5.9), a fortress to which, in
164 B.C., the Jews fled from the heathen
of Gilead. The site is not known. [C.R.C.]

Daughter. The Heb. and E.V. use this
term not only in its ordinary sense but also of
the women of Israel. (2K.3.13, etc.), and in personifications of places (e.g.
dughter of Zion = Zion). [FAMILY.] [H.W.M.]

In N.T. used also of a female descendant
(Lu.1.5,13.16); as a tender form of direct
address (Mt.9.22); collectively, for inhabitants
of Jerusalem (18.12); of the names of
places as the form of address to the female
inhabitants (Lu.23.28). The dimin. ἰατρᾶπος,
“little daughter,” occurs Mk.5.23,7,25. [H.H.]

David, perhaps shortened from Dodavahu
(beloved of Jecohuah). We may divide his life
into three portions, premising, however, that,
owing to the composite character of the narra-
tive and occasional duplications and occasional
incidents it contains inconsistencies not now capable of
certain explanation.—I. THE EARLY LIFE OF
DAVID, before his introduction to the court of
Saul. He was the youngest of eight sons, and
(according to Ru.4.211.) great-grandson of Ruth
(cf. 1Sam.22.3). His mother’s name is unknown.
His father, Jesse, was of a great age
when David was still young (1Sam.17.12). His
connexion with Bethlehem as his birthplace
brought it in after times universal fame (Lu.2.
4). Zeruiah (mother of Joab, Abishai, and
Asahel) and Abigail (mother of Amasa) were
probably his half-sisters (see 2Sam.17.25). His
sisters’ names are not given; and he was
drawn to himself throughout his life in the relation usually occu-
pied by brothers and cousins. David’s first
appearance in history was at an annual sacrifi-
cence at Bethlehem, at which Jesse would pre-
side (1Sam.20.6). Samuel is present, sent to
anoint him; but, as he was reared by the priest,
it is restrained by divine intuition as son after
son passes by, until the youngest was at last
sent for while pursuing the occupation of a
shepherd, usually allotted in Eastern countries
to the slaves, the females, or the despised of
the family. He was “ruddy and goodly to
look upon” (1Sam.16.12). When Saul and
Saul were discussing with their master where the
best minstrel could be found to chase away his
madness by music, one of the young men in the
guard suggested David. Saul instantly
sent for him, and in the success of David’s harp
we have the first glimpse into that genius for
music and poetry with which he was consecrated
in the Psalms. One incident alone of his solitary
shepherd life has come down to us—his con-
fluence with the lion and the bear in defence of his
father’s flocks (1Sam.17.34,35). But it did
not stand alone. He was already known to
Saul’s guards for his martial exploits, probably
against the Philistines (16.18), and, when he
suddenly appeared in the camp, his elder brother
immediately guessed that he had left the
sheep in his armour to see the battle (17.28).
There is no perfectly satisfactory means of
reconciling the apparently contradictory ac-
tcounts in 1Sam.18.14,23 and 17.12,31,55,58.
The latter may be accepted as an independent
DARIUS RECEIVING THE SUBMISSION OF THE CHIEFS.
(From the rock of Behistán, in Persia.) Reproduced from Sir H. C. Rawlinson's Cuneiform Inscriptions.
statement of David's first appearance. The scene of the battle is at Ephes-dammim [Pas- dammim], near the frontier-hills of Judah. Saul's army and the Philistines met partly on the one side and partly on the other side of the valley, with the Philistines on the other, the watercourse of Elah or "the Terebinth" runs between. The incident which led to the conflict with Goliath are familiar, as is its result. David's victory is rendered more conspicuous by his youth and by the simple weapons used—the sling, and the five polished pebbles which he picked up as he went from the watercourse of the valley and put in his shepherd's wallet. Two trophies long remained of the battle—one, the huge sword of the Philistine, which was hung up behind the ephod in the tabernacle at Nob (1Sam.21:9); the other, the head, which he bore away himself, and which was either laid up at Nob, or subsequently at Jerusalem.—II. RELATIONS WITH SAUL. The victory over Goliath had been a turning-point of his career. Saul inquired his parentage, and took him finally to his court, and was charmed by the soothing influence of his manners. David was inspired the romantic friendship which bound the two youths together to the end. The triumphant songs of the Israelitish women announced that in him Israel had now found a deliverer mightier even than Saul. And by those songs the fame thus acquired was laid the foundation of a reign of peace for the land of Saul towards David which, together with the king's constitutional malady, poisoned their whole future relations. David, however, displays a magnanimous forbearance, which he exhibited (with a few painful exceptions) throughout the rest of his life. He is the first example of the virtue of chivalry. This part of his life may be sub-divided into four portions.—1. His life at the court of Saul till his final escape (1Sam.18:2-19:18), where, besides being minister, he held successively posts of increasing responsibility (16:21,18:2-22:14, R.V.) He was now chiefly known for his successful exploits in border warfare. He joined the Philistines by the order of which he won his wife, Michal, Saul's second daughter, and struck a blow at the Philistine power from which it only rallied at the disastrous close of Saul's reign. But the successive snares laid by Saul to entrap him, and the open violence into which the king's madness twice broke out, at last convinced David that his life was no longer safe. Warned by his friend Jonathan and assisted by his wife Michal, he escaped by night, and was thenceforward a fugitive. Jonathan he never saw again except by stealth. Michal was given in marriage to another (Phaltiel), and he saw her no more till long after her father's death.—2. His life as a fugitive (1Sam.21:13-29:15). For the rest of Saul's reign David was an outlaw. He first fled to Naioth (the pastoral dwellings) of Ramah to Samuel. Up to this time both the king and himself had thought a reunion possible (see 20:5-26). But the madness of Saul now became more settled and firm, and David's relations with him proportionately greater. His secret interview with Jonathan confirmed the alarm already excited by Saul's endeavour to seize him at Ramah, and he now determined to leave his country and take refuge in the court of Saul's enemy. Before this he visited Nob, the seat of the tabernacle, partly to procure for himself on the pretence of obtaining consecrated bread, partly to obtain food and weapons. On the pretext of a secret mission from Saul, he gained an answer from the oracle, some of the consecrated loaves, and the consecrated sword of Goliath. His stay at the court of Achish was short. Discovering that he dreads "the sword of Goliath," his presence revived the national enmity of the Philistines against their former conqueror, and he only escaped by feigning madness (1Sam.21:13).—3. His life as fugitive (22:1-26:25). (a) His first retreat was the cave of Adullam, in the low-lying country (ophelion) of the frontier-hills from the base of every part resorted to him. (b) At En-gedi occurred the chivalrous exploit of the three heroes who procured water from the well of Bethlehem, and David's chivalrous answer, like that of Alexander in the desert of Gedrosia (1Chr.11:16-19; 2Sam.15:4-17). (c) Advised by Abigail, David obtained the rest of Hareth (1Sam.22:5), and then we find him making a descent on the foraging parties of the Philistines, and relieving Keilah, in which he took up his abode. Whilst there, now for the first time in a fortified town (23:7), he was joined by a new and most important ally, Abiathar the priest of the house of Ithamar and son of Ahimelech of Nob who with his brother-priests had been slain by Saul on suspicion of conspiracy against him (22:25ff.). By this time the 400 who had joined him at Adullam (22:2) had swelled to 600 (23:13). The situation was now changed by the appearance of Saul himself. Apparently the danger was too great for the little army to keep together. They escaped from Keilah, and dispersed, "whithersoever they could go," amongst the fastnesses of Judah. Henceforth it becomes difficult to follow his movements with exactness. Saul hunts him "like a partridge in the wilderness of Ziph and of Adullam;" for David has changed the character of his life, and for the most part sparing Saul's life, when in his power, on at least one occasion (1Sam.24:6). Whilst he was in the latter place occurred David's adventure with Nahab, instructive as showing his mode of carrying on the freebooter's life, and his marriage with Abigail.—4. His service under Achish (1Sam.27:29,11). Weared with his wandering life, he at last crosses the Philistine frontier, not, as before, as a fugitive, but as the chief of a powerful band—his 600 men now grown into an organized force, with their wives and families around them (27:2,3). After the manner of Eastern potentates, Achish gave him, for his support, a city—Ziklag on the frontier of Philistia (27:6). He was settled there for a year and four months (27:7)—the first note of time in David's life. He received Achish into confidence by attacking the old nomadic inhabitants of the desert frontier, and representing the plunder to be of portions of the southern tribes or the nomad tribes of Israel. But this confidence was not shared by the Philistine nobles, and accordingly David was sent back by Achish from the last victorious campaign against Saul. During his absence a raid of Amalekites, whom he
had plundered during the previous year, had burnt Ziklag, and carried off the inhabitants. Assisted by an Egyptian slave, David overtook the invaders in the desert, and recovered the spoil (2Sam.30). Two days after this victory an Amalekite arrived from the N., with the fatal news of the defeat of Gilboa. The reception of this tidings by him and his rival and of his friend, the solemn mourning, the vent of his indignation against the bearer of the message, the pathetic lamentation that followed, well close the second period of David's life (2Sam.1.1-27).—III. His Reign.—1. As king of Judah at Hebron (2Sam.2.1-5.5), 7 1/2 years (2.11), concerning which period our information is scanty. Hebron was selected, doubtless, as the ancient sacred city of the tribe of Judah, the burial-place of the patriarchs and the inheritance of Caleb. Here David was formally anointed king (2Sam.2.4). His dominion was nominally confined to Judah. Gradually his power increased, and during the 2 years following the deposition of Ishbosheth a series of skirmishes took place between the two kingdoms. Then rapidly followed, though without David's consent, the successive murders of Abner and of Ishbosheth (2Sam.3.30; 4.5,6). The throne, so long waiting for him, was now vacant, and the united voice of the whole people at once called him to occupy it. For the third time David was anointed king. The command of the army he devolved on his nephew Joab (2Sam.2.28).—2. Reign over all Israel 33 years (2Sam.5.3—1K.2.1). (i) The acquisition of Jerusalem. This city, hitherto unconquered, was captured under the leadership of Joab, henceforward captain of the host (1Chr.11.6). Philistine attacks were repulsed (2Sam.5.17-20; 1Chr.14.11), and the capture and conflagration of their own idols was a retribution for their former victories (14.12). Tyre, under Hiram, now for the first time appearing in sacred narrative, was beset and besieged by David, and Hiram sent cedarwood for the buildings of the new capital (2Sam.5.11), especially for the palace of David himself (7.2). Unhallowed and profane as the city had been, it was at once elevated to a sanctity, which it has never lost, above all the ancient sanctuaries of the land. The ark, after a temporary halt (owing to the death of Uzza) at Obed-edom's house, was brought with great state to Jerusalem. David's act of severity towards Michal on this occasion was an additional mark of the stress which he himself laid on its solemnitv (2Sam.6.20-23; 1 Chr.15.29). A thorough house-cleaning was done by Nathan, postponed to the subsequent reign the erection of a permanent temple. (2) Foundation of the court and empire of Israel (2Sam.8-12). On the erection of the new capital at Jerusalem David became a king on the scale of the great rulers of Egypt and Persia, with a regular administration and organization of court and camp, and founded an imperial dominion which for the first time realized the prophetic description of the bounds of the chosen people (Gen.15.18-21). The internal organization lasted till the final overthrow of the monarchy. The empire was of much shorter duration, continuing only through the reigns of David and his successor Solomon. But, for the period of its existence, it lent a peculiar character to the sacred history. (a) In the internal organization of the kingdom the first new element to be considered is the royal family, the dynasty, of which David was the founder, a position which entitled him to the name of "patriarch," (1Chr.27.1-12) and (ultimately) of the ancestor of the Messiah. Of this family, Absalom and Adonijah both inherited their father's beauty (2Sam.14.25; 1K.1.16); but Solomon alone possessed any of his higher qualities. It was from a union of the children of Solomon and Absalom that the royal line was carried on (1K.15). (b) The military organization, inherited from Saul, but greatly developed by David, was as follows: (i) "The host," consisting of all males capable of bearing arms, and summoned only for war. There were 12 monthly divisions of 24,000 each; and over each president an officer, selected from the other military bodies formed by David (1Chr.27.1-12). It had been a very limited number of chariots (2Sam.8.4) and of mules instead of asses for the princes and officers (13.29,18.9). (ii) The body-guard. This also had existed in the court of Saul, and David himself had probably been its commanding officer. But it now assumed a peculiar organization. The body-guard was a close circle of foreigners, as having been probably drawn from the Philistines during David's residence at the court of Gath. They are usually called from this circumstance Cherethites and Pelethites. The captain of the force, however, was not only not a foreigner, but an Israelite of the highest distinction and purest descent, who first appears in this capacity, but who outlived David and became the chief support of the throne of his son, namely, Benaiah, son of the chief priest Jehoiada, representative of the eldest branch of Aaron's house (2Sam.8.18,15.18,20.23; 1K.4.18,44). (iii) The institution in David's army arose out of the circumstances of his early life. The nucleus of what afterwards became the only standing army in David's forces was the band of 600 men who had gathered round him in his wanderings. The number of 600 was still preserved, and it was divided into large bands of 200 each, and small bands of 20 each. The small bands were commanded by 30 officers, one for each band, who together formed "the thirty," and the 3 large bands by 3 officers, who together formed "the three," and the whole by one chief, "the captain of the mighty men." (2Sam.23.8-9; 1Chr.11.9-17). This commander of the whole force was Abishai, David's nephew (1Chr.11.20; and cf. 2Sam.16.6). (c) Side by side with this military organization were established social and moral institutions. Some were entirely for pastoral, agricultural, and financial purposes (1Chr.27.25-31). Others were judicial (28.29-32). A few men are named as constituting what would now be called the court, or council of the king: the councillors, Ahiqaphel of Giloh, and Jonathan the king's nephew (27.32,33); the companion of the king's friend, Hushai (1Chr.27.33; 2Sam.15.37,16.19); and, the scribe. It is related that at one time Jonathan (2Sam.20.25; 1Chr.27.32); Jebo-
Abiathar, the recorder or historian (2Sam.20.24), and Adoram the tax-collector, both of whom survived him (1K.4.3,6; 12.18). Two prophetic houses were thus contemporaneous. One was that of Nathan, the prophet, who appears for the first time after the establishment of the kingdom at Jerusalem (2Sam.7.2), is distinguished both by his title of‘prophet’ and by the nature of the prophecies which he utters (7.5,17,12.1-14) as of the purest type of the prophetic dispensation, and as the hope of the new generation, which he supports in the person of Solomon (1K.1). Two high-priests also appear—representatives of the two rival houses of Aaron (1Chr.24.3)—Abiathar, companion of David’s exile, and Zadok, who made the head of the Aaronic family (27.17). Besides these four great religious functionaries there were two classes of subordinates—prophets, specially instructed in singing and music, under Asaph, Heman the grandson of Samuel, and Jeduthun (1Chr.25.1-31), and Levites, the Levitical priests, which were the sanctuary and solace of David’s reign (26). (d) The external relations of David’s kingdom will be found under the various countries concerned. It will here be only necessary briefly to indicate the enlargement of his dominions. Within 10 years from the capture of Jerusalem he had reduced to a state of obedience all the nations of Canaan north of the W. (2Sam.8.1): the Moabites on the E. (8.2) by the exploits of Beniah (23.20); the Syrians on the N.E. as far as the Euphrates (8.3); the Edomites (8.14) on the S.; and finally the Ammonites, who had broken their ancient alliance, and made one grand resistance to the advance of his empire (10.2-19; 12.26-31). These three last wars were overlapped each other. The crowning point was the siege of Rabbah. (3) Three great calamities marked the beginning, middle, and close of David’s otherwise prosperous reign. (a) A three years’ famine (21.1ff.) was the punishment inflicted on the nation involved in Saul’s slaughter of the Gibeonites. At their request Absalom, David in consequence surrendered all his predecessor’s sons, except Mephibosheth, to be slain, thus acting in accordance with the religious beliefs of his time. (b) The second group of incidents contains the tragedy of David’s life, which grew in all its parts out of the polygamy, with its evil consequences, into which he had plunged on becoming king—the double crime of adultery with Bathsheba and of the virtual murder of Uriah. The crimes are undoubtedly those of a common Oriental despot. But the rebuke of Nathan, the sudden revival of the king’s conscience, his grief for the wrong, the吊 the cloud, the gathering of his uncles and elder brothers around him, his return of hope and peace, are characteristic of David, and of David only. But the clouds from this time gathered over David’s fortunes, and henceforward “the sword never departed from his house” (12.25). The outrage on his daughter Tamar, the murder of the elder son Amnon, and then the revolt of his best beloved Absalom, brought on the crisis which once more sent him forth a wanderer, as in the days when he fled from Saul; and this, the heaviest trial of his life, was aggravated by the petulance of Joab, now, perhaps from his complicity in David’s crime, more unmanageable than before. The rebellion was forestalled by the meekness of Gad, David’s counsellor, and this, as the poet says, “was marked, as might be expected, by the growing jealousy of the tribe of Judah at seeing their king absorbed by the whole nation. For its general course, see Ahithophel. The final battle was fought in the ‘forest of Ephraim,’ which terminated in the accident leading to the death of Absalom (18.6-9). Judah for a time rebelled, and David once more reigned in undisturbed peace at Jerusalem (20.1-22). (c) The closing period of David’s life, with the exception of one great calamity, may be considered as a gradual preparation for the reign of his successor. David’s census, carried out against Joab’s warning, the fighting of the Amalekites (24.1ff.), and the vision of a destroying angel over the threshing-floor of Araunah (Ornan), a wealthy Jebsite, marked out the spot as site for the future temple on mount Zion, the centre of the national worship, with but slight interruption, for more than 1,000 years. A formidable conspiracy to secure the crown broke out in the last days of David’s reign, but which detached from his person two of his court, who from personal offence or adherence to the ancient family had been alienated from him—Joab and Abiathar. But Zadok, Nathan, Benaiah, Shimei, and Rei remaining firm, the plot was stilled, and Solomon’s inauguration took place under his father’s angel (1K.1.1-53). By this time David’s infirmities had grown upon him. The incident of the young Shunammite, Abishag (1.1ff.), is apparently mentioned for the sake of the later incident of Abneriah (2.17). His last song is preserved—a striking union of the ideal of a just ruler which he had placed before him, and of the difficulties which he had felt in realizing it (2Sam.23.1-7). His last words, as recorded, to his successor, are general exhortations to his duty, combined with warnings against Joab and Shimei, and charges to remember the children of Barzillai (1K.2.1-9). He died, according to the prophetic language, “as a man dies,” was buried in the city of David.” After the return from the Captivity, “the sepulchres of David” and “the house of the mighty men” were still pointed out, apparently near Siloam (Ne.3.16). The above sketch shows us David in the capacity both of man and ruler as illustrative of the transitional character belonging to his time. The blemishes in his conduct, at any rate to some extent, are attributable to the cruel, hasty, and arbitrary element in human nature in which those who were possessed of any species of power did not hesitate to indulge. Even his great sin in the matter of Bathsheba and Uriah, standing out single, and thus the more conspicuous, in his life, was for parallels numberless acts, at least equal in violence, in and after his day, just as his failure to control his children is a characteristic of the Eastern parent even at the present time. On the other hand, his general unselfishness of purpose, his personal charm, his family affection, diplomatic skill, courage, generosity, and power of inspiring devotion in his followers at once indicate and help forward the advance towards a higher
The Jews considered 15 miles a long distance, and spoke of a day's journey as only about 5 Roman miles. [Modin.]

[Gr.c.]

Daysman, an old Eng. term common in 16th cent. (Spenser's Faerie Queene, ii. c. 8; 1551 ed. Bible in 1Sam.2.25; Holland's Livy, p. 137, etc.), meaning umpire or arbitrator (cf. Heb. 7.26, and derived from day, in the specific sense of a day fixed for a trial.

Deacon. The word "deacon" (διακόνος) as a title does not appear to have been derived from any Jewish or pagan source. In the LXX, διακόνος occurs in a general sense in Esth.1.10, 2.6.1.3.5, Pr.10.4; 4Mac.9.17; and διακονία in Esth.6.3.5; 1Mac.11.58, with some complications of readings as to διακόνος and διακονία. In N.T. διακόνος and διακονία and διακονεῖν are used frequently in a general sense. As a title διακόνος occurs in Ph.1.1; 1Tim.3.8-13; and possibly Ro.16.1. [Deaconess.] On the nature of the office and the method of appointment and the identification with the "seven men of good report" of Ac.6.2-6, see CHURCH; LADING ON OF HANDS. Plumptre and Gibson in Smith, D.B. (2nd ed.), i. 738-741; Arnott and Robinson in Ewycyl. Bk. 1, ch. 1040; Gwatkyn in Hastings, D.B. i. 574, 575; Hort, The Christian Ecclesiæ, pp. 198-210; Stone, The Christian Church, pp. 266-269, 273, 274, 280. [d.s.]

Deaconess. It is possible that the word διακονέω is used in a technical sense to denote a deaconess in Ro.16.1.2, if we understand you Phoebe our sister, who is a servant (διακόνος) of the church that is at Cenchrea, that ye may receive her in the Lord, worthy of the saints, and that ye assist her in whatsoever matter she may have need of you; for she herself also hath been a succourer (προστάτις) of many, and of mine own self."

In view of the facts that διακόνος is used constantly in a technical sense, and that there is nothing in this passage as a whole or in the word "suc- coucher" which necessarily requires an official, it cannot certainly be determined that Phoebe filled the office of deaconess at Cenchrea. It is, however, likely that an office of deaconess, corresponding to that found in later history, existed in N.T. times, and that it is referred to in 1Tim.3.11. The A.V. translation "their wives" is there obviously incorrect; and the alternatives are to take women (γυναῖκας) in a quite general sense for "women of the Christian community," which appears to be the meaning intended by R.V., or to understand it to denote an official order of women. The latter interpretation is strongly indicated by the position of the verse in the midst of instructions about the deacons. If deaconesses are here referred to, it is laid down in regard to them that they are to be "full of grace, full of good works, temperate, faithful in all things." It is possible that Mary, Tryphena, and Tryphosa (Ro.16.6.12) were deaconesses. The widows of 1Tim.5.3-16 are not members of an official order such as that of deaconesses, but women on the roll of the church for the reception of relief. [Jr. 9.18; 1 Tim. 5.16; D.B. 2nd ed.), i. 749, 741; Arnott and Robinson in..."
**DEAD, BAPTISM FOR THE DEBORAH**

**Dead, Baptism for the.** [BAPTISMS.]

**Dead Sea.** This name is not found in the Bible, and does not appear to have been used until the 2nd cent. a.d., when it is found in the works of Pausanias, Galen, and Justin. It appears to have been used to indicate the absence of animal life in these waters. Josephus (Wars viii.) mentions it as bitter and unfruitful, and both ancient historians and modern writers speak of an unnatural gloom, not upon the sea only, but also over the whole plain below Jericho. In O.T. it is called the "SALT SEA," q.v., or the "Sea of the Plain (Arabah)." [c.w.]

**Death.** [FAMINE.]

Death may be considered as it presents itself physically to our eyes, the act of dying, the circumstances of that final agony in which visible conscious relations with the things of this world come to an end. As such it is much the same to all men of all times—to the Hebrew of old as to ourselves. What varies in the conception of death is the concept of its associated life: its relationship to the act of dying; and this significance depends upon the ideas men have of what happens after death. To the Hebrew, death meant not only the end of communion with this world, but also the end of communion with God. It is true there is existence in Sheol for the man after death, but it is in the shadow of the former life (Job 3.13-19; Ps. 88.12; Ec. 9.5), and in this half-life the dead had no longer the joy of believing and praising God which is the highest happiness of this earthly life (Ps.6.5,30;9; Is.38.18). In death the body returns to the dust from which it was made, and the spirit returns to God who gave it (Ec. 12.7; cf. Gen.2.7,3.19). When the soul is told that through sin death came (Ro.5.12; cf. Gen.2.17,3.16), it is essential for understanding what we meant that we should realize the significance of death to the Jew not only in its physical but also in its theological aspect. The natural punishment of sin is that separation which is love and favouring of God, which was to the Jew the chief element in his idea of death, that which gave to physical death its greatest terror—what St. Paul calls the "sting of death" (1Cor.15.56). With the Christian revelation of the things which God hath prepared for them that love Him in the view of death is changed. To die is "to be with Christ, which is very far better" than earthly life (Ph.1.23); "blessed are the dead which die in the Lord" (Rev.14.13). The Christian shrinks, indeed, with a natural fear from dying, "not that we would be unclothed," but longs for the blessed life to which death is the gateway (2Cor.5.6). Death with the associations which it had to the Jew, death with that separation from God which attached to it as the consequence of sin, was overcome by the dying and resurrection of Jesus Christ (2Tim.1.10; Heb.2.14). Art. "Eschatology," by A. B. Davidson, R. H. Charles. F.S.A., J. Seward, F.R.S., and E. J. B. A. Hastings, D.B. (5 vols. 1904); books on the subject of the Future Life, e.g. Salmon, Christian Doctrine of Immortality. [s.c.g.]

**Deborah,** king of Eglon; one of the five kings hanged by Joshua (Jos.10.3).

**Deborah** (back).—1. A city of Judah in the Hebron district (Jos.10.38), with an Anakim population (11.21) bordering on S. of Hebron, which was conquered again by Othniel, and having near it "upper and lower springs" (gulloth), though the region generally was negeb or "dry" (15.17-19; Judg.1.13-15). It is noticed with Socoh (Shuweikeh), Dannah (Idhna), and Anab ('Anad), and was called Kirjath-sannah (Jos.15.45-50) and Kirjath-jearim (Judg.1.11, 12). It was given to the Levites (Jos.21.15; 1Ch.6.58). It is identified by Ewald with the present village edh Dhikeyleh (of the ridge), about 12 miles S.W. of Hebron and 2 miles N.E. of 'Anad. There are ancient tombs near the village, which stands on a high ridge. The country between these springs, and the ancient tombs, with their "upper and lower springs," and streams (gulloth), 7 miles N.E. of the town, at the Sefil ed Dilibeh, or "brook of the plane-tree."—2. A place on N. border of Judah (Jos.15.7), S. of Gilgal; perhaps only a "ridge," but noticed with Adummim, close to which (on S.) the name Thogham (Deb) (pass of the battle) still survives.—3. The border of Debir (Jos.15.26; R.V. marg. Lidebir as though for Lodobar) was apparently W. of Mahanaim; perhaps meaning only "the limit of the ridge" or W. slope of Gilead. [g.r.c.]

**Deborah, a woman of Naphtali, the grandmother of Tobit.** (Tob.1.12).—1. Rebeckah's nurse, who accompanied her from the house of Bethuel (Gen.24.59). She died at Bethel, and was buried beneath the terebinth, Allon-bachuth (Gen.35.8). The second reference may be out of place, as it is hard to account for Deborah's being with Jacob.—2. (Judg.4.5.) The prophetess, who shared the military operations of God with Barak (Lightning). Deborah lived under the palm-tree (not "terebinth") between Ramah and Bethel, but from 5.15 some think she belonged to Issachar. If so, the facts need not conflict, but the critical inference is doubtful. [Note Gen.5.11.] She judged—was a mother in Israel—presumably, therefore, she did not live in the neighbourhood of Sisera. She sent an embassy to Barak, and at his request promised support. He summoned Naphtali and Zebulun to Redesh and led 10,000 of them to Tabor. There Deborah joined him with Benjamins, Ephraim, and Machir. Other tribes were summoned. The princes of Issachar responded. —The Battle of Megiddo. Sisera summoned his allies (5.19), and with 900 chariots marched from Harosheth up Esdraelon. A storm broke from the N., and beat in the faces of Sisera's army. Kishon suddenly flooded the marshy land. The chariots were useless. The light-armed horsemen of Barak cut the enemy's line, and pursued the main rout to Harosheth. The van fled northward, and apparently escaped annihilation through the cowardice of Meroz, which was put to the ban. Sisera, probably in the van, cut off from Harosheth, tried to escape to Hazor, and was slain in Jael's tent. [Jael-]
DEDICATION, FEAST OF THE

(5) Pella (Φάθη) in the Jordan Valley E. of the river, nearly opposite Scythopolis; (6) Gerasa (Jerash) in N. Gilead; (7) Dion (ed. Daun), 9 miles N.W. of Abila; (8) Kenath (Qanawdat); and (9) Raphon (Râfîkh), 17 miles N.E. of Edrei; the roth city is Scythopolis. Decapolis thus covered some 1,000 square miles of S. Bashan, and it was inhabited by a mixed Greek and Arab population, as shown by inscriptions, some of them as old as the time of our Lord. It was also densely populated (see Mt.4.25); and the herding of swine, which all Semitic peoples held unclean, is thus explained, as the Greeks were swine-herds from Homer's time onwards (Mt.8.28, 30; Mk.5.1-11). [c.r.c.]

Decision, Valley of. [Jehoshaphat, Valley of.]

Dedan.—1. A son of Ramah, son of Cush (Gen.10.7; 1 Chr.1.9).—2. A son of Jokshan, son of Keturah (Gen.25.3; 1 Chr.1.32). In each case the brother of Dedan is named Sheba. Dedan is also mentioned in Is.21.13; Je.25.23, 49.8; Ezk.25.13, 27.15, 20, 38.13. [Arab.] The name perhaps survives in that of Didan, an island in the Persian Gulf. The Dedanites were travelling traders, but some of the passages cited point to a second Dedan (probably that of Jokshan) near Edom. [c.r.c.]

Dedanim' (Is.21.13). [DEDAN. 2.—]

Dedication, Feast of the. The feast of the Hasmonaeans, known as Hânukka among the Jews, was instituted to commemorate the dedication of the altar and the purging of the temple after the victory of Judas Maccabaeus over the Syrians, 164 B.C. The dedicated...
altar replaced the pagan altar erected 3 years earlier on the same day by Antiochus for his idol Zeus Olympus. The festival commenced on Kislev 25 (December), and lasted eight days. In the course of Shemaih's attack, the temple of Tabor-nacles, with the carrying of palm branches and with singing of Hallel, but it did not require a visit to Jerusalem, as the three great Mosaic festivals did. Its institution is recorded 1 Mac. 4.52-59; 2 Mac.1.18. Josephus calls it φωτα = festival of light (12 Anti. vii. 7). It is named but once in the Canonical Scriptures, Jr. 10.22, and Jn.10.22, in the name of the festival of the Dedication of their temple to God. The Hanukka festival is still observed by orthodox Jews with the lighting of lamps in their households at night, beginning with one light on the 1st day and increasing daily to eight on the 8th day. The idea of dedication was not new: Moses had dedicated the altar (Num. 7:89), and the Ark in Solomon's Temple was dedicated (1 Chr. 28:8-9). Solomon dedicated the temple (1 K. 8.63). Jewish Encycl. iv. 23, s.v. Hanukkah.

**Deep, The (Luk.8.51; Ro.10.7).** [Fitz]

**Dekar.** The son of Dekar (Ben Dekar) was the ruler of Solomon's 2nd district (1 K.4.9), including Tiro. [PALMTINE.] [ERB: Dedication of the House (Ps.30, title), which probably refers to the removal of the ark to the city of David (2 Sam.6.12-15); Solomon dedicated the temple (1 K.8.63). Jewish Encycl. iv. 25, s.v. Hanukkah.]

**Delaiah.**—1. A priest in the time of David, leader of the 23rd course of priests (1 Chr.24.8).—2. "Children of Delaiah" were among the people of uncertain pedigree who returned from Babylon with Zerubbabel (Ezr. 2:60; Ne.7:62).—3. Son of Mehetabeel and father of Shallum (1 Chr.3.17). Son of Shemaiah, one of the "princes" about the court of Jehoiakim (Je.36.12,25). The name also occurs in A.V. as Dalaiah (1 Chr.3.24).

**Delliah** (Judg.16.4,18), a woman of the valley of Sorek, loved by Samson. St. Chrysostom calls her his "wife"; but this is improbable. She teased him until he told her the secret of his strength, and then betrayed him. Her nerve and forethought were remarkable. She thrice failed without Samson's guessing her intent. She extorted an enormous sum from the Philistine lords (5,500 shekels of silver). Her treachery was revolting, for it was she "who began to afflict him" when his seven locks were shorn. Some commentators suppose that she was an Israelite; but Sorek was in Philistine territory, and an Israelite would at once have connected Samson's powers with his Nazirite vow. [SAMSON.]

**Deluge.** [NOAH.]

**Demetrias II.** surnamed Nicator and Nicanor (the Victorious), king of Syria (140-145 B.C. and again 129), was the elder of Demetrias and Soter's two sons. At the time when Alexander Balas rose in rebellion, his father had sent him to Cnidus, along with his younger son Antiochus, to await the issue of the war, and to avenge his father should the rebellion for a time succeed. On attaining manhood, Demetrias gathered a force of Cretans and Syrians to claim the kingdom. Alexander, sunk in debauchery, and not expecting an attack, Beth-horon, and their leader slain. Dreading another attack, Judas sent an embassy to Rome, and the Senate made an alliance with him, promising to forbid Demetrias to prosecute the war further. Meanwhile, however, Bacchides again invaded Palestine. Judas, with only 800 men, met him in battle at Eleasa, but was defeated and slain. His youngest brother, Jonathan, was then chosen as leader of the patriots, and still held out across the Jordan. Soon after Alcimus died, and Bacchides withdrew. In 148 he returned, but failed to put down the Hasmonaean party, and was compelled to conclude a treaty with Jonathan.

"Thus the sword ceased from Israel. Demetrias had aroused much popular odium by his tyranny, and in the inscription of Alexander Balas, who was aided by Jonathan, he was defeated and slain in 120 B.C., after accomplishing prodigies of valour. [W.S.T.C.T.]"

**Demetrias II.** surnamed Nicator and Nicanor (the Victorious), king of Syria (140-145 B.C. and again 129), was the elder of Demetrias and Soter's two sons. At the time when Alexander Balas rose in rebellion, his father had sent him to Cnidus, along with his younger son Antiochus, to await the issue of the war, and to avenge his father should the rebellion for a time succeed. On attaining manhood, Demetrias gathered a force of Cretans and Syrians to claim the kingdom. Alexander, sunk in debauchery, and not expecting an attack,
was deserted by the people of Antioch and by many of his own soldiers, and was slain. [ALEXANDER BALAS.] Ptolemy Philometor helped to set Demetrius, given him his daughter Cleopatra in marriage. Soon after his arrival in Syria, Demetrius renewed the war against Jonathan, whom Balas had made high-priest, and had invested with a purple robe. Apollonius, governor of Coele-syria, advanced to Azotus with a large army (147 B.C.), but was there routed by Jonathan, losing nearly 8,000 men. An interview then took place at Ptolemais between Demetrius and Jonathan, in which Jonathan was confirmed in his position. In 145, Tryphon, who had been an officer of Alexander Balas, brought Antiochus, the young son of the latter, from Arabia, where he had taken refuge, and rebelled against Demetrius. The people of Antioch rose in revolt, and Jonathan, disappointed in the hope that Demetrius would keep his promise to withdraw the Syrian garrison from the citadel of Jerusalem, joined Antiochus. With the assistance of his own brother, Antiochus took possession of all Palestine as far as Damascus, and held it for Antiochus. The latter confirmed Jonathan in his high office, and made Simon governor of the whole district between Tyre and the borders of Egypt (144 B.C.). In the same year Jonathan defeated Demetrius' troops near Kadesh in Galilee (143). Tryphon seduced the high priest by treachery, and murdered him. Simon was chosen, in his brother's stead, head of the Jewish state and high-priest. Tryphon then murdered Antiochus, and claimed the throne for himself. Simon joined Demetrius, who for a time got the better in the contest with Tryphon. In 138 Demetrius made war with Mithridates (Arsaces VI). Of Parthia, and, aided by Elamites, Persians, and Bactrians, was for a time successful. At last, however, Mithridates captured him by treachery (141 B.C.), and sent him as an honourably treated prisoner to Hyrcania. Meanwhile Demetrius' brother Antiochus the Sosid, overthrew Tryphon, and became king of Syria (137 B.C.). He engaged in a war with the Parthians, and this led Phraates II., who was then king, into alliance with Demetrius, who had married his sister Rhodoguna. Demetrius was sent into Syria, with a Parthian army, to force Antiochus to retreat, and he thus regained the throne (128 B.C.). But a rival claimant, Zabinas (who took the name of Alexander), aided by Ptolemy Physcon of Egypt, soon after defeated him in battle near Damascus, and compelled him to flee to Tyre, where he was murdered on landing. Eusebius, Chron. Arm.; Winer, Bibl. Rclnt- worterbuch. [W. S. T. C. T.]

**Demetrius.**—1. An Ephesian silversmith who made miniature "shrines of Artemis" [DIANA], which probably represented the goddess sitting in a niche (Ramsay, Church in the Roman Empire, vii.). Such statuettes were made in metal, marble, and terra-cotta for worshippers to offer in her temple. The spiritually-minded Christians found an abomination in this trade, hence the opposition raised by Demetrius (Ac. 19. 23-27).—2. (3 Jn. 12.) Probably one of the evangelists to whom DIOTREPHES had refused hospitality. [E. R. B.]

**Demoniacal Possession.**

Demon (LXX. and N. T. δαίμονος, rarely δαίμων). Rabbinical theology distinguishes two classes of demons. (1) Fallen angels, under the sovereignty of Satan; these are incor- porated in human bodies, and are immortal. (2) Demons under the authority of Ashmedai [ASMODEUS]; these are semi-corporeal, they eat and drink, multiply by sexual propagation (cf. Tob. 6.14), and, though long-lived, finally die. It is possible that some such distinction as this is scriptural. The hairy, goat-like demons of Lev. 17.7-14 and 13.31, (scribal interpolation), are the female vampire of Pr. 30.15 ("dâgāq, A.V. horse-locch), which, in the words of the Targum of Ps. 12.8, "drinks the blood of men"; the nocturnal ghouls of Is. 34.14, which, according to Jewish belief, was particularly dangerous to children (lilith; R. V. night-monster), seem to belong to the latter class. But the shâdûkhim of Deut. 32.17; Ps. 106.37 (R. V. demons), to whom even human sacrifices were offered, seem demons of a higher order, as also does the desert-haunting Azazel of Lev. 16. (ATONEMENT, DAY OF.) All the N. T. demons, even those of Mt. 12.43, Rev. 16.13, seem to belong to a higher class. They are called "angels," 2 Cor. 12.7 (E. V. messenger); 2Pe. 2:4; Ju. 6; Rev. 12.7,9; perhaps also 1Cor. 6.3. Other names are "unclean spirit," "spirit of an unclean demon," "evil spirit," "spirit," "spirit of sickness (infirmity)" (Lu. 15.11), "dumb and deaf spirit" (Mk. 9.25), "spirit," "divination," "dæmon." The Targum of Neh. 2.13, "Devil, with his female, the powers, the principalities, the world-rulers of this darkness, the spiritual hosts of wickedness in the heavenly places" (Eph. 6.12); possibly also the "rulers [A.V. princes] of this world" (1 Cor. 2.6,8). They dwell in those higher spheres of existence called "heavens," some, perhaps, even in the highest heaven (ἐν τοις ἀναβασιν; Eph. 6.12; cf. Mt. 18.35); but, like Satan, they "go to and fro in the earth," deceiving, injuring, possessing men. They are specially powerful among the heathen, with whose divinities they are sometimes identified (Deut. 32.17; Ps. 106.37; Ba. 4.7; 1Cor. 10.20). Our Lord's allusion to them as haunting with "spiritual" places (Mt. 12.43) is not metaphorical. A special class of demons is mentioned (2Pe. 2.4; Ju. 6), who are already chained in hell, "reserved unto judgment," both writers call them "angels," and seem to follow the book of Enoch in identifying them with "the sons of God" of Gen. 6.2. [SATAH; DEMONIACAL POSSESSION.]

Demoniacal possession is at once one of the most difficult and most interesting of the minor problems furnished by Holy Scripture. To deal effectively with the questions raised, we must first note the various cases in which a definite possession of a human body by a spirit, good or evil, is alleged in the text. The first case historically is that of Saul (1Sam. 16.14), who, when he turned from the right pathway, was troubled by an evil spirit from the Lord. In this case the disease was intermittent; the playing of David's psalms caused the spirit to depart. A time is alleged in the text. May also note that the evil spirit is said to have been from the Lord, but this may possibly be taken to imply that God had abandoned him to evil, rather than that there
was any direct sending of evil upon him (cf. Ac.7.42; Ro.1.28). When we come to N.T. we find a very different conception. No less than seven papers of this (probably the greater number) in which there is a direct statement that a person is possessed of a devil, but no indication of the symptoms. These we may dismiss immediately, as it is more than probable that the evangelist is simply using the phraseology of his time, and attributing a violent evil, the causes of which were unknown in his day, to demoniacal possession. The controversy with regard to the story of the Gadarene swine has reached almost of its due. Archbishop Trench says it "forms one of the chief stumbling-blocks in evangelical history," Dean Farrar that "we can gain nothing by speculating upon it"; and the combat between Mr. Gladstone and Prof. Huxley is in the memory of most. It is important to note how far the case is that which may be an witness of the occurrence, each was dependent upon outside information. Under these circumstances, is the theory that the demoniac, "in the parting paroxysm of his madness, hunted the swine over the precipice into the lake, imparting to them the fear was taken to the devil and the patient extremity, and unattainable as is often supposed? (2) Those in whom our Lord Himself deliberately speaks of an evil spirit possessing the patient present a much more serious difficulty. We may take Mk.9.17 as a specimen case. Here the symptoms are entirely those of ordinary epilepsy [Madness], were it not for the remark, phrase in ver. 25, "He rebuked the evil spirit, saying unto him, Thou dumb and deaf spirit." Hence the question arises, was our blessed Lord capable of speaking as though the youth were possessed by a devil, when a matter of fact he was suffering from an ordinary disease? To say how far this question is answered by the doctrine that the "kenosis" is not within the province of this article; but the considerations that follow may partly remove the necessity. It is evident that it was customary to attribute anything incomprehensible to a possession of the devil from the fact that the Jews, whenever our Lord Himself did anything which they regarded as inexplicable, were exceedingly ready to accuse him of such possession (see Mt.11.18; Lu.7.33, etc.). It is curious that beyond the gospels there is hardly a mention in N.T. of demoniacal possession. The only definite cases are in Ac.16.16; 19.12; 19.13. In the latter we have a definite case of an evil spirit who is at once capable of knowledge and of special opposition to our Lord. Various explanations of the whole matter have been offered by different theologians. Of these the least feasible appears to be the commonplace theory that while evil spirits have no intellects, these were disposed to act immediately, these have since entirely ceased. Under what possible circumstances the laws of the spiritual world should be entirely re-modelled for a brief space it is hard to understand. The two arguments generally adduced in favour of this popular belief are, first, that the N.T. age was an age of miracle, and secondly, that it was by diabolic activity. That a specially spiritual age is always a specially evil age is obvious from history and from reason alike, for it is reasonable to suppose that the powers of evil will be specially active when they are being most opposed. But to maintain, as some have done, that an age of miracle may be expected to be concurrent with an age of unaccustomed diabolic possession is as unreasonable as can be, for it presupposes that when this spirit of good is most active, then the powers of evil are given special facilities. It is surely much more reasonable to suppose that the common belief that the N.T. time was one of special manifestation of spiritual power (both good and evil) is incorrect, as affects kind though not degree. Naturally during the Incarnation of our blessed Lord, and the period that immediately followed that Incarnation, the power of God was more manifest in the world. But Trench adduces Huxley's disavowal that He was doing anything more in the way of miracle than should be done by His followers (see Jn.14.12). And tradition and history alike show that the age both of miracle and of diabolic activity by no means passed away with the Ascension or with the departure of the first disciples; mediaeval and mediaeval records, however much we may discount them as supposititious, cannot be altogether explained without some theory of extra-natural interposition, and, indeed, even now there are so many things undreamt of in our philosophy which yet occasionally happen that he would be bold who would dogmatize on the subject. To sum up: It is impossible to deny that there are cases of definite possession of a human body by a devil recorded in N.T. It is unreasonable to suppose that such possession is restricted to N.T. times. It is impossible to state when such possession ceased or if indeed that it has ceased at all. And finally, Science, while she offers no explanation of these occurrences, on the other hand, offers no definite contradiction of them, and we must wait for further elucidation till she has attained further knowledge.

DEPOSIT

The contract whereby one leaves with another movable property for
safe custody. (1) Of inanimate objects: in case of theft the thief was to make double restitution to the owner. (2) Of animals: in case of death, injury, murder, or theft, the owner was to estimate the damage and deliver it to the court, and the court to dispose of it, whether to the owner or by sale to cover the loss. (3) Of human bodies: when a person was put to death unjustly, the court was to decide the matter and deliver the body to the owner or to the public. (Ex. 22.6-12.) (4) A repentant depositor who had acted wrongly might voluntarily purge himself by restoring the deposit plus one-fifth and bring a guilt offering (Lev. 6.1-7, 15.20-26). [Critics.] Parallels in Post-G. [H.M.W.]

The term occurs three times in N.T., R.V. marg. "deposit." in 1 Tim. 6.20, 2 Tim. 1.14, of the Gospel; in 2 Tim. 1.12 of the whole being or the sense. It is used in the latter sense by Philo and Josephus. [H.H.]

Derbe (Ac. 14.20, 21, 16.1, 20, 4). The exact position of this town has not yet been ascertained, but it was in the E. of the great upland plain of Lycaonia, which stretches from Iconium eastwards along the N. of the chain of Taurus, and near the place where the "ancient river" formed a pass from the plain of Cilicia to the table-land of the interior; and probably it was a stage upon the great road which passed this way. Three sites have been suggested. (1) Col. Leake supposed it to be Bin-bir Küssah, at the foot of the Qara Dağh, a remarkable volcanic mountain in the Lycaonian plain; but this is almost certainly the site of Lystra. (2) In Kiepert's Map, Derbe is marked farther to the E., at a spot where there are ruins, and in the line of a Roman road. (3) Hamilton and Texier are disposed to place it at Divle, a little to the S.W. of (2) and nearer the roots of Taurus.

Dossau (2 Mac. 14, 16), a village not "town," where a battle appears to have been lost by Simon, brother of Judas Maccabaeus. Ewald conjectures that it may have been Adasa. [C.R.C.]

Deuel, father of Eliasaph, the "captain" of the tribe of Gad at the numbering of the people at Sinai (Num. 1.14, 7.42, 47.10.20). In 2.14 the name appears as Deuel, an interchange of two very similar Heb. letters. The LXX has Raguel in all cases.

Deuteronomy, the closing book of the law, or Pentateuch. It bears in Heb. the name דְּתוּרֶה dyn. ("words"), from the opening sentence. The Gk. translitterates it into Διτερόν ("second law"), a designation not entirely appropriate, as the laws which the books contain are, for the most part, not new, but a repetition or recapitulation (with enforcement) of "statutes and judgments" already given. The book, in its main part, consists of three hortatory discourses, purporting to have been delivered by Moses in the Arabah of Moab ("that is," the R.V. explains, "the deep valley recurring north and south of the Dead Sea"). In the eleventh month of the fortieth year of the wanderings of Israel (1.3), shortly before his own death. The discourses, couched in a strain of eloquent and affectionate admonition and appeal, recall the great deeds of God in the history of the nation, and the longest of them embraces a rehearsal (12-26) of the principal laws given by God to Moses at Horeb, as these were to be observed by the people in their settlement in Canaan. The three discourses are closely connected with a brief introductory discourse containing some connecting notes, and appended to them are Moses' Song and Blessing, and a narrative of his death on mount Nebo. — Contents. The general introduction states the time and place of the delivery of the discourses (1.1-3). Then (1) 1.6-4.40 contain the first discourse of Moses, the longest of them, and in which the historical circumstances up to the time when the address was given, and 4.4-40 is an earnest, practical appeal. Subjoined to this address is a short account of the appointment of three cities of refuge E. of the Jordan (4.41-43). (2) After an introduction (4.44-49), 5-26 record the second and longest discourse of Moses. This consists of (a) a recital of the Decalogue, and exhortations based thereupon, relating to the fundamental theocratic principles by which the nation was to be guided (5-11); and (b) a summary of the principal laws. The laws dealt with are mainly those contained in the decalogue, and of course are re-enacted in the Book of the Covenant (Ex. 20-23). They are reproduced, not literally, but in the form of popular address, with occasional expansion, abbreviation, or modification, as the occasion required (Deut. 12-26). A brief historical notice is interpolated in 10.6, 7. (3) 27-29.1 may be a conclusion to the preceding discourse, or may, perhaps better, be regarded as introductory to, and prefacing, the third discourse, which properly begins in 29.2. Ch. 27 gives directions for the inscribing of the law on great stones on mount Ebal, and for blessings and cursings on mount Gerizim and Ebal respectively; and 28 solemnly expands the meaning of the blessing, and, with terrible emphasis, of the curse. A concluding discourse follows (29.2-30), embracing a promise of restoration on repentance (30.1-10). The people are exhorted to choose between life and death (30.11-20). (4) Ch. 31 narrates certain transactions of Moses, consequent on these addresses—his farewell to the people and commission of Joshua, and specially his writing out of the law and delivery of it to the priests (v. 1-15, 24-27); then his writing of his Song by divine direction (v. 16-23, 25-30). Ch. 32 gives
the Song, and ch. 33 the Blessing of Moses—Ch. 34 recounts the circumstances of Moses’ death, and ends with a eulogium upon him.—Deuteronomy has a unity of purpose and uniformity of character and style which place it by itself among the books of the Pentateuch, with which, nevertheless, both in history and laws, it is closely connected. The style has the elevated, rhetorical, expansive character appropriate to hortatory address, and is marked by many peculiar expressions (e.g. “observe to do,” “that it may be well with thee,” “as it is this day,” “a peculiar people,” “love” of God, etc. The long lists usually given homage to Moses require careful sifting). Critics distinguish it, in contrast with the styles of the so-called P and JE, by the symbol D. It has nearest affinity to the Jehovahistic (J) style (cf. Gen. 26.5; Ex. 13.16—15.16, 20—26, 19.3—6, parts of 20.23—20.26, 34.10—26); but even the priestly (P) style sometimes takes on a Deuteronomic character (cf. ch. 12.26—29). No two of the units or groups of units are placed as the P and JE writers thought to be discerned in Deuteronomy. Ch. 32.48—52, 34.1, 8, 9, are ascribed to P; and 27.5, 7 (groundlessly), 31.14—22, 34.10 are presumed to be extracts from JE. (On this nomenclature, see Pentateuch.) So well marked is the style of Deuteronomy, that even when the unity of the book was regarded as one of the settled results of criticism, Dr. Driver points out how “particular words and phrases, consisting sometimes of entire clauses, recur with extraordinary frequency, giving a distinctive colouring to every part of the work” (Deut. p. lxxvii). Criticism has therefore, for good or ill, united itself with much agreement in results. Some think the original law-book (attributed to the age of Josiah) consisted only of 12—26 (Wellhausen, etc.). Some enlarge its contents to 5—26 (e.g. Kuenen, who also gives ch. 28 to D); while others reduce the kernel to 12—19, and explain the present extent of the book as the result of the labours of a “school” extending down beyond the Babylonian captivity (Oxford Hexateuch). Latterly a new theory has been propounded, which, discarding the division into “hortatory” and “legislative” parts, proposes to divide into sections marked by the use of the common pronouns, and maintains this by the use of the plural pronouns (PL.). (Thus Steuernagel, etc.) To this arbitrary theorizing and disintegration the unmistakable unity of style and phraseology of the book furnish an all-sufficient reply. Taken as a whole, no book bears upon itself more clearly the marks of unity of authorship than Deuteronomy. With the unity of the book itself the question of its age and authorship stands in close connexion. That the book itself claims Mosaic authorship can hardly be disputed. The discourses are declared, apparently in good faith, to have been delivered by Moses, in the plains of Moab, to assembled Israel a short time before his death. It is further expressly attested that “the [Moses] wrote this law, and delivered it unto the priests the sons of Levi . . . . When Moses had made an end of writing the words of this law in a book until they were finished, Moses commanded the Levites, saying, Take this book of the law, and put it by the side of the ark” (31.9, 24—26. Cf. 17.18; Jos. 1.7, 8, 24.26; 2 K. 14.5, 6). Moses is said also to have written his Song (31.19, 22), and presumably it is intended that the Blessing (33) was written by him also. It is granted at once that the expression “this law” cannot be pressed beyond Deuteronomy; but there is no reason for supposing that it does not include the hortatory as well as the legislative parts of Deuteronomy (cf. 1.5, where the expression plainly applies to all that follows). There is still the question, which is in itself a fair one, whether our present book of Deuteronomy corresponds precisely to the “law” which Moses wrote, or may not be regarded as an inspired exposition of, or additions to, the law of Moses, with a few brief notes of the lawgiver (thus Delitzsch, etc.). The possibility cannot be denied; but there seems no reason why Moses should not have given the requisite literary form to his own addresses. The intensely earnest personal note in the discourses speaks to their first-hand origin. We are, then, positively led to the discovery of “the book of the law” in the reign of Josiah (2 K. 22), we find reason to conclude that the book then found in the temple was, or at least included, the book of Deuteronomy; and there can be no doubt at all that the book then recovered was already old, and was taken to the temple (cf. Jer. 36). It is a genuine book of the law of Moses (2 K. 22.8, 23.2, 24.25). The provisions of the book conflicted with a multitude of interests. It was unspiring in its condemnation of idolatries and other practices at the time (2 K. 22.13, 16, 17); yet no one then, or after, took steps to expunge it from the temple. (Hilkiah, Shaphan, the king, Huldah the prophetess, the people) to be a genuine book of the law of Moses (2 K. 22.8, 23.2, 24.25).
DEUTERONOMY

made in 18.6-8 are the "disestablished priests" of these high places is without a shadow of evidence. The book pronounced a very different sentence on leaders in idolatry (15). This pronouncement of evidence on the literary capabilities of the book of Deuteronomy can only be over- turned by the adducing of the strongest proofs to the contrary. Among such proofs cannot be reckoned the objection that the book represents too advanced a stage of literary composition for the age of Moses, for this begs the very question of the literary capabilities of a leader like Moses. Writing was familiar to one trained in Egypt. [PENTATEUCH.] Nor is it a cogent argument that the last chapter of the book narrates the death of Moses. No one now holds that Moses wrote the narrative of his own death in ch. 34; but this only shows, what on other grounds it is reasonable to assume, that the book underwent editing and completion by other hands. Probably the framework and certain annotations in the body of the work are due to such editing. Nor, again, is it decisive of non-Mosaic authorship that Moses is said (1.15) to have delivered his addresses "within the borders of Canaan" (R.V. "beyond Jordan"). Besides the local usage, determined by the position of the speaker, generally with some defining phrase to show which side was meant (4.4.1.46.49.11.30), "the other side Jordan" was a geographical expression for the Moabite side of the river; hence could be meant by himself, when speaking on that side (3.5). If the framework is due to later editing, the objection disappears altogether. The critics are very confident that Deuteronomy can be shown to be of earlier date than the Levitical law. Neither in the historical references nor in the laws, it is argued, is the priestly code recognized. The older critical writers, with more reason, were convinced of the very opposite of this, that Deut. did presuppose the priestly history and laws. As points of contact with the P history may be mentioned, the allusion to the creation narrative in 4.32 (cf. Gen.1.27), to "seventy-two" as the number for Egypt (10.22), to "twelve" as the number of the spies (1.23), to Moses and Aaron being debarred from Canaan as a punishment (1.37.3.26.4.21), etc.—all only in P; with many special words and phrases, as "horses and chariots," "hard bondage," "stretch-tout arm," etc. (4.3.11.4.26.6). On laws, see PENTATEUCH. A special case of alleged difference is the occurrence in Deuteronomy of the phrase "the priests the Levites," and the non-recognition of the distinction in the other books between the "priests," the sons of Aaron, and the "Levites" as ministers to the priests. It may be sufficient here to point out that while, in Deuteronomy, an Aaronic priesthood and distinctions within the tribe of Levi are implied (10.6.18.1-8), it was natural, after the separation of the tribe, that, in popular address, the whole tribe should be spoken of, in distinction from the people, as, collectively, a priestly tribe. The language in Deuteronomy is probably influenced by the period when the earlier designation, "sons of Aaron," was being gradually dropped for another identifying the priests more directly with their tribe. In truth, however, the phrase "priests and Levites" is as little found in the other books as in Deuteronomy; and in Leviticus itself the "Levites" are practically ignored. [LEVITUS.] Occasionally, the term "Levites" is used as a collective name for priests and Levites (Num.35.2,6,8). A principal argument for the late date of the book is that the law of the unity of the sanctuary in Deut. 12 is apparently unknown in the earlier history, and is opposed to the older JE law of Ex.20.24, which permits sacrifices to be offered without restriction of place. cQ. there is, however, misapprehension here of both the law in Exodus and the law in Deuteronomy. The ideal of one sanctuary is present from the first (Ex.23.14-19), and the law in Deuteronomy was not intended to take full effect till the Lord had given the people rest from their enemies (12.10). Many of the sacrifices instance as breaches of this law were sanctioned by theophanies, and others (as in the case of Samuel) belong to a period of religious disorganization. How far Deuteronomy is from contradicting Ex.20.24 is seen from its own command to erect an altar in the precise terms of that law (Deut. 12.27-29). The number of discrepancies between the historical notices in Deut. and those of the earlier books, and from like discrepancies between the laws in the different codes. Most of the historical contradictions are far-fetched and unreal, and the discrepancies of laws, though sometimes occurring, are accounted for by the context. The explanation. The tithe-laws in Deuteronomy, in particular, present a different aspect from those in the Levitical Code. The Jews themselves resolved the difficulty by the supposition of a "second" tithe for purposes of charity; while the Levitical provision seems clearly presupposed in 18.2 (cf. Num.18.20-24). The very freedom used by the author in his handling of the laws points to the original law-giver, as alone entitled to use this liberty. [LAW IN O.T.] With Delitzsch we may hold that "nothing necessitates us to deny the Song [Deut.32] to Moses"; and, if the spirit of prophecy be added to, Deut. cannot be by Moses (23). The general argument for the early date of Deut. is strengthened by a study of the prophetic writings, which appear in many ways to show acquaintance with the ideas and phraseology of the book. This is true of both Amos and Hosea. Cf., e.g., Am.4.6-10.5.11 with Deut. 28.15.8. Am.6.12 with Deut. 29.18. Am.9.14. 15 with Deut.30.36. Ho.5.10 with Deut.19.14. 27.17. Ho.8.13 with Deut.28.68. Ho.12.13 with Deut.18.18.34.10, etc. Driver, Deut.; Alexander, Deut., in Pulpit Comm.; Möller, Are the Critics Right? Deut., in Speaker's Comm.; and see PENTATEUCH. [J.L.]

DEW. [Satan; Demon; Demoniacal Possession.]

Dew. This is so copious in summer in Palestine that it supplies to some extent the absence of rain (Eccles.18.16.43.22), and becomes important to the agriculturist. An instance of this copiousness is the well-known sign of Gideon's army, "the dew of Egypt" (12.37flf.). Thus as a prime source of fertility it is regarded as a divine blessing (Gen.27.28; Deut.33.13; Zech.8.12), and its withdrawal as a curse (2Sam.1.21; 1K.17.1; Hag.1.10). It is a frequent poetic image for
DIadem

that which is gentle, penetrating, and refreshing (Deut. 32.2; Job 29.19; Ps. 133.3; Prov. 19.12; Is. 26.19; Ho. 14.5; Mi. 5.7), or is a sign of night-exposure (Can. 5.2; Dan. 4.15ff. 5.21) while the speedy evanescence of the early dew typifies the transient goodness of the hypocrite (Ho. 6.4, 13.3).

Diadem. The Gk. διαδήμα is signifies properly a badge of royalty, and was used originally to describe the silken fillet, which was fastened around the turban of the Persian kings (Xen. 8 Cyr. iii. 13). Thus LXX. uses the word to describe the crown

DIvON, DIBON-GAD 213

royal of Vashti (Esth. 1.11) and of Esther (2.17), and also the distinctive decoration of the head, which was worn by the successors of Alexander as a token of their assumption of sovereignty (1Mac. 1.9, 13.32). This strict use of the word is, however, not always observed by LXX., which describes Mordecai's robe of honour by the same term (Esth. 8.15). In N.T. the Gk. accurately distinguishes between διαδήμα, the symbol of sovereignty, and στεφάνος, the festal wreath. [CROWN.] The former occurs in N.T. in Rev. only, where it is used for the rival dominions of the exalted Christ on the one hand (Rev. 19.12) and of 'the dragon' (12.3) and 'the beast' (13.1) on the other. This distinction, which A.V. failed to mark, has been brought out by R.V. (cf. Trench. N.T. Syn. xxiii.). [J.C.V.D.]

Dial (Heb. ma'ālah, "steps"; ZK. 20.11; Is. 38.8; see marg. A.V. "degrees," R.V. "steps"). The word is also rendered in the same passages by "degrees" (ZK. 20.9, 10; Is. 38.8). Cyril of Alexandria and Jerome supposed the length of the shadow on a flight of steps to be intended. A Kassite boundary stone of 11th cent. B.C. (De Morgan, Fouilles à Suse, 1897-1899, ii. p. 110) represents (apparently as an emblem of the spring equinox) the segment of a circle divided into degrees; and sun-dials were thus probably in use as early as the 8th cent. B.C. [C.R.C.]

Diamond (Heb. yahalôm), a precious stone, the third in the second row on the breast-plate of the high priest (Ex. 28.18, 39.11), and one of the precious stones of the king of Tyre (Ezk. 28.13). Our translation, "diamond," is derived from Eben Ezra, and defended by Braun. Kalisch says, "perhaps emerald." It is practically certain that Pliny described the diamond as one kind of adamant, but very improbable that the gem should have been known in the countries bordering the Mediterranean before the days of Alexander the Great. At any rate, it is not likely to have been available for the high-priest's breast-plate at the time that was made. That it should have been engraved may be pronounced impossible. The art of diamond cutting is hardly older than the 15th cent. in Europe, though it may be of more ancient date and independent discovery in India. For šāmīr, translated "diamond" in Je. 17.1, see ADAMANT. [T.G.B.]

Diana, a Roman goddess, regarded as identical with Artemis. In Asia there was an early indigenous deity to whom the Gk. settlers ascribed some of the characteristics of their own Artemis. She was, however, in the cult which had its highest development at Ephesus (where was her famous temple, the Artemisium), scarcely, if at all, a lunar deity, but a goddess who presided over generation and the procreative energy of mother earth. The traditional form of the image referred to in Ac. 19 is preserved on Ephesian coins.

Some of the symbolism points to fertility and animal wild-life. The turret-crown appears to denote affinity with Cybele, which affinity is also marked by the orgiastic rites of her priests, the Meγαθύγα. But in spite of these rites, the religion of Ephesus seems to have contained some elements of austere purity. The epithet 'great' was commonly ascribed to Artemis; hence the exclamation, "Great is Artemis of the Ephesians." The prevalence of her cult is not inaptly described in the words (ver. 27), "Whom all Asia and the world worshippeth." See A. B. Cook, Held. Journ., 1895, p. 12; Farnell, Cults of the Greek States, pp. 480 ff. [Ephesus.] [A.R.]

Dibla'im, father (or mother) of Hosea's wife Gomer (Ho. 1.3).

Diblah' (R.V. Diblah; Ezk. 6.14 only). "From the wilderness towards Diblah" may refer to BETH-DIBLAITHIM, but four MSS. read KIBLAH, a town which has a wilderness to its E. Dibl in Upper Galilee is in a rugged region, but not in or near the wilderness. [C.R.C.]

Dibon', Dibon-gad — l. A chief city of Moab immediately N. of the ARNON gorge. Now the ruined town Dhibhán, where the "Moabite Stone" was found by Rev. F. Klein on August 19, 1868. The city is first noticed in the Amorite song of triumph (Num. 21.20) and was, though it was not a town, rebuilt by men of Gad (32.34). As Dibong, it is the next stage N. of Irm (33.45) in the region given to Reuben (Jos. 13.3), but held by Moabites after about 890 B.C. (Is. 15.2; Je. 48.15, 22). The Moabite Stone, erected by king Mesha (see 2K. 1.1, 8.4-27) about the
same date, records the beginning of the retreat of Israel from Medeba even in Ahab's reign, and the final Moabite triumph over all the plateau to Jahaz—as to which Mesha says, "I took it, that I might add it to Dibon."—2Chr.28.23 [DIBON. 2Kgs.XVII.45.10:20.59.21.21.]

Dilkar. [Money; Shekel.]

Didymus (the twin), the Gk. translation of Aram. tuma = Thomas (Jn.11.16,20.24,21.21.)

Diklah (Gen.10.27; 1Chr.1.21), a son of Joktan, whose settlements, as those of the other sons of Joktan, must be looked for in Arabia. The Heb. signifies "a palm-tree," hence perhaps Diklah is a part of Arabia containing many palm-trees.

Dilean, one of the cities in the lowlands of Judah (Jos.15.38). An unknown site. [C.R.C.]

Dimnah, [Jos.21.35]. Apparently for Kcliuin, (Gen.41.42.]

Dimon "[The waters of], in the land of Moab (Is.15.9). Gesenius thinks Dimon may stand for Dibon; but a play on the sounds Dimon and dam (blood) in the passage cited. [C.R.C.]

Dimonah, a city in the S. of Judah (Jos.15.22), apparently the Dimon of Ne.11.25.

Dinah, the daughter of Jacob by Leah (Gen.30.21). She accompanied her father from Mesopotamia to Canaan, and, going "to see the daughters of the land," was violated by Shechem, son of Hamor the chieftain of the territory (Gen.34.). Her age at this time, judged as a condition of the prospective marriage age (Gen.37.2), may have been from 13 to 15; the ordinary period of marriage in Eastern countries. Shechem proposed to make the usual reparations by paying a sum to the father and marrying her (Gen.34.12). But the crown of the offence consisted in its having been committed by an aboriginal and unfavoured people of God: he had "wronged folly in Israel" (34.7). Hamor, who acted as his deputy, proposed the fusion of the two peoples by intermarriage and commerce. The sons of Jacob availed themselves of the eagerness of Shechem to effect their revenge; they demanded as a condition of the proposed union, the circumcision of the Shechemites. The latter assented: and on the third day, when the pain and fever resulting from the operation were at the highest, Simeon and Levi, own brothers to Dinah as Josephus observes, attacked them unexpectedly, slew all the males and plundered their city. Jacob expressed abhorrence of this act both at the time and on his death-bed (Gen.34.30,49.5-7).

Dinaites, mentioned in the letter of Rehum, the chancellor (Ezr.4.9), among the inhabitants settled in the cities of Samaria by "the great and noble Asnapper." Cheyne, however, thinks that it is not properly an ethnic name, but that the LXX. rightly renders it "judges," from the root dr. He considers the word to be a transliteration of the Persian title dābūkār. The Dinaites have been identified with various peoples bearing somewhat similar names [f.r.4.1-5.]

Dinhabah, [Gen.36.32; 1Chr.1.43], perhaps Dēndēk in N. Edom. [EDOM.] [C.R.C.] DIBRI

Disciples

Dionysia (in Latin, Bacchanalia), the feast of Dionysus or Bacchus. In 2Mac.14.33 Nicanor threatened to destroy the temple in Jerusalem and erect "a temple unto Dionysus for all to see"; and in an earlier chapter (6.7) Antiochus enjoined that, when the Dionysia came, the Jews were "to go in procession in honour of Dionysus, wearing wreaths of ivy," Dionysus was the god of wine, and his worship, which had many Eastern features, was a blend of orgies and mysticism. In the Hel- lenistic age there were four Dionysia—the rural, the Lenean, the Anthesterian, the urban festivals. The first and second are associated with the origin respectively of Gk. comedy and Gk. tragedy. The festival, especially in later times, was celebrated with wild extravagance and licentious enthusiasm. Mac- gamma—male and female worshippers—crowned with ivy and bearing the thyrsus, went in procession. In 186 B.C. the Roman senate afforded the Bacchanalia; but, notwithstanding, Antiochus (see above), in 168 B.C., enjoined its observance on the Jews. [A.R.]

Dionysius, a member of the council of Areopagus, converted by St. Paul (Acts.17.34). There is early evidence for his having been entrusted with the task of rule in Athens (Euseb. H.E. iii. 4). He is not identical with Dionysius of Paris (St. Denis), who lived in the 3rd cent., nor was he the author of the celebrated theological treatises current under his name, which are first mentioned in 6th cent. [E.R.B.]

Dioscorinus (2Mac.11.21). Perhaps the Dioscurus of the Cretan calendar (cf. Vulg. and A.V. marg. Dioscurus) = the Macedonian Dysistrus—i.e. the month immediately before Xanthicus. Smith's D.B. (vol. ii. p. 417, ed. 1895.)

Diotrephes. His refusal of hospitality to certain travelling evangelists (3 John 10) led to the writing of that epistle to Gaius. [E.R.B.]

Disciples. Only once in O.T. (Is.18.16, εὐδακτόστοι μοι, LXX.). Very frequent in N.T. (μαθηταί, μαθηταί, of Tabitha, Ac.9.36), in Gospels and Acts only. As in classical Greek, a disciple is a learner who follows and is initiated by a master (Gk. ἀκολουθεῖν). It is used (1) of the followers or pupils of others than Christ, e.g. Moses (Jo.9.28), John the Baptist (Mk.9.14,11.2), Pharisees (Mk. 2.18). When used of the personal followers of our Lord, it is often (2) equivalent to "apostles"—thus the Twelve are often called the disciples (Mt.28.18), or the twelve (or eleven) disciples (Mt.28.17; Lu.9.1). [APOSTLE.] Often (3) it includes a wider circle of personal adherents (Jn.6.60,66), e.g. Joseph of Arimathaea (19.38); not seldom it is difficult or impossible to decide precisely between (2) and (3). After the Ascension the word is used constantly in Acts as (4) equivalent to Christian, where the disciple was not a personal follower of Jesus in His lifetime, e.g. Timothy (Ac.16.1), Mnason (21.16). Once it is even used of men "baptized unto John's baptism" (Ac.19.1-3), unless the word is used prophetically. In N.T. times the word seems to be disused except historically. [C.C.T.]
Discus, a circular plate of stone or metal, made for throwing as an exercise of strength and dexterity. The neglect of the altar for this game by the priests is mentioned as an instance of the Hellenizing influence of Jason (2Mac.4.14). [Hellenist.]

Dises. [Medicine.]

Dish. In Judaea and among the Bedouin Arabs, guests handled their food with the fingers, as they still do in Egypt and many other countries in the East. Each person broke off a small piece of bread, dipped it in the dish, and then conveyed it to his mouth together with a small portion of the meat or other contents of the dish. To pick out a delicate morsel and hand it to a friend is esteemed a compliment, and to refuse such an offering contrary to good manners. Judas dipping his hand in the same dish with our Lord was showing especial friendliness and intimacy. [Bason.]

Dishan, a Horite "duke," youngest son of Seir (Gen.36.21,28,30; 1Chr.1.38,42).

Dishon.—1. The fifth son of Seir (Gen.36.21,26,30; 1Chr.1.38).—2. The son of Anah and grandson of Seir (Gen.36.25; 1Chr.1.38. Dishan.) The geographical position of the tribes descended from these patriarchs is uncertain. Knobel places them to E. and S.E. of the gulf of 'Aqaba.

Dispersion, The Jews of the. The real starting-point in the dispersion of the Jews was the deportation of the inhabitants of Judaea to Babylon in 597 B.C. [Captivities of the Jews.] The people of Israel had been deported at an earlier date (722 B.C.), but do not seem to have had any status in the land to which they were carried, and are scarcely even mentioned as a part of the Diaspora. St. James addresses his letter to the Twelve Tribes, and St. Paul speaks of the same number as still in existence (Ac.26.7; cf. Mt.19.28, Rev.7.5-8). The term Diaspora was technically used of all members of the race who lived beyond the limits of Palestine.

The Jews asked whether our Lord spoke of going "unto the Dispersion among the Greeks" (Jn.7.35), and St. Peter writes to the "sojourners of the Dispersion" (1Pe.1.1, R.V.). At the beginning of the Christian era the Diaspora was divided into three main groups—Babylonia, Egypt, and Asia Minor. (1) Babylonia. This ranked highest in the esteem of the Jews. It was the oldest, since it represented the large community of wealthy Jews who declined to return with Ezra to the desolated city of their fathers. It was nearest to Jerusalem, and was the first to receive official communications from the Sanhedrin. There was also the bond of a common language, Aramaic. Alexander the Great confirmed all their former privileges (11 Ant. viii. 5). It was through them that Zoroastrian influences passed into the religion of the Jews. After the destruction of Jerusalem, Babylonia was the spiritual centre of Judaism for several centuries. Its academies were famous, and it was the seat of the prince of the Diaspora. (2) Egypt. In many respects the most important group of the Diaspora was that in Alexandria, reaching out along the African shore of the Mediterranean, and as far S. as Ethiopia. There were Jewish settlers in Egypt at an early date (Je.41.17,43.7), but it was under Alexander that the colony was permanently founded. He placed 5,000 Jewish soldiers in the Theban garrison assigned to the five wards of the new city Alexandria to the Jews. His successor continued the same policy of placing Jews in Egypt, and Philo estimated their number at not less than one million. About 160 b.C. Onias, a priest of Aaronic descent, built a temple at Leontopolis in imitation of the one in Jerusalem. They were citizens possessing full rights, and ecclesiastical affairs were controlled by a Gerousia of 70 members and an ethnarch, subject only to the Great Sanhedrin in Jerusalem. This community is due the Gk. translation of the O.T., a number of apocryphal writings, and the Greek Jews of Alexandria. (3) Asia Minor, etc. Large communities of Jews existed in all the countries of the Orient (Philo, Legatio ad Caianum, § 36), fresh evidence of which is being constantly brought to light. During the 3rd and 2nd cents. B.C. great numbers of Jews were sold into slavery and were subsequently redeemed by their co-religionists. When freed, they usually settled in the places where they were living at the time, and so formed new communities. So long as the temple stood, the Jews of the Diaspora looked to Jerusalem as the centre of religious life. They made pilgrimages to the holy city (Ac.2.41-45), and sent large contributions for the temple service. The Dispersion prepared the way for the spread of Christianity, not because the Jews were indifferent to the claims of their religion and more disposed to new teaching—the experiences of the Apostles on their missionary journeys disproved this, as the result of their proselytizing efforts. There were proselytes in large numbers in every country of the Dispersion—St. Paul found them in Antioch, Thyatira, Thessa-
DIVINATION

Divination may be said to run through all the history recorded in the Bible, until and including the casting of lots for determining the heir to Judas Iscariot (Ac. 1:24), as a method, permitted and encouraged, of "inquiring of the Lord." Within the covenant, no less than without it, the worshipper sought (in the crises of his life) guidance from the Deity, and this guidance was vouchsafed in various ways. The three most important methods, and the wizards, out of the covenant people, at any rate before the building of the temple, are mentioned in connexion with the abandonment of Saul (1Sam. 28:6), "and when Saul inquired of the Lord, the Lord answered him not, neither by dreams, nor by Urim, nor by prophets." Of these the dream was the most profound and solemn act of divine litigation of life might receive direction by the dream (Judg. 7:13-15; cf. Mt. 17:20). The use of Urim was official, the religious head of the nation casting lots on behalf of its civil head; and the prophet's function was to supplement the customary channels of divine government by extra-ordinary interpositions—when the priesthood failed in the sons of Eli, Samuel is raised up to be prophet; when David falls into sin he is reproved by the prophets Nathan (2Sam. 12:1-4) and Gad (2Sam. 24:13), who indicate punishments impending. All other forms of divination were alien to the spirit of the covenant (Deut. 18:10, 11; cf. "Saul had put away those that had familiar spirits, and the wizards, out of the land," 1Sam. 28:3; Is. 8:19), and indicated, when used by the covenant people, sympathy with idolatry. Such forms are divination by a cup (Gen. 44:5), rods (Num. 24:12), arrows, the liver, and teraphim (Ezk. 21:21; 1Sam. 15:23; Ezek. 10:2). There were also oracles (2K. 1:2-6), possibly at every穿上 the Deity. Divine inspiration or itself being designated "the oracle" (1K.6:16; Ps. 28:2). There was a professional class of diviners, varieties within which were those whose inferiority was manifested when compared with Joseph (Gen. 41:3-39), Moses (Ex. 7:11, 12), Daniel (5:11). Their methods included converse with the dead (1K. 20:6; Is. 19:3) and serpent charming (J.e. 8:17), as well as the muttering of formulae (2K. 9:22; Mt. 5:12, etc.). Balaam, in his resistance to God, had resource to "enchantments" (Num. 24:1), and there are frequent references in the Acts to the conflict between the apostles and various profane tools of divination: Simon Magus (Acts 8:9), Bar-Jesus (13:6,8), the slave-girl at Philippi (16:16), the vagabond Jew exorcists and other dealers in magic at Ephesus (19:13, 19; 2Tim. 3:8,13. [MAGIC.] [G.R.D.B.]

Divinity of Christ. [INCARNATION; JOHN, GOSPEL OF.]

DIVORCE

Our Lord indicates that divorce was not admissible in the original institution of marriage as given by God in the time of man's innocence. "From the beginning it was not so" (Mt. 19:8). After the Fall, it appears, from the earliest laws and records of peoples, that divorce must have become very general. It was conceded by the regulation of Deut. 24:1-4 to the Israelites. It was then no doubt the permission of an existing practice, not easy of removal: "Moses, because of the hardness of your hearts, suffered you to put away your wives" (Mt. 19:8). The ground of divorce assigned was 'eruth ddabbir (A.V. "some uncleanness," R.V. "some unseemly thing." LXX. ἐρυθ. ὑπατίαν). The later schools of Jewish doctors were at variance as to the meaning of the expression. The school of Shammai understood it as "grave moral fault," while the school of Hillel extended it to include trifling causes—e.g. if the wife burnt the food she was cooking for her husband, the question addressed to our Lord by the Pharisees (Mt. 19:3) may refer to this difference. The husband, by the law of Deut., was to write the wife "a bill [or, book] of divorcement, and give it in her hand, and send her out of his house" (Deut. 24:1). She might then marry again. After such marriage, if she committed adultery, her first husband might not take her back. The law of Deuteronomy thus (a) required a ground of divorce, (b) prescribed a formal bill of divorcement, and (c) practically made the act irrevocable. In all this the legislation was doubtless in the direction of restraint, not of encouragement. [FAMILY.] In the moral enactments of the Sermon on the Mount our Lord expressly revokes the concession of divorce. "It hath been said, Whosoever shall put away his wife, let him give her a writing of divorcement. But I say unto you, That whosoever shall put away his wife, saving for the cause of adultery, causeth her to commit adultery; and whosoever marrieth her which is put away for the cause of adultery, causeth her to commit adultery." (Mt.5:32.) In this passage our Lord permits a man to put away his wife for the one cause of fornication (πορνεία). There is, however, no expressed sanction of the remarriage of the man, even in this case; and while the put away for adultery frees the man to marry again. One passage (Mt.19:9) is very commonly quoted as giving sanction to the remarriage of the man in the one allowed case of putting away: "Whosoever shall put away his wife, except it be for fornication, and shall marry another, comitteth adultery; and whosoever marrieth her which is put away for the cause of fornication, comitteth adultery." This is the reading of the Textus Receptus; but the extant MSS., as also the Versions and Fathers, show great variations. Omitting "and shall marry another," and reads "whosoever shall put away his wife, saving for the cause of fornication, causeth her to commit adultery, and whosoever marrieth her which is put away for the cause of adultery." Omitting the Textus Receptus to give the true reading, various explanations have been given of it. (1) Kehele supposed the verse intended for Christ's Jewish hearers, and not for His own followers. (2) Von Döllinger regarded the specific exception πορνεία as meaning not adultery, but pre-nuptial unchastity. (3) Others regard the specific exception as to be read only with "shall put away," and not with "shall marry another." (4) Others understand the remarriage of the man in this case to be allowed. Those who adopt this view have to meet the difficulty arising from the second half of the verse, "he that marrieth
a woman put away commiteth adultery." The marriage bond, if it exist at all, exists for both husband and wife; and if the man be not free, it seems to follow that the man also must be bound. The passage in Mt. 19 is the only passage in the gospels in which any support for remarriage after divorce can be thought to be found. Other passages bearing on divorce are Mk. 10.2-12; Lu. 16.18; Ro. 7.1-4; 1 Cor. 7.10-16. Of these references, Mark and Matthew, which both claimed that Christ taught the entire indissolubility of marriage; while the Eastern Church has in practice admitted divorce for a variety of causes. For Bibliography, see MARRIAGE. [G.D.W.]

Dizahab, a place in the desert, mentioned (Deut. 1.1) as one limit of the 40 years' wanderings in the desert. Robinson indentified it with Dahab, a cape on the W. shore of the gulf of 'Agaba. The Heb. may mean "place of gold"—in Arabic Dhahab, vulgarly pronounced Dahab. Gold has been found in this region. [C.R.C.]

Doctrines. [RABBI.

Doctrines is used in N.T. to translate both διδασχα and διδασκαλια, though in Tit. 1.9 Hort translates "holding fast by the word which is faithful according to the teaching (διδασχα)" that he may be able both to exhort in the doctrine (διδασκαλια) that is healthful and to convict the gainsayers." (The Christian Ecclesia, p. 191). Thus the "teaching" would be that of Christian principles of morality and religion, and the "doctrine" would include exhortation which is sound, not (like Rabbinical teaching) concerned with trifles, and uttered in a spirit of narrow exclusiveness. We may contrast with it dogma, which is used in N.T. of a decree issued by those in authority (Lu. 2.1; Ac. 17.7; of Moses, Heb. 11.23; Eph. 2.15; Col. 2.14; of apostles, Ac. 16.4). It represents an authoritative exposition of a doctrine when reflection has drawn out all that can be discerned in it. We must always remember, however, that Christianity did not come into the world as a system of doctrine but as a Life. The value of the doctrine, exhortation and imposed by authority, is in exact proportion to its moral motive power. It was the men who had lived with Christ who taught other men to worship Him. It was their experience of His goodness which led them to set such store by His words. So it came to pass that reflection followed experience, and characteristic doctrines of Christians about God and man, and the true relations between God and man, grew into shape as a system of thought, not formally nor logically complete in N.T., but based on that common agreement of mind among all the saints to which N.T. bears witness; satisfactory testimony—the more precious very often because it is incidental. Precisely in the same way as the apostles' teaching was commended to the consciences of men by the beauty of holiness in their fellowship, so their earnestness in exhortation gave moral influence to their decisions on questions of truth and justice. For the apostles' teaching is established (Ac. 15.17) on which the apostles were agreed, though it was not yet summarized in any fixed form of words, included the true doctrine of God, the life and work of Christ, and the revelation of the Holy Spirit. Preaching to Gentiles, they began with the doctrine of the true God, in contradistinction with all other deities. Preaching to Jews, they found a common basis of faith in the God of their fathers, and proceeded at once, as indeed when preaching to Gentiles, to speak of Jesus as the Messiah—crucified, risen, exalted; of the gift of the Spirit; of baptism for the remission of sins. The Church of Christ, however, has in N.T. the confession of Jesus as the Lord, the Son of God (Ro. 10.9; 1 Cor. 12.3; 1 John 4.15). This is supported by the confession put on the lips of the eunuch in Ac. 8.37: "I believe that Jesus is the Son of God." This is found only in the Western text, and has been of teaching—in the form of a chronicle (Mc. 16.9f), with proofs (1 Cor. 15.3-7); a restatement of creed-like catechetical answers to questions (1 Pe. 3.18ff.); fragments of primitive hymns (1 Tim. 3.16). But these show the freedom of utterance consistent with precise agreement on fundamental facts of spiritual experience, the grace of God in Jesus Christ, and the love of God, and the fellowship of the Holy Ghost (2 Cor. 13.14). Again be it said, it was the moral motive power of such experience which attracted men, so that the words of the apostles were with power, and their decisions obtained the binding force which the consciences of many generations have been glad to acknowledge. J. F. Bethune Baker, Introd. to Early Hist. of Christian Doctrine (1903); A. E. Burn, The Apostles' Creed (1907). [A.E.B.]

Do'cus, a "little hold" near Jericho (Mac. 16.15, cf. ver. 13) built by Ptolemy the son of Abubus. The name still remains attached to the copious and excellent springs of 'Ain-Duhk, which burst forth at the foot of the mountain of Qurantania (Qurantul). N. of Jericho. [C.R.C.]

Doda'i. [Dodo, 2.]

Dodanim (plur. form.), a people belonging to the family of Japheth, the sons of Javan (Gen. 10.4; rChr. 1.7; Heb. rōdānīm in rChr. 1.7, and Sam. Pent. in both places). The Gk. is Ἰουδαίον (Jodain). The name, however, is rōdānīm, the Rhodians, i.e. the inhabitants of that island and its dependencies, may well be meant, in view of its importance. The city, however,
DODAVAH
was only founded in 408 B.C. Assuming the Massoretic reading in Gen. to be correct, it has been inferred that Dodanim is a form of Dardana.

The name Dardan, as inscriptions of Ramses II (19th cent. B.C.) show, comes from early times, and designates a people of Asia Minor not far off from the Lycians. [F.P.J.-J.]

Dodavah, a man of Marreshah, father of Eliezer, 6 (2Chr.20.37). Jewish tradition makes him the son of Jehoshaphat.

Dodo —1. A man of Bethlehem, father of Elizzah (13th cent. B.C.) who was one of David's 30 captains (2Sam.23.24; 1Chr.11.26). He is distinct from —2. Dodo the Ahohite, father of Eleazar, 3, the second of the three mighty men who were over the Thirty (2Sam.23.9; 1Chr.11.12). He, or his son—in which case we must suppose the words "Eleazar son of " to have escaped from the text—probably had the command of the second monthly course (see 1Chr.27.4), where the name is Doda.—3. A man of Issachar, forefather of Tola the judge (Judg.10.1).

Doge', an Idrumene chief of Saul's herdmen. He was at Nob when Ahimelech gave David the sword of Goliath, and gave information (1Sam.21.1) which enabled the priest to escape from the office, himself executed the king's order to destroy the priests of Nob, with their families, to the number of 85 persons, together with all their property (1Sam.21.7,22; 2Sam.1.18,22; Ps.52).

Dog (Heb. keleb). Dogs are frequently mentioned in Scripture, and were used by the Hebrews (see Gen.31.16) to guard flocks (Job 30.1). Troops of hungry and halfwild ("pariah") dogs wandered about the fields and streets of the cities, devouring carcasses and other offal (1K.14.16,21,19.23,22,38; 2K.9.10.36; Je.15.3; Ps.59.6,14), just in the same manner as do their successors at the present day. These became such objects of horror and scorn that cruel enemies are styled dogs in Ps.22.16,26. Moreover, the dog being an unclean animal (Is.66.3), the terms dog, dead dog, and dog's head were used as terms of reproach or of humility (1Sam.24.14; 2Sam.3.8,9,16,9; 2K.8.13). [R.L.]

Dophkah, place mentioned (Num.33.12) as a station in the desert where the Israelites encamped.

Dor. A western town in Galilee (Jos.11.2), in a region described as naphoth-Dor (12.3), apparently either the "open plains" or "the high grounds" of Dor. It was in Asher (17.11), a royal city of Canaan, not taken by the tribe of Manasseh (Judg.1.27). The naphoth-Dor are mentioned as the fourth of Solomon's twelve provinces, and apparently answer to Manasseh W. of Jordan (1K.4.11), as stated in 1Chr.7.29. It is usually supposed to be the later Dor, now Taftirah, on the shore W. of Carmel (Josephus, Ant. ii. 3: Astap. Apion, ii. 10, "by the sea-side" (1Mac. 15.11.25; 13 Ant. vii. 2), placed in the Onomasticon 9 miles (actually 8) N. of Caesarea. If, however, Asher was bounded by Carmel on S. (Jos.19.26), Dor would be N. of that mountain, called "Dor of Carmel," near the opening by which the Kishon enters the sea-plain. Esar-haddon (about 670 B.C.) gave Dor to Tyre. [C.R.C.]

Dora (1Mac.15.11,13.25). [Dor.]
In the second degree of goodness, Columella raunghet Pigeons dung gathered out of done cotes. Others preferre the dung of Pigeons before any other" (xvii. 9). Robert Greene, in A *Quippe for an Upstart Courtier*, says to a tanner: "You have your Dooues dung, your Mare, your Ashenbarke and a thousand things more to bring on your Leather apace" (ante 1592). There is a marginal note in an early Bible (Oxford, 1679): "The Ebrews write that they burned it in the siege for lack of wood." This seems to be unnoticed by Harris and other reference-books. The identification still needs decision.

Dowry. [Marriage; Family] A Gk. silver coin, varying in weight on account of the use of different talents. The Jews must have been acquainted with 3 talents, the Ptolemiaca, the Phoenician, and the Attic. The drachmae of these talents weighed respectively, during the period of the Macca-

Bar, 535, 55, 58, and 66. [Dowry; Piece of Silver; Weights; Wages.]

*Dragon*. A.V., apparently following Vulg., renders as "dragon" two Heb. words *tán* and *tannin*, which appear distinct in meaning. The former is used, always in the pluf., in Job 30.29; Ps. 44.19; Is. 13.22, 34.13, 41.20; 55.5; Ps. 103.13; Jer. 51.37; Ezek. 32.2 (marg.); and Mi.1.8. It is applied to creatures inhabiting desert places, and frequently coupled with ostriches and wild beasts. It seems probably to have been a mammal, and may not improbably have been the jackal. [*Fox.*] *tannin* (cf. *tannin* in Ezek. 29.3) seems to refer in most cases to a large aquatic animal, and in some instances, the crocodile. [*Leviathan.*] In Gen.1.21 the word is used of the great sea-monsters. On the other hand, in Ex.7.9.10.12. Deut.32.33. Ps.91.13, it refers to land-serpents of a deadly kind. "Dragon" is applied metaphorically in Rev.12.3ff. to "the old serpent called the Devil, and Satan," these terms being compared with "serpents," as instanced by the symbolical meaning of the image rather than by reference to any existing creature. The reason of this scriptural symbol is to be sought not only in the union of power with craft and malignity, of which the serpent is the emblem, but in the record of the serpent's agency in the temptation (Gen.3). [R.I.-]

*Dragon Well* (Ne.2.13). The LXX. renders the Heb. אֶת הַתָּנָן, "spring of figs." It lay outside Jerusalem on W., where also Josephus places the Serpent's Pool (5 Wars lit. 2). No spring is known now on this side of the city. The Mamilla Pool may be meant. [C.R.C.]

*Dram*. [Doric.]

*Dreams*, the more or less coherent actions of the mind when the body is asleep, have always formed a fascinating study and problem. To the untutored savage all dreams are real, and all equally real. They are regarded as direct visions—manifestations from another sphere. Naturally these are classified under two headings—first, those dreams that come unsought, the ordinary dreams of the ordinary man; and secondly, what may be called "professional" dreams, the product of the skilled soothsayer or prophet who laid himself out to obtain an insight into futurity by this as well as by other means. That the divine will is sometimes made manifest to men by means of dreams is beyond question. Jacob's dream at Bethel (Gen.28.12), the revelation to Abimelech about Sarah (20.3), the appearances to St. Joseph (Mt.1.20, etc.), the noted absence of any special dream when Saul was abandoned of God (1Sam.28.8-16), the coupling of dreams and visions as marks of the Advent of the Messiah (Lk.2.28; Ac.2.17), are fairly conclusive testimony to any one who values the testimony of Holy Writ. Nor would it be reasonable to question the matter. If "our waking thoughts are our own, it is none the less true that at times they are consciously influenced both for good and evil by unseen powers outside of ourselves, and it is a priori probable that in a similar fashion our sleeping thoughts may be similarly influenced. Naturally, it is also probable that as a people becomes more civilized and therefore more reflective, so the power of dreams as a channel of revelation will become less frequent; for as men learn to find out the will of God through His laws, there is less need of an extraordinary manifestation of that will. The difference between the religious and the superstitious aspects of this subject is very marked. In some cases, the dream and dream when man sleeps, exactly as between thought and thought when he wakes, recognizing in each case a possibility of divine intervention, but always chary of claiming that intervention in any specific case without the amnestest proof. Superstition, on the other hand, always wildly crying out, not for the revelation of God, but for omens and portents, sees in every strange occurrence that which it wishes to see, and finds in every dream an omen sent by it knows not Whom, to declare it knows not what. "Its object is not to know the will of God but to forecast the future, and so to guide us. For" as religious nor scientific—not religious, for it makes no attempt humbly to approach the Throne of Grace; and not scientific, because for the patient study of the laws by which God governs the universe it substitutes a system of jumping to conclusions" (Hastings, *D.B.*, 5 vols. 1904). Like superstition people to-day, the heathen of old had regular codes for the interpretation of dreams. But every time the manner of interpretation is alluded to in Holy Scripture there is a distinct disavowal of any method except divine guidance (see Gen.40.8.41.16; Dan.2.28, etc.). [F.J.]

Dress. 1. Materials. The earliest and simplest robe was made out of the leaves of the fig-tree, sewn together so as to form an apron (חָגוֹרָה; Gen.3.7). Later on skins of animals (כָּּהָָנָּהָָה) supplied a more durable material (3.21). Skins were not wholly disused at later periods; the "mantle" worn by Elijah appears to have been the skin of a sheep or some other animal with the wool left on. It was characteristic of a prophet's office from its main appearance (Zech.13.4; cf. Mt.7.15). Pelisses of sheep-skin still form an ordinary winter dress in the East. The art of weaving hair was known to the Hebrews at an early period (Ex.28.35.6); the sackcloth...
used by mourners was of this material. John the Baptist’s robe was of camel’s hair (Mt.3.4). Wool (sêmer) was introduced at a very early period, the flocks of the pastoral families being kept partly for their wool (Gen.35.12); it was at all times largely employed, particularly for the outer garments (Lev.13.44; Deut.22.11; 2 K.3.4; Ezek.27.7, 34.3, etc.). Probably the acquaintance of the Hebrews with linen dates from the period of the Captivity in Egypt, when they were instructed in the manufacture (1 Chr.4.21). After their return to Palestine we have frequent notices of linen. Silk was not introduced until a later period (Ezek.16.10, 13; Rev.18.12). The use of mixed material, such as wool and flax, was forbidden (Lev.19.19; Deut.22.11),—II. Colour and Decoration. The prevailing colour was the natural white of the materials, sometimes brought to a high state of brilliancy by the art of the fuller ( Mk.9.3). It is uncertain when the art of dyeing became known to the Hebrews; the dress worn by Joseph (Gen.37.2.23) is variously taken to be either a “coat of divers colours,” or with bright-coloured patches, as still worn. The notice of scarlet thread (38.23) implies early acquaintance with dyeing. Not only the Egyptians but also the Babylonians had carried the art of weaving and embroidery to a high state of perfection, and the Hebrews knew of various methods of producing decorated stuffs. The elements of ornamentation were: (1) weaving with threads previously dyed (Ex.35.25); (2) the introduction of gold thread or wire (Ex.28.6ff.); (3) the addition of figures. [Handicrafts, (6.)] Robes decorated with gold (Ps.45.13) and, at a later period, with silver thread (cf. Ac.12.21) were worn by royal personages; other kinds of embroidered robes were worn by the wealthy both of Tyre (Ezek.16.13) and Palestine (Judg.5.30; Ps.45.14). The art does not appear to have been maintained among the Hebrews; the Babylonians and other Eastern nations (Jos.7.21; Ezek.27.24), as well as the Egyptians (Ezek.27.7), excelled in it. Dyed robes were imported from foreign countries (Zeph.1.8), particularly from Phoenicia, and were not much used on account of their expensiveness; purple (Pr.31.22; Lu.16.19) and scarlet (2 Sam.1.24) were occasionally worn by the wealthy. The surrounding nations were more lavish in their use of them; the wealthy Tyrians (Ezek.27.7), the Midianitish kings (Judg.5.26), the Assyrian nobles (Ezk.23.6), and Persian officers (Esth.8.15) are all represented in purple.—III. The Names, Forms, and Mode of Wearing the Robes. The general characteristics of Oriental dress have preserved a remarkable uniformity in all ages. The modern Arab dresses much as the ancient Hebrew did; there are the same flowing robes, the same distinction between the outer and inner garments (the former heavy and warm, the latter light, adapted to the rapid and excessive changes of temperature in those countries), and the same distinction between the costume of the rich and the poor, consisting in the former of richer textures, more vivid colours, and more ample dimensions. The costume of the men and women was very similar; there was sufficient difference, however, to mark the sex, and it was strictly forbidden to a woman to wear the appendages, such as the staff, signet-ring, and other ornaments (or, according to Josephus, the weapons) of a man, or for a man to wear the outer robe of a woman (Deut.22.5). We shall first describe the robes common to the two sexes, and then those peculiar to women. (1) The kuttâneth was the most essential article of dress. It was a long, loose gown, of linen or wool, with long sleeves, unfortunately translated “coat” in A.V. It was girt by a girdle, and the fold formed by the overlapping of the garment served as an inner pocket. The annexed drawing (fig. 1) represents the simplest style of Oriental dress, a kuttâneth without a girdle, usually reaching to the ankle. (2) The sâdkin appears to have been a wrapper of fine linen (Judg.14.12; Pr.31.24; Is.3.22; cf. Mk.14.51). (3) The mîl was an upper or second garment, shorter than the first. As an article of ordinary dress it was worn by kings (1 Sam.24.4), prophets (2 Sam.28.14), nobles (Job 1.20), and youths (1 Sam.2.19). The term may, however, be used in these passages for any robe worn over the kuttâneth. [MANTLE.] Where two garments are mentioned (Luk.3.11) as being worn at the same time, the second might be a mîl; the prosperous wore two (ivrâwâl), but the practice was forbidden to the disciples (Mt.10.10; Luk.9.3). The dress of the middle and upper classes in modern Palestine illustrates the customs of the Hebrews. (4) The ordinary outer garment (âbdâyâh in Arab.) is a square cloak with arm-holes. The size and
DRESS

varies with the means of the wearer. The Heb. terms referring to it are: simlah, sometimes put for clothes generally (Gen. 25.2, 37.34; Ex. 3.22, 22.9; Deut. 10.18; Is. 63.1); keša, where covering or protection is the prominent idea (Ex. 22.26; Job 26.8, 31.10); and lastly, Phósh, usual in poetry, but specially applied to a warrior's cloak (2 Sam. 20.8), priests' vestments (Z K. 10.22), and royal apparel (Esth. 6.11, 8.15). Another term, madik, is specifically applied to a long or "spreading" cloak (Judg. 3.16; 2 Sam. 20.8), and to the priest's coat (Lev. 6.10). The beghedh might be worn in various ways, either wrapped round the body, or worn over the shoulders, with the ends or "skirts" hanging down in front; or thrown over the head, so as to conceal the face (2 Sam. 15.30; Esth. 6.12). The borders of garments were finished with a fringe and bound with a purple ribbon (Num. 15.38). The dress of women differed from that of men only as to the outer garment, the kultoneh a kind of cloak (Ru. 3.15; Is. 3.22); (2) ma'atáphah (mantle, E.V.), another kind of cloak (Is. 3.22); (3) aníph (hood, A.V.), applied apparently the head Veil hanging down behind the heels. [HEAD-DRESS.] (4) rādkih (veil, A.V.), the face veil (Is. 3.22; Can. 5.7), otherwise called rāph (Gen. 24.65, 38.14.19) or gamin (so R.V.; A.V. locks; Can. 4.16.7; Is. 47.2); (5) pthigil (stomacher, E.V.), a term of doubtful origin, but probably a waist-shawl (Is. 3.24). The garments of females were terminated by an ample train (so R.V.; skirts, A.V.), which concealed the feet (Is. 47.2; Je. 13.22). Figs. 2 and 3 illustrate some of the peculiarities of female dress; the former is an Egyptian woman (in her walking dress); the latter represents a dress, probably of great antiquity, still worn by the peasants in Palestine. We add a few remarks as to equivalent terms in English. kultoneh answers in many respects to "shirt." In sacerdotal dress "alb" exactly meets it. m'lt may perhaps be best rendered "gown." In the sacerdotal dress a more technical term might be used: "vestment," in its specific sense (= the chasuble, or casula), would represent it very aptly. sākbin = "linen wrapper." simlah we would render "garment," and in the plural, "clothes," as the broadest term of the kind; beghedh "vestment," as being of superior quality; Phósh "robe," as still superior; madik "cloak," as being long; and malíbush "dress," in the specific sense of fine dress. In female costume mit-pákath might be rendered "cloak," ma'atáphah "mantle," pthigil "cummerbund." The dresses of foreign nations are occasionally referred to in the Bible; that of the

Fig. 2.—EGYPTIAN WOMAN.

being worn equally by both sexes (Can. 5.3). The names of the distinctive robes of women were: (1) mít-pákath (veil, wimple, A.V.),

Fig. 3.—PALESTINE FELLAH.

DRESS 221
PERSIANS is described in Dan.3:21 in terms which have been variously understood, but which may be identified as follows: (1) the sarbālin (A.V. coats) = drawers, which were the distinctive feature in the Persian as compared with the Heb. dress; (2) the pattiš (A.V. hosen) = inner tunic; (3) the karbīš (A.V. hali) = upper tunic, corresponding to the χαλί of the Hebrews; (4) the ṭbhāsh (A.V. garment) = cloak, perhaps worn, like the beghedh, over all, though the modern Arab. ḫib is a very common word, signifying "dress" generally. In addition to these, a robe of state of fine linen, takbrīkh, is so called from its ample dimensions (Esth.8:15). References to Gk. or Rom. dress are few: the χαλκός (2 Mac.12:35; Mt.27:28) was either the paludamentum, the military scarf of the Roman soldiery, or the Gk. chlamys itself, which was introduced under the Emperors: it was especially worn by officers. The travelling-cloak referred to by St. Paul (2 Tim.4:13) is generally identified with the Rom. paenula, of which it may be a corruption. [CLOAK.] It is, however, otherwise explained as a travelling-case for carrying clothes or books.—IV. Special Usages relating to Dress.

The length of the dress rendered it inconvenient for active exercise; hence the outer garments were either left in the working close by (Mt.24:18) or thrown off when the occasion arose (Mk.10:50; Jn.13:4; Ac.7:58); in the case of a person travelling, the under garment was girded up (1 K.18:46; 2 K.4:29,9:1; 2 Pe.1:13) by passing it between the legs and through the girdle in front (see illustration to a figure, in Art. GOWN): on entering a house the upper garment was probably laid aside and resumed on going out (Ac.12:8). In a sitting posture the garments concealed the feet: this was held to be an act of reverence (Is.6:2). The number of suits possessed by Hebrews was considerable; a single suit consisted of an under and upper garment. The presentation of a robe in many instances amounted to installation or investiture (Gen.41:42; Esth.8:15; Is.22:21); on the other hand, taking it away amounted to dismissal from office (2 Mac.4:38). The production of the best robe was a mark of special honour (Lu.16:22). The number of robes received was kept in store for presents was very large, and formed one of the main elements of wealth in the East (Job 27:16; Mt.6:19; Jas.5:2), so that to have clothing = to be wealthy and powerful (Is.3:6,7). On grand occasions the entertainer provided becoming robes for his guests. The business of making clothes was devolved upon women (Pr.31:22; Ac.9:39); little art was required in what we may term the tailoring department; the garments came forth for the most part ready made from the loom, so that the weaver supplanted the tailor. [SANDAL.] Drink, Strong. The Heb. šēḵhareh, in its etymological sense, applies to any intoxicating beverage: it may refer from Cañ.8:2 that the Hebrews were in the habit of expressing the juice of other fruits besides the grape to make wine; the pomegranate, there noticed, being probably one out of many fruits so used. From Jerome and other sources of information we find that the following beverages were known in later times among the Jews. Beer, largely consumed in Egypt under the name of zyhnus, and thence introduced into Palestine. It was made of barley; certain herbs, such as lupin and skirrett, were used as substitutes for hops. (2) Cider, noticed in the Mishna as apple-wine. (3) Honey-wine, of which there were two sorts—one consisting of a mixture of wine, honey, and pepper; the other a decoction of the juice of the grape, termed ḏbhḥash (honey) by the Hebrews and ḏibhs by the modern Syrians. (4) Date-wine, which was also manufactured in Egypt, was made by mashing the fruit in water in certain proportions (cf. Mishna, Triumph xi 2; Sabbath xx. 2). (5) Various other fruits and vegetables are enumerated by Pliny as supplying materials for factitious or home-made wine, such as figs, millet, the carob fruit, etc. It is not improbable that the Hebrews applied raisins to this purpose in the simple manner of the Arabians—viz., by putting them in jars of water and burying them in the ground until fermentation takes place. The use of strong drink was forbidden to the priests (Lev.11:9) and to these under the Nazirate vow (Num.6:3; cf. Lu.1:15), and even to the mother who was bearing a child destined to be a Nazirate.

**Fig. 4.—A JEDAWL.** W.D.A.

**Dromedary**

(Judg. 13.4; cf. 1Sam.1.15), and its evil effects are especially set forth in Pr. 20.1, 31.4, 5, and Is. 5.11, 22-24, 28, 27.

Dromedary, the translation in A.V. of the Heb. bikkher or bikhri, rekhes and remakh. As to the former terms, see Camel. rekhes is interpreted in our version by "dromedaries" (I K. 4.28), "mules" (Esth. 8.10, 14), and "swift beasts" (Mi. 1.13); but there seems no doubt that it denotes a superior kind of horse.

Drusilla, youngest daughter of Herod Agrippa I., and wife of Aziz, king of Eunea. Like both her sisters Bernice and Mariamne, she left her first husband; seduced to do so by Felix, who married her. Her career gives point to the mention of her presence when St. Peter, reasoned before king of righteousness, self-control, and judgment to come (Ac. 24.24, 25).

Duke. The Heb. word so translated in A.V. means simply "chieftain," and is applied to the tribal leaders of Edom (Gen. 36.15ff.) and of Judah (Zech. 12.5; A.V. governors, R.V. chieftains, v.o.1).

Dulcimer (Heb. sumphonya), a musical instrument mentioned in Dan. 3.5, 15. Rabbi Saadia Gaon describes the sumphonya as the bag-pipe, an opinion adopted by the majority of Biblical critics. The same instrument is still in use amongst peasants in the N.W. of Asia and in S. Europe, where it is known by the similar names, sampogna or zampogna. With regard to three of the musical terms used in Dan. 3 and represented by "harp," "psaltery," "dulcimer," it has been contended that they are Gk. in origin and that the last of them is at the most only as old as Polybius. But it is extremely difficult to argue simply from the non-occurrence of a word in earlier surviving Gk. literature; and as more becomes known of the ancient trade-routes it seems more and more certain that there was an interchange of musical instruments and their names, as of other things, between E. and W. More than one Gk. musical instrument, at any rate, has an Eastern origin for its name. See also Semitic Languages.

Dumah. —1. A son of Ishmael (Gen. 25.14; 1Chr. 1.30).—2. The town in the N.W. part of Arabia called Dumai-el-Jendel is no doubt the Dumah of Isaiah (21.11), and signifies "the stony stoniness."—3. A city in the mountains near Hebron (Jos. 15.52). Now ed Dömeh, a ruin 10 miles S.W. of Hebron.

Dung, was, and is, used in the East not only as manure, but also as fuel. The manure was mixed with straw (Is. 25.10), or was the sweepings (Is. 5.25 marg.; cf. R.V.) of roads, which were collected in heaps outside the walls of towns at fixed spots (hence the Dung Gate at Jerusalem, Ne. 2.13) in readiness for use on the fields. The manure was applied to trees by digging about their roots and inserting it (Lu. 13.8). In the case of sacrifices the dung was burnt outside the camp (Ex. 29.14; Lev. 4.11, 8.17; Num. 19.5) being the equivalent of the burnt offering (Lev. 1.3). Particular care was taken in the law to enforce cleanliness with regard to human ordure (Deut. 23.12ff.): the worst threat that could be used against a house was that it should become a "draught house" (2K. 10.27) or a "dung-hill" (Esth. 8.10; Dan. 2.5.3, 29). Public establishments of that nature are still found in the large towns of the East. The difficulty of procuring fuel in Syria, Arabia, and Egypt has made dried cow's and camel's dung a valuable substitute; it produces an equitable heat, and is used for heating ovens and for baking cakes (Ezk. 4.12, 15). In Ph. 3.8, oskólyma is refuse of any kind; cf. Eccl. 27.4.

**Dung.** [Prison.]

Dura', the plain where Nebuchadnezzar set up the golden image (Dan. 3.1), has been sometimes identified with a tract a little below Tekrit, on the left bank of the Tigris, where the name Dur is still found. Prof. Oppert placed Dura to the S.E. of Babylon, in the vicinity of the mound Dowair or Duaer. Possibly it is connected with the Semitic-Babylonian daru, "fortification," i.e. one of the great walls defending the city. The position of the town called Daur is unknown.

**Dust.** [Mourning.]

Dyeing. [Handicrafts, 8.]

---

**Eagle** (Heb. nesher). The Heb. nesher (lit. to tear or rip open with the beak) = Arab. nisr, which is the designation of both the eagle and the griffon-vulture (Gyp? fulvus); but there is little doubt that in most of the numerous passages where "eagle" occurs in A.V. the vulture is intended. Confirmation of this is afforded by Mi. 1.16, where "enlarge thy baldness as the eagle [nesher]" can scarcely refer to aught else than the bare head and neck of the griffon-vulture. There is, however, a possibility that in some cases the word may be used in a wider sense to denote eagles also; although the fact of the existence of several distinct Heb. words for diurnal birds of prey is somewhat against this view. [Gier-eagle; Ospray; Ossifrage.] Griffon-vultures, of which several species, or perhaps races, are recognized, have a wide range in the warmer parts of the Old World, and are abundant in Palestine, where their large size and soaring flight make them conspicuous objects. They would accordingly be sure to attract the attention of even primitive people. Nisroch of the Assy. sculptures, alluded to in 2K. 19.37 and Is. 37.38, is the deification of nisr. [Semitic Languages.] In Mt. 24.28 and Lu. 17.37 "vultures" would be a better rendering of aeró than is "eagles," for although some of the smaller eagles found in Palestine, such as the short-toed eagle (Circæetus cinereus), feed largely on carrion, these would certainly form but a small minority of any assemblage of birds of prey gathered round a carcass. [R.L.]

**Eanes** (1Esdr. 9.21), a name which stands in the place of the sons of Harim, Masaiah, and Eliah, in the parallel list of Ezr. 10.21.

**Earing** (Gen. 45.6; Ex. 34.27; Deut. 21.4; 1Sam. 8.12; Is. 30.24; cf. Ezk. 36.34). The Heb. words signify to "work" ("abbahd) and "plough"
(hārash), the former elsewhere rendered "to till." The English of A.V. (see Skeat, Etymol. Dict. s.v. Ear [3]) is the old English erek, "to plough," as used by Chaucer, and in Piers Ploughman. [c.r.c.]

**Earnest** (2Cor.1.22,5,5; Eph.1.14). The Gk. ἐράντιον = Heb. 'erábon, a word which was introduced into the Phoenicians into Greece, and also into Italy, where it reappeared as arrabo and arrha. It may again be traced in the French arrhes, and in the old Eng. Earl's or Arle's money. The Heb. word was used generally for pledge (Gen.38.17), and in its cognate forms for surety (Pr.17.18) and hostage (2K.14.14). The Gk. derivative, however, acquired a more technical sense, as the part-payment of a contract to be hereafter fully carried out.

**Earrings.** The word nezen, by which these ornaments are usually described, originally referred to the nose-ridge (from מָצָּד, "to bore"), and was thence transferred to the ear-ridge, which was worn as a form circular. They were worn by women and by the young of both sexes (Ex.32.2). It has been inferred, but without certain justification, from this passage and from Judg.8.24, that they were not worn by men. The earring appears to have been regarded with superstition as an amulet (Is.3.20,15). For this reason they were surrendered with the idols by Jacob's household (Gen.35.4). Chardin described earrings, with talismanic figures and characters on them, as still existing in the East. Jewels were sometimes attached to the rings. The earrings still worn in Eastern countries are often very large; hence they formed a handsome present (Job42.11), or offering for the service of God (Num.31.50).

**Earthware.** [Handicrafts, (4.)]

**Earthquake.** Earthquakes, more or less violent, are of frequent occurrence in Palestine, and numerous traces of seismic action are found in the land. The valley of the Jordan marks the course of an ancient fracture in the earth's crust, and volcanic lavas are found in several directions. The instances recorded in the Bible are, however, but few. Of these the most remarkable occurred in the reign of Uzziah (Am.1.1; Zech.14.5). The prophecy of Jeremiah, which connects with the sacrilege and consequent punishment of that monarch (2Chr.26.16ff.), the phenomenon, as described by Josephus, bears a strong resemblance to that foretold by Zechariah, and possibly the earlier event may have suggested the imagery of the prophet. An earthquake occurred at the time of our Saviour's death (Mt.27.51-54) which had the effect of opening the graves and constituted one of the most terrifying accompaniments of that sublime event. Earthquakes are not unfrequently accompanied by fissures of the earth's surface, and such an occurrence may have rent the rocks and opened the sepulchres in the valley of the Kidron. The destruction of Korah and his company (Num.16.32) would seem to be due to the same cause, and may be paralleled by a similar occurrence in Italy, 1783 A.D., when the surface of Calabria was devastated, and chasms, opening in the ground, swallowed up many people. [A.A.B.]

**East.** In Heb. represented by two words. (1) qedem, "in front," the usual Oriental description of that direction: W. being "behind," N. "to left," and S. "to right" (see Job23.8,9). [KEDEM; BENE-KEDEM.]

(2) mitzirah, "the rising of the sun" (Jos.11.3, etc.), especially as contrasted with the W. or "sea." This word is used "273 times, while the word qedem occurs 25 times in O.T. [c.r.c.]

**Easter** (Ac.12.4). This rendering of τὸ πάσχα is retained only here in A.V. from older versions; R.V. renders it correctly "the Passover." [Passover.]

**Eastern Sea.** [SALT SEA; SEA.]

**Ebal.** One of the sons of Shem. The son of Seir (Gen.36.33; 1Chr.1.40). —2. Obal the son of Joktan (1Chr.1.22; cf. Gen.10.28).

**Ebal, Mount.** The "bare" mountain, N. of Shechem (Deut.11.29,27,4,13). On it were placed stones covered with plaster, on which the law was written. The Samaritans read Gerizim for Ebal, and believe that this is the true Mount. The summit is 3,077 ft. above sea-level, 1,400 above Shechem; it is thus 227 ft. higher than Gerizim, and is very rocky and barren (Surv. W. Pal. ii. p. 147). [c.r.c.]

**Ebed.—1.** (Many Mss., and the Syr. and Arab. versions, have Eber), father of Gaal (Judg.9.26,28,30,31,45). —2. Ebed-Melech (אַבְדָּם אלְמֶלֶךְ), an Ethiopian eunuch of king Zedekiah, who secured Jeremiah's release from prison (Je.38.7,39.16). The name, which means "king's servant," may have been derived from his official position, or = "servant of God." Gray (Heb. Names, 147) thinks that at this time the heathen deity Moloch would have been so familiar to the Hebrews that they would have ceased to use the similar title melek (king) of the God of Israel. He suggests that as the eunuch was an Ethiopian, he was able to suggest that countenance.

**Eben.**—1. In Gen.10 the nations known to Israel are traced back, each to a single ancestor, who bears the name of the nation and has sprung from one of the sons of Noah. [RACES.] In ver. 21 Eber represents the Hebrews, and appears here for the first time (Gen.11.14) as the great-grandson of Shem. This figurative method of genealogy, which is found also in other nations, is a natural expression of the patriarchal stage of social progress. This same etymological ancestor appears again as a poetic synonym for the Hebrews in Num.24.1.—2. The name appears in the Chronicle's genealogies, once in the Gadite tables (1Chr.5.13, Heber) and twice in those of Benjamin (1Chr.8.12,22).—3. A priest in the days of Johakin (Ne.12.20). [J.C.V.O.]

**Ebla.saph.** [Heb., wsb'].

**Ebon-y (Heb. hōbə núm) occurs only in Ezk. 27:15, as one of the valuable commodities im-
ported into Tyre by the men of Dedan. The best kind of ebony is yielded by the Diospyros ebenum, a tree which grows in Ceylon and S. India; but many trees of the natural order Ebenaceae produce it. It is not known what tree yielded the Ethiopian ebony. Pliny says (xii. 4): "Herodotus [iii. 97, 114] assigneth it rather to Ethiopia; and saith, That every three yeares the Ethiopians were wont to pay by way of tribute unto the kings of Persia, 200 billets of the timber of that tree, together with gold and yvorie. . . . Ebene was a rich tribute, and deserved the third place, after Gold and Ivorie." Vergil (Georg. ii. 116) says that India alone yields black ebony ("it will not grow elsewhere," Pliny).

**Ebronah** (R.V. "Abronah"). a halting-place of the Israelites in the desert, immediately preceding Ezion-geber (Num.33,34,35).

**Ecanus** (R.V. "Ethanes"). one of the five swift scribes of Ezra (2Esd.14,24).

**Ecbatana** (Aram. "aynath"). Though many of the best commentators understand this word, in Ezr.6.2, as meaning "in a coffer," there is little doubt that it is a place-name, and that one of the two Ecbatanas is intended. In the Apoc. Ecbatana is frequently mentioned (Tob. 3,7,14,12,14; Jth.1,1,2; 2Mac.9,3, etc.). Two cities so named seem to have existed in ancient times—one the capital of Northern Media, the Media Atropatene of Strabo; the other the metropolis of the larger and more important province known as Media Magna. The site of the former appears to be marked by the very curious ruins at Takhti-i-Sulayman (lat. 36° 28', long. 47° 5'); while that of the latter is occupied by Hamadan, one of the most important cities of modern Persia. There is generally some difficulty in determining, when Ecbatana is mentioned, whether the northern or the southern metropolis is intended, as they lie sufficiently near to one another for geographical notices usually to suit either site. The northern city was the "seven-walled town" of Herodotus, who describes it as the capital of Cyrus (Herod. i. 98, 99, 153); and it was thus most probably there that the roll was found which proved to Darius that Cyrus had really made a decree allowing the Jews to rebuild their temple. The peculiar feature of the site of Takhti-i-Sulayman is a conical hill rising to about 150 ft. above the plain, and covered on its top and sides with massive ruins of the most antique and picturesque character. A perfect enceinte, formed of large blocks of squared stone, may be traced round the entire hill along its brow; within there is an oval enclosure varying from 800 yds. to 400 in diameter, strewn with ruins, which cluster round a remarkable lake. On three sides—S., W., and N.—the acclivity is sterile and the ridge of the plain uniform, but on E. it abuts upon a hilly tract of ground, and is here but slightly elevated above the adjacent country. The northern Ecbatana continued to be important down to the 13th cent. after Christ. By the Greeks and Romans it appears to have been known as Gaza, Gazzara, or the holy city, Gages, or treasure city, on account of the wealth laid up in it; and by the Orientalists as Shis. Its decay is referable to the Mogul conquests, c. 1200 A.D.; and its final ruin is supposed to date from c. 15th or 16th cent. In 2Mac. (9,3, etc.) the Ecbatana mentioned is undoubtedly the southern city, now represented both in name and site by Hamadan. Situated on the northern flank of the great mountain called formerly Orontes, and now Eiwend, it was perhaps as ancient as the other, and is far better known in history. It was the Median capital of Cyrus, and from the time of Darius Hystaspis remained the chief city of the Persian satrapy of Media, and the summer residence of the Persian kings. The Ecbatana of Tobit is thought by Sir H. Rawlinson to be the northern city, Takhti-i-Sulayman.

**Ecclesiastes, The Book of.** called in Heb. qôheleth, transliterated by LXX. ἐκκλησιαστής, or the Preacher, a translation adopted by Vulg. and very generally approved of by the best critics, although the exact sense of the Heb. is still disputed. The Heb. form is probably an intensive, and hence fem. Several names of the same formation occur in the later books—e.g. Ezr.2.57; Ne.7.57, 59. Fem. proper names of the same formation are likewise found—e.g. 1Chr.4.8,7.18. The word qôheleth is used as a fem. in Ec.7.27, but the reading there is probably erroneous. The book is much later than the period of Solomon, as is proved both by the language of the original, and by the contents of the work. The name Solomon was assumed simply as a literary device, and not as a pious fraud or forgery, and traditional Solomonic utterances may form some of the

---

**PLAN OF ECBATANA.**

bases of the work. But Solomon is spoken of in it in a manner which shows that when the book was written that monarch had long passed away. The name of such a man—marked out in the sacred writings as most renowned for wisdom—was most suitable to be employed as setting forth the principles of wisdom not only to his own age, but to the ages after him. The writer of the book of Wisdom followed the example set to him by his great predecessor. The latter work, which in its opening chapters might be described almost as an Anti-Ecclesiastes (see especially Wis.2), opposes the false and superficial interpretation placed upon the statements of Koheleth by the materialist free-thinkers among the Jewish students of Alexandriana, and puts in the mouth of Solomon, whose history is ably sketched by the later writer after the analogy of the earlier, sentiments of a very different character. It is true that, therefore, the book has been regarded in ancient times as the production of Solomon—and it has been suggested that it was written in the days of his penitence—it is impossible to uphold any such theory in the light of modern criticism. Even in ancient times there are not a few indications that, such comparisons are by no means unanimous on that subject. Many passages in the work contain what may be regarded as actual disavowals of Solomon's authorship, and the facts which the writer describes as the circumstances of the time in which he himself lived, point to a much later period. Many orthodox scholars of more modern times have therefore placed its authorship in the last century of the Persian period (440-336 B.C.). The portion which is written under the form of a Solomonic autobiography extends only to the end of ch. 2. It describes the vanity of all earthly things, and points out that there is no actual progress in the affairs of men—nothing really new—everything in human life being merely a repetition of that which has taken place already. Solomon is introduced as one who, though a king, had in his own lifetime discovered by personal experience the vanity of wisdom, pleasure, and riches; such being described as an evil of life. God has given this gift to men (1:13), and but vanity and a striving after wind. The writer argues that, although there was, no doubt, an advantage in wisdom, yet the wise man must at last die like the fool; and a wise king may have a successor who will turn his wisdom into foolishness. Cheerful enjoyment of life, with God as his guide, is the only thing fit to be striven for (2:24-25;3:12,13[4,15]); yet even that is vanity, as man cannot ensure it. We maintain, despite all that has been written to the contrary, that the word "eternity" (the rendering of the word in all other passages of O.T.) in 3.11 affords a far better sense than "the world," which is given in the text of A.V. and R.V., contrary to the judgment of the American revisers. Man, viewed as belonging only to this world, is short-sighted and powerless in the sight of Him Who is the arranger and disposer of all things and of all events that happen to man. Left to himself, he is like the brute that perishes; and God shall judge him at last, after He has duly tested him—for there is a time for every work there (3.17). For man, blind as he is with regard to that which shall be after him, there is nothing better than that he should rejoice in his works." Koheleth turns in ch. 4 to review that which hinders his cheerful enjoyment, such as man's oppression by his fellow man (4.1-3). Rivalry and useless toil prevent that enjoyment, and yet, in spite of all, this companionship is preferable to the life of a solitary worker (7-12). The striving after the wind is strikingly exemplified in the enthusiasm of the people for a new king (13-16), while "vanity," is seen in their worship of God, and in their delight in making vows which are not performed (5.2-7;5.17-5.6). The vanity of striving after riches is seen by what is done under despot rule (5.8,9[7,8]) by rulers who know not that the cultivation of the land is of the highest importance. But after all, riches are in themselves of little real advantage, and are collected together only to be scattered by others (6.10-20; 6.19-19); and this is what Koheleth marks, a kind of cheerful and contented life as the gift of God. In the next section the writer shows that man may have riches, and have no power of enjoying them; the desire after such is insatiable, and man has also in this life to deal with God, Who is stronger than he. God knows the future, and in his power he by no means does not what is good for him in life, or what shall happen after him (6.10-12). In 7.1-6 are set forth divers proverbs, which speak of things which man ought to prefer above others; and teach that patience and wisdom are the best preservatives in oppression and adversity. The wisdom of Solomon, in his judgment, is obtained of God for His own purposes. Man would do well therefore to rejoice in the day of prosperity, and in the day of adversity to consider why God has permitted even that. The section is closed by insisting upon the importance of the "middle mean," and the practical use of wisdom (7.1-24); and in speaking briefly but emphatically of "the wicked woman" by whose snares men are caught (7.25-29), the writer does not indulge in any tirade against the female sex, but describes in the strongest colours the ruin wrought in all ages by immorality. (The true wife, who is man's helper, is of the sons of Adam (5.18), and returns to his general theme, and urges again the benefit of wisdom in days of oppression, such as those in which he lived. This is the thought pervading ch. 8, in which he again refers to the fact that there is a God that judgeth the earth, and that it will ultimately be well for those that fear God. God's works man can not comprehend, and He apparently often permits the same fate to happen to all (8-9.2). In close connexion with this subject Koheleth glances at the state of the dead, as far as then revealed; again returning to the great practical conclusion of the importance of a contented and happy life, notwithstanding the fact that man knows not the time allotted to him, and that death falls upon him suddenly. The story of the poor wise man, and the wisdom by which he was able to save his little city from ruin— a parable based upon the historical fact recorded in 2Sam.20.15-22—is here suitably conducted as a proof of the power of wisdom, and of the ingratitude often displayed to benefactors (Ec.9.13-15). A few proverbs, loosely connected, are strung together.
in 10.1-11. The benefit to be derived from the talk of the wise is there pithily described, and the detriment that comes from the foolish talk of foolish men (10.12-15). But worse than all these is the misery caused to a land by a foolish king. Even, however, under such circumstances, prudence is urged; and the people ought not to provoke a foolish king by curses (10.16-20). In general, it is noted that there is real wisdom in beneficence. And, though the future belongs to God, man—while he can—ought to labour, and to enjoy himself in the sight of his Maker (11.1-8). Koheleth then breaks into a song briefly describing the days of life, which ought to be spent by man as ever mindful of the great judgment of God, and of his Creator, especially in the days of youth. We do not agree with those who interpret ch. 12 of the approach of old age. It compares rather the days of evil (or of death) to a sudden storm, which darkens the whole faces, nameless, and incomprehensible, like the trembling, the grinding-maids (see R.V. marg.) cease their work, and spreads dismay among the ladies at the lattices; singing women cannot enliven in such a case; fears above and fears beneath beset the path to the grave. After a mere earthly storm, nature reawakens, the almond-tree blossoms, and the locust comes forth; but for man there is no such awakening. In the storm he disappears; for the dust returns to the earth as it was, and the spirit to the God Who gave it (12). The epilogue (12.3-14) has been variously interpreted. Some regard it an addition to the work by a later writer, others as an integral portion of the Koheleth's whole work. The latter opinion is the most probable. The opinion in the Evangelist, Who leadeth His people like a flock. The end of the whole matter is, "Fear God, and keep His commandments." There is a day of God's judgment, though foolish man may not bear it in mind, and, because there is such, there is a fear of God. The sun shines, the light which will ultimately dispel the darkness which later revelation shows to have been in great measure removed by the coming of the Life and the Light of men. The literature on Ecclesiastes is very extensive. Jerome's commentary is still worthy of study. The days of the Reformation produced many commentators. Luther wrote on it (in 1532) a work of considerable size and of practical merit. See also Mercer (1573), Drusius (1653), M. Geier (1668), Schmidt (1691), Zirkel (1792). More critical were the works of Knobel (1836), Herzfeld (1839), Hellwig (1845) in Maurer's Comm., Vaihinger (1858), Hengstenberg (1859), Dietzsch (1875, grossly misrepresented in the English transl.). H. Graetz' (1871) very fanciful work was the basis of E. Renan's brilliant but utterly mistaken exposition (1882). Other works are those of Kleinert (1883), Seelig (1885), F. Buhl (1890), and Menzel (Der griechische Einfluss auf Prediger, 1890), who delight in such influence. Among English comm. of interest are: Th. Preston (1845), C. D. Ginsburg (1851), which contains the fullest description of the literature up to that date; Thos. Tyler (1874, much enlarged in 1899), E. H. Plumptre (1881), C. H. H. Wright (1883), Bradley (1887), and T. K. Cheyne (1887). Among the critical terms and monographs on Ecclesiastes of special importance may be noted Leimod'r, Die Prediger Sal. in hist. Beleuchtung, 1892; Euringer, Der Massatorhext der Kohel-krit. untersucht, 1890; Dr. E. Klostermann, Deliri Coheleth Vers. Alex., 1892; A. Dillmann, Uber die griech. Uebersetzung der Kohel., the two last-named being decisive against Graetz' theory—that the present text of the LXX. is that of Aquila—a theory which has been defended by Renan. [C.-H.-H.W.]

Ecclesiasticus is the title in the Latin versions of the book called in the LXX. "The Wisdom of Jesus the son of Sirach." An entirely independent work, it has passed an important and of interest of this remarkable book since the discovery of the fragments of the Heb. text by Mrs. Lewis in 1856 in St. Catherine's monastery at Sinai. At present, some 39 chapters out of 51 have been recovered from 4 different Heb. MSS., and many years must elapse before the fresh light thrown by their exploration and general classification be enjoyed. Apart from this discovery, Ecclesiasticus is, perhaps, the most important book in the Apocrypha. "It exhibits Jewish thought and religion at a period otherwise almost unknown." It is important as illustrating Judaism in its transition state between O.T. and N.T. It was part of several languages, especially the Greek and the Roman Churches place it in the canon. Whilst it was not received among the 24 books of the Heb. Bible, it had a prominent place in the Greek and Latin, in the former of which it is commonly grouped with the other poetic books (e.g. in Cod. C.) and the Cod. E., whilst the Greek and the Roman Churches place it in the canon. The order in the present edition of the Eng. Apoc. is due to the German translation of 1529 (Zurich). The name, Ecclesiasticus, the ordinary title since Cyprian, is doubtless derived, as Rufinus points out, from its frequent use by the early Church, especially in connection with the teaching of the Jews of Alexandria first, and then for the Christians, the favorite book of ecclesiastical edification, "the summary of all the virtues," as Eusebius first calls it. In Cod. B the title is "The Wisdom of Sirach"; in Cod. M., "The Wisdom of Jesus the son of Sirach." In the Heb. text we read at the end of "Hitherto have I written the words of Simeon ben Jeshua who is called ben Sira. The Wisdom of Simeon ben Jeshua, in such fashion as to the original title, therefore, is unsettled, and the newly discovered texts only add fresh difficulty to the earlier editions. The reading of the name according to Jeromine, its original title being "The wisdom of verbs," the text of criticism of the book
presents a deeply interesting problem, as may be seen from a cursory glance at R.V., where some 80 marginal notes are to be found; and there is evidence that some dislocation has taken place (probably a misplacement of leaves) in the copy from which all the Gk. MSS. hitherto known have been derived, though this does not account for the extraordinary divergences in the Gk. texts, which are carried still further in the ancient versions and patristic quotations. When the fragmentary Heb. text was discovered, it was naturally hoped that more definite light would be thrown upon the strange variations of the existing versions, but Margoliouth (followed by Bickell) declared, after careful examination of all the fragments that had come to light, that the Heb. was not the original, but a retranslating of the Gk. Later opinion, however, seems to modify this assertion, and leans rather to the theory that the Heb. preserves, to a larger degree than was thought at first, fragments of the original. Little is known of the author beyond what is told us in the preface of the book, which states that the Gk. translation was made by his grandson in Egypt "in the year 162." If, however, we identify Simon the high-priest (50.1-21), we shall then be drawing from his own recollection of Simon II., whose high-priesthood ended c. 199 B.C. Some scholars, however, prefer to identify the Euergetes mentioned with Ptolemy III. Euergetes (247-222), and the high-priest, in that case, with Simon I., the Just (310-290).—Contents. The book is a fine example of Jewish "wisdom literature," and consists of a collection of gnomic sayings, modelled, in all probability, upon the canonical book of Proverbs. It has been considered the chief exemplar of primitive Sadduceism, and, according to some laborators of the Heb. text, in which, after 50.12, there is an addition in the form of a hymn, praising the sons of Zadok, "O give thanks unto him that chose the sons of Zadok to be priests, for His mercy endureth for ever." The author speaks with respect of the religious literature of the past, and acknowledges himself to be but "a gleaner after the grape-gatherers." None the less, he thinks he has something to give to his readers of that wisdom which comes from God. In spite of his heterogeneous mixture of subjects, there lies at the back of them all the central thought of that which is true wisdom, viz. the placing of human conduct in its right relationship to God. The book may be roughly divided into two unequal halves: first, 1-13. 14—the Sayings of the Wise, introduced in ch. 1 by an eulogy on Wisdom, and closing with the praises of Nature (13.15-43.33); second (44-50.2), the praises of the Mighty Men, to which is given an epilogue (50.23-30) and a final Song of Praise (51). In the course of his writing the author discusses most varied questions in the realm of practical morality—e.g. friend-

ship, women, anger, servants, children. The Song of Nature is a very powerful composition, whilst the poem dealing with the roll of Israel's heroes is obviously imitated in Heb.11. The author's ethical and social teachings have remained popular, and in some of them he approaches very near those of the Gospel. The epistle of St. James also shows acquaintance with Ecclesiasticus, and there are other possible allusions in N.T. The early Christian writers made a very extensive use of the book. Ederheim in the Speaker's Commentary; Schechter Tyler, The Wisdom of Ben Sira; Nestle, in Hastings, B.D. (5 vols. 1904). [S.N.S.]

**Eclipse of the sun.** No historical notice of an eclipse occurs in the Bible, but there are passages in the prophets which have been supposed to allude to such phenomena (Am.8.9; Mi.3.6; Zech.14.6). Jl.2.10 and 3.15 can scarcely refer to an eclipse, since a striking feature of such an occurrence is the visibility of the stars during the total phase. [Locust.] The darkness that overspread the world at the Crucifixion cannot be attributed to an eclipse of the sun, as such events can only take place at new moon, and the moon was full at the time of the Nativity of Jesus," opposite" Israel and Canaan (W. Palestine). There are many rude dolmens and monuments on the spurs E. of Jordan. [C.R.C.]

**Edan, Tower of** (R.V. Eder; Gen.35.21). Jacob's first halting-place between Bethel and Hebron was "beyond the tower Eder." According to Jerome it was 1,000 paces from Bethel. It stands perhaps for Bethelhem itself in Mi.4.8 (A.V. tower of the flock; see R.V. marg.).

**Edd'las** (Esd.9.26) = Jezziah.

**Eden,** a Gershonite Levite, son of Joah, in the days of Hezekiah (2Chr.29.12-31.15).

**Eden,** a name given to an ancient river which was the first abode of man. According to Gen.2.8-14, this garden was planted "in Eden eastward," and a river went forth from Eden to water it, and thence divided and became four heads." The first was Pison, "which compasseth the whole land of Havilah," a place producing good gold, bdellium, and onyx stone (shōham). The second river was Gihon, "which compasseth the whole land of Cush." The third was Hiddekel (the Tigris), which floweth before Assyria." The fourth river is simply described as the Euphrates (prath). The identity of the last two has never been disputed, and the difficulty was to find a waterway into which flow four streams, two of them being these well-known rivers. The theories are too numerous to give details of all, even if to do so could be regarded as serviceable. Philo the Jew (born c. 20 B.C.) was the first who ventured upon an interpretation: Paradise darkly shadows forth the governing faculty of the soul; the tree of life signifies religion, the immortalizer: the four rivers are the virtues of prudence, temperance,
courage, and justice, the main stream being the generic virtue, goodness, which goes forth from Eden, the wisdom of God. One of the Heb. traditions enumerated by Jerome makes Paradise to have been created before the world, and therefore beyond its limits. To all appearance, however, the writer of the account in Genesis intended to describe a place which existed, or which he believed to exist. Josephus thought that the ocean-stream believed to surround the earth was the source from which the four rivers flowed; whilst according to others it was the Shatt al-'Arab, which, however, is of too late formation to be taken into consideration. Those who place Eden in the highlands of Armenia see in the river from which the four streams diverge “a collection of springs,” or a well-watered district. Others explain it as the Caspian Sea. Josephus, Eusebius, and many others identified the Pison with the Ganges, and the Gihon with the Nile. The evidence that the Pison and the Nile Before that identification was revived by Ewald and adopted by Kalisch; Rashi suggested the Nile, and Philostorgius the Hydaspe; the advocates of the Armenian position of Eden identify it with the Phasis. Col. Chesney identified the Halsys and the Araxes with the Pison and the Gihon, and the country within the former was the Havilah, “that which borders on the latter being the still more remarkable country of Cush.” According to Gofius, Jihûn is the name given to the Ouxis, which has therefore been assumed to be the Gihon by Rosenmüller, Hartmann, and Michaelis. Rashi, Ramban, and Aben Ezra believed that the Persians, Jihûn ar-Râs, and has therefore likewise been identified with it by Reland, Calmet, and Col. Chesney. Probably, however, the latest theory of Assyriologists is the most satisfactory. The river which became four heads is the Persian Gulf, which is called variously Arâhitu, Arâbitu, and Arâhitu, in the inscriptions. As the Shatt al-'Arab did not anciently exist, the Tigris and the Euphrates flowed immediately into it. Eden was thus the land of Babylonia itself, the plain of which was called edina, Semitic edînu, by the ancient inhabitants. Indeed, one of the names of the ancient city of ancient Abraham and the country of the Sippur-edina. The Pison and the Gihon were identified by Sir Henry Rawlinson with the Ukhûn and the Survapu, (or canals) mentioned by Tiglath-pileser III. in connexion with the Tigris and the Euphrates in S. Babylonia. Later, however, he identified the Pison with the Arâhitu, and the Gihon with the modern Jûkha, which runs from the Euphrates W. towards Abu-Shahrein. Fried. Delitzsch also identified the Gihon with the Arâhitu (Gu-kânû), but he thought the Pison to be the Pallukatu, the Pallacopas of classical geography. The Arâhitu, however, is now identified with a canal in the city of Babylon. These two rivers must therefore be regarded as still uncertain. As to the position of the garden, though uncertain likewise, something may nevertheless be said. The Babylonians apparently regarded it as identical with Êridu, “the good city,” now Abu-Shahrein, originally near the mouth of the Euphrates. In this city a sacred plant was supposed to grow, probably a kind of vine, in appearance like the sacred lapis-lazuli. In the sacred house, which was like a forest, its shadow extended, and no man entered within it—it was the sun-god Tammuz who dwelt there, between the mouths of the rivers (the Tigris and the Euphrates are apparently intended) which are on both sides. The ideograph for this city, when turned the right way, shows a central stem with branches, suggesting a tree or vine. Whether it is this tree which is represented on the Babylonian cylinder-seals and the bas-reliefs of Assyria is uncertain, but not unlikely—indeed, one of the cylinder-subjects shows the tree (a date-palm), with figures apparently about to pluck the fruit, and a serpent behind one of them (see our illustration under Fall). The Babylonian “Garden of Eden,” therefore, if not “eastward,” was at least south-eastward in Eden. For the rest, the land of Havilah which the Shatt al-'Arab was taken as the “sandy” portion of N. Arabia, extending towards the Egyptian frontier (cf. Gen.10.29; 25.18; Sam.15.7). The “bideldom” (bbâdhâlâh) produced there is probably the budulûh of the Assyro-Babylonian lists of edible plants, and the shûhâm-stone seems to be the Assyrian šamdûtu, which reference to the desert E. of Egypt. Prof. Sayce suggests that the Gihon may be the Kerkha, which rises E. of the Tigris in the mountains of Luristan, the home of the Kossaeans (Assy. Kâsî), whose name may be connected with that of Cush. Both the Kerkha and the Kurun are considered as the ancient origin of the Babylonian exercise-tablet, Parâdisu or Paradise appears as the name of a country. This word was possibly borrowed from the Persian, and is preceded by Maganu, probably Magan or E. Arabia (Havilah), and followed by Bit-nâpûnu. See Delitzsch, Wo lag das Paradies? and Sayce in Hastings, D.B. (vol. I. 1898.)

**Eden.**—1. One of the marts which supplied Tyre with richly embroidered stuffs (Ezk. 27.23). It is associated with Haran, Sheba, Asshur, etc. In 2 K. 20.12 and Is. 37.12 “the sons of Eden who were in Telassar” are mentioned as being with Gozan, Haran, and Reseph as victims of Assyrian greed of conquest. This Telassar is possibly the Til-Asûru mentioned by Esar-haddon, which is regarded as having been situated in Upper Mesopotamia. This would support the identification of Eden with the Assyrian Bit-Adini, an Aramean state about 200 miles N.N.E. of Damascus. Michaelis suggested the modern Arad, as Eden of Ezekiel; an identification lately revived by Margoliouth.—2. Beth-eden, “house of Eden” (Am. 1.5), was probably a country residence of the kings of Damascus. Ewald identified it with the Paradise of Strabo. Michaelis suggested Eden, 20 miles N.W. of Ma'albeke; and Driver favours this same site as the Bit-Adini, quoted above. Others, including Farrar, have suggested Beit-al-Janna, “the house of Paradise,” S.W. of Damascus, on the E. slope of Hermon, not far from Meidet.

**E'den.**—1. (Jos. 15.21.) A city of Judah probably on the border of Edom. Henderson
suggests the ruin 'A'dār, 5 miles S. of Gaza, but this is near the sea, not near Edom.—2. A Merarite Levite in the time of David (1 Chr. 23.23, 24.30).

EDES (Ezr. 9.35) = JADAU.

Ed na, the wife of Raguel (Tob. 7.2, etc.).

Edom (red). Edomitess, Idumea. Esau asked Jacob to give him "the red, the red" (Gen. 30.30), and received first the red pottage, and afterwards the red land of Edom, so called probably from the red sandstone mountains of mount Seir ("rough mountain"); thus he became "father of the Edomites" (Gen. 36.9, 43), and he is himself called Edom (vv. 8, 19). Edom is the mountain plateau S. of Moab and E. of the broad Arabah Valley, stretching from the Zered stream (Wādy el Hesy) near the Dead Sea to the gulf of 'Agaba at Eloth (1 K. 9.26), 100 miles N. and S., and about 20 miles from mount Hor (Num. 20.23) eastwards to the desert. The plateau is called the "field" or "pasture" (ṣādā) of Edom (Gen. 32.3; Judg. 5.4). It rises to 5,300 ft. above sea-level E. of Petra, and slopes gently E. to the desert (midḥabār), while on W. steep ridges, with cloven gorges, fall towards the Arabah. The road from the Sea to Eloth, N. to the Dead Sea, from a watershed (S. of Petra) where the level is about 600 ft. above the Red Sea. The rugged mountains, including Hor (4,580 ft.) and the granite peaks in the S. (4,200 ft.), originate the later name (Gebalitis, 2 Ant. i. 2; 3 Ant. ii. 1), still given to the monuments round Edom. On the underlying granite and porphyry rise cliffs of red and yellow sandstone surmounted by hard limestone, while soft yellowish limestone forms the plateau above. The rain sinks through this to pour down the gorges of hard stone in such brooks as Zered. The plateau is bare, with scattered bushes of broom and hibiscus, and grass in spring; but remains of an oak forest occur on it near Petra; and in places where there is water—as at Tophel, Ma'on, and Petra—the olive, fig, pomegranate, and vine are still grown. The mountains are covered with snow in winter (see Job 6.16, Uz being in Eloth). The name Petra (rock) was given to the half-way N. and S. on the W. border. (Selā.) It is identified by Josephus (4 Ant. iv. 7, vii. 1) with Kadesh-barnea, which was on the border (Num. 20.16), and with Reem (many coloured), a name taken from the remarkable colouring of the sandstone. The Targum of Onkelos agrees, and Re'em-de-gaya (of the ravine) is the present el Ḥi. Other places in Edom include 'Im (ʿAimeḥ), Topheh (Ṭāṭlēk), Bōzrah (Būsēı̂ch) towards the N., and Ma'on (M'ain) S.E. of Petra, with Elath (Aīlāh) on the Red Sea shore. In the 4th cent. B.C. the increased power of the Edomites caused the name Edom to be extended over the desert to the W.; and about 168 B.C. Idumea reached W. even to Adoraim and Māresha (13 Ant. ix. 1) and N. to Hebron, Beth-zur being the border fortress of the Jews (1 Mac. 4.15, 29, 61.5, 3.65, 6.31; 2 Mac. 12.32; Mk. 3.8) — Inhabitants. The first inhabitants were Hobab, on whose head Cushi, "chief of the children of Seir" (Gen. 36.20; Deut. 2.12), who were conquered by the sons of Esau. The Ben Ḥasan people in Egypt (12th dynasty, i.e. earlier than Abraham) represents nomads from Aduma with a gazelle and an ibex as presents, driving asses, armed with spears and bows, and playing on a ten-stringed harp. They appear to be Semitic, and the later Edomites were akin to the Hebrews. The Captivity Petra became the capital of Ishmaelite Arabs from S.E. called Nabatheans (Nebaitoth), trading as a free people with Egypt and Assyria, and powerful in the Sinaic desert. The Edomites worshipped many gods of the "children of Seir" (2 Chr. 21.15, 20), and Arab deities such as Atd (Uz), the chief one apparently being Qaus, or Qushi, "the bow god"—probably the sun—whom Josephus calls Koze (15 Ant. vii. 9), and whose name perhaps appears in those of the Edomite rulers Qaus-malka, Qaus-gabri, and Costobarus. The Edomite language appears to have been Aramaic, even before the spread of the Nabatheans.—History. The original inhabitants obeyed "dukes" or "leaders" (allāphām; Gen. 36.15; 1 Chr. 1.54), and these, among the children of Esau in the time of Moses, were organized under a king (Ex. 15.15; Num. 20.14); one of these "dukes" found his home in the eastern part of the desert (Gen. 14.4). Israel respected the Edomite independence and, passing S. from Kadesh-barnea, struck E. to the main N. trade-route on the plateau, which led from Eloth (Deut. 2.8) to Ṣe'ar-abarim (ʿAimeḥ) on the border of Moab (Num. 33.44), near the source of the border stream South of GREAT ZERED. The nations around eight Edomite kings ruling before Saul are given (Gen. 36.31-39; 1 Chr. 1.43-51), their native places being Dinhāhah (perhaps Dēnēh), Būzrah (Būsēı̂ch), Ayvīth (ʿAimeḥ), Re'ehonoth on the Ephrathites, and Paol (Pa'al). Hadad, the last of these kings (1 Chr. 1.50; 1 K. 11.14-22), or a son so named, fled from David to Egypt, and returned with a royal bride after David's death. Edom was then restricted to mount Seir (Jos. 15.1; Judg. 5.4). It was attacked by Saul (1 Sam. 14.47), and conquered for David by Joab (2 Sam. 8.13, 14; 1 Chr. 18.12, 13) after a great battle in the "valley of salt" (see Edom). Petra was named and Ma'on was a trading fleet in Eloth of Edom (1 K. 9.26; 2 Chr. 8.17), and the king of Edom aided Jehoram and Jehoshaphat early in the 9th cent. B.C. in their attack on the S. border of Moab (2 K. 3.5, 6, 20), where an unexpected stream flowed down the valley—probably the brook Zered. A few years later Joram of Judah was defeated in an attempt to quell a revolt in Edom (2 K. 8.20; 2 Chr. 21.8-10); but Amaziah, late in the same century, took Sela (Petra) after another battle in the "valley of salt" (2 K. 14.7-7; 2 Chr. 25.15). In 734 B.C. Tiglath-pileser III. of Assyria conquered Qaus-malka, king of Edom; and in 715 B.C. Sargon advanced thence against Thamūd Arabs to the S. Semacherib, in 702 B.C. claims Airammu of Edom as a tributary, and Esar-haddon received tribute about 680 B.C. from Qaus-gabri of Edom. The S. Arabs invaded Edom about 650 B.C. and the Edomite state was weakened by his brother's rebellion in Babylon, but the Nabateans took the side of the Assyrian monarch, so that Edom escaped
his subsequent revenge when Babylon fell. After 600 B.C. Edom appears to have regained freedom, though impoverished (Mal.1.4) by the wars; and the Nabateans contended with the Gk. kings of Asia (see Dan.11.41), though the Idumeans were defeated by Judas Maccabeas at Akrabbim (1Mac.5.3; 12 Ant. viii. 1), and finally compelled to become circumcised (13 Ant. ix. 1) about 139 B.C., under Simon the brother of Judas. Idumean power increased greatly in 47 B.C., when Antipater became ruler of Palestine, and his son Herod—regarded only as "half a Jew" (14 Ant. xv. 2)—established his own brother-in-law, the Idumean Costobarus, priest of Koze, as ruler of Idumea and Gaza (15 Ant. vii. 9; 20 Ant. ix. 4). The Romans held Petra after 105 A.D., and Edom then became a Roman province; but the Nabateans retained considerable independence, and were enriched by trade. Their inscriptions—the only, but the best, found in the Sinaiic peninsula continue as late even as the 4th cent. A.D. Coins of kings bearing the names Malik, Hareth, Dabel, Gamalith, and Sukamith have been found (Taylor, Alphabet, i. pp. 328-332) belonging to the later ages of Idumean freedom. The Idumeans were a combative race, and the Edomites were renowned for a combative courage. In the 1st cent. B.C. (4 Wars iv. 1) proved an element of weakness to the Jews. Edom was indeed always regarded as an enemy by Hebrews from the time of Moses, and Edomites probably aided the Babylonians to reduce Jerusalem c. 600 B.C. See Num.24.18; Ps.60.8.85.6.137.7; Is.11.14.34. 5; (Isa.1.8; R.V. "Horanim"); Jer.1.18.19; 25.9; 27.3 (king of Edom c. 660 B.C.); 40.11 (Jews in Edom c. 588 B.C.); 49.7; 13,18,20,22; Lam.4.21; Ezk.25.12.32.29 (kings of Edom c. 568 B.C.); 36.5 (Idumea, R.V. Edom); Jl.3.10 (Edomite violence against Israel c. 700 B.C.); Am.4.6.21 (the bones of a king of Edom burned for lime c. 760 B.C.); Ob.1.9 (mount Esan); Mal.1.4. The notices agree, as the above, and with the Assyrian statements. [NEBAIOTH] [c.r.c.]

Edrei.—1. One of the two capital cities of Bashan (Num.21.33; Deut.1.4.3.10; Josh.12. 4), where a victory was gained by the Israelite king over the Amorites under Og the king. The ruins of this city till bear the name Ed Der'a in at town of 4,000 inhabitants 25 miles E. of Gadar (Schumacher, Across the Jordan, pp. 121-148).—2. A town allotted to the tribe of Naphtali, and situated near Kedesh (Jos.19.37). Probably the village Yoter, 11 miles W. of Kedesh. [c.r.c.]

Education.—There is no contemporary account of Hebrew education till c. 200 A.D., nor ought we to expect one of a subject that would not suggest itself for description; but we can gather from inference much clearer information than might be expected. It is evident that the education of children was commanded by God (Ex.20.12; 13.8-14; Deut. 4.9,10.6.2.7,20.11.19; Sus.5; Josephus, Contra Apion, 17); also that till after the Captivity the parents, both father and mother, were the teachers. [FAMILY.] It is probable that the boast of Jesus the son of Sirach (prolog.) is correct, that the Hebrews "ought to be commenced in learning and wisdom"; though their education was confined in character, as the subject of teaching was always the law. According to a very late description (Pirke Aboth v. 21), boys at 5 years old began to learn the Scriptures, at 10 the Mishna, at 13 they became subject to the whole law, at 15 they entered the Gemara. There is no certain evidence that boys were taught reading and writing before the Captivity (Judg.5.14 does not help us; see R.V.), but it is highly probable; the alphabetical psalms and also the fact that the Hebrew language before the invention of the vowel points was extremely difficult to read seem some evidence of this. Schools there were none in this period [Schouquent, or Prophets]; but that the people generally were educated is evidenced by, e.g., the commercial and intellectual activity of the reign of Solomon. With the return from the Captivity a new era in the history of education begins, due chiefly to Ezra the scribe. Synagogues are built and increased rapidly, and were primarily schools, and the scribes were teachers who did their work well, though not at first as elementary teachers; but elementary education soon became general, and it was considered unpatriotic and irreligious not to be able to read. The education of girls was not neglected; see Ps.71.20 for a command upon the parents. In the 2nd cent. (Josephus, Wars iv. 1) proved an element of weakness to the Jews. Edom was indeed always regarded as an enemy by Hebrews from the time of Moses, and Edomites probably aided the Babylonians to reduce Jerusalem c. 600 B.C. See Num.24.18; Ps.60.8.85.6.137.7; Is.11.14.34. 5; (Isa.1.8; R.V. "Horanim"); Jer.1.18.19; 25.9; 27.3 (king of Edom c. 660 B.C.); 40.11 (Jews in Edom c. 588 B.C.); 49.7; 13,18,20,22; Lam.4.21; Ezk.25.12.32.29 (kings of Edom c. 568 B.C.); 36.5 (Idumea, R.V. Edom); Jl.3.10 (Edomite violence against Israel c. 700 B.C.); Am.4.6.21 (the bones of a king of Edom burned for lime c. 760 B.C.); Ob.1.9 (mount Esan); Mal.1.4. The notices agree, as the above, and with the Assyrian statements. [NEBAIOTH] [c.r.c.]

It is evident that the education of children was commanded by God (Ex.20.12; 13.8-14; Deut. 4.9,10.6.2.7,20.11.19; Sus.5; Josephus, Contra Apion, 17); also that till after the Captivity the parents, both father and mother, were the teachers. [FAMILY.] It is probable that the boast of Jesus the son of Sirach (prolog.) is correct, that the Hebrews "ought to be commenced in learning and wisdom"; though their education was confined in character, as
EGLAH

5.12; Jas.3.1; cf. also Ro.12.7. From these we gather that there was no fixed nor definite place for the δηδαιαλος, but that the work of teaching was looked upon as one of the most important in the Church. There are thus prominent facts with regard to education in the Bible. (1) It is by the command and sanction of God the Father. (2) It was the practice of God the Son. (3) It is now to be considered as the work of the Holy Spirit, Who is guiding into all truth. The subsequent history and development of education are outside our present range. The following books may be referred to: Didachē, 15. and Dr. Bigg's Commentary, p. 271; "Dict. of Christian Antiq., "Catechumen"; Bishop Wordsworth, Ministry of Grace; Church Work, 93 ff. (Oxford Lib. of Practical Theology); Harnack's ed. of the Didachē; Weizsäcker, Das Apostolische Zeitalter, Ed. 1. long, Life and Times of Jesus the Messiah. [n.r.]

Eglah', one of David's wives, and mother of his son Ithream (2Sam.3.5; 1 Chr.3.3). According to Heb. tradition, she was Michal.

Eglaim, a place named only in Is.15.8, apparently as one of the most remote points on the borders of Moab. Probably the same as En-eglaim.

Eglon (circle), king of Moab. He oppressed Israel, and was assassinated by Ehud (Judg.3.12 ff.). [EHUD] [n.m.s.]

Eglon', a town of Judah in the low country (Jos.15.39). Eglon was one of the confederate kings who were both in league against Israel and resisted Israel by attacking its ally Gibeon (Jos.10). The name survives in the modern 'Ajlān, a mass of ruins in the plain 16 miles N.E. of Gaza. [c.r.c.]

Egypt (micrávim or evec micrávim; Αἴγυπτος; Ἑλληνικά: Ἑλληνικός), a country occupying the N.E. angle of Africa between N. lat. 31° 39′ and 24° 1′, and long. 29° 13′ and 34° 12′. Its limits appear to have been very nearly the same under the Pharaohs; the most southern province was the district around the city of Elephantine, which was built opposite the present city of Aswān.—Names and Divisions. The common name in the Bible is micrávim (Gen.10.6:10; Jer.2.13; Is.19.1; Ez.7.25; etc.) in a dual form. There has been much discussion about this name, which is not Egyptian, and has been interpreted as meaning the two enclosures, the two districts, or the two basins. The dual form is in accordance with the Egyptian custom of considering Egypt as divided into two regions—the Siwā, which is always named first, and the N. The usual emblem of royalty is double—the reed for the S. and the wasp for the N. [MIZRAIM]. Another name met with in Scripture is " the land of Ham " (Ps.105.23, 106.22), which refers to Ham, one of the sons of Noah, and has a great likeness with the Egyptian name of Kern or Kemi, the hieroglyphic for which is the tail of the crocodile, and means " the black one, " from the colour of the black soil. It is doubtful whether the name Rahab (Ps.87.4, 89.10; Is.51.9) always means Egypt. [RAHAB]. The name Αἴγυπτος, which in Homer is Kemi, or in which the Egyptians wrote the Egyptian name of Kern or Kemi, the hieroglyphic for which is the tail of the crocodile, and means " the black one, " from the colour of the black soil. It is doubtful whether the name Rahab (Ps.87.4, 89.10; Is.51.9) always means Egypt. [RAHAB]. The name Αἴγυπτος, which in Homer is Kemi, or in which the Egyptians wrote the

5 sq. miles, equal to 7,300,000 acres, of which 4,625,000 are cultivated. The area of cultivated land is probably a good deal smaller than in ancient times, especially in the Delta, where lake Menzaleh covers a considerable space, part of which was called "lake Egypt, " and where the Wādy Tumilāt, which is now nearly barren, was a flourishing land with important cities. The extent of the cultivated area is not exactly the same every year, since it depends entirely for its irrigation upon the inundation of the Nile. From a very remote period the land was divided into administrative districts called by the Egyptians heseb or lesh, and by the Greeks nomes. The capital was the abode of the divinity peculiar to the province. The number of the nomes has varied, chiefly in the Delta. The later hieroglyphical lists give 42 or 44, Upper Egypt and Lower Egypt having each 21 or 22.

General Appearance; Plants and Animals. Egypt, as Herodotus says, is a gift of the Nile. It is a long valley, extremely fertile, owing to the inundation. A little below the present city of Cairo the valley expands into the Delta, a vast sand plain, watered by the branches of the Nile, and divided by numerous canals. In former times, the river had seven branches. Rain is not frequent upon the northern coast; while in Upper Egypt there are only one or two showers in a year, though they have occurred more frequently of late years. Rocky and barren deserts surround the river from both sides, which was one of the things that resisted Israel by attacking its ally Gibeon (Jos.10). The name survives in the modern 'Ajlān, a mass of ruins in the plain 16 miles N.E. of Gaza. [c.r.c.]
The fisheries, especially those of Lake Moeris, a basin outside the valley occupying part of the present province of the Fayûm. Trees were very few—the date-palm, the acacia (one of which, now called sunf, has a useful wood), and the sycamore are nearly all that are seen. The cereals mostly cultivated are the wheat and the dûra. Its fruits and vegetables have been famous since ancient times, especially its melons and onions; we see presented as offerings grapes, figs, pomegranates, cucumbers, and lentils. The papyrus provided a flourishing industry. It probably came from the Upper Nile, and was used for making paper; it was also boiled and eaten as food: light boats for navigating the canals were made of its stalks. It has now disappeared entirely from Egypt. Several plants have been discovered in the wreaths of mummies which do not belong to the flora of Egypt; among them the so-called persea (Mimosaops Schimperi), which has red berries. Cattle were probably more abundant than at present. The Egyptians had several breeds of oxen, both hornless and horned; and they seem to have domesticated animals which are no longer so used—the sculptures show large herds of several kinds of animals grazing and browsing. The horse throve so much in Egypt that it was exported to the neighbouring countries. We hear of Solomon obtaining horses for his chariots from Egypt (2Chr.1:16,9,28). The horse was used also for ploughing. Asses were very numerous, as they are now. We can trace the antecedents of some of them, such as hounds for hunting the gazelle, mastiffs, and spits. Wild animals abounded in the desert—hyenas, jackals, foxes, and wolves. The lion was found farther N. than now. The cat was a sacred animal, but was not domesticated; the kings and the rich liked to have specially bred them (e.g. the leopards of which they formed the flesh, and which were sacrificed with the oxen. Goats and sheep were very abundant; swine are found as early as the 4th dynasty, but disappear afterwards. The camel is never seen in the pictures; while the horse appears only after the invasion of the Hyksos, who probably brought it safely into Egypt, where it throve. The Nile, it is impossible not to consider the bulk of the population as being autochthonous, of African origin. A foreign element may have mixed with them and contributed to develop their civilization, as the Aryans have done in some parts of Europe. These foreign conquerors, whom we can consider to have been Semites, others Hamites, must have come from Asia or Arabia, either through the harbour now called Koseir and the valley of Hamamât, or more S. through Abyssinia or Somaliland. After having reached the Upper Nile, they came down the river and arrived in Egypt, where they settled. Many traditions point to conquerors coming from the S. For them the W. is the right side—that is, they turn towards the S., which is always mentioned before the N. They seem to have been closely connected with the land of Punt, the African coast of the Red Sea. They had a strong individual character, and deep contempt for the strangers whom they could not reduce to slavery. They speak of the “vile” Cush and the “vile Kheta” (Hittites).—Language. Their language is known to us from its earliest time. We have inscriptions of the first three dynasties; but not until the fourth have we texts of any length. They lasted until Roman times, during a period of more than 4,000 years; and considering that long duration it may be said that there has been little change in the language. It belongs to the Hamitic branch, as do the Berber and some languages spoken in the Soudan and Abyssinia, e.g. the Galla, Bedja, and Somal. It has some affinities with the Semitic languages, but must not be called Semitic. The writing is hieroglyphical. It is a transition from the picture-writing to the phonetic. A sentence is generally a mixture of three kinds of signs—the ideographic, the syllabic, and the alphabetical; hence there is no orthography in our sense of the term. Semitic names are spelt in various ways in the same text. Hieroglyphics have also an ornamental purpose, they are the accompaniment of sculpture, they are used on the monuments and in sacred books; but such writing being difficult and slow, the Egyptians adopted for common use a shorthand which is called by the quite inade-
quate name of "hieratic," and in which there is an equivalent for each hieroglyphical sign. Under the 22nd dynasty there appeared a new simplification, the "demotic" parallel with a modification in the language. The signs are still difficult to recognize, but there are still the three kinds. The Egyptians never adopted a purely alphabetical system, until they rejected entirely their own script, and adopted the Gk. alphabet with four additional signs, which constitutes the Coptic alphabet. Then the language was much altered under the influence of Greek. Coptic, which was spoken and written by the Christians, is still the sacred language of the Copts, who read their prayers without understanding the meaning. It seems to have only ceased to be a spoken language at the end of the 18th cent.—Religion. The religion has often been viewed in a false light, owing to the Greeks having translated into their own language the names of Egyptian gods, thus giving an utterly false idea of their nature and attributes. It is not a well-coordinated system, even if we consider only the doctrine of the priests. It is pre-eminent a worship of nature and of its leading manifestation, the sun; the gods are mere or less all the attributes of the deity are given, has a different name according to the localities—he is called Amon at Thebes, Tum at Heliopolis, Phtah at Memphis, Hurus at Edfi, Hathor at Denderah. But if we study the character and attributes of each, we find that, with slight differences, they are very much alike. They differ in their names and in their residences and must have been originally the local gods of the several tribes which settled in the country and whose union constituted the empire. They were identified with the most beneficial elements—the sun, earth, and water. All manifestations of nature, all natural forces, were gods, but they are not separated from the creator; they are his limbs: hence the pantheistic character of the religion is evident. The cosmogonic doctrine is that of Heliopolis, which seems to have been adopted more or less throughout the land. The most important character is set among the nature-gods is found in one of these—Re Osiris, the judge of the dead. His worship seems to have originated at Abydos. It is before him that the judgment scene described in the Book of the Dead has to take place. The heart of the deceased is weighed in his presence, while the deceased declares that he has not committed one of 42 great sins, thus certainly pointing to a high moral law. The fate of the soul after death is something very vague. It is described in the Book of the Dead (a copy of which, written on papyrus, was often put with the mummy); sometimes it is painted on the walls of the tomb. The deceased may go through many transformations, he may enjoy great felicity, encounter great dangers, from which he will be delivered by magic words; but there is no definite future, nothing to which every one is subjected. The human personality consists of three elements—body, soul, and name (which follows man even during his lifetime), and the soul. None of these three elements must perish, or the person himself would be annihilated; especially must the body be preserved from corruption. This is the reason for mummification. The Egyptians adopted as emblems of the gods the figures of animals. The falcon was the representative of Horus, the ibis of Thoth, the ram of Apollo. The sacred bulls were worshipped: Apis at Memphis and Mnevis at Heliopolis. The Egyptian religion had a very complicated ritual, a considerable number of festivals and ceremonies, and a powerful body of priests. Under the Romans it degenerated into gross superstition and magic, and therefore fell into disrepute—Government. The government was monarchical. The king, whose power was limited by law and custom, succeeded to the throne by inheritance: he was at the same time the chief priest and the head of all that was connected with religion. On the sculptures he is always represented as fulfilling the duties of a priest. Queens occasionally occupied the throne. We have only scanty information as to the laws of Egypt during the Old and Middle Empire. Under the Theban dynasties we have records of trials where capital punishment was frequent. Our knowledge of the civil law of Egypt is derived from demotic tracts. Under the Ptolemies it was apparently most precise and definite; it probably had a much older origin, as the Macedonian kings imitated what had been done by their native predecessors.—Army. The Egyptians were not a warlike people; during the first dynasties we see them fight in defence of their foreign invaders, especially the Sicilian Bedouin. They had then no regular army; the troops consisted of levies mostly untrained and undisciplined, among which were negroes from the Soudan. But after the country had been freed from the foreign rulers, called the Hyksos, the kings became conquerors, especially under the 18th dynasty, the most powerful of all. The kings had to fight the Ethiopians, their neighbours on the S., who were subjects of Egypt, but who generally revolted at each change of reign, and in the E. the nations of Palestine and Mesopotamia. At that time the chariot was a sort of war-chariot in which chariots played an important part. The infantry was armed with lances and a kind of falchion, and had large shields; the light infantry were the archers, who had also hatchets. During the 19th dynasty the Pharaohs began to enlist foreign mercenaries: the Shartana (who wore a metal helmet and who were a Mediterranean nation), and the Mashonash or Maxyes from Africa (who became a guard like the pretorians or the janissaries). During the 26th dynasty Greek and Carian mercenaries continually increased in number in the Egyptian armies, which in the wars against the Persians were almost entirely composed of these foreigners, who could make their own conditions and could greatly influence the succession to the throne.—Domestic Life. As to the domestic life of the Egyptians, we derive much information from the pictures on the walls of the tombs. The home is the high position occupied by women; we often see them represented with their husbands, and styled "a palm of loveliness," "beloved by her husband." Monogamy was certainly the rule, but not for the kings, with whom

GODS OF EGYPT, WITH THEIR SYMBOLS.
polygamy seems to have been frequent for political motives. A marriage between two royal families was generally the token of an alliance between the two states. The manner of life was that of a highly civilized people; they seem to have been of a merry and cheerful nature. They liked social amusements, banquets where the guests were amused by instrumental music, songs, and dancing girls. They practised sports, in which the women took part. They had several games, one of which was draughts. Their funeral ceremonies varied according to the rank of the deceased. There was a procession, and the mummy, lying under a canopy on a boat, was carried across the Nile. On the shore it was put on a sledge drawn by cows, which brought the coffin to the mountain. It was accompanied by waiting-women, by attendants, and by a priest reading the Book of the Dead. The Embalming of the body lasted many days. This was the occupation of the embalmers who dwelt at Thebes, on the W. side, among the tombs.—Literature and Art. There is an Egyptian literature of a very varied character. We know of several libraries built in the temples, which contained the so-called hermetic books, the sacred books attributed to Thoth, of which Clemens Alexandrinus says there were 42; they were songs in honour of the gods, descriptions of the royal life and its attributes, astronomical works and horoscopes. The books of the hierogrammatist referred to the art of writing, the geography and course of the Nile. The books of the Stolistes were devoted to all the ordinances concerning religious worship. The sacred books par excellence were those which contained the laws and everything concerning the gods and the education of the priests. Medical science was also the subject of six hermetic books. The Book of the Dead is a collection of hymns and prayers supposed to be pronounced by the deceased when he reaches the other world; they describe all that may happen to the soul after it has been separated from the body. This book dates from the beginning of the empire, and was still placed with the deceased in Roman times. Religious and funeral books are by far the largest part of the literature, but we have besides papyri on mathematics, on moral teaching, descriptions of travels, many tales (of which the old Egyptians seem to have been very fond), magical books, correspondence between a teacher and his pupil, and what we call poems, i.e. narratives written in a poetical style, though not necessarily in an actual verse. Unfortunately, we have no historical books, except merely a papyrus giving a list of kings with the number of years of their reigns. This precious document, called the Annals of Turin, is in a very fragmentary state. Egyptian art is perhaps the oldest we know. It has certainly a native origin; we cannot trace it in any foreign influence. It reached a high point of development when many of the neighbouring nations were still barbarians; but after that did not progress, probably because the Egyptians never cultivated art for its own sake and never strove to reach ideal beauty. Art was always subservient to utility or as something secondary. In architecture, the art in which the Egyptians have surpassed most of their neighbours, they aimed chiefly at duration, and wished to impress men, not by the beauty of the constructions they raised, but by their colossal and gigantic proportions. In sculpture they showed remarkable skill in working very hard stones; they made very good portraits in stone or wood, but they never got rid of what are called conventions—remains of the childhood of art which they thought it unnecessary to shake off. These conventions are still seen in pictures and also in relieves. Both of these are intended as a kind of language for the eye, therefore are always accompanied by their explanation in hieroglyphics. Decorative art takes an important place among their industries. Jewellery was carried to a point of perfection which is even yet unsurpassed in some respects; and the furniture lately found in royal tombs is truly remarkable both for its good taste and excellence of workmanship. Egyptian linen had a great repute; we have many specimens of the art of the weaver in the mummy cloths, of which there are various qualities, but they are not generally coloured. The early Copts seem to have preserved the tradition of the
tissues in brilliant colours, which they used for their religious garments.—Magicians. The Bible often speaks of the magicians of Egypt (Gen.41.24; Ex.7.11,8.18). Magic certainly played an important part in the religion of the country, and the magicians who belonged to a college or high school were much considered. We see them occasionally in the processions which took place on the great festivals; they rank with the highest class of priests. [Magis.]—Chronology. There are few subjects upon which the views of Egyptologists vary more than upon chronology. It is based on astronomy; and although we have a few astronomical representations, they are so intermingled with mythology that it is hardly possible to make any use of them. According to the idea first advanced by Lepsius, the Egyptian had 2 different years, a vague year consisting of 12 months and 5 intercalary days, and a fixed year of 365½ days. These years were divided on the supposed new moon, the month Thoth (July 20, Greg.), with the heliacal rising of Sothis; but as after 4 years there was a difference of one day between the 2, it is admitted that they made use of the Sothic cycle, 1,460 fixed years corresponding to 1,461 vague years. After that lapse of time the 2 years began again on the same day. It has been denied that the Egyptians knew that cycle; however, Brugsch maintains it, and states that "the correspondence of the vague year with the fixed year is indicated through the phases of the moon, the stations of the sun, the beginning of the spring, and the rising of certain stars." Mahler bases his new system of chronology on dates fixed by the phases of the moon. It is extraordinary how little importance the Egyptians seem to have attached to astronomy, except as connected with religion; no eclipse is recorded, we do not even know their words for the stars. They were perhaps more fortunate with historical chronology. Our best document is the before-mentioned Annals of Turin, which is broken into 164 pieces. We have three sculptured lists of kings, two of which come from the temple of Abydos; they give the names of the predecessors of Sethy I. Sethy I is the first in the list, but although it is trustworthy as to the order, whole dynasties have been omitted. According to tradition, the temple lists were used by a Sebennytic priest called Manetho, who is said to have written three books of Egyptian records (περιγραφήσεις) under Ptolemy Philadelphus. He divided the history of Egypt into 30 dynasties, giving for each king the length of his reign; but as his lists have come to us only third-hand, through the Christian chronographers, the numbers he gives are hardly reliable, and but seldom agree with those found on the monuments. However, his division into 30 dynasties has been preserved, the 30th being that of the last Pharaoh, when Egypt was finally conquered by the Persians. Several authors have accepted the numbers of Manetho, others have shortened considerably the time assigned by him to various dynasties. The first historical king is dated by the following authors thus: Manetho, 5,404; Lepsius, 7892; Mariette, 5,041; Brugsch, 4400; Petrie, 4777; Ed. Meyer, 3315.—History. We now give a very brief sketch of the history, insisting chiefly on the general features and on the facts connected with Scripture. During the last ten years a great deal has been discovered concerning the prehistoric state of Egypt, when the race which occupied it not only was not adorned with the Stone Age. We cannot but suppose that there was an invasion coming from Arabia, which may not have been very numerous, but which conquered the native race, after which civilization began to grow. The first historical king is Menes or Menes. His name has been found in hieroglyphics, but our only information as to his life is from Gk. writers. He is said to have divided the country, or to have founded Memphis, called after his name Mennefer. The very few monuments which we have of the first three dynasties are found mostly in tombs at Abydos. With the 4th dynasty we see a sudden development of every art and of literature. Then the pyramids were built and the graves adorned with magnificent sculptures, such as have not been surpassed at any time in Egyptian history. This brilliant period lasted through the 4th, 5th, and 6th dynasties, and is one of those of which we have the greatest amount of information. Afterwards there is a gap. We know hardly anything of the succeeding dynasties until the 10th, when a few monuments show us that the empire was divided and that the central power was probably Heracleopolis. The 11th dynasty took Thebes as its capital and founded this city's influence. The 12th dynasty extended its rule far into Nubia; but we are unable to see the peaceful invasion of foreigners, evidently from the E., who later on came in increasing numbers, conquered the country, and established rulers of their race. These invaders have been called Hyksos; they evidently came from Mesopotamia. They were the first to establish the civilization of their subjects, in everything except religion, and this exception is the reason for their always remaining an object of hatred to the native Egyptians. As the kings were Mesopotamians, they received with favour their kindred the Hebrews. The Hyksos rulers form the 15th and 16th dynasties. It was during their rule that Abraham came into the country, and afterwards Joseph and his family, who were settled in the land of Goshen. The Christian chronographers say that it was under Apophis, one of the last of these kings, that Joseph was raised to his high position. Very soon afterwards the Egyptians shook off the foreign power, and native Pharaohs came back to the throne. The 18th and 19th dynasties were those of the great conquerors. The oppressor of the Jews, the king "which knew not Joseph" (Ex.1,8), was probably Ramses II., and it seems probable that the Exodus took place under his successor, Ramses IX. Several times afterwards the Israelites came in contact with the Egyptians. The head of
the 22nd dynasty, Sheshonk, called in Scripture Shishak, invaded Palestine under Rebohoam, and carried away the treasures of the temple (1K.14.25; 2Chr.12.2,9-11). A record of his campaign is engraved on a pylon at Thebes. The first king of the 25th dynasty, Shabaka, called in Scripture So, received messengers from Hosea, king of Samaria (2K.17.4); but after Samaria had been taken by Sargon, Shabaka was routed at Raphia by the Assyrians. His son Shabatak also was beaten by the Assyrians, and was driven from the throne of Egypt by Tirhakah, the Ethiopian who was the persevering, though finally unsuccessful, foe of the Assyrians. There was some revival of the Egyptian power under the 26th dynasty, the Saïtes who came to the throne with the help of Greek and Carian mercenaries. The second king, Necho, wishing to invade Assyria, asked Josiah to let him pass through his territory. Josiah tried to oppose him, but was defeated and killed at Megiddo (2K.23.35); the conqueror made Jerusalem tributary and put Jehoiakim in the room of Josiah his father (2K.23.29-35); Necho himself was routed by Nebuchadnezzar. After the 26th dynasty came the struggles of Egypt against the Persians, with alternations of successes which freed Egypt for a time, and of defeats which made her subject again. The empire reigned over Egypt, and the prophecy of Ezekiel has been literally fulfilled, "There shall be no more a prince out of the land of the Egyptians" (Ezk.30.13). When Joseph "took the young child and his mother by night and departed into Egypt" (Mt.2.14; cf. Lu.1.80), he foresaw that his people would be in Egypt for four hundred and forty years. (It was probably for several years that Gera (Gen.46.21 and 1Chr.8.3) and Ehud (1Chr.7.10) are the names of Benjamite clans; but even Budde allows that Ehud may have been a hero who gave his name to a clan. Josephus has embellished the story more suo. He fixes the assassination at Jericho. Sayce (Early History of the Jews, Cassell, 1913) places it at Samaria. This is consistent with the text. Moore suggests the other side of Jordan. His suggestion is not inconsistent with the text, and would account for the fact that Ehud was in time to intercept the Moabite garrison at Jericho. It is noteworthy that Ehud is styled deliverer, not judge, and no approval of his action is expressed.)

**Eker**, a descendant of Judah (1Chr.2.27).

**Ekrebel**, a place named in Jth.7.18 only with Chusri (probably Kūzāḥ). It appears to be the village 'Aqrabeh, E. of Kūzāḥ, from which the district of Acrabatine took its name. (A.M.34.65.)

**Ekron**, one of the five cities of the Philistine lords, not conquered by Joshua (13.3). It lay on the borders of Judah and Dan (15.11, 45.46): it was given to Dan (15.43), but not conquered (LXX. Judg.1.18), and it was held by Philistines in the time of Samuel (1Sam.5.10,6.16,7.14,17.52). It had a shrine of Baal-zebul (lord of the house) on the ground that Gera (Gen.46.21 and 1Chr.8.3) and Ehud (1Chr.7.10) are the names of Benjamite clans; but even Budde allows that Ehud may have been a hero who gave his name to a clan. Josephus has embellished the story more suo. He fixes the assassination at Jericho. Sayce (Early History of the Jews, Cassell, 1913) places it at Samaria. This is consistent with the text. Moore suggests the other side of Jordan. His suggestion is not inconsistent with the text, and would account for the fact that Ehud was in time to intercept the Moabite garrison at Jericho. It is noteworthy that Ehud is styled deliverer, not judge, and no approval of his action is expressed.)

EH'HI, head of one of the Benjamite houses, according to the list in Gen.46.21. He seems to be the same as Abi-ram in the list in Num.26.38, and if so, Ahiram is probably the right name, as the family were called Ahiramites. In 1Chr.8.1 the same person seems to be called Aharah, and perhaps also Aher in 1Chr.7.12.

EHUD (strong).—1. Son of Bilhan, a Benjamite (1Chr.7.10,8,6); see below.—2. (Judg.3.12ff.) It was probably after the inter-tribal war, when Benjamin was weak, that Eglon
to N. As Accaron (1Mac.10.59) it is noticed as given by the king of Antioch to Jonathan the Hasmonaean c. 147 B.C. [c.r.c.]

EKRONITES (Jos.13.3: 1Sam.5.10), inhabitants of Ekron; in 1Sam.5.10 the LXX. and Josephus read Ascalon.

El, Eloah, Elohim, Elyon. El ('el), the most primitive Semitic word for God (or a god) in the O.T. It appears in Mehujael, Methusael, Mahalaleel, before the Flood, in Bethel and Israel in the latter part of Genesis, in Elisheba, Eliezer, and several names of leaders of the Exodus in Num.1, and comes down to the N.T. in Immanuel, the name of our Saviour in connexion with His Virgin Birth. It is found in O.T. with the definite article, the El, where the Supreme God, or the God of Israel, is meant. In a few places it is applied in Isaiah to an idol, but is very rare in the plural, and does not seem to be used of gods in a wider sense. It is joined with titles of deity, e.g. with Elyon (Most High), and specially with Shaddai (Almighty), and with attributes of JHVH, as jealous, merciful, compassionate, faithful. But it is never used as Elohim is in O.T. narrative, but in discourse or personal relation, in direct and reverse as to deity. The El, I suggest, is not the idea of strong or strength. Eloah (eloah), properly the sing. of Elohim, but very seldom joined with Elohim, as though they were sing. and plur. Is.44.6,8 shows both words: "There is no Elohim beside Me. . . Is there an Eloah beside Me? . . ."

Elohim and Eloah are held to be derivatives of El, but the precise sense is not known. Eloah occurs 41 times in the dialogue of Job, where every speaker except Bildad uses it, and appears in parallel with Shaddai to times. It is never found in Genesis or in the narrative of any book in O.T. Its Aramaic equivalent is Elah, or Elaha, in O.T. Elyon ('elyon), unlike the preceding words, is not a word for God, but a name or title of the Deity. Grammatically it is an adjective, signifying stronger or highest, and used, like Shaddai the Almighty, for the Most High (God). It first appears in Gen.14, in connexion with Melchizedek (Melchizedek), the priest of El-Elyon, i.e. of God Most High. In this connexion Abraham joins it with JHVH. It reappears as a patriarchal word in Balaam's prophecy, between El and Shaddai. Moses also uses it with Shaddai in Ps.91.1. In the historical portions of O.T. it is applied to common objects—the higher gate, the upper pool or chamber, etc. In Deuteronomy it is applied prophetically to Israel, in the Psalter to David, apparently as a type of the Messiah (Ps.89.27), but otherwise only to the Most High. See Shaddai for further illustration of the patriarchal use of the three preceding words. Elohim (elohim) by derivation and meaning belongs to El and Eloah, yet by usage holds a place in O.T. which is absolutely unique: it is the only narrative word for God in O.T. Side by side with this stands another no less surprising but equally certain fact, that the only narrative Name of Elohim (God) is JHVH, the individual Name of Generation (1-11 inclusive) no word for God occurs except Elohim, and no name of God except JHVH. Only in the names Mahalalel, Mehujael, Methusael, do we see traces of El, the root word of Elohim. The last O.T. historical writer to whom any large influence in its composition is assigned is also the greatest purist. Ezra, in Chronicles and in the book which bears his name, does not even employ Adonai as a title of the Supreme Being. Elohim in his Hebrew, Elaha in his Aramaic, and Jehovah for the name of God, are all that he admits. Even in Ps.119, which can hardly be assigned to any one else, he uses JHVH 24 times, and Elohim but once (ver. 115). Elohim as a plur. is used of gods in general, or persons who are God's ministers of justice and rule to men ("I said, Ye are gods," explains this), but far more frequently (quite 12 times as often as any other term) for god in O.T. Elohim stands as a plur. of distinction (pluralis excellentiae) with sing. verbs, adjectives, and pronouns. The narrative use of Elohim is most easily observed in Job and the Abrahamic portion of Genesis. In the narrative of Job, the word for deity is Elohim, and the name of the Deity is JHVH. In the dialogue Elohim and Jehovah occur often enough to show that the speakers were acquainted with them. But the terms of communication, the writer and his friends, mentioning Eluhu, are El, Eloah, and Shaddai. Even JHVH, answering Job out of the whirlwind, conforms to this use. And in Genesis the same facts are apparent. The narrator keeps to Elohim and JHVU. The speakers throughout the story make use of El. Eloah (not Elohim which occurs only in the Pentateuch: in Deut.32), and are acquainted with Elohim, Adonai, JHVU, and of course with El-Shaddai, but come by slow degrees to the use of Elohim, and never become familiar with JHVU. The only determined Elohist in Genesis is Joseph, who—though his own name (spelt Jephoseph in Ps.82)—is significant of JHVU (see Gen.30.24)—never names JHVU, but only Elohim. In the face of these facts, is it possible to divide the sacred narrative between writers who are either Jehovahists or Elohistos, but not both? The O.T., as it stands, has one word for God, Elohim, in the narrative of Jethro and Melchizedek, but in the narrative this Elohim has one name JHVU; except that in 1K.3.10, 2K.7.6, and Dan.1.2 He is called Adonai, which He always is by the Jews in reading the O.T., unless the word Adonai precedes, and then they say Elohim. No such writer as an Adonaist having yet been suggested, these three passages do not affect the question. The O.T. narrative, as we have it, is JHVU-Elohistic from first to last. [c.h.w.]

Ela (1Ksd.9.27) = Elam, 4.

Eledah', a descendant of Ephraim (1Chr.7.20).

Elah.—1. The fifth duke of Edom (Gen.36.41: 1Chr.1.42).—2. The father of Shimei, 4 (1K.4.18).—3. Son and successor of Baasha, king of Israel (1K.18.6-10): his reign lasted for little more than a year (cf. ver. 8 with 10). He was killed, while drunk, by Zimri, in the house of his steward Arza, who was probably a confederate in the plot.—4. Father of Hoshen, the last king of Israel (2K.15.30, 17.1).—5. The second son of Caleb (1Chr.4.15).—6. A Benjamite, son of Uzzio, dwelling in Jerusalem in the time of Nehemiah (1Chr.9.8).

Elah, Valley of (valley of the terræbith;
ELAM

1Sam.17.2,19,21-9, near Shochoh (Shuweikeh), where David slew Goliath. It is now called Wady es Sûnî (valley of the acacia), but still has in it a few terebinths near Adullam. It rises S. of Keilah, and was the great highway from Gath to Hebron, running first N. and turning W. near Shochoh. The place where it enters the Philistine plain was guarded by Gath, 8 miles W. of the scene of David's exploit. The valley reaches the sea N. of Ashdod. [c.r.c.]

Elam.—1. The name of one of the sons of Shem (Gen.10.22; 1Chr.1.17), and also of the country (Gen.14.1,9; Is.11.11; Je.25.25,49,34-39; Ezk.32.24; Dan.8.2). In 1Mac.6.1 it is called Elamais, and in Herodotus iii. 91; v. 49, etc., Küssia. Its position was N.E. of the Persian Gulf and E. of Babylonia—a mountainous tract including a fertile region between the highlands and the Tigris. Apparently it was made up of two provinces, the name of the other being Anzan, —see its capital. The chief of Elam was Susa (Shushan). The Elamites spoke a non-Semitic dialect, but the presence of numerous Semitic Babylonian inscriptions implies that their country was an early Semitic possession, hence, perhaps, the statement that Elam was the first son of Shem. Long before the time of Assurbanapal it had become an important power, and nearly a hundred Elamite kings are known, from Hümmbaba (killed by the semi-mythical Babylonian hero Gilgamesh) to Hümmand-haldâš III. (who, about 635 B.C., was one of the princes who drew Assûr-bani-apîl's chariot to the temple of Masîma). Kudur-Nahhunte I. mentioning Elam and中超 the cities of Babylon. Kudur-mabuk became a chief in the land of the Amorités; Kudur-ku(k)umal is probably the Chedorlaomer of Gen.14.14, who warred in the same district. About 1380 B.C. Hûrbatila challenged Kurigalzu of Babylonia to battle, but was defeated. Kûmbûlum once performed these misfortunes in the time of Addu-sum-iddina (c. 1180 B.C.), and Sutrûk-hûjûntû (c. 1175 B.C.) was also successful against the Babylarians, and some of the spoils which he carried off are now preserved in the Louvre. In 721 B.C. Sargon of Assyria, after the destruction of all the Monarkh-balanûd. Hûllûsuu, king of Elam, captured Assûr-nadin-Sûm, Sennacherib's son, who was king of Babylon, and his father, in revenge, ravaged the country in the reign of Kudur-h nosûntû. Sennacherib also fought with Ūmmû-nin[b]ûn, his successor, at Hûllûsuu in Babylon. To give all the tragic incidents concerning Elam, Babylonia, and Assyria is impossible. Elam apparently constantly interfered in the affairs of Babylonia in order to harass the Assyrians, and this policy was continued by Hûmbûn-haldâš II. in the time of Esar-haddon; but in the end the Assyrians probably remained in possession of the country, which seems to have formed part of the dominions of Nebuchadnezzar. [ASYRIA.] Teisipes, Cyrus, Cambyses, and Cyrus the Great, though Aryans, were all kings of Anzan, which seems to have been used interchangeably with Elam. With the other provinces against Darius he conquered the Great after he ascended the throne, but having been reduced to submission, became one of the more important satrapies of his empire, with Susa as the royal residence (Dan.8.2) and metropolis. [CYRUS.] See Smith, D.B. (4 vols. 1893), s.v.; and, for the latest researches, cf. de Morgan, Délégation en Perse et Histoire et Travaux de la Délégation en Perse (Paris, 1905). Sayce, in Hastings, D.B. (vol. i. 1898).—2. A Korhite Levite, fifth son of Meshelemiah; one of the Bene-Asaph, in the time of David (1Chr.26.3).—3. A Benjamite chief of the sons of Shashak (8.24).—4. "Children of Elam," numbering 1,254, returned with Zerubbabel from Babylon (Ezr.2.7; Ne.7.12; 1Esd.5.12), and 71 more with Ezra later (Ezr.8.7; 1Esd.8.33). Members of this family put away their foreign wives (Ezr.10.26), and one of them signed the covenant (Ne.10.14).—5. In the same lists a second family (carefully distinguished as that of "the other Elam") also returned with Zerubbabel (Ezr.2.31; Ne.11.2).—6. One of the priests who accompanied Nehemiah at the dedication of the Wall (Ne.12.42). [T.G.P.]

Elamites. This word occurs only in Ezr. 4.9, but is there omitted in the LXX., probably because partly included in "Susanchites," in the same verse. In Jth.1.6 the Gk. word employed (Pielhymaîn) is the same as the Semitic Babylonian and another language (Elamite proper), the relationship of which, though it can be read, is still undetermined. They were far advanced at an exceedingly early date in art and science, and had a well-developed mythological system, among the names of their divinities mentioned are Elu (Laomer), Nahhûntû, Hûmbâ, Šimesî or Dagbâk, probably god of war, whilst Elagû seems to have corresponded with the Babylonian Merodach. [ELAM.] [T.G.P.]

Elasah.—1. A priest, who had married a Gentile wife (Ezr.10.22).—2. Son of Shaphan; an ambassador, sent by King Zedekiah to Nebuchadnezzar at Babylon, who bore Jeremiah's letter to the captives there (Je.29.3).

Elath', Eloth', a town of Edom, commonly mentioned with Ezron-geber, and situate at the head of the Arabian Gulf, thence called the Elamitic Gulf. It first occurs in the account of the wanderings of Israel (Num.34.6), and appears to have been the metropolis of Solomon's navy (1K.9.26; cf. 2Chr.8.17). It was rebuilt by Azariah (2K.14.22; 2Chr.26.2). After this, however, "Rezin king of Syria recovered Elath, and drove out the Jews from Elath, and the Syrians came to Elath and dwelt there to this day" (2K.16.6). Now 'Aqabah, close to 'Agabah. [EDOM.] [C.R.C.]

El-beth-el, Jacob's shrine (A.V. place) at Bethel (Gen.55.6,7). [C.R.C.]

El'cia, a forefather of Judith, and therefore a Simeonite (Jth.8.1; cf. 9.2).

El'dah', a son of Midian (Gen.25.4; 1Chr.1.33). "The word perhaps means 'God hath called.'" [F.R.C.]

El'dad' and Medad', two of the 70 elders to whom was communicated the prophetic power of Moses (Num.11.16,26-29). Although their names were upon the list which Moses had drawn up, they did not repair with the rest to the tabernacle, but continued to prophesy in the camp. Moses being requested by Joshua to forbid their prophesying, "therefore knowing that all the Lord's people were prophets. The
mode of prophecy of Eldad and Medad was probably the extempore production of hymns, chanted forth to the people (Hammond); cf. the case of Saul (1Sam.10.11).

**Elders.** In primitive times the elders of the clan or tribe were invested with official authority, being fitted by age and experience to administer justice and exercise authority within their own circle. The Egyptians (Gen. 50.7), Moabites, and Midianites (Num. 22.7) had their elders, and they existed as an official class among the Hebrews from the time prior to the Exodus till the destruction of the second temple (1 Chr. 8.9; cf. Before the Establishment of the Monarchy). Moses made his commission known first to the elders, who as representatives of the people went with him to Pharaoh (Ex. 3.16, 18). In their representative capacity they were frequently identified with the people (Ex. 19.7, 8; Jos 24.1, 2). Moses appointed to go “down” to elders, who held official positions, to assist him in the administration of affairs (Num. 11.16). For judicial functions exercised in the cities, etc., see Deut. 19.12, 21.2, 22.15, 25.7; Jos. 20.4; Ru. 4.2. They took part in certain sacrificial rites (Lev. 4.15). (2) **Under the Monarchy.** They approached Saul as a group of elders of government (1 Sam. 8.4; cf. 2 Sam. 3.17); supported Absalom in his rebellion (17.4); Rehoboam sought their advice (1 K. 12.6). (3) **Post-Exilic Notice.** (Exzr. 5.5, 9, 6.7, 14, 10.8; Jth. 7.23; Sus. 50 ff.; 1 Mac. 12.6, 35, 13.36). The yeopoudia, or Council of Elders, of the Hasmonaean period may have had its origin in the ancient or tribal councils (1 Chr. 16.14, 10.4; 3 Mac. 1.8). [SYNAGOGUE, THE GREAT; SANHEDRIN; JUDGE.] For the N.T. use, see CHURCH; PRESBYTER; BISHOP. [H.L.]

**Elead,** a descendant of Ephraim slain by men of Gath when cattle-raiding (1 Chr. 7.21). It is sometimes assumed that the words “whom they slew of Gath, before they went down to the land, slew as they came down to take their possessions [or, cattle]” refers to a raid on Gath by Elead, Zabad, Shuthelah, and Ezer, from mount Ephraim. But the Heb. is as indefinite in its pronouns as is E.V. The raid occurred in the lifetime of their father Ephraim (ver. 22), when the Hebrews were in Egypt. Now, before his descendants entered Palestine, where he himself never was. The passage seems clearly to refer to a raid on Gosen by men of Gath, who slew the four sons of Ephraim; and it cannot, therefore, be used as an argument against “all” Israel (Ex. 12.41) leaving Egypt at the Exodus. The expression “down to Egypt” (Gen. 37.25, etc.) occurs often. [C.R.C.]

**Elealeh,** a town E. of Jordan, in the pastoral country, taken possession of and rebuilt by the tribe of Reuben (Num. 32.3, 37). By Isaiah and Jeremiah it is mentioned as a Moabite town (Is. 15.4, 16.9; Jer. 48.34). The ruins still bear very nearly their ancient name, at El-Aal, a little more than a mile N. of Heshbon (Surv. E. Pal. p. 16); they are those of a late Roman town. [C.R.C.]

**Eleasa,** a place at which Judas Maccaebaeus encamped before the battle with Baccidhes, in which he lost his life (1 Mac. 8.5). NE. of Hebron (?); Yassine, near Beth-horon. [W. Pal. ii. p. 36.](C.R.C.)

---

**Eleazar.**—1. Third son of Aaron, by Elisheba, daughter of Amminadab. Nadab and Abihu leaving no children (Lev. 10.1; Num. 3.4), Eleazar was appointed chief over the principal Levites (Num. 3.32). With his brother Ithamar he ministered as a priest during their father’s lifetime, and immediately before Aaron’s death was invested on mount Hor with the sacred garments, as his successor in the office of high-priest (Num. 20.28). One of his first duties was to superintend, in conjunction with Moses, the census of the people (Num. 26.3, 4). After the conquest of Canaan he took part in the distribution of the land (Jos. 14.1, 17.4, 19.5, 21.1). His burial is recorded in Jos. 24.33. The office of high-priest was held by descendants of Eleazar till the time of the Hasmonaean, except during the period between Eti and Solomon, when the office was held by members of the family of Ithamar. [Abiathar; Zadok.]—2. The son of Abinadab, of the hill of Kirjath-jearim (1 Sam. 7.1).—3. The son of Dodo the Ahohite, i.e. possibly a descendant of Ahioh of the tribe of Judah, mentioned among the unknown principal mighty men of David’s army (2 Sam. 23.9; 1 Chr. 11.12) in—4. A Levite, son of Mahli, and grandson of Merari (1 Chr. 23.27, 24.28.—5. A priest who took part in the dedication of the walls under Nehemiah (Ne. 12.4).—6. One of the sons of Parsesh; an Israelite (i.e. a Levite) who had married a Moabitess, and had to put her away (Ezra. 10.25; 1 Esd. 9.26).—7. Son of Phinehas a Levite (Ezr. 8.33; 1 Esd. 8.63).—8. The 4th son of Mattathias, surnamed Avaran (1 Mac. 2.5), who fell by a noble act of self-devotion in an engagement with Antiochus Eupator, 164 B.C. (1 Mac. 6.43ff.). In a former battle with Nicanor, Eleazar was appointed by Judas to read “the holy book” before the attack, and the watch-word in the fight—“the help of God”—was his own name (2 Mac. B.23).—9. A distinguished scribe (2 Mac. 6.18) of great age, who suffered martyrdom during the persecution of Antiochus Epiphanes (2 Mac. 6.10ff.). The Roman ambassador from Judas Maccabaeus to Rome (1 Mac. 8.17).—11. The son of Eliud, in the genealogy of Jesus Christ (Mt. 1.15).

**Eleazar r us** (1 Esd. 9.24) = **Eliaishah**, 4. Election. [PREDESTINATION.]

**El-Elohe-Israel** (God, the God of Israel), the name bestowed by Jacob on the altar which he erected on land in Canaan bought of the sons of Hamor (Gen. 33.20).

**Elements** (pl. Heb. 3.10; R.V. marg. heavenly bodies), here undoubtedly means the physical elements of which the world is composed. The Greek στοιχεῖα means that which stands in a row or series, στοιχεῖον: (1) the alphabet; the elements from which words are formed, (2) the elements of the universe, (3) the first principles (rudiments) of any kind of knowledge (Heb. 5.12, etc.). Gal. 4.3, apparently refers to the worship of heavenly bodies (called στοιχεῖα) as elements of the universe, and regulating the calendar, though R.V. gives “of the creation of the world” (Stu. 3.23). [S.W.]

**Elep h,** a town of Benjamin, named next
before Jerusalem (Jos.18.28). Now the village Lifia, 2 miles W. of the city. [c.r.c.]

**Elephant.** The word does not occur in the text of the canonical Scriptures of A.V., but is found as the marginal reading to Behemoth, in Job 40.15. "Elephant's teeth" (shen-habhim) is the marginal reading for "ivory" in R.C. 10.22; 2Chr.9.21. Elephants, however, are mentioned in the 1st and 2nd books of Maccabees as being used in warfare. These belonged to the Indian species (Elephas maximus), which was first brought to Palestine by Antiochus Epiphanes, king of Syria, who employed these animals in his wars against Egypt, as Eupator (163 B.C.) did against the Jews (1Mac.6.34). [APES; IVORY; PALESTINE.] [R.L.]

**Eleutherus, a river of Syria (1Mac.11.7, 12.30).** In early ages it was a noted border stream. According to Strabo, it separated Syria from Phoenicia, and formed the N. limit of Coelosyria. The identity of the Eleutherus with the modern Nahar-el-Kebir (Great River) is not doubted. Its highest source is in the open valley between the Lebanon (S.) and the Barylus (N.) ranges; it flows through the opening called in Num.34.8 the entrance of the land which falls into the Mediterranean about 18 miles N. of Tripolis. [c.r.c.]

**Elihanan.—1.** A warrior in the time of king David, who performed a memorable exploit against the Philistines, about which a difficulty arises: (a) 2Sam.21.19 says that he was the "son of Jaare-oregim the Bethlehemite," (b) R.C. 10.22, 2Sam.21.19 reads "Goliath the Gittite, the staff of whose spear was like a weaver's beam." Here in A.V. the words in italics are inserted to bring the passage into agreement with (b) 1Chr.20.5, which states that "Elihanan son of Jaair slew Lahmi the brother of Goliath the Gittite, the staff," etc. The latter is probably the more correct statement, the differences between them being much smaller in the original than in English. The "oregim" (weavers) has probably crept into the text of 2Sam.21.19 from the following line.—2. The son of Dodo of Bethlehem, one of the Thirty of David's guard, and named first on the list (2Sam.23.24; 1 Chr.11.40).

**Ell,** the high-priest before whom Samuel ministered to the Lord, was descended from Aaron through Ithamar, the youngest of his two surviving sons (Lev.10.1-2,12,1; R.C. 1.2.27, cf. 2Sam.8.17; 1Chr.24.3). As the history mentions no high-priest of the line of Ithamar before Eli, he is generally supposed to have been the first of that line to hold the office. From him, his sons having died before him, it appears to have passed to his grandson Ahitub (1Sam.14.3), and it certainly remained in his family till Abiathar, the grandson of Ahitub, was "thrust out from being priest unto the Lord," i.e., from Sheba's time on, "in Abijah's rebellion" (R.C.1.7,2,26.27), and the high-priesthood returned to the family of Eleazar in the person of Zadok (2.35). Its return to the elder branch was one part of the punishment pronounced against Eli during his lifetime, for his lack of control over his sons, who betrayed Ithamar's household, the priesthood, and brought the rites of religion into abhorrence among the people (2Sam.2.22-36; R.C. 2.27). Notwithstanding this failure of his old age, the character of Eli is marked by eminent piety, as shown by his meek submission to the divine judgment (1Sam.3.18), and his supreme regard for the ark of God (4.18). He "judged Israel 40 years" (ib. marg.), and died at the age of 93 years (ver. 15), stricken down by the disastrous news that the ark of God had been taken in battle by the Philistines, who had also slain his sons Hophni and Phinehas.

**Eliab.—1.** Son of Helon, and leader of the tribe of Zebulun at the time of the census in the wilderness (Num.1.9,27,7.24,29,10.16).—2. A Reubenite, son of Pallu or Phallu, father of Dathan and Abiram (16.1,12.26.8,9; Deut. 11.6).—3. The eldest brother of David (1Sam. 16.6,17.13,25; 1Chr.2.13). Elihu in 1Chr.27.18 is probably a son of Ithamar or Abiathar. A Levite in the time of David, who was both a "porter" and a musician on the "psaltery" (15.18,20,16.5).—5. One of the warlike Gadite leaders who came to David in the wilderness (12.9).—6. An ancestor of Samuel the prophet, a Kohathite Levite, son of Nahath (6.27).—7. Father of Nathanael; an ancestor of Judith (Jth.8.1).

**Eliada.—1.** One of David's sons; according to the lists, the youngest but one of those born to him after his establishment in Jerusalem (2Sam.5.16; 1Chr.3.8). He is called Beelida in 1Chr.14.7.—2. A mighty man of war, a Benjamite, who led 200,000 of his tribe to the army of Jehoshaphat (2Ch.17.17).

**Eliadah,** father of Rezon (1K.11.23).

**Eliadas** (1Es.9.28) = Elioenai, 7.

**Eliadun** (R.V. Iliadun; 1Es.5.38), possibly identical with Henadad.

**Eliah,**—1. A Benjamite chief; one of the sons of Jeroham (1Ch.8.27).—2. One of the Benjaminites (1Sa.13.27), who married a foreign wife (Ezr.10.26).

**Eliabha,** a Shalbonite, one of the Thirty of David's guard (2Sam.23.32; 1Chr.11.33).

**Eliakim,** (whom God sets up).—1. Son of Hilkiah; master of Hezekiah's household over the temple as Israel's high-priest. He succeeded Shebna in this office, with the warm approval of Isaiah (Is.22.15-23). Its important character is indicated through its tenure by Jotham, when heir-apparent (2K.15.5), cf. major domus under the Merovingian dynasty. Eliakim was a good man, as is shown by his conduct on the occasion of Sennacherib's invasion (18.37,19.1-5), and in the discharge of the duties of his high position (Is.22.21). But it is certain from the description of the office in Is. 22, and especially from ver. 22, that it was the king's house, and not (as the LXX. and Jerome) the House of God, of which Eliakim was prefect.—2. The original name of Jehoiakim king of Judah (2K.23.34; 2Chr.36.4).—3. A priest in the days of Hezekiah, who assisted at the dedication of the new wall of Jerusalem (Ne.12.41).—4, 5. Ancestors of Christ (Mt.1.13; Lu.3.30). [A.W.S.]

**Ell’all (1Es.9.34) = Binnui, 3.

**Elam,**—1. Father of Marabah, the wife of David (2Sam.11.3). In 1Chr.3.5 the names of father and daughter appear as Amuel and Bathshua. Probably the same as—
2. Son of Ahithophel the Gilonite; one of David's heroes (2Sam.23.34).

Eliao nias (1Esd.8.31).— 1. ELIONEAL is the name of ELIJAH in A.V. of N.T. and in Eccles.48.1ff., 1Mac.2.58. In Ro.11.2 the reference is not to the prophet, but to the portion of Scripture referring to him, the words being “in Elias,” not as in A.V. “of Elias.”

Elisasaph.— 1. Son of Deuel, and the Levites and descendants in the wilderness of Sinai (Num.1.14,2.14,7.42,14.47,20.10).— 2. Son of Lael; a Levite, and “chief of the house of the father of the Gershonites” at the same time (Num.3.24).

Ellashib.— 1. A priest in the time of David, the eleventh of the “governors” of the sanctuary; 1 Chr.23.32).— 2. A son of Elionai; one of the latest-named descendants of the royal family of Judah (3.24).— 3. High-priest at Jerusalem at the time of the rebuilding of the walls (Neh.3.1, etc.). His genealogy is given in 12.10ff. He was “allied” (Heb. near) to Tobijah the Ammonite, and is doubtless the same as the Elieser of Ezr.10.6.6.4. Son of the Levites of the same name of the time (Ezr.10.24), as had also — 5. A “son” of Zattu (10.27), and— 6. A “son” of Bani (10.36).

Ell asis (1Esd.9.34), perhaps identical with Elashib (Ezr.10.36).

Eliahath, son of Heman; a musician in the temple in the time of king David, who with his sons and brethren had the 20th division of the temple service (1Chr.25.4,27).

Eldad, son of Chislon, and prince of Benjamin, chosen to assist in the division of the land of Canaan (Num.34.21).

Eliel.— 1. A chief of the half-tribe of Manasseh on the E. of Jordan (1Chr.5.24).— 2. Son of Toah, and forefather of Heman the singer (6.34); possibly the same as Eliab in ver. 27 and as Elihu (1Sam.1.1).— 3. One of the Bene-Shimhi; a Benjamite chief (1Chr.8.20).— 4. Also a Benjamite, but of the sons of Shashak (8.22).— 5. The Mahavite and another; heroes of David's guard in the exterior camp of Lachish (11.11-17).— 6. Gadite heroes who came across Jordan to David when he was hiding from Saul in the wilderness of Judah (12.11).— 8. A Kohathite Levite who assisted in bringing the ark from the house of Obed-edom to Jerusalem (15.9,11).— 9. A Levite in the time of Hezekiah; one of those in charge of the temple offerings (2Chr.31.13).

Eilenai. Of the Bene-Shimhi; a descendant of Benjamin (1Chr.8.20).

Eilezer (God is help).— 1. Abraham's chief servant, called by him “Eliezer of Damascus” (Gen.15.2, A.V.; see R.V.). The phrase in ver. 2 should be “son of my house,” which merely imports that he was one of Abraham's household. For ver. 2, where R.V. shirks the difficulty, see Damascus. It is probably Eliezer who is described in Gen.24.2.— 2. Second son of Moses and Zipporah, so named by his father. “Because, said lie, the God of my father was my help, that delivered me from the sword of Pharaoh” (Ex.18.14; 1Chr.23.15,17). He remained with his mother and brother Gershom, in the care of Jethro his grandfather, when Moses returned to Egypt (Ex.4.18), she having been sent back to her father by Moses (18.2), though she had gone part of the way with him. — 3. One of the sons of Becher, son of Benjamin (1Chr.7.8).— 4. A priest in the time of Ahaziah (15.24).— 5. Son of Zichri, ruler of the Reubenites in the reign of David (27.16).— 6. Son of Dodavah, of Mareshah in Judah (2Chr.20.37), a prophet, who denounced Je-hoshaphat's alliance with Ahaziah. — 7. A chief Israelite a “man of understanding” — whom Ezra sent with others from Ahava to Carphathia, to induce some Levites and Nethinim to accompany him to Jerusalem (Ezr.8.16).— 8. 9. 10. A priest, a Levite, and an Israelite of the sons of Harim, who had married foreign wives (10.18,23,31).— 11. Son of Jorim, in the genealogy of Christ (Lu.3.29).

Elihoenai, son of Zerahiah, of the sons of Pahath-moab, who with 200 men returned from the captivity with Ezra (Ezr.8.4).

Elieho reph, son of Shisha, and one of Solomon's scribes (1K.4.3).

Elihu.— 1. One of the interlocutors of Job; described as the “son of Barachel the Buizite, of the family of Benjamin” (Job 1.1).— 2. An ancestor of Samuel called ELIAB in 1Chr.6.27 and Eliel in 6.34. — 3. “One of the brethren of David” mentioned as the ruler of Judah (27.18); called Eliab in 1Sam.16.6. — 4. One of the captains of the thousands of Manasseh who joined David at Ziklag (1Chr.12.20).— 5. An Ammonite Levite in the time of David; one of the doorkeepers of the house of Jehovah. He was a son of Shemariah, and of the family of Obed-edom (26.7). (H.C.B.)

Elijah. — 1. The Tishbite, one of the sojourners of Gilead (1K.17.1), makes an abrupt appearance in Israelitish history in the reign of Ahab. Nothing is told of his ancestry or previous history, though he may have been one of the refugees from the persecutions of Jezebel (18.1). He was “a man subject to like passions as we are” (Jas.5.17), the chief feature of his personal appearance being his hair, which flowed, like a Nazirite’s, down upon his back. He was modest, godly, and great personal strength. He was capable of long fasts (1K.19.8), of living on the most scanty food (17.6,16), of sleeping on the hard ground (19.5), was fond of the mountains (18.19,19.8; 2K.2.16), and could run a distance of 16 miles in front of the royal chariot (1K.18.42,43). There is a pathetic sense of loneliness in his earlier life (18.22,19.10,14), though later he has the devoted companionship of Elisha (19.21; 2K.3.11,2.24,6), and is a familiar figure in the schools of the prophets at Bethel and Jericho (2.3.5,15). He wore the ordinary articles of dress—viz. girded under-robe, and overall or mantle (2K.1.8, 2.14; 1K.19.13,19), which has supplied one of our most familiar figures of speech. But the characteristic which most impressed his countrymen what that he was “a man of God” (1K.17.18,24; 2K.1.0-13) whom the Spirit of God would protect from harm (1K. 18.12; 2K.2.16), and who was able to prevail in prayer with “the Lord” (1K.17.22,18.37), in whose presence he claimed to stand (17.1.18.15). Indeed, devotion to the Lord was the master-passion of his life (18.36,19.10,
ELIJAH

14, as is betokened by his name (=Jehovah is my God), which was at once a creed and a battle cry, and recognized as such (17.12.20.18.10). For the religious condition of Israel was one which called for vigorous protest. Ahab had been driven, in order to settle himself on his precarious throne, to make a political marriage with Jezebel, daughter of Ethbaal king of the Zidonians (16.34), who being himself a usurper had less compunction about deserting the traditional alliance between Tyre and Jerusalem; and the repetition of the phrase about Ahab, "which did sell himself to do that which was evil" (21.20,25), suggests that commercial interests were solidified by the match between Samaria and Zidon. To Ethbaal, whose dominions could not produce food supplies for the inhabitants,

(243) He presented himself before Ahab (1K.17.1) and announced that Ahab's prostitution of religion to politics would be severely punished; the Lord, the God of Israel, would vindicate Himself against the rival intruded upon His people for their worship; the commercial gains expected to accrue to Phoenicia would be precluded by a prolonged drought; and Jezebel's own relations would suffer by famine in punishment for the sufferings she had brought and inflicted upon Israel. Naturally he had to fly (17.3), and every means possible was taken by Ahab to secure the capture of "the troubler of Israel" (18.10, 17). At first he hid by the brook Cherith, directed thither by God and having the assurance that He Who made provision for the ravens (Job 38.41; Ps.147.9; Lu.12.24) would provide for His servant through them (1K.17.4). When the brook dried up, he was sent to a place in which he was least likely to be suspected of hiding, as it was in Jezebel's own country. [Zarephath.] Elijah's residence there is referred to by our Lord as a proof of God's loving watchfulness over those outside His covenant, and of His purpose to make such persons co-operate in the furtherance of His designs (Lu.4.26). Two miracles were performed here: the continual supply of food for the day (1K.17.16, cf. Ex.16.18), and the restoration of the widow's son to life, an instance of chastisement awakening penitence (1K.17.18) and of Elijah's sympathy and power in prayer (Ja.5.16,17). In the third year after this incident (1K.18.1), when the drought had now lasted 3 years and 6 months (Lu.4.25; Ja.5.17) and cattle were perishing for want of pasture and bread and water had become great luxuries, Elijah met

CARMEL, PLACE OF ELIJAH'S SACRIFICE. (From an original sketch by Col. Conder.)
Obadiah, who had been deputed by Ahab to search in one direction through the land for water, while he went in the other, and then told him to summon his master. The king came, and arrangements were at once made for a general meeting of the Baal prophets with Elijah at Mount Carmel. Possibly Elijah had divine authority for suggesting the ordeal; possibly Ahab felt he would like the question settled; at any rate, the scheme seems to have been long planned. Carmel had been a “high place” with an altar of Jehovah such as Jezebel had caused to be thrown down (1 K. 18. 30, 19. 10, 14). This altar Elijah repairs with an action symbolic of his purpose to demonstrate the unity of the covenant people: he “took twelve stones, according to the number of the tribes of the sons of Jacob, unto whom the word of Jehovah came, saying, Israel shall be thy name” (18. 31), and from the perennial spring under the mountain was able, in spite of the drought, to get twelve barrels of water with which the altar and sacrifice were thoroughly drenched. With a third barrel of water he demonstrated the unity of the two realms, he prayed to Jehovah “at the time of the offering of the evening oblation,” i.e. in the temple at Jerusalem (18. 36), and the fire of the Lord fell, consuming sacrifice, wood, stones, and all the water. The people accepted the result of the ordeal, and so forth. The general mood of sacrifice of the priests of Baal at Kishon (18. 40). The honour of Jehovah thus vindicated, signs of approaching rain were vouchsafed to Elijah’s messenger, and the prophet, having announced it to Ahab, runs before the king’s chariot the 16 miles to Jezreel. Reaction was inevitable after this physical and spiritual strain, and when word came to him of Jezebel’s determination to get rid of him, he fled to Beer-sheba with his servant; and leaving him there, went on alone a day’s journey into the wilderness, and resting under a desert broom requests to be allowed to die (19. 4). He was first fed with “bread and water,” then refeshed with meals provided miraculously (19. 5-8); then, having made his way to Horeb and lodged there in the pilgrim’s cave, his stormy mind was calmed by the spectacle of nature’s power and beauty, and he was brought to a sense of his responsibility for life, by being made to do that which he had so often claimed to do, viz. “stand before the Lord” (19. 11) and account for his presence there (19. 13). He states his case, and then is hidden to return, with the assurance that Ahab’s dynasty shall soon come to an end, and that his work will be taken up and continued by one whose birth pledged him to maintain the divine system of land tenure, and who had been named, perhaps through the consciousness of idolatrous oppression, “God is salvation” — Elisha. Elijah therefore returned N. and found Elisha at Abel-meholah. He had only to cast his mantle on Elisha’s shoulder, and the young man followed him, never to leave him again. From Abel-meholah Elijah went to Jezreel with a fresh denunciation of Ahab for a fresh sin. The king had wished to acquire some property from Naboth, but was refused, and, apparently while Elijah had been in the S., Jezebel determined to maintain her position in the kingdom by compassing a judicial murder. On a false charge of blasphemy Naboth and his sons were put to death, and the crown, which went to the son-in-law of Naboth, was placed on Jezebel’s head. Ahab went down to visit the newly acquired estate, accompanied by Jehu and Bidkar (2 K. 9. 25), but was met there by Elijah, whose terrible denunciation sank into the king’s heart: his repentance was so sincere that he put on sackcloth and fasted and went bare-foot, keeping every anniversary of Naboth’s death with signs of mourning (1 K. 21. 27, cf. LXX.). Three other incidents only are recorded in the life of Elijah. (1) His letter to the son-in-law of Ahab, who sat on the throne as king for some years during the life of his father Jehoshaphat (2 Chr. 21. 12). (2) His warning to Ahab’s son of his certain death of the disease about which he consulted Baal-zebub, god of Ekron (2 K. 1. 4), and the consequent destruction of two successive captains of 50, with their men, who had been sent to apprehend him; at the arrival of the third company he was directed to go to speak directly with the king. (3) He went down from Carmel to Samaria (v. 9, 15). It was this incident which inspired the emulation of the “sons of thunder,” and elicited a rebuke from our Lord (Luk. 8. 51-56). (3) His translation. Starting from Gilgal, where was a school of the prophets (2 K. 4. 38), he came and showed the prophet that the proper place begging Elisha to come no farther, his impending removal from earth being a matter of general knowledge (2 K. 2. 3, 5), but Elisha refused; and when asked by Elijah what he should do for him before he was taken away, simply requested the elder son’s portion of his spirit, and to be able to reproduce in his day what Elijah had been to his generation. Elijah’s answer was that it would all depend on the training Elisha had given to his spiritual vision, and as that condition had been complied with, Elisha saw the chariot and horses of fire which were the manifestation of the Union of Jehovah and his Son-in-law, and before Elijah “went up,” not in the chariot, but by a whirlwind, into heaven (2 K. 2. 11; cf. Judg. 20. 40). The word “went up” carries the thought forward to the Ascension of our Lord, where the word “taken up” is used by one of the two men (Ac. 1.10, 11) who dismissed the apostles, and who probably were Moses and Elijah, as they on the mount of Transfiguration had spoken of the exodus which was to be accomplished at Jerusalem (Luk. 9. 31). The announcement of our Lord’s future return is an office assigned to Elijah in the O.T. (Mal. 4. 5), and by the Jewish tradition, which enacts a pause in the celebration of the Passover for the appearance of Elijah (cf. Mt. 27. 17; Mk. 15. 35) to announce the coming of Messiah. The fulfilment of the type of Elijah by the forerunner John Baptist was only partial, as was indicated by our Lord Himself after the Transfiguration in the words “Elias truly shall come and restore all things” (Mt. 17. 11). No prophet is mentioned so often in N.T. as he (Jn. 1. 25; cf. Mt. 17. 3; Mk. 9. 4; Luk. 9. 30). He has been canonized both in the Gk. and Lat. Churches, his festival being July 20, and he is revered in the Lat. Church as founder of the “Order of Barefooted...
ELISHA

Elika', a Harodite, one of the Thirty of David's guard (2Sam.23.25).

Eelim (Ex.15.27; Num.33.9), the second station where the Israelites encamped after crossing the Red Sea. It is distinguished as having had "twelve wells [springs] of water," and threescree and ten palm-trees. Supposing Israel to have camped at 'Ayin Mûsâ after crossing the Red Sea (Robinson, *Bib. Res.* i. p. 67), and taking 10 miles as the average daily march (which fits the distances between all the known sites on their road), Marah would be at the head of the way to *Glûrûndel* where there is still a brook with stunted palms. [EXODUS, THE.] [G.R.C.]

Elimelech, a man of the tribe of Judah, and of the family of the Hezronites, who dwelt in Bethlehem-ephratha in the days of the Judges. In consequence of a great dearth in the land after having been in possession of Bethlehem-judah (7.8).—2. Fourth son of Mehemeliah, son of Kore of the sons of Asaph, a Korahite Levite, and one of the doorkeepers of the "house of Jehovah" (26.3).—5. A priest of the sons of Pashur who had married a foreign wife (Ezr.10.22). Possibly the same as—6. One of the priests who accompanied Nehemiah with trumpets at Ezra's inauguration (Ezr.8.39).—7. Of the family of Zattu, who had married a foreign wife (Ezr.10.27).

Eliphaph, son of Ur (1Chr.11.35) —Eliphaph (Elisha, as Job 12.17; 22.12; cf. Ne.1217; Ps.47.16; 147.11). He could not but show the ordinary signs of mourning; then "he took up Elijah's mantle that fell from him," assured himself that he had powers similar to his master's (2K.2.14) and received the recognition of them from others (2.15), and then made his way back to the place where his master's power would remove the scourge from his head. He was doubtless a man of real attainments, but not of the same order of power as his master was. He was, possibly, inferior to his master in real knowledge of the secrets of nature, not, however, of the higher secrets of religious power and control. His attempts to teach subjects of a higher order to himself were less successful than his attempts to teach them to others (2.15).

Eliphaph.1. The eldest son of Esau and Adah, and father of Tenem (Gen.36.6,15; 1Chr.1.35,36).—2. The chief of the "three friends" of Job. He is called "the Temanite" (Jon.4.5.15.32), the great truth brought out by him is the unapproachable majesty and purity of God (4.12-21, 15-21; 16). [TEMAN; JOB.]

Elipheleth, a Merarite Levite; one of the gatekeepers appointed by David to play on the harp "on the Sheminith" when the ark was brought to Jerusalem (1Chr.15.8,21).

Eliphelet.1. One of the sons of David, born after his establishment in Jerusalem (1 Chr.3.6), but omitted in the longer list of 2Sam.5.15,16, and in 1Ch.14.5 given as Elpalet. —2. Another son of David, the last of the jerusalem family (1Chr.3.8, cf. 2Sam.5.16,1Ch.14.7, where the vowel is lengthened and the name given as Elpalet).—3. Son of Ahasbai, son of the Maachathite. One of the Thirty of David's guard (2Sam.23.34).—4. Son of Eshek, a descendant of king Saul through Jonathan (1Chr.8.39).—5. A leader of the Bene-Adonikam, who returned from Babylon with Ezra (Ezr.8.13).—6. One of the Bene-Hashum who had married a foreign wife (Ezr.10.33).

Elisabeth, wife of Zacharias, the father of the Baptist. The name is the same as Elisheba (Ex.6.23; cf. Jeshobiha), and, as borne by the wife of Aaron, would be traditional in priestly families. Lu.1.73 may allude to its meaning, "God is an oar," i.e. "One to swear by" (Gesenius). [E.R.B.]

Eliseus, the form of the name Elisea in A. V. of the Sept., and of Elisha in the LXX. and Lu.4.27.

Elisha, the son of Shaphat of Abel-meholah, designated to Elijah at Horeb as his successor. The meeting between them was that of a hero-worshipper with his hero. The news of Elijah's ordeal and victory on Mount Carmel must have run through the northern kingdom and stimulated the Jews. When Elijah left him, Shaphat and his son, "had not bowed the knee to Baal" (19.18). At any rate, Elijah had only to cast his mantle on Elisha's shoulder and the younger man was ready to follow him. He just made a farewell to the people of his village, using for the feast the oxen with which he had been provided by his father, and then left his home, to cast in his lot with his hero. No duty that he could perform for Elijah was undone; years after he was known to the court as the man who had thrown away chances of advancement elsewhere to be the mental attendant on a dervish ("Elisha, which poured water on the hands of Elijah," 2K.3.11), and would have been a member of Omri's household (3.14,6.32). So, when the time for Elijah's translation came, though his master begged him to remain behind, he would not: he had counted the cost, he knew he had to take his master's place, and he would remain to the last with him, only asking that he might, in his day, be shown just like what he had been before, showing his spiritual lineage by his inheritance (2.10). His cry as Elijah went up in the whirlwind shows what the prophet had been to him—a constant sacrament of the divine presence and protection: "My father, my father, the chariot of Israel and the household thereof" (2K.2.12; cf. Deut.17.16; Ps.47.16,11). He could not but show the ordinary signs of mourning; then "he took up Elijah's mantle that fell from him," assured himself that he had powers similar to his master's (2K.2.14) and received the recognition of them from others (2.15), and then made his way back to the place where his master's power would remove the scourge from his head. He was doubtless a man of real attainments, but not of the same order of power as his master was. He was, possibly, inferior to his master in real knowledge of the secrets of nature, not, however, of the higher secrets of religious power and control. His attempts to teach subjects of a higher order to himself were less successful than his attempts to teach them to others (2.15). There, in the modern legend of the cave still shown at Haifa as "Elisha's school" be true (see Surt. W. Pal. i. p. 285), he taught others to walk in his master's footsteps: there he made his abode (4.10; cf. 19). It is very difficult to form any exact chronology of the events in Elisha's life, because the chapters which are concerned with it are confused in arrangement by the operation of that rule of the Heb. historians to round off one incident before proceeding.
with another, which is so vividly illustrated in Lu.1.80,2.6. In 2K.13 the incidents in vv. 14-21 must come between vv. 12 and 13, and 8.1-7 should probably come in between 4.37,38. Yet from the mention of Benhadad (6.24) and Hazael (8.29,9.14) we gather that all the public ministry of Elisha recorded for us falls within the 12 years of Jehoram, "who wrought evil, but not like his father or mother" (3.1,2). Though Jezebel's influence went against him (9.22), Jehoram called Elisha "father" (6.21: cf. 5.13), and was tolerated until in his despair at the extremity of famine in Samaria his assassination (6.31) and until his sister's influence in Judah was seen to be baneful (2Chr.22.4). Then the doom of the house of Omri fell. Three incidents after Elijah's ascension manifested Elisha's powers before he went into retreat on Mount Carmel. (1) A sensitive man might not have yielded the point about sending to look for Elijah's remains, but he gave up his own will (2K.2.17). (2) He not only tarried at Jericho, but brought to its inhabitants blessings; by casting salt into the spring, he showed how sin must be arrested at its source (2.22). (3) He showed that the God who had been to his helper, and that God would support him in his severity when "a set of boys" from the ill-famed city of Bethel made God's exaltation of the long-haired prophet a cause of mockery to him with his close-cropped locks (2.24). His fame spread to the southern kingdom. A remnant of the House of Jehoshaphat that no monarch owns "the word of the Lord is with him" (3.12); and his discipleship has its due reward when the three kings go down to consult Elijah's servant. He shows what he had learnt from his master in using external influence to calm his perturbed spirit (3.15: cf. 1K.19.11) and in making arrangements for the divine intervention to synchronize with the offering of the covenant worship in the covenant centre at Jerusalem (2K.3.20). After this, apparently he made his home in Samaria trying to influence Jehoram for good (5.3: cf. 6.1,6,21,30). Elisha, that royal guest, regarded royal power as not to hard him. Poverty meets him, and is relieved with tact and sufficiency (4.7); at the next turn he enjoys the generous hospitality of the wealthy farmer (4.8). His very bearing causes him to be known as—like Elijah—a "man of God" (4.9), the phrase being used of him 20 times; and he not only promises his hostess a son, but restores the child to life when dead. It is in this story that we first meet Gehazi, whose qualification for being with Elisha is shown by his insight (4.14), but who seems to have been spoilt by such early success. Treated with confidence, he shows himself able to obey a strict command (4.29,316), yet with apparent expectation of powers not yet committed to him (4.31b). He might have learned to trust Elisha when he raised the child to life and when later at Gilgal he healed the potage (4.38-41), but his question about the food shows that the Lord's power had not touched his master's powers (4.43) and that he was indulging the spirit which destroys religion (Ph.2.14). For 7 years, while there was famine in the land, Elisha bore with him and tried to help him, and he was proud of his association with the prophet (2K.8.4); but his character developed in insensibility to divine things, and his conduct to Naaman (5.20) shows him as avaricious and deceitful. The generosity which covered him with blessings was a manifestation of his spiritual corruption within (5.27). All the remaining stories of Elisha illustrate his insight. Naaman gets sternness or sympathy as each is needed (5.11,10); Gehazi could not deceive him ("went not mine heart with thee"? 5.26); Jehoram is warned of Benhadad's secret counsels (6.12). Taught perhaps by his failure with Gehazi, he prays for the gift of spiritual illumination for his new servant, and it is granted (6.17). His tactful treatment of the Syrian captives secures peace for Israel (6.22,23), and he foretells plenty as he had previously foretold famine (6.31). Then comes the duty of shutting the door on the king (6.32), and the end of his public ministry. He went himself to Damascus and told Hazael he was to be king (8.13), and sent one of the sons of the prophets to anoint Jehu (9.1). Then he is not mentioned for more than 40 years, during which he had passed from the scene of events in his own day to Jezreel, where he went with Jehu and the remnant of the House of Omri (6.27,29) toingly made the Israelites "like dust by threshing" (13.7), and then proceeded South to capture Gath and attack Jerusalem, but retired on receiving tribute (12.17,18). Meanwhile the Assyrian power was rising, and in it "the Lord gave Israel a saviour" (13.5), because while the Assyrians attacked Hazael's dynasty from the N., from the S. of Syria the house of Jehu was able to recover its dominions (13.25). It is then this gleam of hope is rising on the northern kingdom that we hear for the last time of Elisha. As he lies on his deathbed, king Joash visits him, and owns that he had been treated by him as if he was God (13.14). "If the Lord has made me saviour of Naaman," etc. (4.14: cf. 2.12). Elisha tries to teach the king the lesson of depending on God while independent of man, but Joash, when bidden to shoot, has not the imagination to see his foes at his feet and to shoot at them till the voice that bade him smile called him to stay. Self-consciousness, a weak dependence on others, an eye askance to see how far he may go, a feebleness within the mind, are the king's, and no power of living by the strength of individual heroism and individual devotion. His life was tested, and the drama of it fore-written from that scene of rehearsal. So Elisha passed away. But even after his death spiritual vigour was in his poor remains, and a dead man dropped in hasty burial into his tomb received life back from his contact with Elisha's bones—as to-day some victim of impure self-indulgence (the special sin of Moab) may be converted by praying over a saint's life (2K.13.21). There is only one reference in N.T. to Elisha (Lu.4.27), and that not to his typical anticipation of the loving work of the Son of Man "Who went
about doing good" (Ac.10.38) which later ages have loved to trace. Alexander in Oxford Lent Sermons, 1869; Maurice, Prophets and Kings; Newman, Sermons on Subjects of the Day: "Elisha, a Type of Christ." Is. Williams, O.T. Characters. [C.R.D.B.]

Elishah' (= son of Javan") Gen.10.4, Ezk. 27.3, mentioned as an Ionian country, with Tarshish (Tarshish), Kittim (see Cyprus), and Dodanim (perhaps Rhodes). About 600 B.C. the "isles [or, shores] of Elishah" provided blue and purple for Tyre. Josephus understands that the Eliseans were Aeolians (1 Ant. vi. 1), on the ionian shores E. of the Aegean Sea. The Talmud of Jerusalem (Megilla, 1. r7) and the Midrash and Targums read Elias or Eolus. The Amarna letters include reli from Asia—probably Elishah—which, in 15th cent. B.C., had a Semitic population ruled by a king, who sent copper to Egypt in ships, and possessed gold, chariots, and art objects. This king states (Brit. Mus. 5) that he was not familiar with the kings of the Amorites or of Shinar; and he was also an enemy of the Lukki (Berlin r1) who were either Lycians or Ligyes, but most probably the former, which would place Elishah on W. shores of Asia Minor. [C.R.C.]

Elisha ma.—1. Son of Ammihud, the leader of Ephraim in the wilderness of Sinai (Num. 1.10, 12, 15.7, 18.24, 21.), and of Joshua (1Chr. 7.26).—2. A son of King David, born after his establishment in Jerusalem (2Sam. 5.16; 1Chr. 3.8, 14, 7).—3. Another son of David (1Chr. 3.6), called in the other lists Elishua.—4. Son of Jekamiah; a descendant of Jehovah (2.1-11), possibly the same as the father of the Prophet Isiah in the related genealogy of Jehoiakim (Je. 36.1-22).—5. Scribe to King Jehoiakim (Je. 36.12ff.).—6. A priest sent by Jehovah to teach the people of Jehovah (2Chr. 17.8).

Elisha phat, son of Zichri; one of the conspirators with Jehoiada (2Chr. 23.1).—Elisha ben Amnon (Ex.6.23), daughter of Amminadab and sister of Nahshon.

Elishua' (2Sam.5.15; 1Chr.14.5) = Elisha, 3.

Eli's simus (rEsd.9.28) = Eliashib 5.

El i, a forefather of Judith (1Th.8.1).

El iud, son of Achim in the genealogy of Christ (Mt.1.15).

Elizaphan,—1. A Kohathite Levite chief, son of Uziel, at the census in the wilderness of Sinai (Num.3.30); his family is mentioned later in 1Chr.15.8; 2Chr.29.13.—2. Son of Parnach, prince of Zebulun at the division of the land (46).—3. Elizar, son of Shedeur; leader of Reuben at the census in the wilderness (Num.1.5.2.10, 7.30,35.10.18).

Elkanah,—1. One of the three sons (Ex.6.24: or, according to rEsd.6.24.23, a grandson) of Korah.—2. Another Kohathite Levite, the son of Jerahmeel, father of Samuel. All that is known of his is contained in rEsd.6.27,33,34 and rSam.1.23.2.20.—3. The father of Zeph or Zophai (rEsd.6.26.35).—4. A Levite (9.16).—5. A Korhite who joined David at Ziglag (12.1.6).—Possibly the same as—6. A doorkeeper for the ark (15.23).—7. A courtier in the reign of Ahaz "that was next to the king"; slain by Zichri the Ephraimite, when Pekah invaded Judah (2Chr.28.23).—[C.R.N.]

Elkosh', the birthplace of the prophet Nahum, "the Elkoshite" (Na.1.1). Two widely differing Jewish traditions assign as widely different localities to this place. In the time of Jerome it was identified with a small village of Galilee. But mediaeval tradition attached the name of the prophet's burial-place to Alkush, a village on E. bank of the Tigris about 2 miles N. of Mosul. The prophecy mentions Bashan, Carmel, Lebanon (1.4), and Thebes in Egypt (3.8; A.V. No), but is mainly concerned with Assyria. [Capernaum.] [C.R.C.]

Ella sar, the city of Arioch (Gen.11.4), seems to be the old Babylonian town called Larsa in Semitic Babylonian and Arama in Sumerian. Larsa was situated in Lower Babylonia or Chaldea, in the wilderness of the Ephrates. The city was now Sennacherib. Among its rulers may be mentioned Rim-Anu, Sin-iddina, Eri-Aku (Arioch), and Rim-Sin, who was defeated by Nebuchadnezzar (Am. 5.24, 26), and Samsi-una, his son. [T.G.R.]

Elna (Ho.4.13; R.V. terebinth). [O.AK.]

Elmodam, son of Er in the genealogy of Joseph (Lu.3.28).

Elna am, father of Jeribai and Josha-viah, 2 of David's guards, according to 1Chr.11.46.

El Nathan. —1. The maternal grandfather of Jehoiachin, distinguished as " the Nathan of Jerusalem " (2K.24.8), possibly identical with Elthan, son of Achbor (Je.26.22.36.12,25).—2. The name of three "learned [or, chief] men" (Ezr.8.16); in rEsd.8.44 they are represented by two names only, Nathan and Ezanaat.

Eloah, Elohim. [El; Jhovah.]

Eli, Elo, lama sabachthani, ἡμι (Elo) ἡμι λέμα σαβακθανει, (1) Linguistic. These words are given (Mt.27.46; Mk.15.41) as the actual sentence spoken by Christ on the cross. They are a quotation from Ps.22, which commences in Heb. 'ēl 'ēlā lāmā dāzabtānī. There are a number of variant readings; 'Hēm (Mt.) may be a correction to the Heb. from the Hām of St. Mark (which is nearer to the Aram. 'alobī), or may possibly be a provincial pronunciation of the Heb. The Gospel of St. Peter has the curious variant "my power." 'lama is Heb.; lena, read by some, Aram. Sabachthani is the Aram. word shebaqthani, found in the Peshitta. It is difficult to account for this combination of dialects. Probably it is due to the evangelists or to transcribers. But we may have the sentence, just as it came from one who, accustomed to speak in Aram., was quoting from the sacred tongue. It might even be that Christ used the words "Eli, Elo" (much as St. Paul says "Abba, Father"), and both words have been handed down separately. (2) Doctrinal. The fact that the Son of God should speak of Himself as forsaken by God, was an embarrassment to Whom He addressed Himself to the Father. The Son has given rise to some difficulty. Taken literally, it only proves the extent of the kenōsia, and the reality of our Lord's human nature, in that He was able to share even the experience of isolation from God. But the words are not to be narrowly pressed. Forsaken by all, in the agony of death, He uses a quotation to
express His utter loneliness, and makes His own the words of a Psalmist who was passing through an experience in some points similar. We are, however, justified in seeing in the words (a) the sense of separation from the Father entailed by the sins of the world, which Christ was bearing, (b) willingness to sound human misery to its very depth, even to the loss of the sense of the divine presence. [B.F.S.]

Elon',—1. A Hittite, whose daughter was one of Esau's wives (Gen.26.34,38.2). [Bashemath,]=—2. Second of the three sons of Zebulun (Gen.46.14; Num.26.26), and founder of the family of the Elonites. —3. A Zebulunite, and in possession of the town of Elon, 8 miles N.W. of Bethel. [C.R.C.]

Elon-beth-hanan' is named with two Danite towns as forming one of Solomon's divisions (I Kings.4.13). Now the village is called 'Anîn, 8 miles N.W. of Jerusalem, close to E. border of Dan. [C.R.C.]

Elonites. [Elon, 2.]

Eloth. [Elathh.]

Elpaal', a Benjamite, son of Hushim and brother of Abittub (1Chr.8.11).

El-paran' (Gen.14.6). [Paran.]

Eltekeh' (Jos.19.44.21.23), a town of Dan given to the Levites. Perhaps Beit Lidja, 2 miles S. of the lower Beth-horon. [C.R.C.]

Eltekon' (Jos.15.59), a town of Judah in the Hebron mountains, possibly the older form of Tekoa. The KJV transliterates the name Nisim-arki and distinguishes it from Theko (thēko), mentioned in the added verse, immediately after, with Bethlehem. This verse appears, however, to be a very late gloss, and gives to Judah towns which lay in Benjamin, such as Kuluon (Qolonia—a Latin name), Tatam ('Ain et Tut), Thobes (Sōba), Karem ('Ain Kārim), Galem (Beit 'Jala), Thbeer ('Ain Thbeer), Bethor (Rās Nāhā), and the village of nocho (Mālākh), besides Aitan ('Ain 'Atān) and Phagor (Faghūr), just inside the border of Judah. These eleven added cities all lie close together W. and S.W. of Jerusalem. [C.R.C.]

Eltolad', one of the cities in the S. of Judah (Jos.15.30) allotted to Simeon (Jos.19.4). El toled, the name of that tribe until the time of David (1Chr.4.29).

Elul' (Neh.8.15; 1Mac.14.27). [MONTH.]

Eluzai', one of the warriors of Benjamin, who joined David at Ziklag (1Chr.12.5).

Elymais' (Elymais), Gk. form of Elam ('Elam), Assy. ēlāmu, ēlānu, meaning "the highland," translated by Akkad. name Nin-ma-ki. Later, the province of Elymais on the Persian Gulf was separated from Susiana (in the narrower sense) by the Ulai (Oulaeus): in a wider sense Susiana included Elymais (the Elam of Ezra 4.9). The city Elymais (1Mac.6.1) never existed: the incident recorded in this verse is doubtless that mentioned in 2Mac.9.1-2, and Persepolis bears nearly the same name as the province of Persis in which it stood, which accounts for the blunder. Polybius, however, places the attempted temple-plundering in the province of Elymais. [W.S.T.C.T.]

Elymas, the magian (A.V. sorcerer), or "wise man" (cf. Mt.2.1), further described as "a false prophet, a Jew," who withstood St. Paul (Ac.13.8), and, as a punishment, was stricken with temporary blindness. Barjesus being merely a patronymic, he had assumed the title Elymas also, which St. Luke seems to translate as "the magician," but the derivation of Elymas remains uncertain. [E.R.B.]

ELYMANS (K.V. Elymaeans). [ELAMITES.]

Elyon. [EL.]

Elzabad.—1. One of the Gadite heroes who crossed Jordan to join David at Ziklag (1Chr.12.12).—2. A Korhite Levite who was a doorkeeper of the sanctuary (1Chr.26.7).

Elzaphan' (Ex.6.18) = Elizaphan, 1.

Embalming. Only mentioned twice (Gen.50.2-3 and 26) in Holy Writ. Apparently embalming was practised by the ancient Egyptians in many different ways. Probably, underlying the practice, there was a belief that the soul, in spite of its transmigration, had some connexion with the body so long as the latter remained on earth. It was not only the bodies of great people thus preserved, but they were sealed up in vastly heavy sarcophagi and hidden in tombs (e.g. the Pyramids) so cunningly as to be only discovered by cutting away the solid walls of the passage. According to Herodotus, there were three methods of embalming. In the first the head was cleansed of brain, etc. through the nostrils, the skull afterwards being rinsed with drugs. The abdomen and thorax were opened by means of a cutting in the side, and the viscera removed; the cavities being filled with myrrh, acacia, and other spices (cf. Jn.19.39), and the opening sewn up. The body was then placed in a sarcophagus or stone container for 70 days. At the end of this time it was washed to avoid crystalization on the surface, and bandaged with fine linen cloth, which had been previously soaked in gum. It was then placed in a wooden case, the outside of which was carved to resemble the features of the deceased, and the whole coffin or sarcophagus stood upright against the side of the sepulchre chamber. This method cost about a talent of silver, i.e. roughly, £200 to £300. In the second method there were no incisions made in the body, but the cavities were filled with cedar-wood oil, and the body laid in a sarcophagus as before. At the end of 70 days the oil was allowed to escape by the natural vent, and brought with it at least the greater part of the viscera, which it destroyed. This process cost from £80 to £100. In the third process, which was very cheap, the body was merely emptied with a powerful elyros or enema, and soaked in natron. Although embalming does not appear
to have been practised by the Jews, they evidently buried those whom they desired to honour wrapped with ointment and spices (1 Th. 4.14). Hence Judg. 6.33.) It has been suggested that in Job 21.33 we should read "bees" (naẖil) for A.V. "valleys," in the description of a rich man's funeral. Thus "the clouds of the bees are sweet on him" would indicate a sort of embalming by honey, or wax, or honeycomb. Herodotus (i. 198) says that the Babylonians embalmed in honey, and the Talmud (Tan. Bab. Baba Bathra 3b) says that Herod embalmed Marianne in honey.

[Embroiderer. [Handicrafts, (9).]}

Embroidery, a precious stone, first in the second row, on the breastplate of the high-priest (Ex. 28.18, 39.11), imported to Tyre from Syria (Ezk.27.16), used as a seal or signet (Eccles.32.6), as an ornament of clothing and bedding (Ezk.28.13; Jth.10.21), and spoken of as one of the foundations of the new Jerusalem (Rev.21.19; Tob.13.16). The rainbow round the throne is compared to embroidery in Heaven; it was known long before in the days of Pliny, and is probably intended here [Carbuncle], though we must remember that in the rainbow the red and violet tints are also conspicuous. The stone called urruq (=green) by Babylonians was probably the emerald. As emeralds are obtained in Upper Egypt (Tell el-Far’ah), at Thebes (Abydos), and the surrounding desert mountains, and is an attractive object, it may have been used for an ornament at an early date. [T.G.B.]

Emerald, or Nicopolis (1Mac.3.40), a town at the foot of the mountains of Judah, 22 Roman miles from Jerusalem, and ro from Lydda. It was fortified by Baccchides, the general of Demetrius, when at war with Jonathan (1Mac.9.50). In the plain beside this city Judas Maccabæus signally defeated the Syrians (1Mac.3.57, 4.3). A small village called 'Annawas still occupies the site, with remains of an early church (Surv. W. Pal. iii. p. 63).

Emmaus, or Nicopolis (1Mac.3.40), a town at the foot of the mountains of Judah, 22 Roman miles from Jerusalem, and ro from Lydda. It was fortified by Baccchides, the general of Demetrius, when at war with Jonathan (1Mac.9.50). In the plain beside this city Judas Maccabæus signally defeated the Syrians (1Mac.3.57, 4.3). A small village called 'Annawas still occupies the site, with remains of an early church (Surv. W. Pal. iii. p. 63).

Emmanu’el (Acts.7.16), "the father of Syria," A.V.; correctly, "Hamor of Sichem," R.V. It occurs at least once between the two transactions of Abraham (Gen.23) and Jacob (33.19); though the difficulty disappears if, with some commentators (see Speaker's Comm. ad loc.), we regard "Abraham" as an interpolation in the Gk. text.

Enam (Jos.15.34), a city of Judah in the Shephelah. This Enam is probably noticed also in Genesis (38.14) as on the road to Timnah (Tibneh); see R.V. "in the gate [or, opening] of Enaim." There is a ruin called Kefr ‘Ana, 6 miles N.W. of Tibneh, in the place where the valley of Sorek enters the Philistine Plain. It seems to be the Beth Anath of Tibnah (2Sa.1.11), near En-gannim of Judah (1Sa.3). If the flocks of Judah were pastured in this valley, the site would fit that of the place where he met Tamar, and also of Enam, noticed with En-gannim and other towns near the valley of Sorek. [C.R.C.]

Ena’b, father or ancestor of Ahira (Num.1.15).

Enan’usbus (1Esd.9.34) = Elishaph, 6.

Encampment (Heb. mahâhân, in all places except 2K.6.6, where tahândôh is used). The word primarily denoted the resting-place of an army or company of travellers at night (Gen.32.21; Ex.16.13), and was hence applied to the army or caravan when on its march (Gen.32.7, 8; Ex.14.9; Jos.10.5, 11). The description of the camp of the Israelites, on their march from Egypt (Num.2.3), supplies the greatest amount of information on the subject. The sanitary regulations of the camp of the Israelites were for the twofold purpose of preserving the health of the vast multitude and the purity of the camp as the dwelling-place of God (Num.5.3; Deut.23.14). The execution of criminals took place without the camp (Lev.24.14; Num.15.35, 36; Jos.7.24), as did the burning of the young bullock for the sin-offering (Lev.4.12), both of which circumstances are referred to in Heb.13.12. High ground was always selected for the position of a camp, whether on a hill, a mountain side, or in an inaccessible pass (Judg.7.18). Another important consideration in fixing upon a position for a camp was the propinquity of water; hence in most instances camps were pitched near a spring or well (Judg.7.1; 1Mac.9.33). The camp was surrounded by the ma’gâlîd (trench; 1Sam.17.20), or ma’gâl (1Sam.26.5,7), which some explain as an earthwork thrown up round the encampment, others as the barrier formed by the baggage-waggons. There was the less need of a formal entrenchment, as few instances occur of engagements in the camps themselves, and these were night attacks only. To guard against these, sentinels were posted (Judg.7.19; 1Mac.12.27) round the camp. The valley which separated the hostile camps was generally selected as the fighting ground (1Sam.4.2, 14.15; 2Sam.18.6), and hence the valleys of Palestine have borne a name as a part in its history (Jos.8.13; Judg.6.33; 2Sam.5.22, 8.13, etc.). When the fighting men went forth to the place of marshalling (1Sam. 17.20), a detachment was left to protect the camp and baggage (1Sam.17.22, 30.24).
Enchantments. [DIVINATION: MAGIC.]

En-dor', a place in the territory of Issachar, yet possessed by Manasseh (Jos.17.11). Eusebius (Onomasticicon) describes it as a large village 4 miles S. of Tabor. Near it Sisera was defeated (Ps.83.10), and here Saul consulted the witch (1Sam.28.7). Now Andor, a small village S. of Tabor and 6 miles E. of Nazareth. [C.R.C.]

En-egla'im, a place named only by Ezekiel (47.10), apparently opposite Engedi. Probably Eglaim in Moab (Is.15.8). [C.R.C.]

Enemessar is the name of Shalmaneser in the book of Tobit (1.2, etc.).

Ene'nius, a name which takes the place in Esd.5.8 of Nahum (Ne.7.7).

En-gaddi' (Ecclus.24.14). [En-gedel.]

En-gannim 'spring of gardens.'—I. (Jos.15.34.) A town of Judah in the Shephelah region, near Zanoah. Now the ruin Umm Jina (Clermont-Ganneau), 3 miles N.W. of Zanuda. It is noticed in 16th cent. B.C. in the list of Thothmes III. (No. 113), as An Kenamu near Enam (111).—2. A city of Issachar given to the Levites (Jos.19.21, 29). Now the town Jenin on S. border of the plain of Esdraelon. Josephus calls it Ginea on the border of Samaria and Galilee (3 Wars iii. 4). [C.R.C.]

En-ge'di' (spring of the kid), a town in the desert of Judah (Jos.15.62) amid the "rocks of the wild goats" (1Sam.23.20, 24.1.2, 20.21) now 'Ain Fiji, a spring on the W. of the Dead Sea, about the middle of its length. It had vineyards and palms (Can.1.14; Ecclus.24.14), and was close to the lake (Ezk.47.10). The ibex, or wild goat, is still found here in large herds. The older name was Hazezon-tamar, or "clefts of the palm" (Gen.46.7; 2Chr.20.2), a name still extant in that of Hasadeh, a valley 7 miles N. of the spring. Here also was the "ascent of har-cy," or rock-cut road from the shores to the plateau (2Chr.20.16). [Ziz.]

The balsam of Engedi was famous (Josephus, 9 Ant. i. 2; Tal. Bab. Sabbaths 26a); and Phiny speaks of its palms (Hist. Nat. v. 17). The perennial spring (with a temperature 85° Fahr.) issues from under a huge Boulder, 610 ft. above the Dead Sea, and 1,340 ft. below the desert plateau. The rock-cut road leads down past it. The stream flows into the lake below, down a steep slope, and was once used for irrigation. It is fringed with canes, acacia, tamarisk, and 'osher trees (Calotropis procera) or "apples of Sodom." N. of the spring is a platform of large undressed stones, with traces of old garden terraces. Judah's bow is a ruined mill. Vines were cultivated here even in 12th century A.D. (See Surv. W. Pal. iii. pp. 384-387). [C.R.C.]

Engine. [ARMS.]

Engraver. [HANDICRAFTS, 2.]

Engraving. [WRITING.]

En-haddah' (Jos.19.21), the "boundary", a town of Issachar. It is probably Keft Ashdan, a village with a well to the W., on the edge of the plain of Esdraelon, 3 miles N.W. of Jem. In the Mishna (Gittin vii. 7) it is called Caphar-Outheni, on the border of Samaria. [C.R.C.]

En-hakkôre (Judg.15.19; spring of the crier). [RAMATH-LEHIL.]

En-hazor' (Jos.19.37; spring of enclosure), a fenced city of Naphtali. Now the ruin Hazor, with a spring called 'Ain Hazor, 10 miles W. of Kedesh, with which it is noticed. [C.R.C.]

En-mishpat' (Gen.14.7). [Kadesh.]

Enoch (benehemoth, i.e. "great cow." Cf. Turkish elch = "cow").—1. The eldest son of Cain, who called the city which he built after his own name (Gen.4.17, 18).—2. Son of Jared and father of Methuselah (5.21ff.; Lu.3.8), seventh in descent from Adam in the line of Seth (Gen.5.21ff.; Lu.3.28; Jl.14). In Gen.5.22 it is said that Enoch "walked with God," an expression which is not found elsewhere of Noah (8.9; cf. 17.1). After living 365 years "he was not; for God took him," an assertion which is thus expanded in Heb.11.5: "By faith Enoch was translated that he should not see death; and he was found not, because God translated him." Both the Latin and Gk. fathers cite Enoch as a prophet as well as a witness of the possibility of a resurrection of the body, and of a true human existence in glory; and the voice of early ecclesiastical tradition is almost unanimous in regarding them as "the two witnesses" (Rev.11.3ff.) who should fall before the "beast." For legends connected with Enoch, see Jews, Engedi, and Ryle, Early Narratives of Gen.—3. In 2Esd.6.49,51 Enoch stands in the Latin and A.V. for Behemoth in the Apocryphal and in R.V. [H.C.R.]

Enoch, The Book of. This book—quoted by Jude (vv. 14, 15), cited as Scripture in the Ethiopic Targum Neophythus (v. 2), and referred to by Clemens Alexandrinus, Origen, and other Fathers—was lost sight of for nearly a millennium. Extracts from it had been made by Georgius Syncellus in 8th cent.; but after that there is no record of acquaintance with it. In 1773 Bruce, the Abyssinian traveller, brought to Europe three copies of an Ethiopic translation. Nearly 50 years later Archbishop Lawrence, in 1821, published an English translation of this, and 17 years later an edition of the text. About the same time Hoffmann issued the first German translation. In 1851 Dilhmann published his edition of the Ethiopic text. Schodde's English translation followed in 1882; that of Charles
ENON

in 1893. This last had the advantage of the use of a large number of MSS. of the Ethiopic Enoch brought to Britain in 1868, after the capture of Magdala. The text of Enoch may be divided into four portions: (1) The book of the Angels (ch. 1–36) is an account of the sin of the angels referred to in Gen.6:2, and their punishment. There is an episodical account of the sources of physical phenomena, followed by an account of the places of woe and of bliss. (2) The book of Similitudes (ch. 37–71). There are three similitudes: the first is of the dwellings of the righteous; the second of the place of punishment; the third is confused, and interpolated from another apocalyptic book, the book of Noah. (3) The book of the Courses of the Luminaries of Heaven (ch. 72–91) contains a fragment of a later member of the same In order to make the year a multiple of 7, and have exactly 52 weeks, the writer declares it to have only 364 days, despite the fact that the neighbouring peoples had a year more nearly agreeable to astronomical truth. After the astronomical section he gives an account of the history of Babylon (ch. 92–104) consisting of exhortations, which Enoch addresses to his assembled descendants. After this some fragments have been added. These divisions do not represent the real structure of the book. The theories as to the history of its evolution are many. None regard it as a unity—not to speak of the Noachian fragments, in which, not Enoch, but Noah is the speaker—differences in the names given to the angels, different ideas as to the constitution of the heavens, mark off certain portions from the rest. Mr. Charles regards the book of the Angels as the earliest portion; he had in mind a combination with the majority of students of apocalypticists. Thereafter, at various dates, the remaining portions are added. The book of Similitudes be thinks late. In opposition to the common opinion of critics, the present writer ventures to regard the book of Similitudes as the nucleus of the whole. In it were inserted the Noachian fragments which were either extracted from an otherwise lost book of Noah or invented by an editor and inserted under Noah's name. To the author of the Similitudes may be attributed a portion (91–99) of the fourth book. The first book and the opening portion of the third appear to be the work of a later member of the same school. The probable date of the nucleus may be proved to be earlier than the book of the Angels by the comparative simplicity of its physical speculations. The note of time indicates that it was written during the reign of Antiochus the Great, approximately 210 B.C. The later portion may be dated 160 B.C.; the Noachian fragments at some intermediate date. The title "Son of Man," which our Lord uses of Himself, appears to be taken from this book, as in it the "Son of Man" is a title ascribed to the Messiah. What is called the Selavonic book of Enoch is a later product, probably written in Egypt, and may be dated approximately 60 A.D. [J.E.E.T.]

Enon. [AENON.]

Enos, properly Enosh (1 Chr.1:1), son of Seth (Gen.4:26,5:8ff.; Lu.3:38).

EPAPHRAS

En-rimmon', one of the places which the men of Judah rehabeited after their return from the Captivity (Ne.11:29). Probably the same as 'Ain and Rimmon' (Jos.15:32) and "Ain, Remmon" (19:7; 1 Chr.4:32). Called Rimmon in Zech.14:10. Apparently Umm er Rumamin, a ruin 11 miles N. of Beer-sheba. [c.r.c.]

En-ro'gei (spring of the water channel), a spring immediately E. of Jerusalem (Jos.15:7, 18:16), by the stone Zzoneleth (1 K.1:9) and outside the city (2 Sam.17:17). The only spring in this situation is now 'Ain Umm ed Deraj (mother of steps), otherwise Gihon, and perhaps Bethesda. Before its waters were carried by Hezekiah to Siloam by the rock aqueduct, it had no doubt a "channel" in the Kidron Valley, which it stopped up. [c.r.c.]

En-she'mesh, a spring which formed one of the landmarks on the N. boundary of Judah (Jos.15:7) and the S. boundary of Benjamin (18:17). The position is that of 'Ain Hóf, a mile E. of Bethany. [c.r.c.]

Ensign (nēs; in A.V. generally "ensign," sometimes "standard"; degkel, "standard," in recent Can.5-4; bānah, "a'oth, "sign"). The distinction between these three Heb. terms is marked by their respective uses: nēs is a signal; degkel a military standard for a large division of an army, and 'oth a small one. Neither, however, expresses the idea of a flag: the standards in use among the Hebrews probably resembled those of the Egyptians and Assyrians—a figure or device of some kind elevated on a pole.

En-tappu'ah (Jos.17:7). [Tappuah.]

Epae'netus, one of the first converts made in the province of Asia (Ro.16:5; A.V. Achara, but see R.V.). [E.R.B.]

Epaphras, a Colossian, not identical with Epaphroditus of Philippi who bore the same name in its full, unabbreviated form. He had on St. Paul's behalf (Col.1:7, R.V.) evangelized Colossae. Anxiety for the faith of his converts (cf. Col.4:12, 13) was probably the cause of his journey to Rome, to see St. Paul (cf. Ph.23); and the result of his report was the writing of the epistle. Lightfoot, Colossians, pp. 31 ff. [E.R.B.]
Epaphroditus came to St. Paul at Rome as bearer of gifts from the Philippians (Ph. 4.18), and remaining there for personal service to the apostle and for the work of Christ, incurred a dangerous illness (2.27), but recovered and was sent home. Lightfoot, *Philippians*, p. 50. [E. R. B.]

**Ephah.**—1. The first, in order, of the sons of Midian (Gen. 25.4; 1 Chr. 1.33), afterwards mentioned in Is. 60.6,7. No satisfactory identification of this tribe has been discovered.—2. A descendant of Judah (1 Chr. 4.17).—3. One of the heads of Manasseh on the E. of Jordan (1 Chr. 5.24).

**Ephah [Weights and Measures].**

Ephah, a Netophathite, whose sons were among the "captains of the forces" left in Judah after the deportation to Babylon (E. 40.8).

**Ephes.**—1. The second, in order, of the sons of Midian (Gen. 25.4; 1 Chr. 1.33). His settlements have not been identified with any probability.—2. A descendant of Judah (1 Chr. 4.17).—3. One of the heads of Manasseh on the E. of Jordan (1 Chr. 5.24).

**Ephes-dammim.** [Pas-dammim.]

Ephesians, Epistle to the, written by St. Paul from Rome, and carried with Colossians and Philemon into Asia by Tychicus. It was almost certainly not addressed exclusively to Christians in Ephesus, but was an encyclical or "circular" letter, sent by rotation or in several copies to many, or all, of the "churches of Asia." So only can we account for (a) the omission, in the most MS., of the words to Ephesians from the opening sentence, and (b) the absence of personal greetings. The epistle falls into two parts, one (1-3) doctrinal, the other (4-6) mainly practical. After the salutation (1.1f.) comes a hymn of praise (1.3-14) for the redemption "in Christ" of things created; then (1.15-2.22) a thanksgiving for the faith, and a prayer for the illumination of the recipients; followed by a triumphant assertion of what God, after the raising and exaltation of Christ, had done for men, once aliens, now reconciled, Gentile and Jew, "both in one body," to God "in Christ"; and then a declaration of the mind of the writer, hitherto hidden, now revealed—that "the nations" are "fellow-members of the one body and partakers of the promise in Christ Jesus through the gospel"; then another prayer, ending in a doxology, to God the Father. The second part, after dwelling (4.1-6) on the ideal unity of the Church—"upholding one another in love," guided by "the Spirit," owning "one Lord," guided by "one God and Father of all," and then (7-12) on the diversity, within it, of individual gifts and functions, goes on to show what the Christian life and character should be. From general exhortation the epistle passes to specific prohibitions and precepts (4.25-5.21), and then (5.22-6.9) to particular reciprocal duties of the family. Lastly (6.10-20) he describes the armour of the Christian warriors in warfare against the powers of evil. About one-third of the epistle finds a parallel in Colossians. It is presupposed by 1 Peter. Reminiscence of it may be traced in Clem. Rom., Ignatius, Polycarp, Hermas, and in early gnostic works. It is explicitly quoted as Pauline first by Irenaeus, then by Tertullian and Clem. Alex. The authenticity of the epistle has, however, been questioned, and needs therefore to be established, principally on internal evidence. The chief arguments for its forgeries against Pauline authorship are: (1) a number of words peculiar to this epistle; (2) doctrinal divergence from the four undisputed letters (1 Cor., 2 Cor., Gal., Rom.) of St. Paul; (3) the advanced stage of church-organization which it is said to imply. They are met by observing (1) that most of the "peculiar" words are due to the subject-matter; (2) that in doctrine, differences notwithstanding, it has profound essential connexion with the four standard epistles, especially with Romans—to which, indeed, it is complementary; (3) that no hierarchy is implied, but only a distribution of gifts and abilities, such as are already distinguished in the subject-matter; (4) that the present conception of the unity of the Church appears. Rightly understood, the epistle is the crown and consummation of St. Paul's creative theology. The Pastoral forms an epilogue to the great drama of the nine Pauline epistles to churches, of which Ephesians is the last and the most catholic.

**Ephesus,** an illustrious city in the district of Ionia, nearly opposite the island of Samos, and about the middle of the W. coast of the peninsula commonly called Asia Minor. It was the capital of the Roman province of Asia.—1. *Geographical Relations.* All the cities of Ionia were renowned for their site, suitable for the growth of commerce, and prosperity, and none more so than Ephesus. In the time of Augustus it was the great emporium of all the regions of Asia within the Taurus; its harbour (named Panorinus), at the mouth of the Cayster, was elaborately constructed. St. Paul's life alone furnishes illustrations of its mercantile relations, with also the conception of the unity of the Church appears. Rightly understood, the epistle is the crown and consummation of St. Paul's creative theology. The Pastoral forms an epilogue to the great drama of the nine Pauline epistles to churches, of which Ephesians is the last and the most catholic.

VIEW OF EPHESUS.
(Reproduced by permission of Mr. H. T. Ashby.)

EPHESUS THEATRE.
(Reproduced by permission of Mr. H. T. Ashby.)
Persian war, was burnt down in the night when Alexander the Great was born; and another structure, raised by the enthusiastic co-operation of all the inhabitants of "Asia," took its place. The magnificence of this sanctuary was a proverb throughout the civilized world. In consequence of this devotion the city of Ephesus was called the προάξος (Ac. 19.35), or "warden," of Diana. On account of the celebrity of Diana's worship a large manufactory grew up there of portable shrines, which strangers purchased, and devotees carried with them on journeys or set up in their houses. Of the manufacturers engaged in this business, perhaps Alexander the "coppersmith" (2Tim.4.14) was one.

The case of Demetrius the "silversmith" is explicit.—III. STUDY AND PRACTICE OF MAGIC. Not unconnected with the preceding subject was the remarkable prevalence of magical arts at Ephesus. In illustration of the magical books which were publicly burnt (Ac.19.19) under the influence of St. Paul's preaching, it is enough here to refer to the Ἐφεσια γράμματα (mentioned by Plutarch and others), which were regarded as a charm when pronounced, and when written down were worn as amulets.—IV. PROVINCIAL AND MUNICIPAL GOVERNMENT. It is well known that Asia was a proconsular province; and in harmony with this fact we find proconsuls (A.V. "deputies") specially mentioned (ver. 38). Again, we learn from Pliny (v. 32) that Ephesus was an assize-town, and in Ac.19.38 we find the court-days alluded to as actually being held (A.V. "the law is open") during the uproar. Ephesus itself was a "free city," and had its own assemblies and its own magistrates. The senate is mentioned by Josephus; and
St. Luke, in the narrative before us, speaks of the ἰδίας (vv. 30, 33, A.V. "the people") and of its customary assemblies (ver. 39, Acts 14:27). A special mention is made of one of the most important municipal officers of Ephesus, the "town clerk" or keeper of the records, whom we know from other sources to have been a person of great influence and responsibility. It is remarkable how all these political and religious characteristics of Ephesus, which appear in the sacred narrative, are illustrated by inscriptions and coins. Many coins of Ephesus bear allusion to the worship of Diana in her various aspects. That Jews were established there in considerable numbers is known from Josephus (14 Ant. x. 25), and might be inferred from its mercantile eminence, but is also evident from Ac.2:26.9.

It is here, and here only, that we find disciples of St. John the Baptist explicitly mentioned after the ascension of Christ (Ac.18.25,19.3). The case of Apollos (18.24) is a further instance of the intercourse between this place and Alexandria. The first seeds of Christian truth were sown by Apollos at Ephesus, and from him, after the Great Pentecost (Ac.2), in St. Paul's stay of more than two years (19.8,10,20.31), which formed the most important passage of his third circuit, and during which he laboured, first in the synagogue (19.8), and then in the school of Tyrannus (ver. 9), and also in private houses (20.20), during which time he wrote 1Cor. 1,4, we have the period of the chief evangelization of this shore of the Aegean. The address at Miletus shows that the church at Ephesus was thoroughly organized under its presbyters. At a later period Timothy was set over them, as we learn from the two epistles addressed to him. Among St. Paul's other companions, two, Trophimus and Tychicus, were natives of Asia (Ac.20.4); the latter probably (2Tim.4.12), the former certainly (Ac.21.29), of Ephesus. In the same connexion we ought to mention Onesiphorus (2Tim.1.6,16) and his household (4.16), and on a certain day in Ephesus Apollos, one of the antagonists of the apostle, the sons of Ceva and his party (Ac.19.14), Hymenaeus and Alexander (1Tim.1.20; 2Tim.4.14), and Phygelus and Hermogenes (2Tim.1.15). The site of ancient Ephesus has been examined by many travellers during the last 200 years. The whole place is now utterly desolate, with the exception of the small Turkish village at Ayasuluk. The ruins are of vast extent, both on Coressus and on the plain; but there is great doubt as to many topographical details. It is satisfactory, however, that the position of the theatre on mount Prion is absolutely certain.

**Ephraim.**

The simplest form of ephod of which we read was the linen ephod (ἐφόδιον βαθῶς), the distinguishing dress of the ministrant priest (1Sam.2.18; 22.18; 2Sam.6.14), which seems to have been a vest or tunic bound to the body by a broad breast-strap. A much elaborated garment was the ephod of the High-priest, described in Ex.28.6-8,27; 29.5,39.2-2.5; Lev.8.7. This was made of richly variegated stuff of four colours, interwoven with gold thread, supported by two shoulder-strap, and held round the body by a band of the same material. On each of the shoulder-straips was an onyx stone, on which were engraved the names of six of the tribes of Israel. Attached to the front of the ephod, and filling the space between the shoulder-strap, was the breast-plate, with 12 precious stones in four rows, each stone also engraved with the name of one of the tribes. In this breast-plate was a kind of pocket, containing the Urim and Thummim, or sacred lots, by the use of which oracles were delivered. As we read several times of the ephod being "carried" and "brought near" when the people wished to "inquire of the Lord," we may suppose that the sacred lots were considered an indispensable part of it; and so there was a priest who took charge of it. This may throw some light on those passages in which the ephod is spoken of in such a way that many consider that it was an idolatrous image. An ephod and teraphim were part of the furniture of Micah's shrine (Judg.17.15), and Gideon made an ephod of the gold ornaments of theMidianites, and hid it "in Ephraim," where it became a snare to Gideon and to his house. The prophet Isaiah uses a derivative word (לָחָדָא) to denote the "plating" of molten images (Is.30.22); and it may be that the original coat became a rich coating, superimposed upon a figure or stand, which was introduced when an oracle was to be sought by the sacred lots. It does not seem that the ephod itself was worshipped, but rather that it was made the accompaniment and instrument of superstitious worship.

**Ephraim.**

The younger son of Joseph (Gen.41.52,48.13-20). The strong tribes of Joseph and Judah occupied the mountains of south and central Palestine before Joshua allotted parts of the conquered land to Benjamin, Dan, and Simeon. Thus Ephraim marched with Judah at Gezer (Jos.16.3) before Dan received its territory. The N. border of Benjamin was the S. border of Ephraim (16.1-5,18.11-14), running from Jordan and Naaran N. of Jericho to Beth-aven, and thence S.W. to Luz, Ataroth-adar, and Beth-horon. N. of this line Ephraim held a region of rugged...
mountains, with springs and orchards; but the brother-tribe of Manasseh was more powerful (Jos.17.17), and Ephraim’s lot was only 300 sq. m. against Manasseh (partly conquered) for Manasseh W. of Jordan. The N.W. border was formed by the brook Kanah, dividing Ephraim and Manasseh, and ran by Michmethah, E. of Shechem, and by Taanath-shiloh and Janohah, above the Jordan Valley, going down to Naaran (see further under Naaran). It is remarkable that few towns within the lot of either Ephraim or Manasseh are enumerated in the book of Joshua: the region coincided closely with Samaria in extent. The term Mount Ephraim seems used with a wider significance than that of the tribal lot in later times (1Sam.11:1; 2 Chr.13.4,19,15.8), since it apparently included Bethel, Ramah, and Ephraim, which once belonged to Benjamin. [c.r.c.]

Ephraim, near Baal-hazor (2 Sam.13.23), or Ephraim near Bethel and Jeshanah (2 Chr.13.19), and near the “wilderness” (Jn.11.54)—the “city called Ephraim,” to which our Lord retired—are all names of Ophrah (Jos.19.21). Ophrah was on the E. border, and places it 5 Roman miles E. of Bethel, where is now the village Ta’ivishab, with a ruined church and a fine view of the wilderness and of the Jordan Valley beyond. It lies within the border of Benjamin. [Apherema.] [c.r.c.]

Ephraim, Gate of (2K.14.13; 2 Chr.25.29; Ne.11.32; 12.39), a gate on the S. side of Jerusalem. [c.r.c.]

Ephraim, Wood of, a forest E. of Jordan, in which the fatal battle was fought between the armies of David and Absalom (2 Sam.18.6). The site is unknown. [c.r.c.]

Ephramite.—1. Of the tribe of Ephraim (Judg.12.5; see R.V.).—2. An Ephrahite (n.1.23), a dweller on Mt. Ephraim. [c.r.c.]

Ephraim. [Ephrahim.]

Ephratathah, or Ephrathah.—1. Second wife of Caleb the son of Hezron, mother of Hur, and grandmother of Caleb the spy, according to 1 Chr.2.19,50, but see 2.24 and 4.47. The ancient name of Bethelhem-judah (Gen.35.19; Jos.19.47; Ps.132.6). The place signifies “fruitful.” [c.r.c.]

Ephrathah.—1. An inhabitant of Bethlehem-ephrah (Ru.1.2; Is.17.12). Possibly the same meaning in 1 Sam.1.1. [Ramathaim-zophim; Zuph.—]—2. An Ephrahite (1 K.11.26).

Ephron, the son of Zohar, a Hittite, from whom Abraham bought the field and cave of Machpelah (Gen.23.8-17; 25.9,49,29,30,50.13).

Ephron, a strong city between Carmain (Asheroth-Karnaim) and Beth-shean, attacked and demolished by Judas Maccabaeus (1 Mac.5.49-52; 2 Mac.12.27). The site is unknown. [c.r.c.]

Ephron, Mount. The “cities of mount Ephron” formed landmarks on the northern boundary of Judah (Jos.15.9). Apparently places near Ephrathah (Bethlehem). [c.r.c.]

Epicureans. [Stoics.]

Epiph’anes (1 Mac.1.10,10.1). [Antiochus IV.]

Epiphany. [Jesus Christ; Magi.]

Ep’iphi (Ἐπιφής, 3 Mac.6.38), the name of the 11th month of the Egyptian Vague year, and the Alexandrian or Egyptian Julian year.

As the Egyptian month had 30 days, from Pachon 25 to Epiphi 4 would be an interval of 40 days, as in Doc.18.4.

Epistle. It is well to distinguish between letter and epistle, the latter being more formal and artificial in character. Intercommunication by letter was one of the earliest results of the invention of writing, but in a primitive society it would be the privilege of only the superiors. O.T. technically all the letters mentioned are of the nature of epistles, i.e. formal communications, mostly from superiors to inferiors. The Amarna tablets imply that such communications must have been common in Palestine some centuries before the earliest letter mentioned in O.T.; and the private letters found among the Oxyrhynchus Papyri (ed. Grenfell and Hunt, 1898-1899) make it remarkable that there is so little reference to private letters among the Jews in later O.T. times. The following O.T. epistles may be noted as specimens: David to Joab (2 Sam.11.14,15); Jezebel to Naboth (1 K.21.8,9); Sennacherib to Manasseh (2 K.18.16); Benhadad about Naaman (5.5-7); Ezekiel to Jehoiakim and Jehoiachin (Jer.39.1). Both sent written communications, and there are numerous references to the practice in Ezra, Nehemiah, and Esther. The terms used include ἐπιστολή (= writing), and, later, ἐπιστολή, Bab. irt, “table,” “tablet” (2 Chr.30.16; Ne.2.29,6.5,17,19; Esth.9.26,29), or ἐπιστολή (Ezr.4.8,11.5-6). (2) In N.T. the official letter is also common, επιστολή being the usual term: e.g. to synagogues (Ac.9.2,22.5); the apostles and elders to Gentile Christians (15.29-30); επιστάχθησθαι, or letters introductory (2 Cor.3.1). But the most striking feature is the collection of 21 “Epistles,” of which 13 are ascribed to St. Paul and the rest are divided among SS. James, Peter, John, Jude, and the unknown writer of Hebrews. On the classification of these as private letters, letters not private but personal, and formal letters (of epistles), see the introduction to the Deissmann, B.S. (1895-1897, Eng. tr. 1901). The idea that St. Paul “invented” the N.T. epistle must be modified in the light of letters recently discovered in Egypt and elsewhere (cf. J. Armitage Robinson, Eph. pp. 275 ff.), which illustrate the form and phrases of N.T. epistles. All that is now in the latter is the result of the spiritual force contained in their message. [E.H.P.]

Er.—1. First-born of Judah. “He was wicked in the sight of the Lord; and the Lord slew him.” The nature of his sin is not stated, but it was possibly connected with the abominable idolatries of Canaan, his mother’s land (Gen.38.3-30; Num.13.29).—2. Son of Shelah the son of Judah (1 Chr.4.21).—3. Son of Jose, and father of Elmodam (Ltt.3.28).

Eran, ancestor of the Eranites and son of Shuthelah, eldest son of Ephraim (Num.26.36).

Erasus.—1. One of the attendants, or deacons, of St. Paul at Ephesus, who (with Timothy) was sent forward into Macedonia while the apostle himself remained in Asia (Ac.19.22). He is probably the Erastus mentioned in the salutations in 2 Tim.4.20.—2
Erech (Gen. 10:10), the second city of Nimrod, ruler of Babel (Babylonia); the Uruk of the inscriptions. In Sumerian, Unug; now Warka, on the left bank of the Euphrates, W. of the Nile Canal. In the bilingual Creation-story its origin is attributed to Merodach. The deities worshipped there were Ishtar and Nanaa, and Anu, god of the heavens. \( \text{Egiparimina,} \) the house of the Uruk enclosure. A temple-tower, probably originated its name of \( \text{UrUK suPuri,} \) "Erech of the enclosures," in the time of Gilgameš. [Archevites.] [T.G.P.]

Eru, son of Gad (Gen. 46:16), and ancestor of the Erites (Num. 26:15).

Esloas, N.T. form of Isaiah.

Esrah-ton (Assyr. Assur-ha-iddina, Assur has given a brother), son to Sennacherib (2 K. 19:37; Is. 37:38), succeeding him on his murder (681 b.c.), and procuring the desertion to his side of the rebel forces on the W. frontier of Ararat, whether the conspirators had fled. By a judicious policy within the empire and vigorous actions in the field, he avoided internal dissensions such as had troubled his father's reign, and was uniformly successful in war. The fierce swarms of the Gimirra (Cimmerians, Gomer; Gen. 10:2, etc.), invading Assyria from the N., were defeated by him in a decisive battle (677 b.c.) and forced by him directly the same year he took and levelled Sidon in consequence of a revolt, planting a colony from Elam and Babylonia in the new city which he built on the site. After other successful campaigns he carried out from 674–670 B.C. three invasions of Egypt, inflicting finally a signal defeat at Memphis, and annexing the whole country to his empire. Two years later, when on his way to punish an Egyptian revolt, he fell sick and died. Early in his reign he had rebuilt Babylon (destroyed by his father 689 B.C.), making it second only to Nineveh in importance. He appears to have planted colonists in the cities of Sardis (Ezr. 4:2), in addition to those whom in his predecessor Ashurbanipal he established there in the room of the captive Jews. [A.W.S.]

Esau, the eldest son of Isaac, and twin-brother of Jacob. The appearance of the child at birth is said in Gen. 25:25 to have suggested his name (hairy), but the real meaning of "Esau" is doubtful. His surname Edom (red), chiefly applied to his posterity, owed its origin to the incident related in 25:30. [Edom.] The strife between the brothers began prior to birth, and led to the prophecy "the elder shall serve the younger" (25:22,23). Esau grew up to be a "cunning hunter, a man of the field," in fact, a thorough Bedawi, a "son of the desert," impatient of the restraints of civilized or settled life. One day, returning from hunting, faint and hungry, Esau asked his brother to feed him with the red pottage he was preparing. Taking advantage of his distress, and mindful probably of the prophecy from his grandfather's mouth, he broached his brother's birthright as the price. Esau married at the age of 40, and contrary to the wish of his parents. His wives were both Hittites; and they "were bitterness of spirit unto Isaac and to Rebekah" (Gen. 25:34,35).

The next episode in the history of the brothers is still more painful. Jacob, through the craft of his mother, is again successful, and procures the blessing of his father. But Esau vows vengeance. But he knew not a mother's watchful care. By a characteristic piece of domestic policy Rebekah succeeded both in exciting Isaac's anger against Esau, and obtaining his consent to Jacob's departure. When Esau heard that his father had commanded him to bring to Jacob a wife of the daughters of his kinsman Laban, he also resolved to try whether by a new alliance he could propitiate his parents. He accordingly married his cousin Mahalath, the daughter of Ishmael (28:5,9). This marriage appears to have brought him into connexion with the Ishmaelitish tribes beyond the valley of Arava. He soon afterwards established himself in mount Seir; still retaining, however, some interest in his father's property in Southern Palestine. He was residing in mount Seir when Jacob returned from Padan-aram, and had then become so rich and powerful that the idea of inflicting vengeance was immeasurably enlarged. He appears never to have been himself the aggressor; but it seems to have been almost completely efficacious. It does not appear that the brothers again met until the death of their father about twenty years afterwards. They united in laying Isaac's body in the cave of Machpelah. Of Esau's subsequent history nothing is known; nor that of his descendants, see Edom and Edomites.

Esra (1 Esd. 5:29) = ZHA.

Esay (2 Esd. 2:18; Ezcclus. 48:20,22) = Isaiah.

Eschatology, the doctrine of the Last Things, the things that shall be at the end of the world, is bound up with the idea that the world, this present order of things, will one day pass away and be succeeded by another, the age to come. In O.T. the doctrine was first brought into prominence in order to answer, from the national point of view, the problem of the (so-conceived) undeserved opposition of God's people by his own power. When God, it was thought, was waiting His time to reveal Himself, to vindicate His honour and deliver His people. All this would happen in the Day of the Lord (see further under Coming of Christ). Gradually the expectation of this day was put in the more distant future, until at length it was generally supposed that it would herald the end of this age by a great and final judgment of the nations, and that the good time for Israel would be in a new and golden age to come. Then the glory of Zion's world-wide rule would be realized in a new earth delivered from pain and sin. So eschatology passes out of the region of prophecy (which is always practically concerned with the near future) into that of apocalypse, which leaps over from the present to the end of time (often in O.T., and in N.T. generally, conceived as quite near). Christianity thus inherited from Judaism these ideas: a great "Day of God," determining the last Judgment from which there is no further appeal, to be followed by a state of blessedness for some, secure from all future danger or fear, and for others a state of woes from which
there is no hope of recovery. Our Lord sanctioned these ideas, but made them moral and spiritual: not the Israel of the flesh, but the "Israel of God," the redeemed of His Church gathered out of every nation, will be the blessed; not the Gentiles of the flesh, but the uncircumcised in heart (including many Jews), will be the doomed. The glorious reign of Israel will be not an earthly but a heavenly kingdom, a rule of love and goodness. Further, the blessedness and the woe were expanded by Him into the Christian doctrines of the Resurrection, Heaven and Hell. See further, Death, Future Life, Heaven, Hell, and Eternity. "Magna est veritas et praevaleat!"

ESDRAEILON. This is merely the Gk. form of the Heb. Jezreel (Ith.3.9,4.6). In Jth.1.8 Esdrelon, with the addition of "the great plain." This plain is W. of Jezreel (Palestine). The town of the same name is called "Merij Bavn" or "Marj Ibn 'Amar." [s.c.g.]

es'dras for Ezra the scribe in 1 and 2 Esd.

Es'dras, First Book of. In the first order of the books of the Apocrypha in the English Bible. In LXX. this book is entitled Esdras A; Esdras B including the canonical books, is called the Vulg. (translated in Eng. P.B., art. vi.), Esdras I. and II. stand for the canonical books, Esdras A becoming Esdras III., and Esdras IV. being the book known to us as "the second book of Esdras." The classification in the English Bible, viz. Ezra, Nehemiah, 1 and 2 Esdras is adopted from the Genevan Bible (1560), the first so to enumerate them. The book consists of a repetition of the history of the rebuilding of the temple, and is made up almost entirely of materials from the canonical books of 2 Chronicles, Ezra, and Nehemiah. There is one original section (3.1-5.6). The transcript is more or less exact, except that the history is reversed—Artaxerxes I. preceding Darius I.; the two kings being here treated as a single monarch. This suggests that the original title was either (1) "Ezra the Prophet" (Hilgenfeld, based on quotations of Clem. Alex. and Ambrose), or (2) "The Apocalypse of Esdras" (Westcott, based on catalogue of the 60 canonical and apocryphal books found in Asia). This latter is the most obvious and various of the explanations of the book. The original language of 2 Esdras is Gk., but for a long time the book was only known through the Latin version. No Gk. MS. of the book exists, though two quotations from the Gk. are found in Clem. Alex. and Apost. Constit. The Latin version contains two important additions (12:15; 16:1-36) not found in the other versions of the book. It is obvious that a large section is missing between vv. 35 and 36 of ch. 7. The missing verses (now restored in our R.V.) are found in the Syriac, Ethiopic, Arabic, and Armenian versions (of these the Syriac is the best), and the missing Latin fragment was found in a MS. of the 9th cent., by Bensly in 1874. In 1865, moreover, Gildemeister proved that the missing verses had actually been contained in the Latin Cod. S, but the page had been cut out in early times. Hence the conclusion was drawn that all the Latin MSS. which do not contain the section are derived from Cod. S. The form of omission of 15-105 is probably a dogmatic one. It contains a description of the intermediate state, and an emphatic denial of the efficacy of prayers for the dead, a matter of curious interest when it is remembered that the words of 2.24-35 are employed in the ancient Missa pro Defunctis, whence the origin of the use of the word Requiem, and that this passage, with 2.26-37 (formerly used by the English Church as the Introit for Whit-Tuesday), is the only one from this book made use of by the Church. Leaving for the moment ch. 1, 2, 15, 16, the real 2 Esdras consists of an account of three revelations and four visions granted to Ezra.
during the Captivity, by which he is instructed in some of the great mysteries of the moral world, and God's dealings with His people. The first revelation (4-5.14) shows the unsearchable depths of God's purposes, and the signs of the last age. The second revelation (5.20-6.24) carries the teaching still further, and prophecies the time when "evil shall be put out and deceit shall be quenched." Third revelation (6.35-9.25): Ezra, renewing his questions, asks why, if the other nations were outraged, and Israel the chosen race, should be dispossessed of their inheritance. In reply he is told that the narrow way must be passed first, but there shall be in the future a wider and more glorious scene. Then comes a striking passage, giving a picture of the Messianic Age, the appearance of My Son Jesus (there are marks of interpolation here). His death (with that of all living) after a reign of 400 years, and then the resurrection (7.26-35). The missing fragment describes the pit of torment, and the paradise of delight over against it; and Ezra is warned that intercession for the wicked is impossible—"many are created but few are delivered." The second vision (9.30-10.59) is of a woman (Sion) lamenting the death of her only son (Jerusalem), born to her after 30 years of sterility (the 3,000 years before Solomon built the city). She vanishes, and her place is taken by the city in building—the heavenly Jerusalem which is to replace the earthly. And in vision 9. (ch. 14) Moses, the first Heaven's Prophet, tells of the destruction of Babylon (538 B.C.), of the Chaldeans, and of the destruction of Jerusalem. He promises that he will not be destroyed, and then goes back to the captivity, and predicts the terrible things of the day of the destruction of Jerusalem. Then he sees the young branch, the Messiah, before the glorious Temple, and by the Temple, and then the Temple is destroyed, and all the glory of Jerusalem is destroyed. Ezra is then shown the destruction of Jerusalem, and he is told that he is to be taken from men, and is hidden to make a record of what he has seen. In 40 days he writes 94 books (24 being the O.T., and published openly, the remaining 70 to be divulged only to the wise). This last section probably owes its origin to the tradition which regarded Ezra as the representative of the men of the "Great Synagogue." The additions to 2 Esdras (ch. 1, 2, 15, 16), confederated of later and Christian origin (cf. for reminiscences of N.T., 1.30, 33 with Mt. 23.37, 38, and 16.42f. with 1Cor.7.39f., etc.), contain a review of proof of Israel for their abandonment of God, and a denunciation of woe upon the other nations of the world. The latter section begins almost in direct continuation of the former.

Character and Date. A deep melancholy pervades the original book, and the key which is obvious, we conclude (with most modern critics), the book was written after the terrible events of 70 A.D., when the outlook for the Jews was rendered hopeless. If this is correct the book should probably be dated in the reign of Domitian, 81-96 A.D. The question turns upon the interpretation of the eagle vision, and the reigns of the several wings. The book bears a remarkably affinity to the "Apocalypse of Baruch," also a product of the age of the destruction of Jerusalem. The author, it is admitted, must have been a non-Christi, probably also of Alexandria. Hastings, D.B. (5 vols. 1904); Speaker's Commentary (Lupton); Camb. Texts and Studies, vol. iii. 2 (1895), etc. See also Apoc. of Baruch, Charles (1896). [S.N.S.]

Esdrelon. [ESDRELOM.]

E'sebon (Jth.5.15) = Heshbon.

E'sebrizas (1 Esd.8.54) = Shekeriah.

E'sek (contention), a well, dug by the herders of Isaac in the valley of Gerar (Gen.26.20).

Esh-ba'al, the fourth son of Saul, according to the genealogies of 1Chr.8.33 and 9.39. He is doubtlessly the same person as Ishboseth.

Eshben, a Horite: one of the four sons of Dishon (Gen.36.26; 1 Chr.1.41).

Eshcol, the two brothers who aided Abraham in his pursuit of the four kings who had carried off Lot (Gen.14.13,24).

Eshcol, Valley, or Brook, of, explored by the spies who were sent by Moses from the desert. From the turn of two of the notices (Num.32.9; Deut.1.24) it may be gathered that Eschol was the farthest point to which the spies penetrated. In this case Rehob (Num.13.21) would be at Rehoboth, and the words "as men come to Hamath" must be regarded as a later gloss. The name Eschol is connected with Hebron (Gen.14.13,24), and Hebron was a great vine country (see Num.13.23). A spring called "Ein Keskel" at Hebron has been supposed to be the "brook Eschol," but the word does not represent the Hebrew.

[c.r.c.]

Esh'ean, a city of Judah (Jos.15.52).

E'shek, a Benjamite descended from Saul and brother of Azel (1 Chr.8.39).

E'sh'ter, the tribe of (1 Chr.4.27).

Esh'telo', probably "the hollow": a town of Judah in the Shephelah near Zorah (Jos.15.33), on the border of Dan, to which it was given up (19.41). It was close to the Mahaneh-Dan, and to Samson's home (Sirah); see Judg.13.25,16.11,18.2,8,11. Esebus (Onomasticon) places it 10 miles N. of Beit Jibrin, and near Armith. It is now the village Esah'a, on a hill, by a recess on N. side of the valley of Sorek, 1/2 miles E. of Sirah, 13 miles N.N.E. of Beit Jibrin, and 5 miles N. of el Yamia.

[c.r.c.]

Esh'toulites, The, one of the families of Kirjath-jearim (1 Chr.2.53). [ESHTAOL.]

E'sh'temoa, Eshtemoah, a town of Judah, in the mountains (Jos.15.50). With its suburbs Eshtemoa was allotted to the priests (21.14; 1 Chr.6.57). It was one of the places frequented by David and his followers during their wanderings (1 Sam.30.28, cf. the place Esh'temah near Ramathaim-zophim, the time of Eusebius and Jerome. It was discovered by Robinson at es Semu'a, a village 9 miles S. of Hebron. Eshtemoa appears to have been founded by Ishbah, a descendant of Caleb (1 Chr.4.17).
Eston, a descendant of Judah (1Chr.4.11,12).

Eston, son of Nagge, or Naggai, in the genealogy of Joseph (Luk.3.25).

Eso'ra, a place fortified by the Jews on the approach of the Assyrian army under Holofernes (Jth.4.4). Noticed with Salem (Sălim) and Choba. Apparently 'Ashrēk, near Shechem on N. [C.R.C.]

Ess'ril. [Azareel, 4.]

Ess'rōm (Mt.1.3; Lu.3.33) = Hezron, 2.

Essenes, a Jewish party, or school of thought, described by Philo (Q. O. P. L. 12) and Josephus (2 Wars viii. 2). The latter mentions also several individual Essenes. The name seems to be derived from Aram. ‘âšîr, “a physician”; and was probably given to them from without, not assumed by themselves. They eschewed marriage, kept the Sabbath with great strictness, practised frequent ablutions, and had all things in common; they avoided oaths, shunned all employments connected with war, and lived a simple life. A characteristic mentioned by both Josephus and Philo is that they abstained from blood and sacrifices. This peculiarity would seem to cut them off from Judaism. Many of the characteristics assigned to the party by the two authors from whom we learn most about them are falsified by what is said of individual Essenes. Although they are said to shun the tenor of Jewish life, Josephus is teaching there when Antigonus is murdered. Although they abjured arms, yet John the Essene is one of the commanders of the Jews at the beginning of their war with the Romans. These differences may be explained by supposing that there were various divisions of the party, of which very different statements might be made. It is difficult to harmonize the statement that they numbered only 4,000 with the fact that there were many of them in “every city,” and that there were “many myriads” of them, unless the statements refer to different sorts of Essenes. While in the main the documents of the Essenes are of indigenous Jewish origin, there are features that suggest Parsism and possibly neo-Phytagoraism. One of the enigmatic features in the history of the party is the absence of any mention of them in N.T. They featured numerous all over the country, but though our Lord meets Pharisees, Sadducees, Herodians, followers of John the Baptist, etc., He is not even once recorded to have met an Essene. If, as suggested above, the name was given them from without, they may be present in the gospels under another designation. There are certain persons who are associated with our Lord’s birth and burial, “waiters for the redemption of Israel,” to which Anna the prophetess and Joseph of Arimathaea belonged—these may be the Essenes. If our Lord Himself belonged in some sense to the party, it would explain how He never encountered them. Many of His teachings resemble those of the Essenes—those that differ may be explained by differences in their subdivision. This would also explain the disappearance of the Essenes in the Christian Church. Some of the heretical movements in the 2nd cent. are explicable on the supposition of Essene influence. Josephus (2 Wars viii. 7) mentions that they had many secret books; these have been thought to have been the Jewish apocalypses. Confirmation of this is that between the bliss that Josephus tells us was the hope of the Essenes and the paradise described by Enoch. Original sources: Philo, Q. O. P. L.; Josephus, 2 Wars viii. 2. Epiphanius is valueless. Recent literature: Ginsburg, The Essenes, their Doctrines and their History; Lightfoot, Comm. on Colossians; Lucius, Der Essensismus; Thomson, Books which influenced Our Lord and His Apostles. Besides arts. in various encyclopaedias and Bible dictionaries, histories of the Jews embracing the period may be consulted with advantage. [J.E.H.T.]

Esther, from Persian štarēch (a star), otherwise called Hadassah, Heb. miwrat, daughter of Abihail, and brought up by her cousin Mordecai. She was chosen for her exceeding beauty by Ahasuerus (Xerxes), king of Persia, out of the maidens brought from many lands, to succeed the deposed queen Vashti. The plan for the extermination of all the Jews, however, when Mordecai’s withholding of homage, had obtained the king’s irrevocable consent, became known to Esther through her cousin. At his instigation she risked death by entering the king’s presence uninvited, and through her tactful action obtained the downfall of Haman. The Jews, having thus been permitted to defend themselves on the day appointed for their slaughter, which they did to good purpose. Outside the Bible we know of but one wife of Xerxes, Amestris. With her neither Vashti nor Esther can be satisfactorily identified. [Vashti.] Amestris, in fact, was married to Xerxes so long before the time with which the book of Esther deals, that two of her sons accompanied his expedition against Greece. Probably Esther has been idealized, and was nothing more than a secondary wife or favourite member of the king’s seraglio. [A.W.S.]

Esth'er, book of, although the later canon of the O.T. is of considerable interest and value, vividly picturing Persian court life, and furnishing an example of self-sacrificing intercession, patriotism, and courage. As against the view which would place its composition in the 2nd cent. B.C. on the ground of a supposed Maccabaean colouring, we may point to its accurate and lifelike portrayal of Persian manners. Although the reign of Ahasuerus is spoken of as already past, the narrative, as it stands, would have been impossible for one writing when the substitution of Gk. for Persian supremacy had blurred out the details of the earlier administration. The authorship is ascribed to Mordecai (St. Clem. Alex.), Ezra (St. Augustine), the “Men of the Great Synagogue” (so Jewish tradition), and others. These, however, are but conjectures. The book is plainly the work of one hand, excepting possibly 9.20-32. The style is easy and simple. The Heb. resembles that of Carn. Not Coleman and Irvine’s. It is generally pure, but contains some later forms and a few Persian words. Josephus (Cont. Ap. 1. 8) included the book in the Jewish Scriptures, and the Jewish Councils of Jerusa-
lem and Jamnia (1st cent. A.D.) accepted it. Both Jews and Christians, however, for a while showed some hesitation on the subject. But from later Jews its intensely patriotic spirit evoked enthusiastic admiration. Esther forms the last of the five "Megilloth" [Old Testament], and is read by them on the Feast of Purim. [Purim.] We must remember that most of the early Fathers, being ignorant of Hebrew, were dependent upon the Gk. Canon of Scripture, including therefore the apocryphal additions to Esther (see below). These may well have presented a difficulty to some; as did the absence of the divine Name in striking contrast with the explicit handling of the relation between God and His people to be found elsewhere on the part of Biblical writers who set forth His attitude towards men and theirs towards Him without reserve. Here, on the contrary, all such treatment of the matters handled is held rigidly in check. One reason suggested for this reticence is that as the Feast of Purim was probably the chief occasion on which the book was to be read, there may have been a desire to avoid the risk that the Name of God might be lightly used amid such surroundings. The book, nevertheless, is far from lacking the religious element; Ps.121.4 ("He that keepeth," etc.) might well be its motto, and the words of 4.14 show an unflagging trust in the over-ruling Hand. One main purpose of the book was to encourage the observance of Purim, and perhaps also to bring about its more intelligent and reverent celebration. We may also safely assume that a foremost object with the author was to enforce upon the Dispersion lessons as to the divine Providence. The Gk. version and those derived from it contain a number of additional sections. One reason for their introduction was doubtless to counteract what was considered to be the unduly secular tone of the original. They were introduced at various points of the story, proceeding in a perfectly smooth and consecutive narrative. But, appearing as one book in the English Apocrypha, they are thus severed from their proper contexts, while the section which in the English stands first (10.4—11.1) ought properly to be placed last. Their confused and unintelligible appearance is due to the fact that St. Jerome, in producing the Latin Vulg., perceived that these sections had no counterpart in the original Hebrew, and so grouped them at the end of the canonical book. His marks, showing the respective points at which they should be inserted in the original text, disappeared after a while, with the above result. Apart from their non-existence in the Hebrew, they contain discrepancies as compared with the canonical book. [A.W.S.]

4. It had a "cleft" (ṣ'eph) into which Samson "went down," but to which the men of Judah "went up." The probable site is at Beit 'Atīb, a village on a remarkable rocky knoll, in the mountains S. of the valley of Sorek, 5 miles S.E. of Zorah. Under the

---
ETERNITY

village there is a rock passage (called Bir el Hasūlah, or the well of refuge) which may be the "left" where Samson hid high above the ravine (Judg. 15.1). [c.r.c.]

Eternity. In O.T. this word and its cognates are represented by נֶאֶד (nēaḥ), lamedg, פֶּעַד, and פֶּלֶם. The first has the meaning of pre-eminence, perhaps of eternity or endurance, and it denotes an uninterrupted continuance; but hardly in the modern sense of an infinite duration of time. Either some consumption is to be reached ("tried unto the end," Job 34.36), or the time is regarded vaguely as unlimited within the epoch in which the event occurs—e.g., the human life ("perpetual pain," Je.15.15). Its nearest approach to "eternity" is in negative clauses, "shall not . . . for ever" (passim). פֶּלֶם has a more defined sense of time. It is an age past, present, or to come (הָעָלִים ההָבָה). From their very indefiniteness, the past and future epochs would tend to lose their limits, and thus justify the English translation "from ever" and "for ever." Doubtless the positive idea of endless duration was gradually developed from the fact that the Hebrews were unable to think of Jehovah as ceasing to exist. (Cf. Ps.97 and 102.27, and Chr. passim.) In N.T. αἰών is heir to the various senses of פֶּלֶם, and εἰς τὸ αἰῶνα takes the place of the prepositional form פֶּלֶם. While perhaps, it approaches nearer to our meaning of "everlasting" (ἀἰώνιος), we must be careful not to introduce this meaning entirely and solely into the constantly repeated phrase "eternal life." A careful study of all the places in which this term occurs will probably show that its antithesis is not so much to terminated life, as to physical and secular life on the earth (cf τὸ αἰῶν τοῦ ἐφορμοῦ τοῦ αἰῶνος; Lu.18.30). It is a type of life which, according to St. John, starts here. Cf. too the phrase αἰωνίων ζωὴν in Heb.9.12. For a somewhat different view, see Future Life. [n.f.s.]

Etham. [Exodus, The; Red Sea, Passage Of.]

Eth'ah, "The Ezrahite," one of the four sons of Mahel, whose wisdom was excelled by Solomon (1 K.4.31; 1 Chr.2.6; cf. Ps.88 and 89, titles).—2. Son of Kish, or Kushahiah, a Merarite Levite, head of that family in the time of David (1 Chr.6.44), and spoken of as a "singer." With Heman and Asaph, the head of the other two families of Levites, Ethan was appointed to sound with cymbals (15.17, 19). It is probable that Ethan is the same as Jeduthun; but there is no decisive evidence.—3. A Gershonite Levite, one of the ancestors of Asaph the singer (1 Chr.6.42).

Eth'ah. [Months.]

Eth'ba'a1, king of Sidon and father of Jezebel (2 K.9.32). Josephus represents him as king of the Tyrians as well as of the Sidonians. We may thus identify him with Ethbalus, noticed by Menander, a priest of Astarte, who, after having assassinated Pheus, usurped the throne of Tyre for 32 years. [Tyre.]

E'ther, a town of Judah given to Simeon (Jos.15.42,19.7). Eusebius places it at Jattir (Jattir), but the site is doubtful. [c.r.c.]

Eth'io'pia. The country, described by Greeks and Romans as "Aethiopia" and by Hebrews as "Cush," lay to the S. of Egypt, and embraced, in its most extended sense, the modern Nubia, Sennar, Kordofan, and northern Abyssinia, and in its more definite sense the kingdom of Meroe. The only certain boundary is in the N., where Syene marked the disjunction between Ethiopia and Punt. (Is.18.10): in other directions the boundaries can be only generally described as the Red Sea on the E., the Libyan desert on the W., and the Abyssinian highlands on the S. "Ethiopia" thus roughly corresponds to the modern Sudan. The Hebrews do not appear to have had much practical acquaintance with Ethiopia itself, though the Ethiopians were well known to them through their intercourse with Egypt. They were, however, perfectly aware of its position (Ezk.29.10) and its tropical characteristics, and they had commercial intercourse with it. The country is for the most part mountainous, the ranges gradually rising in altitude towards the S., until they attain an elevation of about 8,000 ft. in Abyssinia. The inhabitants of Ethiopia were a Hamitic race (Gen.10.6). Of their various tribes the Sabaeans were the most powerful. The history of Ethiopia is closely interwoven with that of Egypt. At the time of the Pharaohs of Egypt, Cambyses advanced against Meroe and subdued it; but the Persian rule did not take any root there, nor did the influence of the Ptolemies generally extend beyond northern Ethiopia. Shortly before our Saviour's birth a queen, Candace (Plin. vi. 35), held sway in Ethiopia, and even resisted the advance of the Roman invaders. Another queen of the same name is noticed in Ac.8.27. Both queens probably ruled at Meroe (now Naga), which had succeeded the old kingdom of Napata (the modern Merawî), and where king Ergamenes was reigning 270 B.C. Meroe was supplanted by the Abyssinian kingdom of Axum in the 1st cent. of the Christian era. Gradually it [Anax.]—

Eth'io'pi'an, properly "Cushite" (Je.13.23); used of Zerah (2 Chr.14.9), and Ebedmelech (Je.38.7,10,12,39.16).

Ethiopian eunuch (Ac.8.27-39), treasurer of Candace, queen of Meroe. As he was returning from Jerusalem in his chariot and reading the book of Isaiah, possibly King David's version of the book (1 Chr.22.18), the Evangelist overtook him and preached unto him Jesus. The profession of faith (ver.37) is probably an interpolation dating back to the 2nd cent. Ethiopian tradition gives him the name of Indieh, and he is said to have propagated the Gospel in Arabia Felix and Ethiopia.

Eth'io'pi'an woman. The wife of Moses is so described in Num.12.1. It seems necessary to distinguish her from Zipporah, who was a Midianitess. [A.H.S.]

Eth'io'pi'ans. Literally "Cush" or "Ethiopia" in two passages (Is.20.4; Je.46.9). Elsewhere "Cushites" or inhabitants of Ethiopia (2 Chr.12.3,14.12 [11,13],13); 16.8,21; Dan.11.43; Am.9.7; Zeph.2.12).

Eth'ma (1 Esd.9.35; R. V. No'ōnā), apparently a corruption of Nebo, 3 (cf. Ezr.10.43).

Eth'anan, a descendant of Judah; son of Ashur by his wife Helah (1 Chr.4.7).

Eth'anas. [Goyzra'v, Goy'sraz'.]

Eth'nī, a Gershonite Levite, ancestor of Asaph the singer (1 Chr.6.41[26]).
Eubulus, a Christian at Rome (2Tim.4.21).

Eucharist, the Sacrament of the Body and Blood of Christ. For this no specific name used in N.T., and the earliest known example of ἐucharistia in this definite sense is in Ignatius, Smyrn. vii. 1. The name is derived from ἐξουσία, the solemn or solemn rites of thanksgiving, which the earliest liturgical indications show to have accompanied the blessing of the Bread and the Wine to be the Body and Blood of Christ. The word may be so used in 1Cor.14.16.—I. The earliest extant account of this holy mystery is in ch.10 and 11. St. Paul there speaks of a Lord's supper, in connexion with which there were certain abuses to be corrected. "When you assemble together," he says, "it is not to eat a Lord's supper"—that is to say, their conduct was not befitting such an occasion—"for each one in eating hurry to get his own supper, and one is hungry, while another is drunken: it is evident, therefore, that the Lord's Abuses. The Loaf. in the cup, which ought to be most orderly, and not regarded as a satisfaction of appetite (11.21.34). But there is a special reason for solemnity: "For I received from the Lord what I also delivered to you, that the Lord Jesus, in the night when He was betrayed, took bread, and after giving thanks broke it, and said, This is My Body, which is for you: do this for My memorial. Likewise also the cup after supper, saying, This cup is the new covenant in My Blood: do this, as often as you drink it, for My memorial. For as often as you eat this loaf and drink this cup, you proclaim the Lord's death until He come. So that if any man eat the loaf or drink the cup of the Lord unworthily, he will be guilty of the Body and of the Blood of the Lord." With this must be read the words of the preceding chapter: "The cup of the blessing, which we bless, is it not a participation of Christ's Body?" There is no ground for supposing this feature of the Agape to have been instituted by St. Paul. He refers the institution to Jesus Christ, and the observance to a current tradition. But this is not the case in the Synoptic Gospels, which should be closely compared with St. Paul's account. They agree with him in placing it on the night of the betrayal, and they appear to connect it with the Paschal Supper. This connexion is inconsistent with the note in Mt.26.5 that the Sanhedrin resolved not to arrest Jesus on the feast-day, which agrees with the clear indications of the Fourth Gospel that all was hurriedly done before the killing of the Passover. The suggestion that our Lord kept the Passover one day earlier than the Jewish authorities, based on an ingenious calculation of the calendar, seems to be inconsistent with His general attitude towards the Law. Moreover, the notion that the Passover was in any sense eaten on this occasion appears to be excluded by Lu.22.15 (see R.V.): "Eagerly I desired to eat this Passover with you before My Passion; for I say unto you, I will not eat it until it is fulfilled in the kingdom of God." It has been suggested, therefore, that after making all preparations for the Passover, the Lord and His disciples assembled, not to eat the Paschal Supper, but to observe the qiddush of the Passover. The qiddush is a domestic ceremony performed on the eve of each sabbath or high festival, immediately before supper; it includes the blessing of the cup of wine, followed by the breaking of a loaf for distribution to all present. Here is found the occasion for the institution of the Eucharist. Against this hypothesis are the facts that Mk.14.18-26 and Mt.26.26-30 seem to place the institution during the meal and not at the beginning; that both they and St. Paul in 1Cor.11.24, 25 make the breaking of the loaf precede the blessing of the cup. On the other hand, in Lu.22.14-19 (the confusing addition of ver. 20 being omitted, as in R.V. marg.) we find the order of the qiddush exactly followed. This striking divergence from Mark is very significant, and not less is the order of the Agape. It is clear that the Lord's Abuses. The Loaf. in their case was not that of a Lord's Abuses. The Loaf. in the cup with the breaking after it, but of the breaking of the loaf which precedes the blessing of the cup. This indicates the survival of such a practice in some Syrian churches at the beginning of the 2nd cent. It may be the original order altered elsewhere at a very early date to that which St. Paul describes. Such a change would illustrate the power of the Church to vary anything that is not essential to the institution. The current practice would account for the order in Mk.—Mt. also. It may be doubted whether any of the narratives were intended to be sufficiently precise in detail to afford materials for argument, but that of Luke seems to be the most consecutive.—II. If the institution of the Eucharist took place at the qiddush, the Agape would probably be ordered after the same fashion, the solemn blessing of the cup and breaking of the loaf being followed by the Lord's Abuses. The Loaf. in the next repast. St. Chrysostom (Hom. 54) expressly declares this to have been the case; but he may have been misled by the practice of his own day. St. Augustine (Ep. 118), on the contrary, seems to assume that in the first place the Agape took place before the qiddush. The indications afforded by N.T. are but slight. 1Cor.11.20-34 is indecisive. The words "after supper" in ver. 25 are puzzling. They imply a considerable interval, occupied by the supper, between the breaking of the loaf and the blessing of the cup; but this agrees ill with Mark, Matthew, and uninterpolated Luke. On the other hand, it agrees with the supposed derivation of the Christian rite from the Paschal Supper, the cup in this case being the fourth cup of the Paschal ritual. But the difficulty of this derivation has been shown. It is possible that the delivery of the cup, previously blessed, was postponed. Apart from this, the whole passage agrees best with the hypothesis that the blessing of the loaf and of the cup came first, and that the fault of the Corinthians was to let indecent haste for the supper break in upon this solemnity. The only other references to the celebration of the Lord's Abuses. The Loaf. in the N.T. unquestionable—are in Ac.2.42, 16, 20, 7, 11, and possibly 27. 35. In Ac.2.16 it would be
extravagant to build on the order of the words. In 20:11 the order is perhaps more significant. The disciples assembled "for the breaking of a loaf," and St. Paul began the proceedings with Eucharistic discours:, "after the liturgy of Eutychus," when he was gone up, and had broken the loaf, and had eaten, and had talked with them a long while, even till dawn, so he departed." The word γενεάμων, used thus absolutely, can only mean "taking food"; and the use of the aorist participle, together with the precision of the whole narrative, which is essentially that of an eyewitness, leaves no room for doubt that the order of proceeding is distinctly marked. Here, then, the repast follows the "breaking of the loaf." In Ac.27:35 the circumstances are too exceptional to supply any argument. Hence, the one clear indication in N.T. points to the Eucharist preceding the Agape. In Didaché, 9.10, we find the same order, nor is there any indication elsewhere of its inversion.

PASSOVER.—III. We find in N.T. only slight indications of the ritual of the Eucharist: viz. the blessing of the cup, the breaking of the bread, the eating and drinking; possibly the breaking of the loaf and the responsive Amen, which accompanied the blessing (1 Cor.11:16). Mk.14:24, followed by Mt., also notes the blessing of the loaf. The same elements are mentioned in Didache 9.10, 14, and in Ignatius, Eph. 20; Phil. 4; Smyrn. vii. 8, the latter also insisting on the person of thanksgiving, which is more precise is found recorded until the time of Justin Martyr. Of the doctrine of the Eucharist there are fuller indications. In 1 Cor.10:16 St. Paul writes: "The cup which we bless, is it not a communion of the Blood of Christ? The loaf which we break, is it not a communion of the Body of Christ?" The word κοινωνία (communion) needs attention. It contains the idea of common participation, as is shown by what follows immediately. But the use of "communion of the altar" in ver. 18, supported by similar uses in 2 Cor.1.7 and 2Pe.5.1, brings in the further idea of individual participation in a common good. Then the broken loaf and the cup with the means by which the Body and the Blood of Christ are imparted to individual believers and shared in common by all believers. The participators eat Christ's Body and drink His Blood. Therefore St. Paul says, "Whosoever eats the loaf or drinks the cup of the Lord unworthily shall be guilty of an offence against the Body and Blood of the Lord" (1 Cor. 11:7). This eating and drinking are regarded in the two aspects of sacrificial communion and of spiritual sustenance. (1) The idea of sacrificial communion is most in evidence. It is conspicuous in St. Paul's comparison of the Eucharist with the sacrifices of O.T. and of the Gentile religions. The "table of the Lord" is set over against the "table of demons," as exactly parallel. The communion of the Body and Blood of Christ is set over against the communion of the altar in O.T. With the latter parallel should be considered 15:20: "We have an altar, whereby we have no right to eat which serves the tabernacle." The reference is to those sin-offerings of which, in O.T., offerers were not allowed to partake. [ Sacrifice.] The sacrifice of Christ, His immolation upon the cross, corresponds to these sacrifices of the Law, as well as to others: "He took upon Him a difference implied, in that we can partake of the Victim. The more obvious correspondence with the Passover is pressed by St. Paul in 1 Cor. 5:8, where the words "let us keep festival,... with the unleavened bread of sincerity and truth," though much wider in their application, seem to point out this allusion to the Eucharist. The predominantly sacrificial character of the Eucharist is further illustrated by the records of the institution. The wording of Lk.22:15, the sense of which seems to underlie 1 Cor.5:7, while excluding the direct connection of the institution with the Passover, indicates a close ideal connexion. But the actual words of institution are more important, and must be compared as they stand in the records. 1 Cor.11:24, 25: "This is My Body, which is [being broken] for you. This cup is the new covenant in My Blood: this do, as oft as ye drink, in remembrance of Me." 1 Cor.11:22, 23: "This is My Body:... This is My Blood of the new covenant which is being poured out for many." Mt.26:26-28: "Take, eat, this is My Body. This cup is the new covenant in My Blood, that which is being poured out for you." N.B. The words in brackets are doubtful readings. The words "This is My Body" are evidently recorded as used by the Lord Himself. The addition in 1 Cor.11:24 may equally well be a liturgical exhortation, or a record of the Lord's own words. The doubtful addition to λ'εκ is probably a textual transfer from 1 Cor., with the substitution of ἀποκαταστάσεως (given) for συμβολής (broken). In regard to the cup we have two forms, verbally different, but the same in substance, speaking of the Blood of the Covenant: the phrase recalls Ex.24.8, 9, and Lev.26.20, 21, and the action is at once stamped as sacrificial. The words added in 1 Cor.11:24 are probably records, as the Lord's actual words or as a liturgical gloss, they show, by the force of the present participle, that the action is no anticipation of future blood-shedding or memorial of past blood-shedding, but is to be understood mystically as a present shedding of sacrificial blood. The words "unto remission of sins," added in Matthew, connect the action with the sin-offerings of O.T. The additional words contained in St. Paul's record: "Do this in remembrance of Me," have their sense determined by the context: they are a direction to do what the Lord Himself did, and this being a sacrificial action, the repeated act is sacrificial. There is no need to insist on the fact that the word παρουσία (do) and words akin to ἐναρπάζεται (remembrance), have a recognized use in this sense: the sense is always determined by the context. The
actual words thus added may be a gloss; but there is no reasonable ground for doubting that such a direction was really given by Jesus Christ. Apart from the doubtful addition following the Pauline text, St. Luke does not give the descriptive words about the cup, recording only the direction "Take this, and divide it among yourselves." The sacrificial meaning of the Eucharist, thus clearly resulting from the records of the institution, is further emphasized by St. Paul's words. As often as ye eat this loaf and drink the cup ye proclaim the Lord's death until He come." The celebration of this holy mystery is the means, alike for the Christian Church and for the individual believer, of achieving so intimate an association with the death of Christ that a real representation of the one sacrifice may be continually made. The primary purpose of sacrifice, communion with God and the removal of the guilt of sin which hinders that communion, is fulfilled for us in this "Sacrament of our Redemption." See further SACRIFICE (B); JESUS CHRIST, X. (1). (2) The idea of spiritual sustenance is usually connected in N.T. with teaching, or the common one in Prov. In its present sense it is frequent; but in two places it appears in connexion with the Eucharist. The words of 1 Cor. 10.4 about the spiritual meat and drink given to Israel in the wilderness stand in evident relation to the subject of the communion of the Body and Blood of Christ in the Eucharist. The idea of sustenance appears in the discourse in Jn. 6.27-50 has no direct relation to the Eucharist, but the connexion of thought is unquestionable, and the allusion to the manna and the dependence of the whole on the miracle of the feeding of the 5,000 show that spiritual sustenance is intended. These two passages, therefore, support that conception of the Eucharist which is most common in the devotions of the present day: sustenance is here afforded for the spiritual life of the individual believer. We may pursue St. Paul's comparison with the sacrifices of O.T. and of Gentile religions. In their case, the feast on the altar is approached as a meal, the principal items of the meal being under the primary intended as a means of communion with God, was also a taking of ordinary nutriment; so the Body and Blood of Christ in the Eucharist, though given primarily for sacrificial communion with God, are given also for the strengthening and refreshing of the souls of the faithful.—Keating, Age of Eucharist; Box in Jl. EUODIAS (R.V. correctly Euodia), a
EUPHRATES

Christian woman of Philippi between whom and Syntyche differences had arisen (Ph. 4:2).

Euphrates is a Gk. corruption of the name of the river, which was lost from the Egyptian Pautti, which is formed by means of the Semitic feminine suffix from the Semitic pura (water). In the pre-Semitic Semitic Sumerian of Babylonia the river was ordinarily known as the Pura-nun, or "Great Water." It is most frequently denoted in the Bible by the term "the river." The Euphrates is the largest, longest, and by far the most important of the rivers of W. Asia. It has two chief sources in the Armenian mountains, one at Domli, 25 miles N.E. of Erzeroum, and little more than a degree from the Black Sea; the other on the N. slope of the range called Aladag, near the village of Dityadan, and not far from mount Ararat. Both branches flow first towards the W. or S.W., passing through the wildest mountain districts of Armenia; they meet at Kabban-Maden, nearly in long. 39° E. from Greenwich, having run respectively 400 and 270 miles. Here the combined stream is 120 yds. wide, rapid, and very deep; it now proceeds in a somewhat sinuous course, forming a wide bend; finally it takes a tortuous course, forcing a way through the ranges of Taurus and Anti-taurus; seeming as if it would empty itself into the Mediterranean, but prevented from so doing by the longitudinal ranges of Amanus and Lebanon, which here run parallel to the Syrian coast, and at no great distance there-to the north it again turns S.E., and proceeds in this direction for above 1,000 miles to its embouchure in the Persian Gulf. The entire course is calculated at 1,780 miles, and of this distance 1,200 miles is navigable for boats. Its width is greatest 700 or 800 miles from its mouth—i.e. from its junction with the Khabur to the village of Weraie. It there averages 400 yards. The actual inundation of the Euphrates is caused by the melting of the snows in the Armenian highlands, and occurs in the month of May. The great hydraulic works ascribed to Nebuchadnezzar were chiefly intended to control the inundation. The Euphrates has at all times been one of the longest and most fruitful of the rivers in the E. and the W. It is first mentioned in Scripture as one of the four rivers of Eden (Gen. 2:14). Its celebrity is therefore sufficiently indicated by the absence of any explanatory phrase, such as accompanies the names of the other streams. We next hear of it in the covenant made with Abraham (Gen. 15.18), "which cometh from the great river, the river Euphrates," to the river of Egypt is promised to the chosen race. During the reigns of David and Solomon the dominion of Israel actually attained to the full extent of the original promise. This widespread territory was lost upon the disruption of the kingdom under Rehoboam; and no more is heard in Scripture of the Euphrates until the expedition of Necho against the Babylonians in the reign of Josiah. The river still brings down as much water as of old, but the various water-courses along which it was in former times conveyed are dry, and in channel has shrunk; and the water stagnates in unwholesome marshes. Originally the Euphrates fell into the sea without joining the Tigris. The accumulation of silt, however, has caused what was once the head of the Persian Gulf to become land. Loftus estimates that the growth of the delta at this part of the mouth of the Euphrates and Tigris since the Christian era has been at the rate of a mile in about 70 years. [A.H.S.]

Eupal’emus, "son of John, the son of Accos," one of the envoys sent to Rome by Judas Maccabaeus, c. 161 B.C. (2Mac.8:17; 3Mac.4:11), and probably identical with the historian Eupal’emus, who was almost certainly of Jewish descent.

Euro’clydon (the reading Euraquilo, adopted in R.V., is to be preferred), the name (Ac. 27:14) of the wind which (off the S. coast of Crete) seized the ship in which St Paul ultimately was wrecked on the coast of Malta. [Melita.] St. Luke describes it as "typhonic" (τυφωνικός), indicating that its nature was that of a sudden, violent squall. [WINDS.]

Ev’t’chus, restored to life by St. Paul at Troas (Ac. 20:9, 10); but the apparent contradiction between vv. 9 and 10 leaves it uncertain whether it was a miracle of healing or of raising from the dead. [E.R.B.]

Evangelist (the reading εὐαγγελιστής (εὐαγγέλιστης) occurs three times in N.T.: in Ac. 21:8, without explanation, to describe Philip, who was one of the "seven men of good report" of 6:5; in Eph. 4:11 ("He gave some, to be apostles; and some, prophets; and some, evangelists; and some, pastors and teachers"); while it probably refers, like "pastors and teachers," to a practical function, or to one holding an office rather than to one holding an office; and in 2Tim. 4:5, where St. Paul bids St. Timothy "do the work of an evangelist." In each of these passages the word appears to be used as descriptive of work done. The nature of the work may be inferred from the derivation of the word. Evangelist is connected with the verb to "evangelize" (ἐυαγγελίσματος), constantly used in N.T. of the first preaching of the Gospel (cf. Ac. 5:42, 8:4, 12, 25, 35, 40, 10:36, 11:20, 13:32, 14:7, 15, 21, 15:35, 16:10, 17:18). Reference to these passages suggests that the noun "evangelist" means one who preaches the Gospel which it is hitherto unknown. The word does not occur in N.T. in the sense of a writer of one of the four gospels. Plumptre and Gibson in Smith, D.B. (2nd ed.), i. 1012; Armitage Robinson in Encyc. Bib. ii. 1430; Massie in Hastings, D.B. ii. 795-797. [D.S.]

Eve (Heb. אָוֵה; i.e. living) is said to have been formed by God from the rib of Adam while he slept. Some have assigned a figurative meaning to this, and regarded it as intended to point out the infinitely higher and closer relation that exists between man and wife than between any other of God's creatures. The wife's nature, originally derived from the man, corresponds to (Heb. is set over-against) his nature, and by marriage becomes the flesh." Eve is represented as having incited her husband to violate the laws of his being [Fall], and the pangs of childbirth were therefore imposed on her in addition to the labour, sorrow, and death which became the common lot of all. Eve's death is not recorded. [J.T.L.]

Evi, one of the 5 kings or princes of Midian, slain by the Israelites (Num. 31:8; Jos. 13:21).
Evidence (Je.32.10-14). [Writing; Witness.]

Evil-mero dach (2K.25.27), the Bab. Awdel-Marduk, was son and successor of Nebuchadnezzar. In his 70th year's reign (561-559 B.C.), in the opinion of Berosus, he governed "lawlessly and extravagantly." His consideration for Jehoiachin, however, is noteworthy. The Babylonian historian states that he was slain by his sister's husband, Neriglissar, for whom see Nergal-shar-erishu (2K.25.27, d.s.).

Excommunication. 1. Among the Jews.

The principle of excommunication is found in O.T. in the penalty of being cut off from the people denounced against any who should be unincircumcised (Gen.17.14); eat unleavened bread when forbidden (Ex.12.15,19); imitate or put to a strange use the holy anointing oil (30.33), or incense (30.37); do any work on the sabbath (in this case associated with death, 31.14); eat of the peace-offerings when unclean (Lev.7.20), or of the fat of an offering (7.25), or of blood (7.27,17.10,14); fail to bring an offering to the tabernacle (17.4,9); commit various moral abominations (18.20); eat a peace-offering on the third day (19.30); give any of his seed to Moloch (20.3.5); commit incest (20.17); have sexual intercourse with a woman at forbidden times (20.18); approach the holy things when unclean (22.3); fail to be afflicted on the Day of Atonement (23.29); forbear to keep the Passover (Num.9.10), and perform ceremonial purifications when unclean (19.13,20); and is found also in the exclusion of the leprous from the camp (Lev.13.46; Num.12.14), and in the threat of separation from the congregation of the captivity of those who did not come to Jerusalem in obedience to the proclamation of Ezra (Ezr.10.8). From this principle the Rabbis developed an elaborate system of excommunication, much of which may have existed in the time of our Lord. Exclusion from the synagogue as an exercise of Jewish discipline is mentioned in Jn.9.22,12.42.16.2 (cf. 9.34,35, where some refer to excommunication on account of exclusion from the meeting where the man then was). The Jewish excommunication appears to be referred to in Lu.6.22, "Blessed are ye, when men shall hate you, and when they shall separate you from their company, and reproach you, and cast out your name as evil, for the Son of Man's sake." and it is possible, though perhaps hardly likely, that three distinct stages in it are alluded to in the words, "separate" (ἀφοιρέω, "reproach" (ἀνεδισάω), and "cast out your name as evil" (ἰκάλεσαν τὸ ἐνόμισαν ὢς σωματών).—11. In the Teaching of Christ. The principle is sanctioned by our Lord in Mt.18.17. "If he refuse to hear the Church also, let him be unto thee as the Gentile and the publican"; and is involved in the gift of the power of binding and loosing to St. Peter in Mt.16.18-19, and to the apostles in general (18.18).—III. In the Apostolic Period. St. Paul frequently alludes to his right to exercise discipline over Christians: the cases of his cutting off offenders from the Church, and describing himself as delivering them to Satan, are in 1Cor.5.1-5, 1Tim.1.19,20, the action of the Corinthian church being associated with his own action in 1Cor.5.1-5. St. Paul ordains the infliction of some kind of excommunication of those who cause divisions and occasions of stumbling (16.17); ordering (2Th.3.14); or teach a different doctrine (1Tim.6.3); and of a heretic (Tit.3.10). The degree of separation ordered in these cases would probably include exclusion from the Holy Communion, as would St. John's instruction not to receive into a house those who brought not the teaching of Christ (2Jn.10). St. John mentions that the power of excommunication had been wrongly exercised by Diotrephes (3Jn.10). St. Paul's denunciations, "Let him be anathema" (1Cor.16.22; Gal.1.5,9), probably do not directly refer to excommunication, but there can be little doubt that excommunication would be involved in the attitude taken by him. There appears to be an instance of restoration after excommunication in 2Cor.2.6-10. It has been suggested that St. Paul may have regarded some actual bodily infliction as following the disciplinary exclusion from Communion, and that this may be the "thieves" who obey the teaching, "Deliver unto Satan for the destruction of the flesh" (1Cor.5.5), "Delivered unto Satan, that they may learn not to blaspheme" (1Tim.1.20); and that this is parallel to the physical consequences of unworthy Communion referred to in 1Cor.11.28, as explained by some to some physical punishment. Further, it is probably that the "thieves" and "Satan" are to be joined together as "the body of sin". "—C.R.C.C.

Exile. [Captivities; Dispersion.]

Exodus, the second of the books of the law, called by the Jews shēmōth ("names"), from the words in ver. 1, and named by the Gk. translators "Exodus," from its principal theme—the "Going-out" of the children of Israel from Egypt. After a brief recapitulatory section (1.1-6), it narrates the oppression of Israel: the birth and call of Moses; the conflict with Pharaoh, plagues, and events which led up to the Exodus; the pursuit and deliverance at the Red Sea; the march to Sinai and trials in the wilderness; the lawgiving, covenant, and long encampment at Sinai; and those events which followed the people were being made: the breach of the covenant in the making of the golden calf while Moses was in the mount; the restoration, the making, and, finally, the setting up and consecration, of the tabernacle. The book is instinct with dramatic power and thrill with a consciousness of the living presence and action of God which witnesses to its composition while yet the memory and deep impression of the events it
EXODUS

records were fresh upon the mind. The book may naturally be divided into four parts: (1) The oppression and conflicts with Pharaoh (2.7-11); (2) The Exodused journey to Sinai (12-18); (3) The lawgiving and covenant (19-24); (4) The tabernacle (25-40), with (in 32-34) the episode of the golden calf, and the renewal of the tables. In 28.29 are directions about the priesthood, which connect with Lev.8.9. The heart of the history is the solemn transaction at Sinai, by which the people formally accepted Jehovah as their God, pledging themselves to obey His laws, and Jehovah took Israel to be His people; but the story of the deliverance which precedes, displaying as it does the attributes of Jehovah in their gratest exercise, is hardly inferior in interest and power. The narrative of the lawgiving is especially important, as embodying one of the great codes of law in Israel's history—the Decalogue, followed by articles as distinguished as (in the Decalogue) only 2-3. The oldest section of the Book of the Covenant (Ex.20-23). The modern critical analysis of the book of Exodus follows, in a documentary respect, the main lines indicated in the article on Genesis. [See also PENTATEUCH.] The documents J and E, now all but indistinguishingly fused together, are ascribed to Moses in 3.1-6; of Genesis chapters 1-18, however, (a) In the case of both E and P, the use of the divine name "Elohim" (characteristic of these sources in Genesis) ceases with the revelation of the name "Jehovah" to Moses (with E in 3.1-6; with P in 6.2-8). Yet we find Elohistic passages (E) later, as in 13.17-19, 18. (b) In Genesis the P element supplies the framework of the JE narrative. The documents are co-ordinate, and P can no longer be spoken of as "framework." This is a remarkable feature, pointing to distinct circumstances of origin, and favouring the idea that Genesis was an earlier definitely-planned work. The P traditions in Exodus, as elsewhere, are generally easily distinguished from JE, on account of their style and peculiar vocabulary (such a phrase, e.g., as "the self-same day," 12.17,41). Examples in the earlier part of the book are ch. 6, giving the call and genealogy of Moses, and certain of the narratives of the plagues, as 7.1-13, 8.2-7, 16-19, 9.8-12, with a few other passages, e.g., 13.12, 14.1-15,17-20, 15.1-21, of the rest of the narrative belongs to JE. The remarks made on this modern critical theory in the articles above noted [PENTATEUCH; GENESIS] apply with undiminished force to Exodus. Distinction between J and E in this book is admittedly all but impossible when the criterion of the divine names fails; and it is incredible that the P sections could ever have subsisted as an independent document in separation from the other elements in the history. The attempt to carry through such separation leads to destruction of the narrative. E.g., P's made to pass abruptly from the increase and prosperity of the Israelites to the bitter bondage in xv. 13, 14. Apparently the foregoing verses (E) are needed to give the explanation: again, the language of P in 2.23-25 has its verbal counterpart in 3.7 (J). Yet P is supposed to be later than J. In 6.2 (P) we have the revelation beginning with the words, "And God spake unto Moses," but nothing has yet been said in P of either Moses or Aaron. In the plagues, J records the threatening of frogs (8.1-4), but P narrates the execution of the threat (vv. 5-7). In P Aaron is appointed to be a prophet to Moses, to speak for him (7.1,2), but in none of the P sections does Moses or Aaron ever utter a word. J alone narrates the destruction of the firstborn (12.29, 30), which is announced in the Passover law of P (ver. 12). These examples suffice to show that, while different hands (at least styles) may be recognized in different portions, the connexion of the elements throughout is so close that the attempt to part them, and make of each a separate document, necessarily must fail. Thus, it is only the weight of the whole that can give any meaning to the history of the Exodused journey, the turning-point in Exodus, on which not a little depends, is God's revelation of Himself to Moses by His name "Jehovah" in 3.13-16 (E) and again in 6.2-8 (P). This is one of the alleged "duplicates" in the narrative of Exodus. The incidents, however, are distinct; the one at the well, the other at the burning bush. (25-31,34-40). The question is as to the meaning of this revelation. Does it imply that "Jehovah" was an absolutely new name of God to Israel? Or does it mean that God, as already before the Moses, revealed Himself to Moses after the revelation of the name "El Shaddai," was now to reveal Himself by the grander attributes implied in the name "Jehovah" ("I am that I am")? In view of the context in the earlier passage ("Jehovah, the God of your fathers," 3.15,16), this would seem to be the more reasonable view. There is now a tendency of the critics to assert that the covenant of God with Israel, and to recognize that Jehovah was an older name of God. It became, however, from this point, the peculiar name of God in His covenant relation to Israel. This brings us to the disputed question of the connexion of the names Jehovah and the God of Israel, which is sound, the presence of priestly laws of the Passover, and of extended descriptions of the tabernacle (attributed by the critics to post-Exilian times), need not militate against our acceptance of an origin of the book in the Mosaic age. Grounds have been shown for asserting (1) that the Levitical legislation and the history connected with it (P) did not, and could not, have their origin in the age after the Exile; (2) that P never could have existed as an independent document; and (3) that the elements of P stand in inseparable relation with those of JE, and must be practically contemporaneous with the latter. The attempt (in particular) to ascribe a post-Exilian date to the laws of the Passover in Exodus must be pronounced a failure. These contemplate a domestic observance of the festival (12.13,40-51; cf. JE, 12.25-28) which would have been quite unsuitable after the law in Deut.16.1-8 came into force. The question of age and authorship must be settled, therefore,
on independent grounds. That Moses had a certain connexion with the composition of the Pentateuch is attested by the book itself. It is expressly declared that he "wrote the words of the Lord" in "the book of the covenant" (Ex. 24:4, 7). This covers 20-23. A second summary of laws is said to have been written by him (34:27). The regulations for the making of the tabernacle and the account of its construction are in the style of P, but (by whatever hand set down) Moses is declared to be their author (25:2, 9, 35:1, 4, etc.). In 17:14, Moses is directed to write God's threat against Amalek "for a memorial in a book," or, according to the Heb., pointing, "in the book" (cf. Amer. R.V.). The natural meaning is that there was some existing "book" in which Moses made entries or records (cf. Jos. 1, 7, 8, 24:26). It is wholly unlikely that a threat against Amalek would be solemnly recorded in a single sentence, and no account of the hostile action of Amalek which evoked the threat be preserved. The Song of Moses at the Red Sea (Ex. 15:1-20) is evidently intended to be regarded as the composition of Moses. But the agreement of notices in other passages of the familiarity of Moses with the art of writing and with books (Num. 33:2; Deut. 31:9, 24), and of his composition of songs and blessings (Deut. 31:22, 30, 33:1), is a misreading of these particular notices to regard them as excluding other writings; they may refer to immediate or such writings as was customary. A final editing of the Mosaic and other material of this (Mosaic) period need not be assumed till after Moses' death—a supposition which fully accounts for any dislocations, hiatuses, or explanatory notices or allusions to later events which may be thought to be observed. There is, however, little in the book which really points to times later than Moses. Ex. 16:35, on the cessation of the manna, may be such a passage, though it actually does not carry us farther than "the borders of the land of Canaan." No weight need be attached to the fact that Moses is spoken of as the third preacher or such an encomium on Moses as in 11:3 (cf. Num. 12:3), which may be thought unsuitable from Moses' own pen, is readily explicable if indirect authorship and later editing are allowed (cf. Deut. 34:10-12). The historicity of the book of Exodus has been assailed by Colenso and others on the grounds of its internal incredibilities and contradictions. Objection is taken to the rapid increase of the children of Israel in Egypt, the impossibility of the Exodus of so vast a multitude of people (about 2,000,000) out of Egypt on such short notice, the miracle of the Red Sea, the difficulty of the support of such numbers in the wilderness, the construction of so elaborate a tabernacle, etc. The wonder of the facts is not denied, and it is granted that, without mighty divine interpositions at the Exodus, the Red Sea, and in the wilderness, the narrative is not intelligible. But these very facts are among the best-attested in Israel's history, the most deeply engraved on Israel's consciousness, and lie at the very foundations of its national existence. The increase of Israel is remarkable, but not incredible in a period of 430 years (Ex. 12:40, 41). If it be remembered that the patriarchal families at the time of the descent were really considerable households (cf. Gen. 14:14, 26:13, 14, 32:4, 5, 10, etc.). On the other hand, the objectors ignore the immense body of evidence in favour of the historicity of the book derivable from its conformity to Egyptian conditions, habits, and customs, and its exact knowledge of the Sinaic peninsula. "The writer, whoever he was, shows a notable acquaintance with the customs, climate, and productions of Egypt; an acquaintance such as to imply long residence in the country, and the sort of familiarity which it takes years to acquire, with the natural phenomena, the method of cultivation, the religious ideas, and other habits and usages of the people" (G. Rawlinson). "The chapters of Exodus which belong either to the early sojourn of Moses or the wanderings of the Israelites, are pervaded by a peculiar tone, a local colouring, an atmosphere (so to speak) of the desert, which has made itself felt by all those who have explored the country, to whatever school of religious thought they may have belonged" (Canon Cook). The departure of the Israelites from Egypt is of historical importance that we might expect to find some allusion to it in profane history, or in contemporary Egyptian records; but, beyond the late, confused statements of the priest Manetho on the expulsion of the lepers, nothing of this kind has as yet been discovered. The Exodus is considered as the basis of the chronology of the names of the store-cities, Ex. 1:11) to have taken place in the reign of one of the immediate successors of Ramses II. of the 19th dynasty (c. 1250 B.C.); but the discovery of a stela of Menephtah, the son of Ramses, in which "Israel" (for the first time mentioned) is apparently spoken of as already in or about Palestine, has inclined many to carry back its date to the 18th dynasty. The point awaits further determination. [Exodus, The; Red Sea, Passage of.] See Pentateuch; art. "Exodus" in Hastings D.B. (vol. 1. 1858); Exodus in Speaker's and in Pulpit Com.; Hengstenberg, Egyptology and Palestine; Naville, Store-city of Pithom and Route of the Exodus; Orr, art. on the Exodus in Expositor, April 1897. [J.O.] Exodus, The. 1. Date. There is considerable divergence of opinion as to the date, and even as to the dynasty during which the Exodus took place; and, as there is no monumental chronology in Egypt, the only guides are the O.T. and the extracts from the writings of Manetho given by Josephus. If we may accept 2047 B.C. as the date of Abraham's expedition against Amraphel, and deduct 422 years for the time intervening, we shall have 1625 B.C. as the date of the Exodus. Cf. Chronology for a different suggestion. —History. The history of the Exodus itself commences with the close of the ten plagues, in the night on which the firstborn were slain. Pharaoh then urged the departure of the Israelites, and they at once set off from Rameses, toward the morning of the 15th day of the 1st month. They made three journeys, and arrived at Etham, in the edge of the wilderness, not very far from the head of the Red Sea, which in those days appears to have stretched up N. of Suez as far as the Bitter
Lakes. Here Pharaoh overtook them, and the miracle occurred by which they were enabled to escape from their pursuers, whilst all the host of Pharaoh were destroyed in the Sea of Reeds. The Israelites were dwelling in the land of Goshen at the time of their departure from Egypt, and started from the town or district of Rameses; Pithom and Raameses being two store cities which the Israelites had built under Pharaoh the Oppressor. The land of Goshen must have been on the eastern confines of the Egyptian frontier, on the line of defence which probably ran from the Mediterranean to the Red Sea, nearly on the line of the present Suez Canal. It may be supposed that Goshen, to the N. of the Bitter Lakes, extended some miles beyond the frontier to the edge of the desert, as there are indications that hereabouts many square miles of fertile plain have been swallowed up, during the last 3,000 years, by the billows of shifting sands, blown southwardly from the Nile deposits on the shore of the bay of Pelusium. From whatever point the Children of Israel may have started, their line of advance must have been nearly due E., through the desert to the Red Sea, which is the sweet-water canal to about the position where Ismailia now stands: here, no doubt was Etham, on the edge of the wilderness. The preceding station, Succoth, which Prof. Naville identifies with Pirnom, has been found by him at Tell el-Maskhuta, in the Wady Tumilat, on the line of the railway from Aswan to the Suez, and not on the line of the old sweet-water canal, near to the railway station, named Ramases by the French engineers. The site of the ancient town of Raameses has not yet been identified. On arrival at Etham the Israelites were commanded "to turn back and encamp before Pi-hahiroth, between Migdol and the sea, before Baal-zephon." By this command they were obliged to march southward, to the W. of the northern arm of the Red Sea and thus were separated by the gulf from the desert over which their route lay. Considering the thousands of women and children, and the hardy hordes of beasts of burden, or of donkeys, carts, or beasts of burden, it is improbable that, after leaving Etham, they can have gone many miles to the S. before being overtaken by Pharaoh's hosts, and the scene of this miraculous escape must have occurred in the vicinity of the Bitter Lakes. For this part of the story of the Exodus, see further Red Sea, Passage of.—II. The Wilderness of the Wanderings. The Israelites, after escaping safely from Egypt into the desert, were free to pursue their journey unmolested, and their ultimate objective was the Promised Land. The route they were destined to take now calls for consideration. As far as they themselves are concerned, if we may judge from their constant murmuring against their leaders Moses and Aaron, they do not appear to have had any interest in the matter beyond the moment. They had no eye to the future. They desired earnestly to escape from their oppression and slavery in Egypt, but they were soft and unfitted for manual labour, and the discomfort and trials they met with in the desert now and again outweighed the future prospects of a land flowing with milk and honey. They openly avowed, from time to time, that they preferred the life of slavery and the flesh-pots of Egypt to the dangers of the desert, and they were subject to these fits of rebellion against God throughout the time of their wanderings. [Moses.] This tendency of the people, as foreseen by the Almighty, is mentioned (Ex. 13:17): "God led them not through the way of the land of the Philistines, although that was near, lest the people should repent when they see war and then return to Egypt. But God led the people about, through the way of the wilderness of the Red Sea." We have a further indication of the line of route of the Israelites, when the Lord appeared to Moses in the burning bush, in the Mountain of God in Horeb, and said, "When thou hast brought forth the people out of Egypt, thou shalt serve God upon this mountain." To understand the wanderings of the Israelites, it is necessary to consider the condition in those days of the desert which lay between Egypt and Syria. There were then two roads into Palestine from Egypt: (1) the way of the Red Sea, and (2) the way of the Mediterranean, along the sea-shore by Al-'Arish and Gaza; and (2) the way of Shur, leading due E. from Goshen, and thence into the S. country towards Beer-sheba. In either of these cases the distance across the desert, as the crow flies, would not at that time have been more than 60 miles, and the provisions and depots of water and provisions at intervals along the route, the distance could have been accomplished in ten journeys of 6 miles each in time of peace. But if the Philistines and other inhabitants of S. Palestine were hostile, it would entail the necessity of the fighting force going first, and proving their superiority, whilst women and children and cattle were left behind on the confines of Egypt. It is evident that the desert route into Palestine, if the inhabitants were not friendly, would only be practicable when covered by an army of experienced war adventurers. The description of the desert will show that the route taken by the Israelites, under the guidance of the Almighty, was the only practicable one, if the people were to have time to organize themselves for warlike operations. The desert of Arabia Petraea at the present day extends about 150 miles from E. to W., and from the Suez Canal to the limits of modern Palestine, and, for the sake of description, may be divided into four sections, whose aspects are very dissimilar. (1) The neghebb, or S. Country, in Roman times called Idumea, extending some 60 miles S.W. of Gerar and Beer-sheba, to the river of Egypt, whose going out is at Al 'Arish. The desert district has become a desert in recent times owing to a feeble government and the lawlessness of the Bedawin. At the time of the Exodus it possessed towns and villages, and a settled population; even to the present day are to be seen the remains of the vineyards and wine-presses, watch-towers and houses, and fields of corn supplied with water, through which the Israelites could have journeyed without diffi-
faculty if the inhabitants had been friendly. At the eastern end of the S. Country was Kadesh, and it was inhabited by Amorites, Canaanites, etc. (2) The region of shifting sands, stretching along the coast from the river of Egypt to Lake Sebennius and the Egyptian Delta, and ever moving southward year by year, only checked in its southward course by the mountain ranges some fifty miles inland, the northern features of which, at the present day, are filled up with sand. These sand-drifts are due to deposits from the river Nile on the shores of the bay of Pelusium, and they are ever moving backwards and forwards, according to the lie of the wind. These drifts have accumulated in waves and billows from 40 to 50 ft. in height, and at Gattek, N.E. of Ismaïlia, there are thousands of palm-trees in the desert which, rooted in good soil, are sometimes engulfed in sand-drifts and again exposed to view. In this ever-moving desert there are wells, as that at Mahadah, 30 miles from Ismaïlia, where the Bedawin keep a clear space down to the water by ever moving the sand across from the windward to the leeward side of the well. These sand-drifts appear to increase year by year, and it is probable that 3,500 years ago much of the ground, now encroached upon about Ismaïlia, was then part of the land of Gosen. Yet in those days it is probable that these sand-drifts were in existence to the N. and N.E. of the Bitter Lakes, and would have provided an almost insurmountable obstacle to the journey of women and children, in haste, without due preparation, and without a sufficient number of beasts of burden and wagons to carry them. (3) The desert of the Tih ("Wanderings") which stretches from the frontier of Egypt to 'Aqaba, and contains the wilderness of Paran. It is a plateau gradually shelving up from the southern shore of the Mediterranean, and extending some 150 miles to the S., where it reaches a height of 4,000 ft. above the level of the sea, and ends abruptly in a great wall of rock, Jebel et-Tih, jutting into the peninsula of Bashan and presenting a sheer wall to the S. many hundreds of feet in height. At its northern end for about 50 miles it is covered by the shifting drift-sands above mentioned. It is formed of nearly horizontal layers of limestone, with here and there a fault, when sandstone is visible; and in the centre it is broken up by mountain-ranges. It is for the most part a desert, where soil and vegetation are very sparse. In parts the ground is hard and white, without traces of vegetation for stretches of 8 to 10 miles, with here and there a salt, or water-course, with scanty vegetation, and for two months in the year a little water. After heavy rains, which sometimes occur in Jan. and Feb., the seifs are full of water for a few hours, and then the pasture springs up in and about the water-courses. During Nov., Dec., and March there are mists and heavy dews, which give sufficient moisture to the folds of sheep and the Bedawin, but in summer the animals suffer great privations, having to be fed in one locality and taken to water at another spot, sometimes 15 miles distant, twice a week. The goats at times are fed on the stones of dates boiled soft. There are corn-lands in some parts of the desert bounding on the Red Sea, on the flat tops of the mountains where the mists from the sea-breezes deposit sufficient moisture to loosen the soil, but it is not probable that the wanderings of the Israelites took place in any part of this desert, except on the western edge, when they first escaped from Egypt, and on the S.E. side when they went through Paran to Kadesh. (4) The Peninsula of Sinai. This is the portion of the desert which appears to have been appropriated to the use of the Israelites during their wanderings, and though a wilderness, it was not so essentially a desert as the other portions of Arabia Petraea just described. It forms the southern portion of that triangular tract of land lying between the northern horn of the Red Sea, the gulf of 'Aqaba and Suez. The northern portion of this tract is occupied by the table-land of the Tih just described, standing up as a great wall 1,500 ft. in height above the sandy plain which separates it from the Sinai Peninsula. The great rocks which form the southern boundary of the peninsula, cover, from top to a height of about 5,000 ft. above the sea, and are almost denuded of the marl and limestone which used to cover them, and the rugged heights and steep cliffs thus exposed are formed of granite, porphyry, and schist. In many of the deep valleys intersecting the peninsula, timbers and abundant deposits of pitch have not been wholly cleared out, and where this is the case the rainfall can penetrate no farther, and is carried down along the valleys into the sea on the surface of the marl, causing a succession of verdant glades. In those parts where the denudation has been completed, the valleys are arid and wanting in fertility. As instances of fertile valleys may be mentioned Ghuründel, Hebrân, Feirân, and Ta'iviheh. The rainfall in the Sinai Peninsula has, of late years, been less than in the Tih, due probably to the destruction of timber, owing to a tribute of charcoal having been imposed on the inhabitants of the peninsula for the year 1823. There is abundant evidence that the Sinai Peninsula was once comparatively well-watered and fertile, and there are still the remains in the valleys of cultivated lands, corn-granaries, and watch-houses. The principal trees were the palm and the acacia (shittim wood, Ex. 23:5, 26:15, 27:1); and there are still many kinds of bushes, such as wild thorn, willow, fennel, tamarisk, retam, myrrh, and caper. At the present day every Bedawi family has its portion of date-trees and corn-lands, situated sometimes in the desert itself and sometimes in some spot adjacent. There are at present no cattle, but flocks of sheep and goats, many camels, and a few horses, the latter belonging to a tribe called the Sowârkeh.—From The Crossing of the Red Sea to Sinai. The Israelites, on escaping from Pharaoh's host, turned to the left, into the wilderness of Etham (or Etham), and travelled there three days without finding water to drink, and when they came to Marah the waters were bitter, and the people murmured against Moses. These waters have not yet been identified, although
EXODUS, THE

suggestions have been made that Moses' Wells, near Suez, or 'Ain Hawâra, on the Red Sea, represent Marah: these springs, however, are respectively about 40 and 50 miles from the scene of the crossing of the Red Sea, and the nearest of them is much farther than the Israelites can have travelled in three days. We know that the Israelites arrived at Sinai in the third month (i.e. in about two months), and they arrived at the desert of Sin (which is generally allowed to be the plain of el-Markhâ) in one month, and from these data we can assume that the Israelites travelled 140 miles in the first month and 70 miles in the second month, so that at the utmost they did not average more than 5 miles a day. At this rate of progress the bitter waters of Marah would be in the desert somewhat E. of the Little Bitter Lake, and the next halting-place, Elim, would be at Moses' Wells, between seven and eight miles S. of Suez. Here were twelve wells of water and 70 palm-trees. At the present day there are, at Moses' Wells, about seven wells, and some palm-trees and some irrigated ground; in the vicinity of these wells there is much water, as is evident by the hundreds of camel-loads of water which used to have come to the Suez Canal from Sinai for the use of the town from the well of Nâba el-Ghûrqûdeh. From Elim (Moses' Wells) they journeyed under Jebel Râhâh across wâdies Sudr, 'Amâreh, and Ghûrûndel, where there is water, and halted by the Red Sea, opposite to a point where the plateau of the Sinai peninsula and the peninsula of Suez commences. Here they turned into the wilderness of Sin (el-Markhâ), where the Israelites again murmured against Moses and Aaron, longing for the flesh-pots of Egypt. It was here that the daily issue of manna commenced. They now turned inland towards Sinai, halting at Dophkah and Ahush, and arrived at Rephidim, probably in the Wâdy Feirân (Paran), and there was no water for the people to drink. It has been suggested that Amalek stood between the Israelites and the waters of Feirân, which they wished to preserve for their own use. Here it was that Moses went up into the mountain of Hor, under his father-in-law, to ascertain the place. The descent of the Amaelekites, built an altar to the Lord. The next halt was in the wilderness of Sinai before the mount, in the third month after they had gone forth out of Egypt, about two lunar months after their departure. During this journey Jethro, priest of Midian, presented himself to his son-in-law Moses, and gave him the advice which led to his organizing the children of Israel into companies, with rulers over tens and fifties and hundreds and thousands. The people now commenced their training in the "simple life" which was eventually to fit them, as a nation under arms, to issue from the desert as the conquerors of the Promised Land.—Horeb and Sinai. These names appear to be used interchangeably in the Bible, but most authorities now consider that Horeb was the name of the district of Sinai, and that Sinai was the name of the mountain itself (Ex.33.6-34.2). It has been pointed out (Sin. and Joug. 29), that the difference depends rather upon a distinction of usage than of place. In Ex.,

Lev., Num., and Judg., Sinai is always and exclusively used for the scene of the giving of the Law, Horeb being only once used twice for the scene of the burning bush, and of the striking of the rock. In Deut. Horeb is substituted for Sinai for that purpose. Most of the Psalms and Historical Books the two names are used indifferently for the mountain of the Law.—Position of Mount Sinai. Some travellers, without success, have sought for the mountain of the Law in the land of Midian, E. of the gulf of 'Agaba, whilst others have proposed Jebel Serbâl, S. of the Wâdi Feirân. The Ordinance Survey of the Sinai Peninsula, with its careful observations, has set this question at rest by showing that Jebel Serbâl possesses none of the requirements of the Bible narrative, whilst, on the other hand, the traditional site, Mûsâ-Sûfâfâh, answers all the requirements. Mûsâ-Sûfâfâh, situated in the centre of the peninsula, S. of the Râs Sûfâfâh, is, according to the topography of the region, nothing less than the mass of granite some 2 miles from N.W. to S.E., and about 1 mile wide, its elevation being about 6,000 to 7,000 ft. above the sea. On the S. Mûsâ rises to over 7,300 ft., and on the N. Râs Sûfâfâh rises to 6,900 feet, the intervening space being filled with steep cliffs and deep indentations. N. of the Râs Sûfâfâh there is a slight plateau of granite and sloping uniformly down to the foot of the steep cliff, which forms its base, is a plain occupying about a square mile of standing ground, directly facing the front of the mountain, and this plain extends to N.E. and N.W. through the wâdies esh-Sheikh and el-Râhâh, which are the mighty gates of a cataract. The Râs Sûfâfâh thus overlooks a plain where the Israelites could assemble in their multitudes, and fulfil the conditions required by the narrative. They could stand at the "nether part of the mountain" and yet "remove and stand afar off," and at the same time hear the voice of the Lord when He spake "out of the midst of the fire" and answered Moses "by a voice." They could draw near and "touch" the precipitous cliffs, and, standing under them, could see the summit. The peak is so well defined that it could be easily distinguished as the "top of the mountain" by the eyes of the people; and for the first time Moses and the Israelites, in very ancient times, looked at the mountain which the Lord had prepared for the camp of Israel, and that for the camp of the Amorites (Deut.1.19); through Taberah (Num.11.13; Deut.9.22), Kibroth-hattaavah (Num.11.34,33.16) and Hazereth (Num.11.35,33.17). From Kadesh-barnea the spies were sent out to Canaan, to ascertain the warlike powers of the
people and the condition of the land. After forty days they returned, with a good report of the land, but with an alarming account of the strength of the inhabitants, so that the whole congregation of the Israelites murmured against Aaron and Moses, and even proposed to elect another captain and return under his guidance to servitude in Egypt. In consequence of this they were sentenced "to wander in the wilderness forty years," and were commanded to get into the wilderness at once by way of the Red Sea. But now another spirit of rebellion seized the Israelites, and they determined to go up and fight the Amorites, in spite of all the warnings of Moses; and they were driven back and chased as far as Hormah, by the Amalekites, Canaanites, and Amorites; and after that they "abode in Kadesh many days" (Deut. 1.46).—The Years of Penal Servitude in the Wilderness. 43. In the wilderness of Zin there is an entire route blank in the history of the Israelites during the next 37 years until they are stated to have arrived in Kadesh, in the wilderness of Zin, where Miriam died (Num.20). Even the position of Kadesh is unknown, but we have the following indications. It was in the wilderness of Zin, or in the south boundary of Canaan, which was the head of the gulf of 'Aqaba, and not many miles W. of the Arabsah (the depression connecting the gulf of 'Aqaba with the Dead Sea). It seems probable that Kadesh or Kedesh was a district as well as a town, but the accounts in Num. and Deut. are so difficult to synchronize, with our imperfect knowledge of the country, that it is impossible to arrive at any approximate idea of the locality of the wanderings during the 37 blank pages of history. (See Kadesh, and Kedesh, p.2, for the two views.)—From Kadesh-barnea to the Plains of Moab. In considering this route we are again limited by imperfect knowledge of incidents of the journey. It will be seen in the two accounts given in Num.33.30,31 and Deut.10.6,7 that there are certain stations mentioned which have a similarity of name: (1) Mose- roth, Mosera, (2) Bene-jaakan, Beeroth of the children of Jaakan, (3) Horagidgad, Gud- godah, (4) Jothbahlah, Jothah. Attempts have been made to locate these places at various points in the Sinai Peninsula, but without any satisfactory results. The information at the present time is wholly insufficient to enable us to attempt any localization of the places mentioned in the itinerary, with a few exceptions. Mount Hor is by general agreement assumed to be Jebel Nebi Harúm, near Petra, agreeing with the tradition handed down by Josephus from early times (4 Ant. iv. 7). From mount Hor the Israelites travelled to Ethl and Ezion-geber (Deut.2.5) near the head of the gulf of 'Aqaba, and then turned to the south and up Wady Ithm, by the Aqaba or ascents, to the plateau, following the old caravan route and present Hajj route from Cairo to Mecca. This they followed until they struck the old caravan and modern Hajj route from Mecca to Damascus, and, skirting the eastern border of Edom, they arrived in Moab. Thebrook Zered is probably the Wadí el-Ahsí (Seil Garáhi) running into the southern end of the Dead Sea. From this point to the plains of Moab the only stations which can be fixed with certainty are Dibon Gad (Dhibán), mount Abarim (near Zerqa Mǎ'ā'n), Pisgah (Rās Sūľághah) W. of jebel Nebá, and the plains of Moab (Ghor es-Śeisebán)—[c.w.].

Exorcist. The belief in a power possessed by some to drive out devils is naturally co-existent with a belief in Demonical Possession. For if one accepts the theory that the Powers of Evil may inhabit the human body, it naturally follows (since God is stronger than evil) that there must be a counteracting influence in the body. Hence in N.T. we find exorcism in constant use. Our blessed Lord constantly "cast out spirits" (see, e.g., Mk.5.21f.), and this He naturally did by virtue of His own authority, simply saying, "Come out of him," or, "I charge thee come out and enter no more into him." This authority He delegated to the Twelve (Deut. 22.29) and to the Seventy (Lk.10.17), and (if we accept the last verses of St. Mark as genuine) it was to remain with the Church as a more or less permanent mark of her divine commission (Mk.16.17). St. Paul exercised the same power (Ac.16.19), and there is no doubt that he did so, at least, in the name of Christ. For centuries, nor (according to many) has it ever been lost to the Church. It must be borne in mind that exorcism was no new thing when practised by our Lord. Mt.12.27 seems to suggest a regular practice of the art amongst the Jews, while Ac.19.13 shows that some at least pretended to it. Josephus (Ant.) gives some wonderful fables on the subject. Origen, Justin Martyr, and Tertullian all speak of Jews who claimed the power of exorcising devils in the name of God. [F.J.]

Expectation, Messianic, of Jews. [Messianic Expectation.] Expiration. [Sacrifice; Atonement.] Ez'ar (1 Chr.1.38), properly Ezër, i., as R.V. Ezba'il, father of Naarai (1 Chr.11.37).

Ezion.—1. Son of Gad, and founder of one of the Gadite families (Gen.46.16; = Ozni, Num.26.16).—2. Son of Bela, the son of Benjamin, according to 1 Chr.7.7.

Ezechias.—1. (1 Esd.9.14) = Jahaziah. 2. (2 Esd.7.40) = king Hezekiah.

Ezeckiel. (1 Esd.9.13) = Hilkiah, 5. Ezekiel's (Eccles.48.17,22,49.4; 2 Mac.15.22; Mt.1:9,10) = king Hezekiah.

Ezekiel. Ezekiel, the third, according to another reckoning, one of the great prophets, and, like Jeremias and Zerukiah, of priestly descent, dates his several prophecies almost without exception from the year of his deportation (5th-27th years = 593-571); see 1:2,29;171. He prophesied amongst the exiles at Tel Abib (3.15), by the river Chebar in Baby- lonia (1:1,3,8,10b), and the Levites at the house of his own (3:24,8,1). His till 589 had a wife (24:1,15ff.). Though those of his nation only valued him for his artistic power and are often called "a house
of rebelliousness,” they freely resort to him (33.30ff., 37.18), especially the elders (8.1, 14.1, 20.1). On account of 3.14.1, 26.4ff., 24.27, 33.22, Klostermann held him to be cabinettic; yet this condition was imposed upon him (3.24ff., 34.25ff.), on account of Israel’s rebelliousness (3.26). The “thirtieth year” of 1:1 can scarcely be understood of an era of Nabopolassar, and must be reckoned as that of the prophet’s age. If so, he was carried away young, and before he had exercised his priestly office in Jerusalem (so Josephus). If he was old enough to have had instruction in the law and in priestly service, the particulars exhibited in 40-48 are sufficiently explained. Legend makes him the teacher of Pythagoras and the servant, or son, of Jeremiah, whose prophecies his are often closely related (cf. Ezk.34 with Je.23 ff.; Ezk.23 with Je.3.6 ff.; Ezk. 18.2 with Je.31.29, and the similar connexion between Amos and Hosea, Isaiah and Micah, Haggai and Zechariah, Elijah and Elisha), and finally a martyr and gives him burial in the grave of Shem and Arphaxad. His book contains two principal parts, corresponding to his double mission to terrify the careless sinner and to convince the sinner (see Ezk.28ff.). Possibly this is what Josephus means when he says that “he left in writing two books.” The fall of Jerusalem (Ezk.33.21) forms the turning-point. The first part embraces prophecies against Israel (1-24) and in chronological order (1.1.3, 16.8, 20.1, 24.1), and against seven heathen nations, Assyria, Babylon, Moab, Edom, Philistia, Tyre, Sidon, Egypt in geographical order, the supplement (29.17ff.) being joined to Egypt. Upon his calling to the prophetic office (1-3) there follows threatening of punishment for idolatry and unrighteousness, and for failures in ceremonial and religious duties, in three subordinate divisions (3ff., 8ff., 20ff.), culminating in ch. 24. Part 2, which has as its subject Israel’s future, sets forth the principle, conditions, and historical course of Israel’s restoration and subsequent developments (34ff.), and the outward characteristics of this future—temple, people, laws (40ff.). As his principal task his exegesis, as clear and homogeneous, the thoughts of the earlier prophecies pervading the later, that it stands out as a unity and its authenticity is generally admitted. Its relegation to the Persian or Greek era by Zunz and Seinecke respectively has not met with any acceptance. Since Ezekiel could only reach a small part of his people, the scope of his genius was even more cramped than that of his predecessors. It is the custom nowadays to belittle the literary significance of the book and to characterize the author as a fantastic dreamer without real intuition. But no prophet has so felicitous a command of allegory, symbol, comparison, parallel, proverb, and lyric, and Schiller pays a warm and unprejudiced tribute to the poetic genius of Ezekiel. Herder called this prophet “the Aeschylus and Shakespeare of the Hebrews.” Ezekiel’s frequent symbolic actions were not wholly carried out, but were ideal. His vision of the high-priest, as regard as mere literary embroidery, are as magnificent as his conception of God, and of this the opening vision gives us a good example. Above all, his subject-matter is many-sided and imposing. According to Wellhausen, he initiated the tendency towards the priestly codification of the laws, and by not a few he is held to be the creator or editor of the law of holiness (Lev.17-26). We believe this to be quite impossible. He presupposes both, understood these laws in their deep symbolism, and brought their historical evolution, as far as possible, to its culmination and final result (40ff.). The fountain of waters rising in the temple (Ezk.47 ff.) shows the concluding chapters (40ff.), on the one hand, to be no literal programme of reconstruction, while, on the other, the very detailed measurements forbid our treating it as mere allegory. An actual change in the state of affairs has been brought about by Jehovah. Similarly, the greater size and stricter measure of the temple, as compared with the one destroyed, is intended to symbolize God’s holiness. Sound exegesis keeps the middle path between the extremes of a false spiritualism and of an unimaginative realism. As was natural to a priest, he makes use of the imagery of Law and Temple which lay to hand, but as a prophet he bends it freely to his purpose (see Josephus, Ant. 7.8.1). Are the Critics Right? pp. 114-141.) His priestly descent also shows itself in his idea of the Messiah, Who is for him not only king (34.11ff., 37.22, 241.) but high-priest, as in Jeremiah and Zechariah (see 21.25ff., where both the high-priestly diadem and the kingly crown are for the Messiah; 45.25ff., where the high-priest acts as the high-priestly intercessor for “all the people”; and see further the present writer’s Messiahische Erwartung der vorchristlichen Propheten, pp. 334 ff.). Ezekiel, though not first in this field, is important also for his extension of eschatological ideas (38.17, 39.8; cf. Rev.20.8). But avoiding more apocalyptic fantasy on the one hand, and the dry bones of ceremonialism on the other, he enriches his conceptions with the deepest thoughts of practical religion—e.g. the religious value he sets upon the individual, which, in accordance with his anxious mission to the exiles, he emphasizes in the book (cf. Ezek. 3.17ff.; 33); his universalism, which includes the nations not only in judgment (25-32), but also in salvation (5.3, 16.4ff., 17.23, 34.26); and his conception of God, which unites the greatest love with the greatest holiness and the loftiest sublimity. For the love, specially cf. 11.19f., 36.26ff., 39.29; for the majesty, consider the opening vision, the frequent opposition of “the Lord Jehovah” to “the Son of Man,” and the fact that over fifty times it is given as the design of the whole divine plan and operation that the nations as well as Israel should recognize both in judgment and in promise that He is Jehovah. The text is frequently corrupt or obscure. Because some of his opinions were considered inconsistent with the Law, the Jews debated whether Ezekiel should be read in the public services of the synagogue; it was, however, finally decided in favour of such reading. But on account of the abstruseness of its introduction and final verses, and the fewness of the study of these (as of the first chapters of Genesis) was prohibited to any one of less than 30 years of age. Express quotation before N.T. times
is found only in Eclusus.49.Sf., which refers to Ezk.1,13,11,38,9,16,22. The concluding vision has had a special influence upon the Apocalypse of St. John. Zunz, Gottsdienstliche Vorträge; Seinecke, Geschichte Israels; Commentaries of Keil, Hävernick, Hengstenberg, Von Orelti, Smend, Bertholet, Kraetzschmar; Klostermann in Studien und Kritiken (1877); Redpath, Ezk. in Westminster Comm. (1907). For a discussion of the style of Ezekiel, see Spencer in Lex Mosaicca, s.v. [W.N.]

**EZEL, The stone** (1Sam.20.19). "The stone of departure," perhaps the Levitical boundary stone at Gibeah. The LXX. reads "this Ergab" (or "stone-heap"). [C.R.C.]

**EZEM** (1Chr.4.29). [Azem.]

**Ezer**—1. A Horite "duke," son of Seir, dwelling in mount Seir in the land of Edom (Gen.36.21,27,30; 1Chr.1.42, cf. 38).—2. A son of Ephraim, slain by the men of Gath which returned from captivity with Zerubbabel (Ne.12.1).—3. A man of Judah in the obscure genealogy of 1Chr.4.17; K.V. Ezrah. —3. The famous scribe and priest, descended from Hilkiah who was high-priest in Josiah's reign and from whose younger son Azariah sprang Seraiah, Ezra's father (Ezr.7.1, quite a different person from Seraiah the high-priest). All that is really known of Ezra is contained in the four last chapters of the book of Ezra and in Ne.8 and 12.26. He was a learned and pious priest-scribe, residing at Babylon in the time of Artaxerxes Longimanus. The origin of his connexion with the king does not appear—it may have been through the influence of Esther's family. In the seventh year of the king's reign Ezra obtained leave to go to Jerusalem, with a company of Israelites, including priests, Levites, singers, porters, Nethinim, and laymen. Their journey

in a cattle-raid (1Chr.7.21). [Elead.]—3. A priest who assisted at the dedication of the walls of Jerusalem (Ne.13.42).—4. Father of Hushah of the sons of Hur (1Chr.4.4).

**Ezraias** (1Esd.8.1) = Azariah, 7.

**Eziel.** [Aziel.]

**Ezion'-geber**, or Ezion'-geber (Num.33.33; Deut.2.8; 1K.9.26,22,43; 2Chr.8.17, 20,36), the last station named for the encampment of the Israelites before the wilderness of Zin. It was "beside" Edath, apparently on the shore. The name has been supposed to be preserved at 'Ain Ghudiam, 10 miles up the Arabah Valley, but this is doubtful. [C.R.C.]

**Ezinite, The.** According to 2Sam.23.8, "Adino the Ezinite" was the Taehmonite "that sat in the seat." In 1Chr.11.11 we read instead "Jashobeam an Hachmonite." The R.V. in the first passage reads "Joshebbaasebeth a Taehemonite." [C.R.C.]

**Ezra** (a shortened form of Azariah).—1. The head of one of the 22 courses of priests from Babylon to Jerusalem took just four months. They brought with them a large free-will offering of gold and silver, and silver vessels. Ezra's design was to effect a religious reformation among the Palestine Jews, and to restore the observation of the law of Moses, from which they had grievously declined, and to which he was sincerely devoted. His first step was to enforce separation from their wives upon all who had made heathen marriages, as many priests and Levites (as well as other Israelites) had done. This was effected in little more than six months after his arrival at Jerusalem. With the detailed account of this important transaction Ezra's autobiography ends abruptly. Perhaps his firman had expired; at any rate, we hear nothing more of him till, 13 years afterwards, in the 20th of Artaxerxes, we find him again at Jerusalem with Nehemiah; "the Tirshatha." The functions he executed under Nehemiah were mainly of a priestly character. As he is not mentioned after
Nehemiah’s departure for Babylon in the 32nd of Artaxerxes, and as everything fell into confusion during Nehemiah’s absence (Ne.13), Ezra may have died or returned to Babylon before finding out the king’s mind, for nothing about the time or the place of his death. There was a strong Jewish tradition that he was buried in Persia. Ezra was presumably a man of prayer and a man of learning. His knowledge of the law and the prophets is recognized by all Jewish writers, who credit him with many impossible feats. The principal works traditionally ascribed to him by the Jews are: (1) The institution of the Great Synagogue. (2) The settling the canon of Scripture, and restoring, correcting, and editing the whole sacred volume. (3) The introduction of the Aramaic character instead of the old Hebrew. (4) The authorship of the books of Chronicles, Ezra, Nehemiah, and (some add) Esther; and even Ezekiel, Daniel, and the twelve prophets. (5) The establishment of synagogues.

Ezra, Book of. The book of Ezra is manifestly a continuation of the books of Chronicles, which it overlaps. Like them, it consists of copying and editing, which were afterwards strung together, and either abridged or added to (as the case required) by a later hand. That later hand, in the book of Ezra, was possibly Ezra’s own, for the four last chapters are his. The first part of the book (ch. 1-6) gives us the decree of Cyrus (Ezr.1.21-23), and the purpose of the people, the re-laying of the foundation of the temple, the opposition which caused a nine-years’ delay, the subsequent removal of the difficulties, the completion of the work under the encouragement of the prophets Haggai and Zechariah, and the inauguration of the temple services. The second part of the book (ch. 7-10) brings Ezra on the scene, 57 years later, armed with a firman from Artaxerxes, which authorized him to administer justice and to further the religious interests of the people. He found many shameful abuses, but he faced them in a spirit of prayer (ch. 9) and courage (ch. 8). The last part of it is in Aramaic, i.e. from 4.8 to 6.18, and also the decree of Artaxerxes (7.12-26). Cf. the case of Daniel. The Heb. language was evidently dying out, and a neo-Heb., such as we read of in N.T., was beginning to take its place. The chief portion of the last chapter of 2Chr. and Ezr.1 may have been written by Daniel. Daniel records none of the great events of the first year of Cyrus (to which allusion is made in Dan.1.21). But Ezr.1, if placed between Dan.9 and 10, exactly fills up the gap, and records the decree in which Daniel was so deeply interested. Moreover, the manner of the record is exactly Daniel’s. The giving of the text of the decree, Ezr.1.2-4 (cf. Dan.4.1-3), the mention of the name of “Mithredath the treasurer,” ver. 8 (cf. Dan.1.3,11), the allusion to the sacred vessels placed by Nebuchadnezzar in the house of his god, ver. 7 (cf. Dan.1.2), the giving the Aramaic name of Zerubbabel instead of Sheshbazzar (cf. Dan.1.7), and the whole locus standi of the narrator, first evidently wrote at Babylon, not at Jerusalem, are all circumstances which possibly point to Daniel as the writer of Ezr.1. Ezr.2-3.1 is found in duplicate in Ne.7, though the copies do not wholly agree. Except one explanatory addition (4.6-23), by a later hand in the reign of Artaxerxes Longimanus, the whole book is from the hand of a writer contemporary with Zerubbabel and Jeshua, and an eye-witness of the rebuilding of the temple in the beginning of the reign of Darius Hystaspis. It has been suggested that Haggai was the writer. At any rate, it was much earlier than Ezra’s time. The last four chapters are Ezra’s own, and continue the history after a gap of 58 years—from the 6th of Darius to the 7th of Artaxerxes, in the midst of which gap the book of Esther might have been inserted. The text of the book is not in a good condition. There are palpable corruptions both in names and numerals, and perhaps in some other points. There has hardly been any doubt about the canonicity of the book, although it is not quoted in N.T. Of late years it has been thought that this book ought to be regarded as apocryphal, and that 1 Esdras ought to take its place. A comparison of the two books, however, suggests that difficulties would be decreased rather than diminished by course. Josephus appears to side with 1 Esdras: but he writes rather vaguely on the subject. The dates of the kings of the period covered by the book of Ezra are as follows: Cyrus, 538 B.C.; Cambyses, 529; two impostors, Gomates and Smerdis, followed by Darius Hystaspis, 522; Artaxerxes, 465. The list given in the book of Ezra includes Cyrus, [Xerxes, Artaxerxes,] Darius, Artaxerxes. The reference to Xerxes (i.e. Ahasuerus) is in one verse only (4.6), and may be dismissed as an illustrative note—perhaps by Ezra himself. The Artaxerxes in the passage which follows can hardly be the Artaxerxes (Longimanus) of Ezra’s and Nehemiah’s time; otherwise the whole passage (4.7-23) must be dealt with as a later insertion—a view which is held by many. The only alternative is to regard the name as a substitute for Cambyses. This alone will make the whole passage harmonious. The changing of names has not uncommonly been diminished by some translator into Sheshbazzar (1.8), while his official title was Tirshatha. Josephus calls him Sana-bassar. The impostor Smerdis was called Spandadates by Ctesias and Oropastes by Justin; Xerxes was also called Cyrus; and so with others. Cambyses is called both Kambathos and also Mesutira [?] Ramesdana; Maspere by his Egyptian subjects (Petrie, Egypt, iii. 360; Pierrct, Vocab. pp. 234, 642); and his Palestinian subjects may have had some reason, unknown to us, for introducing under the name Artaxerxes. It may be added that Josephus says that the delay caused by the adversaries was one of 7 years. This delay took place for this beginning of the reign of Cambyses to the 2nd year of Darius Hystaspis. The difficulty may have some other solution. In 1 Esdras and Josephus it is affirmed that Zerubbabel headed a second expedition at the beginning of Darius’s reign, and that the list of ch. 2 belongs to this and not to Ezra’s time. This view is opposed to this view.

[R.B.G.]
Ezrahite, The, a title attached to two persons—Ezrah (1K.4.31; Ps.89, title) and Heman (Ps.88, title).

Ezri, son of Chelub, superintendent of king David's farm-labourers (1Chr.27.26).

F

Fable. [ALLEGORY.]
Fair Havens (Καλός Μεσός), a harbour in the island of Crete (Ac.27.8). Though not mentioned by classical writers, it is still known by its Gk. name. It appears to have been the harbour of Lasph, E. of Cape Matala, which is the most conspicuous headland on the S. coast of Crete, and immediately W. of which the coast trends suddenly N.

Fair, a word occurring only in A.V. of Ezk. 27, and there no less than seven times (vv. 12, 14,16,19,22,27,33): in ver. 33 it is rendered "wares," which R.V. rightly uses throughout.

Faith. Cf. Salvation; Repentance; Conversion. Faith is the second step along the way of salvation. Repentance is the casting off of the old servitude, faith the submission to the new. Hence faith is the moral opposite of sin, even more than is repentance. It is also closely connected with sacrifice as its inward and spiritual reality. The place of faith in the spiritual life has been confused by the theory of substitution and vicarious punishment. It is taught that Christ's sacrifice was penal, and that He suffered the wrath of God in our stead, all that is left for faith is trustfully to accept His sacrifice, and to consent to be involved in His merits. This is the view of Bp. Moule (cf. Christian Doctrine and Epistle to the Romans). One primary objection is that such a view of faith is inapplicable to O.T., and that the faith of the O.T. saints meant something higher, viz. their entire devotion to the cause and Church of God. It can hardly be supposed that faith should have lost, and not rather gained in intensity in consequence of the teachings of Christ. Such from this, faith in N.T. includes the utmost of sacrifice. It is vain to seek its meaning by grammar and dictionary, for the relation defines the word, and not the word the relation. Faith is one thing in a friend, another as between husband and wife; but the highest, most intimate, and most vital relation of all is between the soul and God. Faith is the demand of Christ, unique, exceptional, imperative. It is not satisfied by intellectual acceptance, or passive acquiescence in a work done for us, but is personal self-surrender. This high meaning will explain its Pauline preference to works. By these are meant works done in substitution for submission. Such works are of the nature of sin, because not done according to the will of God. God may of His mercy take the will for the deed, and overlook imperfect obedience; but He cannot take the deed instead of and in the place of the will. We cannot please God except as we desire to please Him. This desire to please Him is called faith. [PAUL.]
The standard teaching on faith is contained in Bp. Jeremy Taylor's well-known sermon Fides Formata. "Faith destroys our sin, unites us to God: by it we are partakers of Christ's death and imitators of His life." [M.S.]

Fall, The. The narrative of the Fall has all the marks of the most hoar antiquity. Whether divinely revealed to Abraham before his flight from Mesopotamia, or preserved under divine supervision in the family of the patriarch, after it had become overlaid by false traditions among other dwellers in that region, it is clearly more archaic in style and method than any other portion of O.T. It has been interpreted both literally and spiritually. That it is to some extent figurative in form is demonstrated by the allusion to the "tree of knowledge of good and evil." Literally, of course, there is no such "tree"; and Holy Scripture is not responsible for injudicious literalists, who have ventured to amend the Bible, and substitute an apple (!) for the "fruit" mentioned. But whether taught literally or figuratively, the spiritual lessons of the narrative are necessary foundation truths of our religion, and the starting-point for the whole scheme of redemption. That man has fallen since his creation, by violating the laws prescribed for him by the Almighty, is a fact proved by the whole history of the world. The first act committed by man in violation of those laws constituted the Fall. Whatever was the exact character of man's first offence, it is clear that it involved an abuse of the free-will granted him by his Maker. He fell at the moment when he first resolved to prove his experiment a success. This experiment was suggested by the Tempter, traces of whose malign influence are not wanting in the world before man was introduced into it. The temptation consisted in making our first parents believe that they would elevate themselves vastly in the intellectual and moral scale by disobedience to God's commands. "Ye shall be as God [R.V.], knowing good and evil." The immediate results of their sin were (1) the loss of the life of happiness they had hitherto led; (2) the conversion of joyous industry into toil, distress, and conflict with obstacles; and (3), to the woman, the agony of childbirth. The ultimate results were (1) jealousy, murder, remorse, despair, among their immediate descendants; (2) the universal spread of violence and disorder in the earth; (3) the destruction of mankind, with the exception of a single family; (4) the death of even the human race was in ascent. Certainly one result of the Fall was the arrest of man's spiritual development until the coming of Christ (Gen.6.3). Some subsidiary results may also be mentioned. The
sentence pronounced on the serpent indicates the moral degradation which sin invariably brings with it. The sense of shame which led to the use of clothing seems to point to the violation of the proper relations of the sexes as an early result of the first transgression. Yet the story of the Fall is not allowed to leave man hopeless. Throughout the ages, the Church has ever been taught to expect the coming of Christ the Restorer; and the form of the prophecy (Gen.3.15) indicates that man shall not in the end be the loser by the results, however dire, of transgression, but that those to whom God has given the victory, through our Lord Jesus Christ, shall rise to a higher fellowship with God, and a higher communion with their fellows, through conquest of self and victory over temptation. [SATAN.] [J.J.L.]

FALLOW-DEER (Heb. yahmūr). The Heb. word is mentioned only in Deut.14.5 and 1K.4.23. Although the fallow-deer (Cervus dama) occurs in Europe (85 ephod mentions the species as sparsely on Tabor and in the Lebanon, while the Mesopotamian fallow-deer (C. mesopotamicus) inhabits the mountains of Luristan, in Persia, the translation of yahmūr as "fallow-deer" is generally regarded as incorrect. The identification of the species of wild ruminants mentioned in the Bible is a matter of extreme difficulty, and yahmūr has been generally considered to indicate the bubal hartebeest (Bubalis boselaphus) of the semi-desert districts of Africa, which has been supposed to occur in Syria, but on wholly insufficient evidence; therefore it is much more probable that some species of ruminant is intended.

Family and Inheritance. The Heb. words for family, etc., have varying meanings, and it is often impossible to be sure which meaning was intended in a particular context. Hence the words in A and B are treated in their more usual senses. A. The largest norm. division of the family is the HOUSEHOLD, wāgīthākā (A.V. often family, Num.1.2, etc.), Jos.7.14; Deut.29.18 [17], etc. (On the use of shebbel in Judg.20.12, 1Sam.9.21, see Internat. Crit. Comm., ad locos.) Besides the real or fictitious community of blood, several resulting principles require attention. (1) The clansmen for generation is a division of the family, usually of their number (2Sam.14.7). It does not appear whether any member could be the gō'ēl hadāmān [HOMICIDE], when there were nearer relations, or whether they merely watched over the fulfilment of his duty by the gō'ēl. Perhaps, too, the principle of collective responsibility for sins extended to all clansmen (Lev.20.5) [Law in O.T., B [iv]], but possibly the Heb. word is here used in a narrower sense. (2) There were clan sacrifices (1Sam.20.6,29), at which all the (7 male) members were present. (3) The rights of inheritance to, and pre-emption and redemption of (Lev.25; Je.32), immovable devoted to the nearest clansman in default of near relations (Infra. E. III.). (4) Probably the restitution of Num.5.7f. was made to the nearest clansman, if the injured person and his immediate family were dead, but the meaning of gō'ēl here (R.V. kinsman) seems doubtful. (5) The right (and, probably, duty) of redeeming property from the freedmen through insolvent devoted similarly (Lev.25.49). (6) From Ru.3, it would appear that the duty of contracting a LEVIRATE marriage also devolved similarly. In other ways, too, the sense of connexion appears, e.g. 2Sam.16.5; Judg.9.1-3 (even where through the mother); Gen.24.40. Occasionally a group of clans constituting a sub-tribe is spoken of, and then "father's house" (Num.3.35, etc.) or "tribe" (4.18) is used; but no special term exists. [BROTHER.] B. The next subdivision is the bēthab̄, "father's house," within which every individual desired his name as the ancestor of a family to be preserved (1Sam.24.21; cf. 2Sam.14.7; Num.27.4; and contrast Deut.25.10, "His name shall be called in Israel the name of him that hath his shoe loosed," partly as a sanction working on men's feelings, partly as severing the family bond; cf. Post, Grundrisse, i.163-165). That the phrase does not mean merely house of the father appears from 1Sam.22.17,22, where Ahimelech's "father's house" = "the house of his nearest relations" (esp. the nob = Abiathar's "father's house" (Ahimelech being Abiathar's father). See also Num.1.4, etc., esp. 18.1 (of Aaron's family, i.e. descendants). The collective idea is seen clearly in 1Sam.17.25, "Will give him his daughter and make his father's house free in Israel;" 19.16, "This shall be a sign to thee, and to all thy father's house," (cf. 2Sam.3.29,14.9; i.K.2.31). So probably in Judg.9.1 we should understand Abimelech as appealing to the clan of his mother's "father's house" (Moore, Judges, 243), and this use is frequent elsewhere. In Chronicles the father's houses of the priests are two technical divisions of the Levites, one for all—Ezra's house and Ithamar's (1Chr.24.6)—which in turn were subdivided (2Chr.35). The Chronicler also uses the term of technical divisions of the Levites (1Chr.23.11,26.13), and perhaps of the people (2Chr.25.5,35.12) as well as in other senses. The meaning of the expression is a division of the father's house which means household, sometimes descendants, sometimes family (including ascendants and collaterals), sometimes, perhaps, almost "clan" (Ex.6.14). [TRIBE.] Probably in some cases it is a technical division of the clan, in others it denotes a family connexion not necessarily blood relationship from generation to generation. Presumably any member of this would perform the last offices in default of nearer relations (Am.6.10; uncle? or kinsman?), except in the case of priests. Probably the head of the senior "father's house" (i.e. the senior representative of the ancestor of the tribe through males having the blessing [Birthright]) was the Prince of the tribe. In Num.17 "father's house" is used for tribe, probably because both the Heb. words for "tribe" mean "rod." C. Next comes the smaller group of close relations, for whom a priest might defile himself (Lev.21.1-3; Ezk.44.25), based not on blood-relationship merely, but partly also on subjection (past or present) to a common ancestor. Thus the sister is included, if unmarried, otherwise she will be "under her husband," not "in her father's house" (cf. Num.5.29, Heb.). Yet the principle of blood-relationship excludes the wife from the list. Relations separated by more than one generation (grandchildren, grand-
parents, etc.) are omitted. This group, therefore, coincides with no other connexion, but expresses partly the sense of blood-relationship, partly the idea of family subjection, partly perhaps the conception of the necessities of the case. I. The Household. 1. The head of the house as father and husband. In early times the father enjoyed unlimited powers over the members of his household, including the power of life and death (Gen.22, 31,32,38,4:1,42,37; cf. Roman patria potestas, and Post, Grundriss, i. 170-173, ii. 135). Later these dwindled, and the various powers must be treated separately. (1) The father's jurisdiction for offences involving death appear to have passed to the courts of elders, who certainly acted on a joint statement of father and mother (Ex.21:15,17; Lev.20:9; Deut.21:18-21), but his powers of chastisement remained. (2) The power to sacrifice children appears to have remained substantially intact (i.e. the courts and fathers must have had to cooperate), and to have been exercised (Deut.7:19,7; Ex.16:20,20:26; 2K.16,3, etc.), although all such sacrifice is expressly or implicitly condemned in the Pentateuch (Gen.22; Lev.18:21,20:15; Deut.12:18,19,10). Lev.27:28f. recognizes a power to "devote" human beings "from all that is his," but the circumstances in which it could be exercised are not stated. The analogy of other passages suggests that it would apply to idolatrous slaves (cf. Ex.22:20[16]; Deut.13:15, etc.). (3) He could marry his sons and daughters (Gen.38:6; Judg.12:9; Ezr.9:2, etc.). In the case of sons this power may have terminated at some specific age (infra IV.), as we meet with instances of marriages contracted during the father's lifetime by the son (e.g. Esau, Gen.26:34). In the case of virgin daughters his power appears to have terminated only with his death. He had no jurisdiction over widowed daughters, except, perhaps, the power of widow or divorce (b) returned unto her father's house as in her youth " (cf. Lev.22:13), to whom no levirate claims attached (contrast Tamar, who in her father's house remained under Judah's potestas). (4) He could sell or pledge his children (Ex.4:1; Is.50:1, etc.). (5) The prostitution of a Hebrew maiden was the subject of much discussion in early societies—Post, Grundriss, ii. 170f. was forbidden (Lev.19:29). (6) He could disallow the oaths and vows of his virgin daughter or wife "in the day that he heareth" (Num.30, [Oath.]) (7) He could marry the respective rights of his children among themselves [Brotherhood], distribute his moveable property among them (subject to some limitation, see infra, E), and adopt their children as his own (Gen.48:5). (8) He could divorce a wife at pleasure, or expel from his household a concubine or child (Gen.21). (9) The idea that he ruled over his wife lies at the root of the Hebrew conception of the family (Gen.3:16). (10) See infra IV. on the deference due to him from his children. (11) Slaves also fall within the household [Slave], the unit of society being, as at Rome, the familia, not the family. II. His wives. (a) Acquisition. (1) The most usual form of marriage was purchase (cf. Post, Grundriss, i. 286ff.) by payment of a bride-price (Heb. mohar) to the father; and accordingly the law of seduction and rape provides for compensation to the father, whose property right in his daughter has been infringed. [Crim.] Other gifts by the bridegroom or father were (?) sometimes given (Gen.24,34,12 ["mohar and gift"])." but gift omitted by LXX., [gloss], 29,24, etc.), but our information is here inadequate. (2) Wheresoever marriage by purchase exists, the custom of commuting the whole or part of the bride-price for service arises in the case of poor suitors. This is found in Gen.29; cf. Post, Familienrecht, 217-218, Grundriss, i. 315 ff. (3) Marriage by capture is another universal form which finds illustration in the story of the Benjamites (Judg.21; cf. Gen.34,29, Num.31,18, etc.). Such women were protected by Deut.21,10-15, and were probably (at any rate in some cases) wives, not concubines, infra IV. (4) Caleb promised his daughter to him who should accomplish the promise (Num.13:16). (5) The marriage of the Levite who was a Levite and possessed a Levite (Josh.15,16,18; Gen.1:1, etc.) to a Sam.17,25. Marriages of this kind are sometimes treated as forms of (1) or (2), but they must always have been abnormal. (5) Orphan heiresses (Num.36, 6; perhaps all orphaned free virgins and widows (1Sam.25,9ff.; other than those affected by the Levirate law and possible foreign virgins) bestowed their own hands, presumably without bride-price; but in the case of heiresses of immovables, they were compelled to marry within their tribe (Num.36). In Tobit the right of the next-of-kin to marry a daughter who is an only child, even in her father's lifetime, is seen firmly established (e.g. Tob.6,1ff.), but this is a later extension of Num.36. (6) There has been much discussion about matriarchy, but among the Hebrews this can only be assumed in historical times by ignoring (amongst others) all the facts set out in A, B, and D, I, and II, a) (1) suppl., and D, II (b), III, V, and B, infra; and all the Biblical genealogies. Samson, however, appears to have contracted a form of marriage with a Philistine, in which the wife remains in her family and receives visits from her husband (Judg.14f.). Matriarchal ideas have been used to explain the conduct of Rahab (Josh.2) and women in frequent contact with strange men (matriarchy; the mother's brother) disposes of the hands of his daughters; (ii) Jacob contracts unions with two wives and two concubines in direct contrast to some forms of matriarchy; (iii) Jacob clearly has the full patriarchal power over his household; (iv) the wives (by themselves are counted by Laban, as strangers, etc. [Gen.31,14-16], which can only mean that they had passed from his family into Jacob's; (v) the succession of the sons depends on patriarchal notions [infra III. (b) IV. and E I. (a)]. (7) On racial bars, see infra III. (c); for priests, infra III. (d); and on forbidden degrees, Marriage. (b) Legal position, conjugal duties, etc., see I. supra and IV. infra. From Jos.15,16-19, Judg.1:4f. (cf. Gen.29,24, etc.), it appears that a father sometimes gave his daughter on or after her marriage a blessing, consisting of property, but how far this gave her the right of living independently of her husband about her husband does not appear (cf. 1K.9,16). It is not safe to press Pr.31,16. In Ezk.16,33.
nādhān (āraqē ṣiyqulwān), said to be identical with Assyrian nādnu, "dowry," perhaps has a technical meaning. If so, she could possibly dispose of such property. In historical narratives the wife is seen acting as mistress of the house, e.g. Abigail, the Shunammite, etc., and appears to have held that position in the estimation of the household. Especially in relation to the female slaves her position was similar to that occupied by the master to the males (Ps.123.2). She was "mistress" (2K.5.3; Gen.16.4, etc.). As against her husband she was entitled to sustenance, raiment, and (probably) marriage rights (cf. Ezk.16.27), and Deut.22.13ff. protects her good name. Sometimes a limit was put by agreement on the husband's right to take additional wives (Gen.31.50). For an ideal picture of a wife's activities, see Pr.11.1-31. The metaphor in Ezk.16 (e.g. 10-13) gives a vivid impression of some of a wife's privileges, etc., and Is.3.16ff., etc. of which Jacob's son's wife Joseph might possibly have been the word b'alād ("thing owned"), as showing that the wife was the absolute property of her husband, but laws and literature alike forbid this. The kindred verb is used with peculiar tenderness of the husband's treatment of his wife (see esp. Je.31.32), and b'alād and ba'al are usually used synonymously. Adultery with a b'alād spells death, just because she is free (Gen.20.3; Deut.22.22; contrast Lev.19.20). A b'alād can only be divorced by writing (Deut.24.1), and her rights were probably secured by law (cf. 21.13f). Indeed, even the verb ba'al is never used of servile concubines. It is applied to the woman who possibly have been concubine and not wife. She was certainly treated with great favour by the law, and in no other case can it even be suggested that the word is used of a concubine of any sort. See also W. R. Smith, Religion of the Semites, 2nd ed., 108f. footnote, and cf. III. (b) Marriages. On marriage, see (Judg.19). Marriages Divorce. III. His concubines. (a) These might be of two sorts, either daughters of freemen, or women who were previously slaves. (i) Of free origin. The law protected their rights, securing to them either conjugal rights or the right of ransom while still virgin, such concubines; or if married, a wife, if sold to the head of the household for himself, or the treatment accorded to daughters, if for his son. Failing this, such a woman went free (Ex.21.7f.). The ordinary terms of affinity were used in reference to the members of her family, her owner being her father's son-in-law, etc. (Judg.19). Kinship with the children of such was fully recognized (9.1ff.). They sometimes lived separated from other wives (8.31). (2) Of servile origin (e.g. Bilhah and Zilpah). These had no rights (conjugal or other) secured by law in virtue of their concubinage, though of course enjoying the same legal protection as other bondwomen. [Crimes; Slave.] Sexual offences committed with them are expressly put on a different level from those committed with free women (Lev.19.20). They were (? sometimes) subject to the wives, who could maltreat them. If given by a wife to the husband, the children were considered as hers (Gen.16, etc.), perhaps as the result of adoption by her. (3) On captives, see supra II. (a) (3) and (b) and infra (c). (b) Difference from wife. The following differences suggest themselves, but owing to the scantiness of our information the concubines referred to are, in some cases perhaps, only servile concubines, so that the distinctions do not all apply to free concubines. (i) In the case of wives, a marriage feast and perhaps other ceremonies were usual (Gen.29.22; 2 Esd.9.47; Tob.8.19, etc.), but not in connexion with concubines. (ii) Covenant relations subsisted between husband and wife, and the wife was the husband's consort (Ezk.16.8; Mal.2.14). This can scarcely have been so with concubines. (iii) Similarly, the wife of a king, perhaps a queen, not so his concubines (Can.6.8f., etc.). (iv) The Chronicler draws a clear distinction between the sons of David's wives and those of his concubines (1 Chr.3.9). Similarly with Abraham (Gen.25.6) and (in matters of inheritance) Sarah (21.10). In the case of concubines, however, there is no such distinction. They were, perhaps, adopted by the wives, but, as Ishmael was in a precisely similar position as regards Sarah, the criterion cannot be found there, and it would seem that the father had power to give concubines' sons inheritance with his other sons. The right of intermarriage with them was thus neither given nor denied, but not similarly at the father's disposal. It can scarcely be thought, e.g., that the birthright of the eldest son, or the kingship, or the blessing, or the position of "prince" or "head of a father's house," could ever have passed to the son of a concubine except in default of other heirs. (v) It was possible to have property given to the heir (2 Sam.3.7, 16f.; perhaps 1 K.2.17-22, Abishag, who was perhaps concubine, not wife, but whose union with David had, in any case, never been consummated, 1 K.1.14). Widows (possibly excepting royal widows), on the other hand, were free women, except perhaps so far as the levirate law prevented this (Gen.38.11; Ruth 4.19; 1 Sam.25.44). [Oath.] (vi) The relation was differently terminated. A wife was divorced (pief of shālāh is used technically), whereas a concubine was redeemed or emancipated (Lev.19.20; Ex.21.8). So, too, shillāh is not used of unlawful concubines; contrast Ezr.10.3, etc., Heb. (gōšāq), Lev.21.7, etc., which presumably cover all sexual connexions terminating during the joint lives of the parties, cf. Gen.21.10). (c) Racial bars (to marriage and concubinage alike). The law forbids unions with women of the tribes that were to be exterminated (Ex.34.16; Deut.7.3, 20.17; cf. Judg.3.6). It expressly permits unions with other races (Deut.20.14, 21.10-14), e.g. with virgin (but not married) Midianitish women, Num.31.18 (not of course with religious prostitutes, Num.25.31.15f. [Harlot]; and the contrast between Lev.21.7 and 21.14 shows that even priests were allowed to contract unions with foreign women. [Contrast Ezk.44.4; infra (d)].) Later feeling varied—e.g. Ruth was a Moabitess; but Solomon's wives are condemned (1 K.11.1ff., a wide interpretation being apparently given to Ex.34), and Ezra and Nehemiah waged a vigorous campaign against foreign wives (Ezr.9f.; Nm.15.29f.), including, e.g. Egyptians, with whom intermarriage was
certainly not prohibited. Doubtless historical experience rendered this extension of the law necessary. (d) Priests could only contract legal position with virgin or widows, Lev.21.7 (Ezk.44.22 limits to Israelitish virgins and widows of priests), while the high-priest was further limited to an Israelitish virgin (Lev.21.14). [Priests.] (e) On forbidden degrees, see Marriage. IV. Children, especially sons, were ardently desired (Gen.30.1, etc.). (a) Adoption. They owed deference to both parents alike (Ex.20.12, etc.). Cursing or smiting a parent was punishable by death. [CRIMES.] See further I. supra. Engert instructively points to the difference between the reception of Bathsheba by her husband (1K.1.15ff.) and by her son (2Chr.21.3). On the age at which a son was emancipated from his father's control we have no certain information, possibly 20 years in the Mosaic period (cf. Ex.30.11-16). [FIRSTBORN.] (b) Birth and Education. Childbirth was generally easy (Ex.1.19, etc.; contrast Gen.3.16). Midwives usually assisted (35.19, etc.). Midwives, 1Sam.4.21. The father was not generally present at the birth (Je.20.15; cf. LXX. rendering of Gen.21.7). Language is used implying that Joseph attended the birth of some of his descendants (Gen.50.23), but the text is doubtful (Kittel, ad loc.). After the navel-string had been cut, circumcision (Ex.1.21 f.) and swaddling (Ezk.16.4). Rubbing with Salt is still usual in Syria, and is thought to strengthen the child. Males were to be circumcised on the eighth day. [CIRCUMCISION.] The name was usually given by father or mother (Gen.5.29, 32ff., etc., but see 55.25 [Heb. and E.V.]; 30.6; Ru.4.17, etc.). Later this occurred at the time of circumcision (Lk.1.59, 2.21). According to the law the mother was unclean after childbirth for 7 + 33 days for a male, 14 + 66 for a female, after which certain sacrifices were offered (Lev.12.1-8). Nurses were sometimes employed (Gen.24.59, 35.5; 2Sam.11.8, etc.). The infant child was washed and swaddled (Ezk.16.4). - E. Inheritance. 48.5 and Esther by Mordecai (Esth.2.7). There are cases of children being brought up by persons not by contrary desire. For Genubath (1K.11.20), Tobit (1.8). Change of family by a man on marriage occurs once (Ezr.2.61; Ne.1.63), and may conceivably be a form of adoption (cf., however, Num.27.4). -FAMILY. 1. Inheritance. I. Movables. (a) Patriarchal age. The father had some power of distributing his property among his sons during his lifetime in different proportions at his pleasure, and this was analogous to a testamentary power (Gen.25.6, 48.22; Deut.21.16), but we do not know how far it was limited. The eldest son by a full wife appears to have had a Birthright by custom in the absence of special circumstances. Sons of concubines could be disinherited without being admitted to a share or brought in to share equally. In default of children a slave could inherit (Gen.15.2-4). Perhaps where there were no sons, a slave married to a daughter often became heir (cf. 1Chr.2.34f.). (b) Deut.21.15-17 enacts that if the eldest son did not take the birth-right, it passed over in favour of a younger son by a favourite wife, but shall receive a double portion. (Contrast Gen.48.22, where, however, there was good reason; cf. Gen.35.22, 49.31; cf. 1Chr.5.1.) (c) Ahithophel made a testamentary disposition (2Sam.17.25). Hefted and uncircumcised, was washed and swaddled (2Mac.7.27). The weaning was an occasion for rejoicing (Gen.21.8). If the mother were servile, the child belonged to her owner (Ex.21.4, 23.12, etc.). The child of free parents followed the father's nationality (Lev.24.10-23). The mother appears generally to have taught the children of both sexes at first (Pr.6.20 f., 31.1), but "nursing fathers" or tutors are mentioned (Num.11.12; 2K.10.1-5; cf. Is.49.23). Moses commanded religious instruction (Deut.6.7, etc.). [EDUCATION.] Num.12.14 gives a vivid picture of the treatment of troublesome daughters. Later, daughters were secluded (2Mac.3.19). (Cf. Hastings, D.B. 5 vols. 1904, s.v. "Birth.") V. Daughters-in-law passed into their husband's family and were under the jurisdiction of his father (Gen.38; Ex.21.9). The relation of daughter-in-law to mother-in-law is coupled by Micah with that of son to father and daughter to mother (7.6). The only other O.T. evidence of the position of the mother-in-law is the case of Naomi, but in Tob.10.12 we read "Honour thy father and thy mother in law, which are now thy parents." VI. Adoption. The only instances of formal Adoption are those of Ephraim and Manasseh by Jacob (Gen.25.1-3).
FAMINE

In N.T. the idea of the family relationships is embodied in the Lord’s Prayer, the parent to govern, sustain, and protect the child from disaster. The same is true of God as parent to the universe. Love being the motive power. Our Lord frequently refers to the family in illustration of His teaching (e.g. Lu.11.11-13, 15.1ff.). He Himself was subject to His parents (2.51; cf. Jn.2.12), but He showed by example (Lu.2.49; Mt.12.16; Mk.3.19), and taught (Mt.19.28). It was the province of the larger family, the Kingdom, must be given precedence over the smaller one. He condemned the custom of pronouncing a thing Corban as a means of evading a duty to parents (7.10-13). St. Paul admonishes the members of the Christian family, wives and husbands, to lead there, to discharge faithfully their relative duties (Ep.h.5.22-6.9; Col.3.18-4.1). The family of a bishop or deacon was to be an example of discipline and conduct (1Tim.3.2-12; Tit.1.6). [MARRIAGE; DIVORCE; ADULTERY.] [H.H.]

Famine. Though Palestine is frequently described as a very fertile land, yet famine too was a permanent feature. The soil was generally very thin throughout Syria and Arabia generally. Egypt, also—to which resort was often had when Palestine was afflicted, and which was even more famous for its fertility—did not escape, when the waters of the Nile (almost its only source of supply) were defective or insufficiently conveyed to the soil. Palestine is chiefly dependent for escape from scarcity upon the heavy winter rains; but the Jordan and other smaller streams were utilized so far as they went. Occasional causes of famine in Bible lands were violent hailstorms (e.g. Ex.9.23ff.; Hag.2.17), the inroads of locusts and other pests (e.g. Ex.10.15; Jl.1.4; Am.4.6), and the devastations of enemies (e.g. Judg.6.4ff.; 2K.6.25ff.). Some of the principal references to famine in the Bible are (1) in the times of Abraham and Isaac (Gen.12.10.26.1ff.); (2) before the great famine that spread through Syria and Egypt in the days of Jacob (Gen.41.53ff.)—few, if any, would in such cases as Elisha (1K.17.18, 15; 2K.8.1ff.), referred to by our Lord in Lu.4.25ff.; (4) our Lord predicts “famines in divers places” in His eschatological discourses, as one of the signs of the coming end (Mt.24.7; Mk.13.8; Lu.21.11); and these are thought to have been at least in part fulfilled in the horrors of the siege of Jerusalem described by Josephus (5, 6 B.J., etc.) (5) the prophet Agabus (Ac.11.28) likewise predicted “great famine over all the world, which came to pass in the days of Claudius” (emperor, 41-54 A.D.). [C.L.F.]

Fan (Heb. mitzre, Is.30.24; Je.15.7; Gk. πτερων, Mt.3.12), a winnowing instrument, distinguished in the first instance as a fan of reeds, or wooden shovelful used to toss the grain, which is thus winnowed by the wind. The Heb. mitzre means something to “scatter” the grain, and the Gk. word something to “agitare.” The grain was tossed, in baskets, like the vannus or winnowing basket, which was an important Diocletian’s edict. The word food, seems to have been so tossed and winnowed (Ps.109.23), as they still are by the natives of Bechuanaland. [C.R.C.]

Fasting and Fasting. Fasting. Religious fasting (entire or partial abstinence from food) and drink, a natural expression of self-humiliation, is of immemorial antiquity (e.g. in Babylonia, Smith, D.B., s.v. Fasting, p. 1051; cf. 1Jon.3.5), and frequently associated with prayer and other religious exercises. (1) Periodic Fasts. One annual fast [ATONEMENT, DAY OF] is prescribed by the Levitical law (Lev.23.27, etc.; Ac.27.9); the exiled Jews added four others, in the 4th, 5th, and 7th months (Zech.7.1-7, 8.19), commemorating [Atonement, The new calendar the Vulg. in Lu.12.6 makes it probable that a single coin is intended by a assaria. [MONEY.]

formal asceticism (Ro.14.2,25f.; Col.2.16,21ff., etc.), recognizes the principle implicitly in rCor.7.5, and explicitly, by example, in Ac.14.23, cf. 2Cor.6.5,11,27). Passages where the words are now judeo are, according to the original text (Mt.17.21; and Josephus seems to point to his having previously held some subordinate position in Samaria, which would account for the "many years" leadership and more exact knowledge attributed to him (Ac.24.10,22). He obtained his procuratorship on the recommendation of the high-priest Jonathan, who afterwards caused to be murdered. His administration is described by Tacitus (Hist. v. 9; Ann. xii. 54) in the blackest colours. The narrative of Acts, though far less condemnatory, is not inconsistent with Tacitus, for the compliments of Tertullus (Ac.24.22) are empty words. He was recalled, and accused before Nero by a Jewish embassy, but escaped punishment by the influence of Pallas. On his administration as a turning-point in the history of Judea, see Schürer, Hist. Jew. People, div. i. vol. ii. p. 174. [E.R.B.]

Fenced cities. [Cities.]

Ferret (Heb. 'ânâqâ), the A.V. translation of one of the small crepuscular animals mentioned in Lev.11.30. The old Gk. rendering of 'ânâqâ is "shrew-mouse," while the Rabbinical writers translate it as "hedgehog." There is, however, little doubt that the Heb. term (which literally signifies "that which sighs or groans") indicates some kind of reptile; and Tristram considers that it probably refers to the lizard known as the fan-footed gecko (Ptyodactylus lobatus), a species commonly seen on the walls and ceilings of houses in Syria and Egypt. Like its relatives, it utters a peculiar clicking cry. [r.l.]

Festivals. The religious days for rest, joy, and observance fixed in the Bible fall under three heads: (1) by the division of time; (2) in commemoration of historical events; (3) in remembrance of man's duty toward his Maker. The first class includes: (a) the sabbath as a day of rest in every week (Ex.20.10; Deut.5.12ff.); (b) the first day of every month (Lev.14; 2K.8.23; Ez.3.5; Ho.2.11); (c) the Feast of Trumpets, or New Year's Day, which falls on Tishri 1. The second class includes the three pilgrimage festivals, namely:

(a) the Passover, on Nisan 15-22, to commemorate the release from Egyptian bondage. (b) The Feast of Weeks, or Pentecost, counting 7 weeks (49 days) from the second day of Passover, and celebrating the harvest, which falls on Sivan 6. This day was observed as "the Feast of Harvest, the first fruits of thy labour" (Ex.23.16). According to rabbinical tradition, Pentecost was celebrated also in commemoration of the giving of the law on Sinai, which occurred on the same day and is still observed as such in modern Israel. (c) The Feast of Tabernacles, or "Booths," on Tishri 15-22. The eighth day of Tabernacles was a separate holiday, a day of holy convolution. These festivals required pilgrimage to Jerusalem and special sacrifices during the temple period. Later they were observed by special prayers in the synagogue and all manual work prohibited, except the lighting of fire and cooking of meals (12.16). The intervening days of Passover and Tabernacles are observed as semi-holidays. The third class includes the Day of Atonement, which falls on Tishri 10, and which, though a day of fasting, is considered also a day of rejoicing (Josephus). The last two days of this festival are called the sabbath day. The Festival of the Basket is applied by Philo to the individual offering of the firstfruits before the Lord at the sanctuary, as described in Deut.26.2 (Philo, v. p. 51, ed. Tauch.). No special day is given for such offering, but the time was to be between Pentecost and Tabernacles. On the 40th day after Passover the Feast of Purim (Esth.9.20ff.) and the Feast of Dedication, or Hanmaka (1Mac.4.5ff.), were instituted as memorial days of historical events, but they were not considered equivalent to the former festivals, as they do not include the suspension of labour. Josephus mentions also the Wood Festival in connexion with the wood contributed to the temple, and celebrated on Ab 15 (2 Wars xvii. 6; cf. Ne.10.35, 13.3; Mishna, Taanith iv. 5). Other festivals instituted to commemorate a religious victory or an escape from danger are recorded in Megillath (Scroll), Taanith, in rotation of the days of the months, most of which had on origin that soon became obsolete. The observance of the festivals was a most important factor in the economic life and culture of the Jews. It helped to maintain their national unity and religious ties. See special articles on Atonement, Day of; Dedication, Feast of; Jubilee, Year of; New Moon; Passover; Pentecost; Purim; Sabbath; Sabbatical Year; Tabernacles, Feast of; Trumpets, Feast of. [J.D.E.]

Festus, Por'clus, succeeded Felix as procurator of Judea. Shortly after reaching his province he heard, in the presence of Herod Agrippa II, and Bernice his sister, the cause of St. Paul, who had been left a prisoner by Felix (Ac.24.27-26.32). Judea was in a disturbed state throughout the rule of Festus, as it had been in the days of his predecessor. He died in 62 A.D., within two years of his arrival.

Fetters. Three words are used in Heb.: 'nîshôbeth, which occurs almost exclusively in the dual, showing that they were made in pairs. The word implies that the fetters were made of bronze or copper (Judg.16.21; 2Sam.

FIRMAMENT

3.34; iiK.25.7, etc.). It is used figuratively for "oppression" in Lam.3.7, the only occurrence in the sing. ziqqūm is used only in plur. (Is.45.14; Ps.149.8; Na.3.10—always in connexion with captives). It is used in a figurative sense, as the context shows, in Job 36.8. kehēl is used as a parallel with ziqqūm, and occurs only in Ps.149.8 (in plur.). In N.T. πῦδος is used, only in the plur., in reference to the chains where-with the demoniacs (Mt.5.4; Lu.8.29) was bound.

[WoE.o.]

Fever. The word only occurs once in A.V. of O.T.—viz. Deut.28.22—and three times in N.T. (the cases of Sir.32.5—v.l.'s per. for Mt.8.14, etc.), the nobleman's son (Jn.4.52), and the father of Publius (Ac.28.8). But fevers of one sort and another are so common in the East that it is impossible to identify exactly from what diseases these people were suffering, except in the last case given, where the case and cause are clear.

Field. The Heb. sāḏhē is applied to any cultivated or productive ground, and in some instances in marked opposition to the neighbouring wilderness. On the other hand, the sāḏhē is frequently contrasted with what is enclosed, whether a vineyard, a garden, or a walled town. It applies to the pastoral region (Gen.4.5; 24.63; 25.27; Deut.22.25). The "landmark" in a field was probably—as in Babylonia—a stone inscribed with an account of the boundaries, and a statement of the grant by which the field was held (Deut.19.14; 27.17; cf. Job 24.2; Pr.22.28; 23.10). Cornfields in Palestine are still unfenced, rendering them liable to damage from straying cattle. It is interesting to find (Ps.129.4—v.l.'s per. for 2Sam.14.30). It should be observed that the expressions "fruitful field" (Is.10.18; 29.17; 32.15,16) and "plentiful field" (Is.16.10; Je.48.33), are not connected with sāḏhē, but with kārēm, meaning a park or wood, as distinct from a wilderness. Another word, sīrāḵēdith, is translated "wilderness" (2K.19.13; Is.23.4; Is.16.3; Je.31.40; Hab.3.17). It appears to refer to "enclosures" walled like vineyards (see Num.22.24).

Fig., Fig-tree (Heb. tē'ēm), occurs many times in O.T., and signifies the Ficus carica of Linnaeus, and also its fruit. The fig-tree is very common in Palestine (Deut.8.8). Mount Olivet was famous for its fig-trees in ancient times, and they are still found there. "To sit under one's own vine and one's own fig-tree" became a proverb among the Jews to denote peace and prosperity (1K.4.25; Mi.4.4; Zech.3.10). For figs as distinct from the tree, the plur. tē'ēm is used (see Je.8.13). We find also (a) bikkurād (Ho.9.10), the first-ripe fruit of the fig-tree; (b) pāgh (Can.2.13), the unripe fig, which hangs through the winter; (c) dēḇēḏ (a cake of figs pressed together to keep them) (2K.20.7). In tSam.30.12 cakes of figs are given to a captive Egyptian as a restorative; and in 2K.20.7, etc., figs are laid on Hezekiah's boil, and he recovers. Both these uses receive some consistent corroboration from Pliny, who says (xxiii.7): "Figs be restorative, and the best thing they then can eat who are brought low by some long and languishing sickness, and now upon the mending hand and in recoverie. In like manner they are singular for the falling evil and the dropsie. Figgs applied as a cataplasm are excellent, either to discourse or el5 bring to maturite any impostumes or swellings." [Sycamore.] In the passage "the time of figs was not yet" (Mk.11.13, etc.), the barren fig-tree is used emblematically of the Jewish nation. The efforts to deal with this literally have led to many dissertations, which are well summarized and referred by Harris (Nat. Hist. of the Bible).

[H.C.H.]

Finger-breath. [Weights and Measures.]

Fir (Heb. b'rōšh, b'rōth). Despite the opinion of Celsius that b'rōšh exclusively means "cedar," it is more likely than one sort of wood. Pinus halepensis is the only true pine native in Palestine proper; P. pinaster (maritima) is probably introduced. P. pinea and P. pyrenaica are found high up on the Lebanon, and P. carica on E. of Jordan (Trism). To this may be added other pines, cedar and cypress, or perhaps suggested by "fir." In Ezk.27.5 the "fir-trees of Senir" (Lebanon) are expressly referred to amongst Tyrian merchandise, for shipbuilding.

[H.C.H.]

Fire. In addition to domestic uses: (1) leprous garments burned (Lev.13.52,57), and idols (Deut.7.25). (2) Supernatural fire: accompanied of theophanies (Gen.15.17; Ex.3.2,19.18; Deut.4.36) destructive fire from God (Num.11.1-3). (3) Altar-fire: divine origin (Lev.9.24); perpetual on the altar of burnt-offerings (16.13); E'sed.6.24); rekindled (2Ch.7.1-3); tradition about the hidden fire (2Mac.1.19-22,31-33); strange fire, t.e. from a strange god (Lev.10.1). It is possible the incense offered presumptuously (Lev.10.1), child-sacrifice by fire forbidden (Lev.18.21; Deut.18.10), but practised (2K.16.3,17.17). (4) Death by fire as penalty (Lev.20.14;21.9); cremation (Jos.7.25). Sabbath law: no fire to be kindled (Ex.35.3).

[H.n.]

Fire-pan (Heb. nēfēm). The word the article rendered in A.V. is used in reference to three different articles. In Ex.25.38,37.23, Num.4.9, it means "a snuff-holder." It was of gold, and belonged to the tabernacle furniture. It was used for putting out the lights on the golden candlesticks. A more appropriate word for it would be "extinguisher." The root means "to snatch up," as it seemed to do with the flame. Secondly, it was a "fire-pan" in the proper sense, and belonged to the altar of burnt-offerings, being used for the purpose of carrying glowing cinders, and putting them in the censers for burning incense. In Ex.27.3, 35, it is spoken of as "as the fire of the brazier" in 1K.9.50, 2K.25.15 (cf. Je.52.19), as of gold. Lastly, it means "a censer," of bronze, according to Lev.10.1,16.12; Num.16.6,17,18,17.2-4. [W.O.E.o.]

Firkin. [Weights and Measures.]

Firmament. The Heb. term rāqâ', so translated, is generally regarded as expressive of simple expansion, and is so rendered in A.V. marg. (Gen.1.6). The root means to expand by beating, whether by the hand, the foot, or any instrument. It is especially used of beating out metals into thin plates (Ex.39.3; Num.16.39). The sense of solidity, therefore, is combined with the ideas of expansion and tenacity in the term. The same idea of solidiity runs through
all the references to the ṭāqīa'. In Ex.24.10 it is represented as a solid floor, and in Ezek.1.22-26 the "firmament" is the floor on which the throne of the Most High is placed. Further, the office of the ṭāqīa' in the economy of the world demanded strength and substance. It was to serve as a division between the waters above and the waters below (Gen.1.7). In keeping with this view the ṭāqīa' was provided with "windows" (Gen.7.11; Is.24.18; Mal.3.10) and "doors" (Ps.78.23), through which the rain and the snow might descend. A secondary purpose which the ṭāqīa' served was to support the heavenlybodies, sun, moon, and stars (Gen.1.14), in which they were fixed, and from which, consequently, they might be said to drop off (Is.14.12; 34.4; Mt.24.29). In all these particulars we recognize the same view as was entertained by the Greeks and, to a certain extent, by the Latins. If it be objected to the Mosan account that the view embodied in the word ṭāqīa' does not harmonize with strict scientific truth, the answer is that the writer describes things in popular language.

Firstborn. (1) In commemoration of the deliverance from Egypt, all firstborn human males not purchased were reckoned to be redeemed at the sum of 5 shekels for every child that lived one month (Ex.13.2,11ff.; 22.29[28],34.20; Num.18.15f.). In lieu of the living firstborn God took the Levites for His service, 5 shekels being paid for the redemption of each firstborn male in excess of the services of the Levites (Ex.38.11f.; 18.16f.). (2) The sacrifice of firstborn appears to have been common in heathen cults (1K.16.34; 2K.3.27, etc.). For Israel, see FAMILY. D 1 (2). (3) On Deut.25.6, see LEVITATE LAW. (4) Laban said that in his home it was usual to marry a firstborn daughter before her younger sister (Gen.29.26). [BIRTHRIGHT; FAMILY.] [ILM.W.]

In N.T. (1) Christ is the πρωτότοκος (Mt.1.25 [omitted in R.V., N. B]; Lu.2.7; see also rev. 22,23). [BIRTHRIGHT.] Exodus Rabbah, xix. near the end, God is represented as saying that as He had made Jacob to be firstborn, so would He make the King Messiah the firstborn, with whom the firstfruits of all creation (Col.1.15f.) of the dead (ver. 18; Rev.1.5); of many brethren (Rom.8.29). (2) The church of the Firstborn (Heb.12.23), perhaps with reference to the saints of O. and N.T., the patriarchs, prophets, apostles, and martyrs. [n.n.r.]

First-fruits. Two Heb. words, rēshith (R.V. first-fruits) and bīgārīm (R.V. first-fruits, first-ripe fruits), must be distinguished. (1) rēshith denotes "first," connotes "best" (Num.18.12; Is.15.21). Ex.22.29[28] enacts that "thy fulness and thy fear thou shalt not delay." (R.V. "thou shalt not delay to offer of the abundance of thy fruits, v. of thy liquors"). This is very wide, and we meet with rēshith of oil, wine, corn, wool, fruits of ground (Num.18.12; Deut.18.1; 26.2-10), honey, and leaven (not meal-offerings) (Lev.2.11,12; cf. 2 Chr.31.5)—all individual offerings. Each peasant presented a basket "at all the firstfruits" and offered a prayer (Deut.26.1-10). An offering (apparently national) of rēshith of dough (7 meal) is also commanded (Num.15.17-21). A sheaf (7 omer) of rēshith of corn was waved on the morrow after the sabbath, probably Nisan 16 (national offering). Bread, parched corn, and fresh ears might not be eaten till then (Lev.23.10-14). rēshith fell to the priest (Num.18.12; Deut.18.2). It is probable that the word bīgārīm is apparently limited to things sown, especially wheat (Ex.23.16,19,34.22,26; Lev.2.14,23,20). Individual offerings, consisting of meal-offerings of bīgārīm in the ear parched with fire and bruised, were brought to God's house on the Feast of Weeks (Ex.23.16,19,34.22,26; Lev.2.14,16),7 weeks after the national offering of rēshith of corn. They fell to the priest, except a "memorial," which was burnt (Lev.2; Num.18.13). Two loaves of bīgārīm were also waved then (Lev.23.16-20) as a national offering. In non-legal passages the word is used of grapes, figs, etc. (3) Nehemiah arranged that both bīgārīm and rēshith should be brought, and bīgārīm is plainly applied to the fruit of every tree as well as to the fruit of the ground (Ne.10.33[36],37[38]). The offering of rēshith of dough (7 meal) was interpreted by him as individual (Ne.10.37 [38]). Bibliotheca Sacra, Jan. 1908, pp. 122, 123; E. Driver, Garden Bough (2nd ed.), ii. 323 ff., 450 ff.; other views in Gray, Numbers, 225 ff. [n.m.w.]

In N.T. the term is applied to persons, the first in order of time to accept the Gospel, who were thus the earliest of a harvest to follow, e.g. those of Israel, probably believed to be the first "fruits" of the new covenant, and who were a kind of "firstfruit" of the entire nation (Ro.11.16ff., perhaps alluding to Num.15.20,21). Epaenetus (Ro.16.5), the house of Stephanus (1 Cor.16.15), the brethren (Jas.1.18), the 144,000 redeemed (Rev.14.4). It also applied to Christ (1 Cor.15.20,23), as the "firstfruits" of the Resurrection, and the Holy Spirit (Ro.8.23), to possess Whom is an earnest of the future inheritance. [n.h.]

Firstlings. In commemoration of the deliverance from Egypt through the slaying of the firstborn, all firstlings were holy— i.e. were to be withdrawn from ordinary use for sacred purposes, usually Sacrifice (Num.3.13). Unblemished first-bearing of all creation is the Firstling of all creation (Ex.29.29) from the temple on the Passover and sacrificed. The flesh was eaten by the Israelite and his dependants, after giving the priest a trāmā (Heave-offering, contribution), consisting probably of one or more of the animals (Ex.13.2,11-16,34.19; Deut.14.23,15.19-22; Num.5.5,10,18.15-18). The sacrifice could only be performed after the seventh day from birth (Ex.22.30[29], where translate "thou mayest give" for R.V., "thou shalt"). Blemished clean animals were to be eaten locally without sacrifice (Deut.15.21-23). The Israelite was to redeem the firstling of an ass with a kid or lamb, or a young heifer in its stead (Ex.13.13,34.20). For rules as to the redemption of other unclean animals, see Lev.27.27; Num.18.15,16 (with Gray ad loc.). Nehemiah apparently arranged that all firstlings of clean animals should be brought to the priests (Num.10.36[37]). (Frisbaudius) Press its neck (Ex.13.13,34.20). For rules as to the redemption of other unclean animals, see Lev.27.27; Num.18.15,16 (with Gray ad loc.). Nehemiah apparently arranged that all firstlings of clean animals should be brought to the priests (Num.10.36[37]). (Frisbaudius) Press its neck (Ex.13.13,34.20). For rules as to the redemption of other unclean animals, see Lev.27.27; Num.18.15,16 (with Gray ad loc.). Nehemiah apparently arranged that all firstlings of clean animals should be brought to the priests (Num.10.36[37]). (Frisbaudius) Press its neck (Ex.13.13,34.20). For rules as to the redemption of other unclean animals, see Lev.27.27; Num.18.15,16 (with Gray ad loc.).
Fish, Fishing. The ancient Hebrews recognized fishes as forming one of the great divisions of the animal kingdom, and, as such, gave them a place in the account of the creation (Gen.1.21,25), as well as in other passages where a description of living creatures is intended (Gen.9.2; Ex.20.4; Deut.4.18; rK.4.33); and, what is very noteworthy, distinguished them from whales. The Mosaic law (Lev.11.9,10) pronounced unclean such fish as are devoid of fins of the ordinary type and visible scales: these are still regarded as unwholesome in Egypt. Of the various kinds found in the sea of Galilee, the cat-fishes (Siluridae), typified by the great Silurus glanis of the rivers of Europe, were classed among the unclean; as were also skates, sharks, lampreys, and, subsequently, eels. The Hebrews were well aware of the fecundity of fishes. The abundance of fishes in the Nile and the lakes and canals rendered them one of the staple commodities of food (Num.11.5); and the destruction of fish was thus a serious visitation to the Egyptians (Ex.7.21; Is.19.8). In Palestine the sea of Galilee abounds with fish, and the value attached to the fishery by the Jews is shown by the traditional belief that one of the 90 laws of Joshua enacted that it should be open to all comers. Jerusalem derived its supply chiefly from the Mediterranean (cf. Ezek.47.10). The existence of a regular fish-market is implied in the notice of the Fish Gate, which was probably contiguous (2Chr.35.14; Ne.3.3.12.35; Zeph.1.15). Numerous references to fishes occur in the Bible. The usual method of catching fish was by the use of the net, either the casting net (Ezk.26.514,47.10; Hab.1.15), probably resembling the one used in Egypt, an illustration of which is shown in Wilkinson (iii.55), or the draw or drag net (Is.19.8; Hab.1.15), which was larger and required the use of a boat. The latter type of net was probably most used on the sea of Galilee, where a large number of boats were kept. Angling was a favourite pursuit in Egypt. Another method was with the trident or spear, as practised in Egypt in taking the crocodile (Job 41.2). Any general account of the fishes of Palestine and the Nile is impossible within the limitations of our space. Nothing definite can be affirmed with regard to Tobit's fish, although Tristram suggests that it may have been one of the cat-fishes (Siluridae), which are common in the Tigris. A fish is used as the Christian symbol from the circumstance that the letters forming the Gr. name ἵδος make the initials of Ἰησοῦς Χριστός, Θεοῦ νόμος, σωτήρ (Jesus Christ, Son of God, Saviour). [k.L.]

Fitches (i.e. vetches) represents in A.V. two Heb. words, κυσσεμεθαν και γεθα (Gen.9.28; 19.). As to the former, see R.T. γεθα denotes, without doubt, Νιγέλα σατίβα, an herbaceous annual plant belonging to the Ranunculaceae, which grows in the S. of Europe and in the N. of Africa. Fitch is given ψεθή and ψηθίς in Wyclif (Is.28.24-27). The plant here intended is known as fennel-flower, and the seeds are in use for flavouring cakes, curries, Bread, etc. It is native in these countries, but also cultivated. The dry capsule has to be broken to free the seeds. Pliny says (xix.8): "Now as for Gith or Nigella Romana, as it is an herbace that growtheth in the pastures and is fit to be used in the marshies, Anise and Dill are as appropriate to the kitchin for Cookes." He ascribes (xx.17) many curative virtues to the seed of Nigella. [i.n.c.h.]

Flag represents in A.V. two Heb. words. (1) ἀκή, a word, according to Jerome, of Egyptian origin, denoting any green and coarse herbage, such as "fitches and reeds, which groweth in marshy places." The word occurs in Job 8.11, and again in Gen.41.2,18, where it is said that the seven well-favoured kine came up out of the river and fed on ἀκῆ. Royle and Kitto are inclined to think that the ἀκῆ denotes the Cyperus esculentus. (2) σάρη occurs frequently in Gen. and elsewhere. It is commonly used in the Bible to denote the "Red Sea" (properly "the sea of reeds" or "sea-weeds"). "Aquatic weeds," or "sea-weeds," represent (1) and (2), but the attempt to limit the significations is unsatisfactory.

Flagon, thus two distinct Heb. terms are rendered in A.V. (1) ἴσθιθα (2Sam.6.19; 1Chr.16.3; Can.2.5; Ho.3.11). The real meaning of this word is a cake of pressed raisins. (2) nebel (Is.22.24; Lam.4.2) is commonly used for a bottle or vessel; originally probably a skin, but later a piece of pottery (Is.30.14).

Flax (Heb. ṣīshṭā or ṣīśṭē; Egypt. ṣīpēšō). Apart from references to the finished article, either the thread, the piece, or the garment, we find two possible references to the plant: Ex.9.31, certain, and Jos.2.6, disputed. In the former the flax of the Egyptians is recorded to have been damaged by the plague of hail. It seems probable that the cultivation of flax in the region was not confined to Egypt; but was in early times very widespread in Asia. That it was grown in Palestine even before the conquest of that country by the Israelites appears from Jos.2.6. The various processes employed in preparing the flax for manufacture into cloth are indicated: (1) The drying process, after the steeping has taken place (Is.42.3;43.17). (2) The peeling of the stalks, and separation of the fibres (Jos.3.6). (3) The hacking (Is.19.9). In Is.19.5-10 there may be an intended contrast between the drying up of rivers and
Flea, an insect twice only mentioned in Scripture (1Sam.24.14, 26.20). Fleas are abundant in the E., and provide the subject of many proverbial expressions to denote desiccation in this region. Dr. Tristram states that flea had again been cultivated in the Jordan Valley in the last century for the Sultan.

**Flea**

Flint. The Heb. *hāllāmāsh* is rendered *flint* in Deut.8.15, 32.13, Ps.114.8, and Is.50.7. In Job 28.9 *rock* in the text, and *flint* in marg. In Ezek.3.9 "flint" occurs in the same sense, but there represents the Heb. *rōr*; cf. Ex.4.25, only in Ezek.10.1 as *flint*, who was probably *a sharp stone*. Flint, or chert, which is almost the same thing, is common in the limestones of Palestine. The Heb. *hāllāmāsh* has been compared with the Elmus (rarely Elmusu) of the monuments and with the "stone of fire" of the Bab. sign-lists.

**Flint**

Flour. [Bread.]

Flowers. [Palestine.]

Flowers (Lev.15.24.33). [BLOOD, ISSUE OF.]

Flute, one of the musical instruments used at the worship of Nebuchadnezzar's golden image (Dan.3.5ff.). Cf. also 1K.1.40 marg. (Is.5.9).

**Flute**

**Flux, Bloody** (Ac.28.8). Probably dysentery, which is extremely common in the East and generally extremely infectious. Wycliff reads "Feueres and Disserente or fix"; R.V. gives "dysentery." [R.J.]

Fly, Flies. Two words are thus translated in A.V., *zebhabh* and *ārōbhi*. The former occurs only in Ex.10.1 as *flint*, and [A.V. sharp stone]. The Heb. word was used in a general sense. The 2nd term, *ārōbhi* ("swarms of flies," "divers sorts of flies," A.V.), is employed for the insect or insects sent to punish Pharaoh (Ex.8.21-31; Ps.78.45,105.31). As these *ārōbhi* (the Hebrew verbs) of the Egyptians, it seems probable that the common house-fly, which is a terrible pest in Egypt, is specially intended, the identification with the cockroach being gratuitous. [Cf. Flagues.] That the *zebhabh* were also most pernicious is testified by the cult of the Phoenician Baalzebub (Baalzebul) and his birds of prey, which were specially invoked for protection against these insects. [R.L.]

**Food**

The diet of Eastern nations has been in all ages light and simple. The chief point of contrast with Western habits are the small amount of animal food consumed, the variety of articles eaten with bread, and the substitution of milk in various forms for our liquors. The chief point of agreement is the large consumption of bread, the importance of which in the eyes of the Heb. is testified by the use of the term *leḥem* (originally food of any kind) specifically for bread, as well as by the expression "staff of bread" (Lev.26.16; Ps.105.16; Ezek.4.16,14-15). Simpler preparations of corn were, however, common; sometimes the fresh green ears were eaten in a natural state, the husks being rubbed off by the hand (Lev.23.14; Deut.23.25; 2K.4.12; Mt.12.1; Lu.6.1); more frequently, however, the grains, after being carefully picked, were roasted in a pan over a fire (Lev.2.14), and eaten after being eaten a desiccation in this region. Dr. Tristram states that flea had again been cultivated in the Jordan Valley in the last century for the Sultan. Sometimes the grain was bruised (A.V. beaten, Lev.2.14, 16), and then dried in the sun, in which form they were an ordinary article of diet, particularly among labourers, or others who had not the means of dressing food (Lev.23.14; Ru.2.14; 1Sam.17.17,25.15; 2Sam.17.28): this practice is still very usual in the East. Sometimes the grain was boiled (A.V. *dough*; Num.15.20; Ne.10.37; Ezk.44.30). Salt was often used with bread (Job 6.6). Sometimes the bread was dipped into the sour wine (A.V. *vinegar*) which the labourers drank (Ru.2.14) or, where meat was eaten, into the gravy, which was either served up separately for the purpose, as by Gideon (Judg.6.19), or placed in the middle of the meat-dish, as is done by the Arabs. Milk and its preparations hold a conspicuous place in Eastern diet. Fruit was another source of subsistence: figs stand first in point of importance; there were generally dried and pressed into cakes. Grapes were also eaten in a dried state as raisins. Of vegetables we have most frequent notice of lentils (Gen.25.34; 2Sam.17.28,23.11; Ezk.4.9), which are still largely used by the Bedoin; beans (2Sam.17.25; Ezk.4.9), leeks, onions, and garlic, which were in Egypt of a superior quality (Num.11.5). Of vegetables, radishes and leeks are most in use, and are eaten raw with bread. [Agriculture.] The spices or condiments known to the Hebrews were numerous. Another important article of food is honey, whether the natural product of the bee (1Sam.14.25; Mt.3.4), which is found in Syria, or the other natural and artificial productions included under that head, especially the *dibs* of the Syrians and Arabians, i.e. grape-juice boiled down, which is still extensively used in the East. Oil was also much used. Eggs are not often noticed, they were evidently not a common article of food (Job 6.6; Is.10.14,59.5; Lu.11.12). The Orientals have been at all times sparing in the use of animal food: not only does the excessive heat of the climate render it both unwholesome to eat much meat, and expensive from the necessity of immediately consuming a whole animal, but beyond this the ritual regulations of the Mosaic law in ancient, as of the Koran in modern times, have tended to the same result. All beasts and birds classed as unclean (Lev.11.1ff.; Deut.14.4ff.) were prohibited. With these exceptions, the Hebrews were permitted the free use of animal food; but, generally speaking, only availed themselves of it in the exercise of hospitality (Gen.18.7), or at festivals of a religious (Ex.12.8), public (1K.1.3; 1Chr.12.40), or private character (Gen.27.4; Lu.15.23): only in royal households was there a daily consumption of meat (1K.4.3; Ne.5.18). The animal killed was generally the sheep (Gen.18.7; 1Sam.28.24; Am.6.4); lambs (2Sam.12.4; Am.6.4); oxen, not above three years of age (1K.1.9; Pr.15.17; Is.22.13; Mt.22.4); kids (Gen.27.0; Judg.6.19; 1Sam.16.20); gazelles,
roe, and fallow-deer (rK.4.23); birds of various kinds; fish, except those without scales and fins (Lev.11.9; Deut.14.9). Locusts, of which certain species only were esteemed clean (Lev.11.22), were occasionally eaten (Mt.3.4), but considered poor fare. Meat does not appear to have been eaten by itself; various accompaniments are noticed in Scripture, as bread, milk, and sour milk (Gen.18.8); bread and broth (Judg.6.19); with fish, either bread (Mt.14.19, 15.36; Jn.21.9) or a honeycomb (Lk.24.42). Of beverages, milk, barley-water, and a mixture, resembling the modern sherbet, formed of fig-cake and water [Husk], were occasionally embraced. There were many kinds of barley-water, or milk, except that this last was generally drunk. The Hebrews were also acquainted with various intoxicating liquors. [Drink, Strong.]

**Footman.** A word employed in A.V. in two senses. (1) Heb. ragh'-li, to distinguish the people or the fighting-men who went on foot from those who went in chariots. Hence the latter Heb. rāchim (footmen in 1Sam.22.17 only), used of a body of swift runners [Posts] in attendance on the king, such as had been foretold by Samuel (1Sam.8.11). This body appears to have been afterwards kept up, and to have been distinct from the body-guard—the six hundred and thirty of the latter [Heb. sašār] translated by David. See 1K.14.27, 28; 2Chr.12.10, 17; 2K.11.4, 6, 11, 13, 19; A.V. guard; in two instances runners in the margin (1K.14.27; 2K.11.13). [Cherethites; Guard.]

**Forehead.** An especial force is given to the term "hard of forehead" as descriptive of such as in general (Ex.3.7, 9), by the custom among many Oriental nations both to colour the face and forehead, and to impress on the body marks indicative of devotion to some special deity or religious sect. The "jewels for the forehead," mentioned by Ezekiel (16.12), and in margin of A.V. (Gen.34.22), refer to strips of little metal discs.

**Foreigner.** The word usually rendered "stranger" in the Bible is the Heb. gēr, denoting the alien who accepts the hospitality of a Hebrew family. An equivalent in the LXX. is πορισθητος, though the gēr was not a proselyte in the usually accepted sense of the word, i.e. a Gentile who from conviction embraced Judaism. [Stranger; Proselyte.]

The present article will deal with the Heb. words ben-nêkîher or nokhri and zâr, the real equivalents of our word "foreigner," though usually translated "stranger." The main difference between the stranger (gēr) and the foreigner (nêkîher) is that the former had legal rights, whereas the latter had not. In all ancient nations the attitude towards the foreigner was one of hostility; and the Israelite was always encouraged to regard himself as separated from other nations. Nevertheless, he was necessarily brought into friendly relations with foreigners under the following circumstances: (1) Incorporation. The family of Abraham contained honoured members who were not akin to him (Gen.15.2); the Israelites at the Exodus were accompanied by a "mixed multitude" (Ex.12.38); the race of Hobab were allowed to share in the future benefits of God's people (Num.10.29; Judg.1.16); Rahab became a dweller in Israel (Jos.6.25), and many non-Israelite clans, like the Calebites (15.13) and the Jerahmeelites (1Sam.27.10) [Caleb], entered the commonwealth of Israel. (2) Hospitality was always highly prized as a virtue in the East, and the Israelite felt bound to extend this, not merely to his own people and to the gēr (or foreigner) who joined his family, but also to the traveller who chanced to enter his city (Gen.19.2). Israelites accepted the hospitality of strangers (Ru.1.1; 1Sam.27.1). (3) Matrimonial Alliance with foreigners was discouraged, and even in patriarchal times great importance was laid on purity of blood (Gen.24.3, 28, 34, 35). Nevertheless, marriages between aliens was not unusual, nor does it seem to have been severely reprobated, even if illegal, at any rate till after the Exile (Ezr.10.1, passim; Ne.13.23). [Mixed Marriages.] (4) Warlike Alliances. The Israelites entered into frequent alliances offensive and defensive, and these seem to have been regarded at this period (Ex.11.1) as involuntary, condemned by the rigorists of a later period. Examples of such alliances are Abraham and the Hebronites (Gen.14), David and Nahash of Ammon (2Sam.10.2), and Asa and Benhadad (1K.15.18, 19, but see 2Chr.16.1-6), etc. The foreign policy of Hezekiah, and his alliances with Egypt (2KI.18.21), and, as 2Ch.32.39, were condemned by the prophets of the 7th cent. [Alliances.] (5) Trade and Commerce. The matrimonial alliance with Shechem (Gen.34.21) was recommended as advantageous from a commercial standpoint, and David, Solomon, and Ahab all made alliances with the Phoenicians (1KI.5.1, 15-31). The close friendship between Israel and the Egyptians, and even if illegitimate, was not the distant city of Hamath may have had a commercial basis (2Sam.8.10; 2K.14.28). [Commerce.] (6) Royal Policy. The kings of the house of David seem to have adhered to his policy of employing foreign mercenaries. In addition to the Cherithites and Pelethites, David had Hittites, Shebna, and even Edomites (2Sam.15.19), and even Ethiopians (2Sam.18.21), in his service. Shebna, the minister of Hezekiah, has been supposed to bear a foreign name (Is.22.15, 37, 2). Misfortune. Israelites had to take refuge among foreigners under various distressing circumstances. In days of famine (Gen.12.2, 15), as exiles (1Sam.27), under stress of invasion (Je.40.11, 43). The alienation of Israel from foreigners was encouraged as their religious sense of separation developed: (a) In the Deuteronomic legislation, in which the command to massacre the Canaanites on the entrance into the land is emphasized, though the laws of war inculcated for the Israelites were distinguished for a certain humanity (Deut.20.10-19), the belief that the Israelites ought to have annihilated all the idolatrous inhabitants of their country undoubtedly helped to increase their prejudices against all foreigners. (b) In the Exile and post-Exile period the necessity of preserving their nationality, religion, and language (Ne.13.24) naturally made the Jews more exclusive than ever, though they still kept up friendly relations with aliens (Ne.13.5, 28). Under Gk. influences the priests especially showed a desire to conform to Hellenic customs (2Mac.4.14), and the intense horror of
Hellenism was only engendered after the
persecution by Antiochus Epiphanes. [Hellen-
ist.] The strict Palestinian Jews of our
Lord's time refused to have any social inter-
course with the heathen (Ac. 10), and the de-
bstruction of Jerusalem (70 A.D.) and the war
in the days of Hadrian (117-138 A.D.) completed
the severance between the Jew and the rest
of mankind, which was aggravated by the
mutual antagonism of Jews and Christians
in later times.

[1.4.23.

Forest. The A.V. so renders 3 Heb. words.
(1) יָבוֹר (yybôr), the "tangled" copse (Arab. WAYR),
which covers the W. ridges in Palestine. It is
used for "forest," or "wood," in 52 passages in
O.T., including the woods of HARETH, CAREMEL,
Ephraim, and Lebanon (1K.7.2,10,17,21 ; 2
Chr.27.4,25-26; but in 1 Sam.14,25-26 the right
rendering is clearly "came to a honeycomb"
(see 2 Chr. 27:14,15). The word is often
found in Can.5 and the fourth to a word is
doubtful. It appears to refer to a
shady wood (Ezk.31.3) like the Lebanon cedar
forest; but the הֹרֶשׁ of Ziph (1 Sam.23.15-
19) may be the present ruin Khoreisah near
Ziph, and it is doubtful if forts would have
been built in woods (2 Chr.27.4). The word is
only found in Israel (K.V. wood). (3) פְּרֹדֵס,
a "Paradise" (A.V. Ne.2,3, forest), otherwise
"orchard" (A.V. Ec.2.5; Can.4.13). The word only
occurs in passages in Canaan. The Greeks took
it from the Persians (pairidæza; Arab.
ferdis), who used it for a "park." It has, how-
ever, no Persian etymology, and may be a
borrowed word in Persian also.

Fortifications. [CITIES; ENCAMPMENT; JERUSALEM; WAR.]

Fortunatus, one of three Corinthians at
Ephesus, when St. Paul wrote 1 Cor. (16.17). See

Fountain. The A.V. so renders (in some
passages) four Heb. words, three of which refer
to natural water, and the fourth to a well or
cistern. In the sense of a supply by a
pipe-water it never occurs, since even the
Romans did not understand that water in a
pipe rises almost to the level of its source. (1)
"ayin (Heb. and Arab.), a "spring" (Well),
bendes a fountain in Gen.16.7; Num.33.
9; (2) מַעָּר (ma'ar), a "mountain" (Cedars of
Lebanon) 2 Chr.32.3; Ne.2.14,3.15; Pr.8.25. It
should be noted that Rebekah met Abraham's servant at a "spring" with steps. Springs are some-
times in caves, or have steps, to the water, in the
East. (2) "ma'yân, a group of springs, is rendered "fountain" in Gen.7.11,8,2; Lev.
11.36; Jos.15.9 (Neptune). It is rendered "well" of the same springs in 18.15; i K.18.5 (2 K.3.
19.25, "wells"); 2 Chr.22.4, P's.74.15,114.8
("well" in 84.6, "springs" in 87.7,104.10); Pr.
5.16,8,24,25,26; Can.4.12,15; Is.41.18
(2 Chr.21.3; Ne.14,3.15; Pr.8.25. It should
be noted that Rebekah met Abraham's servant at a "spring" with steps. Springs are some-
times in caves, or have steps to the water, in the
East. (2) "ma'yân, a group of springs, is rendered "fountain" in Gen.7.11,8,2; Lev.
11.36; Jos.15.9 (Neptune). It is rendered "well" of the same springs in 18.15; i K.18.5 (2 K.3.
19.25, "wells"); 2 Chr.22.4, P's.74.15,114.8
("well" in 84.6, "springs" in 87.7,104.10); Pr.
5.16,8,24,25,26; Can.4.12,15; Is.41.18
("wells" in 12.3; Ho.13.15; Jl.3.18. In Can.4.12 it is equivalent to "spring") (3) מָגָר, a "source" (see Lev.20.18), occurs 14
times, and is rendered "fountain," except in
Lev.12.7 "issue"; Pr.10.11 "well," 16.22 "well
spring," 25.26 "spring"; Je.51.36 "springs."
(4) בֹּר, "pit" (Cistern), is rendered "foun-
tain" in Je.6.5 (kethib, bôr). [C.R.G.]

Fowl. Several distinct Heb. and Ar.
words, of which the most common is  ובש, usually a collective term for
birds in general. In 1 K.4.23, among the
daily provisions for Solomon's table, "fatted
fowl" are included. In N.T. the word trans-
lated "fowls" is most frequently the one
which comprehends all kinds of birds (including
ravens, Lk.12.24). [Sparrow.]

Fox. (Heb. shûtâl). In most of the passages
in O.T. where shûtâl occurs there is little
doubt from the context that it indicates the
jagual, although in other instances it may refer
to the fox. The word shûtâl is, in fact, clearly
identical with the Hindustani shail and the
Indian jackal, both of which are found in the
jagual. Despite the fact that there is the Heb.
'iyvim specially denoting jackals, it seems
probable that the ancient Jews, like the
modern Syrians, frequently used one term for
both jackals and foxes, although well aware of
the distinction between the two. The shûtâl
occurs in Ps.15.4, hâpop, a word which is not
generally used; and probably the same holds
true in Can.2.15. On the other hand, the ἄλκην
of N.T. (Mt.8.20) is rightly rendered "fox." In some instances "dragon" (λαέννιον)
apparently also denotes the jagual. [Dagon.]
Jaguals are taller and shorter-tailed animals
than foxes, and dwell, often in holes, among
ruins and deserted buildings, and hunt in packs
at night. The Indian jackal (Canis aureus)
is the species occurring in Palestine and Syria;
but in Egypt it is replaced by the larger and
more wolf-like Egyptian jagual (C. lupaster),
and in Algeria and Morocco by the N. African
jagual (C. anthus). The fox is represented by a
variety of beneficial and noxious species known as the European fox (Vulpes vulpes)
[Fr.]

Frankincense (Heb. bô'hônî, Gk. Λίβανος),
a vegetable resin, brittle, glittering, and of a
bitter taste, used for the purpose of sacrificial
fumigation (Ex.30.34-36). It is obtained by
successive incisions in the bark of a tree called
the arbor thuris, the fronds of which are the
purest and whitest kind; while the produce of
after-incisions is spotted with yellow, and
eventually loses its whiteness altogether. The
Hebrews imported their frankincense from Arabia
(Is.60.6; Je.6.20), more particularly from Saba;
but at present the Arabian Libnanum, or Olibum, is the principal source. The Indian
frankincense imported into Turkey comes through Arabia from the Indian Archipelago.
There can be little doubt that the tree which produces the Indian frankincense is the Bos-
wellia serrata of Roxburgh, or Boswellia thu-
rita of Colebrooke. It is still uncertain what
tree produces the Arabian Libnanum. The
Boswellias are natives of India, Arabia, and the
Somali country. Several of them produce Olib-
um or frankincense, but especially B. thurifera,
a tall tree native in W. India. They belong to
the Myrrh family (Amaryllidaceae). [H.C.N.]

Freedom (Acts 22.20). [CITIZENSHIP.]

Freewill offering. [Sacrifice, 3, ii. c.]

Fringes. [Dress; Hem of Garment.]

Frog. The mention of this batrachian in
O.T. is confined to Ex.8.2-7, etc., in which
the plague of frogs is described, and to P's.78.45,
105. 36. In N.T. the word occurs once only (Rev.
16.13). Only of true frogs inhabiting Egypt is the edible frog (Rana esculenta), widely
distributed in Europe, Asia, and N. Africa. [F.]}
Phylacteries, or Phylacteries, strips of parchment, on which is written (in Heb. square characters) Ex. 13:1-10; ib. 11:16; Deut. 6:4-9; 11:13-21, enclosed in square black leather boxes of varying size, to which long leather thongs are attached. The custom had its origin in a literal interpretation of Ex. 13: 9, 16; Deut. 6:8, 11, 18. The phylactery worn on the forehead has four divisions, with a strip of parchment in each; and on each strip is written one of the above passages. The straps encircle the head, are looped behind, and the ends brought forward over the shoulders. The one for the hand is bound under the upper part of the left arm, so as to be over the heart (Deut. 11:18), the strap carried seven times round the arm and three times round the middle finger. This has only one compartment, and one piece of parchment, on which the above passages are written in four columns. The phylacteries were in use in the 3rd cent. B.C., and are referred to by Josephus, Ant. viii. 13. The Gk. term φυλακτήρια occurs only in Mt. 23:5 in Biblical times. The Heb. tōlāphōth ("bands," originally perhaps a mark in the flesh, a tattoo) is rendered דלתמ (something immovable, enduring) in the LXX., and τ'phillin (prayer fillets) or tōlāphōth in the Targums; τ'phillin is the term used in Jewish literature. Φυλακτήριον = amulet, Plut. de Is. et Osir. 65, 68; Horapoll. 1, 24. The use of this term in N.T. may indicate that the phylacteries were regarded as a protection against evil [AMULETS]; but the fact that the word is not found in Rabbin. literature, and that the Heb. terms do not convey this meaning, is against the inference. The phylacteries, by reminding the wearer of the divine law, serve as a protection against sin (Friedländer, Jewish Religion, p. 337). The Samaritans did not use them, nor do the Karaites, who interpret the Mosaic injunctions in a fig. sense. The phylacteries were originally worn all day, but during the Dispersion at morning prayer only, and not at all on sabbath or festival. They are worn by all males after the 13th birthday. The only ref. in the N.T. is Mt. 23:5, where our Lord denounced the Pharisaic ostentation of making "broad," or large, the phylactery as a sign of superior piety or stricter observance of the law. Maimonides, Yad, Tefillin, i.-iv. (Amsterdam ed. 1702), vol. i. pp. 84-92; Hamburger, Real-ency. Judentums, ii. art. "Tefillin"; G. Klein, Tofdphoth nach Bibel und Tradition, in Jahrb. für Prot. Theol. (1881); M. L. Rodkinson, Hist. of Amulets, Charms, and Talismans (1893); Dembitz, Jewish Services in Synag. and Home, pp. 313-317. [H.H.]

Fuller. [Handicrafts, (10.)]

Fuller's field (2K.18.17; Is.7.3, 36.2), near the wall of Jerusalem on W. (see 2K. 18: 26), and by a high road (ver. 17). [Conduits.]

Funerals. [Burial.]

Furnace. Various kinds of furnaces are noticed in the Bible. (1) tanum is so translated in A.V. in Gen. 15:17; Ne. 3.11, 12:38; Is. 31:9. Generally the word applies to the baker's oven; it was made of clay, judging from those made by the Jews in Palestine. [Bread.] (2) kibshān, a smelting or calcining furnace (Gen. 19:25; Ex. 9.8, 10, 19, 18), especially a lime-kiln (Is. 33:12; Am. 2:1). (3) kūr, a refining furnace (Pr. 17:3, 27:21; Ezk. 22.18ff.). (4) attūn, a large furnace built like a brick-kiln (Dan. 3:22, 25). The Persians used the furnace as a means of inflicting capital punishment (Dan. 6: 2; Je. 29:22; 2Mac.7:5; Ho. 7.7). (5) The potter's furnace (Ecclus. 27: 5, 38:30). (6) The blacksmith's furnace (38:8).

Future life, The. (1) In O.T. From the earliest times we find amongst the people of Israel the belief in an existence after death. But this existence was regarded as so shadowy and wretched, in comparison with earthly life, that they never gave it to the name of "life," which meant to them "happiness." The home of the dead was skhōl, a land of dust (symbol of barren, dreary chaos) and darkness, in the centre of the earth (often called "the pit," or "the dust"). There the r'phā'ān (weak ones, ghosts), as the dead were called, dragged out a weary existence unremembered of God (Ps. 88. 5), and without remembrance of Him (6:5); without any care for their family left behind on earth, or for any of their past interests (Ec. 9:5, 6). This is the fate of all men alike: there is no judgment to discriminate between men after death. It is they seem a straw without direct revelation was made by God to His prophets to put in place of this gloomy doctrine some...
more comforting knowledge. But God had His purpose. The darkness as to the judgment beyond the grave, and the "glory that shall be revealed" for the good, was a very sore trial to Job, but in Job, and a Jeremiah it was the means of creating some of the most glorious fruits of faith that have ever enriched mankind. Once or twice Job (e.g. 14.13-15, 19.25-27: study these in a comm.—Dillitisch, or Davidson, or Gibson) stumbles on the threshold of the truth; in two or three passages (esp. Ps. 16.8-11, 17.15, 49.14, 15, 73.23-26; see Kirkpatrick, Psalms) actually declare (though perhaps without realizing the full meaning of their words) their conviction that the relation between the saint and God will go on for ever. But these are not revelations: they are the fruit of lofty spiritual intuition. Many other truths, however, which were revealed through the prophets, led the Jews at last to perceive that the doctrine of Sheol could not be altogether true. Thus, e.g., Am.9.2 (cf. Job 25.6; Ps.139.8) declares God's presence and power in Sheol. The prophets taught also the resurrections of the righteous from the coffin, and the figure of a resurrection of dead Israelites (Ezkl. 37), and so familiarized men with the idea of a personal resurrection. This truth is also hinted at in Is.26.19; and openly stated in Dan.12.2, where two classes are said to rise again—the very good to glory and the very evil to shame and contempt. This marks the climax of O.T. ideas. [Soul.] (2) In N.T. Practically nothing is told us about the state of the departed between their death and the last judgment. They are "absent from the body" (2Cor.5.8), and the good are "with Christ" (ib.; also Ph.1.23) "in paradise" (Lk.23.43), "at rest" (Rev.6.11, 14); the wicked are "kept under punishment" (2Pe.2.9; cf.2.2, 3.7; Jude). Dives in the parable is "in torments" (Lk.16.23), but the reference to the intermediate state is uncertain. The word "sleep," therefore, as used of death, does not signify unconsciousness. 1Pe.3.19, 4.6 may possibly imply that there is, in the sense after death. 1Cor.15.13-15 may refer to a purification by suffering; but the meaning of both these passages is highly uncertain. There is no trace in the Bible of the idea that those who are condemned because of their earthly life will have a second probation after death: the only possible exception is (according to one line of interpretation) 1Pe.3.19, 20. In 2Tim.1.18 we have almost certainly an instance of prayer for the departed. Rev. 6.11 and Heb.12.1 probably suggest that the dead have some knowledge of what is happening on earth. The events of the last day are (i) the resurrection; (ii) the judgment; (iii) the end of time and the revelation of the eternal life, with heaven for the saved and hell (ge-henna) for the damned. The resurrection of the last day is the rising again of the body (contrasted with the spiritual resurrection which takes place with a man's conversion from spiritual death to life) of the just, the body of the resurrection. 1Pe.3.19, 23, Ph.3.11, 1Th.4.15, 16 to the future body, resurrection). This bodily resurrection awaits all men—good and bad (Jn.5.28; Ac.24.15; Rev.20.13). In the resurrection of the just, the body will be changed from its earthly state of humiliation to a glorious body, like that of the risen Lord (1Cor.15.35-49; Ph.3.21). For the last judgment, see CONSUMMATION OF CHRIST; for the state of the saved, see HEAVEN; and for the punishment of the lost, see HELL. This punishment is described as eternal (αἰώνιος Mt.25.46), a word used of time which has a beginning, but never of time which has an ending; it might be translated "endless." The idea of a temporary hell, and the ultimate salvation of all men (Universalism) is not found in the Bible. It is God's will that all men should be saved (1Tim.2.4); but it does not follow that all men will accept the offer of salvation: there is "sin which hath never forgiveness." The idea that the damned will ultimately cease to exist (Annihilationism) rests upon a misunderstanding of the association connected with the words death, destruction, etc., as used in the Bible of the punishment of the wicked. These words imply utter ruin—the loss of all that makes life worth living; but they do not involve the idea of a cessation of existence, as in the wicked. The idea that the wicked never seems to contemplate the death of the soul in this latter sense. Salmond, Immortality: Agar Beet, Last Things; Hastings, D.B. (5 vols. 1904), art. "Eschatology." [S.C.G.]

**G**

**Gaal** (Judg.9.26-41), son of Ebed (a slave), a freebooter, who attempted to supplant Abimelech at Shechem. His appeal to Canaanite tradition indicates that he was not an Israelite. A braggart over his wine, he was disconcerted by Abimelech's sudden appearance, but forced to fight by Zebul's taunts. After his defeat, Zebul drove him out of Shechem. Ver. 33 (cf. 36) is illustrated by the remark of Stanley (S. and P. pp. 234 f.) that in the valley of Shechem "the exhalations remain hovering among the branches and leaves of the olive trees, and hence that lovely blush haze." [H.M.S.]

**Gaash,** a "hill" (properly "mountain") of Har, S. of Timnath-heres (Jos.24.30). The name has not been recovered. [G.R.C.]

**Gaba** (A.V. Jos.18.24; Ezr.2.26; Ne.7.30; R.V. Gaba). [Gibeah.]

**Gabael.**—1. An ancestor of Tobit (Tob. 1.1).—2. A poor Jew (Tob.1.17, Vulg.) of Rages in Media, to whom Tobias lent 10 talents of silver (Tob.1.14, 4.1, 20, 5.6, 9, 1, 10, 2). [G.R.C.]

**Gabaitha.** (Est.Apol.12.1) = Bichban.

**Gabbal,** the head of an important family of Benjamin resident at Jerusalem (Ne.11.8).

**Gabbatha** is given as the Heb. or Aramaic name (raised up) of the "Pavement," where the judgment-seat or bema was planted, from which Pilate delivered our Lord to death. He was laid on the ground. The place was outside the praetorium, for Pilate brought Jesus forth from thence to it. Apparently a public place just outside the tower Antonia, and raised above the street, is intended. [G.R.C.]

**Gabdes** (1Esd.5.20) = Gaba (Ezr.2.26).
GAD

Gabrias, the "brother" (Tob.1.14) of Gabaed, Tobit's creditor, though E.V. in 4.20 makes Gabaed the "son" of Gabrias; but the Gk. allows of either (cf. Ac.1.13 with Jn.1). Gabriel, "man of El," or "hero of God." In O.T., Dan.3.16,9.21 only, not in Apocrypha, but in Pseudepigrapha. Often in Eth. Enoch, e.g. "there is seen Paradise and the seraphim [i.e. cherubim] and the cherubim" (xx. 7); intercedes for those who dwell on earth (xl. 6), and probably in Asc. Is. iii. 16, xi. 4. He is still invoked in the evening prayer of the Jews. In N.T., Lu.1.19,26 only (to Zachariah and to Mary). He represents angelic ministry to man, as Michael; and his mission to Satan. For Jewish and {155A-3} Arabian legends, see Jews Encycl. s.v.; cf. Lueken, Michael, pp. 32 ff., 55 f., 111 ff. [A.L.W.]

Gad (LXX. δαβίδων, δαίμον; Vulg. fortuna), properly "the Gad"; i.e. "the [god of] good luck." In A.V. of Is.65.13 the clause "that prepare a table for that troop" has in the margin instead of "troop" the proper name "Gad" (cf. Gen.30.11), evidently some idol worshipped by the Jews in Babylon. That Gad was the deity Fortune (LXX., and R.V. which likewise personifies "Destiny," A.V. "that number") is supported by the etymology (Syr. gadd, Arab. jada), and is commonly accepted. Genesis probably right as to Gad being the planet Jupiter which was regarded by Eastern astrologers as the star of greater good fortune. Movers favours the planet Venus. Illustrations of the ancient custom (lectisternia; cf. Je.7.18) of placing 3 banqueting tables in honour of idols will be found in the table spread for the sun among the Babylonians (Her. iii. 47, 18), and in the feast made by the Babylonians for their god Bel (Bel 3ff.; cf. Her. i. 181, etc.). Evidences of the worship of Gad, as the god of fortune, in Canaan may perhaps be found in the proper names Baal-gad (Jos.11.17,15.7,13.5) and Migdal-gad (Jos.15.37), the tower of Gad. G. A. Smith on Is.65.17; Delitzsch on Jer.33.15; Lenormant, Chaldaean Magic, p. 120. [I.H.B.]

Gad (fortune). The ethnic name Gadites occurs in 17 instances.—1. Jacob's seventh son, and the first child of Zilpah, adopted by Leah and named (see R.V. from her exclamation br'ghad), "in luck." A.V., however, follows the Massors in rendering it "a troop [i.e. of children] cometh," agreeing with the play on the name in Jacob's blessing (Gen.30.11,49.19), "a troop shall press upon him" (R.V., cf. margin). Gad had seven sons at the time of the descent into Egypt (46.16). In the desert, under Elizur and Eliasaph, the numbers of the tribe [Pall. 11, 12, 13; 1Sam.1.1, 2, 3, 4] increased (Num.1.23, 25.18), and included seven clans (26.15) who marched on S. flank (2.14), the spy selected from Gad being Geuel (13.15). On the conquest of Gilead the tribe chose that region, because fit for the cattle taken as spoil (32.1-31); but the fighting men went over Jordan, to assist in the conquest of the W. They stood on Ebal to repeat the curses (Deut.27.13); and the blessing of Moses (33.20) compares Gad to a lion, and refers to the meaning of his name—"blessed is he who increases fortune"—as also to the early settlement of his "portion" by the lawgiver, to which the Gadites returned (Jos.22.9-34; 1Sam.13.7; 2Sam.24.5).

Some Gadites, such as Bani (2Sam.23.36), joined David early, and are said to have been famous for skill in war and for swiftness (1Chr.5.18,12,8), being trained in fighting the

Hagarites (5.19) E. of Gilead. These heroes were found especially at Jazer in Gilead (26.31,32). The tribe was, however, smitten by Hazael of Damascus (2K.10.32,33), and finally taken captive by Tiglath-pileser in 734 B.C. (1Chr.5.22,26), when the Ammonites overran their territory (Je.49.1). The tribe is last noticed in Ezk.45.27,34; Rev.7.5. The Tribal Lot coincided with the western slopes of Gilead, including nearly all the Jordan Valley E. of the river, from Zaphon to Jazer and Beth-Aram. But as Manasseh extended its conquests northwards, Gad appears to have pushed its border N. on the edge of Bashan, besides holding "half," or "part of," Gilead (Deut.3.12,16; Jos.13.24-28; 1Chr.5.11), including all the cities of that region, and bounded on E. by the Mahanaim district (Jos.13.25,26). The Gadites had also rebuilt three towns in the territory of Reuben (Num.32.34), and their presence at Ataroth "from of old" is noticed on the Moabite Stone. Probably Jair of Gilead (Judg.10.3) was a judge of the tribe of Gad.—2. A prophet, or seer, in the time of David (1Sam.22.5; 2Sam.24.19), sent to warn
the king of impending punishment (1Chr.21.9-19). He regulated the music of the temple (2Ch.29.35), and was one of the three chroni-
clers of David's reign (1Chr.29.29). [C.R.C.]

**Gad, River of.** [JAEZER]

**Gadara, Gadarenes.** Gadara was the capital of Perea (see Josephus, 13 Ant. xiii. 3, 4 Wars vii. 3). It was taken by Antiochus III. in 218 B.C., and by Alexander Jannaeus c. 100 B.C. It submitted to Vespasian in 68 A.D. It was famous for hot springs. It is now the ruined town Mekeis, about 7 miles S.E. of the S. end of the sea of Galilee, and 6 miles E. of Jordan, on the low hills. [DECAPOLIS.] The ruins within the walls include two theatres and a basilica, with Roman sarcophagi. (See Schumacher, Northern Arabia, pp. 46-80.) For N.T. notices, see GERGESENES. [C.R.C.]

**Gaddi, son of Susi;** the Manassite spy sent by Moses to explore Canaan (Num.13.11).

**Gaddiel, son of Sodi;** a Zebulonite, one of the twelve spies (Num.13.10).

**Gadi, father of Menahem.** (2K.15.14,17).

**Gath.** [GADATH].

**Galaham,** son of Nahor, Abram's brother by his concubine Reumah (Gen.22.24).

**Galah.** The Bene-Galah were Nethinim who returned from captivity with Zerubbabel (Ezr.2.47; Ne.7.49).

**Gaius (Caius), one of the more common Roman names.** (1) Gaius of Macedonia is mentioned Ac.19.29; (2) Gaius of Derbe Ac.20.4; (3) Gaius of Corinth Ro.16.23; 1Cor.1.14. These are all in connexion with St. Paul. (a) To a disciple of this name St. John addressed his third epistle, while he four several times calls him "beloved," and speaks of his satisfactory conduct and excellent report as a Christian, and in particular of his courageous and generous reception and entertainment of strangers, which had apparently met with un-
due criticism and blame among his fellow-churchmen. It is possible that these "strangers" may have been those itinerant evangelists (Acts 19.29) mentioned in 2Cor., 1Th. and Eph. 5 Hist. Eccl. x. 2. There is no ground for identifying any of the above with one another, nor with him whom St. John made Bp. of Pergamum (Const. Apos. vii. 46). [C.L.F.]

**Galat** (1Th.1.18; 15.5; 1Mac.5.59; 13.22), the Gk. form of Gilead.

**Galal,** three Levites; descendants of (1) Asaph, (2) Elkanah (9.16), and (3) Jeduthun (Ne.11.17).

**Galatia,** in its earlier and stricter sense, denoted a part of the dreary tableland of Asia Minor, S. of Bithynia, about 100 m. broad, and 200 m. long from S.W. to N.E.; but shortly before the Christian era it acquired a much wider significance as the official designation of a new Roman province of far larger dimensions. The name was derived from the Gallic or Keltic invaders, who forced their way into the country c. 280 B.C.; and for a similar reason it was called Gallo-Gracia by the Romans, who found a considerable Gk. population there before them. Although the Keltic immigrants were few in number, compared with the native Phrygians, they retained their characteristics, and held a predominant position for several centuries. Leading at first a predatory life, or fighting in the service of the rival kings of Asia Minor, they gradually settled down as a ruling caste among a mixed population of Phrygians, Greeks, and Jews; and quitted their camps, or fortified villages, they resorted to cities, of which Ancyra, Tavium, and Pessinus were the chief. Espousing the cause of the Romans in the war against Mithridates, their chiefs were rewarded with grants of additional territory—one of them (Deiotaros) being ultimately recognized as king of Galatia. On the death of Amyntas, the last of his successors (25 A.D.), the country passed into the hands of the Romans, and was constituted as a regular province, which was enlarged in various directions. The name is employed by St. Paul in rCor.16.1; Gal.1.2 (cf. 3.1); 2Tim.4.10. A comparison of 1Cor.16.1 with Ac.20.4 (whence "Gaia of Derbe and Timothy" [of Lystra] accompany St. Paul on his way to Jerusalem, with the offerings from Galatia and elsewhere) favours the wider sense, which includes Pisidian Antioch, Iconium, Lystra, and Derbe—as in 1Pe.1.1. The name also occurs twice in Acts. 16.6, 7. take the Phrygo-Galati province of Galatia; Denotes the part of Phrygia in the province of Galatia. In 18.23 "the region of Galatia and Phrygia" would not have been a suitable designation for Galatia proper and Phrygia, but refers to St. Paul's journey in the Galatian part of Ly西亚 (in which Derbe and Lystra lay), and Phrygia "through the hard and encomiastic country" to Ephesus (19.1). [GALATIANS, EP. TO.]

**Galatians, Epistle to,** one of the Pauline letters whose genuineness is scarcely disputed. The main question is whether it was addressed to Keltic Christians in N.W. Galatia, or to the churches in Pisidia and Ly西亚 which received the Gospel from St. Paul in his first missionary journey (Act.13:1f.). Though the latter had no connexion with the Keltic race, the title Galatians was the only acceptable name by which they could be addressed in common; and it was a mode of speech quite in harmony with St. Paul's method of thinking and his habit of grouping churches according to the province in which they were situated (e.g. "Syria," "Asia," "Macedonia," "Achaia"). Moreover, in this wider sense the expression "O foolish Galatians" (Gal.3.1) would be much less offensive than if applied to a proud community like the inhabitants of the Galatia proper. Confirmation of this view, sufficient to outweigh the supposed allusions in the epistle to traits of the Keltic character, will be found on a comparison of the following pas-

ges: Gal.1.6,3, 1.14.18f.; Gal.2.1,9,13, 

AC.13.4; 46,51,14.12; Gal.3.28; 15.41; 

AC.14.11; Gal.16.13, 17; Gal. 

6.17, 14.10, 2Tim.3.11. As St. Paul had a deep interest in his S. Galatian converts, revisiting them at least once, for the purpose of confirming and organizing them (Ac.16.1-6, cf. 

18.23), it would have been surprising if no letter had been addressed to them. On the other hand, the very existence of a Pauline church in N. Galatia is doubtful; its planting not being recorded in Acts. It is also difficult to see why the apostle should have undertaken a toilsome journey from the neighbourhood of Antioch or Iconium to such a remote district, when (as is implied in Gal.4.13) he had inten-
tion of preaching there, especially if already suffering from his "infirmity" there referred to; or how he should have subsequently found himself "over against Myria," when proceeding to Bithynia (Ac.16:7). [Paul]. The object of the visit to Bithynia was probably to obtain greater freedom of movement, or to gain a footing in Jewish ritualism. St. Paul, therefore, seeks first to vindicate his apostolic authority, which had been impugned by Judaizing teachers on the ground that he had never seen the Lord and owed his Gospel to the apostles at Jerusalem. He then deals with the doctrinal question, showing that the law had been superseded by the Gospel, as the full development of that principle of faith which had been all along the secret of acceptance with God (3f.). Finally, he reminds his converts of the blessings they had derived from the Gospel he preached, and warns them against the abuse of their liberty, exhorting them to live after the Spirit. The date of this second visit (presupposed in Gal.4.13) is being soon after that event (Ac.16.1-6). So that, so, the epistle may have been written 51-53 A.D., perhaps from Corinth (Rendall) or Antioch (Ramsay), being due to a fresh outbreak of the Judaizing forces which had been checked by the council. It addressed to Christians in N. Galatia, and was previous to the Council of Jerusalem (49–50 A.D.), his second visit to Galatia (Gal.4.13) being soon after that event (Ac.16.1-6); and so that, therefore, to the designation of his second "three years" in Ephesus (54-55 A.D.). But if "so quickly" merely refers to the suddenness with which the news of the defection reached the apostle, it is permissible, on either theory, to adopt Bishop Lightfoot's view that the epistle was written several years later (57-58 A.D.), probably when St. Paul was on his way from Macedonia to Greece (Ac.20.2; cf. Gal.1.2), between the writing of 2Cor. and Romans. It bears a striking resemblance to the former in tone and spirit, and to the letter to the Philippians. [J.A.M.C.]

**Galbanum**

One of the perfumes employed in the preparation of the sacred incense (Ex.30.34). The galbanum of commerce is brought chiefly from India and the Levant. It is a gum-resin obtained from several Persian umbellifers of the genus *Ferula*. The odour is strongly pungent and medicinal. Whether this be the substance intended in Exodus (Heb.67) has been doubted. Pliny, however, is explicit (xii.25): "Moreover, we have from Syria, out of the same mountain Amanus, another kind of gum called Galbanum, issuing out of an earlike like Fenell-geant, which some call by the name of the said Rosin, others, Stagonitis. ... The right Galbanum, if you buy it, is sold for five deniers the pound: and is used only in Physicke for medi- 

**Galilee**

Is mentioned in 35 chapters of the N.T. Galilee is also mentioned in Ecles. 24.15, as yielding a pleasant odour, in company with onyx (onyxcham, an odoriferous shell) and storax. [H.C.H.]

**Galed (the heap of witness; Gen.31.47).**

**Galeed (Gal.3.9).**

**Galgal (1Mc.9.2).** The situation is not clear, but apparently the Upper Galgah is meant. [GILGAL, 2] [C.B.C.]

**Galilee** (probably "rolling" hills, plur. *Galiloth*), the N. province of W. Palestine, including Upper Galilee, where the mountains rise to 4,000 ft. above the sea, and (to its S.) Lower Galilee, where the hills generally are less than 1,000 ft. (1,500 near Nazareth), with small plains and broad valleys. The first is noticed in Joshua (20.7,21.32) as "mount Naftali," near Ke'desh. Lower Galilee (1K.9.11), including 20 cities near Cabul—or on the N.W. of the province, near Acco, was partly surrendered to Huram of Tyre by Solomon. Upper Galilee as far S. as Hazor—was attacked by Tiglath-pileser III. in 734 or 732 B.C. (2K.15.29). To this Isaiah refers (9.1); for the Assyrian advance from Damascus led "by the way sea-ward, over Jordan, to Galilee of the nations"; but the future glory of Galilee is here predicted (see R.V.). The population was then transferred to Assyria, and the "Gentiles" (goyim) probably replaced them. The Jews were withdrawn thence in 164 B.C. to Judaea (1Mc.5.15-23), and about 155 B.C. the province of Galilee is noticed with Samaria and Judaea (10.30), including Cades (11.36), but was again surrendered in 63 B.C. See also Tob.1.2; Jth.1.5,15,5. In the Mishna, Galilee includes three regions (Shebithix.2), the Upper and Lower divided at Caphar Hananah (Hannathon), where the mountains rise rapidly, with "the valley"—i.e. the Upper Jordan valley. The W. and N. boundaries of Galilee are defined, between Acco and Caesarea Philippi, in the Talmudic literature (Neubauer, Gèog. du Talm. p. 11); and the low W. hills and plain, were outside Upper Galilee. The line ran from the "wall of Acco," and from Achzib, passing such known sites as Ga'thin (J'athan), Kebartha (Kebara), Eshbon (K'abry), Bethel (Bethul), Migdal (Migdol), Geil (Jellil), Kana of 'Aiya ('Qana and 'Ayä), Berii (Beriad), Migdol Kherub (el Khurb'dh), 'Aulem ('Al'men), 'Aiun (the 'Ayün plain), etc. Josephus, though fixing the N. border of Samaria at Ginea (3 Wars iii. 4) or Geman (2 Wars xii. 3), now Jevin [Es'-gan'im, does not include the "great plain of Samaria" [Es'drelo'em] in Galilee. He makes Lower Galilee extend N. from Xaloth [Chis-loth-Tabor] to Bersabe (2 Wars xx. 6, 3 Wars iii. 1), probably at the ruin *Abu Sheb'a*, close to Hannathon, while its E. and W. limits were Tiberias and a city called Zabulon, near Acco (2 Wars xviii. 9). Acco, Ptolemais, the Outside Lower Galilee, but Saab (Sh'atih), 10 miles to its E., was within the border (3 Wars vii. 21). Upper Galilee ran N. from Bersabe to Baka, near Tyre, and the boundaries on E. and W. were Thella (et Tell, near Bethsaida) and Melloth, or M'atlía, close to Alloth. This agrees with the Talmudic statements. In the N.T. Galilee is mentioned...
GALILEE, SEA OF

Acts, the reference being in each case to Lower Galilee, including Nazareth (Mt.2:22), Capernaum (Lu.4:31), and Cana (Jn.2:11). It was in the territory of this latter 25,000 people (Lu.5:31) and was the third province of W. Palestine (Ac.9:31). The dialect of Galilee differed from that of Jerusalem (Mk.14:70; Lu.22:59). The capital of Galilee was at Tiberias in our Lord's time, its other chief towns being Sepphoris (Seffüris). N. of Nazareth, and Kedesh in Upper Galilee and Lower Galilee had a large population. and many villages including Josephus are still called by their old names. After 155 A.D. the Sanhedrin sat at various centres in Lower Galilee, and finally at Tiberias. [PALESTINE. [c.r.c.]

Galilee, Sea of (Mt.4:18,15.29; Mk.1:16,7.31; Jn.6:1) [GEOG.].

Gall reproduces in A.V. various Heb. words, (1) מַרְדָּה or מַרְדָּה, denotes etymologically, "that which is bitter" (cf. Job 13.26). Hence the term is applied to the "bile" or "gall" (Job 16.13,20.25); it is also used of the "poison" of serpents (Job 20.14), which the anciently erroneously held to be the venom of the serpent. Writers who have searched most curiously into the secrets of Nature, doe hold "(says Pliny)" that the venom of Serpents is nought else but their gall." (2) רֶב, generally translated "gall" by A.V., is in Ho.10.4 and Am.6.1 used as "hemlock." In Deut.32.33 and Job 20.16 it denotes the "sorcerer" or "venom" of serpents. From Deut.29.18, and Lam.3.19, compared with Ho.10.4, it is evident that the Heb. term denotes some bitter and perhaps poisonous plant. Other writers have supposed, and with some reason from (Deut.32.33), that some berry-bearing plant must be intended. Gesenius understands "poppy". The cap- sules of the Papaveraceae may well give the name of it (head to the plant in question, just as we speak of poppy heads. The various species of this family spring up quickly in cornfields, and the juice is extremely bitter. A steeped solution of poppy heads may be "the water of gall" in Is.38.10. The identification of gall with poppy (Papaver som- niferum) is an unwarrantable assumption. The confusion between the senses of bitterness and venom in the doubled use of "gall" runs through many passages. The Roman soldiers offered our Lord, just before His crucifixion, "a vinegar mingled with gall" (Mt.27.34), or "wine mingled with myrrh" (Mk.15.23). "Gall" is to be understood as merely expressing the bitter nature of the draught. Notwith- standing the opinion of many ancient and modern commentators, that the "wine mingled with myrrh" was offered to our Lord as an anodyne, it was probably a mere ordinary beverage of the Romans. Had the soldiers intended a mitigation of suffering, they would have offered a draught drugged with some narcotic. [n.c.n.]

Gallery. The A.V. so renders four Heb. words. (1) גַּלַּי (Ezk.41.15) and (2) גָּלִי (41.16,42.3-5); these words meaning a "passage, gallery" (Vulg. poricus). (3) רַבִּית (marq. Can.1:17), supposed to mean a ceiling adorned with fretwork (I.XX. פַּרְדְּשָׁרא), as a clerical error for רַבִּית (גָּרְל), corrected by the Massora. (4) רַבִּית cognate to the preceding (Can.7.5), where the hair of Solomon's bride is described. The proper rendering seems to be "the king is caught in the tangles." This word is rendered "water-troughs," as meaning a network of channels. Others suppose it to refer to the "flowing" of locks and water. [c.r.c.]

Galley. [Ship.]

Gallin (springs; iSam.25.44; Is.10.30), a place mentioned, with others of N. of Jerusalem, as alarmed by the Assyrian advance. It may, however, be the Galen of LXX., now Bet Jala, 4 miles S.W. of Jerusalem. [ELTEK.] There are some good springs in the valley 2 miles N. [LAISH.] [c.r.c.]

Gallo, proconsul of Achaia, when St. Paul was at Corinth (50-51 A.D.). He was brother of Seneca, the Stoic writer. Nero's tutor. Seneca bears testimony to his brother's charm of manner and beauty of character. Gallio was spared when Seneca fell, but perished afterwards among the many victims of Nero's reign. His conduct at the trial of St. Paul (Ac.18.12-17) is one of the many instances given by Eusebius (De Base) of a proconsul's leniency towards the Christian faith in early days. Gallio's indifferency (18.17), which has become proverbial, was not so much indifference to religious questions as to the outbreak of Gk. spate against the Jewish accusers of St. Paul. See Ramsay, St. P. the Trav. pp. 255 ff. M. E. Gen.30.38: perhaps he may have found a text of the emperor Claudius mentioning a rescript sent to L. Junius Gallio as proconsul of Achaia in 52 A.D. [E.R.B.]

Gallows. [CRimes.]

Gama'el (1Eds.8.29) = Daniel, 2.

Gama'el, son of Pedahzur; leader of Manasseh at Sinai (Num.1.10.2.20; 7.54,59,10.23).

Gammaliel. Rabban Gamaliel I., grandfather of R. Gamaliel II. (and sometimes confused with him), was at the height of his fame at the time of the trial related in Ac.5.27-40. Notices of him in rabbinic literature correspond with the position of the great influence and tolerant attitude of Gamaliel. He was the teacher of St. Paul (22.3), and the apostle of the Gentiles may have been prepared for the lessons of his later life by the precepts of charity to Gentiles which tradition in the Mishna ascribes to Gamaliel (Gittin, quoted by Hamburger). [SCIRE. [E.R.B.]

Games. The notices of juvenile games are very few. It must not, however, be inferred from this that the Heb. children were without the amusements adapted to their age. In Egypt, inside the nurseries of children, there have been found their toys; among such are dolls, some with movable arms and legs: (See Wilkinson, ii. pp. 426 ff.) The only recorded sports, however, are keeping tame birds (Job 41.5) and imitating the proceedings of marriages or funerals (Mt.11.16); though that there were more many sports is unquestionable, as may be inferred from the following passages: 2Sam.2.12ff. This very bloodthirsty sport, which perhaps occurred during a truce, can be paralleled by similar things among other peoples. Running is referred to in 2Sam.1.23; archery in 1Sam.20.20; rolling the disc in
GAMES

Zech. 12:3; playing at ball, popular among many peoples of antiquity, in Is. 22:18. Much bodily exercise was an absolute necessity to people who were constantly fighting, in spite of the fact that the natural economy and character and the influence of the climate alike indisposed the Hebrews to much active exertion. The chief amusement of the men appears to have consisted in conversation and joking (Je 15:17; Pr. 26:19); also in asking riddles (ḥiddōth); and, above all, story-telling, which is the characteristic pastime of Orientals. In Jerome's day the usual sport consisted in lifting weights as a trial of strength, as practised also in Egypt. Dice are mentioned by the Talmudists, probably introduced from Egypt. Assyrian dice of bronze have also been discovered. Public games were altogether foreign to the spirit of Heb. institutions—the great religious festivals supplied the plausible excitement and feelings of national union which rendered the games of Greece so popular, and at the same time inspired the persuasion that such gatherings should be exclusively connected with religious duties. Accordingly the erection of a gymnasion by Jason was the cause of his being herewith banished (1 Mac. 1:14; 2 Mac. 4:12-14). The entire absence of verbal or historical reference to sports in the gospels shows how little they entered into the life of the Jews. Among the Greeks every city of any size possessed its theatre and stadium. At Ephesus an annual contest was held in honor of Diana. The games that St. Paul was present when these games were proceeding. A direct reference to such exhibitions is made in r Cor. 15:32, and his epistles abound with allusions to the Gk. contests, borrowed probably from the Isthmian games, at which he may well have been present during his first visit to Corinth. These contests (1 Tim. 6:12; 2 Tim. 4:7) were divided into two classes, the pankratium, consisting of boxing and wrestling, and the pentathlon, consisting of leaping, running, quoitng, hurling the spear, and wrestling. The competitors (1 Cor. 9:25; 2 Tim. 2:5) required a long and severe course of preparation. Time and strength with a particular diet (1 Cor. 9:25-27). In the Olympic contests these preparatory exercises extended over a period of ten months, during the last of which they were conducted under the supervision of appointed officers. The contests took place in the presence of a vast multitude of spectators (Heb. 12:1), the competitors being the spectators (1 Cor. 4:9; Heb. 10:33). The games were opened by the proclamation of a herald, whose office it also was to announce the name of the victor before the assembled multitude. The judge was selected for his spotless integrity (2 Tim. 4:8); his office was to decide any disputes and to give the prize (1 Cor. 9:24; Ph. 3:14), consisting of a crown (2 Tim. 2:5; 4:8) of leaves of wild olive at the Olympic games, and of pine, or at one period, ivy, at the Isthmian games. St. Paul alludes to two only out of the five contests, boxing and running, most frequently to the latter. In boxing (cf. 1 Cor. 9:26) the hands are turned with a cestus, a band of leather studded with nails or knobs. The foot-race (2 Tim. 4:7) was run in the stadium (1 Cor. 9:24), an oblong area, open at one end and rounded in a semicircular form at the other, along the sides of which were the raised tiers of seats on which the spectators sat. The judge was stationed by the goal (Ph. 3:14), which was clearly visible from one end of the stadium to the other. 

Gammadins' (Ezk. 27:11), the defenders of the towers of Tyre. The word probably means "fierce" warriors, like the Arab. jamād. [C.R.C.]

Gamul, a priest; the leader of the 2nd course in the sanctuary-service (r Chr. 24:17).

Gan. "Sons of Gan" were among the "sons of the servants of Solomon" (1 Esd. 5:34 only).

Garden. Gardens in the East are, as the Heb. word indicates, inclosures, on the outskirts of towns, planted with various trees and shrubs. We learn that they were surrounded by hedges of thorn (Is. 5:5), or walls of stone (Pr. 24:11). For further protection lodges (Is. 1:8; Lam. 2:6) or watchtowers (Mk. 12:1) were built in them, in which sat the keeper (Job 27:18), to drive away the wild beasts and robbers, as is the case to this day. The gardens of the Hebrews were planted with flowers and aromatic shrubs (Can. 4:16.6.2), besides olives, fig-trees, nuts, lemons, pomegranates, and other fruits for domestic use (Ex. 23:11; Je. 29:5; Am. 9:14). Gardens of herbs, or kitchen-gardens, are mentioned in Deut. 11:10 and 1 K. 21:2. Cucumbers were grown in them (Is. 1:8; Ba. 6:70), and probably also melons, leeks, onions, and garlic, which are spoken of in Num. 11:5 as the products of a neighbouring country. The rose-garden in Jerusalem (Tal. Bab. Baba Kama 82.6) was remarkable as having been the only one which, from the time of the prophets, existed within the city walls. But of all the gardens of Palestine none is possessed of associations more sacred and imperishable than the garden of Gethsemane, beside the oil-presses on the slopes of Olivet. Is. 17:10 seems to imply that in some gardens exotics were reared. In a climate like that of Palestine, the neighbourhood of water was important in selecting the site of a garden. To the old Hebrews, a garden "was as a tree planted by the waters," and was an emblem of luxuriant fertility and material prosperity (Is. 58:11; Je. 17:8.31.12). From a neighbouring stream or cistern were supplied the channels or conduits intersecting the gardens, and conveying water to all parts (Ps. 1:3; Ec. 2:6; Ecclus. 24:30). The expression "to water with the foot" in Deut. 11:10 probably means to direct the stream by pressing the mud banks of the channels with the naked foot, as may still be seen done in the East. The orange, lemon, and mulberry groves around and behind Jaffa supply, perhaps, the most striking peculiarities of Oriental gardens, which Maundrell describes as "a confused miscellany of trees jumbled together, without either posts, walls, arbours, or anything of art or design, so that they seem like thickets rather than gardens." The kings and nobles had their country-houses surrounded by gardens (1 K. 21:1; 2 K. 3:27), and these were usually based on testaments. The garden of Ahasuerus was in a court of the palace (Esth. 1:5) adjoining the banqueting-hall.
GAREB

(7.7). In Babylon the gardens and orchards were inclosed by the city walls. In large gardens the orchard was probably, as in Egypt, the inclosure set apart for the cultivation of date and syconine trees, and fruit trees of various kinds (Can. 4:13; Ec. 2:5). The ancient Hebrews made use of gardens as places of burial (Jn. 19.41). Manasseh and his son Amon were buried in the garden of their palace, the garden of Uzza (2 K. 21.18, 26). The retirement of gardens rendered them favourite places for devotion (Mt. 25:36; Jn. 18:1; cf. Gen. 24:63). In the degenerate times of the monarchy they were the scenes of idolatrous worship (Is. 1:29, 65:3, 66:17), and idols were probably erected in them. Gardeners are alluded to in Job 27:18 and Jn. 20.15. But how far the art of gardening was carried among the Hebrews we have few means of ascertaining. That they were acquainted with the process of grafting is evident from Ro. 11.17, 24, as well as from the minute prohibitions of the Mishna. The traditional gardens and pools of Solomon [ETAM], supposed to be alluded to in Ec. 2:5, are shown in the Waqild (i.e. Hortus), a little S. of Bethlehem (cf. Josephus, Ant. vii. 3). The "king's garden," mentioned in 2 K. 25:4, Ne. 3.15, Je. 39.4, 52.7, was near the pool of Siloam and the mouth of the Tyropoeon.

Gareb, "the Ithrite," one of the heroes of David's army (2 Sam. 23:38).

Gar'ezem Hill. —1. (Je. 31:39.) A hill, perhaps marking N. limit of Jerusalem, probably of "gardens" (Arab. jarhab, "plantation"). —2. As the proper name of one of David's captains (2 Sam. 23:38; 1 Chr. 11.40), it probably meant "expert." [C.R.C.]

Gar'izim (2 Mac. 5.23, 5.2) = Gerizim.

Garlick (Num. 11.5) is the Allium sativum of Linnaeus, which abounds in Egypt, where it was always held in reverential estimation. Pliny says, "I cannot overpass the foolish superstition of the Egyptians, who use to swear by Garlieke and Onions, calling them to witness in taking their oaths, as if they were more to be feared than some gods." [N.C.H.]

Gar'mite. The. Keliah the Garnimite — i.e. descendant of Gerem, in the genealogical lists of the families of Judah (1 Chr. 4:19).

Garrison. The. Heb. words so rendered in A. V. are derivatives from the root nāqab, to "place erect" [PILLAR], which may be applied to a variety of objects. (1) nāqabh and maqābha undoubtedly mean a "garrison," or fortified post (1 Sam. 13.23, 14.1, 11, 12, 15, 2 Sam. 23.14). (2) 'wēdh is used for a "garrison" (1 Chr. 11.16), but also for a "column," erected in an enemy's country as a token of conquest (r Sam. 13.3), and elsewhere it means "officers placed over a vanquished people (2 Sam. 8.6, 14; 1 Chr. 18.13; 2 Chr. 17.2)."

Gashmu. [Geshem.]

Gatam, an Edomite "duke"; son of Eliphaz son of Esau (Gen. 36.11, 16; 1 Chr. 1.36).

Gat'me. The word is used sometimes to mean a walled town (Gen. 22.17, 24:60; Deut. 12.12; Judg. 5.8; Ru.4.10; Ps. 87.2, 122.2). Gates were of wood (Judg. 9.52), but plated with metal, locked and barred (Deut. 3.5; Ps. 107.16; Is. 45.1, 2), with bronze and iron. Babylonian gates had votive texts on the lintels, and Hebrew gates were inscribed with passages from the law (Deut. 6.9). Solomon's temple had gates of fir and of olive wood, adorned with gold (1 K. 6.31-35; 2 K. 18.16). Gate-keepers are noticed (2 K. 12.9, 25.18, etc.; Je. 35.4), and chambers in gate-towers (2 Sam. 18.24). [LITIES.] [C.R.C.]

Gate, Beautiful. [Temple.]

Gate, Prophets' of the. [Prophets.]

Gath, one of the five cities of the Philistine lords. The O.T. notices do not fix its site; and, unless it be noticed as Gitt Rimuna [see GATH-RIMMON] in the Amarna letters (Berlin 154), there are no certain monumental inscriptions. Eusebius (Onomasticon) places it 5 miles N. of Beit Jibrin, on the Lydda road. This is usually supposed to refer to Tell es Sahel, a village on a high hill with a white cliff, 7½ miles N. of Beit Jibrin. Under the ruins of the mediaeval castle of Blanche Garde, built in 1144 A.D., recent excavations have here laid bare the remains of an early Canaanite town, including a line of monumental stones, probably once sacred. [GEZER.] The site, 100 ft. above the plain, where the valley of Elah enters it, was very strong; and to Gath the Philistines fled down this valley (see 1 Sam. 17.52). It was a city of Anakim, not conquered by Joshua (Jos. 11.22, 13.3), but taken possibly in Samuel's time (1 Sam. 5.8, 6.17, 7.14). David fled to Achish, the Philistine king of Gath (21.10), as did Shimee (1 K. 2.39-41); and Ziklag belonged to Gath (1 Sam. 27.2-6). See also 2 Sam. 1.20, 15.18, 21.20, 22. It was attacked by Hazael II. of Syria (2 K. 12.17); and Uzziah destroyed its walls about 750 B.C. (2 Chr. 26.6). Amos (6.2) still notices it as a Philistine city. See also 1 Chr. 7.21 (an early raid from Gath to Geshen), 8.13 (Benjamite attack), 18.1 (David's
conquest). 20:6, 8 (the giants in Gath), 2 Chr. 11:7, 8, where it occurs with Adullam and Marethah; cf. Moresheth-gath. [c.r.c.]

Gath-he'pher, Gittah-he'pher, a town on E. border of Zebulun, the home of Jonah (Jot. 19:13; 2 K. 14:25). The site, on the outposts 2 Roman miles E. of Sephoris, the tomb of Jonah being shown. Now el Meshed (the memorial), with a tomb of Jonah noticed by pilgrims since 4th cent. A.D. [c.r.c.]

Gath-rimmon.—1. A city of Dan given to the Levites (Jos. 21:24; 1 Chr. 6:60), not far from Joppa (Jos. 19:14), to which place it is also referred (1 Mc. 1:13). It is mentioned in the Amarna tablets (Berlin 154) it is called Giti Rimuna.—2. A town of Manasseh W. of the Jordan, assigned to the Levites (Jos. 21:25). Perhaps the village Jal, 12 Roman miles N. of Samaria. [c.r.c.]

Gaza, (Arab. Ghazzeh), more usually Azzah (strong), as in Deut. 2:23, 1 K. 4:24, 25:20, the most southern city on the shore trade-route from Palestine to Egypt. In 1 Chr. 7:28 Gaza is an error, probably for Ai. It was on the S. border of Canaan (Gen. 10:19), and was the limit of Joshua's attacks on the Anakim (Jos. 10:4, 11:22). It was claimed by the Philistines (1 Sam. 17:5), and according to Iz. (Onomastr) rendering, was not taken (Judg. 1:18). The Midianites and their allies, in 13th cent. B.C. overran Palestine to Gaza (6.4), perhaps in alliance with the Egyptians. Samson (16:1, 21) was here imprisoned by the Philistines. It was one of the five cities of the Philistine lords (15:10). Hezekiah's passages places it 12 Roman miles S. of Lydda. In the Amarna tablets (Berlin 154) it is called Giti Rimuna. In 2 K. 15:18. Its conquest by Pharaoh Necho, c. 609 B.C., is mentioned by Jeremias (47:1, 5), and the city was denounced earlier (Am. 1:6, 7; Zeph. 2:4). It was then a king of the Captivity (Zech. 9:5). Jonathan and Simon, brothers of Judas Maccabaeus, attacked it c. 150 and 143 B.C. (1 Mac. 11:61, 12:13, 43). The road from Jerusalem passed through a desert near this city (Acts 8:26). In the 15th cent. B.C. Gaza was subject to Egypt, and was a refuge for the Canaanites fleeing from the 'Abiri or Hebrews (Amarna Letters, Berlin 57, 105, 190). About 1330 B.C. it is mentioned as Sili in the Tell el-Far'ah Excavations. It was a border town of Palestine, by the Egyptian Mohar traveller. In 732 B.C. Tidath-pileser attacked Gaza, and its king Hanun fled to Egypt, but at length submitted. Sennacherib, in 702 B.C. restored Sili-baal (Ba'al is my shade), whom Hezekiah had overthrown, as king of Gaza; and Esar-haddon (c. 680 B.C.) mentions him as a tributary. After the fall of Tyre, Alexander the Great, in 332 B.C. met with resistance only at Gaza on his way to Egypt. Gaza appears to have been always a trading centre. It was still a pagan city in 400 A.D., with a famous temple of Marna (our lord), which was then destroyed by other shrines (see Reland, Pal. Illustr. ii. p. 293). Its prosperity continued throughout the Middle Ages, and it is still an important trade depot. It had no natural harbour, but the Maima (or "water-place") claimed Mines (or Mineh) was a landing-place 2 miles W. of the city, where miles the mounds and foundations of W. Pal. iii. pp. 236, 237, B.C. The city itself (Sum. W. Pal. iii. pp. 248-251) stands on a hill, 100 feet high, in the plain, and is surrounded by mounds covering the mediaeval walls. The town has a population of 18,000 persons. The great mosque is a Templar church of 12th cent. A.D. The surrounding gardens contain many old grottoes and many palms. There is a road for over 2 miles round the town, and a fine olive grove stretches 4 miles N. There are some 200 Gk. Christians, and a Gk. church. An early Egyptian text has been found here, with several Gk. inscriptions, one as late as 640 A.D. The houses are mostly of mud, but the mosques, etc., of stone.

Gazer (2 Sam. 5:25; 1 Chr. 14:16) = Gazer.

Gazer'a—1. (1 Mac. 4:15, 7:45) = Gazer.

Gazer, a name occurring twice in 1 Chr. 24:46; (1) as son, (2) as grandson, of Caleb by Ephah his concubine. The name has perhaps been repeated by a clerical error.

Gazites, The. [Gazathites.]

Gazzam. The Bene-Gazzam were Nethinim who returned from the Captivity with Zerubbabael (Ezr. 2:48; Neh. 7:51).

Ge'ba (hill; in Jos. 18:24; Ezr. 2:26; and Neh. 7:30; A.V. Gaba).—1. A city of Benjamin, otherwise Gibeah, now the village Jeb'ba, S.W. of Michmas. It was given to the priests (Jos. 21:17) and occupied by Philistines in the time of Saul (1 Sam. 13:5). In the reign of Asa (1 K. 15:12), and was taken, and in Josiah's reign, the N. limit of the kingdom of Judah (2 K. 23.8). See 1 Chr. 6:60, 8:6; 2 Chr. 16:6; Neh. 11:37, 12:29; Is. 10:29; Zech. 14:10.—2. A place mentioned (Jeth. 3:10) to define the point reached by the Babylonian army ("between Geba and Scythopolis") in attacking Bethulia; or from Geba (Beth-shan) to Scythopolis to Jeb'a, a village on the S. edge of the plain of Dothan, and 6 miles S.W. of Bethulia. It is noticed by Eusebius (Onomasticon) as Gabe, E. of Caesarea. [c.r.c.]

Geb'el, a Phoenician sea-port, now Jbeil, a town with mediaeval walls and a Roman street of columns, g N of Bublos, on either bank of the Ga'zath River, and about 20 miles N of Beirut. Its ruins were explored by Renan. The "land of the Giblites" (R.V. Gebalites) was in Lebanon, but within the N. boundary of Israel. It was not conquered by Joshua (Jos. 13:5). Stone-cutters thence (see R.V.) aided in building Solomon's temple (1 K. 5:18); and about 600 B.C. Gebal was famous for ship-building (Ezk. 27:9). It may be intended in Ps. 83:7, where a general confederacy with Assyria, including Tyre and Philistia, with the Ammonites, Moabites, and Edomites (perhaps in 732 B.C.), is described. The Amarna letters include 50 from Ribadda, king of Gebal in 15th cent. B.C. He was attacked by confederated Amorites and Hittites, and his city taken. He speaks of silver and gold in its temple, and of the papyrus trampled by the Hittites. This was famous in the Greek age, when Gebal was called Bublos, or Byblos, from this plant. (Hence our "Bible," from the Greek "Byblos.") About 1330 B.C. an Egyptian traveller (the Mohar) notices the temple of a goddess at Gebal. Tiglath-
pilor, III. in 738 B.C. received tribute from its king Shittiti-bel; Sennacherib from another king of Gebal, Urumelek, in 703 B.C.; and Esar-haddon from another, Milki-asapa, about 680 B.C. The famous stela of Yehu-melek of Gebal ( Corpus Sem. Inscrip. i. 10), about 500 B.C. or later, describes his piety as a "just king," and the bronze altar he erected (with a gold image of "Ba'al of Gebal," but, like represents him pouring a libation, standing before the seated Isis-like goddess, under the wings of the sun-god. A coin of Gebal, with Gk. text, 'Iepas B'bisa, shows the temple, with its court, and cone emblem. In the vicinity are found rock-cut tombs of various ages and Roman sarcophagi. A fine Greek-Phoenician entrails from Gebal (in the Louvre) represents the winged sun with two uraei snakes. The death of TammuZ was mourned annually (till 4th cent. A.D.) at the Adonis River hard by, and the stream sprang from the fountain of APhIK, 3, at the shrine of the "mourners." [c.r.c.-]

Gebel, the son of Geba, after the death of Ramoth-gilead, and had charge of the E. part of the tribe of Manasseh (1K. 4.13).

2. Geber the son of Uri had a district S. of the former—in the "land of Gilead," but mainly in Reuben (1K. 4.10). [PALESTINE.]

Gebim (pits; Is. 10.31). The LXX. reads Gebim, and was near Jerusalem. It is mentioned in the same passage, may have been S. of the city. There is a ruin Jubber Ram (pit of the Greeks) about 2 miles S.E. of the city.

Gedaliah. 1. Son of Ahikam (Jeremiah's protector. Je. 26.24), and grandson of Shaphan the secretary of king Josiah. After the destruction of the Temple, 588 B.C., Nebuchadnezzar departed from Judaea, leaving Gedaliah with a Chaldean guard (40.5) at Mizpah, to govern the vine-dressers and husbandmen (52.16) exempted from captivity. Jeremiah joined Gedaliah; and Mizpah became the resort of lepers, for Gedaliah treated them generously (40.6, 11, 17). He was murdered by Ishmael two months after his appointment (Je. 41.1-9; cf. Josephus, 10 Ant. ix. 4).

2. A Levite musician, son of Jeduthun (1Chr. 25.3,9). A priest who put away his foreign wife (Ezra. 10.18).

3. Son of Pashur (Je. 38.1), one of those who caused Jeremiah to be imprisoned.

4. Grandfather of Zephaniah (Zeph. 1.1).

Gedon (1Es. 5.30) = Gahar.

Gedeon. 1. An ancestor of Judith (Jth. 8.1).

2. The Gk. form of Gideon (Heb. 11.32).

Geder (hedge, or wall), a royal city of the Canaanites (Jos. 12.13), apparently in far S. [GEDOR, 2.]

Gedarah (Jos. 15.36), a town in the Shephelah region of Judah. The site is doubtful. The Gedrus of Jerome (Onomasticon), now the ruin Jedidah, 9 miles S. of Lydda, is in Dan. The Gederita (1Chr. 27.28), who ruled in the Shephelah for Solomon, may have belonged to this town.

Gederathite, The. [GEDOR, 3.]

Gederath, The. [GEDORAH.]

Gederoth. 1. (Jos. 15.41.) A city of Judah, apparently on N.W. border near Beth-dagon. Probably the modern village Qatrah (Warren), 5 miles E. of Yehanah, and called CEDRON later (Mac. 15.30,41.16.9). A town noticed with others in the Shephelah (2Chr. 28.18), apparently Gederah. [c.r.c.-]

Gederotha im (Jos. 15.36). Apparently a note has crept in, as there are 14 cities of the Shephelah without this one. The name in LXX. becomes "folds" or "walls" (παραδεισία) belonging to Gederah, which it follows in the list. [c.r.c.-]

Gedor (1Chr. 8.31,9.37), an ancestor of Saul. It is also the name of three towns. 1. A town of Judah in the Hebron mountains (Jos. 15.58; 1Chr. 4.4), now Jedur, a ruin 4 miles N. of Halil, with which it is noticed. 2. A place in the plains of Simeon, towards Edom (1Chr. 4.39), with a valley (γαώ). It is probably Geder, but the site is unknown. 3. A town of Benjamin (1Chr. 12.7), where the Gederathite (verse 4) probably dwelt. Now the village Jedrach, 6 miles N. of Jerusalem. [c.r.c.-]

Gehazi', the servant (lit. boy) of Elisha, sent as the prophet's messenger on two occasions to the good Shunnammite (2K. 4); obtained her son Benjamine from Naaman; was miraculously smitten with incurable leprosy; and dismissed from the prophet's service (2K. 5). Later, he is mentioned as relating to king Joram all the great things which Elisha had done (2K. 8).

Gehenna, a later name derived from the earlier Heb. of Hinnom (Heb. 13.16), or valley of the son, or of the sons of Hinnom. This place, so called perhaps originally after some ancient hero, is generally identified with the valley to the W. and S. of Jerusalem, beginning from near the Jaffa Gate on the W., running first southwards, then eastwards, and finally on the S. E. of the city joining with the Tyropoeon and Kidron Valleys leading off to the Dead Sea. (Sawce and W. Robertson Smith identify it with the central valley or Tyropoeon, which runs through the middle of the city itself; but see JUDEA.) The boundary between the tribes of Judah and Benjamin was about the Jaffa Gate (2K. 15.18-16). Afterwards the name became of ill omen, from the use to which the valley was put. Solomon introduced into Jerusalem the worship of Molech, and built a high place for that purpose in the "mount that is before Jerusalem" (1K. 11.7; see OLIVES, Mt.). Sacrifices in which human beings were "passed through the fire"—i.e. possibly purged by fire, more probably burned alive—formed a part of this worship. One particular spot in the valley, called ToPheth (Warren says in the lower part of the valley, and near its junction with the other valleys), was especially used for these sacrifices in the reigns of Ahaz and Manasseh (2K. 16.3,5; 16.5; 2Chr. 28.3,33.6; Jer. 7.31,32,35), and Josiah, in order to prevent its being used in this way again, "defiled it" (2K. 23.10). Jeremiah, shortly afterwards, cursed the spot, and predicted that it should be called the "valley of slaughter," and become a burial-place, defiled with dead men's bones (Je. 7.31,19.2-13; probably uttered in the early years of Jehoiakim, in whose reign the human sacrifices were revived; cf. Ezk. 20.31). Mediaeval Jewish scholars assert that the valley was used after this time for depositing the refuse of the city, including the bodies of the friendless or
GELIOTH

criminal dead, and that to get rid of them fires were constantly burning. If this is the fact (it has some probability, though little evidence), it might be the mention of the genealogies of the philosophers who were the genealogers, and burnt to the spot; and whether from this, or from the old association with human sacrifices by fire, Gehenna next appears (not in O.T. or Apoc., though Is.50.11 and 66.24 and Jth.16.17 are probably allusions; cf. 2 Esd.7.36) as the name of the final place of punishment for the wicked in the need of the Jews to seek means by fire and the fire being eternal (Book of Enoch, xxvii. 2, 3). It was distinguished (generally, though not always) from Sheol, the place of the departed both good and bad. This is the sense in which it is invariably used in N.T. by our Lord and the apostles (see also HELL, by which Gehenna is translated in A.V.). See, for literature, under HELL. [S.C.G.]

Gelliott, "over against," the ascent of Adummi (Jos.18.17), answers to Gilgal (15.7). It probably means "rolling" downs, and applies to the hummocks of the Jordan plain (Jos. 22.10-11; A.V. borders; and in He. 3.13, "A.V. coast"). It also applies to the downs of the Philistine plain (Jos.13.2, A.V. borders; Jl.3.4, A.V. coasts). [Galilee.]

Gemall, father of Ammiel, i (Num.13.12).

Gemariah.—1. Son of Shaphan the scribe, and father of Michahiah, 6. He was a noble of Judah, from whose chamber in the house of the Lord Baruch read Jeremiah's alarming prophecy to the people, 606 B.C. He, in vain, begged Jehoiakim not to burn the roll (Je.36).—2. Son of Hilkiah; one of the bearers of Jeremiah's letter to the captive Jews (Je.29.3). [C.R.C.]

Gems. [Precious Stones.]

Genealogies. The key to the interest of the O.T. genealogies is their witness to earnestness in the preservation of "the holy seed" (Is.6.13; Ezr.9.2). Patriotism and religion combined to make the covenant people careful to trace out their descent from Abraham, and Abraham's from Adam. This differentiates the genealogical system of the O.T. from other systems of history, although in both we see the same principle of expressing history through tables of descent. No other nation had the Messianic hope (Gen.3.15); no other nation had its system of land tenure and its dignities of priesthood and kingship so solemnly bound up with family succession (Ex.21.3; Num.36.7; Ex.39).

Accordingly, the care for genealogies is shown right down to the appearance of Messiah (Lu.2.2, 4, 5, 6-9, 10, 11, 14, 15, 20, 23, 25, 26-29, 30, 32, 36-1), and some of the more active rulers and kings marked their reigns by attention to genealogies: e.g. David (1 Chr.24), Hezekiah (1 Chr.9, 10, 2 Chr.31-16-19), Zerubbabel (1 Chr.9.7, Ne.12.22-23). Hence for a right interpretation of Hi. Scripture and a true knowledge of history, it is necessary to know the genealogies of the chief chief houses of the sons of the fathers and Melch of the house of Nathan married the same woman. Heli the son of Melchi having died childless, his uterine brother Jacob,
Matthan's son, took his wife and raised up seed to him, so that the offspring, Joseph, was legally Heli's son as stated by St. Luke, but naturally Jacob and Jeconiah, both by Joseph. (2) But this theory, which quickly gained general acceptance in the Church, and for 12 centuries retained undisputed supremacy, breaks down when we compare the two lists more closely. The genealogy in St. Matthew exhibits the successive heirs of the kingdom, ending with Christ as David's reputed son. It is, therefore, the legal pedigree, exhibiting Joseph as legal successor to the throne. The genealogy in St. Luke is the actual line of descent, exhibiting Joseph's real birth as David's son through Nathan, and thus showing why, on the failure of the direct line, He became heir to Solomon's throne. Had the steps of ancestry coincided with those of the succession, one pedigree only could have in the nature of things be proper; and the 2nd pedigree, tracing Joseph's ancestry through private persons, by the side of one tracing it through kings, is in itself a proof that the latter is not the true stem of birth. (3) Indeed, the very fact that the genealogy itself shows that St. Matthew's cannot be the actual genealogy, for he died childless (J. 22.30), and an heir was found for him in Salathiel or Shealtiel, the son of Neri, who was of the house of Nathan. Salathiel with his heirs became reckoned among the sons of Jeconiah (1 Chr. 3.17), in which Zorobabel, the son of Pedaiah (1 Chr. 3.18,19), appears next to him in the line of throne succession. (4) On comparing the lists from this point it seems probable that Rhesa (Luk. 3.27) is not the son, but the title, of Zorobabel, which has slipped in from the margin, an indication that the pedigree was worked backwards from a simple list of names—Neri, Shealtiel, Zorobabel, Rhesa, Joanan, etc. This correction brings St. Luke into harmony both with St. Matthew and 1 Chr. For the name Joanan is the Gk. equivalent of Heb. Hananiah (1 Chr. 3.19), and St. Luke's Jeda (3.26) is the same as St. Matthew's Abio (1.13 in the Gk.). (5) Abia (1 Chr. 3.24, R.V.). (5) As noted above, the two genealogies coincide in the name of Matthan or Matthew, to whom are assigned two different sons, Jacob and Heloi, but the same grandson or heir, Joseph. The explanation is that as Jacob had no son, Joseph, his brother Heloi's child, became his heir, and the claimant to the throne of David, a position into which Matthan himself had stepped on the failure of the line of Abiad's eldest son in Eleazar (Mat. 1.15), Matthan being descended from Joseph, a younger son of Abiad (Mat. 1.13) or Jeda (Luk. 3.26). (6) It will be noted, however, that St. Matthew has omitted Joanan, and probably other links in the descent, perhaps in order that between Jeconiah and Joseph there should only be the 14 generations to which, as a help to memory, he restricted himself. St. Luke for the same period gives 23 generations. Between David and Jeconiah St. Matthew omits 3 generations—Ahiah, Joash, Amaziah—for the same reason. But both genealogies agree in only giving 3 names between Salmon and David—viz. Boaz, Obed, and Jesse—whereas the period between the entry into Canaan and the birth of David was, according to the received chronology, between 4 and 5 centuries. For the period of almost equal length between Solomon and Jeohanan, St. Luke's genealogy contains 26 generations. (2) But met by accepting the genealogy as correct, and shortening the chronology by reckoning the heroes of the book of Judges to have been much more contemporary than used to be thought. [Chronology.] This expedient brings Israelitish history into harmony with the Egyptian, with the traditional Jewish date of the Exodus, with the fragment of Edomitish history preserved in Gen. 36: 31-39, and with the internal evidence of the Israelitish history itself. The genealogy in St. Luke is not without traces of mystical arrangement, for from Adam to Christ there are, including Cain and Rhesa, 76 generations, to which St. Augustine added, "which was the son of God" (ver. 35), thus making from God to Christ 77, the number typical of forgiveness of all sins in baptism; and it is placed appropriately after the baptism in which Jesus was manifested as Messiah, the heir to David's throne who was to bring the naturalness and worthiness of St. Luke's pedigree as that of the actual lineage of Joseph seems proved by the naturalness of the frequent recurrence of the same names (cf. Lu. 1.61) for if we begin with Nathan, his son Mattathia and 4 others, of whom the last was grandfather to Joseph, then we have these names repeated, the names of Nathan (Matthat twice, Mattathias twice); or if we begin with Joseph, there are no less than 3 of his name between him and Nathan. For the generations between Adam and Abraham the LXX text is followed, which gives the 2nd Cains (3.26), not found in the Heb. In St. Matthew's genealogy the most remarkable feature is the reference to the 4 women—Tamar, Rahab, Ruth, and Bathsheba—who, either as of heathen origin or by personal guilt, would be excluded from fellowship with the Pharisées, as if the evangelist meant to teach that as these were allowed to be in the line of Messiah's birth, so others would be admitted to His kingdom. [C.R.D.B.] Generation, Generations. Two entirely different words in Heb. are represented by these terms in the Eng. O.T. (1) dör. This infers a body of contemporaries (Gk. συγγενεῖς, Gal. 1.14), who grow up together, see the same events, and look at things upon the whole from the same point of view. This tends to produce a moral resemblance. "Whereto shall I liken the men of this generation?" gives the N.T. equivalent of dör in O.T. (2) tophóth (only plur in O.T.) is specially noticeable as a title of 11 out of 12 original sections of Genesis. The first section records the creation of the "heavens and earth," in the sense in which those terms are used in ch. 1 and 2. 13, incl. The following sections give the story of the progeny or "generations" of "the heavens and earth," of Adam, Noah, Noah's sons, Shem, Terah, Ishmael, Isaac, Esau (2), and Jacob. The contents of these sections justify their titles in every case. The same word for "generations" is used in Levi (Ex. 6.16,19), Aaron (Num. 3.1), Pharez (Ru. 4.18), and of the tribes of Israel in Num. 1 and 1 Chronicles. In all cases it has the sense of offspring. [c.n.w.]
GENESIS

Genesis, the first of the five books of the law, or Pentateuch. The Jews designate it br'eshith, "In the beginning," from its opening words. The Gk. translators gave it the appropriate name "Genesis" (origin), because it recounts the origin of the world and man, and the beginnings of things generally. In character, Genesis not only furnishes the necessary introduction to the history of the Exodus and law-giving, and of the events of the wilderness, contained in the books that follow, but forms the introduction to the whole history of revelation. In sublimity and interest, in the depth of its ideas, and in the grandeur of its purpose and principles, no book of antiquity can compare with it.—I. The book opens with the sublime epos of creation (1-2.3). This is followed by the special narrative of the creation of the first human pair, of Eden, of the temptation and fall, and of the earliest promise (2.4-3). The story of Cain and Abel, while it furnishes an account of the beginnings of civilization among the Cainites, and of the descent of mankind along the lines of impiety and pieti respectively, till the growing corruption of the world brings on the catastrophe of the flood (4-6.5). The narrative of this catastrophe leads up to the covenant with Noah and the new distribution of the race (6.9-10). Mankind having again become impious and God-defying (11.1-26), the extinction of true religion is averted by the call of Abraham, and the making of a covenant with him and his posterity (11.17.12.15.17). The line of blessing traced through Seth and Noah, then narrowed to that of the Patriarchs, and finally, on the birth of Isaac, definitely fixed in the line of Abraham, and is further limited in the succeeding history to the descendants of Isaac and of Jacob. Thereafter the book, with brief notices of collateral branches, confines itself to the lives of Abraham, Isaac, and Jacob. It narrates God's relation to these patriarchs, and the singular train of events which led, under Joseph, to Jacob and his household being taken down to Egypt, there to increase, and await the further development of the divine purposes. No book in the Bible presents a greater aspect of well-being and order. The book, and its materials, diversified in themselves, are presented in the framework of a scheme of ten "generations." The order is as follows: 1. "The generations of the heavens and the earth" (2.4-5). This heading might well have stood at the beginning of ch. 1 (in the opinion of some it originally did so), but is actually used to combine closely the stately creation narrative with the narrative of man's formation and trial that follows. 2. "The book of the generations of Adam" (5.6-8). 3. "The generations of Noah" (6.9-9). 4. "The generations and providences of the sons of Jacob" (10.1-11.9). 5. "The generations of Shem" (11.10-26). 6. "The generations of Terah" (11.27-25.11); this long section includes the life of Abraham. 7. "The generations of Ishmael" (25.12-18). 8. The generations of Isaac" (25.19-35); another long section. 9. "The generations of Esau" (36.1-19), and 10. "The generations of Esau in mount Seir" (36.20-37.1); two parts. "The generations of Jacob" (37.2-50); this includes the history of Joseph. These different sections usually begin with a short recapitulatory statement (cf. 5.1, 6.9, 10, etc.).—II. In the modern critical theory of the origin of the book, Genesis is conceived of as composed by successive redactors from three main documents: (a) A picturesquely-written narrative, marked by the predominant use of the name "Jehovah" (hence called J), embodying the traditions of patriarchal times current in Israel in the later days of the monarchy. This is thought to have originated about 950 B.C. The characteristics of the J narrative may be studied in such passages as 2.4-4 (in 2.4,3 the divine names are designedly combined), 11.1-9.12.18.24, etc. (b) A narrative largely parallel to the above, and closely resembling it in style, but marked with the Elohim, or "God" (hence called E). It may have originated about 750 B.C. (Certain critics reverse these dates and relations.) It is preserved only in fragments, and in parts (as in the life of Joseph) is closely interwoven with the other. Examples of it may be seen in ch. 29, (where it is supposed to enter in ch. 31.16-49, 40.14, 50 (mainly). These two narratives are supposed to have been combined into one (JE) a century or two after their appearance. (c) A priestly narrative (P), originally composed, it is assumed, during or after the Exile in Babylon, as introductory to the Levitical legislation, and now furnishing the framework in which the JE narratives in Genesis are set. It also is marked by the use of the name "Elohim," as far as Ex. 6. Its style, in contrast with that of JE, is described as dry, legal, enumerational, statistical, etc. Style and vocabulary can be studied in such sections as 1.2.3.4.7.17.23.26, and in the flood-story, in 6.2.3.7.11.12.19.41.48 (alternating with Jehovistic sections). On the documentary theory generally, see Pentateuch. On the analysis in Genesis, it may be sufficient here to repeat that, while a distinction in character and style between the so-called P sections and the remaining narratives is freely recognized, good reasons can be brought for (1) regarding J and E as separate documents at all; (2) treating either J or E or P as documents that even had a separate existence or independent circulation; and specially (3) holding P to be a production of the age of the Exile. Against these critical opinions, on the other hand, the strongest reasons speak. The similarity, parallel character throughout, and close interrelations of J and E are such that, apart from the difference in the use of the divine names (which, in the few sections in which it occurs, may be otherwise explained), no one would ever have thought of distinguishing them, without complete disintegration of the narratives. The stories of the sacrifice of Isaac (22) and of Jacob at Bethel (28.10-22), e.g., are so split up by the critics between J and E as completely to destroy their unity. Regarding J, the older advocates of the "Sunken Mound theory" (e.g. B受) were assuredly right in arguing that the Jehovistic portions (often
single verses or mere clauses) could never have formed an independent history; while the broken and unequal character of the so-called priestly narrative is a protest against the idea of its ever having separately existed (Graf, the originator of the new theory, held it did not). E.g., 37.2 (P) reads, "These are the generations of Jacob," but there is not a word more from P till we reach 41.46: "Joseph was thirty years old when he stood before Pharaoh." The two elements, J and P, are throughout inseparably conjoined. P alone, e.g., records the ages and deaths of the patriarchs. Since the discovery of the Babylonian narrative of the Deluge, the matter can be brought to a yet nearer test. The stronghold of the disintegrationists has been the composite character of the narrative of the Flood (6-8). But it is now ascertained beyond dispute that it needs the narratives of both J and P to yield the complete parallel to the cuneiform version. E.g. P gives the measurements of the ark, but lacks the sending out of the birds; J has the birds, and also the sacrifice of Noah, which P wants. The baselessness of the theory of the post-Exilian origin of P is elsewhere shown [Paxton], but there are still no special indications of early character in Genesis. E.g., the fourth commandment (Ex.20.11,31.17) is based on the sabbath rest of God in Gen.2.1-3; Deut.4.32 unmistakably refers back to Gen.1.27. Such phrases as "to their seed after them" (Deut.1.8,4.37,10.15) and "that he may be to them a sign" (Deut.29.13); "the characteristically Elohistic.—III. The above considerations have a direct bearing on the immemorial traditional belief in the Mosaic authorship of Genesis. The book taken by itself, still more in its connexion with the Pentateuch as a whole, can only have originated in a creative age such as that of the Exodus; and no man can be thought of so suitable as Moses—versed in the culture of Egypt, deeply interested in the traditions of his people, and leader and lawgiver of his nation—to have planned and skillfully laid the foundations of the work. The facts that even the most cursory reading will detect—first, that different hands co-operated in the literary execution, and that the book was only gradually brought into its present shape, do not detract from its essentially Mosaic character. The few passages which are thought to indicate a later date are very indecisive, and at most point to a revision not later than the days of the judges or early kings. Such are: (a) "The Canaanite was then in the land" (Gen.12.6,13.7). No Israelite in the days of the later kingdom needed to be informed that the Canaanites had not been expelled when Abraham entered the country. The passage naturally means that the Canaanites (recent immigrants) were already in the land. (b) "Before they reigned any king over the children of Israel" (36.31). This may be a gloss, but the kings were in view for Israel even in the Mosaic age (Gen.17.6,18,35.11; Deut.17.14-20). The list of kings in Edom, moreover (Gen.36.39), and Hadoram (1 Chron.4.10), apparently a person still living, points to a date much earlier than the time of Saul. (c) Mention of "Hebron" and "Dan" (13.18,14.14). This is thought to imply an anachronism (cf. Jos.14.15,16.13; Judg.18.29). But "Hebron" (the Canaanitish " Kirjath-arba") was probably a genuine patriarchal name, and "Dan" may have been "Dan-jaaan" (2Sam.24.6); probably, however, the latter word is a substitution for the earlier name "Laish." (d) "Land of the Hebrews" (Gen.40.15). The phrase is not necessarily posterior to the conquest. Abraham is already in 14.13 "Abram the Hebrew," and his descendants had in Joseph's time been a couple of centuries in the land. Alleged repetitions, contradictions, and duplications of incidents are equally unsatisfactory as proofs of non-historicity and later authorship. The story of the Flood is remarked on above. Hagar's "two flights" (16.21)—the latter really an expansion—are on the face of them quite distinct incidents: one before Ishmael was born, the other when he was a grown boy. Abraham's two denials of his wife (12.20) were the result of a settled policy—"at every place whither we shall come" (20.13), and Isaac weakly followed his father's example (38). There is a direct reference in 28.1 to 12.10, showing the narrator's knowledge of the Old Testament patriarchs. The visit to Bethel (35.9-15) is abundantly led up to by divine command (31.13,35.1,3), with presupposition of the first visit (35.9). So of other instances. The conspicuous element in the narrative is its unity. Many internal marks attest the historical character of the narrative, its connexion with the folklore of other peoples—their simplicity, fidelity to patriarchal conditions, depth and purposefulness, and place in the organism of revelation. But recent years have brought, in the results of archaeological investigation, startling new proofs of the antiquity and trustworthiness of the contents of the book. It is now known—e.g. from Babylonian discovery—that the early parts of Genesis do contain, as has always been believed, the oldest traditions of our race (Creation, Flood, etc.), though in a far purer form than heathen nations possessed them; that the distortions of the tradition were by Babylonian (11): that Babylon was older than Nineveh, and that the founders of Babylonian civilization were non-Semitic (10.8,10.11); that the historical relations in the time of Chedorlaomer (Elamite dynasty, alliances with Argoth, Anaraphel = Hammurabi, etc.) are accurately portrayed (14); that such an incident as Sarah giving her maid to Abraham, and afterwards dismissing her (18.21), is in precise correspondence with the customs and laws of the time (Code of Hammurabi); that the pictures of Egyptian life in Joseph's history are minutely correct, even in the points in which they were most assailed, etc. Such corroborations increase in number every year with the further advance of knowledge. Science, too, brings its confirmations to the Biblical story, as in the accumulating evidences of a great deluge submerging the world of earliest man. On the other hand, the relations of Genesis (Gen.11) to the sciences (astronomy, geology, etc.) are better understood, and people are more chary of seeking in these primitive pages anticipations of twentieth-century scientific discoveries, or

(Pulpit Comm.); Wright, Scientific Confirmations of O.T. Hist. See also Pentateuch. [j.o.]

**Gennesaret, Water of** (1Mac.11.67).

**Gennesaret** (rendered "Garden of kings," or "of luxuriance"; see Chinnereth), a region on N.W. shore of the sea, or lake, which is called that of Galilee, and of Tiberias (Jn.21.1), as well as of Gennesaret, or of Genneses (Josephus, 13 Ant. v. 7, 3 Wars x. 7). The "land of Gennesaret" (Mt.14.34; Mk.6.53) was a small plain, now called el Ghweir (the little hollow), on the shores of which Capernaum stood. Josephus speaks of its fertility (3 Wars x. 8) and of its fountain Caparnaum, probably the 'Ain el Madawerah, or "round spring," which still has in it the Coracinus fish which he mentions. It makes him about 3½ miles by 2½ miles, the actual measurements being 3 miles along the coast, from near Magdala, and 2 miles extreme breadth N.W. Its fruits are noticed in the Talmud (Tal. Bab. Pesakhim 8b). The sea of Gennesaret is a fresh-water lake, full of fish, measuring 13 miles from where the feet above the water. On the S.W. the cliffs and slopes—equally steep—rise 1,400 feet. On N.W. the spurs of Upper Galilee fall towards the lake, and are about 700 feet above the water. They consist of very rugged limestone and basalt. The scenery, with cliffs mirrored in the waters and a flat plateau above the E. slopes, is bare and treeless—in contrast with the luxuriance of the little plain of Gennesaret. The lake is subject to sudden squalls from the W. gorges, especially in spring (Mt.14.24; Mk.6.48; Jn.6.18). See Mt. 4.18; Mk.7.31; Lu.5.1. The lake is now called Bahr Tiberiyah, "sea of Tiberias." [c.r.c.]

**Gennesus, father of Apollonius** (2Mac.12.2).

**Gentiles**, the term applied in O.T. to all nations outside the chosen people. The same Heb. word gehôm is also variously rendered "nations" and "heathen" in E.V. For the various phases in the attitude of Israel towards the Gentiles, see Heathen. In N.T. the usual antithesis is between Jews and Gentiles (ήθνος), where the latter term still covers all who are not of the Hebrew race. Sometimes, however, the contrast is between Jews and Greeks ('Eλλάντες), where the term chosen (not Παγανί) is significant of the extent to which Gr. influence had permeated the E. (e.g. Ro.2.9); the "Greeks" being taken as typical of non-Jewish culture. Further, as was natural, the Christian point of view introduced a new use of the term; the name "Gentile" (ήθνος) being sometimes found in contrast not merely with Jews but with Christians (e.g. 1Cor.5.1). In such passages it is the equivalent of "heathen" in the sense in which a Christian, not a Jew, would use the word.

[G.C.V.D.]

**Genubath**, son of Hadad, an Edomite of royal race, by an Egyptian princess, sister of Tahpenes, the queen of the Pharaoh who governed Egypt when Moses was born (Ex.1.7-22). According to 1Chr. 8.37 he was son of Bela; but the text here is very confusing, and the three Geras may be reduced to two. Gera, who is named (Judg.3.15) as the ancestor of Ehud, was the father or ancestor of Shimeel (2Sam.16.5). [R.B.G.]

**Gerah.** [Weights and Measures.]

**Gerar** (Gen.10.19,20; 11.2,26.6,17,18,20,26; 2Chr.14.13,14), a royal Philistine city near Gaza, with a valley in which wells were dug by Abraham and Isaac. Now the ruin Unn Jerrdär, 7 miles S. of Gaza, on E. bank of the great boundary valley running from Beer-sheba. Water is still obtained by digging shallow pits in the valley bed. Some rubble cisterns exist in ruins on the mound (Surv. W. Pal. iii. p. 389). [C.r.c.]

**Gerasa.** a city in N. Gilead, first noticed c. 85 B.C. (1 Wars iv. 8); now Jerash, a ruined Roman city of 2nd cent. A.D., with remains of temples, theatres, and a later church of 4th or 5th cent. A.D. [Gergesenes.] [C.R.C.]

**Gergesenes** (A.V., Mt.8.28), inhabitants of a place E. of the sea of Galilee, apparently in Decapolis (Mt.5.20). Origen states that most MSS. in his time read
Gergesites, the

Gerasenes, and some Gadarenes. The various readings may be best seen tabulated.

The Onomasticon speaks of a village on a hill, by the sea of Tiberias, which Eusebius and Jerome alike call Gergesa. It is probable, however, that the real name was Gerasa, represented by the ruin Qersa (pronounced by Arabs Gersa) opposite Tiberias, near the shore of the lake. This has no connexion with the city Gerasa; but it might be described as in the region of Gadara, the capital of Peraea, and one of the cities of Decapolis. A steep slope falls from the plain to the lake at Qersa. [c.r.c.]

**Ger'gesites, The** (Jth.5.16) = GIGASHITES.

**Gerizim** (probably Arab. jaraz, "bare,” meaning “barren places”); Garizim in 2Mac. 5.23,6.2, the sacred mountain of the Samaritans, immediately S. of Shechem, with Ebal to its N. These two mountains were "over Jordan westwards, the way of sunset, in the land of the Canaanites who inhabit the 'Arabah opposite Gilgal, beside the oaks [A.V. plains] of Moreh" (Deut.11.29). Jerome (Onomasticon, "Golgol" and "Gebal") denies that they were at Shechem, placing them near Gilgal; but Josephus admits the site at Shechem (4 Ant. viii. 44), which is clearly intended in Judges (9.7). The blessings were said on Gerizim, and the curses on Ebal (Deut.27.12); and the Samaritans claim that Joshua's altar (Jos.8.30-35) was on Gerizim, which they read for Ebal in Deut.27.4. On the summit of Gerizim they show a flat rock, with a cup-hollow in it and a cistern beside it, as the site where Joshua erected the tabernacle. On the N.W. slope, at Lizekh [Luz], which they suppose to be Bethel, they celebrate the Passover. Gilgal they place at Jilejil, a ruin 2 miles E. of the mountain. The 'Amad shrine, at the N. foot, is the site of Joshua's stone (Jos.24.26), and he is buried to the S. of the mountain. [TIMNATH-HERES.] The sons of Aaron are buried on the S.E. [Gibeah of Phinehas], and Joseph on the N. The temple built before 330 B.C. (Josephus, Ant. 2.6.7; 13 Ant. ix. 1) and destroyed by John Hyrcanus c. 129 B.C. (1 Wars ii. 6), was not standing in the time of our Lord (Jn.4.20). The mountain is extremely rocky and barren, rising 2,850 ft. above the sea, and command- ing extensive views E., W., and S. The ruins include those of an octagonal church built by the emperor Zeno c. 474 A.D., and of the surrounding fortress erected by Justinian c. 530 A.D., with a large reservoir. Its foundation stones are supposed to have been taken from Gilgal, according to the Samaritans, who believe that Abraham offered Isaac on the mountain top. [Moriah.] For details see Survey W. Pal. ii. pp. 148-149, 188-190. [c.r.c.]

**Gershon**

The (2Mac.13.24) only. From the nature of the case the Gershonites must have been S. of P'olenais. Grotius seems to have been the first to suggest the town Gerrhon (the wall). [Suir.] Ewald conjectures that the inhabitants of the ancient city of Gerar are meant.

**Gershom** [Jer.], the first-born son of Moses and Zipperah. The name is explained (Ex.2.22,18.3) as = "a stranger there," Moses being a foreigner in Midian—"For he said, I have been a stranger [gō'èr] in a foreign land." As a Heb. word, its meaning is "expulsion." The circumcision of Gershom is probably related in Ex.4.25.—2. The form under which Gershon, the eldest son of Levi, appears in 1Chr.6.16ff. 15.7.—3. The representative of the priestly family of Phinehas, among those who accompanied Ezra from Babylon (Ezr.8.2).

**Gershom**, the eldest of the three sons of Levi, born before the descent of Jacob's family into Egypt (Gen.46.11; Ex.6.16). But the
families of Gershon were outstanding in fame by their younger brethren of Kohath, from whom sprang Moses and the priestly line of Aaron. At the census in the wilderness of Sinai, the number of males of Gershon was 7,500 (Num. 3:22), midway between the Kohathites and the Merarites. The sons of Gershon had charge of the fabrics of the tabernacle—the coverings, curtains, hangings, and cords (Num. 3:25, 26, 4:25, 26). For the transport of these they had two covered wagons and four oxen (7:3, 7). In the encampment their station was behind the tabernacle, on the W. side (Num. 3:23). Thirteen of the Levitical cities fell to the lot of the Gershonites: two in Manasseh beyond Jordan, four in Issachar, four in Asher, and three in Naphtali. In the time of David (according to the Chronicler) the temple music was entrusted to the Ger-

shonite family of Asaph, the Kohathite family of Heman, and the Merarite family of Ethan or Jeduthun (1 Chr. 6:31-47, 25:1-7). At the cleansing of the temple, in the days of Hezekiah, Gershonites are named with other Levites (2 Chr. 29:12, 13), and at Josiah's national Purification they were included in the Levitical order (2 Chr. 35:15). Asaphites to the number of 128 (Ezr. 2:41; or 148, Neh. 7:44) returned from exile with Zerubbabel; and at the laying of the foundation of the temple Asaphites led the service of praise (Ezr. 3:10, 11).

Gershonites, The, the descendants of Gershon, son of Levi (Num. 3:31, etc.; Jos. 21:3-3; 1 Chr. 23:7; 2 Chr. 29:12). In the sing. it occurs in 1 Chr. 26:21 (of Laadan), 29:5 (of Jechiel).

Ger son (1 Esd. 8:29) = Gershon, 3.

Ger zites, The, a tribe noticed with the Gersites and the Amalekites (1 Sam. 27:8; see A.V. marg. and R.V.). The reading Gezrites (A.V.) appears improbable, as Gezer was N. of Gath. [c.r.c.]

Gesem, Land of (Jth. 1:9) = Gooseh.

Gesh aham (properly Geshaam, R.V.), as a son of Jahada in the genealogy of Judah and family of Caleb (1 Chr. 2:47).

Geshur (N.T. Gezer), a place in the land of the Sabines (Ne. 2:10, 16, 12, 6). The name of an Arab enemy of the Jews.

Geshur (probably Arab. esher, "hard and rough"). Two regions are so named.—1. Near Argob, Maacah, and Bashan (Deut. 3:14; Jos. 12:5, 13:13), a kingdom of Aram in David's time (2 Sam. 3:13, 37, 38, 14:23, 32, 15:3; 1 Chr. 2:23). This is probably the Gerizim region. [Itur. IV. 12. 1. 4. 2.] The land of the Gershurites (1 Sam. 27:8) or Geshurites (Jos. 13:2), near Philistia and the district of the Amalekites, who dwelt S. of Beer-sheba, in the direction of Smor. It was not far from the "south (negheḇ) of Judah" (1 Sam. 27:10), and near the Gezrites (Gerizites), or inhabitants of a "boundary region" (Gen. 15:19). [c.r.c.]

Geshuri and Geshurites.—1. The inhabitants of Geshur (Deut. 3:14; Jos. 12:5, 13, 11).—2. An ancient tribe which dwelt in the desert S. of Philistia (Jos. 13:2; 1 Sam. 27:8).

Gethsemane (oil-press), a place mentioned by name in Mt. 26:36, Mk. 14:32 only. It was apparently on the mount of Olives, which our Lord was wont to visit (L. 22:39; Jn. 8:1), and was a garden beyond the brook Kidron (or Cedron, Jn. 18:1). It may have been near Bethany. It was the foot of Olivet in 4th cent. A.D. (Onomasticon), probably at the old Gk. site by the "Grotto of the Agony," immediately N. of the road from Bethany, and adjoining the church of the Virgin's tomb—built c. 1100 A.D. on the ruins of the former chapel, and containing the tomb of queen Melissa, who died in 1161 A.D. The grotto on its E. appears to have been a cistern: its rock roof was painted in fresco in the Middle Ages. The Franciscans in 1847 enclosed as the site a group of olives S. of the road. This is now a garden, with modern walls (S. W. Pal., Jerusalem vol., pp. 409-410). [Jesus Christ.] [Cr.]

Geuel, the Gadite spy, son of Machi (Num. 13:13).

Ge zer (cut off), an isolated hill (Gazer, 2 Sam. 5:25; 1 Chr. 14:16, R.V. Gezer), a royal city of Canaanites, whose king Horam came to aid Japhia of Lachish against Joshua (Jos. 10: 33, 12:2). It marked the oriental boundary of Joseph (16:22) and the Levites (1 Chr. 7:28), and was given to the Levites (Jos. 21:21; 1 Chr. 6:67), but the Canaanites still dwelt in it as tributaries (Judg. 1:29). In 1 Chr. 20:4 it stands for Gob (2 Sam. 21:15). It marked the Philistine border in Samuel's time (2 Sam. 5:25; 1 Chr. 7:28), and was not taken by David, but burnt by Pharaoh who gave it, as his daughter's dowry, to Solomon, who rebuilt it (1 K. 9:15-17). As Gasa, it is said to have been fortified by Jonathan the Hasmonean c. 160 B.C. (1 Mac. 9:52); and Simon his brother made his son John Hyrcanus its ruler in 143 B.C., whereby he escaped the massacre of his father and brothers in 135 B.C. (1 Mac. 13:5, 14:7, 17, 19, 23, 35, 16:1, 19, 27; 2 Mac. 10, 32). It was known to Eusebius as 4 miles N. (actually N.W.) of Emmaus ('Amwās), and is now a strong site, on a hill 250 ft. above the plain, 20 miles W.N.W. of Jerusalem, still called Tell Jezer (Clermont-Ganneau). It was attacked by Baladan in 1177 b.c. and Pharaoh who gave it, as his daughter's dowry, to the Egyptians in 1252 A.D. It appears to be the Kirz of the list of Thothimes III. (No. 104) in 16th cent. B.C. The Amarna tablets include four letters from Milkiu, king of Gezer in 15th cent. B.C. (Berlin 108, 109, Brit. Mus. 62, 63); whence it appears that he was suspected by the Pharaoh, after defeat by the rebels of Ajalon and Zorah (Berlin 137), and replaced by a certain Yapa'a ('Japhia), who was more loyal, and who wrote three letters from Gezer (Brit. Mus. 49-51). The city gave tribute to the 'Abiri (Berlin 103). Probably Gezer was made subject to Lachish, where Japhia ruled (Jos. 10: 13), and which the 'Abiri attacked (Berlin 104). The site of this strong fortress (see Surw. W. Pal. ii. pp. 417, 428-439) is partly occupied by the little village of Abu Shishah. Wine-presses and Christian rock-cut tombs occur on the rocky hill, where M. Clermont-Ganneau found two inscriptions, cut on flat rocks, in Gk. and in square Heb. and Phoen. The Heb. in each case is Tahum Gezer, "limit of Gezer," and the Gk. is Alklos—the name of a person buried near Lydda. The recent exca-

vations at Gezer, by Mr. R. A. S. Macalister,
have disclosed remains of Canaanite origin, perhaps as old, in the lower strata, as 2000 B.C. (including seal cylinders, small idols, and pottery), with Egyptian scarabs—some believed to be child of the dynasty. While the N.E. a row of huge monumental stones was unearthed, as at Tell es-Sâfi [GATH], resembling those still standing on the surface in Moab (Surv. E. Pal. p. 187). Such a group (of three stones) is represented on a Phoenician stela from Lilibaum, on W. coast of Sicily (Corpus Inscriptionum S. It. Sal. No. 135), that a worshipper before it. These sacred stones at Gezer stand on a pavement, under which was found buried a brick of pure gold worth £100. The Gezer ruins are of all ages, down to the Byzantine period and perhaps later. The town was rebuilt several times, and walled in the Gk. and in earlier ages.

Two cuneiform tablets, each dated in a year corresponding to 649 B.C., with Heb. names, proving trade relations with the Assyrians in the reign of Assur-bani-pal. He found also skeletons of babies, encased in pottery urns, which seem to have been baked afterwards, as the bones are charred. Such remains are as yet abundant at Gezer, and it is suggested that the infants were so offered to Molech. Similar vases, with burnt human remains, were, however, found in 1871 by Col. Ross at Susa (SHUSHAN). E. of the Tigris, and the charring was perhaps merely due to the baking of the vase after the remains had been burnt or incinerated.

Macalister’s latest discoveries (1908) include interesting tombs of women, with zodiacal signs and Egyptian scarabs.

**Gezrites. [Gezrites.]**

**Ghost, Holy.** [SPIRIT, HOLY.]

Giah, a place named only in 2 Sam. 24, to designate the position of the hill Ammah. The word means "burning forth." [GHOST], probably a spring. [AMMAH].

**Giants.** [G. R.C.]

Allusions to giant races of men occur very frequently (chiefly under three different names) in Holy Scripture. (1) *nephilim.* The first reference is under this name in Gen. 6:4. The Nephilim were in the earth in those days, after the sons of God came in unto the daughters of men, and they bare children to them, the same were mighty men [Heb. gibborim] which were of old, the men of renown. From this passage it has been inferred that the Nephilim represent beings similar to the Gk. and Rom. demigods, but see Sons of God. In spite of the many difficulties of this passage, it seems best to identify the Nephilim not (as some have supposed) with the "sons of God," but with their offspring. The Nephilim are again alluded to in Num. 13:33. "And there we saw the Nephilim, the sons of Anak, which come of the Nephilim; and we were in our own sight as grasshoppers, and so we were in their sight." Here the spies are induced by their terror to exaggerate the stature of the Anakim whom they encountered, until they compared them actually with the Nephilim of earlier Biblical history. The "sons of God" have been variously explained as "men of renown," "men of renown with great gifts," "Cainites," "Setites," "worshippers of false gods," "devils," "angels." (2) *ânâqîm.* The "sons of Anak" were a gigantic race of men dwelling in and around Hebron. Reference to them is found in Num. 13:22, cf. 33; Deut. 1:28, 2:10 ff., 9:2; Josh. 11:21; 15:13 f.; Judg. 1:20. A comparison of these passages suggests that Anak is much the name of a person as of the race; while Arba is apparently the name of the individual from whom their origin was commonly derived (Jos. 14:15, 15:13). The Anakim were akin to the Amorites and Perizzites. They seem to have been a formidable race of fighters, although somewhat dull in intellect. It was this warlike appearance of the tribe that so terrified the Israelite spies (Num. 13:33). In the wars that followed the death of Moses, they were driven out by Joshua, with the exception of a few who found refuge in the Philistine cities of Ashdod, Gath, and Gaza (Josh. 11:21, 22). Possibly the stature of Goliath may be due to the surviving stock of the sons of Anak among the Philistines. (3) *râ'phâ'îm.* The earliest mention of this class of giants is in Gen. 14:5, where it is stated that Chedorlaomer and his confederates "smote Rehaim." Originally, as it would seem, the name of a district (the vale of Rehaim, near Jerusalem), the word (like the name of the race) was given to the men of renown of the region. They are mentioned again in Gen. 15:20, Deut. 2:10, 20; and the survivors of the stock are represented in G6, the gigantic king of Bashan (Deut. 3:11; Josh. 12:4, 13:12, 17, 15). Like the Anakim, to whom they were probably akin, they found refuge with the Philistines, who in their turn are described as "Gibborim (mighty men) have been in this article identified with the Nephilim (Gen. 14:5; see above). The Erim (Heb. haughty men), occupying the country held later by the Moabites, and the Zuzim (14:5), who occupied the town of Hamath, between Arnon and the Jabob, were probably simply divisions of the Rehaim. [EMMIS; ZUZIM.]

**Gibbar.** Bene-Gibbar, to the number of 95, returned with Zerubbabel from Babylon (Ezr. 2:29).

**Gibbaton,** a town of Dan (Jos. 19:44), given with its "suburbs" to the Kohathite Levites (21:23). It was near Philistia (1 K. 15, 27, 16:15, 17), probably at the present village Qibbiheh, 6 miles E. of Lydda. [G. R.C.]

**Gibea.** Sheva, "the father of Machbeah," and "father of Gibea," is mentioned with the names unmistakably those of places and not persons among the descendants of Judah (1 Chr. 2:49). Probably the word is a later spelling for Gibeah, 1, of Judah.

**Gibeon** (hill).—1. A town in the mountains of Judah, now Jef'a, a village 11 miles S.W. of Jerusalem, and 2 miles S.E. of Timnah (Tibna), with which it is noticed (Jos. 15:57); probably Geba (2 Sam. 5:25).—2. Gibeon of Benjamin, near Ramah (Judg. 19:12, 13, 16), where the Benjamites were exterminated (20:4-43). It had a cave (ver. 33; Heb. geba), and two roads led (ver. 31), one to Bethel (see R.V.), and one to Gibeah "by the road." [A. V. field]. These notices clearly refer to Jef'a [Geba], and to the Sahel Jef'a, or "plain of Geba"—a small plateau to S.E. of the knoll on which the village stands. Geba was a priests' city (Jos. 21:17), which was why
The levee on this occasion sought lodging at it (cf. EzEL); and Gibeath of Elomim, Saul's house, was inhabited by a band of prophets (1 Sam. 10:5, 10). It came to be known as Gibeath of Saul (10:26; 11:4, 23; 19; 28:1), as well as Kelem (Ahab the Gibeath of Benjimn (13:19)) and was close to Ramah (22:6). The word, however, sometimes applies to the district round the town. Thus Saul abode "in the end of Gibeath, under a pomegranate in Micron" ("the precipice," 14:2), his watchmen being in the city (ver. 16); and again, at Gibeath-Phalgal a band of Benjaminites were at war (22:8), also as in Is. 10:29, where Gibeath and Gebim occur together with Ramah and Michmash. The Philistine "post" was here smitten by Jonathan (1 Sam. 13:3), and is noticed in Gibeath earlier (10:5). See also 1 Sam. 15:34; 2 Sam. 21:6, 23:29; 1 Chr. 11:31; 2 Chr. 13:3; Ho. 5:8 (coupled with Ramah), 9:6, 10:9. Josephus and the rabbis give Gibeah close to Megiddo to 3 Wars ii. 2). [Bozetz.]

Gibeath of Phinehas' (Jos. 24:33; A. V. hill; cf. R. V. marg.), a place in a mount Ephraim where Elazar son of Aaron was buried. The Samaritan Chronicle (Neubauer, Journal Asiatique, Dec. 1869, p. 456) places this tomb at Kefta. Another place often mentioned in Samaritan literature. (See Surv. W. Pal. ii. pp. 219, 288, 303-305, "Special Papers," p. 227.) These tombs of Eleazar, Phinehas, Abishuah, and Ithamar are still shown at "Awetanah, a village E. of Gerizim, and 4 miles S. of Shechem, within the border of Ephraim. [C. R. C.]

Gibeath-eath, the, i.e. the native of Gibeath; applied to Shemaiah (1 Chr. 12:3). Gideon', a royal Hivite city allied to Chephirah, Beeroth, and Kirjath-jearim (Jos. 17:10, 12, 11:19), noticed with Ramah and Beeroth (18:25) as given to Benjamin. Joshua, in the plain between Makkedah and Ajalon (10:12), commands the sun to be dumb (or " dark") as it rises behind Gideon. Gideon was a city of priests (21:17), to whom the deceitful Hivites were made slaves (9:25). It had a great spring in a cave called Jib, the recognized site, 6 miles N.W. of Jerusalem (2 Sam. 2:13, 16). The occasion on which "saw the Gibeonites" (2 Sam. 21:1-9) is not recorded, unless the reference is to Non, a priestly city where the tabernacle was in Saul's time (1 Sam. 21:1-9), and where the priests were slain by him (22:13). From Near Gibeah, a place often mentioned in the text (noticed with Kirjath); probably the ruin Jev' a, 2 m. S. W. of Quriel el' Anab. [C. R. C.]

Gideon, the, i.e. the native of Gibeath; applied to Shemaiah (1 Chr. 12:3). Gideon', a royal Hivite city allied to Chephirah, Beeroth, and Kirjath-jearim (Jos. 17:10, 12, 11:19), noticed with Ramah and Beeroth (18:25) as given to Benjamin. Joshua, in the plain between Makkedah and Ajalon (10:12), commands the sun to be dumb (or " dark") as it rises behind Gideon. Gideon was a city of priests (21:17), to whom the deceitful Hivites were made slaves (9:25). It had a great spring in a cave called Jib, the recognized site, 6 miles N.W. of Jerusalem (2 Sam. 2:13, 16). The occasion on which "saw the Gibeonites" (2 Sam. 21:1-9) is not recorded, unless the reference is to Non, a priestly city where the tabernacle was in Saul's time (1 Sam. 21:1-9), and where the priests were slain by him (22:13). From Near Gibeah, a place often mentioned in the text (noticed with Kirjath); probably the ruin Jev' a, 2 m. S. W. of Quriel el' Anab. [C. R. C.]

Gideon, the, i.e. the native of Gibeath; applied to Shemaiah (1 Chr. 12:3). Gideon', a royal Hivite city allied to Chephirah, Beeroth, and Kirjath-jearim (Jos. 17:10, 12, 11:19), noticed with Ramah and Beeroth (18:25) as given to Benjamin. Joshua, in the plain between Makkedah and Ajalon (10:12), commands the sun to be dumb (or " dark") as it rises behind Gideon. Gideon was a city of priests (21:17), to whom the deceitful Hivites were made slaves (9:25). It had a great spring in a cave called Jib, the recognized site, 6 miles N.W. of Jerusalem (2 Sam. 2:13, 16). The occasion on which "saw the Gibeonites" (2 Sam. 21:1-9) is not recorded, unless the reference is to Non, a priestly city where the tabernacle was in Saul's time (1 Sam. 21:1-9), and where the priests were slain by him (22:13). From Near Gibeah, a place often mentioned in the text (noticed with Kirjath); probably the ruin Jev' a, 2 m. S. W. of Quriel el' Anab. [C. R. C.]

The house of Phinehas—The house of Gideon. (a) A theophany beneath the terebinth, attested by the fire that consumes the offering, is Gideon's commission. (b) A dream, in the first revelation and appearance of God. (c) The second He called on Gideon to acknowledge Him" (Keil). (d) Gideon destroys the altar of Baal, with its idolatrous Asherah. (Note 6:25, R.V. marg. Apparently there were two bullocks, and the one sacrificed probably belonged to Gideon [Bertheau]. Moore says, "text corrupt," and translates seeqed—" fat.") (e) Gideon's life saved by the wit of Joash. (f) In popular outbreaks, procrastination means security" (Farrar). W. R. Smith (Relig. of Sem. 163) translates 6:31, "The man who strives with Baal dies before the morning." See his comment. (g) The Spirit of the Lord (cf. 3:10) comes on Gideon. He raises Manasseh, Asher, Zebulun, and Naphtali, but not Issachar, which was probably too down-trodden. (h) Note that it is when full of enthusiasm, inspired by God, that he tries the Spirit by asking two signs. The first was not conclusive, for wool attracts dew. For the spiritual significance, see St. John’s De Espir. Sanct. ii. 7. (i) The Preparation of the Army at the well Harod. (See G. A. Smith,
HIST. GEOG. p. 368.) Gideon commands those afraid to depart; 22,000 do so. (The words "depart from mount Gilead" were probably proverbial in the tribe of Manassese, but "depart" in Heb. is a hapax legomenon of uncertain meaning.) He takes 10,000 to the stream, and all but 300 are rejected for not lapping water. The text is here difficult; but if the stream was the front of their position, and the margins were covered with reeds and bushes, circumspection was necessary against surprise. 15 (R.V. marg.) explains the number of horns.

—Gideon's Reconnaissance, 7.9-14. He over-hears the Midianite's dream, and regards it as an omen (bath-pōl); cf. i Sam.14.9.10. The tent is everything to a nomad, the barley-cake represents the husbandman. "We are probably to imagine a round, flat, hard-baked ash-cake trundling through the camp till it strikes the tent, and turns it upside down" (Moore).—The Attack. While the watch is being changed, the three companies take up their position unnoticed. They shatter their pitchers, display their torches, and blow on their horns. Critics object that the torches hid in pitchers required two hands. The horns, however, may well have been slung at their backs until wanted. The host fled down Jezreel to Beth-shittah, to Zererah (Judg.7.22; cf. 2 Chr.4.17), unto the lip of Abel-meholah. Naftali, and Manassethali, joined the pursuit. 7.23 is not inconsistent with 8.35. The dismissed forces were not far distant. Those afraid to attack were ready to pursue and spoil. The Midianites divided at Jordan. Zebah and Zalmunna apparently crossed near Beth-shan. Zeben and Zeeb fled down the Ghor, to be intercepted by Ephraim at Beth-barah. Ephraim's expostulation probably took place the other side of Jordan, but before the second victory. It is absurd to argue that the narrative is contradicted from Gideon's diplomatic words, minimizing his action. It is also quite madmissible to argue that 8.4-21 refers to another event. The counselor is obviously here using another authority. Succoth and Peniel refused succour, and were put to the ban. Zebah and Zalmunna fled S.E., and reached Karkor. Gideon outflanked them, and surprised them once again by attacking them from the rear in a secure position. On his return he "taught" Succoth and Peniel by barbarous punishments, and slew the kings Zebah and Zalmunna.—Subsequent Life. Kingship was offered to him and his family, and refused. Gideon was anxious that Jehovah alone should rule; but out of the spoil he created an ephod, apparently expecting divine guidance by means of it. This act was obiomatical; but Shiloh was in Ephraim, and perhaps a decayed sanctuary. Gideon could argue that God had entered into direct communication with himself, and that Ophrah had been consecrated by a theophany. (See Ermon; Robertson, Early Rel. of Isr. 231; Oehler, Thol. of O.T. ii. 134.) That Gideon had many wives and 70 sons is evidence of his wealth and power. He died at a good old age, and was buried in the tomb of Joash, his father. [MIDIANITES.]

GIFT. The giving and receiving of presents is a formal and significant proceeding among Orientals; and a proof of the important part which presents play in their social life may be found in the fact that there are 15 expressions in Heb. for the one idea. Many of these have specific meanings. E.g. mishā applies to a present from an inferior to a superior, as from subjects to a king (Judg.3.15; 1 K.10.25); hence it is used technically for the "meal-offering" (Ezek.46.20, etc.). mas'ah expresses conversely a present from a superior to an inferior—e.g. Esth.2.18, skhākat is a gift or bribe for the purpose of escaping punishment, presented either to a judge (Ezek.23.8, etc.) or a conqueror (2 K.16.8). Again, the term "gift" is frequently used for "tribute" or "fee"; and hence the expression "to bring presents" = to own submission (Is.66.29; 76.11; 18.7). Friends bring presents to friends on any joyful occasion (Esth.9.10,22); those who asked information or advice to those who gave it (2 K.8.8); the needy to the wealthy from whom assistance was expected (Gen.43.11; 2 K.15.19, etc.). On the occasion of a MARRIAGE, the bridegroom not only paid the parents for his bride (A.V. dowry), but also gave the bride certain presents (Gen.34.12; cf. 24.22). The nature of the presents was as various as the occasions. Frequent gifts were (and still are) demanded as a right; and in sending presents to others, a quid pro quo was generally expected in return. In N.T. δώρον and δώρα = "material," and δώρα "spiritual gifts." On ἵππος see CHURCH; and see CORBAN for M.
GIHON

GILGAL

15:5; Mk.7.11. Trumbull, Studies in Oriental Social Life.

Gihon (gushing).—1. The name of a river (Gen.2:13) watering Cush, and rising near the springs of the Euphrates. The Babylonians called Cappadocia Kussu (i.e. "sunset" or the West) and the river intended may be the Habilan, otherwise the Tigris. see N.W. and S.W. respectively from E. Cappadocia. The latter is the later Pyramus.—2. A spring at Jerusalem, to which Solomon was brought "down" to be anointed (1K.1:33;38,45). Hezekiah stopped "the upper source [mo'â] of water course" of Gihon, and brought it down, "towards the side of that [Elath] which is on the W." (2Chrr.32.30). In the Siloam text, the mo'â is the source whence the aqueduct was excavated to the pool (b'rekhâ) at Siloam. Manasseh built a wall "outside the city of David, westward of Gihon in the nahlâ" (2Chrr.33.14). It is clear that Gihon was the cave-spring which still supplies the spring down the subterranean cave of "Az'în Úmmâd Dâray (the spring of steps) in the nahlâ, a term always meaning the Kidron (see valleys). The mouth is now stopped, and—since 728 B.C.—the water has always flowed down the Shiloah aqueduct from the back of the cave. Solomon at Gihon was thus in full view of Adonijah at the stone (or rock) of Zohreth (1K.1:9), which was by Ex-Rogel [c.r.c.]

Gilaalî, one of the priests' sons at the consecration of the wall of Jerusalem (Ne.12:36).

Gilboa, the mountain range E. of the plain of Esdraelon, rising at the highest to 1,650 ft. above the sea, or 1,400 above the plain; W. sighted towards the Menorah. The name, given to the Jordan Valley to its E. It was named from the "bubbling source" at the village of Gilboa (now Jeboun), near S. end of the range, where there is a perennial spring-well. The mountain itself is very bare, but once had vines at Jezreel on its N.W. slopes. It is noticed exclusively as the plateau of Gilead's hills, and divided into two provinces by the Jabbok, which runs first N.E. from Rabbath-Ammon, then W. to Jordan. The N. region is now Jebel 'Ajîlân; the S. is the Belqâ (empty). All Gilead is rocky, but the 'Ajîlan as far S. as Si'âf and Reimûn is covered by oak forests, with flowery glades, and Brooks haunted by the roe. The Belqâ is bare, with some copse and to the S. a wood of firs (Pinus carica). The region was famed for its balm (Gen.37.25; Je.8.22,46.11) and for pasture. It still supports flocks and herds. The capital of N. Gilead was Ramoth (Reimûn; see 1K.4.13), and of S. Gilead Mahanaim (Mukhmah); S. of the river Jabbok (Gen.32.2,22). Succoth (Tell Dar'âila) being N. of this stream (Gen.33.17). W. Gilead and the Jordan Valley to the river belonged to Gad; E. Gilead to Manasseh and to the Ammonites (Jos.13.2,5,13.30,31). The towns of Gilead included Tob (Tâiyîyeh), Mizpêh (Si'âf), Zaphôn (el Hammeh) in the N., and Beshear (Jebisheh) in the S., Jazer (1Chr.28.31) being on the S. border [Jazer]; in the valley Beth-haran (Râmêh) [Beth-aram] and Beth-Nîmrâh (Nîmrîn) in S., and Succoth just N. of the Jabbok River. The N. course of the latter separated Gad from the Ammonites on the E.—History. The original Zamzummins (Deut.8.20) preceded the Ammonites, and the Amorites who conquered Gilead shortly before the Hebrew conquest. In the 9th cent. B.C. Hazael of Syria smote this region (2K.10.33); and in 734 B.C. Tiglath-pileser III. took captive thence the tribes of Israel (2K.15.29). Idolatrous worship then prevailed (Ho.12.11). About 625 B.C. an Arab invasion from S. Jordan reached to Bashan but thence Assur-bani-pal recovered Gilead a few years later, though the population remained Arab in subsequent times (1Mac.5.25). Gilead is also a patronymic (Num.26.29,30; Judg.11.12), "the father of Gilead" (1Chrr.7.14) meaning the ancestor of Gileadites. [c.r.c.]

Gilead, Mount (Judg.7.13), seems to stand for Gilboa, but R.V. understands "go round about" (marg.) instead of "depart from." [Gideon.] [C.R.C.]

Gileadites, The, a branch of the tribe of Manasseh, inhabiting Gilead (Num.26.29; 2K.15.25). There appears to have been an old-standing feud between them and the Ephraimites, who taunted them with being deserters (Judg.12.4). Jair (Judg.10.3) is described as the "Gileadite"; as also Jephthah (11.1) and Barzillai of Rogelim (2Sam.17.27).

Gilgal (circle).—1. A place E. of Jericho, where the twelve stones from Jordan were collected, probably on the river bed (i.e. a circle).—2. A place (Judg.7.3) seems to stand for Gilboa, but R.V. understands "go round about" (marg.) instead of "depart from." [Gideon.] [C.R.C.]

Gilan, the Persian name of Gilub (Gen.37.19). Gilgal, a town on the borders of Ephraim (1K.4.13). Gilgal, a place on the borders of Benjamin (1K.4.13). Gilgal (see 1K.4.13), a place in the mountains, whence Elijah "went down" to reach Bethel (1K.2.1); now the village
Giloah, a town which, with its villages, was taken by the Philistines in the reign of Ahaz (2Chr.23.18). The name (Jimzu) is still attached to a large village 3 miles S.E. of Lydda, S. of the road from Lydda to Jerusalem.

Gilead, a prop for birds or beasts: it consisted of a net (Is.8.14), and a stick to act as a spring (Am.2.4). Ginath, father of Tibni (1K.16.21,22).

Gimno, a town which, with its villages, was taken by the Philistines in the reign of Ahaz (2Chr.23.18). The name (Jimzu) is still attached to a large village 3 miles S.E. of Lydda, S. of the road from Lydda to Jerusalem.

Ginisath, father of Tibni (1K.16.21,22).

Ginnetho, or Ginnethon (10.6,12.16), a priest who sealed the covenant with Nehemiah.

Girdle (haghor, 'sor'), worn both by men and women. The common girdle was of leather. The tattered girdle, like that worn by the Bedouin of the present day. A finer girdle was made of linen (Ez.13.1; Ezk.16.10), embroidered with silk, and sometimes with gold and silver thread (Dan.10.5; Rev.1.13,15.6). The manufacture of these formed part of the employment of women (Pr.31.24). They probably resembled the Arab hiday, or waist-shawl, and were worn by men about the loins (Is.5.27,11.5). The girdle of women was generally looser, and was worn above the hips, except when they were actively engaged (Pr.31.17). The military girdle was worn about the waist; the sword or dagger was suspended from it (Joel.3.10; 2Sam.20.8; Ps.45.3). Hence girding up the loins denotes preparation for battle or for active exertion. In times of mourning, girdles of sackcloth were worn as marks of humiliation and sorrow (Is.3.24,22.12). Girdles were used as pockets, as among the Arabs still, and as purses, one end of the girdle being folded back for the purpose (Mt.10.9; Mk.6.8). The 'abhubel, or girdle worn by the priests about the close-fitting gown (Ex.28.39,39.29), is described by Josephus as made of linen so fine of texture as to look like the slough of a snake, and embroidered with flowers of scarlet, purple, blue, and fine linen. It was about four fingers broad, and was wrapped several times round the priest's body, the ends hanging down to the feet. The "curious girdle" (Ex.28.8) was of the same materials and colours as the ephod—that is, of "gold, blue, and purple, and scarlet, and fine twined linen." Josephus describes it as something like a breastplate. After passing once round it was tied in front upon the seam, the ends hanging down.

Girsites, The (Gen.15.21; Deut.7.1; Jos.3.10,24.11; 1Chr.1.14; Ne.9.8). Girgasite, The (Gen.10.16), one of the nations in possession of Canaan before the arrival of the children of Israel.

Gispah, an overseer of the Nethinim, in "the Ophel," after the return from captivity (Ne.11.21).

Gittah-hepher. [Gath-hepher.]

Gittal'm, a place apparently in the lot of Benjamin (Ne.11.33), to which the Benjamites fled from Beeroth (2Sam.4.3). The site is unknown. [C.R.C.]

Gittites, the 600 men who followed David from Gath, under Ittai the Gittite (2Sam.15.18,19), and who probably acted as a body-guard. Obad-edom "the Gittite" may have been named from the town of Gittaim in Benjamin (2Sam.4.3; Ne.11.33), or from Gath-rimmon. [C.R.C.]

Gittuth. [PSALMS, Titles of.]

Giz'onite, The. "The sons of Hashem the Gizonite" are named amongst the warriors of David's guard (1Chr.11.34). [JASHEN.]

Glass. The Heb. word (z'hukkiyth) occurs only in Job 28.17, where A.V. renders it "crystal." This seems to be the only allusion to glass-marrying in the Hebrew Bible. The art is one of the inventions, which, from paintings representing the process of glass-blowing discovered at Beni-Hasan, and in tombs at other places, we know to be at least as old as the time of Osirisaten 1, c. 2200 B.C. Fragments, too, of wine vases as old as the Exodus have been discovered in Egypt. The art was known to the ancient Babylonians. Glass was even far more extensively used in ancient than in modern times. The Egyptians knew the arts of cutting, grinding, and engraving it, and could inlay it with gold or enamel, and "permeate opaque glass with designs of various colours. They could also colour it so brilliantly as to imitate precious stones, so as often to defy detection. In N.T. glass is alluded to as an emblem of brightness (Rev.4.6,15.2,21.18). [HANDICRAFTS, 5.]

Gleaning. (See CORNER.) The gleaning of fruit trees, as well as of cornfields, was reserved for the poor (Lev.19.9; 20.14). The gleanings were gathered in by the "gatherers of gleanings," who wore "woven gowns" or "gleaning coats" (Am.2.4). The word "gleaning" means "the desert," "the waste," "that which is left behind." It may also be used of the "abandoned ones," "the poor," "the outcasts." In certain places, such as the shores of the Dead Sea, the "gleaning" was still in existence in the time of the writers of the Old Testament. (2K.12.13.) [K.L.]

Glory, or Shechinah. The word Shechina (derived from the verb shkhkhôm, "to rest," or "dwell"; from which also comes the word for "tabernacle") is not found in the Bible. It was used by the later Jews to express the visible splendour of the Divine Presence, especially when "resting," or "dwellings," between the cherubim on the mercy-seat, in the tabernacle or in Solomon's temple. It was supposed to be wanting in the second temple, being one of the five particulars in which the Jews counted this to be deficient, though they confidently expected its return in the days of the
Messiah. The term is first found in the Targums, where it is used in a special manner as a periphrasis for God, considered as "dwelling" in the midst of Israel. It is thus used, especially by the translators of the A. V., and in modern Jewish theology. The term in Christian use is usually applied simply to the luminous cloud, or the brilliant light enveloped in cloud, which appears both in O.T. and N.T. as a sign of the Divine Presence. This may be regarded as a type of the Incarnation, as the Divinity of our Lord was partly concealed under the veil of His flesh, though visibly shining through it in the Transfiguration, and in His appearances to Saul of Tarsus and to St. John in Patmos after His ascension. Further illustration of this may be found in Jn.1.14 and in Rev.21.3. Allusions to the O.T. Shechinah are also seen in Mt.17.5, Lk.2.9, and Ro.9.4. Marshall, in Hastings, D.B. (ed. 2), Dict. "Christ and the Gospels," "Glory." [A.R.W.]

Gnat, mentioned only in the proverbal saying used by our Lord in Mt.23.24, where "strain out" (R.V.) is a better translation than "strain at."

Gnosticism, a group of systems of thought, Oriental in character, taking in the idea of Judaism through Christ, and influenced by Judaism and Hellenism, which flourished chiefly in the 2nd cent. The Gnostics had no quarrel with common Christianitv for common people; but claimed to be the intellectual aristocracy who knew what was behind the scenes, and went deeper than mere appearances, passing from βασιλεύοντας—that which seems to be—to γνωσίς—real knowledge. They held that God was beyond attribute and entirely infinite. The passage from infinite to finite can only be explained by constant limitation. Hence arose a series of emanations, or aeons, each giving rise to others farther from the source, and so withal a softer, more material world is produced. But how is the origin of evil to be explained? Here the Gnostics split into two sections. The Moderate Gnostics regarded the creator, or demiuage, as an imperfect instrument of the Supreme God. The world is evil because the creator made mistakes. The Extreme Gnostics declared the demiurge to be positively wicked. These two parties also differed in their views of Christ. The Moderate Gnostics regarded His manhood as real, but called Him a mere instrument of God. His divinity only came down on Him with the dove at baptism, and left Him before crucifixion. The Extreme Gnostics regarded the whole Incarnation as a delusion. This goes Docetism. Gnosticism produced many different schools of thought; but those founded by Valentinus and Marcion are the most important. The apparent references in N.T. to Gnosticism or to ideas from which Gnosticism had its genesis, as follows: (1) Ac.8.9-24 contains the story of Simon Magus, regarded by ecclesiastical writers as the father of all Gnosticism. He practised magical arts, and was called the "Great Power of God." (2) The word γνωσόμενος, which in N.T. generally implies a "deep knowledge of spiritual things," is used in 1Cor.8.3 in a bad sense by St. Paul, who contrasts it with φησίνς: "Knoweth not, but loveth them."

(3) In Col. passim a heresy is attacked which combined asceticism, scrupulousness regarding seasons, etc., with angel-worship and a wrong conception of the person of Christ. (4) In the Pastoral Epistles we come still nearer to the Gnostic idea. Here we see a "different" consisting of fables, endless genealogies (1Tim.1.4), foolish questionings, strifes and "fightings about the law" (Tit.3.9). It forbade to marry, and commanded to abstain from meats (1Tim.4.3), and is described as "profane babblings" and "oppositions of knowledge [A.V. science] falsely so-called" (1Tim.6.20). (5) 1Jn.4.1-3 combats a form of Gnosticism which denied that Jesus Christ had come in the flesh. (6) Jn.5.10,19 and 2Pe.2.1-21 contain a polemic against certain Antinomians, which might refer to those Gnostics who showed their con tempt for matter by wallowing in sin with the body, and claiming to keep the mind pure. (7) The Apocalypse contains references to certain Nicolaitanes who knew the "deep things of Satan"—a phrase which has a Gnostic ring (Rev.2.6,15,20,24). A theory which flourished for some time made all these passages refer to heresies of the 2nd cent., and found in them signs of the late date of the N.T. writings. This theory may be the general reason, or the developed Gnostic heresies of the 2nd cent. presuppose the N.T. All that may safely be said is, that while Gnosticism cannot be definitely found in N.T., there are signs of the tendencies out of which it grew. Mansel, Gnostic Heresies; Hort, Judaistic Christianity; Lightfoot on the Colossian Heresy; also art. in Hastings, D.B. (5 vols. 1904). [B.S.M.]

Goad. (1) A.V. so renders Heb. 말média̔ habbaqār, meaning something to "teach an ox" (Judg.3.31 only). The LXX. understands a ploughshare to have been the weapon. It is perhaps connected with the Akkadian lam-da, "to goad," or the plough-yoke, or goad. [בּרָבָן, an instrument "sharpener," and probably of iron. [Shamgar].] The LXX. understands "sickle" in Is.13.21, and "goad" in Ec.12.11. It possibly means a "sharp" instrument (Arab. dibhab). The ordinary ox-goad in Palestine is a long stick with a pointed iron shoe. [C.R.C.]

Goat. Of the Heb. words translated goat and she-goat in A.V. the most common is זָכֶה, which denotes either sex. All the other words, with two exceptions, denote the he-goat. These are yəḏel, pl. yəḏēlim, "wild goats" (1Sam.24:2; Job 39:1; Ps.104:18), and ἀγγό, rendered "wild goat" in Deut.14:5. There are several breeds of domesticated goats (Capra aegagrus), but none of these is found in the present day in Palestine and Syria, but whether they are identical with those reared by the ancient Hebrews it is impossible to say. Among these are the long-eared Syrian goat and the Angora goat, with fine long hair. yəḏel denotes, in all probability, the beden (Capra nubiana sinica), a species of ibex common to the mountains of the Sinaitic
LONG-EARED SYRIAN GOAT.

GOATH, a place near Jerusalem, named with the hill Garab (Je.31.39 only). The Peshitta Syriac reads Gilveh (see R.V.), [C.R.C.]

Gob (pit; 2 Sam.21.18,19), an unknown Philistine town. In 1 Chr.20.4, Gezer stands instead. The LXX. (Vat. MS.) reads Gath in the first-quoted verse, and Rom in the second, but Gezer in the third, which is perhaps the true reading. [C.R.C.]

Goblet (Heb. 'aggân), a circular vessel for liquor (Can.7.2). Translated "basons" (Ex.24.6) and "cups" (Is.22.24).

GOD. 1. The Teaching of O.T. The Jewish and Christian conceptions of God rise out of the common basis of Semitic religion by a process of gradual elevation and purification. In the oldest Pentateuchal documents, dating from the earlier or middle period of the monarchy, we still have strongly marked the tendency to associate the presence of God with certain prominent natural objects, such as trees (Gen.13.18, R.V., 18.1, R.V., 35.4; Jos.24.26, etc.), springs (Gen.16.14, 21.30-33; Ex.17.1-7; Num.20.1ff.), stones (esp. Gen.28.11, 18, 22; cf. Is.57.6); hill-tops or "high places" (1 Sam.9.13, 10.5; 1 K.3.2, 3; cf. Deut.12.2). Probably many of the sites thus regarded as sacred were ancient Canaanite sanctuaries which Israel took over. The natural phenomenon which they themselves most habitually associated with Godhead was the storm, with its accompaniments of thunder, lightning, and earthquake (Ps.18.7-15, etc.). It is not easy to define the exact nature of this association, because the Hebrew had not yet begun to reflect upon it; the storm brought God to his mind as though He were locally present. That his ideas should be strongly anthropomorphic was also quite inevitable (Gen.3.8, 21.11, etc.); he had no higher analogy than himself to apply to the Power outside himself. The characteristic Heb. name for God is JEHovah (yâhôwâ), the original signification of which is still much debated (see Driver, Gen. pp. 407 ff.). As to its history, the early documents (for nomenclature, see Pentateuch) differ: J throws it back to the beginning of the human race (Gen.4.26); E regards it as the subject of a special revelation to Moses (Ex.3.13, 14; cf. 6.2, 3, 1); the name also appears among the Midianites or Kenites (Ex.18.5-12, cf. with Judg.1.16, 4.11). In any case it was under this Name that Moses carried out his great work, binding the people to Jehovah as their God, and bringing home to them that they were in a special sense His people. This reciprocal relation became the fundamental fact of Israel's subsequent history. It is connected with a great act of deliverance, and is conceived of under the form of a covenant (Ex.34.4-8). In which, however, the divine choice of Israel preponderates: it was Jehovah who chose Israel, and not Israel Jehovah; the covenant is a διαθήκη, not a συνθήκη. This divine act is the starting-point of the history of Israel as a nation; what remained was to work out the implications contained in it. The first requisite was to bring about a complete loyalty of Israel to its God. This end was only attained after a long and obstinate struggle, extending over the whole period of Israel's independence. When Israel entered Canaan, it found the inhabitants in possession of a higher and more sedentary civilization than their own. The people very largely gave way to the idolatrous and immoral Baal-worship of the Canaanite tribes and their Phoenician neighbours. Against this the prophets of Jehovah contended strenuously, and at last with success. The exiles who returned under the edict of Cyrus (538 B.C.) re-established in a tenacious fashion the exhortations of its religious leaders, and idolatry was at last effectively suppressed. In the course of this history, as the horizon of Israel widened, the conception of God widened with it. It became at once loftier and more comprehensive (Ps.89.11, 93.1-2, 95.3-5, 97.1-12, 9.135.5-6, Is.37.16, 40.12, etc.), and also more exclusive (Ex.34.14; Deut.4.24, 6.14, 15, 32.16-22; Is.42.8, etc.). The great prophet of the Exile whose writings are bound up with Isaiah's ponders upon the idols of the heathen (Is.44.9-20, 57.3-13; cf. Ps.115.4-8, 155.17-18, etc.), which by degrees come to be treated as having no real existence. Thus monolatry, or the worship of a single God, becomes monotheism, or the more explicit repudiation of all gods but this one (Deut.6.4; Zech.14.9). As the conception of this one God becomes loftier it also becomes purer. The old materialisms and anthropomorphisms are stripped away. A distinction is drawn
between the essential being of God and His manifestuations by the help of such conceptions as the angel of Jehovah " (Gen.16:7-11, 25. 11,12; Ex. 33:1-11) the "Son of God" (Job 15:13, 15:35-10; Is.57:15; Hab.1:13). The defect that lingers longest—that indeed passes over from O.T. times into N.T. and even yet is not wholly eradicated from Judaism—is the belief in the special privilege of Israel, considered primarily and mainly as privilege, and not so much its position, in the case of Israel, as an early day the prophets corrected this delusion: "You only have I known of all the families of the earth: therefore I will visit upon you all your iniquities" (Am.3:2). The prophets preached a coming judgment, a great "day of the Lord"; and it is true that this judgment was meant in the first instance for the enemies and oppressors of Israel, to redress the balance of fortune that had weighed down so hardly against them. But it had also another side: it was to be at the same time a purifying judgment for Israel itself, to purge away its dross and take away all its tins (Is.1:25). Then, beyond the judgment, when the double purpose of judgment and purifying were complete, Israel would be restored to God's favour and the age of paradise would return (Is.11:9). This was the hope which buoyed up the nation in its troubles and gave a tinge of idealism to its outlook. At its head was to be the old Davidic monarchy, continued or revived (Mt.2.25; Mk.1.1). The Davidic monarchy was formed the conception of the Messianic King, Who, though in one sense a Son of David, was in another sense Son of God (Ps.2:7; cf. 89:27ff.; Mk.12:35-37 and parallels), and with attributes higher than those of David (Is.9:1-7). The expectation of this coming King was a living expectation in the 1st cent. B.C. (cf. Ps.23:5-11, written about 60-40 B.C.). Round this faith as a nucleus there gathered a number of other beliefs, which all tended to the same effect. It was characteristic of the teachers of Israel to pass with great ease from the collective idea to the personal, and from the personal back again to the collective. It should be remembered that the philosophical notion of personality did not yet exist, and there was no word for it; also that the primitive unit was the family tribe or nation rather than the individual. Accordingly we find the idea of divine sonship at one time applied to the nation as a whole, and at another to the Davidic king (2Sam.7:14), who, as we should say, represents the nation; and there is a great tendency for the two ideas to coalesce (esp. Ps.89:27ff.). In like manner, the remarkable conception of the Servant of Jehovah in Is.42ff. stands indeed for Israel as a people, but for the people personified as it were in an individual, and as such it suffered for Israel, so Israel laboured and suffered on behalf of the other nations, towards whom it discharged the functions of a prophet; and the prophets were in a special sense "men of God" or "servants of Jehovah."—II. The Teaching of the Gospels. There had thus grown up a group of ideal conceptions, which, though distinct in origin, were allied in their general purpose. These conceptions were, as it were, waiting to be brought and fused together in a single Figure, which was to be itself also the embodiment of an ideal. So, when our Lord became incarnate upon earth and began to preach His ministry, He went back upon them and took them to Himself. They expressed so many different functions or aspects of His mission. He was at once David's Son and David's Lord. He was the ideal King (though not as the world counts kingship), and also the suffering Servant. He summed up the history of Israel, the language originally applied to Israel as a people could be applied also to Him; and the N.T. writers regard Him as repeating features in that history (Mt.2.15,12.17-21, etc.). The combination of all these ideal elements in a living Person was not natural but supernatural; it meant that the heaven was the earth, and that the previous history of Israel as the people of God's choice for the accomplishment of His purposes was at once crowned and fulfilled in Him. How did the Lord Jesus Christ conceive of God and of Himself? Broadly speaking, we may say that His teaching presupposes that of O.T., esp. Deut., Ps., and Prophets, with the vindication left out. On one point, the spirituality of God, the verse Jn. 4.24 is more explicit than anything in the O.T.; and a similar concise and summary expression, "God is love" (Jn.4.8,16), probably reflects the teaching of our Lord Himself (Jn.3.16, 14.23). But there is one aspect which belongs instinctively to the Prophets. The O.T. had spoken of God as Father in the sense of Creator. Occasionally the term is used to express the closeness of the relation between God and Israel (Ex.3.12; Deut.32.6; Jn.1.19). In the Gospels this conception of the Fatherhood of God becomes central and fundamental. All the teaching as to man and the Son of Man is deducible from it. In particular, it supplies the key to the nature and mission of Christ Himself. The key is the complete reciprocity of relation between the Son and the Father (Mt.11.27 and parallels). Those critics who want to minimise the character of the gospels draw the line at moral coincidence of will and purpose. Undoubtedly there is this coincidence in the fullest degree; but there is no limitation to this in the gospels. The Fourth Gospel lays a special stress on the "oneness" of the Son with the Father (10.30, 17.11,20), and it is rather here than elsewhere that we find that He traces this "oneness" to essential identity of nature. This is not only the consistent teaching of the Epistles, but it is suggested by the peculiar designation which Christ chose
for Himself, the "SON OF MAN." The more direct original of this phrase is to be sought in Dan.7.13, 14., which also would be found for the generate Israel (see, however, Gressman, op. cit. infra). In any case, in the Similitudes of Enoch the name had already come to be applied to the Messiah, and particularly to the Messiah as Judge. Our Lord not only took it to Himself in this sense, but it is also sufficiently clear that He associated it with other significant examples of the phrase in O.T., notably Ps.84. Our Lord's use runs up into mystery, but He clearly distinguishes between Himself and all other sons of men, and connects the title with the transcendent element in His own self-consciousness. [JESUS CHRIST; IN- 

CARNATION; JOHN, GOSPEL OF.]—III. The Teaching of the Epistles. If our Lord thus associates Himself in a unique manner with the Father, we find the same association in the Epistles, from the first extant Christian writing onwards (1 Th.1.1). It is characteristic that it is found especially in the opening salutations of the letters, and particularly those of others (1 Pe.1.1-3; 2 Jn.3; Juj.; cf. Rev. 1.4-6), which shows that as far back as we can go it was already a fixed point understood and assumed amongst Christians. Besides the salutations, there are explicit passages (culminating in Col.1.15-19) which show that St. Paul had already formulated a doctrine substantially equivalent to that of the Johannine Logos. This teaching arises out of reflection upon the Person of Christ in the varied forms of its manifestation. No lower conception seemed to do justice to what He was and evidently felt Himself to be. The appearance of Christ upon earth could thus only be described as an incarnation of the Divine (Jn.1.14). But if so, if there was at one and the same moment God manifest and God invisible, that meant that there was at least a double principle (Bios atm). in the Godhead. In the recognition of this lay the germ of the Doctrine of the Trinity. In Paul's letters it seems that the first step was the recognition of Christ as divine; the second step was the recognition of the work of the Holy Spirit. There had been a steady consistency in the Biblical language as to the direct influence of God upon the human soul; it was referred to the Spirit of God or the Holy Spirit. [SPIRIT, HOLY.] In the apostolic age, from the Ascension and Day of Pentecost onwards, this influence was exhibited in heightened forms; the faculties with which man is endowed seemed to work with unusual activity and unusual effect. It was natural to set this down, and the apostles and first Christians generally did set it down, to a special movement of the Spirit of God. In this was seen another manifestation of the Divine upon earth; and so there arose the conception of a third element in the Godhead. Thus the doctrine of the Trinity became complete; not, of course, at first in its formulated expression, but in a comprehensive religious experience. Time and reflection alone were needed to give this experience a name and express it in terms of the intellect; and already in N.T. we may see the process quickly coming to a head. In some of the opening salutations to which reference has been made above (1 Pe.1.1-3; Rev. 1.4-6) all three terms, Father, Son, and Spirit, are introduced, virtually or expressly. But Dr. Moberly has shown (Atonement and Personality, p. 192) that the double invocation which is characteristic of the Pauline epistles is not really "a maimed Trinitarian formula," but that the full Trinity is implied—in the prayer that grace and peace may come down from God to man, such inlining from above being the special work of the Spirit. The incompleteness of the formula as such is due to the fact that the apostle is not yet attempting to formulate doctrine, but is still at the stage of experience, which is the raw material of doctrine. Was the belief in the Trinity, then, a creation of the apostles or of the Church of the apostolic age? Or does it go back farther still to our Lord Himself? The latter conclusion seems more probable. Even such passages as Mt.28.19, 2 Cor.13.14, are not exactly formulated doctrine, but they are doctrine far on the road to formulation. The second of the two references may be within, and is certainly not much beyond, the twenty-first century. So, too, the belief appears in it in a very fixed form, equally familiar to the writer and to his readers. Is it too much to infer that it has its roots in language used by Christ? And so, when St. John in the last discourses (Jn.14-16) gives explicit teaching on the subject of the Paraclete and the Holy Spirit existing to the Father and the Son, it seems fair to say that this teaching is confirmed as being, substantially at least, what it seems likely that Christ must have spoken. Beyond this point we need not go. We have seen the conception of God throughout the O.T. period rising gradually to a height of sublimity and purity. We have seen it perfected by our Lord Jesus Christ by being made to centre in the idea of Fatherhood. We have seen it expanded so as to include the Godhead of the Son, and along with that also the Godhead of the Holy Spirit. It was later, for the Church to define what was implicit in this history—not to go beyond the history and introduce superfluous imaginings of its own, but to express, or at least to adumbrate, conceptually the inner meaning of that which it had already experienced in those momentous years in which its career began. Theologian is conscious of an ascetic reflection upon which it reflects are facts of life.—Literature. The great art. by Kautzsch, "The Religion of Israel," in Hastings, D.B. (extra vol., in 5 vol. ed. 1904), is the complete survey of the subject in English. Cf. A. B. Davidson, art. "God (in O.T.)" (a mature and finished production, in the same work, and Theol. of O.T. (posthumous, and not quite so satisfactory); Montefiore, Hibbert Lectures for 1902; and on a smaller scale, Ottley, Religion of Israel (1905). A new phase is marked by such books as Gressman, Ursprung d. isr-jud. Theologie (1905) and Baentsch, Mono- theismus (1906). For the doctrine of the Trinity there is very valuable material in Moberly, Atonement and Personality (1901), esp. iv, v, viii; see also Illingworth, Doctrine of the Trinity (1907). [SPIRIT, HOLY; PHILOSOPHY; etc.] [w.s.] God, Son of. [JESUS CHRIST; GOD; INCARNATION.]

Goldsmith. [Handicrafts, (2).]
GORTyna

a town of Crete, and anciently its most important city, next to Crossus (1 Mac. 15.23); nearly half-way between the E. and W. extremities of the island. It seems to have been the capital under the Romans. 

Goshen. — Called Ἱσσον by LXX.; Κασσαβία, Κασσαβίον by Gk. writers; Gessen by Vulg.; and Gesse by Latin documents), a part of Egypt allotted to the Israelites for their sojourn when they settled in the country (Gen. 46.34). The name has been found in hieroglyphical inscriptions, where it appears as kes or ἀκες; which, preceded by the Egyptian article, has yielded Bub. Gk. name. We know from several ancient geographers that Phacusa was the metropolis of the Egyptian nome or province of Arabia, situate between "Egypt and the Red Sea" — i.e., in what is now called the Wady Tumilat. This is confirmed by the LXX., where Goshen once appears as Ἱσσον 'Αραβία, with the Septuagint, version, as "the land of Gessen of Arabia," meaning the province called Arabia. A Latin document of 4th cent. (A.D.) shows that the tradition was then current; for it speaks of "terra Arabia, terra Gesse, que terra Aegypti pars est." The exact site of Phacusa is known by the indications of Ptolemy, and from excava-

tions made on the spot. It is the present village of Saft el Henneh, in the Wady Tumilat, about six miles from Zagazig, on the Fresh-water Canal running from the Nile to the Red Sea. The land of Goshen would thus be the country around Saft el Henneh, from Belbeis to Abu Kebir, S. and E. of the present Zagazig, that is, it would be considered as a limited district or province. It is the name of a region, which, originally starting from Belbeis in the S., extended in the Wady Tumilat on the E., towards what is now the Suez Canal, including the city of Pithom, and ending at the head of the Arabian Gulf. Goshen, when it was given to the Israelites, does not seem to have belonged to the administrative division of the country. It was watered by a canal coming from Heliopolis. Mention of its occupation by strangers is found in an Egyptian text. An inscription nearly contemporary with the Exodus, speaking of the region around Belbeis, says that it was not cultivated, but "left as pasture for cattle, because of the strangers. It was abandoned since the time of the ancestors." In the Bible, "land of Goshen" is synonymous with "land of Ramesses" (Gen. 47.11). This name must be of later date, introduced after Ramesses II. made great constructions in the Wady Tumilat, such as the store-cities of Ramesses and Pithom. Probably the name, Goshen, applied to the whole region occupied by the Israelites. When they multiplied and spread over a greater area of land, the name extended with them to the cutting of the Wady Tumilat (Jos. 15.12), for one of the cities on the LXX. connects with the Wady Tumilat, "Goshen and the Shrine of Saft el Henneh," p. 134 ff.; Petrie, Hyksos and Israelite Cities, p. 34—2. Goshen, the land of (Hyksos, Gessen), a region conquered by Joshua, apparently near Gibeon (Jos. 10.14, 11.16). It occurs only there, and has not been identified. —3. A town in the mountains of Judah (Jos. 15.51 only); unknown.

Gospels. The first point which attracts our notice in reading the Gospels is that the first three Gospels are distinct from the fourth. The first three confine themselves almost exclusively to the events which took place in Galilee, until Christ's last journey to Jerusalem. If we had these Gospels alone we could not definitely say that our Lord went to Jerusalem during His ministry until He went there to die. In the Fourth Gospel the occasions on which our Lord visited Jerusalem are marked with precision. The discourses and miracles are connected with these visits. The difference in character is no less than the difference in scene. The first three Gospels usually give a narrative without comment, though all, and especially John, the T. prophet, has been more and more condemned and exalted. The fourth evangelist speaks with clear authority, and adds comments of his own. Further, they do not claim to be eye-witnesses of our Lord's ministry, and Lu. implicitly dis-
of the Holy Spirit were declared necessary means for appropriating His blessings. The whole was "commended to every man's conscience" (cf. 2Cor. 4:2) by instances of His sublime moral teaching. It was also shown that "He went about doing good, and healing all that were oppressed of the devil" (Ac.10. 38). In Mk.1.1 and Rev.14.6 the word "Gospel" seems to signify a written account of the "good news" brought by Jesus Christ. Exactly when such accounts began to be written we cannot tell. A need for something written would begin almost as soon as the missionary work began. The absolute necessity for it would be acutely felt at the time when the first generation of eye-witnesses was passing away.

As a matter of fact, it seems to have been just at this time that all three Synoptic Gospels were written. The same universally felt need was answered by the same kind of literary enterprise. It is not clear that St. Paul, whose conversion probably took place in 35 A.D., used a written Gospel. His knowledge was based on "revelation" (Gal.1.11) and "received from the Lord" (1Cor.11.23). It is almost certain that this means that it was delivered to him in a discourse which was to be inspired, probably an evangelist or prophet. It was from "the Spirit of Jesus" (Ac.16.7, R.V.), not necessarily independent of human means. The means was probably oral. St. Paul himself uses the word "Gospel" as meaning the substance of the message which he preached (Col.2.2). The Gospels must therefore have been written down. His friend St. Luke shows how the transition began (Lu.1.1, 2). Those who had been "eye-witnesses and ministers of the word" delivered unto others the things most surely believed. Many of these drew up narratives of such things, and St. Luke followed their example. The written Gospels therefore probably came from an effort to put down what the apostles and their companions taught, and many such attempts had been made before St. Luke wrote, i.e. probably before 70 A.D. (2) Why do the Synoptic Gospels differ? It is obvious that not only do the Gospels differ, but they differ widely from each other. If we reckon the whole number of incidents in these Gospels as 88, the distribution of incidents shared by at least two Gospels is as follows: in all three Gospels, 42; in Mk. and Mt. 12; in Mk. and Lu. 5; in Mt. and Lu. 12. There are also similar groups of incidents. Thus in all three we find together the cure of the paralytic, the call of Levi, and the question of fasting (Mt.9.1-17; Mk.2.1-22; Lu.5.17-39); so also the plucking of the ears of corn and the cure of the withered hand—events separated by at least a week (Mt.12.1-21; Mk.2.23-3.6; Lu.6.1-11). So too the death of John the Baptist is narrated both in Mt.14.3ff. and Mk.6.17ff., to explain the fear felt by Herod Antipas that he had risen from the dead. In fact, when a parallel passage is found in all three Gospels, it is never immediately followed in both Mt. and Lu. by a wholly separate incident which is not in Mk. But the differences between the historical Gospels are marked as the resemblances. Thus the account of the birth and infancy of Christ in Mt. differs widely from that in Lu. The incidents of the temptation of our Lord are recorded in a different order in Mt. and Lu., and the temptation is recorded without these incidents in Mk. All three Gospels give an acutely different account of the institution of the cross, and the words spoken by the centurion at the death of Jesus vary in Lu. from the words in Mt. and Mk. Also the language differs, and differs in a very singular manner. All three Gospels are written in Gk, which is far from being classical, and plainly shows the influence of the Aramaic language of Palestine. Yet they differ in style, and not only from each other, for Mt. varies in different sections, and so does Lu. Mk. is in the roughest Gk. and represents the language of an ordinary Jew of 1st cent. A.D. who had intercourse with the outside world. Lu. could write the best of the three but in about 5% he uses strongly Aramaic idioms, some of which appear to indicate that he drew upon written documents for information. The case of Mt. is similar. It was long ago noticed that the quotations from O.T. which Mt. has in common with Mk. or Lu. are from the Gk. version, which was the only one they themselves, or their people, would have used. There is another important fact. When Mt. and Lu. narrate the same things as Mk., they both use their own favourite expressions less often than in those passages which are peculiar to themselves. We put aside the discourses of Jesus which are not peculiar to any of them, which simply narrate our Lord's doings and the account of the Passion, there remain 168 verses which Mt. and Lu. have in common. In these verses there is, on an average, less than one characteristic phrase of Mt. in each verse, whereas in 190 verses peculiar to Mt. there are 4 characteristic phrases to every 4 verses. In Lu. the 168 verses contain about 3 characteristic phrases in every 4 verses, whereas in the 164 verses peculiar to Lu. there are about 4 characteristic phrases to every 3 verses. The latter is no doubt the true state of the case. We examine the discourses and narrative which are in common, and we find that Lu. uses much more of their favourite expressions than in portions that are peculiar to themselves. These facts make it practically certain that Mt. and Lu. did not simply take up the usual oral teaching given to converts. The oral teaching, exactly as Lu. tells us, had been already to a great extent written down. And Mt. and Lu. differ from Mk., both because they wished to supplement Mk. and because they copied certain documents which Mk. did not possess. (3) How were the Synoptic Gospels composed? We have shown reasons for believing that the divergences of Mt. and Lu. from Mk. are partly caused by their use of certain written records. We must soon discuss what these records were. In the meantime we have to account for the resemblances of Mt. and Lu. to Mk. On the whole, these can be best accounted for by the theory that they both used Mk., and used it as written in Gk. and not in Aramaic. Except for about 30 verses in the Matthaean account in Mk., which are not found, and in the same order, in Mt. or in Lu. or in both. SS. Matthew and Luke apparently
correct the style and grammar of St. Mark—
e.g. both, and especially St. Luke, replace St.
Mark’s diminutives by smaller ones to smooth his harsh phraseology, as in Mk.13.14,
following Mk. rather closely till the beginning of this section, he leaves Mk., and when the
section ends, returns to a verse close to the place in Mk where he left it. The similarity of
Mt. and Lu. to Mk. even extends to rare Gk. phrases; and quotations from the O.T.
are sometimes in two or three Gospels with the same variations from the original
(e.g. Mt.3.3; Mk.1.3; Lu.3.4). Again, in Mt.
26.47, Mk.14.43, Lu.22.47, all three explain,
appearly without any necessity, that Judas
was one of the Twelve. It is only by a minute
examination of the text that the question can
be determined, but no theory at present ac-
counts for the origin of Mt. and Lu. so satisfac-
torily as the theory that both used Mk.
Mk. is not based upon any written document,
since Mark did not possess a tradition preserved by Papias (quoted in Euseb. Hist. Eclt. iii. 39) that Mk., “having become the interpreter of Peter, wrote down accurately everything that he remembered.”

Our second Gospel supports this tradition
satisfactorily. The other written sources used by the Logian material repeats the correct words
Papias also alludes. He says, “Matthew then
composed the Logia (or Oracles) in the Hebrew
tongue, and every one interpreted them as he
was able.” There is no evidence that the book
was actually called “Logia.” It seems to have
been a collection of numerous precepts of the
Lord embodied in a narrative suitable for the
catechetical instruction of converts. If we
subtract from Mt. and Lu. the material which
they have in common with Mk., we find that the
remainder does largely consist of discourses and
precepts of the Lord. Much of this material is
reproduced in both Mt. and Lu. Luke produced different arrangements of this material which
appears in five large blocks of discourses (5-7;
10; 13; 18; 25), each followed by a similar
formula. See also 11-12 and 23. If we re-
move the Marcan portions and some special
narratives of Mt., we have in Mt. simply a compendium of Christ’s teaching. St. Luke shows
us an interesting contrast. He presents the
discourse-material from an historical point of
view. It is framed in a narrative bearing a
stamp of genuineness which is sometimes ob-
vious. Thus the story of the woman who
anointed our Lord’s feet is the setting of the
parable of the Two Debtors (Lu.7.36f.); and
Lu. shows better than Mt. the occasion on
which our Lord taught the Lord’s Prayer (Lu.
11.; Mt.6.9). St. Matthew originally wrote a
collection of discourses in Aramaic, and this
was soon translated into Gk., possibly by St.
Matthew himself. A similar but not identical
collection was used by St. Luke. The language of the discourses is more original in Mt.; the
setting is more historical in Lu. It is almost
certain that St. Luke had not read Mt. The
middle section of Lu. (9.51-18.14) is full of the
most precious material relating to our Lord’s
teaching. We believe that St. Luke considered
it to the highest possible authority, preferring
it even to Mk. It was probably collected by
some one who had been with our Lord during
the last period of His ministry; and although we are not able to say that the discourses were all spoken at
that time. Several sayings are either re-
petitions or different reports of sayings which
St. Luke has elsewhere copied from Mk.; they
are therefore commonly known as "doublets."

Similar doublets occur in Mt., passages of
Logian material repeating verses taken from
Mk. The Synoptic Gospels are therefore com-
pounded of (i) Mk.; (ii) St. Matthew’s Aramaic
collection of Logia translated into Gk.; (iii) a
similar collection used by St. Luke; (iv) another
collection inserted by St. Luke in the middle
of his Gospel in one block; (v) special sources used by SS. Matthew and Luke which will be briefly
mentioned in the articles on their Gospels.

The above theory is fearlessly critical in method
and strongly conservative in conclusion. It
shows that the principal sources of our Gospels
were all written well within the lifetime of the
apostles, and that these primitive sources all
derive ultimately from the primitive teaching
of the Person and authority of Jesus Christ—
St. John and the Synoptists. It is not at all clear
that St. John was acquainted with the Synoptic Gospels. We should, however, note that
certain passages suggest that he was: Jn.5.
81; (Mk.2.11f.); 6.7,10,19f. (Mk.6.37,40,49f.);
18.3,5 (Mk.14.10-11); 18.18,17 (Mk.14.54,69); 18.22 (Mk.14.65).

The words of our Lord in Jn.15.18-16.2 have
been compared with those in Mt.10.17-22.

There are several points of contact between Jn.
and Lu. which deserve attention: e.g. in
their narratives of the Resurrection both con-
nect the first appearances of our Lord with
Jerusalem, and say that there were two angels
at the sepulchre. The high-priest Annas is
only mentioned by SS. Luke and John (Lu.3.2;
Ac.4.6; Jn.18.13,24). Lu. and Jn. alone show
that Pilate intended the scourging of Jesus to
be a concession to the Jews which might cause
them to believe. Jn. is possibly more familiar
than Mt. with the story of the Last Supper.
If we remove the Marcan portions and some special
narratives of Mt., we have in Mt. simply a compendium of Christ’s teaching. St. Luke shows
us an interesting contrast. He presents the
discourse-material from an historical point of
view. It is framed in a narrative bearing a
stamp of genuineness which is sometimes ob-
vious. Thus the story of the woman who
anointed our Lord’s feet is the setting of the

Ac.4.6; Jn.18.13,24). Lu. and Jn. alone show
that Pilate intended the scourging of Jesus to
be a concession to the Jews which might cause
them to believe. Jn. is possibly more familiar
than Mt. with the story of the Last Supper.
Gotholl'as (1 Esd.8.33) = Athaliah, 3.

Gotho'niel, father of Chabris (Jth.6.15).

Gourd. (1) qiqdyon, only in Jon.4.6-10.

Though opinions differ, the probability is that the qiqdyon which afforded shade to the prophet Jonah before Nineveh, is the Ricinus communis, or castor-oil plant, which, formerly a native of Asia, is now naturalized in America, Africa, and the S. of Europe. Its leaves are large and palmate, with serrated lobes, and would form an excellent shelter. The seeds contain the oil known as "castor-oil" which has for ages been in high repute as a medicine.

(2) paqqâ'ôth and peqâ'm. In 2 K.4.39, a fruit used as food, disagreeable to the taste, and supposed to be poisonous. In 1 K.6.18,7-24, as an architectural ornament (A.V. knob). There can be no doubt that the "wild gourds" (paqqâ'ôth) of 2 K.4.39, which one of "the sons of the prophets" gathered ignorantly, suppos-

ing them to be good for food, were a species of the gourd tribe (Cucurbitaceae), which contains some plants as a very bitter and dangerous character. The leaves and tendrils of this family bear some resemblance to those of the vine. Hence the expression "wild vine"; and as several kinds of Cucurbitaceae, such as

Colocynthis.

Governor is the A.V. rendering of many words: 'allûph, "head of a thousand" (or clan), R.V. chieftain (Zech.9.7,12,5.6); Íôqêq m'ôqêq, "prescriber of laws" (Judg.5.9,14); môshel, "holding dominion" (Gen.45.25, etc.); nágîth, "leader," "foremost" (often of kings of Israel, "prince") (1 Chr.29.22; 2 Chr.28.7); nâsîf, "of high rank" (often "prince") (2 Chr.1.2); paqâdîh, "commissioner," "inspector" (Je.20.1); sághân, "prefect" (Dan.3.2); sâr, "chief," "head" (1 K.22.26; 2 K.23.8); šallîth, "man of
authority" (Gen. 42:6); ἰγκέμων, "leader" (Mt. 2:6; Ac. 7:10); and of the following, which require special mention: (1) ἤφα, an Assyrian word, used esp. of Persian governors after the Exile (also 1 K. 10.15, etc.). "Tattenai, the governor before the river," (Ezr. 5.6, R.V.), was possibly satrap of all Syria; but the word is more commonly used of subordinate governors of smaller districts, such as Judea. This office was held by Zerubbabel (Hag. 1.1, etc.) and Nehemiah (Ne. 5.14). Tirshatha was their Persian title (Ezr. 2.63; Ne. 8.60). The governor before justice, and was responsible to the satrap for the tribute assessed on his province, which was moreover bound to maintain him and his staff, finding "the bread of the governor," at the rate of 40 shekels per diem (Ne. 5.14-18). (2) Εὐθαράσσω means the ruler of a nation (or tribe), ranking below the title of "king." It was held by Shallum (1 Mac. 14.7), and when his family lost their independence, by Hyrcanus (Jos. 14. Ant. viii. 5). Archelaus was appointed ethnarch by Augustus, with the promise of the rank of king if he showed himself worthy (2 B. J. vi. 3). The title was also given to the head of the Jews at Alexandria and (in the 3rd cent. A.D.) in some other cities. Thus it is not always the head of the Jewish community at Damascus may be meant, but more probably the Arabian ruler of the district. Ethnarch was a common title among the Arabians, who were organized on a tribal basis. (3) Ηγεμόν was used specially of the Roman procurators of Judaea: Pilate (Mt. 27.2, etc.), Felix (Ac. 23.26, Festus (28.30). The procurator had supreme control over his province, including the power of life and death; but the "legateus" of Syria had a certain superintendence over him. Quirinius (Lu. 2:2) was legatus of Syria 6-9 A.D.; at the time of Christ's birth he probably held some military office there. (Ramsay, Was Christ born at Bethlehem? ch. xi. 4) Ἀρχιερεύς (Jn. 2.25). "governor [ruler] of the feast," means either a guest chosen to preside, cf. Eccles. 32.1, or else a sort of head waiter. [MEALS.] (5) Ὁ κυρίῳ σαβασάνας (Gal. 4.2) is a "steward" managing a minor's property. (6) O ἐκφυάριον (Jas. 3.4) is the "steward." [i.t.s.]

Gozan, the tract to which the Israelites were carried away by Pul (Tiglath-pileser III.) and Shalmaneser IV., or possibly Sargon (1 Chr. 5.26; 2 K. 17.6 and 18.11). This is the Gausan- itis of Ptolemy, situated between the Chaboras (Habor, now Khabur, the great Mesopotamian affluent of the Euphrates) and the Saorcas. In an Assyrian geographical list it is mentioned with Nisibina (Nisibis). It became an Assyrian province, ruled by governors from Nineveh, and revolted against that power in 759 B.C., but was subdued. [t.g.p.]

Gra ba (1 Esd. 5.29) = HAGARA.

Grape. [Vine.]

Grass. (1) This is the ordinary rendering of the Heb. הגר (1 K. 18.5; Job 40.15; Ps. 104.14; Is. 15.6). As the herbage rapidly fades under the parching heat of the sun of Palestine, it has afforded to the sacred writers an image of the fleeting nature of human fortunes (Jo. 8.12; Ps. 37.2), and of the brevity of human life (Is. 40.6,7; Ps. 90.5). (2) In A.V. of Je. 50.11, "as the heifer at grass" should be "as the heifer treading out corn" (cf. Ho. 10.11). (3) In Num. 22.4, where mention is made of the ox licking up the grass of the field, the Heb is ירacades, which is elsewhere rendered green. (4) Angelus (equivalent or identical with Zebadiah, Ps. 104.4; Ps. 105.13; 140.5; Ps. 104.14), but also fodder for cattle (Dent. 11.15; Je. 14.6). It is the grass of the field (Gen. 2.5; Ex. 9.22) and of the mountain (Is. 42.15; Pr. 27.25). In N.T. the word grass is always the representative of the Gk. χόρσος. [Hav.]

Grasshopper. [LOCUST.]

Great Britain (Is. 60.13, etc.).

Great Sea (Num. 34.6,7; Jos. 15.47), the Mediterranean. [Sea; Hor.]

Greaves (michá). [Arms, Defensive, (3).]}

Greece, Greeks, Grecians. In Zech. 9.13, A.V. renders the Heb. Javan by "Greece." Javan, or Ionia, is named as an Arayan race in Gen. 10.2 (see 1 Chr. 1.5-7; Is. 66.19; Ezk. 27.13); but about the time when Zechariah wrote the Greeks were coming into contact with Persia for the first time. They afterwards dominated Palestine from 333 to 63 b.c., and many traces of their presence are found in excavations, including pottery, coins, and Gk. inscriptions. The Grecians' (Jas. 1.26; long before, in Am. 12.20, coming up to Tyre (see Ac. 17.4); and educated Jews then spoke Gr. (21.37). [Hellenist; Gentiles.] The Jews of Antioch and the West are sometimes noticed as "Grecians" (Ac. 11.20,21). Greece itself is first mentioned in Ac. 20.2 (cf. however 1 Mac. 12.5-23, which appears somewhat apocryphal). Greeks, such as the Danai and other tribes of Asia Minor, invaded Palestine in the 13th cent. b.c., even to the borders of Egypt. The presence of pagan Greeks in Palestine, in the 2nd cent. B.C., is attested by inscribed tombs, and texts in honour of Apollo, attributed to Philon, who was a philosopher of the temple raliving, found at Jerusalem by M. Clermont-Ganneau, verifies the statement of Josephus (5 Wars v. 2), and shows that a Gk.-speaking population visited Jerusalem in the time of our Lord. Their presence is also proved in Decapolis by texts of the time of Herod the Great in Bashan, while the earliest Palmyra bilinguals, in Syr. and Gk., go back to the same age, when Gk. was the general literary language of the Roman empire. [Gk.]}

Greek. [HELLENISTIC GREEK.]

Greyhound (Pr. 30.31; Heb. "zarzir mathayinim—to one girt [R.V. marg., or, well knit] about the loins"). The greyhound is still the best suggestion, of the many that have been made, as to what animal "comely in going" is here intended. The Arabs sometimes gird their greyhounds to prevent their eating too much and becoming inactive.

Groove, Groves. (1) Thus A.V. renders through the "grooves," or the "grooves," as rendered by R.V. Asherah, Ashirim. (2) In A.V. of Gen. 21.33 for ἑστί: R.V. rightly tamarsit-tree. So in A.V. marg. of 1 Sam. 22.6. [Tamarisk.] [J.r.]}
Guard. (1) In Heb. tabbāh meant "a cook." (Isa.9.23,24) but see Executioner. It is applied to the body-guard of the kings of Egypt (Gen.37.30) and Babylon (2K.25.8; Je.39.9,40.1; Dan.2.14). (2) ručim properly means "runners," and is the ordinary term employed for those attendants of kings whose office was to run before the chariot (2Sam.15.1; 1K.1.5), and to form a military guard (1Sam.22.17; 2K.10.25,11.6; 2Chr.12.10). [Footnote.] (3) The terms mishmereth and mishnahr express properly the act of watching, but are occasionally transferred to the persons who kept watch (1K.4.22, etc.; Job 7.12).

Gudgohad. [HOR-HAGIDGAD.]

Guni.—1. A son of Naphtali (Gen.46.24; 1Chr.7.13), and founder of the family of the Gunities (Num.26.48).—2. A Gadite whose descendants dwelt in Gilead (1Chr.5.15).

Gur. The going up to (2K.29.27). If Ahaziah fled N. from Jezebel ("the garden house" being Beit Jenn, and Ibleam being Yebia) the site may be at the ruin Qārd, where the main road towards Beit Jenn ascends the hill 4 miles W. of Yebia. The LXX reads "ascent of Gatt" (i.e. "of the ravine"). [B.C.]

Gur-ba'al, a place or district in which dwelt Arabians (2Chr.26.7). It appears from the context to have been in the country lying between Palestine and the Arabian peninsula; but this, although probable, cannot be proved. The Arab geographers mention a place called Baa'l, on the Syrian road, N. of Medina.

H

Haahashtari', a man, or a family, immediately descended from Ashur, "father of Tekoa" by his second wife Naarah (1Chr.4.6).

Habaiah. Bene-Habaiah were sons of the priests, of doubtful descent, who returned from Babylon with Zerubbabel (Ezr.2.61; Ne.7.63).

Habakkuk (ḥabḥaqagīq, doubtless from ḫāḥaq, "to embrace," and so probably a term of affection. 'Aḥāqāqīk, etc.). We know nothing concerning this prophet, but a variety of legends exist of little or no value, as that he was the son of the Shunammite woman (2K.4). The title of the story of Bel and the Dragon in the LXX. (Cod. Chis., but not Theodotion) runs "from the prophecy of Habakkuk, the son of Joshua, of the tribe of Levi." In the story it is told how Habakkuk was miraculously conveyed to Babylon, to convey food to Daniel in the lions' den. The animating thought of Habakkuk's message is the doom to be brought on Judah by the Chaldeans, in God's wrath for their sins, and next the reckless arrogance of the invader, who sees not that he is merely the rod of vengeance in God's hands. To the prophet it is given to see, beyond the awful havoc, the time when the destroyer, his task accomplished, falls beneath a mightier foe.—Date. The only point of external evidence is the position the book occupies among the Minor Prophets, intermediate between Nahum and Zephaniah. The former prophesied probably soon after 660 B.C. (Schrader), and the latter in the earlier part of the reign of Josiah, before the Great Reformation—say, c. 630 B.C. With this agrees the internal evidence, which is definite enough, resting on two statements in 1.5—the doom is to come in the lifetime of many of those who hear the threat, and it will be heard by them. But this would be absolutely impossible after the battle of Carchemish (c. 605 B.C.), when the Egyptian army was shattered by the Chaldeans under Nebuchadnezzar; for it could not be doubted that the victorious young Titus would in due course march southward, and that Babylon would again become "the lady of the valley." But more, when Nabopolassar, Nebuchadnezzar's father, assumed a quasi-regal authority at Babylon in 625 B.C., it must have been clear to shrewd observers that Babylon was becoming the dominant power in Western Asia, and the incredulity would thus be increasingly unlikely after 625 B.C. For the other limit it was less than 40 years from Manasseh's death to the first Chaldean invasion; so that many of those living in the last years of Manasseh's reign may well have heard the prophecy. The condition of things, too, described in 1.2-4 suits that period. Though the bloody persecution had ceased, a time of deadness and corruption remained. To go further back would make the conditions unsuitable and the time too long. For the former reason we may cast out the short evil reign of Amon, and the early years of Josiah's reign would be a possible time, when the boy was powerless in the...
hands of his advisers, but impossible in the time following the great Reformation. Thus, our knowledge of the time of Jeho- 
iam, and the opening years of Josiah's. 
Not a few critics have suggested the reign of 
Jehoiakim, since then Judah knew much 
about the Chaldeans; but this would make 1:5 
meaningless. Incredulity would be out of 
the question then, and such an antedating of 
the event be (as in 2:20) so much 
profane audacity. — Contents. In 1:2-4 
the prophet bewails the state of social corruption, 
and appeals to God for help. In answer (2:5-17) 
the invasion of the Chaldeans is foretold to an 
incr杜dulous nation. The Chaldeans fail 
to realize that they are but the rod of God's anger; 
but the prophet knew that it is for correction 
that God has appointed them. As the prophet 
wants to hear God's answer (2:1-4), he is told 
that the vision will surely come, and that 
he must wait by faith. In due time the 
Chaldeans shall be judged (5:12) for their greed, 
their cruelty (12-14), their drunkenness (15-17), 
and (18, 19) their idolatry. Then comes the so-
longing of the prophet for the right time. The 
(3), in which the two thoughts of the invasion 
and the subsequent deliverance are united, till 
at the end the prophet breaks forth in a jubil-
iant strain at the thought of God's love for His 
people.— Integrity. What has been said above 
presupposes the integrity of the book as it now 
stands, but a recent theory maintains that 
the prophet is spoken to an earlier oppressor, to overthrow whom the 
Chaldeans are raised up; and removes 1:5-11 
so as to follow 2:4. If by the earlier oppressor 
meant the Assyrian (though it is hard to see 
why he should not have been named), it may 
suffice to say that at no possible date to which 
we can assign Habakkuk, was Assyria potent 
for evil; nor would the description (1:14-17) 
suit the Egyptians. Again, 1:2-4 are wholly 
unsuitable as a description of cruel foreign 
oppression; and, in view of the unbroken 
tradition, the theory may uneasily be 
rejected. The passages of Habakkuk are 
quoted in N.T. only in the LXX., with minor variations: 1.5 in Ac.13.47: 2.3 
in Heb.10.37; and 2.4 in Ro.1.17, Gal.3.11. 
Heb.10.38. Delitzsch, Der Proph. Hab. ausge-
legt (not translated); Ewald, Prop. of the 
O.T.; Pusey, Orelli, and G. A. Smith, in their 
commentaries on the Minor Prophets; 
Kirkpatrick, Doctrine of the Prophets; A. B. 
Davidson, in The Camb. Bible for Schools 
and Colleges: Baugartner, Le Propheté Habakuk; 
Sinker, The Psalm of Habakuk. 
[r.s.] 
Habaziniah', apparently the head of a 
family of the Rechabites (Je.35.3). 
Habaccuc' (Bel 53-39) = the prophet 
Habacuc, or Haber. 
Habergeon. [Arms, Defensive, (2.)] 
Habor, the "river of Gozan" (2K.17.6, 
18.11; 1Chr.5.26), is identified beyond all 
reasonable doubt with the famous affluent of 
the Euphrates, which is called Aborhas by 
Strabo, and Chaboras by Pliny and Ptolemy. 
The stream in question still bears the name 
of the Khabur. It flows from several sources in 
the mountain-chain, which in about the 
37th parallel flanks the valley of the Tigrius on 
W.—the Mons Musis of Strabo and Ptolemy, 
now the Kurej Dagh.
the towns of Judah in the extreme S. (Jos. 15.23); but the Heb. accents connect the word with the following, as if it were Hazor-hadattah, i.e. New Hazor, in distinction from the place of the same name in ver. 23.

Hades. [HEL.]

Hadid', a place named, with Lod (Lydda) and Ono, only in the later books of the history (Ezra 2.53; Neh. 7.37,11,34). Eusebius (Onomasticon) called Aditha, a village 3 miles E. of Lydda. In the lists of Thothmes III. (No. 76) it appears as Hadida as early as 16th cent. B.C. Now Haditheh, a village 3 miles E. of Lydda. [ADIDA; ADITHIAM.] [c.r.c.]

Hadiel' (2Chr. 28.12), father of Amasa, 2.

Hadoram-.i. Fifth son of Joktan (Gen. 10.27; 1Chr. 1.21). His settlements, unlike those of his brother, were in Arabia Felix, not Cilicia, as has been supposed. Tradition connected him with Hadid, a name of Arabia, and Wi- ckey refers him to a Hadirath in Garafah (B.C. 2693; From the 45th to the 3rd cent. B.C.) in the coast of Arabia. He is identified with Hadad, son of Jathasar, in 1 and 2 Chron. 11.7,8,19; 15.7, 16.

Hadrach', a country mentioned (Zech. 4.6; 9.3; 10.1; 14.2; Isa. 28.17; 37.2; 39.1, 3, 4; Jer. 49.24, 25; 50.40). It is identified with the town of Hagar (2Chr. 8.18) belonging to Zobah (1Sam. 14.47; 2Sam. 8.13). It is mentioned in connexion with Damascus, Hazor (c. 2300 B.C.) and Hamath (c. 2000 B.C.) as a kingdom of the north, situated between Phoenicia and Aram. It was distinguished in the Bible as the land of Hadrach, the father of Ishmael, and the source of the Ishmaelites. By the rebuilt, walled city of Hagar (2Sam. 5.25), identified with the village of Hagar in Syria, south-east of Damascus, (c. 30 miles E. of Jerusalem; [2014].)

Hagab'. Bene-H. were Nethinim who came back from Babylon with Zerubbabel (Ezra 2.46).

Hagaba' (Ne.7.48), Hagabah' (Ezr. 2.45). Bene-H. were Nethinim who returned from captivity with Zerubbabel (Ne.7.48).

Hagar (Gen.16), an Egyptian woman, handmaid (or slave) of Sarah, whom the latter, being childless, gave as a concubine to Abraham after he had dwelt ten years in Canaan. We read that "when she saw that she had conceived, her mistress was despised in her eyes," and Sarah reproached Abraham for the results of her own act. Hagar fled towards the south and the desert; the place has not yet been identified.

Hagar fled towards the desert; she was taken back by the angel of the Lord, who spoke to her, told her that she should return and live in the land of Egypt. She left her son Ishmael by the well of water (Ezr. 2.46). When she reached the desert, she found a well with water to drink. She was received by the angel of the Lord, who told her to return to Abraham and to bring water for her son. She obeyed, and was given a promise that she would bear a son who would be a great nation, and that he would be called Ishmael.

Hagar was the wife of Abraham, and the mother of Ishmael. She was a slave of Sarah, Abraham's wife. Hagar was given to Abraham as his concubine, and she bore him a son, Ishmael. Abraham and Sarah were childless, and Hagar bore Ishmael as their only child.

Hagar, Hagaran, Hagarites, Hagerite (1Chr.27.31 only, R.V. Hargite), a people dwelling in E. Palestine, whose land was in the days of Saul occupied by the Reubenites (1Chr. 5.8). They are mentioned in the list of clans of the tribe of Reuben, and are said to have been originally a race of Ishmaelites who settled in the wilderness of Paran. They are also mentioned in the genealogy of the tribe of Levi, as descendants of Laban, the son of Jerahmeel, the son of Lot (Gen. 25.2). They are said to have been of the house of Gad, and half-Monanose (1Chr.5.18). They are mentioned, as adversaries of Israel, together with Edom, the Ishmaelites, Moab, etc. (Ps. 83.6). They were evidently a nomad people, as their wealth (1Chr.5) consisted in tents and camels. In a list of Arab tribes made by Tischendorf of the tribe of Levi, and at the end of his life was buried near the temple. According to the story also, and the 'Ailha' mentioned by Strabo, Dionysius, and Ptolemy as Arabs. [f.j.r.-j.]

Haggai'. Nothing is known of the author of the tenth book in the series of the Minor Prophets, apart from a tradition which says he was born in Babylon, of the tribe of Levi, and at the end of his life was buried near the temple. According to this tradition, he is a member of the Great Synagogue. In the LXX, Haggai is mentioned in the headings of Pss.137, 145-148, and in the Pesh. of Pss.125,126,145-148; cf. Epiphanius: "('Αγγαίος) ἑφαλτε πωτὸς οἰκεῖ ἀλλιωτία." His prophecy is cited in Heb.12.26 (cf. Hag.2.6), and referred to in four divisions: (a) (2Sam.8.10), (b) (Hagg.1.1-15), (c) (11.1), (d) the 24th day of the Sept. to Dec. in the second year of Darius—I.e. 520 B.C.; and were delivered to the Jews who had returned home from Babylon in 535, with the object of exhorting them to rebuild the temple of Jehovah. This work, after being commenced (?) under Cyrus (535 B.C.), had been neglected for forty years, during which time the Persians gave to themselves to their own gods, and the Jews were left to their own devices.

On the 21st day of the 7th month (Sept. to Oct.). A message of encouragement to stimulate the flagging enthusiasm of the workers, who are discouraged by the slow progress of the temple, especially those who remembered the house in its former glory. (c) (2.10-12). His first 24th day of the 9th month (Nov. to Dec.). A parable, a warning, and a promise. By the use of a ceremonial metaphor, the prophet teaches that the laxity of the people in building the temple makes them unclean; and this uncleanness is communicated to the land, which thus becomes unholy. On the other hand, the faint suspicion of holiness shown by their sacrifices upon the altar is not sufficient to endue the land with fertility. (d) (2.20-23). On the same day as (c). A personal promise to Zerubbabel, assuring him that, in the midst of the approaching international cataclysm, he would be preserved during the end of time; for I have chosen thee, saith Jehovah of hosts.' In this passage "the Messianic aspirations which attached formerly to the Davidic king are transferred by Haggai to Zerubbabel, who
becomes, in virtue of the position thus assigned to him, a type of Christ” (Driver).—Style. 

Haggai belongs to the decadent period of Heb. prophecy, and his style is so abrupt and simple as to lead to the conclusion that only outline notes of his oracles have come down to us. He lacks the imagination and poetical fervour of the pre-Exilic prophets, but nevertheless rises to fine writing occasionally. He is very prone to repetition, and the continual reiteration of his credential, “saith Jehovah,” indicates his realization of the fact that his words do not in themselves carry that conviction which followed upon the utterances of his greater predecessors. G. A. Smith, *Bk. of the Twelve Prophets*; Driver, *Intro. Lit. of O. T.* (Century Bible). 

**Haggeri.** “Mihhar son of Haggeri” (RSV, K.V.) is one of the mighty men of David’s guard, in 1Chr.11.38. The parallel passage (2Sam.23.36) has “Bani the Gadite,” the Heb. spelling of which is almost identical with “Son of Ha-garite.” Many of the variations in Scripture arise from the similarity of the letters d and r. 

Haggel, second son of Gad and founder of the Haggite family (Gen.46.16; Num.26.15). 

Haggitha, a Merarite Levite (1Chr.8.30). 

Haggites, The. [HAGGI.] 

Haggith, one of David’s wives and mother of Adonijah (2Sam.3.4; 1K.1.5,11,2.13; 1Chr.3.3). 

Ha’gla (1Esd.5.34) = Hattil. 

Haglographa, otherwise called *khrbim* ("writings"). The third of the great divisions into which the Hebrew canonical books were divided; the other two being the Law and the Prophets. The Haglographa included Ps., Fr., Job, Can., Ruth, Lam., Ecc., Esth., Dan, Ezr., Ne., and 1 and 2 Chr.; while Jos. Judg., 1 and 2 Sam., and 1 and 2 Kings were included amongst “the Prophets.” 

[Scripture, Holy; Canon of O.T.] 

Ha’il. The form in which A† first appears in A.V. (Gen.12.5.13.3). 

Hail (Heb. *bá-radk*; Ex.9.18), mentioned with thunder when it first must have been very rare, unusual, and alarming in Egypt; but in Palestine hail accompanies the thunderstorms of autumn, and falls at times in winter (Jos.10.11; Job 38.22; Ps.18.12.13.78.47.48.105.32.148.8; Is.28.2.17.30.30; Hag.2.17). The “fire” mentioned with hail was probably lightning, and such storms were sufficiently rare to be remarkable. See also Rev.8.7.11.19.16.21. [C.K.C.] 

Hair. The Hebrews were fully alive to the importance of the hair as an element of personal beauty, whether as the “curled locks, black as a raven, of youth” (Can.5.11), or the “crown of glory” that encircled the head of old age (Pr.16.31). Among them, as among all ancient peoples, the hair partook in a special way of the personality of the owner. The customs of ancient nations as to wearing the hair varied considerably. The Egyptians allowed the women to wear it long, but kept the heads of men closely shaved from early childhood. The Greeks admired long hair, whether in men or women. The Assyrians also wore it long. The Jews of later days, on the other hand, while they encouraged the growth of hair, observed the distinction between the sexes by allowing the women to wear it long (Lu.7.38; Jn.11.2; 1Cor.11.6ff.), while the men restrained theirs by frequent clipping to a moderate length. Clipping the hair in a certain manner and offering the locks was in early times connected with religious worship; and hence the Hebrews were forbidden to “round the corners of their heads” (Lev.19.27), meaning the locks which covered the ears. The prohibition against cutting off the hair on the death of a relative (Deut.14.1) was grounded on a similar reason. In addition to these regulations, the Hebrews dreaded baldness; it was regarded as a personal defect, and hence formed one of the disqualifications for the priesthood (Lev.21.20, LXX.). In times of affliction the hair was altogether cut off (Is.3.17.24.15.2; Je.7.29). Tearing the hair (Ezr.9.3) and letting it go dishevelled were similar tokens of grief. Wigs were commonly used by the Egyptians, but not by the Hebrews. The usual and favourite colour of the hair was black (Can.5.11), as is indicated in the comparisons to a “flock of goats” and the tents of Kedar” (Gen.3.1,1.5). A fictitious hue was occasionally obtained by sprinkling gold-dust on the hair. It does not appear that dyes were ordinarily used. With regard to the mode of dressing the hair, we have no very precise information; the terms used are of a general character, as of *jezebel* (2K.9.30) and Judith (10.3). The terms used in N.T. (Tim.2.9; 1Pe.3.3) are also of a general character; Schleusner understands them of *curling* rather than plaiting. The arrangement of Samson’s hair into seven locks, or more properly *braids* (Judg.16.13.19), involves the practice of plaiting, which was also familiar to the Egyptians and Greeks. The locks were probably kept in their place by a fillet, as in Egypt. The Hebrews, like other nations of antiquity, anointed the hair profusely with ointments, which were generally compounded of various aromatic ingredients (Rv.3.4; 2Sam.14.2; Ps.23.5.45.7.92.to; Ec.9.6; Is.3.24); more especially on occasion of festivities or hospitality (Mt.6.17; 26.7; Lu.7.46). It appears to have been the custom of the Jews in our Saviour’s time, as it had been from time immemorial, to swear by the hair (Mt.5.36), much as the Egyptian women 

---

*EYPTIAN WIGS. (Wilkinson.)*
still wear by the side-lock, and the men by their
beards (Lane, Mod. Egypt, i. pp. 35. 55).

Hakkatan', father of Jnoanan (Ezr.8.12).

Hakkoz', a priest appointed by David
chief of the seventh course in the service of the
sanctuary (1Chr.24.16) = Koz with the def.
article.

Hakupha'. Bene-Hakupha were among the
Nethinim who returned from Babylon by
Zerubbabel (Ezr.2.51; Ne.7.53).

Hal'ah (2K.17.6,18.11; 1Chr.5.26), one of the
places to which the kings of Assyria de-
portated Samaritan captives, is probably the
Halabbu of the geographical lists, named be-
tween the Gilead and Damascus, two chief
districts of the ancient state of Aram-Arama
(Mizraim, Palestine. It is usually supposed that
it lay near Haran. [T.G.P.]

Halak', Mount, a mountain twice named
as the southern limit of Joshua's conquests
(Jos.11.17,12.7). The word means "bare" (R.V. marg.); it was apparently a spur of
mount Seir. [G.R.C.]

Halarnasa'sun in Canaan, a city re-
named as the birthplace of Herodotus and of
the later historian Dionysius, and as em-
bellished by the mausoleum erected by Ar-
temisia, but of no Biblical interest except as the
residence of a Jewish population in the period
between the O. and N.T. histories (Mac.16.23).
The modern name of the place is Bodrum.

Hali, the halter court of a house. The place
is in the East an uncovered space, around which
the house is built, on a lower level than the
apartments of the lowest floor. All the uses of
the word in A.V. are connected with the trial of
Christ. In Iu.22.55 (R.V., better, court) of the
"hall" of the priest's house; in Mt.27.27 =
Matt.15.16 = Mark 15.16 = Luke 23.2; "the
palace" of the praetorium. [Judgment Hall; House]

Hallelujah. [Alleluia.]

Hallohash', one of the "chiefs of the
people" who sealed the covenant (Ne.10.24).
Identical with Hallohash (3.12), "father" of
Shallum, 13, and probably a family name (=
"Lochesh".)

Ham.-1. One of the three sons of Noah,
always placed second when they are men-
tioned together (cf. Japheth). The name means
dark, and is the Egyptian name for
Egypt, being derived from the blackness of
the soil of the Delta. Another derivation is
from Khem, the bright of the day, and that
name is represented on the most primitive sculptures
hitherto found in Egypt, and whose shameless-
ness is in accord with the story in Gen.9.20 ff.,
where, however, Ham's conduct is rather that
of a child. The generations of the sons of
Noah in Gen.10 really represent the geogra-
phical knowledge of the Israelites, as the names
are rarely those of individuals, but sometimes of
communities and sometimes of towns. [Races.]

To Ham are assigned chiefly the nations S. of
Palestine. First, Cush, the tribes occupying a
zone from Babylonia to Abyssinia. Next,
Misræm, a name from its dual form indicating
Upper and Lower Egypt, Put was an ally of
Egypt in the time of the Assyrian and Baby-
lonian wars, but cannot be identified with
certainty. [Puth.] Canaan is the race which
Israel had to exterminate. The names of the
descendant tribes are very difficult to identify,
but it is clear they are the dwellers along the
coasts of N. Africa and Phoenicia. The race
called Hamites of the Hamites are probably best
defined by the Egyptian representations of
and of the Phoenicians, brown, but
fairest in the N., with beards; but see Races.
Their languages present many problems,
but the race produced the founders of the
earliest states, great builders, hunters,
hierarchists, and "the man, Gen.10.19). In
strange contrast to the pride of the earliest
Hamites, their descendants were reckoned in
the 18th Christian cent. as fit only for
slavery, and indeed destined to it because of
the curse on Canaan (Gen.9.27). The hope of
threefold blessing from Egypt, Israel, and
the Hamites (Isa.11.12) has this present
meaning.

-2. A place (Gen.14.5; Heb. hâm) where
Chedorlaomer defeated the Zuzims, and men-
tioned with Ashteroth, a region in or near
Bashan. Probably, according to Col. Conder,
the "land of Am," noticed with Hoba in the
Armana letters (Brit. Mus. 37, 46; Berlin 91,
143).—3, the tents of Ham, Ps.78.51, a poetic
description of Egypt. Ryle, Early Chapters of
Gen.; Sayce, Races of the O.T. [G.R.D.B.]

Haman. For the earlier part of the story
of Ahasuerus's favourite minister, as given
in the book of Esther, see Mordecai. After
carrying out in bitterness the programme of the
hateful, he had himself dictated for the queen, whom the king
in delighteth to honour" in his overweening
confidence that he was to be the central figure, his
wife Zeresh warns him of coming disaster, in spite
of the apparently signal favour of an invitation
by the queen to a banquet. There Esther tells
her tale, and points to him as the "adversary
and enemy of Israel" and as the perpetrator of
the king's anger, further urged by the veneration of
Haman's despairing application to the queen
for mercy, orders him to immediate execution
on the gibbet, which, as a courtier opportunely
suggests, stands ready for the purpose, as
prepared for Mordecai. He is accordingly executed,
and Mordecai succeeds him. His name is prob-
bably another form of Hummman or Hwmmun, an
Elamite deity. The epithet "Agagite" (Esth.
3.1) means either (a) descended from Agag, king
of Amalek, thus representing Mordecai and
Haman as hereditary foes, the one as tracing his
descent from Kish, and so connected with king
Saul, the other as the modernity of Odysseus
vanquished foe; or (b) a spiritual rather than
a natural descent, an allegorical nickname,
implying a hostile attitude to the chosen nation
like that of the Amalekite king of earlier days ;
or (c) belonging to a place or family otherwise
unknown. The LXX. have "the Bugean" (i
Bopyan) or "the Macedonian" (i Hwmpor,ow),
the former meaning bully, braggar, a Homeric
word revived in Alexandria Greek, or cunucck,
the latter either (i) pointing to the time when the
Gk. power, rendered dominant in the E.
by Alexander of Macedon (died 323 B.C.), had
become, through Antiochus Epiphanes (died 164
B.C.) who inherited Alexander's conquests in
HAMATH

Syria, the type of hostility to the nation of the Jews, or (ii) indicating Haman as a traitor to the Persian power.

Hamath appeared to have been the principal city of Upper Syria from the time of the Exodus to that of the prophet Amos. It lies on the Orontes, about 30 m. N. of Lake Homs, and commands the whole of the Orontes Valley, from the low hills which form the watershed between the Orontes and the Litâney—cf. "the entrance of Hamath." (Num. 34:8; Jos. 13:5, etc.)—to the defile of Daphne below Antioch.

The Hamathites were a Hamitic race, and appear last among the descendants of Canaan in Gen. 10:18, 1 Chr. 1:16. Indeed, they were probably closely akin to the Hitmites, with whom they were generally in alliance.

In the time of David Hamath was governed by king Toi (2 Sam. 8:10), and a little later accepted the overlordship of Solomon (cf. 1 K. 4:21-24), who built "store-cities" there (2 Chr. 8:4). In the inscriptions of Shalmaneser II. (859 B.C.), Hamath appears in alliance with Damascus, the Hitmites, Israelites (Ahaz), etc. About 700 B.C. Jeroboam recovered Hamath from Toi. Later on, on Enlil-inu (Eniel) became tributary to Tiglath-Pileser III. (730 B.C.), and Sargon (720 B.C.) seems to have ravaged the place, and to have tortured Hau-bi'iti (Yau-bi'iti), its king. From this time it was seemingly an Assyrian province, and lost much of its importance. Antiochus Epiphanes changed its name to Epiphania; but the natives still called it Hamath, even in Jerome's time; and it is from this that its present name, Hamah, has come. Several inscriptions in relief, in the hieroglyphic character known as Hitittle, have been found on the site. [T.G.P.]

Hamath-zobah (2 Chr. 8:3) has been conjectured to be the same as Hamath; but the addition of Zobah would seem rather to point to another Hamath, which was thus distinguished from "Great Hamath." One of the Gk. forms of the name is Baisoba, suggesting Beth-zobah, and consequently a different locality. Assyriologists have identified with this the city Sabel of an Assyrian geographical list (where it is immediately followed by Hamath or Hamath). This is probably the city Subiti in the neighbourhood of which Assur-bani-apl defeated the Arabs. [T.G.P.]

Hamath, one of the cities of Naphtali (Jos. 19:35). The name means "hot spring." The Jerusalem Talmud (Erubin v. 5) places it near Tiberias (Rakkath)—that is, at the Hamman, or "hot bath," to the S. This is the Emmaus of Josephus (18 Ant. ii. 3; 14 Wars i. 3). The springs (144 to 132 Faur.) are 3 in number, at a spot rather more than a mile S. of Tiberias. In the list of Levitical cities of Naphtali (Jos. 21:32) the name of this place seems to be given as Hammoth-dor, and in Ezech. 16:56 it is further altered to Hammon. It is probably the Hamath of the list of Thothmes III. (No. 10). [C.R.C.]

Hammedatha, the Agagate, father of Hamman (Esth. 6:9; 7:8). [C.R.C.]

Hammelech, rendered in A.V. as a proper name (Jer. 36:6, 38:6); more properly = "the king," as R.V. [Malchiah, 8].

Hammer. Four Heb. words for this exist: halmith (only Judg. 5:26); maqqebeth (only Judg. 4:21), maqqahe'da (1 K. 8:7), from the same root; so called because by means of it a hole was made by driving in a nail; pattish, a forge-hammer, and therefore made of iron (Is. 41:7); in Je. 50:23 used figuratively of Babylon.

Hammoel'keth (= the queen), daughter of Machir and sister of Gilead (1 Chr. 7:18).

Hammon.—1. A city in Asher (Jos. 19:28); probably 'Atin Hamul, a place with ruins between Asan and Hamath. [C.R.C.]

Hammon-dor', a city of Naphtali, allotted with its suburbs to the Gershonite Levites (Jos. 21:32). [C.R.C.]

Hammurabi [Amraphel; Chronology; Syria]. [Law in O.T.]

Hamonah (the multitude), a city mentioned in Ezech. 39:16. [Hamon-gog].

Hamon-gog', Valley of, the name to be bestowed on a ravine, previously known as "the ravine of the Aramim on the E. of the sea," after the burial there of "Gog and all his multitude." (Ezech. 39:11, 15). The name means "multitude of Gog" (see LXX. Vat. MS.). [C.R.C.]

Hampor, a Hivite (or, according to the Alex. LXX., a Horite), prince of the land and city of Shechem, from whose sons Jacob bought a field where Joseph was afterwards buried (Gen. 33:19; Jos. 24:32). [Emmor.]—He was father to the Philistines, who ravished Dinah (Gen. 34; Judg. 9:28).

Hampuel, a Simeonite; son of Mishma, of the family of Shallu (1 Chr. 4:26).

Hamul, younger son of Parez, Judah's son by Tamar (Gen. 46:12; 1 Chr. 2:5), and ancestor of the Hamulites. [Hamul].

Hamutal, daughter of Jeremiah of Libnah; mother of Jehohaz and Zedekiah (2 K. 23:31, 24:18; Je. 52:1).

Hanameel, a Levite, son of Shallum, whose field his cousin Jeremiah bought (Je. 32:7ff.), while himself imprisoned, as a sign (ver. 15) of the deliverance of the land. [C.R.C.]

Hanameel. Tower of. [Jerusalem.] [C.R.C.]

Hananeel.—1. One of the chief people of the tribe of Benjamin (1 Chr. 2:8).—2. The last of the six sons of Azel, a descendant of Saul (1 Chr. 8:38, 9:4).—3. "Son of Maachah," i.e. possibly a Syrian of Aran-maaczah, one of the heroes of David's guard (1 Chr. 11:43).—4. Sons of Hanam were Nethinim who returned from Babylon with Zerubbabel (Ezra 2:46; Ne. 7:49).—5. One of the Levites who assisted Ezra in his public exposition of the law (Ne. 8:7); probably the same Hanan as in 10:9. 7. Two of the chief laymen, who sealed the covenant (10:27;
Handicrafts

Handicraft. A. (1) Used to strengthen promises (?) and engagements generally (Is.2.6 R.V.; cf. Ezr.10.19; 1Mac.6.48-62.11, 50,62,66,13.45,50; 2Mac.4.34; and 2K.10.15). (2) SURFACESHIP was ordinarily entered into by a handclasp, the words uttered with this formality being binding (Pr.6.1-5,11-15,17.18,32.26; Job17.3). (3) "Let thine hand release" is used in Deut.15.3 in connexion with debt, see Driver ad loc.; and in 15.2 Ἱερουσαλήμ is a probable conjecture for Ἱεροος (= "every creditor shall let his hand drop"). This may possibly also be a reference to the custom, cf. Genesis 38.26-27. (4) A hand might be given (?) or clasped) in sign of allegiance. Seemingly it was coupled with an oath, and constituted or formed part of a covenant (Ezk.17.18; 1Chr.29.24). Perhaps this is distinct from the handclasp of (1), (2), and (3). [Oaths.—B. The custom of the handclasp is paralleled by the parallel paragraphs explaining the same in other fields see Pollock & Maitland, Hist. of Eng. Law, ii. p. 188-189 (q.v., also for (4)). Post, Grund. d. ethnolog. Jurisprud. ii. 620-621; Puntschart, Schulvertrag und Trengelobnis, pp. 306, 308 n. 2, 4071, 491-506; Leist, Altarliches Jus Civile, i. 56-57, 147-150; Amira, N. G. Handicrafts. In early Israel the development of handicraft trades was conditioned, during the different stages of the nation's history, by the requirements of nomads, agriculturists, and town-dwellers. With regard to the last two, only two factors are to be considered: those of the smith and the potter. Nomads required the smith for fashioning spear-heads, the potter for making vessels to prepare food in; though for the latter purpose wood was mostly used, but this did not at first necessitate a special trade, as every one who could made it. With the appearance of a market economy the smith and potter became a specialized trade. In an agrarian community the smith and potter are naturally the most important handcraftsmen; in an urban community they are only two among others. In the Bible the Smith and Potter figure as characteristic of all of Israel, and of the ancient world (cf. Is.56.6, Jer.16.14). In this respect the Smith and Potter are like the common ploughman, the shepherd, and the Israelite waif (cf. Jer.11.19). The Smith and Potter are the traditional workers of iron, the binder of the mendicant, the weaver of roofs, the potter of the city, the smith of the shepherds, the carpenter of the farmers, etc. They are always at the service of the hand of the people (Jer.14.21). The Smith and Potter are mentioned in this combination in Mic.6.4; Zech.4.10; and 1Sa.4.21, 26. A Smith and Potter are frequently found together in the Bible, for in these days they worked together. The Smith prepared the wooden vessel with a flint. Agriculturists required the potter for the same purpose as the nomad, and the smith for making agricultural implements. For every other want both nomad and agriculturist depended upon himself. The making of raiment, whether of flax, wool, or silk, was a matter for the women. The Smith and Potter, in the narrower sense, made tools for workmen's, and men's care; while tents or huts ("booths") each man made for himself. Handicrafts (in the stricter sense of the term) only came into being with the rise of town-life, and, as the books of Jos., Judg., and 1Sam. show, it was a long time before the Israelites finally conquered the Canaanite towns. Handicrafts among the Israelites, therefore, arose in a (comparatively speaking) late date, when the wants of town-dwellers necessitated, and therefore brought into being, trades which could not have existed under the conditions of life of nomad and agriculturist. The Heb. root חָרָשׁ (to cut into) contains the idea which underlies the characteristic action of the smith, the carpenter, and the mason; each in his way "cuts into" metal, wood, or stone. The fact that this root means also "to plough," i.e. to cut into the soil, illustrates the point. And therefore the Heb. words for these three handicrafts are a combination of this root and the special material worked upon—viz.

26.—9. Son of Zacur, son of Mattaniah, whom Nehemiah made one of the storekeepers of the provisions collected as tithes (Ne.13.13).—9. Son of Igdaliah (Je.35.4). Hanani.—1. A son of Heman (1Chr.25.4, 25.4).—2. A seer who was imprisoned for rebuking Asa, king of Judah (2Chr.16.7, 10). He (or another Hanani) was the father of Jehu the seer, who testified against Baasha (1K.16.17) and Jehoshaphat (2Chr.19.2, 20.34).—3. One of the priests who had taken strange wives (Ezr.10.20).—4. A brother, or kinsman, of Nehemiah, under whom he was afterwards made one of the governors of Jerusalem (Ne.1.2, 7, 2).—5. A musician at the dedication of the rebuilt walls of Jerusalem (Ne.12.36).

Hanani' (Jehovah has been gracious).—1. Son of Heman, and chief of the 16th course of singers (1Chr.25.4, 5, 23).—2. A general of king Uzziah (2Chr.26.11).—3. Father of Zebediah, in the reign of Jehoiakim (Je.35.12).—4. Son of Azur, a Benjamite. GNB says a prophet, but the name of Zebediah, king of Judah, in whose fourth year he withstood Jeremiah the prophet, and publicly prophesied in the temple that within two years Jeconiah and all his fellow-captives, with the vessels of the Lord's house which Nebuchadnezzar had taken away to Babylon, should be brought back again (Je.28): an indication that treacherous negotiations were already secretly opened with Pharaoh Hophra. Hananiah, as a symbolic act, took off from the neck of Jeremiah the yoke which he wore by divine command (27.1, 28.10), in token of the subjection of Judaea and the neighbouring countries to the Babylonian empire, and broke it. But Jeremiah was bidden to go and tell Hananiah that for the wooden yokes which he had broken he should make yokes of iron, so firm was the dominion of Babylon destined to be for 70 years. The prophet Jeremiah added to rebuke the prediction of the false prophet's defeat and to defend Jeremiah's yokes. The history of Hananiah throws much light upon the division of the Jews at that time into partisans of Babylon and of Egypt.—5. Grandfather of Irijah (37.13).—6. Head of a Benjamite house (1Chr.8.24).—7. The Heb. name for SMOODA. He was of the house of David, according to Jewish tradition (Dan.1.3ff., 2.17).—3. Son of Zerubbabel (1Chr.3.19), from whom Christ derived His descent, called by St. Luke Joanna. The names Hananiah and Joanna are equivalent in Heb.—9. One of the sons of Bebai, who returned with Ezra from Babylon (Ezr.10.28).—10. A priest, one of the makers of the sacred vessels of incense, who rebuilt a portion of the wall of Jerusalem (Ne.3.8). Perhaps the same as in ver. 30. If so, he was son of Shelemeiah; perhaps the same as in 12.41.—11. Head of the priestly course of Jeremiah in the days of Josiah (12.12).—12. Ruler of the palace at Jerusalem under Nehemiah. The arrange- ments for guarding the gates of Jerusalem were entrusted to him, with Hanani, the Tirshathah's brother (7.2, 3).—13. An Israeliite who sealed the covenant (10.23).

Hand, Right. [RIGHT HAND] Hand-breath. [Weights and Ma- sures]
of iron in Am.1.3; see also 1Sam.13.19-23, which, though describing abnormal conditions, well illustrates what the smith was required to do, during the period at which more settled town-life was commencing among the Israelites. (2) Of silversmiths and goldsmiths there is frequent mention in O.T.; they are called coriphim, "testers" or "refiners." It is not probable that they were much in request before the reign of Solomon, as both silver and gold must have been, comparatively speaking, rare. There were from that time onwards, required, above all for the temple, vessels of gold and silver, overlaying of doors and walls with gold, instruments and ornaments of various kinds, and the covering of idols as well as for making molten images (cf. 1Judg.17.4: Is.2.20, 40.19, 46.6, etc.). Solomon's external relations, especially with the Phoenicians, were the immediate cause of the introduction of larger quantities of the more precious metals into the country. It was, no doubt, owing to instruction from Tyrian workmen that the Israelites gained the considerable knowledge of the silver- and goldsmith's art to which O.T. bears witness. Three words are used for refining these metals: tāraph (Judg.17.4; Is.40.19), "to test"; lāhab (Mal.3.3), "to purify"; bāḥān (Job 23.10), "to examine." The purifying was done by melting the metal and removing the dross (ṣiḥim, used mostly in the pln.) which came to the top (Is.1.22, 25). When the metal was in a fluid state it was poured into moulds, or was used for covering images of wood. The hammering-out (rām) of metal and soldering (debeq) were also understood (see esp. Is.41.7); and according to Ps.45.14[13] threads made of gold were worked into cloth. This more intricate work is further illustrated by the making of settings wherein precious stones were fixed (Ex.28.9-11). In the same passage (ver. 11) we read of the engraver; as a "cutter of stone," his work has to be differentiated from that of the mason by means of the explanatory words, "like the engravings

was necessary for Solomon to hire artificers from Tyre in order to construct the bronze vessels for the temple—a fact that shows that the Israelites were not so proficient in work of this kind as the Phoenicians. Moreover, the Canaanites seem to have had a very considerable knowledge of working in iron long before the final settlement of the Israelites, for we read in Judg.1.19, 4.13 of the iron chariots they possessed, and owing to the possession of which they were enabled to assert their superiority in warfare over the Israelite tribes in the plains in the earlier periods of the invasion (1.19). Of the objects made the following, among others, are mentioned: pan, kettle, cauldron, fleshhook (1Sam.2.14), pot (Judg.6.19; 2K.4.38), mug (1Sam.26.12, 16, E.V. cruise), bucket (Is.40.15), helmet, coat of mail, sword (1Sam.17.39, 59), bow (2Sam.22.35), spear (21.16), besides the various vessels used for the temple services (1K.7.13ff.).—these latter were cast (7.46); also axes (2K.6.5), sickles, knives (Deut.16.9; Je.50.16), bolts (Is.45.2, E.V. bars), fetters (Ps.105.18); an iron pen is mentioned in Job 19.14, Je.17.1, and threshing instruments

To the present day among the Bedouin Arabs illustrates what was undoubtedly practised in very early times: the smiths form a kind of caste, and go from place to place and settlement to settlement, and make instruments and carry out repairs. According to the Israelite tradition, bronze and iron-work was done in primeval times (see Gen.4.22), though it

the smith is called hārash barzel, "the cutter of iron" (Is.44.12), the carpenter hārash 'ēr, "the cutter of wood" (2Sam.5.11), the mason hārash 'ābhen, "the cutter of stone" (2Sam.5.11; Is.44.13). The smith, as being the earliest of the three, is also called simply hārash (1Sam.13.19; Je.10.9); another, later, word for smith is maṣgēr, and for mason gōdāher.

The A.V. and R.V. sometimes translate hārash by "carpenter," but without justification; in three cases out of the seven the R.V. has corrected the earlier rendering. (1) Smiths. The custom in vogue at the present day among the Bedouin Arabs illustrates what was undoubtedly practised in very early times: the smiths form a kind of caste, and go from place to place and settlement to settlement, and make instruments and carry out repairs. According to the Israelite tradition, bronze and iron-work was done in primeval times (see Gen.4.22), though it

the smith is called hārash barzel, "the cutter of iron" (Is.44.12), the carpenter hārash 'ēr, "the cutter of wood" (2Sam.5.11), the mason hārash 'ābhen, "the cutter of stone" (2Sam.5.11; Is.44.13). The smith, as being the earliest of the three, is also called simply hārash (1Sam.13.19; Je.10.9); another, later, word for smith is maṣgēr, and for mason gōdāher. of the signet.” Some excellent examples of the engraver’s work with archaic (Heb. character) cut into more or less valuable stones have been discovered, and the art of engraving gems is now known to be as old as the time of Moses (they were cut with a drill); e.g. a gem has been found engraved with the name of Kurigalzu I. (c. 1480 B.C.). The more specific names for engraver are ṣophāṭeḥ (Zech.3.9) and ḥōḏkh (Job 19.24). According to Ne.38.32 there seems to have been a guild of goldsmiths; and although only mentioned late, it is highly probable that such a guild existed much earlier. The goldsmiths must very early have become differentiated from the smiths, though it seems certain that the first workers in gold and silver must have been familiar with the rougher work. In Ne.11.35 (cf. 1Chr.4.14) mention is made of “the valley of the smiths”; the incidental way in which this is referred to as though well known seems to imply that it was an ancient centre of such work. The raw material was probably obtained by the Israelites, in part, from the Egyptians, who possessed copper-mines in the Sinaic peninsula (cf. Job 28.2); but the Phoenicians must, from all accounts, have done most to supply this. See, among other passages, Ezek.27.1f., and the various references to Solomon’s dealings with them. Cyprus, the Lebanon mountains, and Spain, are for the localities from which the Phoenician traders got their material. The implements used in metal working mentioned in the Bible are: the graving-tool (ḥeret), the iron furnace for smelting (ḥār), the refining-pot for silver (mas-rēpḥ), the anvil (paʿam), the hammer (patišh), and the bellows (mapṭāḥ); see, for these, Ex.32.4; Ezek.22.18; Pr.17.3; Isa.41.7; 1 Chr.6.29. In N.T. the only smith mentioned is the silversmith (Ac.19.23; cf. Rev.9.18). (3) Carpenters and Masons. It is questionable, judging from the custom of the East to-day, whether these were separate callings, for it is frequently found that the mason—which includes building—is also a carpenter. As referring to woodwork, we have the mention of carvings (miq-la‘āḥ) of fir, cedar, and olive-wood (1K.6.18, 32, 34, 7.31); another word, pīlūhīm, is used of the carved figures of the cherubim (1K.6.29). But the carved work for the temple, carried out as it must have been by specially skilful artificers, was not the normal work of the car-

must have been familiar with the rougher work. In Ne.11.35 (cf. 1Chr.4.14) mention is made of "the valley of the smiths"; the incidental way in which this is referred to as though well known seems to imply that it was an ancient centre of such work. The raw material was probably obtained by the Israelites, in part, from the Egyptians, who possessed copper-mines in the Sinaic peninsula (cf. Job 28.2); but the Phoenicians must, from all accounts, have done most to supply this. See, among other passages, Ezek.27.1ff., and the various references to Solomon's dealings with them. Cyprus, the Lebanon mountains, and Spain, are for the localities from which the Phoenician traders got their material. The implements used in metal working mentioned in the Bible are: the graving-tool (ḥeret), the iron furnace for smelting (ḥār), the refining-pot for silver (maσ-rēpḥ), the anvil (paʿam), the hammer (patišh), and the bellows (mapṭāḥ); see, for these, Ex.32.4; Ezek.22.18; Pr.17.3; Isa.41.7; 1 Chr.6.29. In N.T. the only smith mentioned is the silversmith (Ac.19.23; cf. Rev.9.18). (3) Carpenters and Masons. It is questionable, judging from the custom of the East to-day, whether these were separate callings, for it is frequently found that the mason—which includes building—is also a carpenter. As referring to woodwork, we have the mention of carvings (miq-laʿāḥ) of fir, cedar, and olive-wood (1K.6.18, 32, 34, 7.31); another word, pīlūhīm, is used of the carved figures of the cherubim (1K.6.29). But the carved work for the temple, carried out as it must have been by specially skilful artificers, was not the normal work of the car-
of mud, clay, pieces of unhewn rock, worked stone, right up to finely chiselled slabs—have been graphically shown by recent excavations on the site of ancient Gezer by the Palestine Exploration Fund. In the houses of the wealthy, the inside of the walls were plastered: the plasterers (t̄ḥiȳm) are mentioned in Ezek.13.11. (4) Pottery was one of the most important handicrafts mentioned in the Bible. In the earlier literature the potter is not often referred to, probably because the ancient custom of using skin and wooden vessels continued even beyond nomadic days (cf. Gen.21.14; Ex.7.19; Lev.15.12; Judg.4.19; 1Sam.16.20). One of the earliest references to the potter’s vessel (kēlî ʾyôfēr) is in 2Sam.17.28, though obviously pottery was in use long before the time of David. From Is.41.25 we learn that the potter first of all trod down the clay; this softened it and prepared it for the potter’s wheels (ʾobhnayim; i.e.18.3), which were originally of stone, as the name implies, later of wood. They consisted of a lower and an upper disc (the former being the larger), which revolved in opposite directions on the same vertical axle; the lower was driven by the foot of the potter, while the clay was placed upon the upper wheel and formed by the hand (Eccles.38.29-31). The vessels were then baked in an oven. In later times the clay was glazed by means of oxide of lead (Pr.26.23, “silver dross”). In the time of Jeremiah the valley of the son of Hinnom, “which is by the entry of the gate of the potters’,” was evidently a special place for pottery works (Je.19.1-2). An immense number of specimens of the potter’s art have been recently found on the sites of Gezer, Lachish, and Taanach; one of the most interesting is a bowl 8 in. high and 10 in. across, belonging to the pre-Semitic period, which was constructed without the potter’s wheel. Of the different potter’s vessels mentioned in the Bible earthen vessels generally are called kēlî herēs; vessels of large size, kadh (Gen.24.14), a pitcher for storing water; pārūr (Judg.6.19), a pot for cooking purposes; or kūr (1K.3.11), a larger pot; ʾaḇbha (i.e.35.5), a large bowl. Smaller vessels are, ṣāḇiq (i.e.19.10), a flask; ṣappākah (1Sam.26.11), a jar or cruse; pakh (iSam.10.1), a bottle; and ḫāw (Ps.23.5), a drinking-cup. (5) Of glass-work only the scantiest notices are to be found in O.T. Babylonians, Phoenicians, and Egyptians were all acquainted with the art before 2000 B.C., so that the Israelites must have known of it, though they evidently did not understand its manufacture until late in their history. Glass (ʾāḥāqālāḥ, R.V. crystal), mentioned with gold, hence clearly regarded as very precious, occurs in Job 28.17; this is the only reference to it, for the “hand-mirror” spoken of by the prophet (Is.3.23) was of polished metal. The words in Pr.23.31, “Look

PHOENICIAN POTTERY, DISCOVERED BY CESNOLA IN CYPRUS.
not thou upon the wine when it is red, when it
giveth its colour in the cup,” “have been supposed
to imply that the cup was of glass; there is no
sufficient ground for the supposition, but even
were it so, it would not necessarily mean that
the cup had been manufactured in Palestine.
(6) One of the most important handicrafts
among the Israelites was that of the weaver.
This, which concerned itself almost ex-
clusively with the manufacture of clothing
apparel, was originally practised by the women alone,
though later by men too. As at the present
day in Palestine, so, no doubt, in very early
times, a handloom of the horizontal type
was used. The frame in which the warp (i.e. a num-
ber of parallel threads) was fixed was of wood,
and the woof (i.e. a number of threads running
at right angles to the warp) was worked with
the hand; but it is clear, from the large num-
ber of references to weaving, etc., in O.T.,
and the many kinds of words used, that much more
elegant and elaborate methods must have come into vogue
in comparatively early times. It must suffice
here merely to mention the chief of these.
Women spun (tôôd) wool, flax, goats' and
camels’ hair, and sheep’s wool; the spindle
(pēlekhot) is mentioned, e.g. 2Sam.3.29 (Heb.),
Pr.31.19; that which was spun (i.e. the yarn)
is called matwe (Ex.35.25); the word for
“to weave” is 'āragh (Judg.6.13); the loom
is called 'eregh (16.14); massekhd and mas-
sekhet (Is.25.7 [Heb.]; Judg.16.13) are both
used for the web; skēthi (Lev.13.48) is the
warp; dalld (Is.38.12) the loom; the weaver’s
beam (mwnôr 'ôrghim) is mentioned in 1Sam.
17.7, 2Sam.21.19; and the rather difficult
expressions bottim lhhaddim (lit. “houses
for the rods”) and bottim labb'rithim (lit. "houses
for the beams"), both of which are explained
by being called "rings" (labb'r'îkh), are also
evidently connected with weaving (Ex.25.27,
26.29), judging by the context. The woof
Handkerchief, Napkin, Appron. The two former of these terms, as used in A.V. = σοφάδραν, the latter = σμηκίνθων. Both are of Lat. origin: σουφάδραν = sudarium, from sufo, "to sweat"; σμηκίνθων = semicinctium, i.e. "a half girdle." The sudarium is noticed in N.T. as a wrapper to fold up money (Lu.19:20); as a cloth bound about the head of a corpse (Jo.11:14, 20, 27), being probably brought from the crown of the head under the chin; and lastly as an article of dress that could be easily removed (Ac.19:12), probably a handkerchief worn on the head like the keffiyeh of the Bedouin. According to the scholiast quoted by Schlesner, the distinction is that the sudarium was worn on the head, and the semicinctium used as a handkerchief.

Hannah, a daughter of Phanuel, and the wife of Elkanah, is spoken of only in 1 Sam. 1:20, "Hannah is the name of the third Hebrew maiden in the list of the heads of the tribe of Levi, and she is said to have been the mother of Samuel (1 Sam. 1:20)." The name Hannah means "Grace" or "Favor," and it is believed to be a reference to the grace and favor given to Hannah by the Lord in the form of a son, Samuel. Hannah's story is told in detail in 1 Samuel 1-2, where we see her struggle with barrenness and her ultimate joy in the birth of Samuel. Hannah is often used as an example of a woman who trusted in the Lord and found favor in His eyes.

Handkerchief, or a piece of cloth, was a common item in the ancient world, used for various purposes such as wiping one's face or hands. In the biblical context, handkerchiefs were frequently mentioned, particularly in connection with the tabernacle and temple. They were used as part of the clothing of priests and other religious officials. Handkerchiefs were also used for ceremonial purposes, such as covering the altar or the throne of the Lord. In addition, handkerchiefs were used in everyday life for practical purposes, such as wiping one's face or hands.

Hannah, a woman of faith, is a significant figure in the Old Testament. She is known for her song of praise, the Magnificat (Luke 1:46-55), in which she gives glory to God for choosing her to be the mother of Samuel. Hannah's story is found in 1 Samuel 1 and 2, where we see her struggle with barrenness and her ultimate joy in the birth of Samuel. Hannah is often used as an example of a woman who trusted in the Lord and found favor in His eyes. Her story is a reminder of God's faithfulness and the importance of trusting in Him, even in the midst of our struggles.
HANNIEL, son of Ephod, and prince of Manasheh at the division of Canaan (Num.34:23).

Hanoeh. —1. Third son of Midian (Gen. 25:1).—2. Eldest son of Reuben (Gen.46:6 ; Ex.6:14 ; 1 Chr.5:3), and founder of the family of the Hanochites (Num.26:5).

Hanun.—1. Son of Nahash (2 Sam.10:1, 2 ; 1 Chr.19:1,2), king of Ammon, who dishonoured the ambassadors of David (2 Sam.10:4), and involved the Ammonites in a disastrous war (2 Sam.12:1, 11 Chr.19:6), the termination of which may have been celebrated (2 Chron. 12:24), and the capture of Jerusalem (2 K.1-K.24) with Solomon. If this assumption is correct, it would approximately fix the date of this war.—2. A man who, with the people of Zanoah, repaired the ravin-gate in the wall of Jerusalem (Ne.3:13).—3. The sixth son of Zalaph, who also assisted in the repair of the wall, as in the history of the east side (Ne.3:30).

Haphrah (two wells; Jos.19:19), a town of Issachar. The Omomasticon places it at Affarea, 6 miles N. of Legio; now el Farrelyeh, a ruined 6 miles N.W. of Leijan. [c.r.c.]

Hara (1 Chr.5:26 only). Possibly for Haran, noticed with Haror as a place to which the family of Laban was driven (Gen.31:18). [c.r.t.]

Haradah, a desert station of the Israelites (Num.33:24,25); its position is uncertain.

Haran.—1. Third son of Terah, and youngest brother of Abram (Gen.11:26). Three children are ascribed to him—Lot (27:31) and two daughters, viz. Milcah, who married his brother Nahor, and Jocasta, who married his brother Shem. Nahor was born in Ur of the Chaldees, and died there while his father was still living (28). The ancient Jewish tradition is that he was burnt in the furnace of Nimrod for his waver ing conduct during the fiery trial of Abraham.—2. A son of Caleb, by his concubine Ephah (1 Chr.2:46).—3. A Gershonite Levite, of the family of Shim'uel, in the time of David (23:9).

Haran, the place whither Abraham migrated from Ur of the Chaldees (kasdim), and where the descendants of his brother Nahor established themselves (cf.Gen.24:10 with 27:43). It is said to be in Mesopotamia (Gen.24:10), or more definitely, in Padan-aram (25:20), the cultivated district of the north-eastern part of Syria well applying to the country which lies below mount Masius between the Kabir and the Euphrates. About midway in this district is a village still called Harran, upon the Belik (ancient Bilihus), a small affluent of the Euphrates. The name is probably the Babylonian Harun (road), being on a trade route to W. The land of the kasdim (A.V. Chaldeans) was near the Kabir River (see Ezk.1:3). [c.r.c.]

Haarate, The, a description occurring thrice in the list (2 Sam.23:11,13; cf. 1 Chr.11:27,31,35) of David's guards; of Agee, Shammah, 4, and Shamar.

Harbonah (Esth.1:10) or Harbonah (7, 9), the chamberlain of Ahasuerus, who suggested the hanging of Haman on his own gallows.

Hare (Heb. 'arnebeth) occurs only in Lev.11:6 and Deut.14:7, amongst the animals disallowed as food by the Mosaic law; and there is no doubt that 'arnebeth, the equivalent of the Arab. shammah, is rightly translated. Several species of hares are found in Syria and the adjacent countries, such as Lepus syriacus of Syria and Palestine, L. judaeus of Palestine, L. sinaticus of mount Sinai and N. Arabia, L. arabicus of Arabia Felix, and L. aegyptius of Egypt and Arabia. The idea that hares chew this cud is erroneous [Goyen]. [R.L.]

Harel. [Ariel.]

Hareph, a son of Caleb, and "father of Beth-gader" in the genealogies of Judah (1 Chr.2:51 only).

Ha'reth, a "wood" (ya'ar) near Adullam (1 Sam.22:3), where David hid. The LXX. renders it "city," and, with the Chaldee, Khairis, among the wooded spurs of the valley of Elah, 7 m. N.W. of Hebron. [c.r.c.]

Harhahai, father of Uziel, 6 (Ne.3:8).

Harhas, an ancestor of Shallum, the husband of the prophetess Huldah (2 K.22:14).

Harhur, the sons of Harhur were Nethinim who returned from Babylon with Zerubbabel (Ezr.2:51; Ne.7:53).

Harim.—1. A priest in charge of the third division in the house of God (1 Chr.24:8).—2. Bene-Harim, probably descendants of the above, numbering 1,017, came up from Babylon with Zerubbabel (Ezr.2:39; Ne.7:42). Probablv Ezr.10:5 and Ne.10:5 refer to same family.—3. The name occurs again in a list of the families of priests "who went up with Zerubbabel," and of their descendants in the next generation (Ne.12:15). In the former list (12:3) the name is changed to Rehum.—4. Another family of Bene-Harim, 320 in number, came from captivity at the same time (Ezr.2:51; Ne.7:35). They, like 2, had married foreign wives (Ezr.10:31), and had sealed the covenant (Ne.10:27).

Hariph (Ne.7:24,10:19), a place in Judea, perhaps the ruin Khurif, 3 miles S. of Adullam. [c.r.c.]

Hariot. (1) Israelis were forbidden to make their daughters prostitutes (Lev.19:29) (Family, D.I(s)); the daughter of a priest being burnt (21:9); nor might the wages of a prostitute be brought into God's house for any vow (Deut.23:18[19]). The son of a prostitute was not entitled to inherit (Judg.11:1f.). Prostitutes wore a distinctive dress (Gen.38:9, 27); see Pr.7.

(2) Religious prostitution was common in some heathen cults (Ba.6.11, etc.). It was strictly forbidden among the Israelites (Deut.23:17[18]), but appears to have been practised (Ho.4:14; cf. Am.2:7, etc.). [H.M.W.]

The sin implied in the term πορνή is denounced by St. Paul (Rom.6:13ff.) as the violation of natural and spiritual law. This sin was notoriously prevalent in Corinth. Lu.15:30 is the only passage in N.T. which may imply prostitution for gain. Harlots who repeated on hearing the warnings of the Baptist are by our Lord contrasted with the unrepentant Pharisees (Mt.21:32). Rahab, the harlot, by her faith in the God of Israel (Jos.2:1; Heb.11:31), which showed itself in action (Jas.2:25), was saved when Jericho was destroyed (Jos.6:17). If πόρνη is used symbolically for a city (Rev.17.1, 5,15,16,19.2), with ref. to a similar usage in O.T.—e.g. Is.8.15ff.; Na.3.4. [H.H.]

Harne pher, one of the sons of Zophah, of the tribe of Ephraim (1 Chr.8:27), a descendent of Laban, by his sister, Abigail, daughter of Nahash, and daughter-in-law of Saul (1 Sam.25:2). The name is probably the Babylonian Harnepher, the equivalent of the Hebrew name Harneh, from the verb Harneh, to be a protector, to be in the midst of a people, to be a friend, to have a country. [Goyen.]

Harod, Well of (R.V. "spring of"; the spring of trembling). By this well Gideon and
his army encamped against the Midianites (Judg.7:1), and here the trial of the people by their habit of drinking apparently took place. It was the scene of the Midianite camp (see 3:33), and thus E. of that city and S. of the Midianite camp (7:1). The present 'Ain Jalūd (Goliath's spring), which forms a large pool under the S. cliffs, appears a suitable site. [C.R.C.]

Harodite, The, the designation of two of the three warriors of David's guard, Shammah and Elika (2Sam.23:25), doubtless derived from a place named Harod.

Harooth, son of 'Shobal, father of Kiriath-jearim' in the genealogies of Judah (1Chr.2:52).

Harorite, The, the title given to Sham-moru, one of David's guards (1Chr.11:27).

Harosheth of the Gentiles (goyim), where Sisera, lord (sār) of king Jabin's chariots, dwelt (Judg.4:2,13,16), and whence he advanced (E.) to Ta'bor (ver. 6). Probably el Harathiyeh, a village N. of the Kirshon, 8 miles S.E. of Haifa, commanding the gorge, and on the edge of the oak woods to its E.

Harp (Heb. kinnōr, of uncertain origin). The kinnōr was the national instrument of the Hebrews, and well known through Asia. Its invention is assigned to the antediluvian period (Gen.4:21). The author of Shilte Haggubbon, described as resembling the modern kinnōr, harp, and St. Jerome declared it to have resembled in shape the Gk. letter delta. Josephus says that the kinnōr had ten strings, and was played on with the plectrum; others assign to it 24, or 47 (Shilte Haggubbonim); while in 1Sam.16:23,18:10 David is said to have played on the kinnōr. Probably there was a smaller and a larger kinnōr, and these may have been played in different ways (10:5). The word for "harp" (qithārōs or qathōs, LXX. kithēs, a cithara or lute) in Dan.3 is a different one, and is said to be Gk. in origin; but its etymology is disputable. [C.R.C.] The lyre is represented on an ancient Hittite seal from the site of Mer'ash in Syria, and at Be'ni Hasan in Egypt one of the Edomites (c. 2200 B.C.) has a ten-stringed lyre. It occurs with 9 strings on Jewish coins. At Thebes the harp proper is represented with 13 strings, and it also appears on an Assyrian bas-relief of 7th cent. B.C., which represents a procession of Elamites. In this case it has the form assigned by St. Jerome (see above) to the kinnōr.

Harrow. The Heb. word (2Sam.12:31; 1Chr.20:3) means some "spiked " iron instrument, and in Is.41:15 the mōrag bāhā'ā is the "spiked threshing sledge." [Agriculture.] The verb "harrow" (A.V. Is.28:24; Job 39:16; Ho.10:11), or "break ceds," means to smooth or flatten. It may refer to the dragging of a thorn-bush after the plough, or to rolling with a stone roller, in each case drawn by cattle, as is still done in Palestine. The word "cart-wheeled" (Is.28:27, ūphān 'ágēlādē', or "wheel!" (Pr.20:26), refers rather to a "roller." Iron harrows are not used in the East. [C.R.C.]

Harsha. Sons of Harsha were Nethinim who came back from Babylon with Zerubbabel (Ezr.2:52; Ne.7:54).

Hashmannim

Hart. The hart is reckoned among the clean animals (Deut.12:15,14:5,15:22), and seems, from the passages quoted as well as from Is.4:1, to have been commonly killed for food. The Heb. masc. noun, however, certainly refers to some kind of deer, and perhaps toad deer generally. The fallow deer (Cervus dama) occurs in Asia Minor and N. Palestine, and the Mesopotamian fallow deer (C. mesopotamicus) in Luristan, N. Persia; while the maral or eastern red deer (C. elaphus maral) is found in N. Persia, Transcaucasia, and probably in Asia Minor. [FALLOW DEER; HIND; ROE. [R.L.]

Harum', father of Aharhel, in an obscure genealogy of Judah (1Chr.4:5).

Harumaph, father of Jedaiah, 2 (Ne.3:10).

Haruphite, The, the designation of Shephahiah, 6 (Ec.1:25). [Haruph.]

Haruz, a man of Jotham; father of Mesech-lenneth, the queen of Manasseh (2K.21:19).

Harvest. [Agriculture; Year.]

Hasadiah, a man in the royal line of Judah (1Chr.3:20), apparently a son of Zerubbabel.

Hashab'nah (i.e. the Sennah), a Benjamite, ancestor of Sallu, 1 (1Chr.9:7).

Hashabjah'.—1. A Merarite Levite, and ancestor of Ethan the singer (1Chr.6:45[30]).—2. Another Merarite Levite (9:14).—3. A son of Jeduthun (25:3), who had charge of the twelfth ward of the Levite musicians (19).—4. A Hidreichite officer, in the time of David, on the W. (R.V. 'beyond Hidreich') of Judah (2Sam.20:5).—5. Son of Kemiel, and prince of Levi in the time of David (27:17).—6. A Levite leader, who made offerings at king Josiah's great passover-feast (2Chr.35:9).—7. A Merarite Levite, who accompanied Ezra from Babylon, to serve as one of the 'ministers' (rEs.8:46-48, 'priests') in the return of the Jews (Ezr.8:19). Perhaps the same as—8. One of the chief of the priests in the same caravan who had charge of the sacred vessels (8:24).—9. Ruler of the half part of Keilah. He repaired a portion of the wall of Jerusalem under Nehemiah (Neh.3:17).—10. One of the Levites who sealed the covenant of Josh.24:26; one of the Levites who took away the Captivity (10:11). Probably this is the chief of the Levites named in Nehemiah's time (12:24; cf. 26).—11. A Levite, ancestor of Shemaiah (11:15).—12. A Levite, ancestor of Uzzah, the overseer of the restored Levites (11:22).—13. A priest of the family of Hilkiah, in the days of Josiah, son of Jeshua (12:21).

Hashabnah', one of the leading laymen who sealed the covenant (Ne.10:25).

Hashabniah.—1. Father of Hattush (Ne.3:16).—2. One of the Levites who officiated at the great fast under Ezra and Nehemiah, when the covenant was sealed (9:5).

Hashabniah. One of the men (probably Levites) who stood on Ezra's left hand, while he read the law to the people (Ne.8:4).

Hashem. Sons of Hashem the Gizonite were members of David's guard (1Chr.11:34). For a suggested emendation of this passage, see LASHEN.

Hashannim' (Ps.68:31, Heb.). "fat ones"; in Vulg. legati. A.V. is probably correct in rendering "Princes shall come out of Egypt." Is.35.6 has sh'mannim, "fat things." The idea that Hashannim was a proper name,
HASHMONAH

derived from Hermopolis Magna, can hardly be maintained. [A.H.P.]

Hashmonah', a station of the Israelites, next before Moresheth (Num.33.29).

Hashub' (R.V. correctly Hashshub).—1. A son of Nahath-moa, who assisted in the repair of the wall of Jerusalem (Ne.3.11).—2. Another assistant in the repair (3.23).—3. One of the heads of the people who sealed the covenant with Nehemiah (10.23). Possibly the same as 1 or 2. —4. A Merarite Levite, father of Shemaijah, 5 (11.15).

Hashubah', the first of a group of five men, apparently the latter half of the family of Zerubbabel (1Chr.3.20).

Hashum.—1. Bene-Hashum (Est.2.19; Ne.7.22) can be built from Babylon with Zerubbabel. [A.H.P.] Seven of them had married foreign wives, from whom they had to separate (Est.10.33; called Asom in 1Esdr.9.33). Their chief was among those who sealed the covenant (Ne.10.18).—2. One of the priests or Levites who stood on Ezra's left hand, while he read the book of the law before the congregation (13.4).

Hashupha'. [Hasupha.]

Hasmonaeans. [Maccabees, The.]

Hasrah' (2Chr.34.22) = Harhas.

Hassenaah'. The Bene-has-senaah rebuilt the Fish Gate in the repair of the wall of Jerusalem (Ne.3.3). [Senah.]

Hashubah'. Bene-Hashubah (Ne.7.46, Hashupa') were Nethinim who returned from Babylon with Zerubbabel (Ezr.2.43).

Hat. [Head-dress.]

Hatach', a eunuch of Ahasuerus, and personal attendant of Esther (Esth.4.5f).

Hatath', son of Othniel (1Chr.4.13).

Hatipha'. Bene-Hatipha' were Nethinim who returned from Babylon with Zerubbabel (Ezr.2.54; Ne.7.56).

Hatita'. Bene-Hattita' were "porters" (i.e. the gate-keepers), who returned from the Captivity with Zerubbabel (Ezr.2.42; Ne.7.45).

Hatitall', Bene-Hattitall' were among the "children of Simon the slave," who returned from Zerubbabel (Ezr.2.57; Ne.7.59).

Hattush'.—1. A descendant of the kings of Judah, in a confused genealogy (1Chr.3.22). A person of the same name accompanied Ezra (Esth.8.2), or Zerubbabel (Ne.12.2), from Babylon to Jerusalem. Probably it is the name of a family.—2. Son of Hashanahiah; he assisted in the repair of the wall of Jerusalem (3.10).

Hauran', a province of Palestine twice mentioned by Ezekiel (47.16,18), identical with the Gk. province of Auranitis, and the modern Haurān. Josephus frequently mentions Auranitis in connexion with Trachonitis, Baniath, and Golanitis, which with it constituted the ancient kingdom of Bashan.

Havilah'.—1. A son of Cush (Gen.10.7); and—2. A son of Joktan (10.29). [Arabia.] It is thought that the district of Khālūān, in the Yemen, preserves a trace of this ancient people. It lies between the city of San'a and the Hijaz. It took its name, according to the Arabs, from Khālūān, a descendant of Qāḥṭān [Joktan], or, as some say, of Qāhālān, brother of Himyār. It is a fertile territory, embracing a large part of myriphræious Arabia; mountainous, with plenty of water, and supporting a considerable population (see Gen.25.18; 1Sam.15.7).—3. Another Havilah appears to have been on the Persian Gulf (perhaps that of China), in the present district Hauilah, the Ḫawlātow of Strabo (xvi). The word may mean 'sandy.'—4. Havilah in Gen.2.11 was apparently W. of the Caspian Sea (Pison being the Araxes River) near the gold-bearing region of Colchis in the Caucasus. [EDEN.]

Havoth-jair. [Senaah.]

Hattush'.—1. A descendant of kings of Bashan, taken by Jair, 1, and named after him (Num.32.21; Deut.3.14). In Jos.13.30 and 1Chr.2.23 the Havoth-jair are reckoned among 60 I. E. 'cities.' In 1Chr.2.22 they are specified as 23, but in Judg.10.4, as 30 in number. Those in Argob (Deut.3.14) are called 'Bashan-havoth-jair.' [See Gilead.] Apparently some [See Gilead and Bashan.]

Hawk (Heb. ḫātir; Pr.27.25; Is.15.6). The Heb. term occurs frequently in O.T., and denotes 'grass' of any kind. It was cut, as it still is, to feed beasts (see Ps.37.2), and dried up by the sun (Is.5.24,33.11). [Chaff.] The word ḫāṭir (Arab. khudār) means 'green,' and is never mentioned in Palestine, nor represented on the monuments. [C.R.C.]

Hazael', king of Damascus (c. 886–840 B.C.), seems to have been previously a person of position at the court of Benhadad who sent him to Elisha to inquire whether he [Benhadad] would recover from the sickness from which he was suffering. Elisha's answer led to the murder of Benhadad by Hazael, who forthwith mounted the throne (2K.8.5–15). He was soon at war with Ahaziah king of Judah and Jehoram king of Israel for the possession of Ramoth-gilead (ver. 28), and thereafter made many attacks upon Israel. He was not so successful against Assyria, however; for Shalmaneser II, renewing the conflict begun in the time of Benhadad, defeated Hazael in Lebanon, when the Syrian king lost 1,600 men. Another attack on the part of the Assyrians took place later. Towards the close of the reign of Jehu (c. 860 B.C.), Hazael led his forces against the Israelites, whom he smote in all their coasts (10.32), thus fulfilling Elisha's prophecy (8.12). At the close of his life, having taken Gath (12.17; cf. Am.6.2), he proceeded to attack Jerusalem, when Joash bribed him to retire (2K.12.18). He seems to have died c. 840 B.C., and was

HAZAEI
succeeded by his son Benhadad III (13.24), having reigned 46 years. [T.G.P.]

Hazaias (Ne.11.5), an ancestor of Maaseiah, of the family of the Shilonites.

Hazar-abad, etc. [Hazer, 1-7.]

Hazarmaveth, the third, in order, of the sons of Joktan (Gen.10.26). [Arabia.]

The Arab. Hadramaud (dead region) exactly represents the Heb. word. It is the province E. of the Yemen. [C.R.C.]

Hazazon-tamar = Hazazon-tamar. [Engedi.]

Hazel. [Almond-tree.]

Hazeleponi, the sister of the sons of Etam in the genealogies of Judah (1Chr.4.3).

Hazer (Heb. *hazār, Arab. *hāsār, enclosure "), in the plur. Hazerim (Deut.2.23). The Arabs still call the great stone circles of Moab by this name. — 1. Hazer-abad, on S. border of the land of Israel (Num.34.4), answers to Hezron and Adar (Jos.15.3). The name probably survives at *Fajl Hadžireh, in the Th Thetatique N.W. of Petra. — 2. Hazaron (Num.34.9,10; Ezek.47.17,48.1), the NE. end of the land of Israel, on the high road W. from *Zedad (Sudud). It was the N.W. border of Damascus, and on S. border of Hamath, on the Shepham (or "lip") of the Anti-Lebanon, about 6 miles E. of *Rublah. The name, however, has not survived. — 3. Hazar-gaddah (Jos.15.27), a city in S. Judah, of the site of which is unknown. — 4. Hazar-hatticon (the middle village), in the Hauran (Ezek.47.16), is also unknown. — 5. Hazar-shual (Jos.15.28,19.3), near to Beer-sheba, is perhaps *Sawat, a ruin on a hill 8 miles E. of *Bir es Sheba. It was inhabited after the Captivity (1Chr.4.28; Ne.11.27). — 6. Hazar-susim (Jos.19.5), or Hazar-susim (1Chr.4.31; the village of horses), may have been at *Sūsā, 10 miles S. of *Gaza. — 7. Hazarmaveth (Hadramaud). [Arabia.]

Hazor, a royal city of the Canaanites (Jos.11.1,10,13,12,19), probably Hazor of Naphthali (19.36), near Ramah. The most suitable site is 2½ miles S.W. of modern Sur of Kāmāch, or 3 miles S.W. of Hannathah. Its king had a force of chariots, so that it was probably near the plains (Judg.4.2,17). It was perhaps noticed later (1K.9.15; 2K.15.29). Josephus thought it was in Upper Galilee, which is improbable. [Mekorim.] It is noticed in 14th century B.C. by the Egyptian traveller (the Mohar), in connexion with towns of Lower Galilee; and a century earlier two of the Amarna letters may come from this Hazor (Brit. Mus. 47, 48). — 9. Hazor (Jos.15.23), near Kedesh, in S. of Judah, is unknown. — 10. (Jos.15.25) = Kersōth-hevron. [Kerioth, 2.] — 11. In Je.49.28,30,33, a kingdom near Kedar. — 12. Hazor of Benjamin (Ne.11.33), now the ruin Hazzur, 4 miles N.W. of Jerusalem. — 13. Hazor-hadattah (Jos.15.25), in S. of Judah, is unknown. [En-Hazor.] [C.R.C.]

Hazeroth (Num.11.35,12.16,33.17; Deut.1.1), the third camp of Israel after leaving Sinai. Now *Am Hadzhrah (which correctly represents the place) lies from Sivan on the S.W. 20 miles, and 60 miles from Tell el Asfar [Shepherd], these distances giving an average daily journey of 10 miles. [C.R.C.]

Hazezon-tamar, Hadzezon-tamar (Gen.14.7; 2Chr.20.2). [En-Geddi.]

Haziel, a Levite of the younger branch of the Gershonites, in David's reign (1Chr.23.9).

Hazoo, son of Nahor by Milcah (Gen.22.22).

Hazor (Heb. *hazōr, 8-15.)

Head-dress. *šā'īh, is noticed as being worn by nobles (Job 29.14), ladies (Is.3.23), and kings (Is.62.3), while the *pēr was an article of holiday dress (Is.61-3, A.V. beauty: Ezek.24.17,23), and was worn at weddings (Is.61.10). The former describes a kind of turban or shawl, and its form probably resembled that of the high-priest's *meni-wepeth, as described by Josephus (3 Ant. vii. 3). *pēr primarily means an ornament, and is so rendered in A.V. (Is.61.10; see also ver. 3, "beauty"), and is specifically applied to the head-dress from its ornamental character. It is uncertain what the term properly describes, but it may have been applied to the jewels and other ornaments with which the turban is frequently decorated. The ordinary Bedouin head-dress is the *kefiyeh, a square handkerchief, generally of red and yellow cotton, or cotton and silk, folded so that three of the corners hang down over the back and shoulders; it covers the face except for the round head by a cord. It is worn over a felt cap, which is also worn alone, and represented on Syrian monuments. The *kefiyeh appears as a Syrian head-dress in Egyptian pictures of Canaanites in 13th cent. B.C. The introduction of the Gk. hat by Jason, as the habit of the gymnasia, was regarded as a national disfigurement (2Mac.4.12). The Assyrian head-dress is described in Ezek.23.15 as "exceeding in dyed attire." The word rendered "hats" (R.V. mantles) in Dan.3.21 properly applies to a cloak.

Heathen. The Heb. *at corresponds to our 'stove.' It was of stone or clay; placed in the centre of a room, slightly sunk into the floor (Je.36.22,23). [W.O.E.O.]

Heath, Heb. *ārā‘ (Je.48.6) and *arā‘. Celsius identifies the *arā‘ (Je.17.6) with the *ar‘ar of Arab. writers, which is some species of juniper; but there is no true juniper in these parts of the wilds in the wilds of the Sinai peninsula. The tree or grove of trees intended, the Tamarisk is the proper interpretation. Tamarisk is fond of "salt lands," and the name *ar‘ar (naked) might well be applied to it. "Heath," in our acceptance, is particularly open to objections. [H.C.H.]

Heaven. The Heb. *gey, from a root meaning "to collect," has properly the significance of "a mass of people," and so "a nation." But as used by the Israelites, who regarded themselves as separated from all others by their distinctive religion, the word easily acquired a religious meaning, and A.V. rightly translates it "heaven." The "nations," as worshippers of their several tribal gods, stand in sharp contrast to the Israelites, as servants of Jehovah. Yet the fundamental teaching of O.T. shows a considerable breadth of view, in that the heathen are regarded as the objects of God's care and the recipients of the blissful promises from Sinai (Gen.17.14). The settlement in Palestine was accompanied by wars of extermination of the heathen; and these wars are represented as being the
execution of the will of Jehovah (Deut. 20:16); for, however far removed from the spirit of Christianity, they are regarded by O.T. as a stern vindication of the law of holiness and as the punishment of wickedness. The prophets aimed at separating the people from the heathen around them, that the spiritual worship of Jehovah might not be degraded. But after the return from exile the spirit thus fostered deepened into a false pride and a narrow exclusiveness. So grew up Pharisaic Judaism, which was quite opposed to the spirit of the prophetic teaching. The struggles of nationalism under the Hasmonaean, with temporary success followed swiftly by failure, intensified the spirit of proud exclusiveness, and made it very difficult for the Jews to accept the catholic teaching of Christianity, which overlaps all national distinctions. In it the spirit of exclusiveness absolutely disappears, and even the policy of isolation, adopted by the prophets to preserve the purity of their religion, is exchanged for one of missionary intercourse, in order that the knowledge of the universal religion might spread through the world (Mt. 28:19).

Heaven. There are three Heb. words thus rendered in O.T. (1) רַחֲלָה (firmament), a vault or vast expanse through its latticework (Gen. 7:11; 2K.7:12,19) or doors (Ps. 78:23) the dew and snow and hail are poured upon the earth (Job 38:22,37). This firm vault, which Job describes as being "strong as a molten mirror" (37:18, R.V.), is transparent, like peellucid sapphire, and splendid as crystal (Dan. 12:3; Ex. 24:10; Ezk. 1:22; Rev. 4:6), over which rests the throne of God (Is. 66:1; Ezk. 1:25), and which is opened for the descent of angels, or for prophetic visions (Gen. 28:17; Ezk.1:1; Ac. 7:56; 10:11). In it, like gems, the stars are fixed to give light to the earth and regulate the seasons (Gen. 1:14-19); and the whole sky seems to be supported by the mountains as its pillars (2Sam. 22:8; Job 26:11). (2) אֶרֶץ (earth), used in the expression "the heaven and the earth," or "the upper and lower regions" (Gen. 1:1). (3) שֵׁהָקַתִם, lit. dust; so, thin cloud that looks like powder (Deut. 33:26; Job 35:5). A fourth word, מַדְרֹמָה (properly = exalted), used in the context of heaven, means "on high" (Ps. 18:16; Je. 25:30; Is. 24:18). The Jews seem also to have thought of a series of heavens (1K.8:27; Eph. 4:10), consisting of three (cf. 2Cor.12:2) or of seven. But of far greater importance than the physical, is the theological conception of heaven, as revealed especially in the prophecies, where it is often a symbol of "Blessing," "Praise," "The Kingdom," and "Rest." In heaven the Omnipresent God is especially present in two ways: (a) as there especially manifested to His angels who behold His face (Mt. 18:10); (b) as there perfectly obeyed by the angels who do His will. This perfect angelic knowledge and obedience, which is our example and ideal, ("Hallowed by Thy name, Thy kingdom come, Thy will be done, in earth as it is in heaven "), makes heaven the home of pure bliss, to which no ill can come, because there the all-wise and loving God of wisdom is realized as also almighty. The kingdom of heaven is the Kingdom of God in power.

Heaven is far removed from the earthliness of earth, where God's will is disobeyed and there is sin and misery. Yet the kingdom of heaven has been founded on earth also, and as it grows heaven is brought nearer to earth. So St. John, as the crown of his vision, sees earth redeemed, and heaven descending to earth in the New Jerusalem (Rev. 21). The same thought is expressed otherwise in the form that the saints, made perfect, will be taken up into heaven. The description of the "holy city, new Jerusalem" in Rev. 21 and 22 suggests the following thoughts about heaven: (1) a "city," i.e. civic and social life, enriched by the "glory and honour of the nations," i.e. the activities of art; (4) God is the Light to all and the centre of all. Art. "Heaven," by S. D. F. Salmond, in Hastings, D.B. (5 vols. 1896-1905). See also the Book of Revelation, the "apocalypse of life"—e.g. Salmond, Christian Doctrine of Mortality; and for the Jewish conceptions of heaven, see books on O.T. theology, e.g. those of A. B. Davidson, Dehler, and Schultz. (s.c.g.)

Heave-offering. [SACRIFICE, 3, v. c.; FIRSTINGS.]

Hebrew. To the Semitic group of races (which contains the Babylonians, Assyrians, Moabites, Ammonites, Arabs, and Phoenicians) the Hebrews belonged, and their relation to them is marked by an affinity of language. The Semitic Hebrew language. The Hebrew Stone shows that the Hebrew language was closely akin to that of Moab. Also a community of traditions is found, which marks a common stock. The Creation Tablets of Assur-bani-pal show a conception clearly derived from the same source that underlies the early narratives of Genesis. But this community of origin emphasizes the distinctive characteristics of the Hebrew race. The Hebrews stand apart from all other Semitic races as the servants of Jehovah, who is holy and requires holiness from His people. With this supreme note of the Hebrew religion we may contrast the cruelty of Chemosh, as represented on the Moabite Stone, and also the entire absence of all moral tone or teaching from the crude narratives of the Amarna tablets. The Hebrew race, alone of the primitive Semitic peoples, stands for a lofty morality, however far performance may have lagged behind principle. The origin of the name "Hebrew" is probably to be found in the root רָבָה, which as a verb ('dhabar) means "to pass over" or "emigrate." Their migrations had a religious significance (Gen. 12:1; Ex. 3:8); and so kindred nations thought of them preeminently as "the emigrants." It is notice-
able accordingly that the term "Hebrews" is generally used by way of contrast with other nations; but when there is no thought of other races, these people, who prided themselves on their ancestral covenant, prefer to describe themselves as "sons of Israel." In HEBREWS are contrasted with "Hellenists," the former term being used of those who preserved the traditions of Palestinian Judaism, as against the admission of Greek influence. For the 'Abiri, see PALESTINE.

HEBREWES

[HEBREWES.]

Hebrews. Epistle to. (1) Date. From internal evidence, while the Jewish ceremonial was still observed. For this is necessary (a) to his argument (7.14; cf. 9.9); (b) to the situation of his readers: since their trial consisted in reconciling their Christianity with their views of the manner of the older covenant. It was also written after the first generation of believers had died—i.e. 60-70 a.d. (2) Author. Variously ascribed to Barnabas (Tertull., De Pud. 20), Clement of Rome, and St. Luke (both mentioned by Origen in Euseb. vi. 25), St. Paul, Apollos, St. Peter, etc. St. Peter, however, Origen remarks, "Who the author is, God only knows" (Euseb. vi. 25). Its anonymous character certifies its genuineness; for it does not impersonate an apostle, as a forger might have done, and it shows that the apostolic church possessed another singularly able mind beside St. Paul. (3) Purport. (a) Pathological, to show the finality of the Christian revelation, by demonstrating the perfect priestly character of Christ and His sacrificial work—in order to satisfy Jewish-Christian misgivings. (4) Contents. Three main divisions: A. Contrast between the agents of the two covenants (1-7). A magnificent opening sentence declares that revelations made formerly through created ministers, and characterized by fragmentoriness of substance and diversity of form, are now completed by a new revelation, the Mediator of which transcends prophets, angels, and Levitical system in dignity, inasmuch as He stands in human and divine perfection. (b) His humanity (2.5 to end). How Christ in the Incarnation reveals man's destiny. The prophecy of mankind's ultimate complete dominion (6-8) is in Christ already fulfilled (9). His humiliation in humanity, so far from being incompatible with His majesty, is essential to His redemptive work (10). Sanctifier and sanctified (11) must closely resemble one another in all possible respects. Thus the Son, notwithstanding the immensity of the difference between their sonship and His, condescends to incarnation (14), death (14, 15), and temptation (17, 18); with the result that He became qualified through sympathy acquired by experience for His high-priestly work. Moreover, his conscious experience of death was (in virtue of His sinless perfection) absolutely unique in its character and effects (20). In difficulties to faith, presented by the humiliation of Christ, are (on profounder reflection) converted into proofs of His claims. Already then (in 2.17) the writer has introduced his central theme—the high-priesthood of Christ. This he leaves for a time to show Christ's superiority to Moses (3.1-6), and to urge again the seriousness of neglect (3.7-4.13). Then the idea of priesthood is resumed (4.14-5.10) and defined (5.1). The two essential qualifications are (a) human sympathy (5.2, 3), and (b) divine vocation (ver. 4). Both these our Lord fulfilled (vv. 5-8). Thus, Son though He was, He learned obedience, and became (not in His filial, but in His mediatorial capacity) perfected in His humanity (vv. 9, 10). With these high-priestly qualifications, He was divinely proclaimed high-priest after the order of Melchisedek (5.10; Ps. 110). But here again comes a digression, caused by the reader's unreciprocation (v. 11), so that emphasis is laid on the consecration of the priesthood of Melchisedek, which is affirmed to characterize the priesthood of Christ (7). Ps. 110 was recognized as Messianic; cf. Mt. 22.44; Lu 20.42. Thus the writer begins with an idea originating in the psalm. What did the Psalmist mean by this reference? A. The divine person of the writer gives a mystic exposition based on the psalm. Both the affirmations and omissions in Genesis are held suggestive of great ideas. Positively, Melchisedek suggests a priest whose personal characteristic is righteousness, and whose work is peace. Negatively, the omission of any reference to antecedents and transmitted authority, to birth or death, suggests the idea—not, of course, historically true of Melchisedek, but true of the scriptural account of him—of simple permanence: "abideth a priest continually." The superiority of this priesthood over the Levitical is suggested by Psalms of Abraham's sacrifice. (a) His humanity confirmed by the Psalmist's ascription to the Messiah of a Melchisedekian rather than an Aaronic character (7.11). And whereas the Levitical succession replaced its temporary officials as death removed them, the Melchisedekian conception of permanence is realized in the priesthood of Christ. B. Contrasts between the two covenants (8-10.18). The difficulty suggested by the removal of the ancient covenant is here discussed (8). A new covenant was anticipated under the old (Je 31)—a fact impossible had the old possessed completeness. The superiority of the new covenant to the old is thus demonstrated in two aspects: (a) In the sanctuary (Heb.9). The old covenant had a sanctuary of this world—i.e. locally and essentially earthly and transitory (9.1)—manifestly inadequate for inward perfection (9.9). Whereas the new has for its sphere the heavenly sanctuary, which is the spiritual counterpart to the earthly, and wherein Christ's heavenly priesthood works. (b) In the sacrifice (10.1-18). Already the author has
HEBRON

Hebron (alliance).—1. A city close to which was the oak of Mamre, apparently to its W. (Gen. 13.18, 23, 25, 27). It was originally called Kirjath-arba. It is noticed in 28 chapters of the O.T. It is said to have been 7 years older than Zoan (Num. 15.22), or as old as about 2200 B.C. It had a "vale" (Gen. 17.19) and vineyards near it (Ex. 3.18). It was taken by Joshua and destroyed (Josh. 10.36), being a royal Canaanite city (12:10); afterwards a city of refuge and of priests (15.7, 21.11, 13, 1 Chr. 6.55, 57). It was again attacked by the tribe of Judah (Judg. 1.10-20). David reigned for 7½ years in Hebron (2 Sam. 2:11; 7:21; 1 Chr. 3.4, 29, 27). He had a "pool" (2 Sam. 4.12), where Ishbosheth's murderers were hanged. It was fortified by Rehoboam (2 Chr. 11.10), and smitten by Judas Maccabeaus (1 Macc. 5.65). It is now the town called Khallil or Kalam, "Friend of the Merciful One" (Abraham), lying in an open mountain valley, 18 miles S. of Jerusalem. It is a stone town, with a high hill to E., and open ground with lower hills to W. Its population is about 18,000, who are Moslems, except 1,000 Jews. It has 25 springs and 10 large wells, besides tanks, of which the largest—built by the Sultan Kala-wun in 13th cent. A.D.—may be on the site of the ancient "pool." There are fine vineyards to N., and an olive grove to W. The gardens also grow pomegranates, figs, quinces, and apricots. The oak of Mamre (a Sinuas, or Quercus fricta — oak, which may be several centuries old) is shown 2 miles N.W. of Hebron. The most famous site, however, is that of the cave of Machpelah, now shown in the Haram enclosure. The town runs S.E. for ½ mile along the valley, and the Haram is on the E. side. The enclosure measures 197 ft. by 110 ft., and its walls, to a height of 25 ft. above the inner court, are of masonry identical with that of Herod's temple ramparts at Jerusalem, some stones being 25 ft. long. The southern part is occupied by a 12th-cent. church, now a mosque, with two minarets at the corners of the Haram. A shaft from the church floor leads to a chamber about 12 ft. square, 15 ft. below the platform; and in its side—facing N.W.—a low tomb door is visible. A staircase, now closed, is said to lead into the inner cave, which, though apparently visited by Jews in 12th cent. (Rabbi Benjamin of Tudela) and in 13th (Rabbi Samuel), has not been described in recent times. Gk. text of 6th cent. invocations of Abraham, are built into the church walls. This is the reputed site of the

HEBRON, FROM THE N.W. (From an original sketch by Col. Conder.) W.D.A.

**Hedge.** Three of the Heb. words thus rendered in A.V. denote simply that which surrounds or encloses, whether it be a stone wall (geder, Pr. 24. 31; Ezek. 42. 10), or a fence of other materials: gadhêr and gadhêrâd are used of the hedge of a vineyard (Num. 22. 24; Ps. 89. 40; 1Chr. 4. 23), and the latter is employed to describe the rude walls of stone, or fences of thorn, which served as a shelter for sheep (Num. 32. 16). The stone walls around the sheepfolds of the other son of Manasseh (Num. 3. 12), is clearly distinguished in Is. 5. 5 from the thorn hedge, mûsâkhkh (Pr. 15. 19), which was planted as an additional safeguard to the vineyard (cf. Ecclus. 28. 24). Thorn hedges are noticed in the Mishna (Baba Kama iii. 2), and continue to be used as well as stone walls in Palestine. [C.R.C.]

**Helier.** [CATTLE.]

**Helfer, Red (Num. 19. 1-10).** [PURIFICATION.]

**Helir.** In O.T. see **Family.** In N.T. the term κληρονομας is applied to (1) Christ. Sonship naturally implies heirship (Gal. 4. 7), and Christ is the first-born heir (Heb. 1. 5). (2) Believers, who, as brethren of Christ (Ro. 8. 29; Heb. 2. 11), are His co-heirs (Ro. 8. 17) and God's heirs. In Christ they find their highest fulfilment (Ro. 4. 13; cf. Gen. 12. 3, 22. 17, 18), they are the true seed, and inherit the promises (Gal. 3. 29; cf. Mt. 5. 5). They are heirs of the kingdom (Jas. 2. 5; Mt. 25. 34), of the promise (Eph. 3. 6; Heb. 6. 17), of eternal life (Tit. 3. 7; Mt. 19. 29, 25. 40), of salvation (Heb. 1. 14), and of the grace of life (i.e. eternal life; 1Pe. 3. 7). See also Rev. 21. 2. (3) The patriarchs, who by faith became heirs of the promise: Noah (Heb. 11. 7), Abraham, Isaac, Jacob (11. 6). [TESTAMENT.] [H.H.]

**Helah,** one of the two wives of Ashur, "father" of Tekoa (ver. 4).

**Helam** (2Sam. 10. 16, 17), an unknown place. [MEDeba (1Chr. 19. 7).]

**Helba,** a town of Asher (Judg. 1. 31). The site is unknown. [C.R.C.]

**Helbon,** a place famous for wine, near Damascus (Ezek. 27. 18). Now Helbon (identified by Porter), a village with fine vineyards, 13 miles N. of Damascus. [C.R.C.]

**Helchiah** (1Esd. 8. 1), Helchias (2Esd. 1. 1), = Hilkiah, 2.

**Heldal.**—1. The Netophathite; the captain for the twelfth month for the temple service (1Chr. 27. 15).—2. An Israelite returned from the Captivity, for whom, with others, Zechariah was commanded to make symbolic crowns (Zech. 6. 10).

**Held** (2Sam. 23. 29), Held (1Chr. 11. 30), son of Baanah the Netophathite, and one of David's guard.

**Heldum** (Num. 26. 30), a descendant of Manasseh, through Gilead, from whom sprang the **Helemites.**

**Heleph.**—1. A descendant of Asher; if 'brother' (1Chr. 7. 35) refers to Shamer (ver. 34, cf. 35), he may be the same as Hotham.—2. (Zech. 6. 14.) Apparently the same as Heldai, 2.

**Helep,** a border town of Naphtali (Jos. 19. 33). Perhaps Beit Lif (Vandeveldt), 12 miles S.E. of Tyre, on the W. border of the tribe, towards the N. [C.R.C.]

**Helez,—1.** One of the Thirty of David's guard ("the Paltite," 2Sam. 23. 26; "the Pelonite," 1Chr. 11. 27.), an Ephraimite, captain of the seventh monthly course.—2. A man of Judah, son of Azariah (1Chr. 2. 39).

**Helcotes,** a town of the tribe of the Virgin Mary (Lk. 2. 33). [GENEALOGY OF JESUS CHRIST.].—2. The third of three names inserted between Achitob and Amarias in the genealogy of Ezra, in 2Esd. 1.2 (cf. Ezr. 7. 2-3).

**Helias** (2Esd. 7. 39) = **Elejah.**

**Heliodorus, the treasurer of Seleucus Philopator.** Mentioned by Josephus as one who took away the private treasures deposited in the temple. He was stopped by a "great apparition," and fell down speechless; but was restored by the intercession of the high-priest Onias (2Mac. 3. 7).

**Helipolitis.** [Beth-she'mesh, 4.]

**Helkaï, a priest of the family of Meraioth, in the days of Jokam (Ne. 12. 15).**

**Helkath** (Jos. 19. 25. 21. 31), a Levitical city of Asher. The site is doubtful. [C.R.C.]

**Helkath-hazzurim** (field of swords), apparently close to the pool of Gibeon, where the combat took place between the two parties of Joab's and Abner's men (2Sam. 21. 16).—2. A place in the territory of Bethel. [C.R.C.]

**Helkias** (1Esd. 1. 8) = Hilkiah, 2.

**Hell.** This word has been used in two widely different senses. (1) The abode of the departed generally; employed in this sense repeatedly in A.V. for the Heb. sh'ol (e.g. Ps. 139. 8), and the Gr. Hades (e.g. Ac. 2. 27). In R.V. hell is retained in this sense in one passage only (Is. 14. 9-15); elsewhere Hades in N.T. and sh'ol in O.T. are simply transliterated. sh'ol is sometimes translated in A.V. by the "pit" or "the grave." It is, of course, with the meaning (1) that the Apostles' Creed says our Lord "descended into hell." (For sh'ol and the condition of the dead there, see **Future Life.**)

(2) The place of final punishment for the damned. In modern English the word has come to be used entirely in this sense, and for this reason is employed in the R.V. of N.T. only where the word Gehenna is found in the original Gr. This word is (with one exception of Jn. 3. 36) confined to the Synoptic Gospels, where it is used 11 times. In all cases it is put into our Lord's mouth by the evangelists. There is no doubt that our Lord used the word Gehenna as a name familiar to the Jews who heard Him, and as conveying familiar ideas
Hellenistic Greek. The term "Hellenistic" is properly applied to all such, and only such, Greek literature which was written by persons who were not Hellenes by birth, but "Hellenists": to Hellenize being to affect or imitate Hellenic speech or manners.
Hellenistic Greek

and a Hellenist any foreigner (in N.T. a Jew) who did this. Practically the term is limited to Gk. spoken or written by Orientals. But in the other sense it has a further limitation, frequent, though not consistently maintained, to Jewish Gk. Hence the term "Hellenistic Greek" may (with almost equal reason) be used (a) as equivalent to Judaico-Hellenic, or (b) in a wider sense which will include the Gk. spoken by natives of Egypt, Syria generally, and Alexandrian Jews. Such persons have the authority of eminent scholars. While admitting the wider sense, we may say (with Dr. Swete, Intro. to the O.T. in Greek, p. 294) that "the Jewish Gk. spoken in Palestine was 'Hellenistic' in the strictest sense," and that the term "is applied with special appropriateness to the Alexandrian Bible usually called the LXX." The Gk. of the LXX. is "Hellenistic" (a) because in it Gk. is made the vehicle of Heb. thought, feeling, and phrase—in other words, because the greater part of the Gk. O.T. is, in intention, a literal, though not always an accurate, translation of Heb. originals; and (b) because the colloquial Gk. of Alexandria (203-25 B.C.) or the later, was based on the large and self-contained Jewish community resident in the city from its foundation. But the books which had no Heb. original were written by men of rhetorical culture in a Gk. not colloquial but literary; and though some of them (e.g. Wisdom) exhibit in style and vocabulary many characteristics of the Hebraic diction of the canonical books, others (e.g. 2-4 Maccabees) are, like the writings of Philo, "Hellenistic" only in the formal sense of having been written by Jews. In N.T. determination of the constituent elements of the diction employed is a matter of greater difficulty. The writers of N.T. were all, there can be little doubt, bilingual; as was probably the major part of the population of Palestine and of all Syria. Syrian Gk., and consequently the basis of the Gk. of N.T., was but a slightly provincialized variety of that ordinary Gk. which was known as "the common literary dialect," and which, inheriting the vocabulary of Xenophon and of Aristotle, but abandoning the characteristic forms and subtleties of "pure Attic," was, in 2nd cent. B.C., used by the historian Polybius, and thenceforward by all writers excepting such as affected archaisms or "Attic" style. This universal dialect naturally included Macedonian elements, and (after the Roman conquest of the Gk.-speaking world) a few Latinisms. As spoken in Palestine, side by side with Aramaic, it naturally reflected—and sometimes refracted—certain features of the alternative speech. As written by Jews conversant with the O.T. (through Aram. Targum, or Gk. LXX.), it necessarily reproduced (or was modified by) Hebraic modes both of thought and of expression. But here a very strong distinction should be drawn. While most of the thought is Hebraic, the expression of it is predominantly Hellenic. In other words, the language of N.T. is a mixture of the living Gk. and "Hellenistic," because written by Jews, and charged with conceptions which are either plainly Jewish or derivative from conceptions created by Heb. prophets; also because many of the words and phrases of which it consists are taken direct from the LXX.; yet it is always traditional of the authors, and apostolic authors are far more Hebraic in style than others. The proportion of Hebraisms is greatest in St. Matthew and the Apocalypse, least in the Lucan books and (very remarkably) in the Ep. to the Hebrews, the language of which is both in vocabulary and style purer and more vigorous than that of any other book of the N.T. (Westcott, Hebrews, p. xlvii). Finally, the distinguishing feature of Biblical "Hellenistic" Gk. is that in it many classical Gk. words (e.g. παρελθεῖν, προσφέρω, καθάρσις, λειτουργεῖν, πράξεως, πίστις, πνεῦμα, σάρξ) obtained from their use in the LXX. version and in the N.T., new connotations. [J.M.S.]

Helmet. [Arms, Defensiv. 4.] Helon, father of Eliab, 1 (Num. 1.9, etc.).

Hem of garment, i.e. the fringes or tassels on the four corners of the large oblong outer garment. They were of white threads, with a single blue one (not ribbon, as in A.V.; Num. 15.38-40; Deut. 22.12). They are now attached to two garments: the tallith, worn during morning prayer and on festivals, and the tallit, a small undergarment worn during the whole day. When the special blue dye became scarce, white threads only were used. Great importance always attached to the fringes, and the Pharisees enlarged them as a sign of sanctity (Mt. 23.5). Our Lord conforming to this, added to other precepts of the Mosaic Law (Mt. 23.5-16; Mk. 8.35, 9.14). Eisenstein, Code of Life, pt. i. ch. iii.; Hastings, D.B. (5 vols. 1904), art. "Fringes." [H.I.H.]

Hemam', son of Lotan, the eldest son of Seir (Gen. 38.22).

Heman.—1. Son of Zerah (1Chr. 2.6; 1 K. 4.31).—2. Son of Joel, and grandson of Samuel the prophet, a Kohathite. He is called the "singer," rather, the musician (1Chr. 6.33), and was the first of the three Levites to whom was committed the vocal and instrumental music of the temple-service in the reign of David (1 Chr. 15.16-22). Asaph and Ethan (or, according to 25.3, Jeduthun) were his colleagues. In 1 Chr. 25.1-7, "Heman", is reckoned in the matters of God." He had fourteen sons and three daughters. Whether this Heman is the person to whom Ps. 88 is ascribed is not absolutely certain. He is there called the "Ezrathite"; and Ps. 89 is ascribed to "Ethan the Ezrathite." Since Heman and Ethan are described in 1 Chr. 25-26 as "sons of Zerah," Ezrathite may mean "of the family of Zerah," and, if so, the Heman of Ps. 88 would appear to be different from Heman the singer, the Kohathite. But if Heman the Kohathite, or his father, had married an heiress of the house of Zerah, and was so reckoned in the genealogy of Zerah, then all the notices of Heman might point to the same person.

Hemath. Occurs twice in A.V.—1. 1 Chr. 2.55 (R.V. Hammath), "the father of the house of Rechab," although Jonadab is elsewhere named as the ancestor of the Rechabites (1K. 3.5-6). The discrepancy has not been satisfactorily explained. —2. Am. 6.14 (R.V. correctly, Hamath). [J.R.]

Hemdan', eldest son of Dishon, son of Anah the Horite (Gen. 36.26). [Amram, 2.]

Hemlock. [Gall.]
HEN

Hen. According to A.V. of Zech.6.14, Hen is a son of Zephaniah. But, following the LXX., many take the words to mean "for the kindness of the son of Zephaniah" (cf. ver. 10).

Hen, noticed in the Bible in Mt.23.37 and Luke13.34; nec fide.

Hena', a city of a seemingly monarchal state, subjected by the Assyrians during or before the time of Sennacherib (2K.19.13; Is. 37.13). Anath, which is mentioned by Assur-nasir-apli (880 B.C.) as situated on an island in the Euphrates, has been suggested as the place intended—i.e. it is identified with 'Anah, on the right bank of the stream.

Henadad, head of a Levite family which took a leading part in rebuilding the temple (Ezr.3.9).

Henna. [Campire.]

Henoch.—1. (rChr.1.3) = Enoch. 2. —2. (rChr.1.33) = Hanoch.

Hepherd.—A son of Gilead, head of the family of the Hephrites, and father of Zelophehad (Num.26.32-33,37.1; Jos.17.2-3).

-2. Son of Ashur, the "father" of Tekoa (1Chr.4.6).—3. The Mecherathite, one of the heroes of David's guard (rChr.11.36 only).

Hepher.—1. (Jos.15.17.) A royal Canaanite city (Curt.5.2).—2. (rK.4.10) noticed with Sochoh (Scocno) and Aruboth, apparently in the Hebron mountains. The word means a "well."—Arab. Hattirleh—but the site is unknown. [c.r.c.]

Hepzhibah.—1. (My delight in her.) A name which is borne by the restored Jerusalem (Is.66.3). It was perhaps also a component of 2. The queen of Hermon, the Heze-kiyah, and mother of Manasseh (2K.21.1).

Herald, Dan.3.4 only (Aram. kâroθ, "crier"); but kphōs, kphōsōn ("preacher"). "preach", rTim.2.7, etc.) are lit. "herald," or "proclaim as a herald." [h.s.]

Heracles was the name generally given by the Greeks to Hercules, a supposed hero of the Trojan tutelary deity, whose national title was Melkarth (i.e. king of the city). The prevalence among the Hebrews of the worship of Hercules, under the generic title of Baal, was largely due to Abab's Phoenician wife, Jezebel (1K.16.31 II). In 174 B.C., Jason, brother of Onias III, sent an offering intended for the sacrifice of Hercules (2Mac.4.19-28). [c.d.]

Hered, Herdsman. Cattle were used by the Hebrews for milk, and the ox for ploughing, e.g. [Agriculture], but, except as sacrifices, the flesh was not generally eaten. Hence Moses exclaims, "Shall the flocks and herds be slain for them?" (Num.11.22); and in Palestine herds are still the wealth of a village, only occasionally providing a victim for a feast or a vow. [Butter; Cart; Cheese.] Bashan and Gilead were great cattle-breeding regions (Ezk. 39.18; Num.32.1). The pure Egyptians hated the foreign "shepherds" who ruled them (Gen. 46.34; see 43.2), but the foreign Pharaoh himself had cattle (47.6), as well as his subjects (ver. 16) and the Hebrews (Ex.12.38). Cattle only find grass in spring in Palestine, and are fed with fodder at other times (Job 6.5); see Chaff. They were slaughtered when not in the field (Ex.9.19). The younger men whose fathers were rich in cattle were the herdsmen (rSam.11.5).

Solomon had special officers over cattle (1Chr. 27.29). The wages of herdsmen and their duties (cf. Gen.31.38-41) are laid down in the laws of Hammurabi, king of Babylon, as early as 2100 B.C. The Egyptian and Assyrian records contain many allusions to the great wealth of Palestine in herds and flocks, from 1500 to 700 B.C. Amos was a herdman in a pastoral region at Tekoa (Am.1.7-11). [c.r.c.]

He'res, Mount (Judg.1.35), near Aijalon; unknown. [c.r.c.]

Her'esh, a Levite attached to the tabernacle (1Chr.9.15).

Her'mas, the name of a Christian in Rome greeted by St. Paul at the close of his epistle to the Romans (16.14). Nothing further is known of him. Origen and others have identified him with the author of The Shepherd. But this is a mere guess. The name Hermas was exceedingly common, and the character of The Shepherd is not of such a composition in its Greek text as to make it very improbable. [a.c.d.]

Her'mes, a man saluted by St. Paul in Ro. 16.14. According to tradition he was one of the seventy disciples, and afterwards bishop of Salona in Dalmatia.

Hermo'genes, mentioned by St. Paul with Phebe (or Phoebe) and Priscilla (1Cor.1.1), as among the "all in Asia," who had turned away from him. The meaning of the phrase was, doubtless, clear to Timothy, but is less evident to us. It may mean the general trend of opinion in Asia Minor, or the Asiatics then in Rome to whom St. Paul had looked vainly for assistance. [a.c.d.]

Her'mon (separate), the great outlier of the Atlas range, which is, as among the "all in Asia," who had turned away from him. The meaning of the phrase was, doubtless, clear to Timothy, but is less evident to us. It may mean the general trend of opinion in Asia Minor, or the Asiatics then in Rome to whom St. Paul had looked vainly for assistance. [a.c.d.]

He'mon, an officer of the Assyrian army (Is.37.9). His name is written "He'mes," or "Hep'mas," or "Hep'mes, by the name of which probably a name which (in 14th cent. a.d.) applied to the range to its N. "The Hermens" are contrasted (Ps.42.6) with Mizar. It is coupled with Tabor as a sacred mountain (89.12), and the dew of Hermon is said to fall on Zion (133.3). It is again distinguished from Shechem and Mount Ebal (Deut.11.29). The name is early as 843 B.C. on an Assyrian text. The cypresses of Hermon are coupled with the cedars of Lebanon (Ecclus.24.13). It is probably the "high mountain" of the Transfiguration [Caesarea Philippi]. The summit is formed by three low peaks, and the highest appears to have been a place of sacrifice, and was circled by a low wall of Roman masonry. A cave is hewn hard by. In the Onomasticon a temple on the summit is noticed as still frequented in 4th cent. A.D. There are several other small Greco-Roman temples on the lower slopes. The summit is bare, but fine vineyards occur lower down; and, on W., where the sandstone cliffs rise up under the limestone, there are fir-trees and pines. [c.r.c.]

Her'monites (Ps.42.6[7]) = the Hermens. [Hermont.]

Her'od. Various accounts are given of the ancestry of the Herods. It seems certain that they were of Idumæan descent. Aliens by race, they were Jews in faith. The general
policy of the whole Herodian family centred in the endeavour to gain the favour of the Romans. They were agreeable and competent, and understood the art of bribery.—1. Herod the Great was second son of Antipater (who was appointed procurator of Judaea by Julius Caesar, 47 B.C.), and of Cypros, an Arabian of noble descent. At the time of his father's elevation, though only 15 years old, he received the government of Galilee, and shortly afterwards that of Coelosyria. When Antony came to Syria (42 B.C.), he appointed Herod and his elder brother Phasael tetrarchs of Judaea. Herod was forced to abandon Judaea the next year by an invasion of the Parthians, who supported the claims of Antigonus, the representative of the Hasmonaean dynasty, and fled to Rome (40 B.C.). At Rome he was well received by Antony and Octavian, and appointed, by the senate, king of Judaea, to the exclusion of the Hasmonaean line. With the help of the Romans, he took Jerusalem in 37 B.C., and completely established his authority throughout his dominions. After the death of Antony, he married Octavia, Octavian's sister, at Rhodes, and his noble bearing won for him the favour of the conqueror, who confirmed him in the possession of the kingdom, 31 B.C., and in the next year increased it by the addition of several important cities, and afterwards gave him the province of Trachonitis and the district of Paneas. The remainder of the reign of Herod was undisturbed by external troubles, but his domestic life was embittered by an almost uninterrupted series of injuries and cruel acts of vengeance. Terrible acts of bloodshed were perpetrated by Herod both in his own family and among his subjects. He is said to have ordered the nobles whom he had summoned in his last moments to be executed immediately after his decease, so that that event might be attended by universal mourning. It must have been at the time of his fatal illness that he ordered the slaughter of the infants at Bethlehem (Mt.2:16-18); and from the comparative insignificance of the murder of a few young children, in an unimportant village, it is not surprising that Josephus does not mention it. In dealing with the religious feelings of the Jews, Herod showed no regard for public opinion. But while he thus alienated the affections of the Jews, he adorned Jerusalem with many splendid monuments; above all, the temple, which he rebuilt with scrupulous care. This restoration was begun 20 B.C., and completed in a year and a half. But fresh additions were constantly made in succeeding years, so that the temple was "forty and six years in building" (Jn.2:20), from the commencement of Herod's work to the completion of the latest addition then made.—2. Herod Antipas was son of Herod the Great by Malthace, a Samaritan. His father had originally destined him as his successor in the kingdom, but by the last change of his will appointed him tetrarch of Galilee and Peraea 1 (Mt.14:1; Lu.3:19,9,7; Ac.13:1; cf. Lu.3.1). He first married a daughter of Artes, "king of Arabia Petraea "; but after some time made overtures of marriage to Herodias, wife of his half-brother Herod Philip, which she received favourably. Artes, indignant at the insult offered to his daughter, found a pretext for invading the territory of Herod, and defeated him with great loss. This defeat, which was an act of revenge on Josephus (18 Ant. v. 2), was attributed by many to the murder of St. John Baptist, which had been committed by Antipas shortly before, under the influence of Herodias (Mt.14.4ff.; Mk.6.17ff.; Lu.3.19). Eventually the ambition of Herodias proved her husband's ruin. She urged him to go to Rome to gain the title of king (cf. Mk.6.14); but he was opposed at the court of Caligula by the emissaries of Agrippa, and condemned to perpetual banishment at Lugdunum, 39 A.D. Herodias voluntarily shared his punishment, and he died in exile. Pilate took occasion (from our Lord's residence in Galilee) to send Him for examination (Lu.23.6ff.) to Herod Antipas, who came up to Jerusalem to celebrate the Passover. The city of Tiberias, which Antipas founded, and named in honour of the emperor, was the most conspicuous monument of his long reign.—3. Herod Philip I. (Philip, Mk.6.17) was son of Herod the Great and Mariamne, and must be carefully distinguished from the tetrarch Philip. He married Herodias, sister of Agrippa I., by whom he had a daughter Salome. Herodias, however, left him, and made an infamous marriage with his half-brother Herod Antipas (Mt.,
HERODIANS

14.3; Mk.6.17; Lk.3.19). He was excluded from all share in his father's possessions in consequence of his mother's marriage (4.15). Herod Philip II. was son of Herod the Great and Cleopatra. He received as his own government Batanea, Trachonitis, Auranitis, Gaulanitis, and some parts about Jamnia, with the title of tetrarch (Lk.3.1). He built a new city on the site of Paneas, near the sources of the Jordan, which he called Caesarea (Mt.16.19; Mk.8.27), and raised Bethsaida to the rank of a city, under the title of Julias, and died there 34 A.D.

1. He was married Salome, daughter of Herod Philip I.

—5. Herod Agrippa I. was son of Aristobulus and Berenice, and grandson of Herod the Great. Brought up at Rome with Claudius and Drusus, after a life of various vicissitudes, he was thrown into prison by Tiberius, where he remained till the accession of Caligula (Caligula, 37 A.D.), who gave him the governments formerly held by the tetrarchs Philip and Lysanias, and bestowed on him the title of King (Ac.12.1), and, on the banishment of Antipas, received his dominions also. Afterwards Agrippa I. was son of Philip and Lysanias, with the title of King (41 A.D.) the government of Judaea and Samaria. Unlike his predecessors, Agrippa was a strict observer of the law, and successfully sought the favour of the Jews. It was probably with this in view that he put to death St. James, the son of Zebedee, and imprisoned St. John the Baptist (Mk.6.17-29), but his sudden death interrupted his ambitious projects. In the fourth year of his reign over the whole of Judaea (44 A.D.) he attended some games in honour of the emperor at Caesarea. There (12.21) his flatterers saluted him as a god; and he was suddenly seized with terrible pains, and (being carried from the theatre to the palace) died after five days' agony.

—6. Herod Agrippa II. was son of Herod Agrippa I. and of Cypros, a grandniece of Herod the Great. When his father died (44 A.D.), he was at Rome. Not long afterwards, however, the emperor gave him (c. 50 A.D.) the tetrarchy of Chalcis, which had belonged to his uncle's king. He was so successful in this that the tetrarchies formerly held by Philip and Lysanias, with the title of King. His relations with his sister Bernice (25.13) caused suspicion of grave evil. In the last Roman war Agrippa took part with the Romans, and after the fall of Jerusalem retired with Bernice to Rome, where he died in the third year of Trajan (100 A.D.). The appearance of St. Paul before Agrippa (60 A.D.) offers several characteristic traits—e.g. the "pomp" with which the king came into the audience chamber (25.23); and the cold irony with which he met the impassioned words of the apostle (26.27,28).

Herodians. The Herodians were scarcely a distinct party. They were rather men of various parties, who from various motives—longing for national independence, hatred of a heathen rule in Jerusalem, sympathy with Herod's compromise between Judaism and Hellenism—hoped for a restoration of Herod the Great's kingdom. When his son Antipas died, the bond uniting the Herodians was a political aspiration. That aspiration Christ opposed, not merely by His warning against the "leaven of Herod" (Mk.8.15), or His condemnation of Antipas as "that fox" (Lk.13.32), but by the whole tenour of His teaching. And so the Herodians joined the Pharisees, in futile plots against His destruction (Mt.22.16ff.; Mk.3.6), and in Jerusalem, by the question of the tribute money (Mt.12.13ff.), trying to force Him either to discredit Himself with the people, or else embroil Himself with the Roman authorities, and so secure His own condemnation. [C.D.]

Herodias, daughter of Aristobulus and of the sons of Mariamme and Herod the Great; and so sister of Agrippa I. She first married her uncle, Herod Philip I.; then she left him and married his half-brother and her step-uncle, Herod Antipas, whose wife then living with him was the daughter of Aeneas, or Aretas, king of Arabia. For the injury done to his daughter, Aretas made war upon Herod and routed him with the loss of his whole army. The head of St. John Baptist was granted to Herodias' request (Mt.14.8-11; Mk.6.24-28). According to Josephus, the murder was committed in the fortress Machaerus, which looks down from the E. upon the Jordan. Herodias went with Antipas into exile at Lucidunum.

Herdion, a "kinsman" of St. Paul dwelling at Rome; perhaps of Aristobulus' household (Lightfoot). Late tradition makes him bishop of either Tarsus or Patra (Ro.16.13).

Heron. The Heb. 'ānāphā ( = nose or beak) appears in an Assy. list of birds as anpūs, and as an unclean bird, or rather perhaps a group of birds, in Lev.11.19 and Deut.14.18, but whether it really denotes the members of the heron tribe (Ardeidae) is uncertain. Many members of the group, such as the grey heron (Ardea cinerea), purple heron (A. purpurea), egret (A. garzetta), buff-backed heron (A. bubulcus), and the squacco heron (A. rallioides) inhabit Palestine. [r.l.]

He'sed. The son of Hesed was ruler for Solomon in the district of "the Aruboth, Socoh, and all the land of Hepher" (1K.4.10), i.e. in the tribe of Naphtali.

Heshbon, the capital of Sihon, king of the Amorites, who expelled the Moabites (Num.21.25-28; Je.48.45). It was rebuilt by the Reubenites (Num.32.37), and is noticed in 7 passages of the Pentateuch in connexion with king Sihon. It was given to the Levites (Jos.21.39; 1 Chr.6.81), and was held for 300 years by Israel (Judg.11.26). It was in the "mishōr," or "plateau" of Moab, and near the S. border of Gad (Jos.13.17,26). It had cornfields near it (Is.16.9,9), and "pools" beside the gate of Bath-rabbim (Can.7.4). It is now the ruined city "Heshbān," on the plateau of Moab due E. of Jericho. The remains are those of the later Roman town; the site is strongly standing on high ground with plains round it. The road from W. ascends a steep slope, and passes through a rock cutting called el Bu-weis (the little gate), which may be that of Bath-rabbim. On the W. slope a fine brook, fed by springs full of small fish, flows S. and W. from "Ain Heshbān." To reach the town fishspools the Songs of Songs perhaps refers. A few oleanders and grassy plots flank the stream; the plain above is fit for corn lands. There is a remarkable group of rude stone
HESHMON, a place named, with others, as lying in the extreme S. of Judah (Jos.15:27). Nothing further is known of it.

Heth, the forefather of the Hititites. In the ethnological tables of Gen.10 and 1Chr.1, Heth is a son of Canaan.

Hethlon', on the N. border of Palestine (Ezk.47:15,48:1). "The way of Hethlon as one goeth to Hamath" is apparently the "entrance to Hamath" (Num.34:8) or gorge of the Eleutherus River.

Hewer. [Handicrafts.]

Hexateuch, The (six-fold-book), the name given in the critical schools to the first five books of O.T. [Pentateuch] and the book of Joshua, which together are supposed to have formed originally one large work. The documents alleged to run through the first five books (J, E, P), are believed to run through the book of Joshua also. This theory is not so easily refuted as might at first sight appear, and it is worth attending to it on closer analysis. It is pointed out, as by Cornill, that the sources are quite differently worked up in the book of Joshua from what they are elsewhere. Others question the existence of the documents. Wellhausen and Steuernagel, e.g., contend that J is not present in the book at all. Wellhausen thinks that the P of Joshua is not the P of the older books. The older P, he supposes, "ceases altogether at the death of Moses." In Joshua "the priestly code," he says, "is simply the filling up of the Jehovistic-Deuteronomic narrative." The Deuteronomic hand also is not that of the author of Deuteronomy. It would seem, then, that the book of Joshua must, after all, be treated as a distinct work. In favour of this is the fact that the Samaritans, who accepted the Pentateuch, have always regarded Joshua as distinct, and possess an independent book of Joshua. [Samar. I (f.6-7].

Hezron, [Handicrafts.]

Hezekiah.---1. The famous king who came to the throne of Judah at a most critical period of Israelite history. His father Ahaz, in order to ward off a hostile combination of the kings of Syria and Israel (see Is.7), had invoked the aid of the Assyrian, and made his kingdom tributary to him. Hezekiah was able to resist, when soon to sweep away the kingdom of the Ten Tribes and to reduce Judah to the very verge of ruin. Moreover, as always, national weakness went hand in hand with religious decline. Ahaz introduced many foreign innovations into the temple service (2K.16:10-18), and he is the father of whom it is recorded that "he made his son to pass through the fire according to the abomination of the heathen." (16:3). To this evil heritage Hezekiah succeeded at the age of 25, according to the chronology of the book of Kings (18.2)—he may have been even younger (cf. 16:2)—but, unlike his father, he allowed himself to be guided by the wise counsel of the prophet Isaiah. "He trusted in the Lord the God of Israel" and "the Lord was with him." (18:5,7). The accounts of his reformation of the religion and worship are given in 18:3-6 and more fully in 2Chr.29-31. The reforms mentioned in Kings were the removal of the high places, the destruction of the pillars and the Asherim, and the breaking in pieces of the brazen serpent to which the people had burned incense. In the narrative of Chronicles great prominence is given to the co-operation of the Levites in those reforms (29:34), and it is to be remembered that the high-priest Uriah had been too compliant a tool in the heathen innovations of Ahaz. Special mention is also made of a great Passover, to which the king invited not only the people of Judah, but all Israel from Beer-sheba to Dan (30:5). Though the invitation was scoffed at by some, yet it was accepted to a degree which shows that the sense of national unity was not entirely lost, and that Jerusalem was taking its place as a rallying-point for the national religion when national independence was passing away. The great Passover was followed by an outburst of iconoclastic zeal on the part of the crowd gathered at the feast, venting itself in a wholesale removal of idolatrous objects throughout the whole country (31:1). How these "high places" were removed by Hezekiah, seeing that they are found existing at the beginning of Josiah's reign. But there seems no good reason for rejecting one part of the narrative and accepting another; and we must remember the awful relapse into idolatry that followed this "high" reign of Hezekiah, shared by Manasseh. In the cases of other pious kings whom he commends, the historian is careful to mention that, in their reigns, the high places were not taken away (1K.15:11-14,22,43; 2K.15:3,4); and he must have had good reason for giving such distinction to Hezekiah, who shares with David and Josiah the place of highest regard in the national tradition (2K.18, 5,23,25; 44,1). The Biblical record of the political events of Hezekiah's reign is strikingly confirmed and illustrated by the Assyrian inscriptions, although there remains some uncertainty as to the precise order of some of the incidents. The kingdom of the Ten Tribes, subdued by the Assyrians and worm-eaten by corruption, hastened towards decay; and in the sixth year of Hezekiah's reign Samaria, after a siege of three years, was taken by Sargon and the kingdom swept away. It is probably in this time of weakness or collapse of authority in the Ten Tribes that Isaiah sees the realisation of the invitation to the Ten Tribes to join in celebrating the Passover. And, since the Assyrians do not appear in Palestine for several years (from 720 to 711 B.C.), this may also have been the time of prosperity referred to in 2Chr.32:27ff., when the king gathered all kinds of store and treasure, and the whole of his war-like undertakings in the Philistine country (2K.18:8). Here, too, in the opinion of many, comes the embassy of Merodach-baladan (20:12); for it was about a year after the fall of Samaria that that king seized the throne of Babylon, and it was his interest to secure, if possible, any alliances that would assist him in his struggle with Assyria. By this time there was a growing uneasiness among the Western nations at the encroachment of Assyria, and their eyes were turned to Egypt as the great power most fitted to head a confederacy for resistance. Hezekiah must have been to some extent involved in the movement, for, in an
inscription of Sargon, the king of Judah is mentioned among the persons plotting sedition and bringing gifts to Pharaoh, king of Egypt. He continued, however, to pay tribute during the reign of Sargon; but, on the accession of Sennacherib, he threw off the yoke (18.7), and formed an alliance with Egypt and Ethiopia. Sennacherib, having first conquered Babylon and pacified his eastern dominions, was not long in turning his attention to the disaffected states in the W. He came with a large army; and it may have been then, if not before, that Hezekiah set about those preparations for defence and precautions against a siege which are related in 20.20 and 2Ch.32.3-8,30. Sidon and the Phoenician cities were sacked by the victorious Assyrians; Ashdod, Ammon, Moab, and Edom sent tribute; and Ashkelon and Ekron, refusing, were captured. An Egyptian force, which had marched out from the Delta, was annihilated at Elteku (21.i), thus isolated and bereft of allies, was swept by the invaders, till the daughter of Zion was "left as a booth in a vineyard, as a lodge in a garden of cucumbers" (Is.1.8). In alarm Hezekiah sent to the king of Assyria, who was besieging Lachish, offering to pay any tribute that might be demanded upon him. (18.i.8). But, though he emptied his treasury and despoiled the temple to furnish the tribute imposed, Sennacherib sent an immense army which surrounded the city and demanded its surrender (18.17ff.). Hezekiah, in his distress, was encouraged by the prophet Isaiah to resist, and assured of deliverance (19.1-8). Sennacherib was besieging Libnah when his officers returned from Jerusalem; and, hearing that Tirhakah was in motion with a large force to meet him, he determined to make another effort to reduce Jerusalem, so as not to leave a powerful enemy in his rear. The threatening letter which he sent was spread before the Lord by Hezekiah in prayer, and again the prophet Isaiah assured him in God's name that the city would remain inviolate. And then, by some mysterious and awful visitation, there was such a mortality in the camp of the Assyrians that the survivors had to drive out the living, and bury the dead in a little s. of Sert. After passing the ruins of Nineveh, Calah, Seleucia, and Ctesiphon, it unites with the Euphrates at Kurna. The stream thus formed (the Shatt al-'Arab) did not anciently exist, and the Tigris flowed directly into the Persian Gulf. It rises S. of lake Golyik, and discharge the overflow into the Euphrates, which joins the Euphrates near Ctesiphon, a little S. of Sert. From the mouth of this stream there is a course of 1,800 miles to the coast; it is the essential river of Mesopotamia, and marks the boundary of the Emirate of the Persian Gulf. [R.G.P.]

Hiel, a native of Bethel, who rebuilt Jericho in the reign of Ahab (1K.16.34); and in whom was fulfilled the curse pronounced by Joshua (Jos.6.26).

Hiera polis. Mentioned only once in Scripture (Col.4.13), with Colossae and Laodicea. Such association is natural; for the three towns were all in the basin of the Maeander, and within a few miles of one another. Its modern name is Pambak Kalesi.

Hierel', 1 (1Esdr.9.21) = Jehiel, 11.

Hierielus (1Esdr.9.27) = Jehiel, 10.

Hier'mas, a native of Amman, very interesting. If learned men in his time oc-
High-priest (hakkohēn haggadhōl; Lev. 21.10; Num. 35.25,28), the head of the priestly body. After the Exodus, until the appointment of Aaron and his sons to the priesthood, the priestly authority culminated in Moses himself, who acted as mediator between God and the people (Deut.5.5,27; cf. Ex.20.19; Gal. 3.19,20), and officiated as priest at the great covenant sacrifice, sprinkling the sacrificial blood upon the altar and upon the people (Ex. 24.6,8). This priestly authority, he, at the direct command of God, delegated to Aaron and his sons (25.1), to whom it was God's gift ("I have given you this high place of gift," Num.18.7; cf. Exod.45.6,7; Num.2.28), in such an exclusive way that no one not of the seed of Aaron might "come nigh," i.e. to act as priest (Num.16.40,18.7; Heb.5.4). Both brothers were recognized to have been priests (Ps.99.6), and as Moses had inaugurated the covenant, so, when he had consecrated and invested Aaron, it became Aaron's duty, and that of his successors in their hereditary tenure of the office, to maintain the covenant, by performing year by year the ceremonial of the Day of Atonement (q.v.). The office of high-priest chiefly consisted for that cleansing and atoning for the sanctuary, which was done in the names of the whole year on which depended the religious services of the whole year (Lev.16.32-34). The Jews had no right or tenure in God's house but what was renewable from year to year; and therefore, at the return of every day of expiation, their term expired, and if they expected to enjoy this privilege for the year now coming they must renew their services and devotions by which they held this privilege of appearing before God. The virtue of the sacrifices offered on the last day of expiation was spent; and priest, people, tabernacle, and altar must be reconciled before they could have any claim or pretence to the honour...
HIGH-PRIEST

of appearing, or being used, before the Divine Majesty in the ensuing year; and therefore the apostle truly observes that 'these sacrifices could not consecrate him that did the service,' i.e. the high-priest himself, 'as pertaining to conscience' (Heb.9.9); that is, they could not consecrate him 'for ever,' or for a perpetuity, as the apostle explains himself. The high-priest knew in his own conscience that his re-consecration was but for the term of one year, and that the whole system of their worship and polity must at the end of that term be reconciled again' (John Johnson, Works, i. p. 189; Anglo-Catholic Library). The contrast between the Old and New Covenant drawn out in the Ep. to the Hebrews turns just upon this point: that whereas the Jewish sanctuary had to be thus re-consecrated year by year, on the Day of Atonement, with the blood of the sin-offerings of atonement, the Christian Church has been consecrated once and for ever by the Blood of Christ. As therefore the high-priest was typical in his chief work, so was he typical in the anointing, which he alone of the priests received (Ex.29.7; Lev.8.12; Ps.133.2), and by which he became 'the priest Messiah' (Lev.4.3,5,16; 16.3-30; 21.10,12; 25.2). The oil employed was 'the holy anointing' oil (Ex.30.22-33), manufactured by certain priests called 'apothecaries' or 'perfumers' (Ne.3.8), which indicated the bestowal of the Holy Spirit for the purpose of qualifying the person anointed for the office upon which he was about to enter (1 Chron.16.16), and it was poured, to show that for the discharge of the duties of his office he needed, and would receive, the Spirit of God in richest fulness, upon his head as the noblest part of the body and true centre of the spiritual life. (Cf. Kurtz, Sacrificial Worship, p. 339; T. & T. Clark. This anointing took place after the bathing (Lev.8.6,10; cf. Is.52.11) and investiture, in which Aaron was clothed with a peculiar dress (Lev.8.7-9), which passed to his successor after his death (Num.20.28). Of this dress four articles—the breeches, the coat or tunic, the girdle, and the turban (= the mitre) were the same as those of the ordinary priest. The robe alone, however, according to Josephus, only worn on the Day of Atonement, were: (a) The robe of the ephod (Ex.28.31-35,39.22-26), woven of one piece without seam or join, and all of blue; it was not so long as the coat, which was visible below it, and round its hem were pomegranates of blue, purple, or scarlet alternated with bells to give a sound when he went in and came out of the Holy Place "that he might not die" (Ex.28.35), or to keep the people who could not see him mindful of what he was doing on their behalf (Eccles.45.9). (b) The Ephod consisted of two parts, of which one covered the chest, and the other the back, enclosed by "the curious girdle" of similar materials, and clasped together on the shoulder with two large onyx stones, each having engraved on it six of the names of the tribes of Israel (Ex.28.6-14). "As a shoulder dress, the ephod was, far excellently, the official dress of the high-priest. The borders of wool were inserted on the shoulder, and the insignia of the office were also worn upon it (Is.22.22). The duty of the high-priest was to enter into the presence of God and make atonement for the people as their mediator. To show, that, as mediator, he brought the nation to God, the names of the twelve tribes were engraved upon precious stones on the shoulders of the ephod. The precious stones, with their richness and brilliancy, formed the most suitable earthly substratum to represent the glory into which Israel was to be transformed as the possession of Jehovah (Is.62.3; Rev.21.11-21); whilst the colours and materials of the ephod, answering to the colours and texture of the sanctuary, indicated the service performed in the sanctuary by the person clothed with the ephod, and the gold with which the coloured fabric was worked, the glory of that service" (Keil on Ex.28.12). (c) To the shoulder-pieces of the ephod was fastened by gold chains a pouch made of similar materials, which contained the Urim and Thummim, and was called "the breastplate of judgment" (Ex.28.15-30). It was really a square of a span's length each way, doubled together so that two corners were suspended from each shoulder, and had arranged on it, in four rows of three, twelve gems engraved with the names of the twelve tribes of Israel, so that they were near to the high-priest's heart, indicating the relation of love and personal interest which should exist between the priest and the people. (d) To the turban or mitre worn by all priests the high-priest had attached a plate of gold, called "the holy crown" (Ex.28.36,39.30), engraved with the words "Holiness to the Lord . . . That Aaron may bear the iniquity of the holy things, which the children of Israel
shall hallow in all their holy gifts; and it shall be always upon his forehead, that they may be accepted before the Lord” (Ex.28.38). Perhaps because of this mystical and official concern with the atonement for the people, the high-priest had a peculiar place in the law of the manslayer and his taking sanctuary in one of the cities of refuge: the refugee might not leave his sanctuary during the lifetime of the existing high-priest (Num.35.25). It was forbidden to the high-priest to follow a funeral or rend his clothes for the dead (Lev.10.6). The other respects in which the high-priest exercised superior functions to the other priests were simply the consequence of his position and opportunities, and varied with personal ability and character. The usual age for entering on the functions of priesthood was twenty years (2Chr.31.17), though before reaching that age the office might be exercised by one who had attained to puberty, as in the case of Aristobulus, who at the age of 17 won such admiration in his ministry as to provoke the treacherous jealousy of Herod (Josephus, 15 Ant. iii. 3).

The history of the high-priests embraces a period of about 1,370 years and a succession of about 80 high-priests, beginning with Aaron, and ending with Phannias (20 Ant. x. 1; cf. also 8 Ant. i. 3 and 10 Ant. vili. 5). They are divided into four groups by the organization introduced by David, the captivity in Babylon, and the persecution of Antiochus Epiphanes, as may be seen from the following table:

priesthood of Zadok and Abiathar in the reign of David. Saul may have made Zadok priest after Abiathar’s secession to David, and then David let both hold office together for their own lifetime, Abiathar retaining the high-priesthood with Uriah and Thummim, of which nothing is heard after Solomon deposed him (1K.3.27), when the succession passed to the sons of Zadok. It was Azariah, the descendant of Zadok, who officiated at the dedication of Solomon’s temple (1K.4.2; 1Chr.6.10). (ii) There are great difficulties in harmonizing the genealogical list in 1Chr.6.8,15, with the notices of the high-priests in the sacred history, and with the list given by Josephus. The pedigree, in its first six generations from Zadok inclusive, exactly suits the history, but there is a great gap in the middle, only two names occurring between the reigns of Jehoshaphat and Josiah, while the historical books give us during this interval five prisoners from Babylon. —

Hilkiah.—1. The father of Eliakim, who was “over the household” in Hezekiah’s time (2K.18.37; Is.22.20,36.22). —2. The high-priest in the reign of Josiah, who found the law-book in the temple at the time of the great reformation in that king’s reign (2K.22.3ff., 2Chr.34.15,17). The “high-priest” is generally supposed to have been Deuteronomy; but there is nothing in the narrative to indicate that it was that book alone (cf. Lev.26 with Deut.28). —3. The reformation that followed its discovery certainly carried out the principle of centralization of the worship which is particularly emphasized in that code. The narrative makes it clear that Hilkiah, and the others concerned, sincerely believed it was the ancient law-book of the nation, and there is no reason to suppose that he had any hand in its composition. Even among those who believe that Deuteronomy was composed about this time, it is admitted that the temple service under the high-priest (8.12-15), spoils the temple to pay tribute (1K.15.18), promises to offer incense (2Chr.26.16), defiles the temple with idolatry (33.4,5), cleanses it and reforms worship (34.33). —4. To this period also belong the rise of the Ten Tribes, and their abandonment of the temple worship (1K.12.26-28), and the successful revolt of the ecclesiastical head of the nation against the usurping foreigner and idolater, Athaliah (2K.11.4-16). The priests of this series ended with Seraiah, who was taken prisoner by Nebuzar-adan, and slain at Riblah by Nebuchadnezzar, together with Zephaniah the second priest (or ? Sagan; 2K.25.18). Seraiah’s son Jehozadak was at the same time carried away captive (1Chr.6.15), and died in Babylon. With his son Jeshua we are introduced to the third group. In the third group we have, after Jeshua’s zealous co-operation with Zerubbabel in rebuilding the temple, only four high-priests, their names being distinguished from those of their predecessors, and their being the only names of high-priests found in the historical books, except those of Azariah at the time of the rebuilding (1K.2.2,3), and of Jehoiakim, who was one of the priests of the day of Uzziah (2Chron.26.16-23). —5. Perhaps mount Carmel. —6. In N.T. “hill” is the Gk. ἱλιαῖος; but in Luke 9,37 the Gk. ἱλιαῖος (mountain region), so rendered, refers to a high “mountain” (ver.28) apparently Hermon. —7. Hillel, head of Pirathon in Mt. Ephraim, father of Abdon thejudge (Judg.12.3,15). —8. The weights and measures. —9. Hind (Heb.야צל), properly the female of the red deer (Cervus elaphus), but also used for female deer generally. Hinds are frequently noticed in the poetical parts of Scripture as emblematic of activity (Gen.49.21; 2Sam.22.34; Ps.18.33; Hab.3.19), gentleness (Prov.5.19), modesty (Can.2.7,35), earnest longings (Ps.42.1), and maternal affection (Jes.14.5). Their shyness and remoteness from the haunts of men are alluded to (Job 39.1), and also their timidity, causing them to cast their young at the sound of thunder (Ps.29.9). For the various kinds of deer inhabiting Palestine and the neighbouring country, see Hart; Roe. —10. Hinge. —11. Hinnom, the Valley of. —12. Hirah, an Adullamite, the friend (LXX. and Vulg. shepherd) of Judah (Gen.38.1,12).
Hiram', or Huram'.—1. The king of Tyre who sent workmen and materials to Jerusalem (2Sam.5.11; 1Chr.14.1) to build a palace for David (1K.5.1, 9; 2Sam.5.11) and again (5.10,7.13; 2Chr.2.3ff.) to build the temple for Solomon, with whom he had a treaty of peace and commerce (1K.5.11,12). The contention with which he received Solomon's present of Cabul (9.12) does not appear to have caused any breach between them. He added Solomon's ships to his own, drove (1K.5.8,10) and again (5.10,7.13) to the Mediterranean (10.22); and Jewish sailors, guided by Tyrians, brought the gold of Ophir (9.26-28) to Solomon's two harbours on the Red Sea. Dius, the Phoenician historian, and Mennander of Ephesus state that Hiram reigned prosperously 34 years; and in Canaan (where Abishai, his son and successor Baaleazar, Josephus conjectures that Hiram supplied timber for the temple, and gave his daughter in marriage to Solomon.—2. The name of a man of mixed race (1K.7.13,40), the principal architect and engineer sent by king Hiram to Solomon. Hittites, or sons of Heth, a sort of people of which the country were they at the time when the Assyrians first became acquainted with it, that whereas the Babylonians called it “the land of the Amorites,” it was known to the Assyrians as that of the Hattä or Hittites. The Hittites were, however, immigrants there, their original seat being in Hittus, Upper Asia Minor, and the mountain-region of the Taurus. But as early as the age of Abraham they had descended upon Syria, and c. 1900 B.C. Babylonia itself was invaded by them in the reign of the last king of the dynasty to which Hammurabi [Amraphel] belonged. In the Mosaic period they appear to have been composed of various tribes, and the name Hittites served as mercenaries at the courts of the petty princes and Egyptian governors of Palestine, as well as in the Egyptian army itself, and that from time to time the leaders of these “free lances” seized a principality for themselves, and established a line of kings. One of the Hittite principalities in Canaan was probably that of Jerusalem. The dominant military caste throughout the country was Hittite, thus justifying the position to which Heth is assigned in Genesis among the sons of Canaan. In the rear of the mercenaries followed the regular Hittite army, and after the fall of the 12th Egyptian dynasty the Hittite kings of Cappadocia seized the Egyptian province of Syria and made Kadesh on the Orontes, near the lake of Homs, their southern capital. The revival of Egyptian power, however, under the 19th dynasty checked their further advance, and when, after a twofold 30-years' war, made a treaty with the Hittite king Khatail II., which fixed the boundary between the Egyptian and Hittite empires pretty nearly where the northern limit of the Israelitish tribes afterwards ran. Here was "the land of the Hittites" in which the refugee from Bethel built the city of Luz (Judg.1.26). Hittite and Hurite horses were furnished from Hittite mares, of the region over which the Hittites were spread—in Asia Minor as far W. as the neighbourhood of Smyrna and E. to Armenia, in the mountainous district of the Taurus, and in northern Syria, more especially at Carchemish (now Harablûs) on the Euphrates, which remained a Hittite stronghold until its capture by Sargon of Assyria 717 B.C. The monuments are characterized by a peculiar style of art, borrowed originally from Babylonia, but modified in Asia Minor, and they are frequently accompanied by inscriptions in a peculiar hieroglyphic script. The hieroglyphics were employed only for monumental purposes; in place of a running hand cuneiform characters were used. Hundreds of clay tablets inscribed with cuneiform signs and written partly in the Hittite, partly in the Assyrian, language have been discovered at Boghaz Keui, the Hittite capital N. of the Halys. Here in the time of the 14th Egyptian dynasty the power of the 19th Egyptian dynasty extended from the Aegean to Palestine. On both the Egyptian and their own monuments the Hittites are represented as a thick-set people, with protrusive upper jaws, large rounded noses, oblique eyes, beardless faces, and yellow skin. Theirs was a language, the exact age of which is unknown, and which was the only known of which was the earth-goddess, who was addressed as “the Great Mother.” Before their contact with Babylonian culture, the objects of their worship had been fetishes—bull-heads, the sacred dirk, trees or stones, and the like; but they afterwards adopted the Babylonian conception of a god who had a human body, the fetishes and sacred animals becoming merely symbols. A sort of trinity, consisting of the earth-goddess and her son who was also her husband, was created, and the chief cities became deities by the side of whom stood the sun-god. By eating and drinking at a table before the image of the deity the worshiper who was believed to participate in the divine nature. The "asylum," to which the homicide fled for protection, was a Hittite institution. The Hittite empire broke into fragments, each of which became a separate tribe. Hence in 1K.10.29 and 2K.7.6 reference is made to the "kings of the Hittites." Ezekiel (16:3) describes Jerusalem as born of a Hittite mother; and at Hebron Abraham bought the field of Machpelah from the "sons of Heth" (Gen.23). In the age of the Tel el-Amarna tablets a band of Hittites from Cilicia made themselves masters of this district, and at a much earlier period an Egyptian inscription states that the founder of the 14th dynasty had overthrown "the houses of the Hittites" in southern Palestine. The painted pottery found in the pre-Israelitish strata at Lachish and Gezer was of Hittite importation, and has been traced to the
neighbourhood of Boghaz Keui. The Hittite wives of Esau (Gen.25.3,36.2) would be taken from this southern branch of the advance guard of the Hittites; and to the latter also "Uriah the Hittite" (2Sam.23.39), the husband of Bathsheba, would have belonged, as well as Ahimelech (1Sam.26.6), another member of David's body-guard. [A.H.S.]

Hawwa—Hawwa is Heb. always in the singular, "the Hivite." He was a son of Canaan (Gen.10.17; 1Chr.1.15). The LXX. identifies the people with the Avites, rendering both names Etaioi. The name has been connected with the Arab. hawa = a tent or dwelling, and has been said to imply that those who bore it were villagers (cf. HAVOTH-JAIR). But it is probable that in so terseness the father's name is an erroneous reading. Thus in Gen.36.2 it should be "Horite," and in Jos.11.3, "Hittite." The Hittites and Hivites are mentioned together in the lists of the inhabitants of Palestine. The Gibeonites who obtained a treaty from Joshua by craft are called Hivites (Jos.9.7,11.19) and so there is no reason to suppose the number of the Hivites is any more than the number of the Hivites, except the Hivites, the five kings who made war against Gibeon, were defeated by Joshua, and captured in the cave of Makkedah and hanged.

Holm-tree occurs only in Sus.58. The passage contains a characteristic play on the Greek names of the two trees mentioned by the elders in their evidence. The πῖρος of Theocritus and Dioscorides is the Laurel, and the pirocratos of the Thebans and Dioscorides is the Lat. ilox and to the Kermes-oak (Q. coccifera). [CYPRESS.]

Holofernes (better Olofernes), according to the book of Judith, a general of Nebuchadnezzar' slaves by Judith during the siege of Bethlehem (Jth.2).--Holon. --Holon (1Chr.6.58, Hilen.) A town—in the mountains of Judah allotted with its suburbs to the priests, near Giloh (Jos.15.51, 21.15). Possibly Beit 'Al'dim, a ruin 10 miles N.W. of Hebron and about 7 miles S.W. of Jidla.—2. A city of Moab (Je.48.21 only). Its site is unknown. [E.C.]

Holy. The term is applied to persons, places, things, and times. The root idea is "separation, withdrawal," involving dedication to God. Thus God separated Israel from the nations (Lev.20.24-26; cf. Je.2.3). Physical purity is holiness of the body, separation from defilement; hence the law of purification, and the distinction between clean and unclean meats (Lev.11.44,20.25). [SAINTS; SANTIFICATION.]

Holy of Holies; Holy Place. [TEMPLE.]

Holy Spirit. [SPIRIT, HOLY.]

Homam (1Chr.1.39), an Edomite=Hemam. [HOMER. [WeightS and Measures.]

Homicide. Four historical stages must be distinguished. (1) Originally a homicide was cast out from the peace of his God and tribe and became an outlaw whom any man might slay with impunity (Gen.4.14ff.). (2) After the Deluge it was laid down that every homicide should meet with death at the hand of man (Gen.9.5f.), because the blood was the life. (Parallels in Frazer, Golden Bough, 2nd ed., i. 535.) The blood-feud arose, and it became pre-eminently the duty of the deceased's gō'el hadādōth (lit. "redeemer [E. V. revenger, avenger] of the blood"); probably the nearest kinsman to kill his slayer. (3) The Mosaic legislation first distinguished between the different forms of homicide, and regulated the blood-feud, whether the homicide were Israelite, stranger, or sojourner. It provided for six CITIES OF REFUGE. If the slayer of a free man could reach one of these before the gō'el could overtake him, he was to be admitted, after stating his case to the elders at the gate (Jos.20). He then protected from the gō'el and brought to the place whence he came for trial before the congregation (elders). The cases in the law fall into two classes, which may conveniently be termed murder and manslaughter. Murder consisted of violent killing

Hodiesh.—1. A Levite in the time of Nehemiah (Ne.8.7, and probably also 9.5,10.10).—2. Another Levite (10.13).—3. A layman; one of the "heads" of the people (10.18). All three sealed the covenant.

Hoglah, the third of the five daughters of Zelophehad (Num.26.33,27.1,38.11; Jos.7.3).—Hoham (Jos.10.13), king of the Hivites. One of the five kings who made war against Gibeon, were defeated by Joshua, and captured in the cave of Makkedah and hanged.
plus a mental element (either intent or heedlessness), evidenced by (a) premeditation or former hatred or enmity, or (b) the use of a stone or a weapon of iron or wood. The penalty was death at the hands of the go'el; and the homicide was to be taken even from God's altar (Ex.21.14). Two witnesses were necessary for a conviction. Manslaughter consisted of violent killing without this mental element, either in a sudden heat or accidentally—e.g. by the head slipping from an axe, or by throwing a stone without seeing the person injured. The penalty was sojourn in the city of refuge till the death of the high-priest, as Moses had sojourned in Midian till after Pharaoh's death (cf. 2Sam.14.14). During this time the go'el meeting the man-slayer outside its limits might kill him. Ransom (wergeld) was forbidden either for murder or in lieu of sojourning in the city of refuge in cases of manslaughter, because blood pollutes the land for God's residence. If a dead man were found in the fields and the slayer were unknown, the elders of the nearest city were to sacrifice a heifer, with a prayer for atonement from blood-guiltiness (Deut.21.1-9). The slaying of a pregnant women in a combat between men was punished by death. The penalty of death was, however, not inflicted till after daybreak (Ex.22.2f.[1f]). An unrighteous Witness attempting to compass the death of the accused by false evidence was to be killed (Deut.19.16-21). Death by burning was punished by burning the corpse alive. If the owner knew the ox had gored before and had not enclosed it, by the death of the owner; but here ransom was allowed. If the deceased was a slave, the ransom was 30 shekels (Ex.21.28-32). Immediate death of a slave under the master's rod entailed (unspecified) punishment. If he lingered a day, the master went free (Ex.21.20 f.). If one fell from a roof without a battle-ment, there was blood-guiltiness (result unspecified, perhaps blood-feud; Deut.22.8). (4) Num.35.33f., Deut.19.12f., 21.8f., present us with the beginnings of the sense of the cor-poral responsibility of the community for the legal rights of the individual. This developed into the feeling that the king must punish murder or else incur blood-guiltiness (2Sam.3.28ff., 4.11, 14.9; 1K.2:37-33). [CRIMES, etc.; FAMILY; LAW in O.T.; JUDGE; GOEL.] Hellwig, Die jud. Freistädt in ehrn. Beleuchtung in Globus, vol. lxxxvii. No. 12 (Mar. 30, 1905, pp. 213-216; Darestre, Études d' Hist. du droit, 22-24; Leist, Graeco-italische Rechtsgesetz, 714-751; Post, Grundriss der ehrn. Jurisprudenz, i. 237f., 257, ii. 229-231, 261-262, 333 ff.; Wiener, Studies in Bibl. Law, 104-105, 117-119; and in Bibliotheca Sacra, Jan. 1906, pp. 118-121; Frc. Bibl., art. "Goel." [M.J.W.]

Honey. The Heb. ḫōḇāšh applies first to the product of the Bee, to which we exclusively give the name of honey. All travellers agree in describing Palestine as a land "flowing with milk and honey" (Ex.3.8); bees being abundant even in the remote parts of the wilderness, where they deposit their honey in the crevices of rocks or in hollow trees. In some parts of N. Arabia the hills are so well stocked with bees, that no sooner are hives placed than they are occupied. On the other hand, the term ḫōḇāsh also indicates a preserve made of the juice of the grape, which is still called dibs, and forms an article of commerce in the E. It was this, and not ordinary honey, which Jacob sent to Joseph (Gen.43.11), and which the Tyrians purchased from Palestine (Ezk.27.17). A third kind has been described as "vegetable" honey, viz. the exudations of certain trees and shrubs, e.g. the Tamarix mannifera, found in the peninsula of Sinai, or the stunted oaks of Laristan and Mesopotamia. The honey which Jonathan ate in the wood (1Sam.14.25), and the "wild honey" which supported St. John the Baptist (Mt.3.4), have been regarded as of this kind, although it was probably the honey of wild bees. A fourth kind is described by Josephus as being manufactured from the juice of dates.

Hook. Hooks. Various kinds of hooks are noticed in the Bible, the most important being: (1) Fishing-hooks (Am.4.2; Job 41.2; Is.19.8; Hab.1.15). [REED.] (2) Properly a ring (A.V. thorn), placed through the mouth of a large fish, and attached by a cord or a stake to keep it alive in the water (Job 4.11; 6.16; Num.13.31); or rendered "hook" in A.V. (3) A ring, such as in our country is placed through the nose of a bull, and similarly used in the East for leading about lions (R.V. Ezk.19.4; A.V. with chains), canals, and other animals. A similar method was adopted for leading prisoners, e.g. at Manasseh who was hanged with hooks (2Chr.33.11; R.V. marg.: A.V. among the thorns). An illustration of this practice is found in a bas-relief discovered at Khorsabad (Layard, ii. 376). (4) The hooks of the pillars of the tabernacle (Ex.26.32, 37.27.10 f., 38.13 ff.). (5) A vinedresser's pruning-hook (Is.2.24.15; Mi.4.3; Joel.3). (6) A flesh-hook for getting the joints of meat out of the boiling-pot (Ex.27.3; 1Sam.2.13,14). (7) Probably "hooks" used for the purpose of hanging up animals to flay them (Ezk.40.43). This was certainly the case in later days in Herod's temple.

Hophni and Phinehas. Sons of Eli, "priests of the Lord" at Shiloh (1Sam.1.3). They are described as "sons of Belial [i.e. wicked, unprincipled men]: they knew not the Lord." Their rapacity in claiming more than their rightful share of the sacrifices, when, and as, they pleased, filled the people with indignation, and "men abhorred the offering of the Lord." (2.12-17). The record of their licentiousness in ver. 22 is not found in the LXX., and is considered as a later addition by some, and omitted by Driver, Klostermann, and others. Their evil lives, however, filled the people with disgust and indignation, and provoked the curse denounced against their father's house, first by an unknown prophet (27-36), and then by Samuel (3.11-14). They were both cut off in one day in the flower of their age in the battle against the Philistines in which the ark was lost (4.10,11). [N.C.B.] They were both cut off in one day in the flower of their age in the battle against the Philistines in which the ark was lost (4.10,11). [N.C.B.]

Horn, a mountain to which the Hebrews fled after the death of Joshua (Num.20.14,22), and where Aaron died. It was on the "border" of Edom (vv. 23-29), or otherwise at the "end" of Edom (33.37). See
also Num.21.4; Deut.32.50. It is sometimes supposed that "Hor the mountain" (Num.34.7,8) is a different place, in the Lebanon. The borders of Israel are described as extending to the Great Sea on the W., and the passage sometimes: "And this shall be for you a border north, from the Great Sea: mark for yourselves Hor the mountain; from Hor the mountain mark to the entering in of Hamath, and the extent of the border shall be to Zedad." It is doubtful if this means more than that Hor was at the S.E. corner of the land of Israel, which was close to Kadesh-barnea (34.1; Jos.15.3). The site of Hor is placed by Josephus at Petra, where it is still shown (4 Ant. iv. 7, vil. I), and Petra was Kadesh-barnea (the holy place in the desert of wandering), according to his belief and that of the Rabbis. The mountain is now called Jebel an-Nabrân (or mountain of the prophet Aaron), and his tomb is shown on the higher or N.E. peak. Hor is a bare mountain of red sandstone, with two peaks, very conspicuous from the Arabah to its W., and rising on the "edge" of Edom, 4,580 ft. above the Mediterranean level, 4,000 above the Arabah, and 3,000 above the plateau to its E. It is immediately W. of Wady Masa, the traditional Meribah-kadesh, where are the ruins of Petra, and of Gaia (el Jii). [Edom.] The situation fits well with the O.T. notices, and with the distance of 17 days' journey from its vicinity to Horeb (Deut.1.2). [C.R.C.]

Horm, king of Edom, an ally of Lachish defeated by (10.5). [C.R.C.]

Horeb [Ex.3.17,6.3,6; Deut.1.26,19, 4.10,5.2,9,8,18,16,29,1; 1 K.8.9,19,8; 2 Chr. 5.10; Ps.106.19; Mal.4.4; Ecclus.48.7] = Sinai; see Exodus, The.

Horem, one of the fortieth places of Naphat-tali (Jos.19.36), named between Migdai-el (Mujib), and Pithom (Tiberias). "Most probably Háráh, a ruin 3 miles N. of 'Anitilha." [C.R.C.]

Hori-hagidad, the name of a desert station where the Israelites encamped (Num.13.32), probably the same as Gudgodah (Deut.30.7). On the W.side of the Arabah Robinson found a Wady Ghâddâghî, but this does not precisely correspond to the E.

Hori.—1. A Hori, son of Lotan, the son of Seir (Gen.36.22; 1 Chr.1.39).—2. In Gen.36.30 the name should be rendered the "Horte," as in vv. 21, 29.—3. A man of Simeon; father of Shaphat (Num.13.5).

Horites and Horims, the aboriginal inhabitants of mount Seir (Gen.14.6), "cave-dwellers." [Edom.]

Hophmah (destruction), a place between Kadesh-barnea and the S. border of Palestine, where Canaanites and Amalekites from the "hill" country defeated Israel (Num.14.45), as did the king of Arad, 38 years later (21.3). It was at some distance from mount Seir (Deut.14.4), and a royal city, noticed with Arad (Jos.12.14). Given to Judah (15.30), and afterwards to Simeon (19.4). Its original name was Zephath (Judg.1.17), and it was rebuilt before the time of David (1 Sam.30.36), when the Simeonites migrated thence (1 Chr.4.34), and Simeonites and Judaeans (Jos.16.4, 21.3), and after the city became a place of refuge (Sâhâ), leading from Petra to Arad, thus appears to have been the scene of the vain attempts of the Hebrews to enter Palestine by the direct route to Hebron. [C.R.C.]

Horn. Literal use.—Of rams (Gen.22.13; Dan.8.3), goats (Dan.8.5), a wind-instrument (Jos.6.5), an oil-flask (1 Sam.16.1), the four corners of the altar (Ex.27.21), local isolated task (Is.5.1, A.V.marg.), an ink-bottle (Ezk.9.2), and teeth (27.15). Figurative use.—Of majesty (Deut.33.17), strength (Ezk.34.21), pride (Ps.75.5), and of a ruler (132.17). Symbolic use.—Horns of iron were made by Zedekiah as a symbol of the strength whereby Israel would "push" the Syrians (1 K.22.11). Special use.—As light-rays (Ex.34.29, R.V. marg.) from the face of Moses; from the side of God (Hab.3.4). In N.T., except in "horns of salvation" (Luk.1.69), the Gk. equivalent only occurs in apocalyptic vision (Rev.5.6, etc.). [W.O.E.O.]

Hornet. That the Heb. word či'â dé may denote the hornet may be regarded as certain on the name Zerëlah (Jos.15.33) indicating that these insects infested some parts of Palestine. Hornets are referred to as the means which Jehovah employed for the extirpation of the Canaanites (Ex.23.28; Deut.7.20; Jos.24.12; Wis.12.8). Although some commentators regard the word as used in its literal sense, it probably expresses in an allegorical manner the consternation induced in the enemies of the Israelites, as described in Deut.2.15, Jos.2.11.

Horonain (two cases, or hollows; Is.15.5; Je.48.3,5,34), a place in Moab, on a road "going down," apparently not far from Heshbon. On the Moabite Stone, king Mesha records: "...I subdued Ashme-El, and fought against Horonain, and I went down." The valley called El Ghuweir (the hollow), running W. to the Dead Sea, S. of Nebo, may be intended, for an ancient road leads up to it on the plateau. [C.R.C.]

Horonite, The, the designation of Semahat (Ne.3.10,19,13.28). The Syriac title "Book of Joshua" (xlv.) calls him a Levite, and a Haruni or Aaronite. [C.R.C.]

Horse. Throughout the Bible the horse is referred to only in connection with warlike operations; the sole instance of the employment of this animal for other purposes occurring in Is.28.19. The horsemen (A.V. horsemen) were used in threshing, not, however, being put in harness, but simply driven about over the stewed grain. The description of the horse in Job 39.19-25 applies solely to war-horses. The Heb. names by which the horse is described are usually šîṣ and pârâḏ; the former denoting horses used for driving in war-chariots, the latter probably indicating mares (Arab. faras). In E.V. pârâḏ is incorrectly rendered horsemen. The correct sense is essential in the following passages—1 K.4.26, "forty thousand chariot-horses and twelve thousand mares"; Ezk.27.14, "driving-horses and mares"; II.24, "as mares, so shall they run"; and Is.21.7, "a train of mares in couples." In addition to these terms there is rekâh, denoting a swift beast [Dromedary], such as those used for the royal post (Esth.8.10,14) and similar purposes (1 K.4.28; A.V. dromedary, also in Esth.), or for a rapid journey (Mi.1.9,10), or for a mare (Esth.8.10); and šâdîthi in Can.1.9, which appears in the R.V. as a collective
term, "company of horses," although it rather means, according to the received punctuation, "my mare," or still better, by a slight alteration in punctuation, "my mares." As a mountain race the Hebrews did not need the services of horses, and for a long period after their settlement in Canaan dispensed with these animals, partly in consequence of the hilly nature of the country, which admitted of the use of chariots only in certain localities (Judg.1.19), and partly in consequence of the prohibition in Deut.17.16.; David first established a force of horses and chariots after the defeat of Hadadezer (2Sam.8.4); but the great supply of horses was subsequently obtained by Solomon through his connexion with Egypt (1K.4.26). Solomon also established an active trade in horses, which were brought by dealers from Egypt and sold to the Hittites, who lived between Palestine and the Euphrates (1K.10.28,29). The horse was introduced into Egypt probably by the Hittites, as it is not represented on the monuments before the 18th dynasty. The Hebrew kings sought the assistance of the Egyptians against the Assyrians in the matter of horses (Is.31.r. 36.8; Ezek.17.15), the Assyrian cavalry being regarded as most formidable. As the Assyrian sculptures testify, the horses themselves were highly bred, and fully merited the praise bestowed by Habakkuk (1.5). As regards equipment, we learn that the bridle was placed over the horse's nose (Is.30.28), and a bit or curb is also mentioned (2K.19.28; Ps.32.9; Pr.26.3; Is.37.29; in the A.V. it is incorrectly given "bridle," with the exception of Ps.32.). The trappings of Assyrian horses were profusely decorated, the bits being gilt (Ezsd.3.6), and the bridles adorned with tassels; while on the neck was a collar terminating in a bell (Zech.14.20). Saddles were not used until a late period. The horses were unshod, and hoofs as hard "as flint" (Is.5.28) were therefore regarded as a merit. Chariot-horses were covered with embroidered trappings (Ezk.27.20); and both horses and chariots were used in idolatrous processions, as in that of the sun (2K.23.11). The first representation of a cavalry soldier is an Assyrian bas-relief of 734 B.C. Horses were also ridden in the chase about 650 B.C. The earliest notices of riders in O.T. are in Gen.49.17 and Ex.15.1,21—the former not referring to war, while in the latter case the reading depends on the points, and a "chariot" may be intended. After the 8th cent. B.C. (2K.9.18,19) references to cavalry are numerous, especially among Assyrians (Ezk.23.6,12) and Sennacherib (38.15).

**Horseleach** (Heb. 'ālāq) occurs once, in Ps.30.15, and, as the equivalent of the Arab. 'alaaq, the name of the Egyptian horseleech, is doubtless correctly rendered. The expression "two daughters" is of course figurative, and refers to the bloodsucking habits of these creatures. Both the Heb. and Arab. names signify "to adhere." Horseleeches belong to the genus Haemopis; while the typical genus Hirudo includes the medicinal leech. [r.l.]

**Hosah**, a Merarite Levite; one of those chosen by David as "porters" to the ark after its arrival in Jerusalem (1Chr.16.38,26.10).

**Hosah** (refuge; Jos.19.29), a city of Asher, apparently near Tyre. Possibly the village in Ez.38.13 is alluded to, for the name of Tyre, is the site. It is well watered, with traces of old ruins. Hosah may, however, possibly be the town Huzu, noticed in one of the letters from Tyre in the Amarna collection (Berlin 99); but this lay apparently between Tyre and Sidon, which was intended for the water-borne attack on Huzu, at el Ghaziyeh, a well-watered site. Hosah was taken by Sennacherib in 702 B.C., and is noticed again c. 645 B.C. [C.R.C.]

**Hosanna.** This word is used only in the accounts of our Lord's triumphal entry into Jerusalem (Mt.21.9,15; Mk.11.9,10; Jn.12.13). In each passage the multitudes are represented as quoting the words of Ps.118.26, "Blessed is he that cometh in the name of the Lord." It has therefore been assumed that the word Hosanna is a corruption of the Heb. hōšā'nah (save pray; Gk. ὑσσων ὅσσος), which occurs in the previous verse of the same psalm. As this psalm was sung at the Feast of Tabernacles (for which it is intended to have been specially written) and also at the Passover, its words would naturally be very familiar to the people. [T.A.M.]

**Hosea** (hōšē'ā, salvation; Ὑσσᾶ) prophesied (1.1) in the reigns of Uzziah, Jotham, Ahaz, and Hezekiah, kings of Judah, and of Jeroboam II., king of Israel. This statement makes Hosea's prophetic career begin in the reign of Jeroboam II., and there is nothing in 1-3 which may not have been delivered then. The period was characterized by great national prosperity (2K.14.25); but with this came, as we see in the denunciations of Amos (who prophesied a little earlier), the evils which often accompany it—vastant luxury and forgetfulness of God. In 4-14 a totally different scene is brought before us. The death of Jeroboam was the beginning of a period of anarchy—his son Zechariah reigned only six months, and Shallum, who succeeded, but one month. These later chapters show us a court where debauchery is rampant and where there is no sign of the people having received the word of God. Anarchy is flagrant everywhere. With all this, there is no trace of strong-handed, steady rule, which might have restrained some
of the evils from coming to a head. Anarchy and vice go hand in hand. Now, since the constant topic of 4-14 is the approaching fall of the northern kingdom, while there is no reference to this as an accomplished fact, we may assume that the prophecy was uttered before the 6th year of Hezekiah, when Samaria was taken by the Assyrians.—Hosea's marriage with Gomer. Except that he was the son of Beeri, we know nothing of Hosea personally save his marriage with Gomer. Whether this story is literal or allegorical, has been much disputed, though the former was held by most early writers. Yet a needless amount of difficulty has been created by the view that "wife of whoredom" (1.2) meant a woman unchaste at the time of marriage. The Heb. by no means requires this, and its acceptance destroys the parallelism which the prophet's teaching seems to embody with the relation of God to Israel. We may suppose that Hosea, when a young man, and possibly unwise of his prophetic gift, had taken Gomer to wife. Although she is then chaste, there are elements in her character which, brought out by evil influences, land her in the gravest sin of all. Despite her fall, Hosea says, his love is unchanged. Perhaps he begins to feel that his love for his erring wife faintly reproduces that of God for idolatrous Israel. But this was a love wherein was no weakness—stern discipline must purge out the evils of the past. This is strikingly brought out when we conceive the story of the three children of Gomer: Jezeel, Lo-ruhamah, and Lo-ammi. How Gomer became a slave does not appear, but Hosea is bidden to buy her back at the price of a slave; not, indeed, to the position of an honoured wife, but with a stern rule restraining her from her old sins, till her character is formed anew. Thus the sad story of the marriage becomes an object-lesson showing forth the love of God Himself. The unwavering love of God underlies the whole book—1-3 under the thought of husband and wife, in 4-14 under the thought of parent and child. 4-8 Israel's guilt is diligently urged in 9-11.11 to 9.14. Hosea's peroration in 11.1-14 shows the restoration. Save for incidental references to Judah, Hosea's prophecies are addressed to the northern kingdom. He was probably a native of that kingdom, as may be inferred from the vividness of the picture he draws of its social and political state, its anarchy and corruption, the pretensions for foreign alliances, and the prevalence of the Baal worship, combined with the pretence of the worship of God. Hosea's style is a very marked one. The words are broken up into short, abrupt sentences, which Bp. Lowth compared to the scattered leaves of the Sibyl. The animating spirit is one of extreme tenderness for his erring kinsmen, with whom he pleads. As Ewald puts it, "his discourse often breaks off, as it were, into sobs." Very different is this from the fierce invectives of Amos. Much has been written on the question of Hosea's knowledge of the past. There seem plain allusions; though whether it is to the Pentateuch as we now have it, or to some theoretical earlier form, is a matter on which varying views prevail. Yet it is hard to suppose that the following references do not suggest a form of text very much the same as that which we have now: The Fall (6.7, R.V., not A.V.), the destruction of the cities of the plain (11.8), the story of Jacob (11.3); Exodus (2.15, and often), the wandering in the wilderness (9.10, 13.5), Baal-peor (9.10; cf. Num.20.5). For later references, see the story of Achan (Ho.2.15), the sin at Gibeah (9.9,10; cf. Judg.19), the demand for a king (Ho.13.10, 11; cf. 1Sam.8).—N. T. Quotations. Ho.2.23,1.10 in Rom.9.25,26; Ho.13.1,7 in Mt.8.13-14; in Lu.23.30: 11.x in Mt.2.15: 13.14 in I Cor.15.55 (there is much diversity of reading in the Gk. here): 14.2[3] in Heb.13.15: cf. also 6.2 and 1Cor.15.4. Ewald, Prophets. Of O.T.; Pusey, Minor Prophets; G. A. Smith, Book of the Twelve Prophets; J. Sharpe, Notes and Dissertations on Hosea; Cheyne, in the Camb. Bible for Schools and Colleges. [R.S.] Hosen (pattish). [Dress.] Hoshalah.—1. A man who assisted in the dedication of the wall of Jerusalem after its rebuilding (Ne.12.32).—2. The father of a certain Jezaniah, or Azariah (I.e.42.43). Hoshamites. One of the titles of king Jehoahaz, or JEHOIACHIN (IChr.3.18). Hoshea' (deliverance), son of Elah, and last king of Israel. Here, as in some other cases, we are unable to clear up an apparent chronological inconsistency between the Biblical narrative and Assyrian records. Hoshea's accession is placed between the reigns of Ahaz, but in 15.50 in the 20th year of his predecessor Jotham, would appear from Assyrian inscriptions (which dates are verified by the mention of a total eclipse, known to have occurred in 753 B.C.) to belong to the year 734 B.C. He was placed on the throne as successor to Pekah by the Assyrian conqueror, TIGLATH-PILESER III., who says, "Pekah I slew... Hoshea I appointed over them." This is in no way inconsistent with the statement (2K.15.30) that it was through Hoshea's agency that Pekah was slain. We gather from the contemporary prophet Hosea (5.13,7.11) that Ephraim included at the time was the anti-Assyrian power of the latter looking to Egypt for help. Hoshea, like his predecessors Jeshu and Menahem, seems to have paid tribute to Assyria till TIGLATH-PILESER's death (727 B.C.), but thereupon, hoping perhaps that the successor, Shalmaneser IV., would prove less formidable, he ceased, and sought support from Egypt, which, however, failed to do more than promise aid. In 724 B.C. Shalmaneser advanced against Samaria, while Hoshea sought vainly to avert disaster by belated presents. It is not clear whether he was taken prisoner before (as the Biblical account seems to say) or after the capture of Samaria (722 B.C.) by Sargon, the general who followed Shalmaneser on the throne of Assyria. The doom of the northern kingdom is set forth by the prophet Hosea (11.14, cf. Is.28). Many Israelites were deported eastwards, and foreigners settled in their stead. We know nothing of Hoshea's fate subsequent to his capture. [See T. P. Th.] Hoshé a.—1. The son of Nun, i.e. Joshua (Deut.34.14; Num.13.8, R.V.).—2. Son of Azaziah (1Chr.27.20); like his great namesake, a man of Ephraim, ruler of his tribe in the
HOSPITALITY

time of David.—3. One of the heads of the people, who sealed the covenant (Ne.10.23).

Hospitality. Hospitality was regarded by most nations of the ancient world as a virtue, and by all the nations they encountered. Among the Arabs we find the best illustrations of the old Bible narratives, and they exhibit traits that might be seen in their ancestor Abraham. The laws respecting the Stranger (Lev.19.33,34) and the Poor (25.14; Deut.15.7), and concerning redemption (Lev.25.25ff.), etc., reflect this spirit of hospitality. In T.T. hospitality is likewise enjoined. The good Samaritan stands for all ages as an example of Christian hospitality, embodying the command to love one's neighbour as himself. The neglect of Christ is symbolized by inhospitality to our neighbours (Mt.25.43). The apostles urged the church to "follow after hospitality" (Ro.12.13; cf. 1Tim.5.10) to remember Abraham's example (Heb.13.2); to use hospitality one another without grudging (1Pe.4.9); while a bishop must be a "lover of hospitality" (Tit.1.8; cf. 1Tim.3.2). The practice of the early Christians was in accord with these precepts. Their houses were often extravagantly large, and their hospitality was a characteristic of their belief. "Hospitality," says Mr. Lane, "is a virtue for which the natives of the East in general are highly and deservedly admired. There are very few persons (in Egypt) who would think of sitting down to a meal, if there was a stranger in the house, with a view of permitting him to partake of it, unless the latter were a menial, in which case he would be invited to eat with the servants. . . . The account of Abraham's entertaining the three angels, related in the Bible, presents a perfect picture of the manner in which a modern Bedawee shiek receives travellers arriving at his encampment. He immediately orders his wife or women to make bread, slaughters a sheep or some other animal, and dresses it in haste, and bringing milk and any other provisions that he may have ready at hand, with the bread and the meat which he has dressed, sets them before his guests. The Serif, a large height of high stands by them while they eat, as Abraham did. . . . Most Bedawees will suffer almost any injury to themselves or their families rather than allow their guests to be ill-treated while under their protection." (Cf. Job 31.17,31,32.) The Oriental respect for the covenant of bread and salt, or salt alone, certainly spring from the high regard in which hospitality was held.

Hosts, Lord of. The title, the original and full form of which is Jehovah, God of Hosts (κύριος πατριωτάτωρ, "the Lord Omnipotent.") The word ἡραίος has been carried over into two N.T. passages (Ro.9.29; Jas.5.5), and has become common. Among the evangelists, especially in the Sanctor of the Te Deum. It is remarkable that the expression does not occur in any part of the Pentateuch, from which A. C. Robinson argues (Churchman, Sept. 1900, Expos. Times, Jan. 1908) that these books were written before the title came into use. But it is also remarkable that Ezekiel himself, most of the prophets, never employs it. DRIVER, "Amos" (in Camb. Bible), addl. note on ch. 3.13. [J.R.]

Hotham', a man of Asher; son of Heber, of the family of Beriah (1Chr.7.32); perhaps, though not certainly, = Helen in ver. 35.

Hothan' (R.V. correctly, Hothan), a man of Aroer, father of two of David's mighty men (1 Chr.11.44).

Hothir, a son of Hemam (1Chr.25.4,28), and therefore a Kohathite Levite.

Hour. The ancient Hebrews were probably unacquainted with the division of the natural day into 24 parts. The general distinction between "morning" and "evening" (Ps.55.17) was sufficient for them at first, as for the early Greeks; afterwards the Hebrews parcelled out the period between sunrise and sunset into a series of divisions distinguished by the sun's course. The early Hebrews appear to have divided the day into four parts (Ne.9.3), and the night into three watches (Judg.7.19). It is known that the Greeks adopted the division of the day into 12 hours from the Babylonians, and it is generally supposed that the Hebrews learnt it from the Babylonians during the Captivity. Certainly it was known to the Egyptians at a very early period. The Hebrews divided the interval between sunrise and sunset into 12 equal portions, so that the hour varied in length perpetually with the time of year. These intervals are usually called temporal hours, to distinguish them from the equinoctial hour, which is the 24th part of a solar day, or of the time between two sunrises. The Hebrew hours are the hours meant in the N.T. Josephus, and the Rabbi of the 20.6; Jn.11.9, etc.). What horologic contrivances the Jews possessed in the time of our Lord is uncertain; but we may safely suppose that they had gnomons, dials, and clepsydras, all of which had long been known to the Persians and other nations with whom they had come in contact. For the purposes of prayer the old division of the day into four periods was continued in the temple service, as we see from Ac.2.15,3.1,10,9.

House. The Canaanite and Heb. houses [Bet] found by recent excavation in Pal- estine much resemble those still built, being of stone in hill districts and of sun-dried bricks in the plains. The masonry is of no great size and only very rudely squared, being set in mortar. The roofs are now formed of brushwood laid on rude rafters, and covered with clay or cement, which is frequently rolled with a stone roller. Sun-dried roofs are easily removed (Mk.2.4; Lk.5.16). The house has usually a single storey, and the roof is either flat or (when of stone) has a central dome, such as is represented on Assyrian bas-reliefs. Booths made of poles, covered with leaves on their
PLATE XVI

HOUSE-TOPS (Lu. 12:3). W.D.A.

WOODEN MODEL OF AN EGYPTIAN HOUSE (INTERIOR). (Brit. Mus.)
branches, are often placed on the roof as sleeping-places in summer, as at the Feast of Tabernacles in O.T. times. A small yard, and a stable for cattle, are sometimes added to such houses (rSam.28.24). The flat roofs were surrounded, as they still are, by a battlement (Deut.22.9). The windows (17.18) are small and high up, often closed by a wooden lattice.

[HUUNKOK]

A.V. humility. Pr.21.9). Humility. This was an ideal both in Jewish ethics and in Christian life. To Greeks "self-sufficiency" and "magnanimity" seemed the highest personal ideal. To early Romans, and to Stoics and Epicureans later, personal dignity and happiness were the supreme good, but to the Hebrew the great One living God was a God of power, majesty, and righteousness (Ps.8.4). They lived in the presence of One to Whom they owed all: humility of soul was thus the outcome of religion. With psalmist and prophet, humility, a "low opinion of their own importance and merit," was constantly emphasized, and men like Saul and Pharaoh condemned. In N.T. Christ's teaching and life proclaimed the same truth. His words (Mk.9.35, 10.15; Mt.11.20) were illustrated by, e.g., His setting the child in the midst of His disciples (Mk.9.33) and by His washing their feet (Jn.13). At Caesarea Philippi the acknowledgment of His Messiahship was followed by the lesson of His suffering and humiliation and death. The Incarnation itself was the consecration of self-abasement and humility. Thus "pantov, pantovos, pantos" in pre-Christian literature almost invariably words of reproach, became in Christian ethics expressive of the highest ethical virtue; so St. Paul sums up: "This mind . . . which was also in Christ Jesus, Who . . . humbled Himself (eranqvovos avtov) and became obedient unto death, even the death of the cross." Henceforward humility was the highest exaltation.

[Hunting]

Hunting. The Hebrews were not given to hunting, except for food (Deut.12.15) and for the extermination of dangerous beasts; the density of the population, the earnestness of their charisms and the temper of their beliefs, regulations, all combined to discourage the practice of mere sport. There was no lack of game in Palestine; on the entrance of the Hebrews into the land, wild beasts were so numerous as to be dangerous (Ex.23.29). Some of the fiercer animals, such as lions, survived to a later period. The manner of catching these animals was either by digging pitfalls, which was the usual practice with the larger species, as the lion (2Sam.23.20; Ezk.19.4,8); or by traps, which were set (Job18.10) in the runs of the animals (Pr.22.5) and caught them by the leg (Job18.9); or by nets, in which various kinds of ruminants were taken (Is.51.20: A.V. wild bull). Birds formed an article of food among the Hebrews (Lev.17.13).
and much skill was exercised in catching them. The following were the most approved methods:

1. The trap, which consisted of two parts, a net, stretching every way, and a stick to support it, but so placed that it could not give way at the slightest touch (Am.3.5, gin; Ps.69.22, trap).  

2. The snares (Job 18.9; A.V. robber), consisting of a cord (Job 18.10; cf. Ps.18.5, 116.130,140.5), so set as to catch the bird by the leg.  

Humpham, one of the most learned of the Jewish academicians (1Chr.29.27), was the head of the 13th course of priests in the time of David (1Chr.24.13).

Hupham, a son of Benjamin, founder of the family of the Huphames (Num.26.39).

Huppah, the head of the 13th course of priests in the time of David (1Chr.24.13).

Huppin, head of a Benjaminite family. According to the LXX. (Gen.46.21), a son of Dothai, or of Ir (1Chr.7.12).

Huri.—1. A man mentioned with Aaron, as staying up the hands of Moses during the battle with Amalek at Rephidim (Ex.17.10,12). He was, with Aaron, left in charge of the people by Moses during his ascent of Sinai (24.14). Josephus (Ant. ii. 4, v. 1) says that he was the husband of Miriam, and identical with—2. The grandfather of the 1st priest of the tabernacle—`son of Uri, son of Hur, of the tribe of Judah’ (Ex.31.35-39,38,22). In the lists of the descendants of Judah in 1Chr. the pedigree is more fully preserved. Hur there appears as of the family of Pharez, being son of Caleb ben Hezon, by a second wife, Ephrath (1Chr.2.19,20; cf. 25, 1) and also of the firstborn of that marriage (2.50, see R.V.; 4.4) and father of three sons (besides Uri: 2.20) who founded the towns of Kirjath-jeearim, Bethlehem, and Beth-gader (2.51). Hur’s connexion with Bethlehem would seem to have been closer than with the others. —3. The fourth of the five kings of Midian, who were slain with Balama after the ‘matter of Peor’ (Num.31.8). Later, in Jos.13.21, they are called princes (R.V. chieftains) of Midian and dukes (R.V. princes) of Sihon. —4. Father of Rephaiah, 4 (Ne.3.9). —5. The ‘son of Hur’—Ben-Hur—was an officer for Solomon in Egypt (Ephraim (1K.4.8).

Hurma.—Hiram.—1. A Benjamite; son of Bela, the first-born of the patriarch (1Chr.8.5).—2. The form of the name of Hiram, king of Tyre, in 1Chr.14.1, 2Chr.2.3,11,12,8,21,9,10,21.—3. The same change occurs in 2Chr.2.13, 4.11,16, in that of Hiram the artificer.

Hurri, father of Anthai, 3 (1Chr.5.14).

Husband. [MARRIAGE; FAMILY.]

Hushah, a name in the genealogies of Judah (1Chr.4.4)—‘Ezer, father of Hushah.’ It may be the name of a place.

Hushai, an Archite. [ARCHIT.] He is called the ‘friend’ of David (2Sam.15.37); in 1Chr.27.33, the word is rendered ‘companion.’ David sent him to confuse the counsels of Absalom (2Sam.15.32ff., 16.16ff., 17.5ff.). He was probably the father of Baana (1K.4.16).

Husham, one of the early kings of Edom (Gen.38.14,15; 1Chr.1.14,15). [TAMAN.]

Hushathite, The, the designation of a hero of David’s war, probably named Subhechil (2Sam.21.18; 1Chr.20.14), Sibbechai (1Chr.11.29,27,11), and by an easy corruption (Driver in loco), Mebunnai (2Sam.23.27). Josephus calls him a Hittite.

Hymenaeus.—1. In Gen.46.23 “the children of Dan” are said to have been Hushim. The name is plural, as if of a tribe rather than an individual. [AHER.] In Num.26.42 the name is changed to Shuham. Hymenaeus (1Chr.7.12) was to be the “sons of Aher.” —3. One of the two wives of Shaharaim (8.8).

Husks. The word (képároν) rendered in A.V. “husks” (Lu.15.16, see R.V. marg.) describes the fruit of the carob-tree or Ceratonia silqua of botanists. This tree, very common in Syria and Egypt, produces pods varying in length from 6 to 10 in., and about a finger’s breadth, or rather more, in width. The tree (kharrubah or kharnab) is solitary. The beans are sold in the bazaars chiefly to feed animals (Tristram, Nat. Hist. Bible, p. 361). In the Mishna (Sheb. 7.7) they are said to have been steeped in wine, as they now are in water, for a cooling drink.

Huz (R.V. correctly, Us), the eldest son of Nahor and Milcah (Gen.22.21).

Huzzab, according to the general opinion of the Jews, was the queen of Nineveh when Nahum delivered his prophecy (Na.2.7). The LXX. has changed the name to Shushan (i.e., that which was established), and R.V. marg. has it (deerced”). Kautsch regards the text as probably corrupt—it may be a noun with the article, referring to the Assyrian queen. Further light is needed. [R.G.F.]

Hyanna. Authorities are at variance as to whether the term ōbōn in Je.12.9 means a “hyana” as the LXX. has it or a “speckled bird,” as in A.V. The etymological meaning of the word is equally adapted to either. The hyaena being streaked. The only other instance in which it occurs is as a proper name, Zeboim (1Sam.13.18), the valley of hyaenas,” Aquila; Ne.11-34, Tristram, who rightly identifies the Arab. dōba (hyaena) with ḏībhā (strongly favours the translation “hyana,” more especially as the striped hyaena (Hyana striata) is common in Syria and Palestine, and must have been well known to the Jews. [R.L.]

Hydaspes, a river mentioned in 1Th. 1.6, without any usual ethnographic identification. The stream is intended is uncertain, but it may perhaps be the Chosapes of Susiana, in which case the form is probably due to confusion with the Hydaspes in N.W. India. The Syriac has Ulai. [T.G.F.]

Hymenaeus, mentioned twice in St. Paul’s Epp. to Timothy: first with Alexander (1Tim.1.20); and secondly with Philetus (2Tim.2.17,18). He is charged by St. Paul with saying that “the resurrection is past already,” and has been considered as one of the earliest of the Gnostics. The sentence passed upon him of being ‘delivered to Satan’ scarcely can be more ecclesiastical excommunication. As the apostles healed all manner of bodily infirmities, so they seem to have possessed and exercised a like power of indicting them (Ac.5.5,10,9.17, 40,13.11). Even apart from actual intervention by the Apostles, bodily visitations are spoken of in the case of those who have reached the Lord’s Supper worthily (1Cor.11.30), and Satan was held to be the instrument or executioner of all these visitations. Hence the “delivering to Satan” is, in some respects, differentiated from ecclesiastical
HYMNS
excommunication. [Gnosticism; Excommu-
nication.]

Hymns. "Psalms and hymns and spiritual
songs" are twice joined together by St.
Paul (Eph.5.19; Col.3.16), as if he were enu-
merating the psalms, both Box's in
and "ode" frequently occur, either with or
without combination with "psalm" (cf. Ps.
65.1, 72.20; Josephus, 7 Ant. xii. 3). So, too,
there is the famous "Hymn of the Fathers"
(Eccles.44.1ff.), and Judith's "New Hymn,
in which she celebrates the death of Holo-
fernes (Jth.16.1ff.). The hymn sung by our
Lord and His Apostles sang on the night of the
betrayal (Mt.26.30; Mk.14.26) was probably
the latter part of the Hallel (Ps.115-118),
the Paschal song. In Ac.16.25 the hymns of
the imprisoned apostles were probably Christian
emissions more like what we usually denote by the
term (cf. Ac.4.24ff.); and we gather from
1Cr.14.26 that the practice of hymnody was encour-
gaged and often resorted to in the early Church. St.
Luke in his gospel has preserved for us four of the earliest
Christian hymns, which the Church has always
held to have been first uttered on the important
occasions to which they are ascribed by him.

With the psalmody of the O.T. and the practice of
hymnody was encouraged and often resorted to in
the early Church. St. Luke in his gospel has preserved for us
four of the earliest Christian hymns, which the Church has always
held to have been first uttered on the important
occasions to which they are ascribed by him.

I DBASH

361

Ibhar', one of the sons of David born in
Jerusalem (2Sam.5.15; rChr.3.6, 14.5).

Ibleam', a city of Manasseh, with villages or
towns dependent on it (Judg.1.27), situated
in the territory of Issachar (Jos.17.11). The
ascent of Gour was "at Ibleam" (2K.9.27).

Now Yebha, 6 miles N. of Beisan. Ibleam is
probably not the same place as the town of the
same name in Samaria (1K.6.70). [C.R.C.]

Ibneiah', son of Jehoram, a Benjamite chief
(rChr.9.8).

Ibnjah', a Benjamite (rChr.9.8).

Ibri', a Merarite Levite of the family of
Jaaiah (rChr.24.27) in the time of David.

Ibnazan' (sphinx of Bethlehem in Zebulun
judged Israel for 7 years (Judg.12.8-10). He
was buried at Bethlehem. [H.M.S.]

Icbabod' (no glory), the son of Phinehas;
so named by his dying mother, because the
name of the ark of the Lord had been spoilt.

Ico'niun, the modern Konia, is situated in
the W. part of an extensive plain, on the
central table-land of Asia Minor, and not far
to the N. of the chain of Taurus. This plain
was anciently called Lycaonia. Xenophon
reckons Ico'niun as the last town on the road
from Bosporus to Persia. [Pursh.;] it is now
Pyrycia; but all other writers speak of it as
being in Lycaonia, of which it was practically
the capital. It was on the great line of com-
munication between Ephesus and the W. coast
of the peninsula on one side, and Tarsus,
Antioch, and the Euphrates on the other. It
was thus very suitable for missionary work (Ac.
14.1, 21.16.2). St. Paul's first visit was on his
first circuit, in company with Barnabas; and
on this occasion he approached it from Antioch
in Pisidia, which lay to the W. From its position it
could not fail to be an important centre of
Christian influence in the early ages of the Church.
In the declining period of the Roman empire, Ico'niun
was made a colonia. Konia is still a town of
considerable size.

Idalah', one of the cities of Zebulun, named
between Shimron and Bethlehem (Jos.19.15).
In the Jerusalem Talmud (Megillah 1.1) it is
placed at Hirif, probably the ruin Huwadrat,
now Tell el-Belt, said to be "the house of God
of the Abi'tam," and, being in the family of
Judah (rChr.4.3).
Iddo represents the Eng. versions several Heb. and Gk. names.—1. (N.T., Λαβδω, Addo.)

Father of Ahinadab (1 K.4.14).—2. (N.T., Λαβδω, Addo.) Descendant of Gershom (1 Chr.6.21); called Adahiah (ver. 41).—3. (N.T., Ιαβδω, Jaddo.) Son of Zechariah, ruler of the tribe of Manasseh. E. of Jordan in David's reign (2 Chr.21.24).—4. (17v. 4: 41, Ιαβδω, Addo.)

A seer whose writings are cited as an authority for the reigns of Solomon, Rehoboam, and Abijah. They are called "the visions of Iddo the seer concerning Jeroboam the son of Nebat" (2 Chr.9.29), "the history of Iddo the seer after the manner of [or, in reckoning the] genealogies" (12.15), "the commentary of the prophet Iddo" (13.22). They are not quoted in 1 Kings. The books are lost. Jewish tradition identified him with the disobedient prophet.—5. (N.T., Λαβδω, Addo.) Grandfather of the prophet Zechariah (Zec.1.1,7), returned from the Captivity (Ezr.8.15), and Jeshua (Jeshua of 2 Chron.2.14).—6. (17v. 4: 41, Eddo; called Loddesens, Ezd.8.15,45,46, R.V.)

The chief of those who assembled at Casiphia at the time when Ezra sent a deputation of chief men from Ahava to him to bring him ministers for the house of God (Ezr.8.17).

—7. (17v. 4: 41, Ιαβδω, Jeddo, R.V. Iddo = Jaddo in A.V.)

Iddo, Image. There are about twenty different words in our version in the passage "idol" or "image," but these are not specific names of so many different idols. 1. One set of expressions, all of similar sense, simply express the fact that the idol is an "image" or "likeness." Thus: (1) cumbled, the word occurring in Gen.1.26, and rendered, "image" in all its occurrences, except in Ps.35.6, "van shew" (R.V. marg. "as a shadow"). (2) sinned, rendered "image" (Ezk.8.3), "figure" (Deut.4,16), and "idol" (2 Chr.33.3). (3) formsheth, usually rendered "likeness" (Ex.20.4, etc.) or "similitude" (Num.12.8, etc.), and in R.V. "form," except in Ps.17.15 (marg. "form" in plur. cirrisim), probably meaning the form, once only in this sense (Is.45.16), when it is rendered "idols." II. Another set of expressions denotes the material, particular form, or mode of fabrication: (1) pesel, from a root meaning "to hew," rendered a "graven image" by R.V. in all occurrences, and also by A.V., except twice, "carved image" (Judg.18.18; 2 Chr.33.7). (2) psil, a variant form of the preceding, only in the plur., and also rendered by R.V. "graven images," except in Judg.3.19,26, "quarries" (marg. "graven images"). [Gilgal.] The A.V. agrees except in 2 Chr.33.22, 23, 34, "carved images." (3) melkh, from a root "to pour out," is the standing word for a drink-offering, and so rendered in the great majority of instances. But it is also used of a molten image, and so rendered by both A.V. and R.V. in Is.41.29,48,5. Is.10.14,51,17. From the same root we have (4) masshekhā, the usual word for a molten image, e.g. the molten calf (Ex.32.4,8). (5) a'abbām (only in plur.), probably derived from a verb meaning "to shape," as in Job 10.8, "Thine hands have framed it" (R.V.); almost always translated "idols" in E.V., and in 2 Sam.5.21, "images." In Je.50.2 A.V. has "idols," while R.V. has "images." A shorter form, "ýēḇh," is in one passage (Is.48,5) rendered "idol," and another form, "’ēḇh (Je.22,28), is "idol." In A.V., but "pillar" in R.V. A vessel, apparently from a root "to roll," is generally regarded as meaning "blocks," and is translated by both R.V. and A.V. "idols," everywhere, except in Je.50.2, when A.V. has "images." (7) maskīthbāh, from a root "to set up," always in R.V. "pillar," with "obelisk" in marg. The A.V. also has "pillar" in many places, but in others "image," with "standing image" or "statue" in many. [Pillars.] (8) maskīth is variously rendered. When joined with "stone" it is in R.V. "figured stone," and in A.V. "image of stone." In Pr.25.11, A.V. has "pictures and R.V. marg. "figlrene work." In Ezk.8.12, both A.V. and R.V. have "imagery." Some suppose it represented the winged sun-direct. [Picture.] (9) ūmmāmīm, always in R.V. "sun images"; in A.V. "images" and marg."sun images." In one place (2 Chr.34.7) A.V. has "idols." [Teraphim.] III. A number of other words express the feelings of detestation with which the prophets regard idols. (1) ‘āven, meaning "trouble," "sorrow," is applied to idolatry in general (e.g. Is.41.29), and in one passage (66.3) is rendered "idol." (2) ‘ēlīl, probably having the primary sense of weakness, has usually the meaning of worthlessness, as e.g. in "physicians of no value," Heb. Job 6.4 (cf. 1 K.15.13; 11 Chr.15.16), an "idol in a grove." (3) ‘ēḇhāh, an abominable thing, only once, in the plur. (1 Chr.15.8), "abominable idols," A.V., "abominations in R.V. A shorter form, sheqer, is used of animals ceremonially unclean.—It is possible that some of the names of these classes have been imitations or modifications of more distinctive names of the respective idols. We know, e.g., how bōsheth, "shame," was substituted for ba'at (cf. 2 Sam.2.8 with 1 Chr.8.33); Hosce also uses Beth-aven for Beth-el (Hos.4.15; 5.8,10,5); and Israel was admonished to "make no mention of the name of other gods" (Ex.23.13) and to "destroy their name" (Deut.12.3). Some of the words seem purposely framed or chosen to suggest contempt. Thus 'ārabbīm and its cognates would call up the verb "to hurt, pain, grieve"; gillūlim is akin to a word meaning "dung;" it has also the meaning of "pangs"; and 'ēlīm may have been felt to suggest the notion (lying in the first two letters) of 'ēlim, "gods," a word which indeed in one place (Is.57.5) is rendered "idols" in A.V., but in R.V. "oaks." There seems to be an intended play upon words in Ps.96.5: "All the gods ['ēlīm] of the peoples are idols ['ēlīm]." The sacred writers do not furnish sufficient details of the form of the various idols. Since the Decalogue forids the making for worship of any likeness of anything in the heaven above or on the earth beneath or in the water under the earth, we may infer that images or symbols of these various classes were known. Thus forms, human or otherwise, which were given to the idols would
no doubt, by the accentuation of some feature, suggest the attribute which was supposed to distinguish the idol; the bull, e.g., suggests strength, and images, supposed to be of As- tarte, which have been found in recent excavations, seem to emphasize the idea of fertility. Dagon of the Philistines had a face and head and hands (1Sam.5.4), and some suppose it had the tail of a fish. From Ps.115.5-8 we may conclude that idols were more or less of human form; and the same inference may be drawn from Isaiah's sarcastic description of the making of an image (Is.44.12-19). We also gather from 40.19,20,41.7 that the core of the idol might be of wood, while it was coated with metal and adorned with ornaments. But when idolatry was universally practised, as among the Canaanites, many of the idols would be rude enough, and recent excavations at Taanach and Gezer, e.g., have brought to light forms which, however singularly or oddly from want of artistic skill, fully justify the contemptuous expressions used of idols by the Biblical writers. *Qlty. Statement of Pal. Expul. Fund* from 1902 onwards; *Vincent, Canaan d'après l'exp. récente* (Paris, 1907). [J.R.]

**Idolatry**, a word signifying in its literal sense, *idol worship*, is used six times in the Bible (only once in O.T., 1Sam.15.23, A.V.) as a general term for all kinds of worship other than that of the true God. It is the offence against which the first two of the Ten Commandments were directed (Ex.20.2-6). The Gk. term is not, however, found before the time of Christ by the name of Tertullian, or of his pupil Cyprian, by him (Gal.5.20; 1Cor.10.14; Col.3.5). Without using the term in either case, the great apostle of the Gentiles states two different, complementary rather than contradictory, views of idolatry, in his addresses to the two capitals of western heathenism—Athens and Rome. At Athens (Acts.17.22-31) he gives a careful philosophical sketch of natural religion, and of mankind growing upward through superstition to the true, though unknown, God. To Rome (Ro.1.20-32) he writes the analysis of man's declension from primitive revelation to the penal state in which, with abominable accom- panyments, he was by his sins isolating himself from his fellows, and of various lower creatures. There is, however, in St. Paul no mention of that particular idolatry with which the early Church was most brought into conflict, that worship of the emperor which led St. John to describe Pergamum, where it was pre-eminently practised, as "Satan's throne" (Rev.2.13). Yet that idolatry, through the delation of the state in the person of its chief ruler, throws light on the political power of idolatry in the period covered by the Bible record. It shows us the state preserving its political integrity by requiring a unity of worship from all its members. Hence the complaint made at Thessa- lonica—"these all act contrary to the decrees of Caesar, saying that there is another king, one Jesus" (Ac.17.7), where the situation is exactly parallel with that at the courts of Nebuchadnezzar and Darius (Dan.3.2,12,18,6,5,13). Each state had its own deity—e.g., Chemosh of Moab, Canaan, and Baal of the east, Magna Mater of the west. Hence the amazing harmony with this general conception that Israel should have its own God (Mi.4.5), although he was deemed to be the Most High God (Deut.32.8), and has for a title, connected with the entry into the Promised Land, "the Lord of all the earth" (Jos.3.11,13). So intimate was the connexion between the state and its deity judged to be, that in the event of conquest by an enemy was considered to involve the conquest of its gods (Is.46.1), whose subjugation was symbolized by the use of their implements of worship for the religious banquets of the conquerors (Dan.1.2,5,3; cf. Ezr.1.7-11). The same idea was illustrated by the conqueror changing names compounded with that of the deity worshipped with that of his own deity. Thus Daniel becomes Belteshazzar (Dan.4.8), Hanannah Shadrach, Meshach, and Azariah Abednego (Dan.1.7). In this connexion there is significance in the omission from the name of the renegade Hananiah in the Hebrew prefix Jeho immediately found on the monuments (Sayce, *Fresh Light*, etc., p. 112). The king of Assyria boasts that the gods of no country or city have been able to deliver their people out of his hand, and that therefore it is imprudent of Judah to trust to its covenant God (2K.18.30,33-35,19.9-19). Perhaps that this circumstance, with its chronological improbability, bears on the Biblical history and conception of idolatry: (1) He is thought to have been the builder of the tower of Babel, and the different names for the same God, consequent upon the confusion of tongues, may have led to polytheism; while (2) Abraham, threatened with punishment by Nimrod for refusing to worship his gods, restates the primeval doctrine of the unity of God. To Abraham we owe that strange name of plural form and singular meaning—Elohim—which suggests that he saw that "whatever were the names of the Elohim worshipped by the numerous clans of his people, they were all varieties of one God. Thus, Elohim—comprehending by one name everything that ever was or ever could be called divine—became the name by which the monotheistic age was rightly inaugurated" (Stanley, *Jewish Church*, lect. 1.). The idolatry of the ancestors of the Jewish race is recognized in their own sacred writings (Jos.23.2): it is recognized, too, that it was so engrained in their nature, and they were so prone to it, that for ten centuries it was not purged out of them, and then only a remnant remained pure. Abraham, called out from his tribesmen and their false worship, extracts from his servant Eliezer a promise that he will not take Isaac back to that seductive atmosphere (Gen.24.6). Yet Isaac's son, Jacob, has to cleanse his household from the possession of strange gods (Gen.35.2). In spite of the covenant made at mount Sinai, the Israelites promptly set up a golden calf (Ex.32.2,4,35), and were otherwise, dozen times, openly idolatrous. Not only had they, as Amos (5.26) taunts them, "Sakkuth your king and
Kewan your godstar, your images," but they made no resistance to the allurements of Moab (Num.25.2). This was the worse, as not only had they received the Ten Commandments, but they had been shown (through the directions given for furnishing the tabernacle) how the likeness of cherubim could be made on ark and veil without their becoming objects of worship (Ex.25.18,26.31). It was clear, too, that objects and usages familiar in the Egyptian religion were meant to be adapted for the pure Israelitish worship without necessarily involving any risk. During the wars of settlement under Joshua, the temptation to idolatry was kept at bay, only to recur with overwhelming force in the succeeding generations, when the grandson of Moses himself consented to act as the priest of an idol set up at Dan by Micah (Judg.18.30); and each successive lapse was punished by an oppression from which deliverance was effected by the various judges. Yet the sons of Eli brought Israel into the deepest degradation of all by treating the ark of God as if it were itself a mere idol, and causing it to be so considered by the Philistines (1Sam.4.3,5), who, however, found the divine ark when captured by them, so that they were only too thankful to be rid of its presence (1Sam.5.11). The Philistines, however, still maintained their supremacy over Israel, and (with a view to the recovery of their independence) the Israelites, at Samuel's instigation, renounced their idolatries (1Sam.7.6), and maintained, at least publicly, until the time of Solomon, who allowed each of his own wives to have a sanctuary for her national deity on the mount of Olives (1K.11.7,8). This apostasy was punished by the division of the kingdom, and Jero- boam, the ruler of the northern portion, in order to maintain its religious as well as political independence, prohibited his subjects from going to worship at Jerusalem, providing them instead with golden calves at Bethel and Dan (1K.12.26-28). Thenceforward he was known as the sinner " who made Israel to sin " (1K.14.16,15.30,16.26), for the ten tribes never recovered all their religious independence, and maintained their idolatries in spite of the extinction of Baal prophets and Baal worshippers by Elijah and Elisha (1K.18.40; 2K.10.18-28); and their conquest by the Assyrians only led to a deeper pollution of the land by the introduction of fresh idolatries (2K.17.22,23,32,33; Ezr.4.2,3). In the small southern kingdom there were three reformations, carried out respectively by Asa (1K.15.12), Hezekiah (2K.18.4), and Josiah (2K.23.4-14); yet its punishment was inevitable (2K.23.26,27; cf. Je.2.28; Ezk.8.3,10,14,16), and in the time of Nebuchadnezzar the whole of the nation, with some inconsiderable exceptions, was removed to Babylon (2Chr.36.14-23), whence a remnant returned (at the edict of Cyrus) only to fall again into idolatry, from which they were cut away by the drastic measures of Ezra (Ezr.9.1,2,10.14). The spread of Gk. influences — through the conquests of Alexander — led first to the toleration and then the practice of Gk. idolatries by the Jews (tMac.1.43-50,54); but the attempt of Antiochus Epiphanes to enforce this form of worship led to the vigorous resistance of the Hasmonaean; and by that time the Jewish nation was utterly purged from all taste for idolatry. The idea current in some quarters, that Israel itself believed that Jehovah could be worshipped in idolatrous emblems and with idolatrous accompaniments, is incorrect. Jehovah, in fact, could not be maintained as the God of an idolatrous people. Judges, Samuel, and Kings are reckoned by the Jews themselves among " the prophets," and it is therefore only natural that their point of view should be similar to that which we get in the prophetic denunciations. Phases of idolatry found among the chosen people are the worship on " high places " and in " groves," where the altar had as its adjuncts the sacred pillar maceštāh and wooden post āšârîāh. There is also evidence of such worship of the reproductive forces of nature as led to the consecrated harlotry of both sexes (Deut.23.18; Ho.4.13; 1K.15.12), though this was not uncommon, and seems to be regarded as being unfaithfulness to the covenant God of Israel (Ezk.16.15-43: Ho.2.7,8; Ps.106.39); and shortly before the Captivity we find the chariot and horses of the Sun-god stabled in the temple at Jerusalem (2K.25.11). So far as externals were concerned, there was no difference between the covenant worship and idolatry as to SACRIFICE, which was regarded as the provision of food for the deity (Lev.3.1; Is.65.1; cf. t he gross imposition described in the story of Bel and the Dragon), and took the forms of animal sacrifice (1K.18.23), drink offerings (Je.17.18: Is.57.6), and presentation of tithe and first-fruits (Ho.2.8-10). One ceremonial rite, kissing, is adapted from the general Eastern custom of proffering homage and service (1Sam.10.1). It is found in the worship of the calves (Ho.13.2), and of Baal (1K.19.18), and in sun-worship. My hand hath kissed my mouth, says Jehovah, as. through the mouth of Micah (Job 31.27). A more subtle form of idolatry than the worship of images took possession of the Jewish race, after the grosser forms of it had lost their attraction — viz. that love of money which is a root of all kinds of evil, the covetousness which is idolatry (1Th.6.10; Eph.5.5; Col.3.5). This coveti- ousness is connected with " over-reaching," and that, again, with the viler temptations of such a seaport town as Thessalonica (1Th.4.6); so that idolatry is ranked as a work of the flesh (Gal.5.20), and excluded from salvation (Rom.6.9). Because of the lascivious associations of idolatry, Christians were warned against sharing in idol feasts (1Cor.8.10); for though in itself an idol is nothing, a " no-god " (1Cor.10.20), yet it stands for all practices which tend to dethrone God in favour of His creatures. Hence " the Canon of the New Testament closes with a shudder: Little children keep far off from idolatry (1Jn.5.21). Attention may be drawn to a remarkable sermon by Dean Church, which deals with " the idols of refined and civilized men " (Cathedral Sermons, pp. 154-157).
IODEL

Ezk. 35.15, 36.5; descendant Orr, wonderful only and [c.r.c] Ne. 7.6i). cf. "belonging survive 20; the in 734-732 Chr. 11.29). on S., or S. of A. Imag'e. David's the of Edom —(Je. 35.4 — 2Chr. l6.4), the traditional site Beer-sheba called Ije-abapim (iK. 15.6), and by Tiglath-pileser in 734-732 B.C. (2K. 15.29). The probable site is 'Aimah, a place 2 miles N. of Tophele, and 4 miles S. of the border stream Zered, which was the next stage in the H. march to Moab.—2. A town belonging to Judah near Beer-sheba (iS. 18. 29), of which the site is unknown. [C.R.C.]

Ijon (of springs), a town in Upper Galilee attacked by Benhadad I. of Damascus (iK. 15. 20; 2Chr. 16.4), and by Tiglath-pileser in 734-732 B.C. (2K. 15.29). The name may survive at the Merj 'Ayin (meadow of springs), W. of Hermon, as the place is noticed with Dan and other towns adjacent. [C.R.C.]

Ikkesh', father of Ira, 3 K. 22. 26; 1Chr. 11.28-27. 9.

IlIYricum, an extensive district lying along the E. coast of the Adriatic from the boundary of Italy on the N. to Epirus on the S., and contiguous to Moesia and Macedonia on the E. (Ro. 15. 19).

Image. [IDOL.]

Imla', Imlah, father or progenitor of Miciaiah the prophet (iK. 22.8, 9; 2 Chr. 17.7, 8).

Immanuel. All exposition of Is. 7.14 must ultimately be divided into two points: the Mother, the Child. (1) The Child is to be the name Immanuel = God-with-us. "The name is evidently part of the sign, and has to be explained in connexion with it. Why call a child God-with-us who is not going to act greatly or to be highly honoured, who is only going to suffer, for whom to come to years of intelligence shall only be to come to a sense of his country's disaster and his people's poverty?" (Prof. G. A. Smith, i. 116). Accordingly Prof. Smith's conclusion is that "it seems quite impossible to dissociate so solemn an announcement by Jehovah to the house of David of the birth of a child, so highly named, from that expectation of him which plagues the whole of the current in this royal family since the days of its founder." Immanuel, then, is to be identified with the Messiah. In His activities the Messiah will have a wonderful experience of the presence of God (cf. Orell, Der Prophet Jesaia, p. 35, and Orr, Virgin Birth, p. 235). It is thought that this element was the traditional idea of the Messiah which would be intelligible to the hearers. (Cf. Gressmann, Der Ursprung der Israelitisch-jüdischen Eschatologie, pp. 276, 277 [1905]; cf. Mi. 5.2.) Moreover, it is evident that "a recently born human child cannot help his people: only a divine child could do this." (Cf. Gess., Zur religiöse geschichtlicher Verständnis des Neuen Testaments, p. 24 [1903].) It certainly seems that the prophet anticipated a realization of this prediction within the lifetime of his contemporaries. The primary prophetic reference to the immediate future does not obscure or exclude the thought of a remoter future, and in a deeper sense and on a vaster scale. (2) The Mother is described as the Virgin. "There are signs that the view that Isaiah was using current mythological terms, and intended his נוננ to carry with it the sense of supernatural birth, is rightly regaining ground" (Allen on St. Matt. p. 10). "As a matter of fact, there is no conclusive evidence to show that the word was ever used in the O.T. except with reference to a virgin" (Matthew's Sweet Birth and Infancy, p. 60, where cf. his criticisms on Gesenius; Orr, Virgin Birth, p. 133). "If men had realized the old Oriental circle of ideas they would never have doubted that in the mind of the prophet, "a woman will be with child and shall bring forth a son, and no young woman doth know him that hath conceived her" (Jeremias, Babylonisches in Neuen T. p. 47), and, in any case, the Gk. translators rendered the word by "virgin" in this passage, instead of "young woman. To say, as Arno Neumann does, that they did so wrongly, merely expresses the fact that the Gk. cannot alter the fact. Moreover, as he acknowledges, "Matthew (1.23) accepted this rendering, as others also did" (Neumann, Jesus, p. 50). The rendering by the Gk. translators is significant of the interpretation current in their time. A valuable note on γυνή may be found in R. R. Ottley's Book of Isaiah acce, to the LXX. vol. ii.

Immer'.—1. The founder of a family of priests (1Chr. 9.12; Ezr. 2.37, 10.20; Ne. 7.20, 11.13) whose was the sixteenth course of the service (1Chr. 24.14). [Amariah, 4.].—2. Apparently the name of a place in Babylonia (Ezr. 2, 59; Ne. 7.41). [Amor.]

Immortal. [FUTURE LIFE.]

Imna', son of Helam, an Asherite (1Chr. 7.35; cf. 40).

Imnah'.—1. [IMNA].—2. Father of Kore, 2 (2Chr. 31.14).

Imnah', a descendant of Asher, of the family of Zophah (1Chr. 7.36).

Immri'.—1. A man of Judah, of the family of Pharez (1Chr. 9.1).—2. Father of Zacur, 4 (Ne. 3.2).

Incarnation. (1) Apostolic Doctrine. The final outcome of Christian reflection in the Apostolic age may be instance in four groups. (i) Pauline (see esp. Ph. 2.5ff.), which child claims the personal pre-existence of Christ: His original existence in the form of God; and His deliberate assumption of the form of man, with all that such an assumption included. Cf. 2Cor. 8.9, where He Who once had the riches of the heavenly life is asserted to have chosen instead, out of love to man, the poverty of a earthly body in order to become identified with Christ. (2) More permanent indwelling of Christ of the full plenitude of the substance (not the mere
Incarnation

resemblance) of the Godhead is asserted. (Cf. Holtzm.) (ii) Johannine (Jn.1.14). "In the beginning was the Word, and the Word was with God, and the Word was God." Proceeding from God's mind: His mental Image. *The Word was with God.* This emphasizes the distinction of personality. It will not allow us to confuse the Persons. *The Word was God.* This declares His divine equality with the Father. (Cf. St. Basil Caes., *Hom. in Prec Tert. Verbum;* Gaume, ii. 190 B.) *And the Word became flesh*; that is, says St. Cyril, became man. The evangelist does not say, "came to the flesh," which might suggest a relation of the Word to Jesus similar to that with the prophets or the saints, but actually was made flesh—that is, human. (St. Cyril Alex., in S.F. i. 14, Migne, vi. 157-160.) (iii) St. Peter's testimony, as we might anticipate from his character, is simple, unreflective. He implies Christ's pre-existence in *1 Pet.1.11*; seems to call Him the living Word in *1.23:* describes His mediatorial work in *3.18,* (Cf. Bernard, Acts., iv.) (iv) The New Testament is one and the same Person Whom has been constituted or declared heir of all things, Who was the Agent in Creation, Who was the Splendour of divine Glory and express Image of the divine Substance, and Who also appeared in human history. The Person Who pre-existed in heaven, Who was sacrificed on earth, Who was exalted to high-priestly entrance into heaven, is one and the same. These are successive stages in one personal experience. (2) *Its Relation to the Trinity.* All belief in the Incarnation requires as its logical basis the distinctively Christian conception of God—i.e. the affirmation of inner distinctions within the divine Personality. Hence the Incarnation has emphasized the Fatherhood of God, and filled that term with new and profounder content than it ever possessed before, or can otherwise possess. For fatherhood now appears as an essential characteristic of the Person Who is eternally and essentially relative to the Creation. Even if the Creation had never been, the Son is He in Whom the divine Fatherhood is eternally realized. (Cf. Eph.3.15, R.V. marg., and Dean Robinson's Commentary.) The distinction between a Trinity of manifestation and an essential Trinity is not apostolic nor compatible with Christianity. The N.T. conception is that God reveals what He is: that Fatherhood and Sonship denote permanent distinctions within God Himself. (See also Ilingworth, *Trinity,* 142.) (3) *The Idea of Incarnation.* It means self-investiture by a divine Person in the constituent elements of the nature of man. The Son of God, eternally pre-existent, assumed human nature before that human nature came to possess any personality of its own. Thus He united, in indissoluble unity, with His divine Self, human body, mind, heart, and will. In Mary's Child—so close is the similarity between God and man created in God's Image—a divine Person actually took the place occupied in every other human birth by a created person. In other words, the personality of Jesus is divine and not human. Thus, whereas at every other human birth an increase is made to the sum-total of existing persons, this was not the case at the birth of Christ. By His human birth the number of persons existing in the universe increased—an augmentation of personam. (St. Augustine, *Ep. 140,* ii. 655.) (4) *The Purpose of the Incarnation* is twofold: enlightenment and strength (illumination, adjutorium; *St. Aug.*, *Ep. 137* to Volusian), increase of knowledge and increase of power: corresponding to man's deepest defects, which are ignorance and weakness. (i) Viewed in the aspect of enlightenment, it is the self-revelation of God in the most adequate way, i.e. in person. (Cf. Ottley, *Incarnation,* p. 25.) God's self-revelation is: (a) through Nature, which, being impersonal, cannot adequately reveal the personal (Ro.1.20); (b) through mankind, which reveals Him imperfectly because of its moral imperfections; (c) through Incarnation, which alone is adequate, because here alone moral perfection is displayed. Cf. *Heb. 1.3.* (ii) Viewed as strength. "Jesus introduces into the heart of humanity a new regenerative force" (Ottley, p. 27). The Incarnate God's presence is not surprising. The consequences against delay are worthless, men being incompetent to judge, although able to discern a providential process afterwards in history. Cf. *Ac. 14.17.* (i) In the world at large. The comparative study of religions shows endeavours to effect the union of God and man in two directions: either by bringing down God to man, or by elevating imperfect man to divinity. Neither achieved success. The former degraded God, the latter retained man's imperfections. Yet both intended well. Incarnation alone consummated this union. The intellectual preparation is seen at the morning of the Christian Era and is an expression which provided a competent instrument for the magnitude of the idea. (Cf. *Lux Mandi,* Godet, *Bibl. Stud.,* O.T., p. 18; Harris, *Self-revelation,* p. 68.) (ii) In the nation. The selection of Israel was not to the exclusion of the world, but for its sake. (Cf. Gwatkin, *Knowledge of God,* i. 131; Robinson, *Evan* sons, p. 25.) In no nation but Israel were the conditions such as would provide for the Son of God a natural religious human development. (iii) In the home. The selection of the nation is consummated in the selection of the Virgin Mother. (6) *The Relation to Modern Thought.* Incarnation presents a difficulty to those who regard the theory of development as involving continuous progress and excluding the notion of breaks or crises or the introduction of new elements from without. The doctrine must remain difficult if isolated from God's connexion with the universe. The relation of God to Nature is not identical with His relation to mankind, nor His relation to mankind with that to Christ. (i) God's relation to nature is Immanence. Deistic abstractions must be dismissed. God pervades the creation, which exists in Him. This truth of Immanence must be balanced by that of His personal transcendent. (ii) God's rela-
tion to mankind is moral and natural, a relation of Will to will, of benevolence, of resemblance, of adoption. It begins with creation in His Image, a constitutional resemblance capable of conversion into a moral resemblance increasingly closer and very intense. Not only does the difference between Creator and creature is absolute. (iii) God's relation to the Incarnate Christ is prepared for by the fact of man's creation in the divine Image, the supreme achievement consisting in the actual replacement of a created personality by an uncreated. This is a relation of equality. Hence Incarnation, although unique, is not an unprepared event, but the crown of a process. Moreover, self-communication is the essential characteristic of Deity. To nature He imparts existence, to mankind adoption, to Christ equality. The last, which is really the first, is the eternal self-communication of God within His own Personality. The notion of tendency to substitute Immanence for Incarnation is an unfortunate confusion of two terms by no means equivalent. [TEPTATION (7) (ii.)] [W.J.S.S.]

**Incense.** The term has two applications: (1) The substance which, when burned, exhaled an aromatic perfume; and (2) the odour arising on the burning, assimilated to the custom of the ritual of worship. The use of aromatic perfumes has always been more common in the East than in the West. [PERFUMES.] Perhaps the use of incense in sacrifices can be thus explained. Men believe that what is so grateful to themselves is pleasing to the deity. Men's incense was a survival in popular superstition of a more primitive and unrefined conception of the use of fumigation—viz. to expel demons (cf. Tob. 6.17.8.1-3).—An Adjunct of Worship in O.T. Though incense occupies a prominent place in the ritual legislation of the Pentateuch, there is no other certain reference to its use in Israelite worship till the time of Jeremiah (7th cent. B.C.); cf. Eze. 6.20, cf. 41.5. In E.V. incense is used to translate two Heb. words. (1) 額hōnah, most frequently rendered frankincense, a species of gum which appears in the ritual legislation as a concomitant of the meal-offering, as in the “Black Mass” of the Church. Pure frankincense was also placed in (two golden vessels) on the table of shewbread, and when the loaves were removed on the following sabbath, this was burned as a “memorial” (‘askārd) on the great altar (Lev. 24.7-9). (2) qīfōrēth. This word, however, strictly means the sweet smoke (of sacrifice), e.g. Is.1.13. It is used of the sweet smoke of frankincense and other compounds which made up the qīfōrēth sassumim, “the incense of aromatics” prescribed in Ex. 30.34. This compound included among its constituents frankincense, and was offered independently in the form of the incense offering (qīfōrēth ṭamīmīd, Ex. 30.8) daily, morning and evening. It was burned on the golden altar in the holy place, according to Ex. 30.7ff., by the high-priest himself. The earlier usage presumably was to burn the incense in censers, each priest possessing one (cf. Lev. 10.1ff.). But in the ritual the golden altar took the place of censers, which were formerly used for transferring the coals from the golden altar. The complicated formula for compounding the incense is given in Ex.30.34-38. —Later Usage and Significance. In the Herodian temple the ceremonial of the incense-offering is more elaborately developed. The incense itself is a more elaborate compound, consisting (according to Josephus) of thirteen ingredients. The proper preparation and compounding of these was a mysterious art. The secret was carefully guarded in the last period of the temple by the family of Abtinus, who were assigned a special room in the precincts of the sanctuary for this purpose. The duty of burning the incense no longer devolved on the high-priest, but was assigned daily by lot to a priest who had not performed the function before (cf. Lu. 1.8-10). The most solemn moment was when the officiating priest (alone within the holy place, his assistants having withdrawn) emptied the incense on the altar fire. At the rising of the smoke the people withdrew from the inner court, and prostrated themselves, spreading out their hands in silent prayer. This was followed apparently by the recitation of the Shema (Deut. 6.4ff., etc.), and the ten commandments, together with certain benedictions, the whole being concluded with the priestly blessing, pronounced by the officiating priest and his four assistants with hands from the steps in front of the temple. Incense is regarded in Scripture as a symbol of prayer (a natural idea suggested by the rising of the sweet smoke heavenwards). Cj. Ps. 141.2; Rev. 8.3ff., 5.8. Maimonides, Mishna Tora (Tentidim u-Musaphim). Older monographs in Ugel and Tov. [G.H.B.]

**Incest.** [CRIMES; MARRIAGE.]

**India.** The name of India does not occur in the Bible before the book of Esther, where it is noticed as the limit of the territories of Ahaseurus in the E., as Ethiopia was in the W. (1.18.9). The India of the book of Esther is not the peninsula of Hindustan but the country surrounding the Indus, the Punjab and perhaps Scinde. In Mac. 8.8 India is reckoned among the countries which Eumenes, king of Pergamus, received out of the possessions of Antichlos the Great. In the 9th cent. B.C. the Assyrians probably traded with India; for the “Black Mass” of the Church. India is shown as the elephant, rhinoceros, and apes brought as tribute. [TARSHISH.] The early notice of Cinnamon and other Indian products in O.T. may thus be explained. [RACES.] [C.R.C.]

**Inheritance.** [FAMILY.]

**Ink, inkhorn.** [WRITING.]

**Inn.** The Heb. word (midōn) thus rendered lit. signifies “a lodging-place for the night.” Inns, in our sense of the term, were, and still are, unknown in the East, where hospitality is religiously practised. Even the khans, or caravanserais, the nearest parallel to European inns, were established but gradually. It is doubtful whether there is any allusion to them in O.T. The lodging-place of a caravan was selected originally on account of its proximity to water or pasture, by which the travellers pitched their tents and passed the night. Such was undoubtedly the “inn” at which occurred the incident in the life of Moses, narrated in Ex. 4.24 (cf. Gen. 42.27). On the more frequent occurrence of the word in the E., caravanserais were in course of time erected.
often at the expense of the wealthy. The following description of one on the road from Baghdad to Babylon is typical: "It is a large and substantial square building, in the distance resembling a fortress, being surrounded with a lofty wall, and flanked by round towers to defend the inmates in case of attack. Passing through a strong gateway the guest enters a large court, the sides of which are divided into numerous arched compartments, open in front, for the accommodation of separate parties and for the reception of goods. In the centre is a spacious raised platform, used for sleeping upon at night, or for the devotions of the faithful during the day. Between the outer wall and the compartments are wide vaulted arcades, extending round the entire building, where the beasts of burden are placed. Upon the roof of the arcades is an excellent terrace, and over the gateway an elevated tower containing two rooms—one of which is open at the sides, permitting the occupants to enjoy every breath of air that passes across the heated plain. The terrace is tolerably clean; but the court and stabling below are ankle-deep in chopped straw and filth" (Loftus, *Chaldea*, p. 13). The πανδοξείον (Lu.10.34) probably differed from the κατάθυμα (2.7) in having a "host" or "innkeeper" (10.35), who supplied some few of the necessary provisions, and attended to the wants of travellers.

**Insolvency. [Loan.]**

**Inspiration. [Scripture, Holy; Spirit, Holy.]**

**Interest. [Loan.]**

Iphedelai', a Benjamite chief, one of the Bene-Shashak (1Chr.8.25; cf. 28).

Ir (1Chr.7.12). [Ir., 1.]

Ira'.—1. "The Jairite," named in the list of David’s chief officers (2Sam.20.26); possibly the same as—2. A hero of David’s guard; an Ithrite (2Sam.23.38; 1Chr.11.40).—3. Another of David’s guard, a Tecoite, son of Ikkesh (2Sam.23.26; 1Chr.11.28, 27.9).

Ir-Abba', son of Encea; grandson of Cain, and father of Mohnajel (Gen.4.18).

Ir'aim, a leader of the Edomites (Gen.36.43; 1Chr.1.54).

Ir-ha’āre’s (A.V. the City of Destruction), a city in Egypt (Is.19.18). There are various explanations. (1) "The city of the sun," a translation of Ον. (2) "The city Heres," the Egyptian sacred name of Heliopolis (Kha-Ra), "the abode of the sun." (3) "A city of destruction," i.e. that one of the five cities mentioned should be destroyed. (4) "A city preserved," i.e. that one should be preserved. [Beth-shemesh, 4.]

Ir-ha’s, —1. Ira, a Benjamite, son of Bela (1Chr.7.7,12).—2. (1Esd.8.62) = Uriah, 3.

Ir’ijah’, son of Sheleaham, a captain of the ward, who arrested Jeremiah at the gate of Benjamin, on the charge of being about to desert to the Chaldeans (Jer.37.13,14).

Ir-na’hāsh’ (1Chr.4.12), a town (mentioned in the genealogy as if a personal name) apparently of Judah. Perhaps Deir Nakkhās, 2 miles N.E. of Beth-Jibrin, the modern Deir (convex) having taken the place of the Heb. ‘ir (city). It is a small village. [C.R.C.]

Iron, one of the cities of Naphtali (Jos.19.38); now Yārūn, a village 7 miles S.W. of Kedesheh. [C.R.C.]

**Iron. (Heb. barzel; Aram. also parzel), mentioned with Brass as the earliest of known metals (Gen.4.22). As it is rarely found in its native state, but generally as an oxide or carbonate, the knowledge of the art of forging iron, which is attributed to Judah-cain, indicates that the difficulties attending the smelting of this metal had been overcome. The natives of India and Africa employ an extremely simple and very ancient method, which though rude is effective, and suggests the possibility of similar knowledge in an early stage of civilization. The natural wealth of the soil of Canaan is indicated by describing it as "a land whose stones are iron" (Deut.8.9), which, however, is not strictly true of Palestine proper. The book of Job contains passages which indicate that iron was well known. Of the manner of procuring it, we learn that "iron is taken from dust" (Job 28.22). The "furnace of iron" (Deut.4.20; Is.8.51) is a figure which vividly expresses hard bondage, as represented by the severe labour of smelting. Sheet-iron was used for cooking utensils (Ezk.4.3; cf. Lev.7.9). That it was plentiful in the time of David appears from 1Chr.22.3. The market of Tyre was supplied by hammers of bright or polished iron, by the merchants of Dan and Javan (Ezk.27.19). The Chalybes of the Pontus were celebrated as workers in iron in very ancient times. The produce of their labour is supposed to be alluded to in Jez.15.12, as being of superior quality. Iron was referred to the Egyptians at a very early date, the first instance of its occurrence being in a tomb of the 6th dynasty (c. 3400 B.C.), but it had not become common, either here or in Greece, in Mykenian times (c. 1500 B.C.), so the allusions to it in the Pentateuch are no anachronisms. During the next five centuries it gradually became common. There are some mines in Egypt, others in the S. of the Lebanon, and the ores are of frequent occurrence. That ancient iron articles are so rarely found may be partly accounted for by the fact that iron is easily destroyed by moisture and exposure to the air. The Egyptians obtained their ironchiefly from Assyria—proper in the form of bricks or pigs. Specimens of Assyrian iron-work overlaid with bronze were discovered by Mr. Layard, and are now in the British Museum. Iron weapons of various kinds were found at Nimrud, but fell to pieces on exposure to the air. Iron knives found at Tell Loh in Chaldea may be as old as 2500 B.C.; and iron is mentioned in the Amarna tablets (11th cent. B.C.). Malleable iron was in common use, but it is doubtful whether the ancients were acquainted with cast-iron. The rendering given by the LXX. of Job 40.18 seems to imply that some method nearly like casting was known, and is supported by a passage in Diodorus (v. 13). In Ecles.38.28 we have a picture of the interior of an ironsmith’s (Is.44.12) workshop.

Iripel, a city of Benjamin (Jos.18.27). Probably the village Rā-fāl near Gibea. [C.R.C.]

Ir-šemesh. [Beth-shemesh, 1.]

Ir’u, eldest son of Caleb, son of Jephunneh (1Chr.4.15).

Isaac was the son of the old age of Abra-
ISAIAH 369

ISAIAH

ham and Sarah, given in accordance with the repeated promises of God some years after Abraham had become the father of Ishmael by Hagar, Sarah's bond-maid. It was he whom Abraham believed himself called upon to offer up to Jehovah on mount Moriah, and Isaac's acquiescence in the sacrifice is but typical of the meekness which he appears to have displayed all through life. His wife Rebekah was brought to him from the kinsmen of his father by Eliezer, Abraham's steward. He became the father of twins, Jacob and Esau, by Rebekah, when at last, in accordance with his prayer, God granted her children. He assisted his half-brother to bury Abraham, and settled in the S., by the well Lahai-roi. Driven by famine to Gerar, he practised on Abimelech the king a stratagem similar to that of Abraham on account of his wife. The narrative is now concerned with the wells which he made, only to be dispossessed by the Philistines. He and his posterity lived there peacefully and quietly, too good-natured, it would appear, not to be apprehensive of any security, marred possibly by domestic trouble if we may judge from the incident of the strategy practised by his wife and younger son. He died at the age of 180, and was buried by his two sons. The name of Isaac seems certainly connected with 'laughter,' and several people's lives are in the narratives of independent traditions which may account for such facts as that he gave his dying blessing to his sons some forty years before he actually expired. The only incident upon which the memory fixes is the one theologically important, viz. the intended sacrifice on mount Moriah. Whether viewed as literal history or as edifying story, this incident is of immense importance. On the one side it is typical of the sacrifice on Calvary, on the other it is evidence of a time when human sacrifice was giving way to the slaughter of animals. There can be little doubt that Abraham himself wrote or revised the objectionable idea to the early Hebrew (cf. the story of Jephthah). The story of the sacrifice of Isaac points to the time when the religious consciousness was beginning to see that Jehovah could be satisfied with something less than the human firstborn as a proof of devotion, that a beast could be used to redeem the son. The story must have stood as a perpetual warning to the Israelites against any tendency to lapse into this awful practice. Viewed from the more conservative position, the trial of Abraham's faith became a crucial factor of much of later Judaistic and even Christian theology, and the faith of father Abraham is one of the cardinal points in the Jewish system. [B.F.S.]

Isaiah. In all "the goodly fellowship of the prophets" no one holds a more conspicuous place, for nobleness of character, clearness and steadiness of prophetic vision, or historical significance, than Isaiah. He lived through a most critical period of Israelite history, having seen the two kingdoms at the height of their prosperity, the ruin of the one, and the miraculous deliverance from ruin of the other; and in the eventful times of his own kingdom he took, in his own person, a great part. Of his father Amoz we know nothing; the name is different in the original from that of the prophet Amos, and there is nothing to support the Jewish tradition that he was a near relative of king Amaziah. Yet, from the prominent position which he occupied, the intimate terms on which he seems to have stood with the royal family, and the emphasis he lays on the influence of the aristocratic party, it is not unnatural to conclude that he was of noble parentage or high social position. As "Judah and Jerusalem" are uppermost in his thoughts, it is believed that he was a native of, and resident in, the capital; and, from the fact that his wife is called by him "the prophetess"—the only wife of a prophet so designated in O.T.—it may be inferred that he gave himself to a purely prophetic work. He had at least two sons, to whom he gave symbolic names; and it would appear that he regarded his own name also (=salvation of Jehovah) as symbolical (Is. 8.18). These are all the particulars we know of his personal history. He disappears entirely from the sacred record after the deliverance of Jerusalem from Sennacherib's invasion in Hezekiah's reign in 701 B.C. By that time he had exercised the prophetic office for forty years; and there is a very persistent tradition that he suffered martyrdom by being slain asunder in the reign of Hezekiah's son and successor Manasseh. He lived in the reigns of four kings of Judah—Uzziah, Jotham, Ahaz, and Hezekiah; and the book which bears his name contains prophecies falling presumably within the four reigns, bearing on the religious, political, and social condition of his own country, as well as others relating to peoples and countries with which Judah came into contact. The prophetic word, during such a long ministry, must have been spoken at sundry times and in divers manners; and, though there are references to certain things that the prophet himself wrote (see 8.16, 30.8), there is no ground for concluding that the book, in its present form, came from his hand. In all probability the single prophecies, or small collections of his prophecies, would be written from time to time after the addresses were delivered, and from these smaller collections the book, in its final form, was no doubt compiled by those who collected the prophetic writings. The book follows, in the main, the course of the history. Yet we cannot take the order of the chapters as the precise order of the events to which they relate: the prophet's call, e.g., is not recorded till ch. 6. And, since we are fairly well informed as to the sequence of the events of the early part of Amos' career, it is for the purpose of gaining an intelligent view of the book, to take the history as our guide, and to mark the chief prophetic addresses which either plainly declare their reference, or by fair inference can be referred to definite events and episodes. The year of the prophet's call, 742 B.C., the year that king Uzziah died, 727 B.C., marked an
era in Israelite history. Uzziah of Judah and Jeroboam II. of Israel were almost contemporaneous, and under them the kingdoms had enjoyed about half a century of prosperity. The borders of the northern kingdom were greatly extended (2K.14.25); and, in the southern kingdom, the army had been strengthened and organized (2Chr.26.11-15), trade and commerce extended (26.2), and under improved husbandry the land brought forth plentifully (ver. 10). But prosperity had bred luxury, and with luxury set in decay. It may be that Isaiah, living in the midst of this, and brooding over the danger, was thus prepared for the vision by which he was consecrated to his life's work (Is.6). The temple and its service are to his inner gaze etherealized, and a house of another building rises before him. The mercy-seat becomes God's throne, the cherubim are transformed into majestic seraphim, veiling their faces with their wings, and adoring Him Whose train fills the temple. Two things were revealed to Isaiah, the boundless holiness and glory of God and the imperfection and sinfulness of himself and his people; and the call addressed to him and willingly accepted was to speak in the name of such a God to such a people. His word was not to be listened to; yet his work, being God's work, would not be in vain; though the many should harden their hearts and perish, yet a remnant should return. These became cardinal points in Isaiah's teaching, which he was soon called upon publicly to enforce. Jotham, who had been a reluctant during the reign of Uzziah, had not been long seated on the throne when an ominous sign appeared on the horizon. The great Assyrian empire, which a century before had made its power felt as far W. as Palestine, began a new course of conquest with the accession of Pul, or Tiglath-pileser III. (745 B.C.); and the small states in the W., too weak singly to bear the brunt of the invasion, saw it to be their policy to combine for resistance. Already in the reign of Jotham we have intimation (2K.15.37) of a league of this kind between the kings of Syria and Israel, into which, apparently, they endeavoured to draw the Judæans also. In this, and probably in the intention of Sennacherib to dethrone the king of Judah and to set in his place one who would be in sympathy with their policy (Is.7.1, 2). The prophet, reading God's purpose aright, saw in the Assyrian advance the preparation of the rod for the chastisement of his people's sin. At this time, accordingly, we may place those discourses (in Is.2.4) in which Isaiah appears in the usual prophetic attitude of reprover of sin and denounced of judgment. Very soon thereafter he has also to act the part of national political adviser. For in the reign of Ahaz the league of Syria and Israel took shape in the Syro-Ephraimitic war, in which Judah was invaded, and its territory curtailed (2K.16.6; 2Chr.28.5). The small northern states that lay on the westward march of the Assyrians had been swept away or made tributary; and to a merely worldly policy the temptation was strong, if not to combine with Israel and Damascus for resistance, then to make terms with the advancing Assyrian, so as to beat off the attack of the confederates. Ahaz was not the man to look to a Higher Power, and his heart "was moved and the heart of his people, as the trees of the forest are moved with the wind" (Is.7.2). At this juncture Isaiah comes forward with a better policy. He has with him his son Shear-jashub (a remnant shall return); and the burden of his message is, that, though there will be affliction for a time, God will be the defence of His own. "Take heed and be quiet. . . . If ye will not believe, surely ye shall not be established" (Is.7.4, 9). It was on this occasion that he delivered the first of those mysterious and lofty prophecies of Immanuel (God with us. 7.14); and apparently not long after that he gave to another son the name Maher-shalal-hash-baz (Haste-booty, speed-precy), in which, through the gloom of deep national distress, shines the promise of final deliverance and lasting peace (9.6, 7). To this period may also belong 17.1-11, announcing the downfall of Damascus and Ephraim, and ch. 1 describing the devastation produced by the invaders, unless, perhaps, this refers to the later invasion of the Assyrians. The prophet's advice and warning were in vain. Ahaz made terms with the Assyrians (2K.16.7), and, though the immediate effect was the weakening of his own position, he had it in his power to check his policy and join with Tiglath-pileser III. Sennacherib succeeded by Shalmaneser IV., and the Philistine princes would, as seems, be customary, have seized the occasion of the change of ruler to meditate revolt, and to have sent messengers to Jerusalem to seek sympathy in their design. But the prophet, instead of relief, sees only heavier oppression and trouble "from the north," not only for Philistia but for the whole of Palestine; and ere long the heavy blow, predicted in 28.1, fell, in the invasion of Palestine, the siege and capture of Samaria, the ruin of the northern kingdom, and the affliction of the country of the Philistines. But the time is to pass. The first phase. The smaller states, too weak even in combination to cope with Assyria, turned their eyes towards the other great world-power Egypt, hoping by concerted action and an Egyptian alliance to resist the Assyrians. Isaiah, who had before opposed the Assyrian alliance, but had acquiesced in it when it was an accomplished fact, was now as strenuous in his opposition to the Egyptian alliance, denounced such refuges of lies (28.17), and counselled his people to trust in their own God: "In returning and rest shall ye be saved; in quietness and confidence shall be your strength" (28.12, 16, 30, 15). Again, however, he was overborne: Hezekiah refused to pay his tribute to Assyria, and cast in his lot with the disaffected states, thus bringing upon himself the invasion of Sennacherib. [HEZEKIAH.] To this period may belong 14.24-27, expressing the certainty of the overthrow of the Assyrian; 10.5-34, describing the march of the invader; 18, referring to the negotiations with the Egyptians for concerted resistance; 22.15ff., the
prophecy against Shebna, the leader of the Egyptianizing policy; 28, the prophet's insistence, in the face of opposition, on a policy of *resist*; and 30-33, directed against the Egyptianizing "Servant" of Hezekiah, whose adoption is intended to describe the commotion in Jerusalem as the invading host surrounded the city; and 37.22-35 is the proud defiance, by the prophet, of the Assyrian who had impiously defied the God of Israel. It will be observed that, whereas ch. 1-12 are concerned with Judah and "Jerusalem," the remaining chapters from 13-23 relate more particularly to the various nations whose fortunes were of chief concern to Israel. These prophecies are no doubt the written deposit of discourses pronounced from time to time, as these nations came more directly in contact with Judah, to whose fortunes there is throughout a more or less pronounced reference. Some of these prophecies, either explicitly or by obvious reference, date themselves; others are more vague in this respect, and in some of the chapters the prophet rises to a world-wide outlook. 36-39 are historical, and correspond closely with 2 K. 18. 13-20. The fall of Tachkaran begins, Damascus is pronounced, and gather up details of the life of Hezekiah, who, as well as the prophet, disappears from the record after that event, and they were evidently placed there to round off the series of preceding prophecies. The remaining chapters of the book, 40-66, are now almost universally believed to be written after the overthrow of Babylon; and God's people delivered (45.1-7). Though prophets foresee and foretell events of the future, there is no instance of a prophet transferring himself entirely and continuously to a distant future time; and taking no note of the prophecy as he takes note of the actual. When as the words of Isaiah, we should have to regard them as written and laid away against a time distant and unknown. Read as an outburst of prophecy in the Exile, they are intelligible as a message of comfort to the exiles, to give them courage for the coming in of the new age. At the same time we are to bear in mind that, to Isaiah, Assyria was simply the rod of God's anger (10.5), which would be broken and cast away when God's time came, and that he had good cause to forebode evil to his own unfaithful people when the conquering power of Babylon should take the place of the old oppressor (see 39.6-9). Words spoken by him with this in view would be treasured in the minds of his "disciples" (8.16), and would come home with force to their successors when the disaster of the Exile took place. To such words we may see reference in the repeated mention in these chapters (41.22, 45.9, 45.18, 48.3) of "former prophetic" that had come to pass when the prophet of consolation is already fully established. In the words: "Servant of Jehovah," who is to suffer and death was to bring in everlasting righteousness and peace. There has been endless speculation as to the precise meaning and primary reference of this expression. It is evident that in some places (e.g., 41.4, 42.19ff.) the whole of Israel is called the "servant," though a distinction between the mass and the better part of the nation may be discernible. But this explanation will not suffice for other passages, notably 42.1-4, 49.1-5, 50.4-9, 52.13-53.12. Those who hold a collective sense suppose that the servant here is not even Israel at its best, but Israel in general, as it should be. Those who look for an individual reference explain the servant as some pious sufferer of former times, as, e.g., Job or Jeremiah, or some obscure and patient sufferer in the Exile. All are agreed that in the Lord Jesus Christ the description of the servant finds a fulfilment in a manner that cannot be interpreted either as individual or of any class; and there is nothing in the theology of prophecy or in the words, as fairly interpreted, to forbid the conclusion that the prophet had a glimpse into the mystery hid from ages and manifested in Him. The sufferings of the Exile, the widening view of the mission of Israel, the widening understanding of the nation, the failure of Israel to realize that mission, would be the divine education, by which the prophetic mind was forced to the conviction that God's purpose could only be achieved by one brought through more than mere human attributes, and by the suffering of an innocent one for the guilty. The view that these prophecies are of Exilian date implies, what on independent grounds is most probable, that the book of Isaiah, as we now have it, was compiled after the Exile. And, if this were so, it is quite conceivable how a post-Exilian prophecy might be inserted even in the earlier part of the book: e.g., the prophecy on Babylon (13, 14) placed at the end of the prophecies on the nations, is expressed in language that would not apply to the Babylon of Isaiah's time, but describes it as the mistress of the nations, the oppressor of Israel, doomed to immediate and utter destruction. So, again, there are chapters in the second part of the book (56-59, 63-66) which seem to imply a Palestinian background, and the existence of the temple, and may belong to the period after the return, although some would refer them to pre-Exilian times. Such a view of the mode of composition of the book, however, does not affect the value of the prophecies, nor detract from the claim of Isaiah to be called the Evangelical Prophet. Driver, "Isaiah: his Life and Times" (in Men of the Bible series); Skinner, "Isaiah" (in Cambridge Bible); A. B. Davidson, "Isaiah" (in Temple Bible); Whitehouse, "Isaiah" (in Century Bible). For a recent defence of the Isaianic authorship of the second part, see Thirle, Old Testament Prophets (1907).

Isaiah, daughter of Haran, the brother of Abram, and sister of Milcah and of Lot (Gen. 11.29). In Jewish tradition she is identified
with Sarai, but Dillmann points out that this is contradicted by 20:12, and also that Sarah was only 10 years younger than Abraham (17:17), and Ishmael was not therefore the child of his younger brother. Prof. Sayce (Higher Crit. and the Monuments, p. 160) suggests that Isaac is a misreading of Mitcah, as the same cuneiform character may be read indifferently mit and is. "If so, we have in her name direct evidence of the use of cuneiform books on the part of a Biblical writer."  

Iscariot. [Judas Iscariot; Sychar.]  
Is'c ario t, one of the young men of the house of Judah, described as the "father of Eshtemoa" (1 Chr. 4:17).  

Ish'ba k'ah', a son of Abraham and Keturah (Gen. 25:2; 1 Chr. 1:32). The name suggests the valley called Sabak, in the D navegador, a fertile and extensive tract in the Nejd, or highland of Arabia.  

Ish'bi-beneb'ah, one of the princes of Philistine giants; he attacked David in battle, but was slain by Abishai (2 Sam. 21:16,17). [Non.]  

Ishbosheth, the youngest of Saul's sons, was slaughtered at Baal-Peor in accordance with the custom explained under Baal. He alone survived his father, who was slain at the battle of Gilboa, and rightly succeeded to the throne; but it was only over part of the nation, as David had already established himself as king in Hebron and was gradually winning over the other tribes. Ishbosheth reigned in Mahanaim for two years, his chief adviser being Abner; but he managed to offend the latter, who forthwith made overtures to David. These resulted in Abner's own murder, and Ishbosheth, being left with no capable minister, fell a victim to two assassins, Baanah and Rechab. Their motive for the murder is not stated, nor is the text quite sound in the description of the slaughter. [It is better to follow the LXX, which states that they entered the house while the porteress was sleeping over her task of cleansing the wheat.] They cut off his head and brought it to David, hoping of the other reward, and probably their act was simply done with a view to ingratiating themselves with the more powerful monarch. They were evidently unprepared for the retribution meted out to them by David, who ordered their immediate execution and had the head of Ishbosheth honourably buried in the grave of Abner in Hebron (2 Sam. 4:12). [N. F. S.]  

Ishi'.—1. Son of Appaim (1 Chr. 2:31), of the house of Hezron; a descendant of Judah, and father of Sheshan.  

—2. Another descendant of Judah, with a son Zoheth (1 Chr. 4:20).  

Ishi'ah (my husband), found only in Hos. 2:16: "Thou shalt call Me Ishi; and shalt call Me no more Baal." The two words mean the same thing [Baal]; but the latter term had become so much associated with the degrading worship of the Baalim that the prophet, by the use of the other term, suggested a higher and purer conception of the relation of Israel to their national God. [J. R. J.]  

Ish'hah', a lay Israelite, of the Bene-Harim who put away his foreign wife (Ezr. 10:31).  

Ish'mah', the name of a person or place in the genealogy of Judah (1 Chr. 4:3).  

Ish'mael (= God heardeth).—1. (Gen. 16:11.) Abraham's son, born of Hagar, whom Sarah gave to Abraham to wife, in view of her own barrenness. He became the cause of bad feeling between the wife and her bondmaid and, by mocking at Isaac on the occasion of the weaning of the latter, provoked his mother's expulsion from the house. With her fifteen-year-old son, whom she is represented as carrying, she wandered in the wilderness of Beer-sheba and would have died from thirst, had it not been for a miraculous interposition. They subsequently dwelt in the wilderness of Paddan where he took a wife from Egypt. Having assisted at the funeral of his father, he himself died at the age of 137 (25:9,17). God had promised that he should become a great nation and Ishmael's descendants settled in the wilderness and became wandering Arab tribes. Ishmaelites are several times mentioned in O.T., and are described as Aramaean, or descendants of Ishmael. The sons are to be found as tribe designations both in Scripture and in Assyro-Babylonian inscriptions. Kedar is the most obvious example and, besides constant reference in the Bible, is found in the form of Qudri or Qadri in Assyrian, once with the meaning of Arabia generally. Nebayth is the name of an Ishmaelite tribe. It is doubtful whether these tribes had a language approaching more nearly to Heb. or to Arabic; but the story of their descent from Ishmael shows that the Israelites believed themselves closely related to the nomadic tribes. Mohammed accepted Ishmael as a true prophet and reckoned his descent from him. Islam more regards him as the firstborn and the real object of Abraham's intended sacrifice. Rabinic writers, on the other hand, have preserved conversations between Ishmael and Isaac in which the former claims birthright on the strength of his voluntary circumcision at the age of 13; and on the ground of present necessity for complete sacrifice.—2. Son of Azel, and descendant of Saul, through Meribaal = Mephibosheth (1 Chr. 8:38,9:14).—3. A man of Judah, father of Zerediah, 9 (2 Chr. 19:11).—4. Also a man of Judah, son of Jehohanan, one of the captains of hundreds who assisted Jehoiada in placing Jeohash on the throne (23:1).—5. A priest of the sons of Pashur who put away his foreign wife (Ezr. 10:22).—6. Son of Nehemiah, who slew Gedaliah, the governor appointed by Babylonia (2 K. 25:23,25; Jer. 40:7—41:15). He was of the seed royal, and his action seems to have been one of revenge for the overthrow of the house of David. He made no secret of his intention, but Gedaliah refused to believe the rumour and invited him to a meal at Mizpah. The governor and all his attendants were slain by Ishmael and his ten companions so secretly that nothing was known in the town for two days. At the end of that time he invited them to a banquet, and while they were bringing offerings to the ruins of the temple to turn into the house of the governor, and lie there slew all but ten who told him of hidden treasure. The bodies were thrown into a well. He then descended on the town, carried away
the daughters of king Zedekiah with their guard, and "all the people of the town," and ran to the Ammonites. He was pursued by Jehoiachin; and the Ammonites were slain and his prey was taken from him, but he and the remaining eight escaped. [B.F.S.]

**Ishmaelite.** [Ishmael, 1; Ishmeelite.]

Ishmaiah, son of Obadiah; ruler of Zebulun in the time of David (1Chr.27.19).

**Ishmeelites** (1Chr.2.27). **Ishmeelites** (Gen.31:22, 28, 30, 31). The descendants of Ishmael, i.e. (R.V. gives the form Ishmaelites throughout, as A.V. does in Judg.8.24; Ps.83.6). Ishmerai, a Benjamite chief, of the family of Elpaal (1Chr.8.18; cf. 28).

Ishod (1 Chr.7.13; R.V. Ishhod = man of renown), a man of Manasseh, and son of Hamnoo and the queen.

Ishpan, a Benjamite chief, of the family of Shashak (1Chr.8.22).

Ish-toth, named with Zoab, Rehob, and Maacah (2Sam.10.6, 8). It is probable that the real signification is "the men of Tob."

Ishuah, second son of Asher (Gen.46.17).

Ishui, named with Zebulon (see Num.1.2).

Ishuil, second son of Saul, by his wife Ahinoam (1Sam.14.19; cf. 50).

Isle (Heb. 'i), a very widely distributed word in many languages for "sea shore." In Job 32.30, A.V. "islands of the innocent" is, however, a mistake (see R.V. and marg.) for "the not innocent." In Is.42.14 it refers to dry shores or banks of a river; other passages refer to the sea shore, not to islands (Gen.10.5; Is.20.6); but some, perhaps, to an island proper (23.2). In some cases the rendering is doubtful (Is.11.11; Je.25.22), and regions on the mainland of Asia Minor may be intended. See Captor, which, as an "island," has been wrongly supposed to be Crete.

Ismachiah, a Levite overseer of offerings during Hezekiah's reformation (2Chr.31.13).

**Ismael.**—1. Joth.2.23 = Ishmael, son of Abraham.—2. [Ishmael, 5.]

Ismi'ah, a Gibeonite; a leader of the warriors who joined David at Ziklag (1Chr.12.4).

Ismaiah, a Gibeonite, the 26th chief, of the family of Beriah (1Chr.8.16).

**Israel.**

I. The name given to Jacob when he wrestled with the angel (Gen.32.28, 29), and connected by the sacred writer with the verb used in the narrative "as a prince hast thou power" (R.V. "thou hast striven"). The verb occurs again only in Ho.12.4.—II. Applied collectively "children of Zion" to the tribes descended from Jacob (Gen.46.8; Ex.1.1, etc.)—III. The northern tribes, as distinguished from Judah, even before the schism (1Sam.11.8; 2 Sam.20.1; 1 K.12.16), and thereafter the kingdom of the Ten Tribes. The name is found on the Moabite Stone and in an Assyrian inscription; but in O.T. the name Hebrew is mostly used either by foreigners or by Israelites in addressing foreigners (Gen.39.14; Ex.1.16.)—IV. After the return from the Exile again used of the whole people (Ezr.6.16; Ne.11.3). [J.R.]

**Israel, Kingdom of.** (1) The prophet Amos prophesies that it was "the latter day of Solomon to announce the division of the kingdom, left one tribe (Judah) to the house of David, and assigned ten to Jeroboam (1K.11.31, 35). These were probably Joseph (= Ephraim and Manasseh), Issachar, Zebulun, Asher, Naphtali, Benjamin, Dan, Simeon, Gad, and Reuben; Levi being intentionally omitted, being the lot of the Levites. The names of Benignus, and probably the whole of Benjamin, and probably the whole of Simeon and Dan, were included in the kingdom of Judah. Of the conquests of David, Moab appears to have been attached to the kingdom of Israel (2K.5.4); so much of Syria as remained subject to Solomon (see 1K.11.24) would probably be claimed by his successor in the N. kingdom; and Ammon, though connected with Rehoboam as his mother's native land (2Chr.12.13), and afterwards tributary to Judah (27.5), was at one time allied (20.1), we know not how closely or how early, with Moab. The sea-coast between chronological tables in existence in the possession of Israel. (2) The population of the kingdom is not expressly stated; and any inference from the numbers of fighting men rests, it must not be forgotten, upon the numbers in the Heb. text, which are often corrupt. [Number.] Jeroboam brought into the field an army of 800,000 men (14.13). If the text be correct, the whole population would perhaps amount to at least three millions and a half. (3) Shechem was rebuilt as the first capital of the new kingdom (1K.12.25; cf. Judg.9.45). Subsequently the "beautiful" (Can.6.4) Tirzah became the royal residence, if not the capital, of Jehu (1K.16.29; 2 K.13.29) and included his successors (15.33, 16.8, 17.23). Samaria was built in a commanding position by Omri (16.24), and remained the capital of the kingdom until captured after a three years' siege by Shalmaneser, king of Assyria (2K.15.9, 10). Jezreel was probably only a royal residence of some of the Israelitic kings. (4) Chronology. The reigns of Archbishop Ussher (d. 1656), as given in the margin of A.V., are incorrect, and have been rightly discarded by R.V. They were made by counting backwards from the date of the fall of Samaria in 722 B.C., a method only likely to be accurate so long as the synchronisms between Israel and Judah were correct. Generally the greater part of the reigns, if not all, were computed from the date of Jeremiah's prophecy. Tradition is not a sufficient basis for chronology. This is not the case, and the duration of the Israelitish kingdom was lengthened by the unauthorized insertion of two interregna of 11 and 9 years respectively. The error was (in fact) one of excess, owing to two regencies, those of Jehoram (6 years) and Jotham (14 years) being counted as separate reigns, instead of being included in the reigns of Jehoshaphat and Uzziah. In the case of Jotham, this mistake was committed twice over; and thus 68 years are reduced to roughly 35 years. The non-recognition of this error had has had the effect of putting the history of Israel out of correspondence with the dates revealed by the monuments. In many cases we find Israelitish kings recorded by the monuments as having been present on occasions some 20 or 30 years after the date fixed by Ussher for their deaths—e.g. Jehu paid tribute to Shalmaneser II. in 841 B.C., while Ussher fixed his death at 856 B.C. The great feature of inaccuracy has also been introduced by the Jewish habit of counting parts of years as entire years. The whole history has, in fact, been pushed back, and the foundation of the king-
dom of Israel must be brought down from 975 B.C. (A.V. marg.) to 930 B.C. The subjoined list will be found sufficiently accurate, and agreeable to the synchronisms recorded in the text, except where they have been altered, though only partially, in order to rectify the mistakes of the miscounted regencies. One fact must be mentioned, though it would be more properly considered under the history of Judah —viz. that the whole of the acts recorded of Jotham are recorded also of his father, Uzziah, a significant proof that his so-called reign was only a regency. [Chronology.]

(5) The detailed history of the kingdom of Israel will be found under the names of its 19 kings. A summary view may be taken in four periods. (a) 930–883 B.C. Jeroboam had not sufficient force of character in himself to make a lasting impression on his people, and failed to found a dynasty. The army soon learnt its power to dictate to the isolated monarch and disunited people. Baasha, in the midst of the army at Gibbethon, slew the son and successor of Jeroboam; Zimri, a captain of chariots, slew the son and successor of Baasha; Omri, the captain of the host, was chosen to punish Zimri; and after a civil war of four years he prevailed over Tibni, the choice of half the people. (b) 883–842 B.C. For some 40 years Israel was governed by the house of Omri. The princes of his house cultivated an alliance with Judah, which was cemented by the marriage of Jehoram and Athaliah. But the adoption of Baal-worship led to a reaction in the nation, to the moral triumph of the prophets in the persons of Elijah and Elisha, and eventually to the extinction of the house of Ahab. (c) 842–715 B.C. Unparalleled tri-

This short-lived greatness ended with the last king of Jehu’s line. (d) 745–722 B.C. Military violence, it would seem, broke the hereditary succession after the obscure and probably confounded reign of Zechariah. An unsuccessful usurper, Shallum, is followed by the cruel Menahem, who, being unable to resist the first attack of Assyria under Pul, became the agent of that monarch for the oppressive taxation of his subjects. The reign of his son Pekahiah was, after one year, cut short by a bold usurper, Pekah. Abandoning the N. and Trans-Jordanic regions to the encroaching power of Assyria under Tiglath-pileser, Pekah was very nearly subjugating Judah, with the help of Damascus, now allied to Israel. The irresolute Hoshea, the next and last usurper, became tributary to his invader, Shalmaneser, betrayed the Assyrian to the rival monarchy of Egypt, and was punished by the loss of his liberty, and by the capture, after a three years’ siege, of his strong capital, Samaria. Some remnants of the ten tribes yet remained in the land after so many years of religious decline, moral debasement, national degradation,
ISRAELITE

anarchy, bloodshed, and deportation. Even these were carried to Assyria, never again, as a distinct people, to occupy their portion of that goodly land which their forefathers under Joshua won from the heathen.

Is'rae'lite. [Israel; Jew.]

Issachar'. (he brings reward).—1. Jacob's ninth son and Leah's fifth child, named from her exclamation at his birth (Gen.30.18). He had four sons at the time of the descent into Egypt (46.13). In the blessing of Jacob (49.14) he is compared to a "bony" (E.V. strong) ass between two burdens, and is said to have been enslaved, with reference (no doubt) to oppression under Sisera (Judg.5.15). In the desert the four clans of Issachar, under Nethaniel, marched with Judah in the van, and the number of the tribe [Palestine] increased by nearly 10,000 men (Num.1.8, 29, 2.5, 7.18, 10.17, 26.25). It furnished Igal as a spy (13.7), and Paltiel as a surveyor (34.25). It stood on Gerizim to respond to the blessings (Deut.27.12); but its lot lay in the plains, where Canaanite chariot forces could act; and it seems to have remained as a nomadic population in tents, as noticed in the blessing of Moses (33.18). It joined Barak in the revolt against Sisera, the battle occurring within the border of Issachar. It furnished also a judge [Tola; Judg.10.1] and a king [Baasha; 1 K.15.27] to Israel (cf. Num. 26.23-25; 1 Chr.7.1-5). The foresight of the leaders of Issachar led them to furnish David with supplies at Hebron (1 Chr.12.32,40), and Omri of this tribe was one of his captains (27.18); but in Hezekiah's time the tribe was blamed for eating the Passover while unclean (2 Chr.30.18). It is last mentioned in Ezek.48.25-33; Rev.7.7. The Tribal Lot corresponded to Solomon's tenth district in part, and partly to the fifth (1 K.4.12,17). It lay E. of the hills of Manasseh (Jos.17.10,11), but some of its cities were occupied by the latter tribe. It included 16 cities in the plain of Esdraelon, and in the hills and Jordan Valley farther E. On N. its border coincided with the S. border of Zebulun and Naphtali, from Jokneam to Shihon near Tabor, and E. of the latter to the Jordan, which formed the E. boundary, while on the W. Taanach and Remeth [Ramoth] were on the border, which ran, from the latter, E. by Rabba'ri to the Jordan.—2. A temple-porter, and recently a Chal. R.C. [Jesseah].—1. (1 Chr.24.21) = Jesseah, 2.

Isshiah'.—1. (1 Chr.24.21) = Jeshiah, 2.

Issue, Running. (See Lev.22.4; Num.5.2; 2 Sam.3.29; but specially Lev.15.) Probably the phrase may be interpreted as a gonorrhoea or syphilis. In Lev.15.3 a distinction is introduced apparently between these two, but probably merely means that cessation of the flux does not constitute ceremonial cleanness, but that the patient must hide the legal 7 days (ver. 13) and perform the prescribed purification and sacrifice (ver. 14). It must be remembered that it was only during the last century that these persons were clearly differentiated; yet in the text cited there is an apparent allusion to their distinctive symptoms, and the whole passage is very suggestive of the elaborate precautions against infection enjoined by the Mosaic law. Assuming it were impossible to distinguish between the two diseases, all the precautions were equally necessary to-day. Ver. 8 is very interesting, as there is no doubt that syphilis can be communicated by the saliva. [F.J.]

Istal'curus. In Ezra 4.40, "son of Istalcurus" is substituted for "and Zabbud" (margin, Zaccaur) of the parallel list in Ezr.8.14.

Ish'ah, second son of Asher (1 Chr.7.30).

Is'iu. [Jesseu.]

Italian Band (Ac.10.1). [Army.]

It'aly. This word is used in N.T. in the usual sense of the period—i.e. in its true geographical sense, as denoting the whole natural peninsula between the Alps and the straits of Messina (Ac.10.1,18; 2; Heb.11.24).

Ith'ial (7 Chr.9.7).—2. A Benjamite, of whom Agur delivered his discourse (Pr.30.1). [Uca].

Ith'amar, youngest son of Aaron (Ex.6.23). After the deaths of Nadab and Abihu (Lev.10.1), Eleazar and Ithamar were appointed to succeed them in the priestly office (Ex.28.1,40,43; Num.3.5,4; 1 Chr.24.2). In the distribution of services belonging to the tabernacle, and its parts, the search of the Israelites, the Gershonites and the Merarites were placed under Ithamar (Ex.38.21; Num.4.21-33). The high-priesthood passed into the family of Ithamar in the person of Eli, but for what reason we are not informed.

Ith'iel.—1. A Benjamite, ancestor of Sally (Ne.4.7).—2. A descendant of Asher (1 Chr.7.37). [Jether, 3.]

Ith'nan, one of the towns in the extreme S. of Judah (Jos.15.23). No trace of its existence has yet been discovered.

Ith'ran, one of the towns in the extreme S. of Judah (Jos.15.23). No trace of its existence has yet been discovered.

Ith'ra', an Israelite (2 Sam.17.25) or Ithmaelite (2 Chr.2.17), the father of Amasah by Abigail, David's sister. [Jether, 3.]

Ith'ran,—1. Son of Dishon, a Horite (Gen.36.26; 1 Chr.1.41).—2. A descendant of Asher (1 Chr.7.37). [Jether, 6.]

Ith'ream, son of David by Eglah, the sixth born in Hebron (2 Sam.5.15; 1 Chr.3.3).

Ith'rite, The, the designation of two of the members of David's guard, Ira and Gareb (2 Sam.23.38; 1 Chr.11.49); possibly = Jairite [Ira], in which case they may have come from Jattir, in the mountains of Judah.
Ittah'-kazin', one of the boundary-marks of Zebulan (Jos.19.13; R.V. Eth Kazin'); between Gath-hepher and Rimmon. [C.G.C.]

Ittai'.—1. "Ittai the Gittite," i.e. native of Gath, a warrior in the army of king David mentioned during the revolution of Absalom. On the morning of David's flight he was among, and apparently commanding, the 600 heroes, who had flocked to his cause. During his wanderings in Judah, and had been with him at Gath (2Sam.15.18,19; cf. 1Sam.23.13,27.2, 30.9,10). The king besought him not to attach himself to a doubtful cause, but to return "with his brethren," and abide with "the king," i.e. either, sarcastically, Absalom, or his own king Achish (25s, and the). But Ittai is firm; he is the king's slave, and wherever his master goes he will go. When the army was numbered and organized by David at Mahanaim, Ittai again appears, now in command of a third part of the force (2Sam. 18.2,5,12).—2. Son of Ribai, from Gibeah of Benjamin; a hero. David's guard (23.29). It is improbable he was on the N. border of Palestine, lying along the S. base of mount Hermon, only mentioned in Lu.3.1. Ituraea, with the adjoining provinces, fell into the hands of a chief called Zenedorus; but about 20 b.c. they were taken from him by the Roman emperor, and given to Herod the Great, who bestowed them on his son Philip. Philip places Ituraea N. of Bashan and near Damascus (v. 23); apparently the Jedur district [Geshur] N. of Argob. It is a table-land with an undulating surface, and has little conical and cup-shaped hills at intervals. The surface of the ground is covered with jagged rocks. The rock is all basalt, and the formation similar to that of the Levah. [Argob.] The Jedur contains 38 villages, 10 of which are now entirely desolate, and all the rest contain only a few families of poor peasants, living in wretched hovels amid heaps of ruins.

Ivah' or Avah'. The first form is mentioned twice (Dn.5.13; cf. Is.37.13) with Hena and Sepharvaim, and the second once (2K.17.24) with Babylon and Cuthah. Its identification with the modern Hitt on the Euphrates, between 'Anah and Ramadike, seems improbable. It is also thought to be Emma, the modern 'Imn, between Antioch and Aleppo; but this would presuppose the unusual change between v (= waw) and mm. Perhaps two different places.

Ivory (Heb. shen, in all passages except 1K.10.22 and 2Chr.9.21, where shen-habbin is so rendered). The word shen literally signifies a tooth of any animal, but here denotes the tusks of elephants, this being rendered certain by the passage from 1K., where habbin is the equivalent of hab, the Tamil name of the elephant. The Assyrians appear to have carried on a traffic in ivory with India, and called the elephant habba. According to one rendering of the passage, their artists supplied the Tyrians with carvings in ivory from the isles of Chittim (Ezk.27.6); and on the Black Obelisk in the British Museum an elephant is represented (c. 840 B.C.). Among the merchandise of Babylon, enumerated in Rev.18.12, are included "all manner vessels of ivory." The ivory throne of Solomon was overlaid with gold (1K.10.18; 2Chr.9.17). This ivory was supplied either by the caravans of Dedan (Is.21.13; Ezek.27.15), or was brought, with apes and peacocks, by the navy of Tharshish (1K.10.22). [A.P.E.] The Egyptians at an early period made use in decoration of ivory, which was principally brought from Ethiopia (Herod. iii.114). Egyptian merchants traded for ivory and onyx stones to Barygaza, the port to which was carried the commerce of W. India from Ozeene (Peripl. c. 49). In the early ages of Greece ivory was frequently employed for purposes of ornament. The "ivory house" of Ahab (1K.22.39) was probably a shrine with the walls panelled with ivory, like the palace of Menelaus described by Homer (Odys. iv.73). Beds inlaid or veneered with ivory were in use among the Hebrews (Am.6.4), as among the Egyptians. It is difficult to determine whether the "tower of ivory" of Can. 7.1 is a figure of speech, or whether it is based on an original, such as the ivory throne of Solomon above mentioned (cf. Rev.20.11). By the Phoenicians ivory was employed to ornament the boxwood rowing benches (or "hatches," according to some) of their galleys (Ezk.27.6). Ivory is found, by excavation in ruins, in Assyria, Phoenicia [Phenicia], and Palestine, and is represented as brought to Egypt by Phoenicians. [Elephant; Tarshish.]

Ivy, the common Hedera helix. 2Mac.6.7 refers to the familiar classical custom, "to go in the procession of Bacchus with garlands of ivy"—"in solemnities and high feasts of which god, the people of Thracia even at this day are furnished from this tree, and doe with Ivi e set out and garnish the heads of their launces, pikes, and javelins, their mounrons also and targuets "(Pliny).

Izehar', Izeharites (Num.3.19,27) = Izhar, Izharites, as R.V.

Izhar', son of Kohath, grandson of Levi, uncle of Aaron and Moses, and father of Korah (Ex.6.18; Num.3.16; 1Chr.6.2,18), and head of the family of the Izeharites, or Izeharites (Num.3.27; 1Chr.24.22,26.23,29).

Izrahiah', a man of Issachar, of the family of Uzzi (1Chr.7.4).

Izrahite, Thie, the designation of Shemhuth (1Chr.27.8), probably for Zerahite—that is, of Zerah...

Izri', a Levite leader of the fourth course or ward in the service of the house of God (1Chr. 25.11). In ver. 3 he is called Zeri.
Jaasau', one of the Bene-Bani who put away his foreign wife (Ezr.10.37).  

Jaasil', the Benjamite chief in David's reign, and son of Abner (1 Chr.27.11).
